THE ILLUSTRATED BIBLE DICTIONARY
THE ILLUSTRATED BIBLE DICTIONARY

EDITED

BY THE REV. WILLIAM C. PIERCY, M.A.
DEAN AND CHAPLAIN OF WHITELANDS COLLEGE

WITH COLOURED MAPS AND 365 ILLUSTRATIONS

MONUMENT AT SAMALA

NEW YORK
E. P. DUTTON AND COMPANY
1908
PREFACE

MODERN scholarship, research, and discovery have thrown a flood of new light upon the Bible during recent years; especially in regard to textual criticism, comparative religion, the knowledge of Oriental languages and dialects, the deciphering of inscriptions, archaeology, geography, etc.

It has been felt, therefore, that the time was ripe for putting such results before the general public in a compact and accessible form, such as would be best found in a Bible Dictionary in one volume; and a very large number of bishops, scholars, teachers, archaeologists, linguists, and divines were consulted, with the result that their replies showed a general consensus of opinion as to the need of such an enterprise, and to them the Editor is indebted for their warm approval and encouragement and for much valuable advice. The spirit in which the endeavour has been made to produce a volume worthy of such commendations of the scheme is best expressed by a quotation from our prospectus: "The defence of Holy Scripture is a sacred duty of the Church of God; and the present work has been carried out in the faith that it will be a contribution to a deeper knowledge of, and therefore greater reverence for, the word of God"; and it is the earnest desire of the Editor and contributors that this aspiration may be realized.

While this Dictionary is frankly "conservative" in the right sense of that much misunderstood term, none of the additions of value made to our knowledge by "criticism," which are within the scope of a volume of this size, have been neglected. On this point the definition of the word "conservative," given in our instructions to writers, may help to avoid misinterpretation of our purpose: "By 'conservative' is meant that attitude of mind which, while welcoming all ascertainment results of investigation, declines to accept any mere conjectures or theories as final conclusions, and believes that the Old Testament will emerge with reinforced authority from the ordeal of criticism as the New Testament did in the last generation." In short, the aim of the writers has been, to quote our prospectus again, to combine "modern research with ancient faith." The need of this was excellently expressed, many years ago, by Bishop Lightfoot, and his words remain equally true to-day: "In criticism as in politics, the voice of the innovators, even though they may not be numerous, cries aloud, and thus gives the impression of numbers; while the conservative opinion of the majority is unheard and unnoticed."

The list of scholars who have contributed to the Dictionary is the best guarantee of the thoroughness of the work, and special attention has been given to the archaeology, geography, bibliography and illustrations, and it is hoped and believed that more that is of real illustrative value has been gathered together under each of these heads than has ever before been attempted in a work of this size, including much hitherto unpublished information; while the articles on the most important topics of Divinity and of Textual questions are all written by acknowledged experts and are confidently commended to the reader's perusal.

So far as the necessary limits of space have allowed, completeness has been
aimed at, and, thanks to the exceedingly kind and painstaking efforts of contributors, the Editor ventures to think that this will be found to have been attained to an even surprising degree, considering the compass of the volume.

The primary aim has been to make it really, as it is called, a Dictionary of Bible names and things, and it is believed that the name of every person and place is included; but it has, to our great satisfaction, been found possible, by strict condensation, by the avoidance of verboiness, and by the exclusion of such notes as belong more properly to a commentary or to a word-book, to admit also articles on ideas and doctrines contained in the Bible.

The question of how far the high aims set forth have been attained is for readers to judge, but it is with deep gratitude to the many contributors that the Editor confidently records his belief that the more closely the volume is studied and used, the more it will be found to be of unique value both to the student and to the general public.

It remains to give a few explanations of the details of the plan of the book which will aid in the intelligent use of the volume.

*Alternative Views.*—It was entirely in accordance with our general purpose and aim that writers, while selected with great care, when once entrusted with their work were given a free hand, and, consequently, varying opinions and conclusions upon matters of detail will be found in different articles; and, in the most important of the cases where this occurs, cross-references are given to enable the reader to see readily both views and to choose between them. The student will undoubtedly find that this liberty of stating different views has contributed very greatly to the value of the work. No contributor must be taken to assent, of necessity, to the conclusions in any articles but his own, nor must authors be in all cases considered to be entirely responsible for the cross-references inserted in, or for the bibliographies subjoined to, their articles.

*Bibliography.*—This has been drawn up in each case, not necessarily to reinforce the particular views set forth in the articles—on the contrary, the aim has often been to indicate where other views might be found, which, owing to considerations of space, could not be fully set forth—but primarily to encourage students to read more thoroughly the subject treated. With this purpose in view the lists of books have been very carefully selected. Any attempt—which, moreover, could never be anything but a failure—to give an “exhaustive” bibliography only tends to discourage and perplex the student, and the aim of our bibliographies is to help, and therefore to direct students to the most accessible sources of further knowledge, rather than to make a vain and pretentious display of “authorities.”

*Cross-references.*—The system adopted has been to print the name of the article referred to in capitals, inserted in square brackets when not to be read continuously in the text, or without the brackets when intended to be so read. To this rule two exceptions only have been made, and neither of them will prove troublesome to the reader—(a) in a very few articles, and those only some of the longer ones, it was found convenient to use capitals for the headings of sub-divisions, where there was no possibility of the intelligent reader mistaking them for cross-references; (b) at the special request of one contributor of the Jewish Faith, who had a conscientious objection (which it was a real pleasure to the Editor to respect) to write the sacred Name Jehovah, the word God or Lord in capitals (as in A.V.) appears in his articles wherever Jehovah is intended, and the same familiar form (Lord) has been allowed to stand, with the same meaning, in some other articles. In all other cases words in capitals invariably indicate that further information bearing upon the subject in hand may be found under the heading quoted.

*Index.*—The cross-references, together with the alphabetical arrangement of the book, are the most valuable and complete “index” which it is possible
to have, and one which is in the form most convenient to the student; and they obviate, to a great extent, the necessity for exhaustive indexes. The common failing of many indexes is to include so large a variety of trivial matter as to submerge their usefulness in a flood of detail and to weary the searcher after particular information. In the case of a book which is arranged alphabetically, extensive indexes are a confession of failure in carrying out a plan that ought, for the most part, to be in itself sufficient. Hence we only include in this volume one index, for the insertion of which there exists a special reason. The vast majority of the passages of Scripture, in regard to which information will be sought herein, will be readily found under the head of the proper names or subjects which are naturally suggested by the passage itself. But there must remain a comparatively small number which are treated, for the most part incidentally, under a heading where the general reader might not readily think of searching for them. Therefore a brief supplementary index of such passages only is added at the end of the volume.

Bible References are always to the Authorized Version unless otherwise stated.

Headings.—The spelling in the headings of articles is uniformly that of the Authorized Version, but, where this is obsolete, the usual form is used in the text, and where necessary a cross-reference is also given under the more familiar orthography. The accents attached to most of the proper names in the headings are intended as a guide to the correct Hebrew or Greek accentuation; but some very familiar names—e.g. Bethlehem, Deborah, etc.—which have become established in the English language with an accentuation different from that which would be correct in the original tongue, have been left unaccented. Doubtless, also, in many cases of accented names, English readers may prefer to use a current "English" form, but the student will be grateful for the indication of the original accentuation.

Transliteration of Hebrew names and words has been uniformly adopted, except in cases where there was a special reason for retaining the Hebrew characters—as, e.g., in the case of an emended reading based upon the form of the letters, or of a distinction between two similarly pronounced words. For the system of transliteration adopted the several writers are not responsible; a practical uniformity in this respect being obviously desirable. The Editor desires to acknowledge with gratitude the care which has been exercised by those who kindly undertook the, by no means light, task of checking all the transliteration:—in the case of the Hebrew, the Rev. Canon J. T. Fowler, D.C.L.; in the Syriac, Arabic, etc., P. S. P. Handcock, Esq., M.A., of the British Museum.

The general aim has been to enable the reader who is unacquainted with these languages to read intelligently and to recognize the same words when used in different connexions.

The system of Hebrew transliteration here followed is on that scientific basis which is adopted by Davidson and others. Each consonant, used as such, is indicated by a single sign, aleph by 'a, ayin by ′a, heth by 'h, and samekh by h, ṭ, and s, cadhe by ẓ, but beth, gimel, etc., by bh, gh, etc., when immediately following vowel sounds. Essentially long vowels (usually expressed in Hebrew by quiescent consonants) are marked by the circumflex ('), accidentally long by ′; ordinary short by the unmarked vowel, and the shewas by ʾ, ʿ, and ʾ. The accent in Hebrew words is normally on the last syllable; in certain cases it is on the penultimate, but never further back.

In our representation of other Semitic words (Arabic, Syriac, etc.) we have adopted the current system of transliteration; the only exception being the adoption of q instead of k as the symbol of the Semitic qoph. In a very few
instances, in regard to these less-known languages, the special wishes of authors have been allowed to override an iron uniformity, in cases where confusion in the mind of the intelligent reader would be an impossibility. Such are (a) the variations between Tell and Tel, in regard to which strong differences of opinion exist amongst experts; this word having been left in each case as the several authors have written it; (b) Dr. Pinches and some others particularly desired to be allowed to use the symbol š in place of our usual transliteration (sh) in Assyrian names upon which they write with special authority; (c) the form Peshittā often appears, by desire, as representing more closely the actual late Syriac pronunciation than the orthographically correct Peshittā which other writers have preferred; and finally (d) the familiar "English" forms of some names—e.g. Jehovah, Assur-bani-pal, Kimchi, etc., etc.—have been commonly used, although the more exact transliteration has been inserted when desired.

In conclusion, the Editor brings to a close an arduous undertaking with the expression of a meed of thanks which he feels most deeply and sincerely to be due to the hundred helpers who have by their courtesy, consideration, care, and enthusiasm made that task a very pleasant one. It is by no means a merely formal acknowledgment on his part when he places this gratitude upon record. Their names will be found in the adjoining list of writers; but to these must be added the publisher to whose enterprise and foresight the conception of the volume was originally due, and whose unvarying kindness and unspiring liberality have enabled it to be carried out on a scale commensurate with its importance; and also those workers who have taken a less prominent part in the production of the volume and in checking the several sets of proofs through which it has passed: and very especially to A. H. Hallam Murray, Esq., who has personally expended a very large amount of valuable time, and given to the Editor the benefit of his great experience, in supervising the obtaining and the production of the large number of new illustrations which adorn this volume—a task the magnitude of which only those who have assisted in a similar undertaking can appreciate; and last, but by no means least, to Colonel C. R. Conder, LL.D., whose most valuable assistance and minute care have been unsparingly given—to the great advantage of the book—in the reading of the whole of the final proofs. The ultimate responsibility in all these details rests, however, with none of those named, but with the Editor only. All shortcomings must be placed to his account; all credit for the success and usefulness of the volume to the account of such a staff of fellow-workers as the Editor sincerely feels can never have been equalled for loyalty, kindness, promptness, and careful work in their several departments. And, finally, if the work be blessed, as it is our earnest hope it shall be, to the building up and strengthening of an intelligent faith in, and study of, Holy Writ, Laus Deo.

WM. C. PIERCY.

A

Aaalar. [ADDAN.]

Aaron, son of Amram and Jochebed, and elder brother of Moses and Miriam (Num. 26. 59), a Levite, who could "speak well" (Ex. 4. 14), and was therefore qualified to be the "mouth" and "interpreter" of his brother Moses, who was slow of speech (4. 16). He thus became not only the organ of communication with the Israelites and Pharaoh (4. 30, 7. 2), but also the actual instrument of working and the miracles of the Exodus (7. 19), and his prominence in the work of his people's deliverance was recognized in later days (1Sam. 12. 6; Ps. 77. 20). He was indispensable to his brother, whose weary arms he helped to uphold during the struggle against Amalek (Ex. 17. 12), but was incapable of leadership by self, yielding to pressure from the people in Moses' absence and making the golden calf (32. 4). His weakness was rewarded by seeing "a feast to the Lord" degraded to the lowest form of heathen sensuality (Ex. 32. 5-25; 1Cor. 10. 7).

He was brought to a sense of his sins by Moses' rebuke (Ex. 32. 22), and was forgiven by God in response to Moses' prayer (Ex. 32. 33; Deut. 9. 20). It was after this that Moses by God's command delegated to Aaron the office of High-Priest (Ex. 29; Lev. 8). The solemnity of the office and the need for reverence in the discharge of its duties was vindicated against Miriam, who with her elder brother Aaron, and Moses' two eldest sons, for offering strange fire, perhaps through being intoxicated (Lev. 10. 1-2, 9). Thenceforward Aaron is specifically "the priest" (Ex. 31. 10, 35. 19, 38. 21; Lev. 13. 2; Num. 18. 25), who stays a plague by an offering of incense (Num. 16. 40-48); to his charge the tabernacle is committed (4. 5, 19, 27, 31); and to him the Levites are exhorted, as a proof of the right of the family of Aaron to the priesthood. This rod was to be put back "before the testimony; according to Heb. 9. 4, it was in the ark. [ARK OF THE COVENANT.] See further, JEWISH ENCYC. 1. 5. [III.]

Ab (father), an element in the composition of many proper names, of which Abba is an Aram. form. Applied to God by Jesus Christ (Mark 14. 36), and by St. Paul (Rom. 8. 15; Gal. 4. 6).

Ab. [MONTHS.]

Ab acue (2 Esd. 1. 40) = HABAKKUK.

Abaddon (abaddôn; LXX. "Αβαδών; lit. ruin, destruction) occurs in O.T. in the Wisdom literature only. It is always (unless Job 31. 12 is an exception) a proper noun, denoting that part of the intermediate state (she'ôl) which is reserved for the punishment of the wicked. In Job 28. 6, Pr. 15. 11, 27. 20, it is joined with she'ôl; in Ps. 88. 11 with the grave; in Job 28. 22 with death. This last passage, in which Abaddon and Death are personified, forms a transition to N.T. usage.

In Rev. 9. 11 Abaddon appears as Apollyon (Ἀπόλυων, "Destroyer"), the angel, not of Sheol or Hades, but of the Abyss (Gehenna), and king of the tormenting locusts. Perhaps we have here, not a person, but a vivid personification, so that in N.T. Apollyon or Abaddon is simply a name of hell (Gehenna). Rabbinical usage, which makes Abaddon the lowest compartment of Gehenna, confines it. [ASMÔDEUS.]

[CH.]
Abdi'as, son of Jezedus (1 Esd.8.35) = Obadiah, 7, son of Jehiel (Ezr.9.3).

Abag tha, one of the seven eunuchs in the household of Abas-meru' of Ahasuerus (Esth.4.10).

Abana' (Amanah, R.V. marg.), one of the "rivers of Damascus" (2 K.5.12). The Barada and the 'akaw are now the chief streams of Damascus, and there is little doubt that the former is the Abana and the latter the Pharpar. The Barada rises in the Anti-libanus near Zedah, and is joined by an affluent from 'Am Efîj further S.; the main source is some 23 miles from the city, after flowing through which it runs across the plain, till it loses itself in the lake Bahret el-Qobabeh. [c.r.c.]

Abarim, the mountains E. of Jordan, in Moab (Num.27.12; 35.47, 48; Deut.32.49) and also R.V. Je.22.26, A.V. passages. [Nero.] For Ite-abarim, see 1 M. [c.r.c.]

Abba'. [Ab.]

Abba'.—1. Father of Adoniram (1 K.4.6).

—2. Son of Shammua (Ne.11.17) = Obadiah, son of Shemaiah (1 Chr.9.16).

Abdeel', father of Shelemeiah (1 Chr.36.26).

Abdai'as, one of the exiles who returned from Babylon with Zerubbabel (Ezr.2.48).

Abdias (2 Esd.1.59) = the prophet Obadiah.

Abdiel, one of the Gadites settled in the land of Bashan (1 Chr.5.15) in the days of Jotham king of Judah.

Abdon (tillage; Jos.21.50; 1 Chr.6.71). Cf. Jos.19.28, where Hebron (R.V. Ebron) is perhaps a clerical error for Abdon. [Hebron, 2.] A Levitical town of Asher. Now 'Abidhe, a ruin 10 miles N.E. of Archav (Vandevalde). [c.r.c.]

Abdon/Abdon (tillage) = perhaps one of Nehbo's names in Egypt. [Nehbo.]

Abel, Abel, Abil' (Heb. 'ebel, i.e. breathe, vanity, possibly so called from the shortness of his life, or else from the bab. abin = "son"), the second son of Adam, murdered through jealousy by his brother Cain (Gen.4.1-16; 1 Jn.3.12). Jehovah showed respect for Abel's offering, but not for that of Cain, because Abel "by faith offered a more excellent sacrifice than Cain" (Heb.11.4). In Mt.23.35 our Lord speaks of Abel as the first martyr, and in Heb.12.24 the death of Abel is contrasted with that of Christ as pleading not for pardon, but for vengeance. The place of his murder and his grave are shown near Abil (Ameinari); a tradition as to his burial still lingers there (Stanley, Sinai and Pal. ed. 1885, p. 407).

Abel (Arab. abyh, a "moist" meadow, or grass near a stream). In Gen.50.8 there is a play on the word as meaning also "weeping." —1. "THE GREAT ABEL" (1 Sam.6.18), in the field near Beth-shemesh, should apparently read "the great 'ebên" (or stone), as in LXX. A site supposed to be Ebenezer (probably now the village Deir Abin, 2 miles E. of 'Ain Shems, Clermont-Ganneau) was shown in 4th cent. A.D. "close to Beth-shemesh" (Euseb. Onomasticon). Elsewhere it is connected with this Abel. —2. ABEIL, BETH-MA'ACHAH (Zedah). It was a town (2 Sam.20.14,15) near the town of Dan (1 K.15.20), taken by Assyrians in 734 B.C. (1 K.15.29), otherwise ABEIL-MAT'M (meadow of waters, 2 Chr.16.4), probably Abi, a village on a hill just E. of the main Jordan source, 6 miles W. of Bimâs, in the N.E. corner of the land of Israel. [Beth-ma'achah.] It was a "mother" city (2 Sam.20.18) of Israel. The speech of the wise woman of Abel is obscure, and the LXX. differs from the Hebrew—perhaps it means: "they say, first of all, that they ask a question in Abel, and so have ended... why wilt thou swallow up the inheritance of the Lord?" —3. ABEIL-MEHODIH, in the Jordan Valley (Judg.7.22), noticed with Bethshean (1 K.4.12). The house of Elisha (19.16) is placed by Eusebius 10 miles S. of Scythopolis (Onomasticon), or at the present 'Ain Hejbeh. —4. ABEIL-MIZRATHIM (Gen.50.11), between Assir and Zin. "Second Joshua" is a difficult phrase here, but perhaps Vor-dan (an Assyrian) meant "the great river," or Nile. —5. ABEIL-SHITTIM, the valley opposite Jericho E. of Jordan (Num.33.39). [Shittim.] It should be noted that these sites (except 4, which is not fixed) are all well watered. —6. ABEIL-CERAMIM. [Vineyards, Plain of.] A bez (white), a town of Issacher, perhaps between Kishion and Rehesheth (Jos.19.20). Possibly the ruin el Beidah ("the white") in the plain 4 miles N.E. of Jokneam. [c.r.c.]

Abi', wife of Ahaz, mother of Hezekiah (2 K.18.2). Her name is Abijah in 2 Chr.29.1. Her father's name was Zachariah; perhaps the Zechariah of Is.8.2.

Abia', Abi'ah, or Abijah'.—1. Son of Becher, the son of Benjamin (1 Chr.7.8). —2. Wife of Hezron (1 Chr.2.24). —3. Second son of Samuel, whom together with his eldest son Joel he set up to be a judge in Benjamin (1 Chr.6.28). The corruptness of their administration was the reason alleged by the Israelites for their demanding a king. —4. (1 Chr.3.10; Mt.1.7) = Abijah or Abijah. 2—5. (2 Chr.29.1.) [Abi'.] —6. [1 M.1.5.] [Abijah, 4.]

Abi-albon. [Abel.]

Abiasaph (Ex.6.24), otherwise written Eblaisaph (1 Chr.6.23, 37, 9.10), the head of one of the families of the Kohathites (a house of the Kohathites), but his precise genealogy is somewhat uncertain. In Ex.6.24 he appears at first sight to be represented as one of the sons of Korah, and as the brother of Assir and Elkanah. But in 1 Chr.6.22, 23 he appears as the son of Elkanah, the son of Assir, the son of Korah. Probably, therefore, in Ex.6.24 "the sons of Korah" merely mean the families into which the house of the Kohathites was subdivided. Among the remarkable descendants of Abiasaph, according to the text of 1 Chr.6.13-27, were the prophet and Elkanah his father (1 Sam.1.1), and Heman the singer; but Eblaisaph seems to be improperly inserted in ver. 17.

Abiathar (father of plenty, or, the Great one is father), high-priest and fourth in descent
from Eli, the line of Ithamar, the younger son of Aaron. Abiathar alone of all the sons of Ahimelech the high-priest escaped the slaughter inflicted upon his father's house by Saul (1Sam.22). [AHIMELECH; DAVID.] Abiathar, having become high-priest, fled with an ephod to David, and was thus able to inquire of the Lord for him (1Sam.23.9,30,7; 2Sam.2.1,5,19, etc.). The fact that David had been the unwilling cause of the death of all Abiathar's kindred, coupled with his gratitude to his father Ahimelech for his kindness to him, made him all his life a firm and steadfast friend to Abiathar, who on his part was firmly attached to David. Abiathar adhered to him in his wanderings while pursued by Saul; was with him while he reigned in Hebron (2Sam.2.1-3), the city of the house of Aaron (Jos.21.10-13); carried the ark before him when David brought it up to Jerusalem (15.1). He continued to hold his position in Solomon's reign (2Sam.21.25), and during the time of his son and successor, Zadok, the high-priesthood was banished to his native village, Anathoth, in the tribe of Benjamin (Jos.21.18), Solomon sparing his life only because of his long service to David, and conferring his high-priesthood on Zadok (1K.2.27,35). Two difficulties are connected with Abiathar. (1) It is difficult to account for the manner in which he came to hold such an eminent position and to account for the double high-priesthood. Zadok was descended from Eleazar, the elder son of Aaron, and is said to have joined David while he reigned in Hebron (1Chr.2.28,38). From this time we read, both in the books of Sam. and Chr., of Zadok and Abiathar the priests; Zadok being always named first. Yet we are told that Solomon himself put Zadok in the room of Abiathar. Perhaps the superior strength of the house of Eleazar, which enabled it to furnish 16 out of the 24 courses (1Chr.24), contributed to the precedence given him over Abiathar. It is remarkable here, first, Saul's cruel slaughter of the priests at Nob, where Abiathar was; secondly, the wisdom and sagacity of the wise Abiathar, led to the fulfilment of God's denounced against the house of Eli (1K.2.27). (2) In 2Sam.8.17, in the duplicate passage 1Chr.18.16, and in 1Chr.24.3,6,31, we have AHIMELECH substituted for Abiathar, and AHIMELECH the son of Abiathar instead of Abiathar the son of Ahimelech, whereas in 2Sam.20.25, and in every other passage in O.T., we are uniformly told that it was Abiathar who was priest with Zadok in David's reign, and that he was the son of Ahimelech, and that Ahimelech was the son of Abihu. The difficulty is increased by finding Abiathar spoken of as the high-priest in whose time David ate the shew-bread, in Mk.2.26. However, the evidence in favour of David's friend being Abiathar the son of Ahimelech precedes so strongly, that one can only suppose that the error was a clerical one originally, and propagated from one passage to another. The mention of Abiathar by our Lord, in Mk.2.26, might perhaps be accounted for, if Abiathar was the person who persuaded his father to allow David to have the bread, and if, as is probable, the loaves were Abiathar's (Lev.24.9), and given by him with his own hand to David.

[A.W.S.]

Abiathar or Abida, a son of Midian (Gen.25.4; 1Chr.1.33).

Abidan, chief of Benjamin at the Exodus (Num.1.11,2.22,7.66,65,10.24).

Abiel.—1. The father of Kish and Ner, and consequently grandfather of Saul and Abner (1Sam.9.1,14-31). According to 1Chr.8.32,9.30, Ner was father of Kish, a mistake possibly due to an error of the scribe; but see NEK.

—2. One of David's mighty men (1Chr.11.32). In 2Sam.23.31 he is called Abi-albon, which Busse reads Abibaal (Sacred Books of O.T. p. 80). [H.C.B.]

Abiezer.—1. Eldest son of Gilead, and descendant of Manasseh, and appointed at one time the leading family of the tribe (Jos.17.2; 1 Chr.7.18; Num.26.30, where the contracted form Jeezer, Heb. Fezer, is given). In Chronicles Abiezer is in the present state of the text, said to have sprung from the sister of Gilead (1Chr.7.18). He was the ancestor of Gideon, the ancient national hero, said to have been born of a lowly family (Num.1.36-42); and in an adjectival form ('the Abiezrite') in Judg.6.11,24,8.32.—2. One of David's "mighty men" (2Sam.23.27; 1 Chr.11.28,27.12).

Abiga il.—1. The beautiful wife of Nabal, a wealthy owner of goats and sheep in Carmel. When David's messengers were slighted by Nabal, Abigail interceded for him, supplied David and his followers with provisions, and appeased his anger (1Sam.25.14-35). Ten days later Nabal died, and David made Abigail his wife (vv. 36-42). By her he had a son, called Chileab in 2Sam.3.3, but Daniel in 1Chr.3.1.—2. A sister of David, married to "Ithra an Israel" (1Sam.17.25), more correctly rendered, the Ishmeelite (11.2,17), and mother, by him, of Amasa. [Nahash.] Abihail.—1. Father of Zuriel, chief of the Levitical family of Merari, a contemporary of Moses (Num.3.35).—2. Wife of Abishur (1 Chr.2.29).—3. Son of Huri, of the tribe of Gad (1 Chr.5.14).—4. Daughter of Eliab, the elder brother of David; she was married to the A.V. makes AbiahaI the wife of Rehoboam, but according to R.V. she was the mother of Rehoboam's wife Mahalath.—5. Father of Esther and uncle of Mordecai (Esth.2.15,9,29).

Abihu, 2nd son of Aaron (Ex.6.23); accompanied Moses to the top of Sinai (Ex.24.19); ordained priest (Ex.29.1); consumed by fire from heaven for offering "strange fire" (Lev.10.1,2; Num.3.4). [H.C.B.

Abi'hu, son of Bela, 3 (1 Chr.8.3).

Abijah, or Abijam.—1. The son and successor of Rehoboam, king of Judah (1K.14.31; 2Chr.12.16). He is called Abijah in Chronicles, Abijam in Kings, the latter name being probably an error in the MSS. He began to reign in the 18th year of Jeroboam, and reigned 3 years (2Chr.13.1,2). From 1K.15.7 we learn that Abijah endeavoured to recover the kingdom of the 10 tribes, and made war on Jeroboam. We are also told (3) that he walked in all the sins of Rehoboam (idolatry and its attendant immoralities, 1K.14.23,24), and that his heart
wants not perfect before God, as the heart of David his father." In 2Chr.13 his war against Jeroboam is more minutely described; he was successful in battle, and took the cities of Bethel, Jeshanah, and Ephraim, with their dependent villages. It is said that his army consisted of 400,000 men of Israel, and of Jeroboam's 800,000, of whom 500,000 fell in the action. But our MSS. are frequently incorrect as to numbers, and there are reasons for reducing these to 40,000, 80,000, and 50,000. Nothing is said in Chronicles of his sins, but we read that he "waxed mighty, and married fourteen wives," whence we may infer that, elated with prosperity, he, like his grandfather Solomon, fell, during the last two years of his life, into sin. As he was succeeded by Asa. — 2. The second son of Samuel, called Abia in A.V. [Abia, Abiah, 3.]—3. The son of Jeroboam I, king of Israel, in whom alone, of all the house of Jeroboam, was found "true Israel," meaning toward God, and who was therefore the only one of his family who was suffered to go down to the grave in peace. He died in his childhood, immediately on his mother's return from the prophet Abijah, to whom she had been sent by Jeroboam to seek help in the child's sickness (1K.14.18).[4] A descendant of Eleazar, who gave his name to the 8th of the 24 courses into which the priests were divided by David (1Chr.24.10; 2Chr.8.14; Ne.12.4.17). To this course belonged Zacharias, the father of John the Baptist (Luk.1.5). —5. One of the priests who entered into a covenant with Nehemiah, who was walking in God's law (Ne.10.7), unless the name is rather that of a family, and the same with the preceding.

Abilene (Luk.3.1). The passage refers to 15th year of Tiberius, and should therefore read, "Philip tetrarch of Ituraea, and of the region of Trachonitis, and of that of Lysanias, who was tetrarch of Abilene." It is thus distinguished from Abila (Tell Abil) in Bashan. [Decapolis.] It is called by Josephus the "kingdom of Lysanias" (2 Wars xi.5, xii.8), or the "tetrarchy of Lysanias" (20. Ant. vii.1), given to Philip and afterwards to Agrippa with its capital at Abila (19. Ant. v.1). Lysanias was the grandson of Simon of Miletus, who ruled at Chalcis in Lebanon (14. Ant. vii.4) about 50 B.C., and near Damascus (13. Ant. xvi.3). By 30 B.C. the "house of Lysanias" had fallen into the hands of the robber Zenodorus, who died in 20 B.C. (15. Ant. x.3; 2 Wars xx.4), but the region was still called "Abila of Lysanias" in Agrippa's time (41 A.D. [19. Ant. v.1]), though it is clear that Lysanias was not ruling in the 15th of Tiberius. It is clear also that Abilene lay in Lebanon. The site of its capital is now called Suj Wady Barada, "the narrow place on the Lukan River," being at a pass through which a Roman road was cut. The ruins near the village, and S. of the river, include foundations of a small Roman temple, and rock-cut tombs N. of the stream, with busts in low relief over the doors, and Gk. texts. Some of them Christian (Syr. W. Pal., Special Papers, pp. 112-113). On the crag above, on S., the tomb of Mol is shown, with a legend from the legend of St. Esdras (Gen.4.14). But one most important text is in Latin, on the rock wall of the Roman road-cutting (Waddington, No. 1874), relating that the emperors M. Aurelius and Verus (c. 163-165 A.D.) restored the road damaged by the river by cutting the mountain "impendit Abilennm," or at the expense of the people of Abilene. [e.g.c.]

Abiameel, a descendant of Joktan (Gen.10.28; 5Ch.1.22), and probably the progenitor of an Arab tribe.

Abimelech (Melchik is father). There was a Canaanite deity, Mick. In the Amarna tablets (c. 1400 B.C.) Abimilki is the governor of Tyre, who was a vassal of Egypt; melchk in Heb. = king.—1. (Gen.20.21.) The king of Gerar, who took Sarah into his barm, but made amends to Abraham on learning her true relationship. Afterwards he allied himself with Abraham and settled their dispute as to the well at Beer-sheba.—2. (Gen.26.) Another king of Gerar has a similar experience with Isaac, and makes a similar appeal to the Lord.—3. (1Sam.13.1.) A tetrarch of Judea, who might be called "J." and treat them as variants. [Genesis.] The mention of Philistines (21.32, 34, 26.1) is perhaps prolept. [Philistines. — 3. Title of Ps.34. Achish is intended. Perhaps Abimelech (= father king) was, like Pharaoh, not a personal name.—4. Gideon's son (Judg.9.9) by a Shechemite woman, and called Gideon's servant; but she was related to the lords (Baalim) of Shechem and had probably contracted a Sadiqa marriage. [Judges, Book or. ] On Gideon's death, Abimelech gained the jealous Ephraimites by the appeal—would they obey Gideon's sons?—while his relations intrigued with the Canaanites, who were dominant in Shechem and boasted their descent from Hamor. With money from the temple of Baal-berith he hired braves and slew all his brethren except Jotham on one stone. The words imply a formal execution. Then the Shechemites elected him king by the ternich [or "oak"; Pillar, Plain or] of the pillar (Judg.9.6; cf. Jos.24.26). He reigned 3 years. But Shechem, situated near the junction of two trade routes, was a nest of bandits. Abimelech suffered the fate of usurpers. He could not control the worthless people through whom he obtained power. He returned to Mol (Judg.17.11), which was Zeno, governor of Shechem. A conspiracy was formed against him at the harvest feast of Baal-berith, but with early intelligence from the double-dealing Zebul, he defeated Gaal, and on the next day by an ambush seized Shechem and destroyed it. Subsequently he burnt out the ruins, and in the chamber of the temple (Millo). He then attacked Thebez, but was struck down by a millstone thrown from the wall by a woman (Judg.9.53; cf. 2Sam.11.21). To avoid dying by a woman's hand, he requested his armour-bearer to slay him.—5. (1 Chr.18.16.)

[Abishai, Abishai.] —1. A Levite of Kirjath-jearim, in whose house the ark remained 20 years (1Sam.7.12; 1 Chr.13.7). —2. Second son of Jesse, who followed Saul to war against the Philistines (1Sam.16.8, 17.13). —3. Son of Saul, slain on mount Gilboa (31.2). —1. Father of one of Saul's officers of Solomon (1 K.4.11). —[Dor.]

Abinadab —1. A Levite of Kirjath-jearim, in whose house the ark remained 20 years (1Sam.7.12; 1 Chr.13.7). —2. Second son of Jesse, who followed Saul to war against the Philistines (1Sam.16.8, 17.13). —3. Son of Saul, slain on mount Gilboa (31.2). —1. Father of one of Saul's officers of Solomon (1 K.4.11). —[Dor.] Abinadab, father of Barak (Judg.4.6, 12, 5.1, 12).
ABIRAM

Abiram.—1. A Reubenite, son of Eliab, who with Dathan and On conspired against Moses (Num.16: 1; Deut.11.6). [DATHAN.—2. Eldest son of Hiel, the Bethelite, who died when his father laid the foundations of Jericho (1K.16.34), thus fulfilling the first part of the curse of Joshua (Jos.6:26).]

Abishai (1Ch.8.33). = ABIRAM, 1.

Abisek (1Esd.1.2). = Abismus (1Esd.8.2), an ancestor of Ezra. = ABISHUA, 2.

Abishag, a beautiful Shunammite, taken by David to comfort him in his extreme old age (1K.1.1-4). Jewish tradition agrees with ver. 4, which asserts that she preserved her virginity; but the event after David's death Adonijah induced Bath-sheba, the queen-mother, to ask Solomon to give him Abishag in marriage; but this imprudent petition cost Adonijah his life (1K.2.13, etc.) [ADONIJAH; CANTICLES; FAMILY.]

Abishai, the eldest of the three sons of David's sister Zeruiah, and brother to Joab and Abishalom. [Genealogy of David's family (1K.4.15).] In the genealogy of the ancient line of David (1K.4.15), he is described as the brother of Joab and Abishalom; but in subsequent war he appears as the devoted follower of David. He was his companion in the desperate night expedition to the camp of Saul, and desired to avenge and terminate his uncle's quarrel by stabbing the sleeping king with his own spear. But David indignantly restrained him, and the adventurous warriors left the camp as stealthily as they had come, carrying with them Saul's spear and the cruse of water which stood at his head (1Sam.26.6-9). During David's outlaw life among the Philistines, Abishai was probably by his side, though nothing more is heard of him till he appears with Joab and Asahel in hot pursuit of Abner, who was beaten in the bloody fight by the fleet of Gibeon. Asahel fell by Abner's hand, at sunset, the survivors returned, buried their brother by night in the sepulchre of their father at Bethlehem, and with revenge in their hearts marched on to Hebron by break of day (2Sam.2.18, 24, 32). In the prosecution of his cause, and while Saul's presence was still near the deadly blow, Abishai was associated with him in the treachery, and "Joab and Abishai killed Abner" (2Sam.3.30). [ABNER.] In the war against Hanun, undertaken by David as a punishment for the insult to his messengers, Abishai, as second in command, was opposed to the army of the Ammonites before the gates of Rabbah, and drove them headlong before him into the city, while Joab defeated the Syrians who attempted to raise the siege (2Sam.10.10, 14; 1Ch.19.11, 15). The defeat of the Edomites in the valley of salt (1Chr.18.12), which brought them to a state of varying subjection to the Israelites, was due to the immediate orders of the king (see 2Sam.8.15), or of Joab (Ps.60. title). On the outbreak of Absalom's rebellion and the consequent flight of David. Abishai remained true to the king; and the old warrior showed a gleam of his ancient spirit, as fierce and relentless as in the camp of Saul, when he offered to avenge the taunts of Shimei, and urged his subsequent execution (2Sam.16.9, 19, 21). In the battle in the wood of Ephraim, Abishai commanded a third part of the army (2Sam.18.25, 12), and in the absence of Amasa was summoned to assemble the troops in Jerusalem and pursue after the rebel Sheba, Joab being apparently in disgrace for the slaughter of Absalom (2Sam.20.6, 10). The last act of service which is recorded of Abishai is his timely rescue of David from the hands of a gigantic Philistine, Ishbi-benob (2Sam.21.17). His personal prowess on this, as on another occasion, when he fought single-handed against 300, won for him a place as captain of the second three of David's mighty men (2Sam.23.18; 1Chr.11.20). Probably this act of daring was achieved while he was the companion of David's wanderings as an outlaw among the Philistines. Of the end of his chequered life we have no record.

Abishalom, = ABISALOM (2Sam.3.3; cf. 1K.15.2, 10, 20; 2Chr.11.20, 21).

Abishu'a.—1. Son of Bela, of the tribe of Benjamin (1Ch.8.1).—2. Son of Phinehas, the son of Eleazar, and father of Bukki, in the genealogy of the high-priests (1Ch.6.4, 5, 50, 51; Ezr.7.4, 5). According to Josephus (Ant. i. 104), he became the first curator of the temple; his office passed to the house of Ithamar; the descendants of Phinehas, till Zadok, falling into the rank of private persons.

Abishur, = Shammai (1Ch.2.28).

Abisum (1Esd.8.2) = ABISHUA, 2.

Abital, one of David's wives; mother of Shephatiah (2Sam.3.4). [Abishai, 2.]

Abittub, son of Shaharaim (1Ch.2.11).

Abi'ud (Mt.1.13) is equivalent to JUDAH (Lk.3.26, R.V. Joda), and HODAIJA (1Chr.3.24). The grandson of Zerubbabel through his daughter Shelomith (1Chr.3.19). [GENEALOGY OF JESUS CHRIST.]

Ablation. [For PURIFICATION.]

Abner (my father is Ner, or, is a lamp).—1. Son of Ner, who was probably brother of Kish (1Sam.14.50 f.; cf. 1Chr.9.36, but Kish's father according to 1 Chr.8.33). If so, Abner would be Saul's first cousin. He was made by him commander-in-chief of his army (1Sam.14.50). It was he who conducted the body of Saul to the place of burial (17.57); and afterwards accompanied Saul when he sought David's life at Hachilah (26.3-16). From this time we hear no more of him till after the death of Saul, when he rises into importance as the mainstay of his family. Immediately after the disastrous battle of Mount Gilboa, Abner was proclaimed king of Judah in Hebron, and Abner proclaimed the weak and unfortunate Ishboseth, Saul's son, as king of Israel, at Mahanaim beyond Jordan (2Sam.2.8-11). Judah alone remaining faithful to David. War soon broke out between the rivals, and Abner's "very sore battle" was followed by the flight of Absalom under Abner and Judah under Joab, son of Zeruiah, David's sister (1Chr.2.16). When the army of Ishboseth was defeated, Joab's youngest brother Asahel, who is said to have been "as light of foot as a wild roe," pursued Abner, and in spite of warning refused to leave him, so that Abner cut down David into self-defence was forced to kill him. After this, success inclined more and more to the side of David, till at last the impiety of Ishboseth deprived him of the counsels and generalship of the hero, who was in truth the only support of his tottering throne. Abner had married Rizpah,
ABRAM

Abraham, or Abram. Abhââmû is the name of the father of a witness to a document of the time of Hammurabi's grandfather; Abhâmû an Assyrian official, 677 B.C. Abram (possibly the name of Terah's father-in-law) was the author of the Abrahamic covenant; Abhâmû, "a name of a god," or "a god," was also the "name of a divine title," is excised, used till Gen. 17.5, when altered to Abraham, which, according to the etymology of Gesenius: Abhâmûn, "the father of a multitude [of nations]" (c.f. Exod. 43.10). - 1. In Gen. 11.26-25. (1) The eldest son of Terah (11.26), descendant of Shem. The fact that among his ancestors is Peleg, the brother of Joktan, father of many Arabian tribes (10.25), suggests that Abram was a descendant of Terah different from that of his brother Nahor. (2) In Gen. 11.27, but see Races. If so, it perhaps moved to Babylon with the stock of Hammurabi's dynasty, if Hommel is right in considering that Arabian. Abraham lived in "Ur of the Chaldees"—i.e. probably Mêqiir, the right or western bank of Euphrates, a great commercial centre. (1 Chr.) It is possible that that district was called the land of Elber—i.e. across the river from Babylon—and that the title "the Hebrew" in 14.13 refers to this. Although Terah was a polytheist (Jos. 24.2), Abraham worshipped one God only. It appears that in the time of Hammurabi there was a great development of the worship of Merodach, who was now regarded as chief of the Babylonian pantheon. Abraham's religion may be connected with this fact either by way of further development, for to Merodach were attributed the powers of all the gods, or (much more probably) by opposition to this fresh outburst of paganism. (2) Terah's choice of Haran, some 550 miles from Ur, as the city to which he removed, may be connected with the fact that it is mentioned as one of the cities of which his father was the owner, and that therefore there would be much commercial intercourse. It was also in itself of great commercial and strategic importance. On Terah's death (so the order of the narrative and Ac. 7.4; but 60 years before, according to the numbers of Gen. 11.32 in the Massoretic text) Abraham goes to Canaan, probably passing Damascus (where he may have obtained Eliezer, Gen. 15.22; see details of the probable route in Driver on 12), even in Canaan, as it seems, being still under Babylonian dominion. (3) His progress through Canaan is marked by altars, the first being at Shechem, where the encampment is recorded (Gen. 12.6-7), and 21.30, 33). The impression that his journey through Canaan gives us is that he was a man of wealth, culture, and ability in leadership. (4) Driven by famine into Egypt (12.10 ff.), Abraham, fearing the licentiousness of the Pharaoh and an attack on himself, gives it out that Sarah is his sister. (5) Returning to Canaan through the nêšheb (13), he treats Lot magnanimously, realizing the claims of brotherhood to mutual forbearance and to self-denial, and receiving a special promise of the country. He settles in or near Hebron, again by trees. (6) The narrative of ch. 14 has been ridiculed, and is called a late midrash by even recent scholars; but this seems to be an incident related is so confirmed by the cuneiform inscriptions (see Chedolâma, Arpèhâ, and even Melchizedek) that soon its statements will doubtless be generally accepted as accurate. Abraham's character, however, is so different
in it that he is depicted as a warrior. But it is difficult to suppose that so powerful a chieftain as he evidently was (23.6) should not have been able to bring even Lot and his service of God, as related here, are in complete accord with what we know of him elsewhere, and his refusal to accept the rescued goods at the hands of the ungodly king of Sodom marks, at most, spiritual advance on his willingness to receive presents from Pharoh. (7) In ch. 15, Abraham complained of having no child, and was assured that he should have a son and that his descendants should rival the stars in number, he "believed in the Lord, and He counted it to him for righteousness." He receives a further promise that he shall inherit the land, and for this see GENESIS, and note that the literal sacrifice, the symbols of the Lord's presence passing between the pieces (cf. Je.34.18), and he is told of the affliction of his descendants, i.e., in Egypt (cf. 2Es 3.14; R.V.). (8) Observe that the setting of the story of Hagar (Gen.16.21, 8-21) is borne out by the Hammurabi Code, under which Abraham was living, and in which (§§ 114, 116) Sarah had no power to sell her own maid Hagar after the latter had borne a son to Abraham. She had therefore to get Abraham to send her away. (9) Abraham adopts the non-Babylonian practice of CIRCUMCISION (q.e.). (10) For his reception of the "three men" (ch. 18.2) and the relation of one of them to the Lord, see A.S.R. THEOPHANIES. (11) The stories of Abraham's relations with Abimelech, king of Gerar, both as regards Sarah (ch. 20) and the dispute about the well (21.22-34), are, in the opinion of the present writer, best explained as duplicates of the similar narratives of Isaac (26.1-12, 13-33); but that of one of them to the Lord, see A.S.R. THEOPHANIES. (12) The sacrifice of Isaac (ch. 22) is the supreme test of Abraham's faith (cf. Wis.10.5; Ecclus. 44.20; 1Mac. 2.42; 4Mac. 16.20), possible only in a time and place where such sacrifices were regarded as the test of a father's obedience to oracles of God. Abraham's character is more fully revealed and the sacredness of human life is reaffirmed. Henceforth human sacrifice is regarded with horror by the religious teachers of Israel, even though often apparently practised from the time of the second generation after the Exodus (Ex.20.26) until the time of the prophets, and this is the reason why the increasing importance of Abraham is seen in the estimation of Israel. (1) Ethiopian Enoch. §9, 10, Abraham is the white bull who brought forth a wild ass (Ishmael) and a white bull (Isaac). §93, 5, Abraham is the plant of righteous judgment followed by the plant of righteousness (Isa. 12). (2) Testimonia of XII. Patriarchs. Levi, §9. 12, Abraham teaches Isaac to offer leaves from twelve trees. §§14, 15, Israelites receive mercy through Abraham, Isaac, and Jacob. Judah, §25, 1, Abraham will arise to a resurrection on earth with Isaac and Jacob. (3) Jubilees, §12, 12-14, Abraham burns the idol-house with its contents (perhaps an explanation of "Ur"); 16, Abraham turns from observing stars to considering God; §17, 17; 19, 8, Abraham's ten trials; §22, 25—c23, 1, Abraham dies with Jacob present. (4) Mac. xiii. 17, Abraham with Isaac and Jacob will receive us after we have suffered; xvi. 25, Abraham, with Isaac and Jacob will die because of God, but live to Him; vi. 17, 22, Abraham the type of courage. (5) Apc. Bar. iv. 4, the heavenly Jerusalem is shown to Abraham "by night among the portions of
ABRAHAM'S BOSOM

the victims” (cf. Gen.15:10); iv.ii. 2, the un- written law existed in Abraham's time.—IV. In N.T. (1) Abraham is recognized as the founder of the nation, e.g. in our Lord's genealogy (Mt.1). (2) The trust of the Jews to physical descent from Abraham is repeatedly opposed, e.g. Mt.3:9 (= Lu.3:8); Ju.8,33, Ro. 9,7; cf. Gal.4,22. (3) Abraham with Isaac and Jacob will be present at the great feast in the kingdom of heaven (Mt.8,11; cf. Lu.13,28). 
(4) Abraham's Bosom (apparently = closest intercourse with Abraham) receives Lazarus (Lu.16,22). (5) Abraham had such living faith in Jesus that he saw his day (Ju.5,36). (6) Abraham is taken by both St. Paul and St. James as an image of true religion. St. Paul showing that this consisted in his faith apart from works (Ro.4,16; Gal.3,6ff.). St. James in his faith as perfected by his work; the latter adding that he was called the Friend of God (Jas.2,21-23; cf. Is.41,8, 2 Chr.20,7, also Clem. Rom. § 10 with Lightfoot's note. The Abraham called Abraham the son of Allah (the friend of God), El Khalil, to the exclusion of his proper name. (2) So the ep. to the Hebrews insists on Abraham's faith (11,8,17), and draws lessons from his intercourse with Melchizedek (7,1-9). (3) St. Peter alludes to Sarah's obedience to Abraham (1Pe.3,6). [A.L.W.] 

Abraham's bosom. In his and his writings one of the names of the abode of the blessed dead. That Abraham was in a state of perfect bliss was never questioned, and the righteous were to share this by being admitted into fellowship with him in the unseen world (cf. 4 Mac. xiii. 16; Mt.8,11). The term probably contains an allusion to the ancient custom of reclining at meals, the head of the one guest being near or resting on the bosom of the one next to him (cf. Ju.13,23,21,20). In Tal. Bab. (Kid. 72b) it is said of Adda bar Ahabah, a Babylonian rabbi of the 3rd. cent., that "this day he sits in Abraham's bosom," meaning that he had died and entered Paradise. The phrase occurs in the parable of the rich man and Lazarus (Lu.16,22,23). [Paradise.] [H.L.]

Absalom (my father of peace).—I. Third son of David, by Maachah, daughter of Talmai, king of Geshur. His history, rebellion, and tragic death (2 Sam.13-18) not only have direct importance as incidental to Solomon's accession but as the means by which David's violation of covenant law in the murder of Uriah and the taking of Bathsheba are punished. The sequence of events is dramatic. Absalom is of the greatest personal beauty, and has grown up at Hebron the darling of his father and the people's idol. Amnon, Absalom's half-brother and David's eldest son, has wronged Tamar, Absalom's full-sister. By every custom Absalom is bound to avenge the injury. David does not. When, therefore, Amnon appears to have escaped with impunity, Absalom invites him to his "sheep shearing" at Ith-hazor, and thereby causes him to be killed during the drinking feast. Absalom flies to his mother's father; but so great is David's love for him, that he is persuaded by Joab's instrument, the wise woman of Tekoa, to recall him. This act of pardon falls in with the rough-and-ready manners of the time, and shows the great love which David has for Absalom. On his return Absalom remains secluded and in disgrace for 2 years, but forces Joab to proceed for him, and sees "the king's face." Restored to his position, Absalom uses the popularity he had never lost to foster sedition. He lets his wonderful hair grow long, perhaps (as Robertson Smith surmises) to mark the sacredness of his person, introduces horses in his chariots, and so rivets the attention of the people upon himself. He appeals to popular sentiment by the personal sympathy and unconventionality which ensure good will in the East. Judah was discontented, and when all is ready Absalom rebels. David, whose influence had waned, is forced to fly over the Jordan to Mahanaim. Ahithophel and all (except a few) of David's great men join Absalom. Absalom enters the capital, and commits himself and his followers to a death-struggle with his father. He openly takes possession of the concubines whom David had left behind, and thus effects dramatically the retribution of the divine justice. Ahithophel roars his name and a "great voice," but Hushai (who is faithful to the king) persuades Absalom to dally in Jerusalem until Joab and the king have gathered an army of sufficient strength. Absalom, having been crowned, at last crosses the Jordan, and is decisively beaten in the wood of Ephraim. As he turns to flee, he is caught by his hair in a "great oak," and his mule leaves him. Joab, learning that he is hanging there, kills him with his own hand, in spite of David's prohibition. When the Cushite runner comes to him at Mahanaim, David forgets all, and (remembering his own sin) utters the familiar and pathetic lamentation "O my son Absalom, my son, my son Absalom! would God I had died for thee!" Absalom's body was cast into a pit, and (perhaps a mark of bitter contempt, cf. Jos.7,26) covered with great stones by the soldiery. In contrast, the historian parenthetically recalls "the pillar in the king's dale," which Absalom had erected in his lifetime. His name occurs in the monuments: see Records of the Past, new
The traditional site is now called Haggi-ed-dumm—a corruption of the Aramaic words ḥaggidāmmu, and is a rock-cut vault, 30 ft. high and 25 ft. wide, with a 12th-cent. vaulting over it, supported on two masonry piers. The place was used for the burial of pilgrims in the Middle Ages, but the site was shown yet earlier. It lies on S. brink of Wādy Rabābīh (Ḥinnom), S. of Jerusalem. There are several Christian tombs cut out in the rock near it, and the place belonged to a church of St. Sion (Surv. W. Pal., Jerusalem vol. pp. 380, 417-420). [c.r.c.]

Achaia signifies, in N.T., a Roman province which included the whole of the Peloponnesus and the greater part of Hellas proper with the adjacent islands. This province, with that of Macedonia, comprised the greater part of the ancient regions, and became the most powerful political body in Greece; hence it was natural for the Romans to apply the name of Achaia to the Peloponnesus and to the S. of Greece, when they took over the S. of Greece from the Romans, and governed by a proconsul. Tiberius in the 2nd year of his reign (16 A.D.) took it away from the senate, and handed over the province to a procurator; but Claudius restored it to the senate. This was its condition when Paul was brought before Gallio, who is therefore (Acts 18.12) correctly called the "proconsul" (A.V. "deputy") of Achaia.

Achaicus, a Corinthian Christian who, at Ephesus, ministered to St. Paul (Acts 19.17). The name of the tribe of Judah, after whom the fall of Jericho secreted a portion of the spoil in his tent. Jericho was regarded as the first-fruits of conquest, and as such was to be "accursed"—i.e. devoted "to the Lord," as a whole burnt-offering (Josh. 6.17-19). Achaic's act of sacrilege marred the sacrifice, and consequently involved the whole nation in sin (Josh. 7.1). For this Jehovah punished Israel by their defeat in their attack upon Ai. When Achan confessed his guilt, and the booty was discovered, he was stoned with his whole family in a valley situated between Ai and Jericho, and their remains, together with his property, were burnt. Achan's field was called thence Achor (i.e. "trouble"). [h.c.b.]

Achar (1 Chr. 2.7) = Achan.

Achaz (Mt. 1.9) = Ahaz, king of Judah.

Achbor.—1. Father of Baal-hanan, king of Edom (Gen. 36.35, 39; 1 Chr. 1.49).—2. Son of Michaiah, a contemporary of Josiah (2 K. 22.14; 16.10, 22.36.12); called Anapo (2 K. 20). Achha'iacharus, chief minister at the court of Sardochous, or Esar-haddon, king of Nineveh (Tol. 1.21, 22.10, 14.10).

Achf'as, son of Phinees; high-priest and
achim— 87, 101, 102, 103, 1071, 108, 111, 112, 117, it is, however, impossible to determine what the significance of this term was. It is thought that Achim may have been a title or a nickname, possibly related to an act of worship or a particular ritual.

Achikol, a captain of the Ammonites in the army of Holophernes, whom they presented to the army of David and who joined David's army. He is mentioned in 2 Samuel 8:17. Achikol's story is significant because it illustrates the relationship between God's favor and human obedience. Achikol's story is used as an example of how obedience leads to blessings, while disobedience leads to consequences.

Achish, a Philistine king of Gath, son of Maoch, who in the title to Ps.34 is called Achish. David twice found a refuge with him when he fled from Saul. On the first occasion, being recognized by the servants of Achish as one of his victories over the Philistines, he was alarmed for his safety, and feigned madness (1 Samuel 21.10-15). From Achish he fled to the cave of Adullam. A second occasion David fled to Achish with 600 men (1 Samuel 22.1-19), and remained at Gath a year and four months. Whether the Achish to whom Shimei went in disobedience to the commands of Solomon (1 Kings 2.40) is the same person is uncertain; the word may be a title rather than a name.

Achish's relationship with David is complex and multifaceted, reflecting themes of loyalty, trust, and betrayal. Achish's decision to offer refuge to David when he was in hiding exemplifies his character and commitment to his people.

Achmët, (Eph.5:1), a name for Ephesus, and throughout R.V. = 'aleph. Caleb's daughter. She was given in marriage to her uncle or cousin Othniel as a reward for capturing Kirjath-shepher (Deborah). She moved her husband and a further daughter, but her name herself made the request, which Caleb granted. nephthek (A.V. south) is the name of a district; apparently are Gullath-main (springs of water) and Gullath-ilith and Gullath-tebtith (the upper and nether springs). They have been identified with the well-watered region called Dlijich between Hebron and Debah. The twice-told tale (Josh.15-15:19, Judg.1:12-15) indicates the necessity felt in later times for explaining why the territory geographically connected with Hebron should belong to Debir. [OTHNIEL; CATEER.] [H.M.S.]

Achshaph, a royal Canaanite city (Jos.11.1) in Galilee (12.20), on the border of Asher (19.25). Probably, from position, the village Kefr Yasif, 6 miles N.E. of Accho. [C.E.C.]

Achzib. —1. A city of Judah (Jos.15.11) in the Shephelah, noticed with Kilmah and Marreshah (Mic.1.14); otherwise Chizib (Gen.38.5), near Adullam (ver. 1). The name survives at 'Am Kheileh, close to and Nettit on S., in the valley of Edom, 3 miles N. of Adullam. —2. An important shore town of Asher (Jos.19.29) not taken from the Canaanites (Judg.1.31); now ez Zib, a village on the shore 9 miles N. of Accho. It was the border town of Galilee (1 Sam.1.4). It is not identified, but believed to be a place near Accho. [E. B.]话说,一个重要的问题就是《使徒行传》的作者身份。根据传统的观点，作者被认为是使徒保禄。然而，学术界对《使徒行传》的作者身份存在多种看法。一些学者认为，作者可能是一位后来的编纂者，而不是使徒保禄本人。无论如何，作者的身份仍然是一个未解之谜，对理解《使徒行传》的内容和写作风格至关重要。
of the sources used by St. Luke. Where they meet—cf., e.g., 5.36 (Theudas) and 12.3 (death of Agrippa) with Josephus, 20 Ant. v. 1 and 19 Ant. vili. 2—they are obviously independent, and many of the similarities in structure are useless for proving St. Luke's acquaintance with Josephus. Nor can we suppose that the epistles of St. Paul were among the sources used by St. Luke. There are a large number of "undesigned coincidences" showing the accuracy of both accounts of the same events and also many instances (e.g. Gal. 1, 2) of independence amounting almost to discrepancy, and of omissions, e.g. of St. Paul's trials and persecutions (cf. 2 Cor. 11), to which St. Luke must have referred with the epistles before him.—The relation of the Acts to Josephus and to St. Paul's epistles is important because of its bearing on the question, If a use of these writings were established, a comparatively late date must be assigned to it. Harnack sees little objection to the possibility of its being written soon after 60, i.e. immediately after the close of the "two years" of Ac. 28, 30. This early date is adopted by some as a starting point. The greatest, and probably an insuperable, objection to such an early date for the Acts is that it requires an almost impossibly early date for the gospel which preceded it (1, 1). The determining terminus a quo must therefore be the date of the gospel of St. Luke (Luke, Gospel of) and for a terminus ad quem we must not go beyond the lifetime of a contemporary of St. Paul, Sanday, Plummer, and Zahn would fix it before 80 A.D. and after 70 A.D. It has been suggested that two editions of the Acts and the gospel were published by St. Luke, and the phenomena presented by the so-called "un Pauline" and "Petrine" can be explained by this view. Certainly the readings found in authorities belonging to this family of MSS. are often most noteworthy in the Acts, e.g. at 11.25, 12.10, etc., and deserve the attention of the student. The additions are often valuable, and seem to go back to a trustworthy source, but they do not seem sufficient to justify the theory which has been based on them.—The purpose of St. Luke was not to give a complete record of either words or deeds, for he alludes to things passed over (2.40, 43, etc., etc.), but a selection determined partly by his information and still more by his object in writing. The student has to find out St. Luke's object and scheme of arrangement, for he does not state them. He has to ask why St. Luke dwells so long on the healing of the lame man and its consequences (3.1-4.31), or the incident of Ananias and its consequences (5), or St. Peter's escape from prison (12).—Probably we may definitely assign to St. Luke's purpose, of which he has wished to mark the salient points in the spread of Christianity (1.8) from Jerusalem, and found his climax in the arrival of St. Paul at Rome, and his preaching there (ἀκολούθων Λουκᾶς 28.31). In doing this he emphasizes the beginning of Christianity in various important centres and districts, and the beginnings of new lines of movement and policy in the Church itself, and in its relation to outside bodies (e.g. the Jews, the Gentiles, the Roman government). Another marked feature of his narrative is the stress laid on the fact that the course of the history is continually under divine guidance, a guidance given to the work of the Church as a whole (13.2, 15.28, etc.), and to that of individuals (10.10, 16.6, etc.). It was not St. Luke's purpose to write a book which should be an apology for Christianity against Judaism or paganism, or for St. Paul's line of action, or one which should be an eirenicon between a Petrine and a Pauline Christianity, or one which should give a favourable presentation of the attitude of the Roman government towards Christianity, though it may do these things, so far as a truthful statement of the facts allows.—The historical value of the Acts in its most important point to be considered by the reader, and although it has been depreciated for the groundless reasons just mentioned, its value may be established by considering the exactness with which St. Luke refers to political and geographical details (cf. 13.7, 16.20, etc.), and the fidelity with which he records the language, ideas, and organization of primitive Christianity instead of adopting those of a later period. St. Luke does not hesitate to mention different points of opinion, and to conceal things discreditable or to gloss over discrepancies (e.g. between the accounts of St. Paul's conversion in 9, 22, and 26). "It would be difficult in the whole range of literature to find a work where there is less attempt at pointing a moral or drawing a lesson from the facts." (Rainzay). The genuineness of the speeches has been questioned by some, and it has been suggested that St. Luke, like Thucydides, put his own words into the mouth of the speakers. A comparison of the speeches of St. Peter and St. James with their writings shows many resemblances of thought and expression, and there is a great probability of this view. It has to be remembered that what is preserved in the Acts is but an abstract of what was said, giving the main headings, and therefore bears the impress of St. Luke; but those headings, in St. Paul's recorded speeches, agree in a remarkable way with what would be likely to have been said, and also with what we find in his epistles (e.g., cf. Ac. 20 with Ep. to Ephesians). There is no reasonable ground, on account of the speeches, to depreciate the historical value of the book.—Satisfied as to its historical value, the student must try to get a clear conception of the book as a whole by marking (a) the progress of time or the chronology, (b) the gradual widening of the horizon, (c) the importance of the chief persons and incidents.—The chronology is often vague, and the "crucial date" for fixing the end of the Acts viz. the date of Pestus' arrival in Judea—cannot be definitely assigned. But the Acts covers roughly a period of about thirty years, divided almost evenly by the only fixed date, the death of Herod Agrippa I. in
Adah, a city in the extreme S. of Judah named with Dimonah and Kedesh (Jos.15.22). Now 'Adudah, a ruin 7 m. S. E. of Arad. [c.r.c.]

Adah' (ornament, beauty).—1. The first of the two wives of Lamech, who bore to him Jabal and Jubal (Gen.4.19).—2. A Hittite, daughter of Elon, one of the three princes of Esau, mother of his firstborn son Ethub, and so the ancestress of six (or seven) tribes of the Edomites (Gen.36.26f.). In Gen.26.34 she is called Bashemath.

Adalai, the name of a root signifying ruddy or rosy. It is described as being "formed," or "moulded," as distinct from the act of creation or "making" (all three words are found used of the divine methods in Is.45, 18), from the "dust of the earth," i.e. from material particles. "A breath of life was communicated to him, and he became a living soul." He was originally placed in a garden of delight [Eden], i.e. in one of the most fertile portions of the earth, apparently the territory between the Tigris and the Euphrates, known as Mesopotamia. It was his duty to cultivate the soil, and he was to have perfect freedom of action (Gen.2.15, 17), so long as he did not contravene the laws of his being imposed upon him by his Creator. Death was the penalty attached to such infringement. In order to put an end to his loneliness, a counterpart or complement was provided for him [Eve], and he was bidden to cleave irreproachably to her in love, since he and she were "one flesh"—the oneness and sublimity of the serpent [Fall] he was induced to violate the conditions on which his sojourn in the garden of delight was permitted. He and Eve were driven out from the garden, and compelled to dwell in a land on which a curse rested; and henceforth labour was to be no longer a pleasure to him, but a burden. In his banishment two children were born to him, but the results of his evil-doing had already begun to work, and the younger fell by the hand of the elder. [ Cain; Abel. ] From a third son, Seth, sprung a worthier progeny than that of Cain, the murderer and fugitive. Adam lived, we are informed, to the age of 930 years. [1:3-4.

Adam, City (Jos.3:16). The Jordan was blocked at a distance from the Jericho ford, and the waters "rose up in a heap a great way off. At Adam, the city that is beside Zarethan (see R.V.). It is doubtful whether this site could have been the Adam of the Damascus road (Gen.18:1). through which these conductors passed. The name probably survives at the Damascus
Adamah, one of the "fenced cities" of Naphtali, named between Chinnereth and Ramah (Jos. 19:36); now Adamah, 4 miles S.E. of Jabneel (Yehoah). Adaman, the translation of the Heb. šāmîr in Ezek. 3:9 and Zech. 7:12, translated in Je. 17:1 "diamond." Dr. Pinches suggests that it may be compared with the Assy. šemîrû, the word used for a ring (the object in which a precious stone was set). Our Eng. adaman is derived from the Gk., and signifies "the conquerable." In that language it is always applied to some very hard material. Hesiod (8th cent. B.C.) probably uses it for steel, while in Theophrastus (d. 287 B.C.) it is almost certainly corundum. Adaman in Eng. is also not constant in meaning, sometimes signifying the diamond (which is merely a corruption of the word) and sometimes a hard substance. Some hard cutting stone is apparently intended in Jeremiah (17:1): "The sin of Judah is written with a pen of iron and with the point of a diamond." That stone, however, can hardly have been known to the Hebrews in the prophet's day (Diamons), and the expression in Ezek. 3:9, "adamah harder than flint," suggests that by šāmîr is intended some variety of corundum, a mineral inferior only to the diamond in hardness. Of this mineral-crystallized alumina—the purer kinds are valued as gems, the red being named ruby; the blue, sapphire; the yellow, Oriental topaz; the green, Oriental emerald; the violet, Oriental amethyst. A common kind of corundum is dark or dull coloured, and practically non-transparent; this, on account of its hardness, is still often used for cutting purposes, as is emery, a more granular form, and frequently less pure, of the same, which often contains magnetite (an iron oxide) as an impurity and is thus not quite so hard. The Gk. name for this material is σημύρα or σημυρα, which the Hebr. lexicographers derive from Heb. šāmîr, and there seems no doubt that the two words are identical. [T.G.B.]

Adami' (R.V. Adami-neker), on the border of Naphtali, mentioned after Alon by Bezanaamim (Jos. 19:33); now el Damait, 5 miles W. of Tiberias. [C.R.C.]

Adar', a place on the S. boundary of Palestine and of Judah (Jos. 15:3), called Hazar-addar in Num. 34.4. [HAZER.]

Adar', [Months].

Adasa, a place in Judaea, 30 stadia from Beth-horon (Joseph. 13:28, 29). Here Judas Maccabaeus encamped before the battle in which Nicanaor was killed (1Mac. 7:40, 45). Now 'Adasheh, a ruin 8 miles S.E. of Beth-horon, on the road thence to Jerusalem. [C.R.C.]

Adbeel', a son of Ishmael (Gen. 25.13; 1Chr. 1:29), and probably the progenitor of an Arab tribe. Prof. Sayce (Hist. of the Monuments, p. 202) says that Adbeel is mentioned by Tiglath-pileser, under the form of Idibillu.

Addan', a place whence some of the Captivity returned with Zerubbabel to Judaea (Ezr. 2.59). In Ne. 7.61 the name is Addon; in 1 Esd. 5.36, Aalar.

Addar', son of Bela (1Chr. 8.3), called Ard in Num. 26.40.

Adder. This word is used for any poisonous snake, and applied in this general sense by the translators of A.V., who use in a similar way the term Asp. The word adder represents such a serpent in the text of A.V., and 5 times in the margin as synonymous with cockatrice—viz. Is. 11.8, 14.29, 59.5. It represents 4 Heb. words. (1) 'akhshūbh, found only in Ps. 140.3, "They have sharpened their tongues like a serpent, adder's poison is under their lips"; the latter half of this verse being quoted by St. Paul in Ro. 3.13. Here serpent-poison is of course a figure for evil-speaking. The number of poisonous serpents with which the Jews were acquainted was probably limited to some 5 or 6 species [SERPENT]; and as there are reasonable grounds for identifying pethen and šēph'phôn with two well-known species—viz. the Egyptian cobra and the horned viper—it is not improbable that 'akhshūbh may represent the sand-viper (Echis carrinatus) of Transcaspia, Arabia, and other parts of S. Asia and N. Africa. (2) pethen. [Asp.] (3) cēph, or ciph'ônî, occurs 5 times in the Heb. Bible. In Pr. 23.32 it is translated adder, but in Is. 11.8, 14.29, 59.5, Je. 8.17, it is rendered cockatrice. From Jeremiah we learn that it was venomous, while from the parallelism of Is. 11.8 it appears that ciph'ônî was more dreaded than pethen. ciph'ônî may, then, quite possibly indicate the Algerian viper (Vipera lebetina), a very poisonous snake ranging from N. Africa to Syria and Persia. (4) šēph'phôn occurs only in Gen. 49.17, "Dan shall be a serpent by the way, an adder in the path, that biteth the horse's heels, so that his rider shall fall backward." This habit of lurking in the sand and biting at horses' heels suits the character of the horned viper, or Cleopatra's asp (Cerastes cornutus), abundant in the deserts of Egypt, Syria, and Arabia. This venomous species averages from 12 to 15 in. in length, but occasionally larger individuals are found. [T.V.] and [T.L.]

Addl. 1. An ancestor of Jesus Christ (Luk. 3.28).—2. The ancestor of Israelites who put away their foreign wives (1 Esd. 9.31). The same place in the list of Ezr. 10.30 is occupied by Pahath-moab.
ADOPT

Addeo (1 Esdr. 6.1) = Iddo, 5.

Addon. [ADDON.]

Addon. — (A‘ddown). His sons are named (1 Esdr. 5.34 only) among the sons of Solomon’s servants who returned under Zerubbabel. — 2. (I‘ddow‘n, R.V. Jaddus.) A priest whose descendants were unable to establish their genealogy in the time of Ezra and were removed from their priesthood (1 Esdr. 5.38). He is there said to have married a daughter, and adopted the name, of Berechus (K.V. Zerullus) or Barzilai (cf. 2 Sam. 17.27), and is called by this name in Ezra 2.61 and Neh. 7.65. [C.D.]

Adder, a Benjamite, son of Beriah, chief of the inhabitants of Ajalon (1 Chr. 18.15). The name is more correctly Eder, as in R.V.

Adida, a town on an eminence overlooking the low country of Judah, fortified by Jerahmeel, and in his wars with Tryphon (1 Mac. 12.38, 13.13). Probably identical with Hadid.

Adiel. — 1. A prince of the tribe of Simeon, who took part in the raid made by his tribe upon the Hamite shepherds of the valley of Gedor in the reign of Hezekiah (2 Chr. 32.22). — 2. A priest, ancestor of Maasai (1 Chr. 9.12). — 3. Ancestor of Azmaveth, David’s treasurer (1 Chr. 27.25).

Adin, ancestor of a family of which some members returned from captivity with Zerubbabel (Ezra 2.15; Neh. 7.29) and with Ezra (Ezra 8.6). They joined with Nehemiah in Neh. 10.46 to separate themselves from the heathen (Neh. 10.16).

Adina, one of David’s sons beyond the Jordan; a Reubenite chief (1 Chr. 11.42).

Adino, the Ezinite. [JASHOBEAM.]

Adinus = Jamin, 3 (1 Esdr. 9.45; cf. Neh. 8.7).

Aditha im, a town of Judah, in the Shephelah, named, between Sharam and hagg-Gedriel, in 1 Chr. 11.36. [ADIDA.] [C.R.C.]

Adjuration. [EXORCIST.]

Adlai, father of Shapath, 5 (1 Chr. 27.29).

Admah, one of the Cities of the Plain, i.e. of the kikkur of Jordan (Gen. 10.19; 14.2; Deut. 29.23; Josh. 11.18). [ADAM, CIV.] [C.R.C.]

Admatha, one of the seven princes of Parah who were counsellors to Abasuerus (Esth. 1.14).

Adnai. — 1. One of the family of Pathmade who returned with Ezra and married a foreign wife (Ezra 10.30). — 2. A priest, descendant of Harim in the days of Jokonah, the son of Jedua (Ne. 12.15).

Adnah. — 1. A Manassite who deserted Saul and joined David on his road to Ziklag from the camp of the Philistines. He was captain of a thousand, and fought with David in the pursuit of the Amalekites (1 Chr. 20.21, 27). — 2. A man of Judah; the chief captain in Jehoshaphat’s army (2 Chr. 17.14).

Adon, Adonal. [LOND.]

Adoni-bezek, king of Bezek, a city of the Canaanites. [BEZEK.] This chieftain was vanquished by the tribe of Judah (Judg. 1.37), who cut off his thumbs and great toes, and brought him prisoner to Jerusalem, where he died. He confessed that he had implored the mercy upon 70 petty kings whom he had conquered.

Adonijah (my Lord is Jehovah). — 1. The fourth of David’s sons by Haggith, thus coming next after Absalom (2 Sam. 3.4). When his father’s strength was visibly declining, he put forward pretensions to the crown. David pronounced him to be insane, and had him put to death (2 Sam. 3.31).

ADOPTION

Adoption, a figure of speech peculiar to St. Paul, by which he describes the new relationship to God of man redeemed in Christ and endowed with the Spirit, both as regards present privileges (Rom. 8.15; Gal. 4.5; Eph. 1.5) and future hope (Rom. 4.14). He also once applies the word to the original choice of Israel by God (Rom. 9.1). The word was no doubt suggested by the custom, common under Roman law, by which a childless person adopted,
as his son, one born of other parents. The child thus adopted was entitled to the name of his new father, and a share in his ancestral religious observances (sacra privata), and was ranked as a member of the family also entitled to the property of his adopted son, and exercised towards him all the rights and privileges of a father. Adoption was not a Jewish practice [FAMILY], and would have been inconsistent with the Mosaic law as to inheritance. Parallel instances alleged in O.T. (Gen.15.3, 18-21) and LXX. are not cases of legal adoption to full family privileges. The leading thought in St. Paul's use of the word is that the adoption of man in Christ is an act of God's grace, transcending natural relationship. Liddon. Expi. Analy. of Ep. to Romans (1893); Maine. Ancient Law (5th ed. 1873). [A.R.W.]

Adora'm, a city fortified by Rehoboam (2Chr.11.9), in Judah, apparently near the Shephelah; noticed with Lachish and Mare'shah; probably "Adora" (1Mac.13.20). Robinson identified it with Daira, a village on a ridge 5 miles W. of Hebron. Josephus calls it Adora, but Bougan. [C.R.C.]

Adoram. [ADONIRAM]

Adoration. Though, to the Christian, adoration (or worship) in its strict sense means the prostration of the whole being before God alone, yet it must not be forgotten that Orientals naturally make outward demonstrations of respect and veneration, those who are regarded as in any way superior, which to a Western seem extravagant and out of place. Hence passages abound in the Bible where bodily prostration and similar gestures are described, not only towards Almighty God, but also towards idols and human beings; and in the East such gestures are still retained. In N.T., however, there are indications of a tendency, as the result of Christ's teaching, to restrict such attitudes (whether of mind or body) to times and modes of divine worship; e.g., St. Peter's rebuke to Cornelius (Ac.10.25, 26) and the angel's to St. John the Divine (Rev.19.10; cf. Col.2.18). Hence it is significant that our Lord and the early apostles would not explicitly refuse to accept such signs of honour when paid to Him, whether before (Mt.5.22; Lu.8.41; Jn.11.32) or after His resurrection (Mt.28.9). [C.F.I.]

Adrammelech.—L. (2K.17.31.) Adrammelech and Anammelech were the two deities introduced into Samaria by the Assyrians, some of the heathen colonists transplanted thither by Sargon, king of Assyria. Their worship resembled that of Moloch, as it included the sacrifice of infants by fire. The meaning of the names is somewhat uncertain. The probability is that, with Schrader and others, we should take them as Adar (Adur) the prince, and Anu the prince. (For the juxtaposition, cf. the analogous Jehovah Elohim.) "Anu the king" is frequently found in Assyrian inscriptions, but there is no certain evidence of the rite of child-burning. There is also some doubt as to the locality of Sepharvaim; but the recurrence of the name as-Adummim are not decisive. On the other hand, two sons of Sennacherib, who murdered their father in the temple 680 b.c. (2K.19.37; cf. 2Chr.32.21; Is.37.38), favours its identification with the Syrian Saba'tin, rather than with the Sippar of N. Babylonia.

Adramyttium; a seaport in the province of Asia, situated west of the district anciently called Aeolis, and also Myia (see Ac.16.7). Adramyttium gave, and still gives, its name to a deep gulf on this coast, opposite to the opening of which is the island of Lesbos. [MITYLENE.] St. Paul was never at Adramyttium, unless perhaps during his second missionary journey, on his way from Galatia to Troas (Ac.18). In this only Biblical interest is in illustrating his voyage from Caesarea in a ship belonging to this place (Ac.27.2). Ships of Adramyttium must have been frequent on this coast, for it was a place of considerable traffic. It lay on the great Roman road between Assos, Troas, and the Hellespont on one side, and Pharasa Ur and Tyris on the other, and was connected by similar roads with the interior of the country. The modern Adramuti is a poor village, though still a place of some trade and shipbuilding.

Adria, more properly Adrian. The meaning of this word in Ac.27.27 is important. The word seems to have been borrowed into the town of Adria, near the Po; and at first denoted the part of the gulf of Venice in that neighbourhood. Afterwards its significance was extended to embrace the whole gulf, and subsequently farther still, so that in the apostolic age it denoted that natural division of the Mediterranean from the Adriatic Sea to the Syrictic basin (see Ac.27.17; R.V.), and which had the coasts of Sicily, Italy, Greece, and Africa for its boundaries. This definition is explicitly given by the geographer Ptolemy, almost a contemporary of St. Paul, who says that Crete is bounded on the W. by Adrias. Later writers state that Malta divides the Adriatic Sea from the Tyrrhenian Sea, and the isthmus of Corinth the Aegean from the Adriatic. Thus the ship in which Josephus started for Italy about the time of St. Paul's voyage foundered in "Adrias," and there he was picked up by a ship from Cyrene and taken to Puteoli (Life iii.; cf. Ac.28.13). It passed through warmer seas than the voyage to India, and that an argument has been drawn from this geographical term in favour of the false view which places the apostle's shipwreck in the gulf of Venice. [MELITA.]

Adriel, a son of Barzillai the Meholathite, to whom Saul gave his daughter Merab, although he had previously promised her to David (1Sam.18.19). His five sons were amongst the seven descendants of Saul whom David surrendered to the Gibeonites (2Sam.21.8) in satisfaction for the endeavours of Saul to extirpate them, contrary to the league made with them by Joshua (Jos.9.15). In 2Sam.21.8 they are called the sons of Michal, which is probably a transcriber's error for Merab (see marg. ad loc.).

Aduel, a Naphtalite, ancestor of Tobit (Tob.1.1).

Adullam; a royal city (Jos.12.15) in the Shephelah, or low hills of Judah (Gen.36.1; Jos.15.35), near Socon (2Chr.11.7); fortified by Rehoboam. The cave of Adullam was David's stronghold at a "rock," after he left Gath, and apparently near Keilah.
ADULLAMITE

(Mt. 2.3, Luke 16.18; Acts 21.38.) Now the ruined site 'Adud-el-mai' (Clermont-Ganneau) on W. side of the upper valley of Elah. Eusebius places Adullam 10 Roman miles E. of Beit Jibrin (actually 7 English miles). The ruins are on an isolated rocky knob above the valley, and the cave on the N. slope is still inhabited. (Smyth. W. Pal. iii. pp. 311, 361.) The town was inhabited after the Captivity (Ne. 11.30) and was still a small village in 4th cent. A.D. [C.R.C.]

Adul·li·mite, a native of Adullam; the designation given to Hirah (Gen. 38.12-20).

Adultery. The parties to this offence as co-parties in a polygamous society are a married woman and a man other than her husband. For further information as regards O.T., see Crimes; Ordeal of Jealousy; Water of Bitterness. [H.M.W.]

In N.T., Adultery was the only cause for which our Lord would permit Divorce (Mt. 5.32; 19.9). Divorce was also permitted against Shammua against the Hileleides, who allowed divorce for the most trivial offences (Gut. ix. 10; Je. Sol. i. 168; cf. Mt. 19.3.) The active party to a divorce marrying again was guilty of adultery of adultery (Mt. 10.11, 12; Lu. 16.18-41); also he who married a divorced woman was likewise guilty (Lu. 16.18-31, Mt. 5.32, 36). Some think Mt. 19:9 permits the innocent party to re-marry if the cause was adultery, but see R.V. marg. notes to verse and art. Divorce. Jewish law did not permit the marriage of the guilty parties, and it is supposed that the guilty woman might not marry again. According to Jewish authorities, adultery was so prevalent in N.T. times (cf. Lu. 18.11) that the Mosaic punishment of stoning was superseded by divorce. For the same reason the ordeal of the 'bitter waters' was abolished by the Sanhedrin (Sol. ix. 9), since, according to R. Akiba, the test took effect only if the husband was innocent of the charge (Siphr. Naro 27; Sol. 47b). This may throw light on our Lord's action in the case of the woman brought before Him (Jn. 8.3-11, especially vv. 7, 9). [H.H.]

Adummim (Jos. 15.7, 18.17; the ascent of blood), the present Falat ed Damun (ascent of blood) on the road from Jerusalem to Jericho, 9. miles N.E. of Jerusalem. The limestone is here covered with red stains like blood. [C.R.C.]

Advent. [Incarvation; Coming of Christ, Second.]

Advocate, the word used in A.V. and R.V. to translate παρακλητός in Jn. 21.17, elsewhere rendered 'Comforter' (4th King and Intercuter'). In this place the title is given to the ascended and glorified Christ in His capacity as Mediator and Intercessor. Elsewhere it is applied to the Holy Spirit (Jn. 14.16, 26, 15. 26, 16, etc.), though the expression 'another Comforter' in the first of these passages shows that the title may be properly applied in the same meaning to either the Second or Third Person of the Trinity. And it should be noted that the office of intercession for the faithful, usually attributed to the glorified Christ, is in Ro. 8.26, 27 assigned to the Holy Spirit also.

It is in fact this word, rather than the secondary one of 'comforting' or consoling, which is implied in the Gk. word. For παρακλητός meant in legal phraseology an advocate or champion, one who was 'called to the side' of an accused person to defend him, or bear witness in his behalf. Hence the thought seems to be that Christians accused by Satan (the Diabolos, or slanderer) may look both to the exalted Son of God as their Advocate or Champion (Ro. 8.34), and also to the Holy Spirit in the Church, Who makes their prayers and intercessions on earth efficacious. Westcott, Gosp. acc. to St. John (1881); Epp. of St. John (1883). [A.R.W.]

Aedas (1 Esd. 8.27; cf. Ezr. 10.26). Perhaps a corruption of Elah, 2, or of Abdi, 3.

Aeneas, a man healed of his palsy at Lydda by St. Peter (Ac. 9.33, 34). [A.R.W.]

Aeneon, near Salim (Jn. 3.23), where St. John baptized "because there was much water there." As in the cases of Bethabara and Sychar, the Fourth Gospel here shows a special interest in the sites, but in each case being otherwise unnoticed. N.E. of Shechem is the perennial stream of Wady Far'ah, flowing E. to Jordan. It was the old boundary of Judaea and Samaria. The ruin Ainith is 4 miles N. of the stream, and the village Silim 3 miles S. of the stream. The site was probably at the ruin of Gannes, or N of the Jordan, where else in Palestine. The wild valley is a fine site for baptism in pure water. [C.R.C.]

Aethiopia. [Ethiopia.]

Affinity. [Marriage.]

Ag'aba (1 Esd. 5.30). [Hagab.]

Agabus, mentioned in Ac. 11.28, 21.10. His story is important as an evidence that the gift of prophecy in apostolic times was not limited to exposition of divine truth, but included prediction of the future. For his prophecy of a famine "over all the world," and the fulfilment of it, see Claudius. He also predicted St. Paul's arrest and deliverance to the Gentiles, repeating therein the prediction of his arrest in the temple inspired with the Spirit at Tyre (Ac. 21.4). Being a Jew, he naturally used the symbolic method of emphasizing his prediction, which we meet with in Jeremiah, Ezekiel and others (cf. Jc. 13.1-13). [E.R.B.]

Agag, a king of Amalek, whom Saul spared, together with the best of the spoil, although the will of Jehovah was that the Amalekites should be extirpated (Ex. 17.14; Deut. 25.17; 1 Sam. 15.1-3). For this disobedience Samuel declared that Jehovah had rejected Saul from being king, and himself sent for Agag and slew him "in the presence of Jehovah." (1 Sam. 15.) The name Agag seems to be used in Num. 24.7 as the general title of the kings of Amalek, like Pharaoh of Egypt. [H.H.B.]

Agagite. Haman is so called in Esth. 3.1, 10, 8, 3, 5. The Jews consider Haman a descendant of Agag the Amalekite, and hence account for his hatred against the Hebrews. [E.R.B.]

Agape (Gr. ἀγάπη). The word appears in LXX as a term used in common by the Christians of the apostolic age, and retained in use under varying conditions for many centuries. In N.T. it occurs in this sense only in Jn. 12, and in a doubtful reading of 2 Pe. 2.13. It is found,
AGAR 17

AGRICULTURE

Our Eng. agate, or achat, derives its name from the Achaeis, in Sicily, on the banks of which, according to Theophrastus and Pliny, it was first found; but as varieties of it are found in most countries, it was doubtless known very early to the Orientals. A grey and white variety was employed in ancient Egypt, and a dark coloured and white by the early Greeks. Agate is formed of minutely crystallized quartz, in layers and other arrangements, differing in tint, which in some cases receive separate names (Chalcedony; Jasper; Onyx; Sardine; Sardonyx), and were employed in jewelry and ornamental purposes. They occur in veins and cavities of more than one kind of rock. [t. g. b.]

Aggeus, a Hararite, father of Shammai, 3 (2 Sam. 23.11).

Aggeus (1 Esd. 6.17.3; 2 Esd. 1.49) = Hagagai.

Agriculture. The tilting of the earth and the planting of the vine are noticed from the first in O. T. (Gen. 2.3.4.2.9.20), and though the Hebrew patriarchs led a pastoral life, especially in the Beer-sheba plains, yet Abraham bought a field with trees (Gen. 3.17) as private property, and Isaac sowed corn at Gerar (28.12), while Jacob and his family were engaged in agriculture (37.2) as well as in feeding flocks. The spies sent by Moses to Hebron (Num. 13.23.24) found there vines, pomegranates, and figs cultivated by the Amorite population, and Palestine is described as a land of brooks, springs, and deep pools, of wheat, barley, vines, figs, pomegranates, and olives (Deut. 8.7.8), and was still as it is now. This description is fully borne out by monumental notices of even earlier date. The first information as to agriculture is found in the laws of Hammurabi (about 2100 B.C.) respecting the cultivation of his empire, and referring to the tillage of fields, the renting of orchards, and the careful irrigation of the plains. The spoil-lists of Thothmes III., a century before the Exodus, show that agriculture flourished among the Canaanites in Palestine (Brugsch. Hist. Egl. i. pp. 327, 330, 332), for he mentions 250,000 measures of corn reaped near Megiddo, "besides what was sowed, in gathering it in, by the soldiers of the king." In the S. of Palestine wine was found stored in cellars as well as in skins, and at each "resting-place" —or military post—the Egyptian soldiers were supplied by the natives with bread, oil, balsam, wine, honey, wheat, barley, spelt, and fruits. In the Amarna letters a century later we find frequent notice of corn grown both at Gebal in the N. and also in Philistia, where the 'Abiri exacted tribute of corn and oil from Ashkelon (Berlin 103), while mulberries appear (Brit. Mus. 26) to have been cultivated at Beirut.—The Seasons. The Hebrew year (like the Babylonian) consisted of 12 lunar months; the family were 20 days, beginning with the new moon about the vernal equinox. As this lunar year of 351 days fell behind the solar year, it was restored, to fit the seasons, by intercalating a 13th month (Ve-adar) at the end of the calendar. Such intercalation was as old as 2100 B.C. in the Babylonian Empire, and in Egypt and among the early Aryans, appears
to have been divided into three seasons, of
four months each in a normal year, these being
the seasons of harvest, vintage, and sowing.
Barley harvest began in the valleys about
Passover time, or early in April (Jos.3.15),
and a month later in the hills. Wheat harvest
began at Pentecost, in May (Ex.34.22), and
continued in the mountains till June or the
4th month. In the fruit season the “in-
gathering” occurred at the “end” of the civil
year, or the end of the 6th month (Ex.34.22),
early in September; and the Feast of Booths,
in the middle of the 7th month, followed the
vintage. Prayers for rain began on the 3rd
or 7th of the 6th month (in October), and
a fast was ordained (Mishna, Taanith i. 4)
if it had not fallen by the middle of the month.
[Rain.] In the third season the fasting for
rain became more severe if it had not fallen
in November. On the 28th of the 11th
month (in February) the “wave sheaf” of
wheat (Lev.23.10) was sown 70 days before
the Passover. The earliest sowings of any
crop had begun already in the middle of the
7th month (or in September), when the ploughing
began if the rains were early. On the
8th or 9th of the last month (or in Feb-
ruary) repliings for rain were celebrated,
except in years of complete drought. This
was the ordinary routine of the year, and the
seasons for ploughing, sowing, harvest, and
vintage, for the rains and dry months, remain
unchanged to the present day.—Agricultural
Operations. The cultivation, from the earliest
time, included that of corn in open fields, of
vegetables and fruit in enclosed gardens, and
of olives in groves—especially in the lower
hills—evergreen vines on the terraced mountains,
where the September mists and the heat
reflected from stone walls swelled and
ripened the grapes. The lands, ploughed
in autumn and winter and harrowed [Harrow],
appear to have been manured (2K.9.37;
Jc.9.22), as they certainly were about the
Christian era (Mishna. Shebith iii. 2), as well
as the fruit trees (Lm.13.3). The ploughing
was not deep (Pliny, Hist. Nat. v. 47), and
the soil, especially in Philistia, Sharon,
Esdraelon, and Bashan, was naturally rich.
It was not irrigated, like that of Egypt or of
Babylonia, and “watering with the foot”—
or directing the stream (as is still done) by
damming the mud bank of the shallow ditch
with the naked foot—was confined to gardens
(Deut.11.10). In later times palm groves
were irrigated at Naarath, 5 miles N. of
Jericho (17 Ant. xiii. 1), and the aqueduct
with its irrigation channels still remains there
(at el ‘Arayeh). Irrigated gardens (Can.4.2),
and even fountains, are mentioned in the Mishna
(Moed Katon i. 3; Peak v. 3). The crops
included wheat, barley, and spelt (A.V.
ric), the latter (kissimeth) being the Arab.
kirsiuk. These are still grown, but not
rye nor oats. The land was cleared of stones
and thorns (Is.5.2; Job.5.5; Pr.24.30,31),
and even of forest or copse (Jos.17.18), which
now grows often over remains of vineyards. Thus
firewood was often—as now—scarce,
consisting of the roots of bushes; and perhaps
charcoal from the wild broom was used in-
stead (Ps.120.4). The corn, represented on
Egyptian frescoes, was reaped standing; and
Hebrew barley is heavier than the short-
stalked grain now reaped crouching on the

heads. It was carried in a Cart (Am.2.13), the sheaves, or armfuls (Ps.129.7), being stacked in shocks (sumer, Arab. ghumur). The stubble (and often the standing corn) was

The threshing-floor (Heb. goren, Arab. jurn) was a fixed site (Gen.50.10; 2Sam.24.18): no doubt, as now, a flat rock-surface in the hills, or a clay floor in the plains, outside the village, usually to the W. to catch the breeze. The corn was trampled by oxen (Ho.10.11), as in the Egyptian picture, or driven over with a sledge (Heb. mərgəh. Syrian Arab. mūreţ), on the under side of which sharp pieces of basalt were let in as teeth (Is.28.8; Ps.41.15; 2Sam.24.22), this being dragged by an ox or horse, driven by a boy on the sledge, with a goad, or reins and whip. The ox was not muzzled (Deut.25.4). The owner slept on the floor to guard the corn (Ru.3.4-7). The corn, heaped in the centre, was winnowed with a wooden shovel or Fan (Ru.3.2; Job 21.18; Ps.35.5; Mt.3.12), and the flour sifted (Am.9.6). Lighter crops—the nigella (A.V. Fitches) and cummin—were not crushed by a stone roller, nor by the mərgəh (Is.28.27), but beaten out by a staff or rod. The corn was stored in granaries as in Egypt (Lu.12.18), or commonly in rock-cut pits (Arab. matmirah), which are still often large enough to hold more than one man (2Sam.17.19; Je.41.1; Jl.1.17). The olives were beaten down with rods, as they still are (Deut.24.20; 1.17.6), and crushed in a Mill. Vineyards and vegetable gardens had stone

walls or thorn-hedges [HEDGE] with a rock-cut vat, and a low tower or platform for the guard to stand on (Is.1.8.5.5; Mt.21.33). The grapes were gathered in baskets (Jc.6.9): the best vines were trained low over terrace walls (Mishna. Menahoth viii. 6; Pliny, Hist. Nat.

Fig. 4.—EASTERN REAPER (Mk.4.29). W.D.A.

liable to catch fire in summer, or was purposely burned (Jl.2.5; Na.1.10). Land lay fallow at least in the seventh year (Je.4.3; Ho.10.12), and rotation of crops was contrary to the prohibition of mixtures (Deut.22.9).

AGRICULTURE

xvii. 35; others were planted in quincunx order (Kilatam iv. 5), or trained on trellises (Mt.4:4; Ps.128:3). Hired labourers were employed in the vintage (Mt.21: 4; 2K.9.20) and the tenants (as in Babylon) paid a proportion

Fig. 7-WINNOWING WITH WOODEN SHOVELS. (Wilkinson, Bibleana.) (330 x 242 of Mt.3:12.)

in kind to the owner (2Sam.9.10; Cant.8.11; Mt.21:34). The pious provision for the poor [Cornell] included not only gleanings (Kv.2:17), and the right to eat in the field (Deut.23:24) like the disciples (Mt.12:1), but forgotten sheaves (Deut.24:19-21) and the gleanings of vines and olive trees (Lev.19:9,10). A second tithe every third year appears to have been levied for the poor (Deut.14:28-29; 12:1; Am.4:1; see Num.18:24). It should be noted that grafted (Is.17:10; Ezk.17:4), though known, was also condemned as a "mixture."—

Later Cultivation. The cultivation of Palestine, as described in many passages of the Mishna (especially in the tracts Kilatam, Shabath, and Amiqin), though written of c. 150 A.D., or rather later, appears to represent that which existed in the time of our Lord, and differs little from that of Palestine to-day. The cereals and other annual crops included wheat, barley, and spelt (tares and wild corn being noted), with millet, sesame, rice, and perhaps indigo, flax, and hemp. The fruits mentioned, besides grapes, olives, and figs, included apples, pears, peaches, pomegranates, quinces, citrons, almonds, mulberries, dates, melons, walnuts, pistachios, and blackberries. Olive oil was of three kinds (Menaditha viii. 4.) from fresh fruit, with various degrees of pressure. Olives were also dried and salted. The vegetables noticed include gourds, pumpkins, cucumbers, beans, chickpeas, onions, leeks, shadots, carrots, radishes, rape, lentils, beet, cabbages, and (for the better herbs of Passover, Num.9:11) lettuce, endives, horse-radish, and liquorice. To these objects of cultivation we may add the natural products sometimes producing food. Trees and shrubs noticed in the Mishna include the oak, terebinth, carob (Hysku), cedar (oil thence being used), sycamore-fig (see Am.7:14), wormwood, willow, myrtle, rhammus, balsam, express, and hawthorn, with others that are doubtful. Herbs and flowers included roses, poppies, lilies (the latter planted, as now, near graves), corns, rue, osten, madder, mallow (whence food for the poor), cresses, succory, parsley, mint, hyssop (used as medicine), wild asparagus, colocynth, mustard, fennel, coriander, colewort, milkwort, and nasturtiums. [Barley, Chaff, Corn, Corner, Field, Hay, Mattock, Millet, Rain, Sow, Sowing at Yoke, Palestine.] [C.R.C.B.

Agrippa. [Herod.] Agur, son of Jakeh (Pr.30:1), is credited by most commentators with the compilation of Pr.30:1-31:9. Nothing is known of him; the substitution in R.V. marg. of "of Massa, c.f. Gen.25:14," for A.V. "the prophecy," R.V. "the oracle," being entirely conjectural. It may have been one of the "men of Hezekiah," an Ishmaelite who had raised himself above the religion of Abraham and recognized the religion of Israel as its completion (Delitzsch), or one of the wise "children of the East" contemporary with Solomon (1K.4:30) (Perowne). The paraphrases of the name in LXX. and Vulg. suggest corruption from a word similar to Qoheleth (Ecclesiastes) as indicating "a collector" (of proverbs). [Proverbs.] Delitzsch on Prov. (T. & T. Clark), and Perowne in Camb. Bible for School. [C.R.B.B.]

Ahab (lit. father's brother, probably meaning one who closely resembles his father).—1. Son of Omri, seventh king of the separate kingdom of Israel, and second of his dynasty. He made an ill-starred marriage with Jezebel, daughter of Ethbaal, king of Tyre, who had been priest of Astarte; a union intended doubtless to strengthen the alliance begun by Solomon with Phoenicia to the commercial benefit of both. Ahab's reign was interrupted (cf. 2K.9.10) for Ahab's reign was distinguished by the ministry of the great prophet Elijah, under protest from whom, and in obedience to Jezebel's wishes, Ahab caused a temple to be built to Baal in Samaria, while Jezebel hunted down and put to death God's prophets, some of whom were concealed in the garrets of the tower of Ahab's house. The Phoenician rites were carried on upon such a scale, that we read of 450 prophets of Baal, and 400 of Asherah. (See 1K.18:16, where R.V. rightly substitutes the proper name Asherah for the "graves." as again in 2K.21:7; 23:6.) The worship of Asherah was very popular in his day, and this is, in consequence of "a sore famine in Samaria," is related under Elijah. Ahab had a taste for splendid architecture, which he showed by building an ivory house and several cities. He adorned Jezebel (now Zerim), by the plain of Esdraelon, with a palace and park for his own residence, through which Samaria, the capital of his kingdom; Jezebel standing in the same relation to it as the Versailles of the old French monarchy to Paris (Stanley, S. and P. 244). When his neighbour Naboth refused to part with his vineyard (1K.21:3; cf. Lev.25:23), which Ahab coveted, a false accusation of blasphemy was brought against him, and he and his sons were stoned to death (2K.9.26). Elijah declared, as penalty, the entire extinction of Ahab's house. The king's repentance, however, brought postponement of the sentence's execution. Ahab undertook three campaigns against Edom and Edomites, and, as we may suppose, also against Ammon, for his aggressiveness was noted for its offensive. In the first, Ben-hadad laid siege to Samaria; and Ahab, en-
couraged by a prophet, made a sudden attack on him, whilst in arrogant confidence he was banqueting in his tent with his thirty-two vassal kings. The Syrians were totally routed, and fled to Damascus (1 K. 20. 15–16). Nine years later (cf. 1 K. 22. 40) Ben-hadad was again defeated and humbled by Ahab in Damascus: that is, admitting into his capital permanent Heb. officers, in an ambassadorial position, with special dwellings for themselves and their retinues—Ben-hadad's predecessor having exacted from Omri a similar privilege in respect of his triumph over the Aramaean nation (see STREET.). It appears from Assyrian records (Schrader, Cuneif. Inschr. and O.T. ed. i. 183 ff.), that Ahab's readiness to make peace with Syria arose from the reviving energies (after a century of comparative inaction) of their common foe, Assyria, under Shalmaneser II. c. 877 B.C. On the many occasions of Shalmaneser there is a list of the allied kings of Syria whose forces were defeated by him at Qarqar (near the Orontes) in 854 B.C. Among their names occur Ahabbbu Sir-l'laa (or Sir-l'la'a), considered to be Ahab of Israel, and Adad'-idri (identified with Ben-hadad). Another opinion, however, which has important expert support, is that the above names have nothing to do with the Ahab and Ben-hadad of the Biblical narrative, on the grounds that (i) Sir-l'la'a cannot mean Israel, and should in fact be read Sirl'hab; (ii) Adad'-idri is not Ben-hadad, but Hadadezer; (iii) it is unlikely that Ahab would join forces with his constant enemy Ben-hadad; (iv) it is literally impossible to bring any part of Ahab's reign at all as late as c. 853 B.C. We last read of him when, in conjunction with Jehoshaphat, king of Judah, he attacked Ramoth in Gilead, on the E. of Jordan, claiming that town for Israel. Michaiah's warning led only to his imprisonment. Ahab then drew a bow at a venture, and, though stayed up in his chariot for a time, he died towards evening, and his army dispersed. When he was brought to be buried in Samaria, the dogs licked up his blood as a servant was washing his chariot; a partial fulfilment of Elijah's prediction (1 K. 21. 19), more literally accomplished in the case of his son.—2. A prophet who deceived the captive Israelites in Babylon, and was burnt to death by Nebuchadnezzar (Jer. 29. 21). [A.W.S.]

*Aharah*, third son of Benjamin (1 Chr. 8. 1). [Ahiram.]

*Aharhel*, a name in an obscure fragment of the genealogies of Judah. "The families of Aharhel" apparently traced their descent through Coz to Ashur, the posthumous son of Hezron. The Targum of R. Joseph on Chronicles identifies him with "Hur the first-born of Miriam" (1 Chr. 4. 8).

*Ahasa'î* (Ne. 11. 13 = Ahzerah, 1 Chr. 9. 12), a priest, ancestor of Amasia.
smoking firebrands," and invited him to ask for a sign from Jehovah. Ahaz replied, "I will not ask, neither will I tempt the Lord," whereupon the prophet gave him the sign of Immanuel (Is. 7.10–16). It would seem, however, that Ahaz had already appealed for help to Tiglath-pileser, king of Assyria (2K. 15.7), who eventually freed him from his enemies by invading Syria, taking Damascus, killing Rezin, and depriving Israel of its northern and trans-Jordanic districts. But Ahaz, as the price of this help, became tributary to Tiglath-pileser, sent him all the treasures of the temple and his own palace, and even appeared before him in Damascus as a vassal. He also ventured to seek for safety in heathen ceremonies; making his son pass through the fire to Moloch, consulting wizards and necromancers (Is. 8.19), sacrificing to the Syrian gods, introducing a foreign altar from Damascus, and probably the worship of the heavenly bodies from Assyria and Syria. Wherefore he would set the horses of the sun mentioned in 2K. 23.11; and "the altars on the top [or, roof] of the upper chamber of Ahaz" (2K. 12.12) were connected with the adoration of the stars. We see another and blameless result of this intercourse with an astronomical people in the "sundial of Ahaz" (1S. 38.8). [Hosea. 9.2.]—2. A son of Micah, the grandson of Jonathan through Meribbaal or Mephhibosheth (1Ch. 8.35, 36, 9.12).

Ahaziah.—1. Son of Ahab and Jezebel, and eighth king of Israel. After the battle of Ramoth in Gilead (Amaz.), the Syrians had the command of the country E. of Jordan, and cut off all communication between the Israelites and Moabites, so that the vassal king of Moab refused his yearly tribute (2K. 1.1.3, 4, 5). Before he could take measures for punishing this revolt, Ahaziah fell through a lattice in his palace at Samaria. In his health he had worshipped Baal (1K. 22.51–53), and now he sought comfort among the pagans in Ekron. Impiety Elijah denounced him three times, and predicted his death (2K. 1.2–17). His endeavour to join the king of Judah in the Red Sea traffic with Ophir is related under Jehoshaphat.—2. Fifth king of Judah, son of Jehoram and Athaliah daughter of Ahab, and therefore half-brother of Ahaziah and half-cousin of Ahab. He reigned 6 years (2Ch. 22.4), probably by a witness's error, and Jehoziah (21, 17, 25, 23). He allied himself with his uncle Joram, brother and successor of Ahaziah, 1, against Hazael, the new king of Syria. The two kings were, however, defeated at Ramoth, where Joram was so severely wounded that he retired to Jezreel to recover. The revolution under Jehu broke out while Ahaziah was visiting his uncle at Jezreel. Jehoram and Ahaziah went out to meet Jehu, who shot the former through the heart, and pursued Ahaziah as far as the pass of Gur, near the city of Ibleam. There Ahaziah was mortally wounded, and died when he reached Mechuza-abdiel (2K. 8.25, 9.28). In 2Ch. 22.4 an apparently different account is given of his death. He was 22 years old at his accession (12 acc. to 22, 2, an obvious mistake; cf. 21.5, 26, where the age of his father, whom he succeeded, is given as 40) and he reigned 1 year (2Ch. 22.5). His name is given as Ahabur, by his wife Athilah (1Ch. 2.29). He was of the tribe of Judah.

Ahilud

Aher' (lit. another), mentioned in 1Ch. 7.12 as father of Hushim, or the Hushim. He was a Benjamite, and probably to be identified with Ahiram of the same tribe (Num. 26.38). As the genealogy of Dan is omitted here, and some think Hushim was a Danite, it has been suggested by means of a link and a hypothetical son of another," a reluctance to mention the name of Dan being discernible elsewhere. [B. F. S.]

Ahi.—1. A Gadite, chief of a family who lived in Gilead in Bashan (1Ch. 5.15), in the days of Jotham, king of Judah. By the LXX. and Vulg. it was not considered a proper name.—2. A descendant of Shamer, of the tribe of Asher (1Ch. 7.34). The name, according to Gesenius, may be a contraction of Ahijah.

Ahiah or Ahijah (=devotee of Jehovah).—1. Son of Ahitub, brother of Ichabod, grandson of Phinehas, and great-grandson of Eli, also called Ahimelech, "since melekh (king) may also be applied to God." It is remarkable however highly he estimated his prophetic powers (cf. 2Ch. 9.28).—4. Father of Baasha, king of Israel (1K. 15.27, 33).—5. Son of Jerahmeel (1Ch. 2.23).—6. Son of Bela (8.7).—7. One of David's mighty men (11. 36).—8. A Levite in David's reign (26.20).—9. One of the heads of the people who sought the covenant with Necho (2K. 10.26). [C. E. D. B. R.]

Ahiam', son of Sharar (Sarac, 1Ch. 11.35) the Hararite, one of David's thirty mighty men (2Sam. 23.33).

Ahian, a Manassite, son of Shedihah (1Ch. 7.19).

Ahiezer.—1. Son of Annimshaddai, a chieftain of the tribe of Dan (Num. 1.13, 25, 7, 66, 71, 10, 25).—2. The Benjamite chief of David's ambidextrous archers at Ziklag (1Ch. 12.3).

Ahijah.—1. Son of Shalomi, and prince of the tribe of Asher (Num. 34.27).—2. A chief of the tribe of Benjamin (1Ch. 8.7).

Ahikam. [Ahim.]—Ahi-}

Ahikam, son of Shaphan the scribe, an officer at the court of Josiah, and of Jehoiakim; and one of the delegates sent by Hillikiah to consult Huldah (2K. 22.12–14). In Jehoiakim's reign he successfully used his influence to protect the prophet Jeremiah (1Ch. 26.24), as did his son Gedaliah afterwards (39.14, 40.5).

Ahilud.—1. Father of Jehoshaphat, the
recorder or chronicler of the kingdom in the reigns of David and Solomon (2Sam.8,16,20,24; 1K.4,3; 1Chr.18,15).—2. The father of Baana, one of Solomon's twelve officers (1K.4,12). It is uncertain whether he is the same with the foregoing.

Ahimaaz.—1. Father of Ahinoam, wife of Saul (1Sam.14,50).—2. Son of Zadok, the high-priest, who with Jonathan the son of Abiathar brought David news from the camp of Absalom (2Sam.15,27,28,35,36,17,17-21). After the battle between the king's forces under Joab and those of Absalom, he was the first courier to tell David of the victory, outrunning the Cushite who had been dispatched some time before him (18,19-33). There is no evidence, beyond the assertion of Josephus, that he was ever high-priest, since from 1K.4,2 compared with 1Chr.6,8,9 it would seem that Azariah his son succeeded Zadok.—3. Solomon's officer in the temple, who married Basmath, king's daughter (1K.4,15).

Ahiman.—1. One of three giant Anakim inhabiting mount Hebron (Num.13,22,33), seen by Caleb and the spies. The white race were cut off by Joshua (Jos.11,21), and the three brothers were slain by the tribe of Judah (Judg.1,20).—2. One of the porters (gatekeepers) in charge of the king's gate for the "camp" of the sons of Levi (1Chr.9,17).

Ahimelech.—1. Son of Ahitub (1Sam.22,11,12), and high-priest at Nob in the days of Saul. He gave David the shew-bread to eat, and the sword of Goliath; for which he and his whole house were, upon the accusation of David of the Edomite, overturned by Saul's order. Eighty-five priests wearing an ephod were thus slaughtered; Abiathar alone escaped (21,32). He is indentical with Ahia, 1. For the confusion between Ahimelech and Abiathar in 1Sam.8,17 and in 1Chr., see Abiathar.—2. A Hittite, one of David's companions in peril, accounted for in LXX. Abimelech, which is perhaps the right reading, after the analogy of Abimelech, king of Gerar (1Sam.26,6).

Ahimoth, a Levite, son of Elkanan (1Chr.6,25; named Mahath in ver. 35). [c.r.d.b.]

Ahinadab, son of Iddo (1K.4,14), placed in Gad's line (1Chr.5,14).—2. Son of Iddo (1K.4,14), placed in Gad's line (1Chr.5,14).

Ahinoam.—1. The daughter of Ahimaaz and wife of Saul (1Sam.14,50).—2. A Jew, Reelithess who was married to David during his wandering life (25,14). She lived with him and his other wife Abigail at the court of Achish (27,3), was taken prisoner with her by the Philistines when they wasted Ziklag (30,5), but was rescued by David (18). She is again mentioned as with him when he was king of Judah in Hebron (2Sam.2,2) and was the mother of his eldest son Amnon (3,2).

Ahio.—1. Son of Abinadab, who accompanied the ark from his father's house at Gibeah (2Sam.6,34; 1Chr.15,7).—2. A Benjamite (1Chr.8,74).—3. A Benjamite, son of Jehiel, the "father " or founder of Gibeon (1 Chr.8,31,9,37).

Ahira, chief of Naphtali at the census the year after the Exod. (Num.1,51,2,29,7,78,83,10,27).

Ahiram', son of Benjamin (Num.36,38) and ancestor of the Ahiramarites, called Ehi in Gen.46,21; perhaps the same as Aher or Aharah. Aharah is described as the "third" son of Benjamin in 1Chr.8,1, and Ahiram is mentioned third in Num. i.e., while in Gen.46,21 Ehi is described as the sixth son, but the order in the lists is evidently not always precise. [h.c.b.]

Ahisamach', a Danite, father of Aholibam (Ex.31,6,35,34,38,23).

Ahishahar', a son of Bilhan and great-grandson of Benjamin (1Chr.7,10).

Ahishar', the controller of Solomon's household (1K.4,6).

Ahithophel (brother of foolishness), a native of Giloh, in the hill-country of Judah (Jos.15,31), and privy councillor of David. His wisdom was so esteemed that his advice was accounted as if a divine oracle, despite the signification of his name (25,1). A comparison of 2Sam.11,3 with 23,34 suggests that he was the grandfather of Bathsheba; which might account for his position of influence, and would show once more how David's punishment followed from his sin. Absalom immediately he had revolted sent for Ahithophel, and whenever he had joined the conspiracy, he prayed Jehovah to turn his counsel to foolishness (15,12,31), alluding possibly to the meaning of his name. David's grief at the treachery of his confidential friend is thought to be alluded to in the Messianic prophecies (Ps.41,6,55,12-14). To show to the people the breach between Absalom and his father was irrevocable, Ahithophel persuaded the former to take possession of the royal harim (2Sam.16,21). David, to counteract his counsel, sent Hushai to Absalom. Ahithophel had recommended an immediate pursuit of David; but Hushai advised delay, intending to send intelligence to David and give him time to collect his forces. When Ahithophel saw that Hushai's advice prevailed, he despaired of success, and returning home "put his household in order and hanged himself " (17,1-23).

Ahitub.—1. Son of Phinehas and grandson of Eli, the father of Ahimelech, or Ahijah (1Sam.14,3,22,9). There is no record of his high-priesthood.—2. Son of Zadok, the high-priest (2Sam.8,17; 1Chr.6,7,8) or grandfather (1Chr.9,11; Ne.11,11) of Zadok the high-priest. Driver, Kittel, and others consider that the true reading of 2Sam.8,17 should be "And Zadok and Ahitub the son of Ahimelech, the son of Ahitub."—The genealogy of the high-priests in 1Chr.8,11,12 introduces another Ahitub, son of another Amariah, and father of another Zadok, probably a repetition by a clerical error. [h.c.b.]

Ahlab, a city of Asher from which the Canaanites were not driven out (Judg.1,31). It is named with the shore cities Accho, Zidon, and Azibiz. The site is unknown. [c.r.c.]

Ahlay, daughter of Sheshan, whom he gave in marriage to his Egyptian slave Jarcha (1Chr.2,31,34,35), and from whom was descended Zabad, one of David's mighty men (1Chr.11,41; cf. 2,35-37). In ver. 31 A.V. reads children, R.V. sons, of Sheshan; but the obvious meaning is "descendants," as the plural is then explained by the genealogy
which follows, and ver. 34 clearly states that "Sheshan had no sons but daughters.

Ahoah, son of Bela, son of Benjamin (1 Chr. 8.4). In ver. 7 he is called Aahai (cf. Hiram and Hazahai). The LXX. has Achia in both verses. The patronymic, Ahoite, is found in 2 Sam. 23.9, 28; 1 Chr. 11.12, 29; 27.4.

Aholah (tent, tent; Oholah, R.V.), sister of Aholibamah, a harlot, used by Ezekiel as the symbol of Samaria (Ezk. 23.4, 5, 36, 44).

Aholibah (Oholibah, R.V.), a Danite of great skill as a weaver and embroiderer, whom Moses appointed with Bezalel to erect the tabernacle (Ex. 35.30-35).

Aholibamah (my tent in her; Oholibah R.V.), a harlot, used by Ezekiel as the symbol of Judah (Ezk. 23.4, 11, 22, 36, 44).

Aholibamah, daughter of Ahan, a descendant of Seir the Horite, perhaps a mistake for Hivite, and one of the three wives of Esau (Gen. 36.2, 25). The earlier narrative (26.34) Aholibamah is called Judith, daughter of Beeri, the Hittite. On the obscure subject of Esau's wives, consult The Speaker's Comm., note A on Gen. 36; and the comm. of Dillmann and Holzinger.

Ahumai, son of Jahath, a descendant of Judah, and head of a family of the Zorathites (1 Chr. 4.2).

Ahuzam, properly Ahuzzam, son of Ashur the "father" or founder of Tekoa (1 Chr. 4.6).

Ahuzzath, the friend of the Philistine king Abimelech who accompanied him to his interview with Isaac (Gen. 26.20).

A1 (Heb. bahr), Aiah (B. 10.28), or Alja (Ne. 11.31), and in MSS. of 1 Chr. 7.28, where "Gaza" is improbable, a royal city (Jos. 12.9) E. of and near Bethel (Gen. 35.2, "Hai"); Jos. 7.2-5). It had a ravine (ge) to N. and low ground to W., and was near a deep valley (meq) and a desert (midbat). It was made a "heap" (tell) by Joshua, and near its gate a great "heap" remained long after (Jos. 8.1-29). This account must be older, apparently, than the time of Isaiah, when Aiath appears again as a town. It was also inhabited after the Captivity (Ezk. 2.28; Ne. 7.32, 11.31). The Ai of Jeremiah (49.3), apparently in Moab, is probably not the same, and may be Im. The site of Hai appears to be near the ruin Haiyin, 2 miles S.E. of Bethel. It has valleys to W. and N. and a deep gorge on N.E. near the desert; about three-quarters of a mile to N.W. is a very large artificial kild of stones, which may mark the site of Joshua's monument near the gate. [c.r.e.c.]

Aiah, —I. Son of Zibeon, a descendant of Seir, and ancestor of one of Esau's wives (1 Chr. 11.10). = Ajah (Gen. 36.24). He apparently had no sons as the line is continued through his brother Anah. —2. Father of Rizpah, the concubine of Saul (2 Sam. 3.7, 21, 28, 30, 31).

Aiah, a place named by Isaiah (10.28) in connexion with Migrmon and Michmash; clearly the same as Aiah. [c.r.e.c.]

Alja. [Ai.]

Ai'jalon (a place of deer).—1. A city of the Kohathites (Jos. 21.24; 1 Cr. 6.60), in the lot of Dan (Jos. 19.43; A.V. Ajalon), which tribe, however, was unable to dispossess the Amorites of the place (Jud. 1.35). Ai'jalon was fortified by Rehoboam (2 Chr. 11.10), and was invaded later by the Philistines (2 Chr. 28.18; A.V. Ajalon). The valley of Ai'jalon is noticed in the speech of Joshua during his pursuit of the Canaanites (Judg. 10.12). The town was discovered by Dr. Robinson in the modern Yalo, N. of the Jaffa road, about 13 miles from Jerusalem. It is noticed in the Amarna letters from Jerusalem, etc. (Berlin 103, 137), as taken by the Abiri in 15th cent. B.C.—2. A place in Zebulun, the burial-place of Elon, one of the judges (Judg. 12.13). [c.r.e.c.]

Ai'jeleth-shahah. [Psalms, Titles of Ofs.]

Ain (an "eye," and also a "spring"). "ayin or 'an occurs in Engedi, Engannim, etc. —1. Ain is apparently the village el 'Ain, near the W. foot of the Anti-Lebanon, about 18 miles S. of Rustan. The border of the land of Israel went E. of it, from near Riblah (Num. 34.11).—2. One of the southern cities of Judah (Jos. 15.32), allotted to Simeon (Jos. 19.7; 1 Chr. 4.32) and to the priests (Jos. 21.16). In 1 Chr. 6.59 Ashan takes the place of Ain. [Ex-RaMmON. ] [c.r.e.c.]

Airus, one of the "servants of the
temple," or Nethinim, whose sons returned with Zerubbabel (1 Esd.5.31). Perhaps = Reaiah, 2.

Ajah (Gen.36.24) = Aiah, 1.

Ajalon (Jos.10.12, 19.42; 2 Chr.28.18). Corresponds to Rahah (Gen.14.5).

Akan, son of Ezer, one of the "dukes" or chieftains of the Horites, and descendant of Seir (Gen.36.27). He is called Jakin in 1 Chr. 1.42 and Jaakan in Deut.10.6, which last should probably be read in all three cases.

Akub.—1. A descendant of Jeconiah and son of Elionai (1 Chr.3.24).—2. One of the doorkeepers at the E. gate of the temple. His descendants succeeded to his office, and appear among those who returned from Babylon (1 Chr.9.17; Ezr.2.42; Ne.7.45, 11.19, 12.25 = Dacobi, 1 Esd.5.28).—3. One of the Nethinim, whose family returned with Zerubbabel (Ezr.2.45). Perhaps = Acua (1 Esd.5.30), though some identify with Acub (5.41).—4. A Levite who assisted Ezra in expounding the law to the people (Ne.8.7); = Jachim, 1 Esd.9.18.

Akkrabbim, The ascent of, and The going up to; also Maaleh-acrabbim (the scorpion pass). A pass between the S. end of the Dead Sea and Zin, forming one of the landmarks on the S. boundary of Judah (Jos.15.3) and of the Holy Land (Num.34.4). Also mentioned with Selâ (or Petra) as the boundary of the Amorites (Judg.1.36). Judas Maccabaeus gained here a great victory over the Edonites (1 Mac.5.3, Araballine). Scorpions abound in the whole of this district.

Alabaster occurs only in N.T. in the notice of the alabaster-box of ointment with which a woman anointed the Saviour in the house of Simon the leper at Bethany (Mt.26.7; Mk.14.3; Lu.7.37). The Eng. word alabaster is applied to two different kinds of rock, the one a hydrous sulphate of lime (the commoner varieties of which are called gypsum), the other a carbonate of lime. The former, being soft and easily carved, is much employed in this country for decorative purposes inside buildings, its nearly white colour, veined and mottled with red (oxide of iron), producing a very good effect. The latter, often known as Oriental alabaster, is a peculiar variety of carbonate of lime, deposited in a series of irregular bands of varied tints, the more delicate colours in this case also being due to oxides of iron. It was employed from a remote antiquity in Egypt, much of it being obtained from quarries near Tell el Amarna. It occurs in the limestone of Assyrian sculptures, and is, in Dr. Pinches' opinion, the material designated by the Sumerian Akkadian word na gislu-nu-gal and the Assyro-Babylonian parâtu (meaning the "stone of the west of the great light"). Pliny distinguishes
gypsum (the sulphate) from alabaster (the carbonate), remarking that varieties of the former resemble the latter, in which, he says (Nat. Hist. xii. 3), unguents are best kept. He repeats this statement (xxxvi. 12), and mentions only places where the material was worked. Of it no doubt the "cruse" of "pristic nards" was made, and probably the woman actually broke it in her hand. [T.G.B.]

Ala'meth (R.V. Alameth), a son of Becher the son of Benjamin (1Chr.7.8).

Alammelech (king's oak), a place within the limits of Asher, named between Abdon and Amalech (Jos.19.26 only).

Alamoth. [PSALMS, TITLES OF.]

Alecimus (talliant), a Gk. form of Eliakim (God establishes), obtained by changing the vowel points. The son or nephew of Jose ben-Joeser, the famous pupil of Antigonus of Socho, and of Aaronic descent (1Mac.7.5,14). This man is known as the leader of the Hellenizing party, which largely rested on the priests, and the objective of which was social rather than religious, is an explanation of the passionate resistance encountered by his movement. [HELLENIST.] Alecimus was nominated "through bribery" (162 b.c.) to the high-priesthood by Antiochus Eupator, to the exclusion of Onias, nephew of his predecessor Menelaus. The influence of Judas Maccabaeus at first prevented Alecimus from securing his position, and he withdrew to Antioch. Demetrius Soter, on his accession, sent Bacciches to restore him, and Alecimus was received by many even of the Hasidim. A massacre of 60 of the former party was caused by the return of Judas and a second withdrawal of Alecimus to Antioch. Nicanaor was next sent into Palestine, but was defeated and killed at Beth-horon (161 b.c.). Bacciches now returned (160 b.c.), and the fall of Judas was followed by Alecimus's unchallenged restoration. The scope of his plans for change in the temple and its services has been much discussed. He was engaged in an operation described (9.54, but cf. Josephus, 12 Ant. x. 6) as pulling down the "wall of the inner court of the sanctuary" and "the works of the prophets," an obscure and disputed expression, when he was taken with the fever and paralytic. Josephus and other writers also give him the title of "the wicked" (7.9), and speak of him with greater bitterness than the author of 1Mac. [J.A.D.]

Alema (1Mac.5.26), a city where the Jews were besieged in 164 b.c., mentioned with Caspion. Now the large village Ke'fri et ma' 4 miles E. of Krisif, and 7 miles S.W. of Ca'main. The ruins include a Greek altar, and a curious bas-relief of Aesculapius (Schumacher, Across the Jordan, pp. 79-82). [C.R.C.]

Ale'meth, a Benjamite, son of Jehodah or Jarah (1Chr.8.36,9.12), descended from Jonathan, son of Saul.

Ale'meth (R.V. Alemeth), the form under which Almon, the name of a city of the priests in Benjamin, appears in 1Chr.6.60. Now the village 'Almit, a mile N.E. of Ana'toth. Among the genealogies of Benjamin the name occurs in connexion with Azimath (rChr.8.26,9.12 [Basset]). [C.R.C.]

Alexander III. (helper of men:) b. 356 b.c., d. 323), the Great, son of Philip II of Macedonia and Olympias. Having quelled the disloyalty which he found on Philip's murder (336), Alexander prepared his forces, and in 334 crossed the Hellespont. In 3 years he had largely realized the dream of worldwide conquest which he had inherited. The discontent of his troops, (330) and news (333) made him master of S.W. Asia and Egypt. In 331 he founded Alexandria. The murder of

Darius by Bessus (320), and the subjugation of Persia and Bactria were followed by his famous and abortive campaign into India (327). The discontent of his troops, however, compelled his return to Babylon, where he died. Ten years later his empire had broken up into the kingdoms of the Diadochoi. [PTOLEMY 1.; SELLECU S IV.—Alexander and the Jews. An account is given by Josephus (9 Ant. viii. 3-6) and in the Talmud of a visit paid by Alexander to Jerusalem (Ant. 13.10). The facts that Alexander paid a similar visit to Gordium, and that the visit to Jerusalem is not mentioned by Gk. historians, have raised the suspicion that there is no basis for the narrative. The probability, however, is that it rests on an historic event, for the Greeks rarely show interest in Palestine, and, both from policy and the temple, it is improbable that Alexander would have passed through Palestine without visiting Jerusalem. Jaddua (Ne. 12.11) the high-priest, it is said, refused demands made by Alexander while besieging Tyre. After raising that city, Alexander marched on Jerusalem. Jaddua, acting on a dream, met with him in the temple, and Alexander, throwing himself on his neck," took the high-priest's turban, and when Paremenio remonstrated with him for "adoring the high-priest" replied that he did not adore him, but his God, and that he had seen Jaddua in a dream at Dium, encouraging him to cross into Asia" (11 Ant. viii. 5). Alexander then went with Jaddua to the temple, offered sacrifices, and accepted such prophecies as Dan.8.21,11.3 as applying to himself. Not only was Alexander anxious to identify himself with national cults, but the Jews seem to have received exceptional treatment from him (see esp. Iwalt, Hist. v. 5). He planted a favoured Jewish colony in Alexandria, is said to have given his Jewish troops freedom to exercise their religion, and was perhaps influenced by Jewish animosity in his treatment of Samaria. Zech.9.1-8 is thought to allude to Alexander's conquests. The references to his empire in Dan.2,4,8.5,6,7,21, 11.3 are unquestionable. Alexander bulks

TETRADRACHM (ATTIC TALENT) OF LYSIMACHUS, KING OF THRACE.

Obv.: Head of Alexander the Great as a young Jupiter Ammon. Rev.: Tetraerammaton to left, holding a victory.
largely in Eastern legends, in which he is known as the "Lord of the Horns." [J.A.D.]

Alexander Balas was described falsely to be a natural son of Antiochus IV., and assumed his title Epiphanes (vMac.10.1). In 153 B.C. he disputed the Syrian throne with Demetrius I. (Soter), who had lost the friendship of the neighbouring kings and the affections of his own subjects. Jonathan, now leader of the Jews (vMac.11) supported Alexander, who landed at Ptolemais (10.1), and in 150 B.C. defeated and killed Demetrius (10.48-50). After this Alexander married Cleopatra, daughter of Ptolemy VI. (Philometor); and appointed Jonathan governor of Judea (10.65,11.57).

But Alexander proved an incapable and selfish tyrant. His chief authority, the throne of Ptolemy II. (Nicator), son of Demetrius Soter, landed in Syria in 147 B.C., and received the support of Apollonius, governor of Coelosyria (10.67ff.). Jonathan defeated and slew Apollonius, and was rewarded by Alexander with fresh favours (10.65-80). But in 144 B.C. the Jews rebelled against a heavy tax levied by a local force; garrisoned the chief cities of the coast, as Alexander's friend; and then, on the plea that Alexander was conspiring against him, declared himself in favour of Demetrius (11.1-11). Alexander hastened from Cilicia to meet Ptolemy, but was defeated, and fled to Abise in Arabia, where he was murdered (11.14-17). The Jews loyally supported Alexander as "the first that entrenched of true peace with them" (10.47); and they showed the same zeal for his son Antiochus VI.

Alexander in N.T.—1. Son of Simon, 11, of Cyrene (Mk.15.21). (Rufus.)—2. One of the high-priestly family (Ac.4.6).—3. A Jew of Ephesus (Ac.18.33), from whom Jews put forward during the tumult there, their object being probably to disavow to the mob any responsibility for the action of the Christians. —4. An apostate Christian (rTim.1.20). (Hymenaus.)—5. A smith, probably of Ephesus, concerned in the persecution of St. Paul in that city (Ac.19.21). [A.V.]

Alexandria, Alexandrians, referred to three times in N.T. In Ac.18.24 Apollos is spoken of as "born at Alexandria"; 6:9 speaks of the synagogue of the "Libertines, Cyrenians, and Alexandrians," referring probably to a synagogue in Jerusalem used by Jews and Gentiles (Ac.21.30). The representatives of Alexandria was one of the most beautiful in the world. It possessed many natural advantages, notably of climate and of site, and its harbours were spacious and secure. It was founded by Alexander the Great in 332 B.C., opposite the island of Pharos, between Lake Auge and the Mediterranean Sea. The historian Polybius states that Alexander measured out the ground on which the city would be built, marked out its streets, and called it after his own name. It became the flourishing Hellenic capital of Egypt. As a commercial centre it stood almost without a rival. Egyptians, Greeks, Jews, and Greeks from Asia Minor, came and went, which at one time amounted to nearly a million. The Jews, who were numerous there, occupied a quarter of their own, a great proportion of the trade of the city falling into their hands. Great attempts were made to establish the city as a centre of intellectual fame, and within its Jewish population the greatest library of ancient days. To the student, however, the chief interest of Alexandrian history will probably lie in the belief that it was the scene of the labours of the 70 or 72 translators of the Heb. O.T. into the Gk. version known as the Septuagint. Irenaeus, Justin Martyr, and other writers give detailed accounts of the translators' method and the (so-called) Letter of Aristides describes the arrival of translators at Alexandria; the feast which was celebrated in their honour, lasting 7 days; and the duration of the period of their labours. Eusebius states that St. Mark went to Egypt, whence he brought the Gospels, Christianity, proclaiming the truths which his father had maintained, and that he established churches in Alexandria. Its remarkable school of Jewish philosophy arose with the view of interpreting O.T. teaching in such a way as to commend itself to Hellenic thought. It is not easy to determine to what extent N.T. writers were influenced by Alexandrian philosophy. As the Alexandrian Jew claimed to show good cause for maintaining the thesis that from his scripture proceeded all divine knowledge, and all guidance as to the daily life of man. Eusebius, Hist. Eccl.; Budge, Hist. of Egypt; Jowett, Philo and St. Paul; Neander, Hist. of Chr. Church; Smith, Chr. J. of Eur. Hist. [A.J.B.]

Al gum or Algum-trees, the former form occurs in 2Chr.2.8,9,10,11, the latter in rK.10.11,12. We read that the "algum" was brought in great plenty from Ophir, together with gold and precious stones, by the fleet of Hiram, for Solomon's temple and house, and for the making of musical instruments. In 2Chr.2.8 Solomon is represented as ordering Hiram to send him "cedar-trees, fir-trees, and algum-trees out of Lebanon." It is improbable that Lebanon, as well as Ophir, should have produced algum-trees. Perhaps the wood had been brought from Ophir to Lebanon, and Solomon's instructions to Hiram were to send on to Jerusalem the timber imported from Ophir that was lying at the port of Tyre, with the cedars which had been cut in mount Lebanon. It is impossible to identify the algum-tree with certainty, but the arguments favour the red sandal-wood (Pterocarpus santalinus) more than any other species. This tree, which belongs to the Leguminoseae, is a native of India, chiefly on the Coromandel coast. Its wood is very heavy, hard, and fine grained, and of a beautiful garnet colour. The word algum has been identified by Max Müller with the Skt. valguka, a name for the sandal-wood tree, which may have been corrupted from an earlier form (valgu) by the Persian sailors. Celsus believed it to be the sandal. Josephus considered it a kind of fir, the Vulg. rendering being ligna thyina. Wyclif reads, "cedre trees, pyne trees, and thyne trees of the

Aliah. [AYAH]

Aliah, a figure of speech, defined by Bishop Marsh, in accordance with its etymology, as "a representation of one thing which is intended to excite the representation of another thing," the first representation being consistent with itself but requiring, or being capable of being the spirit interpretation beyond its literal sense. It is often difficult to draw a line between metaphor and allegory, the two running into one another in Biblical language. The distinguishing feature seems to be that a metaphor implies a mere resemblance which appeals to the imagination (cf. 2K.19.13, where Isra- 

Alliances. In the patriarchal age, alliances of a simple and friendly sort were made by Abraham and his descendants with the tribes inhabiting Palestine (Gen. 21.22, 26-26ff.). But the Mosaic law (Ex. 34.12ff.; Deut. 7.7ff.) forbade such alliances, and though under the kings, the Hebrews were brought more into connexion with the surrounding nations and tempted to ally themselves with them, the influence of the prophets was always exerted against this tendency, as contrary to the divine ideal of the holy nation. Solomon, however, made a considerable treaty (2H. 7.19) with Tyre, originally with the view of obtaining materials and workmen for the temple, and afterwards for the supply of shipbuilders and sailors (1K. 5.2-12; 9.27); and (2) with Pharaoh of Egypt, by which he secured a monopoly of the trade in horses and other Egyptian products (10.28, 29). Alliances for other purposes, defensive and offensive, followed the division of the kingdoms. So long as Syria was the chief danger, each kingdom sought alliance with that nation, as Assyria and Jerusalem (ch. 15); and Pekah with Rezin (Is. 7). Israel and Judah allied themselves with each other under Ahaz and Jehoshaphat. Ahaz sought the alliance of Assyria against the coalition of Israel and Syria (2K. 16.7), in spite of the warnings of Isaiah. But the most attractive, and as it proved, the most deceptive alliance, for both kingdoms was with Egypt, which was looked to as a protection against both Assyria and Babylon (Is. 7, 11), etc. 18-30.

The later kings of Judah either allied themselves with Babylon, or tried (like Zedekiah) to play off Egypt against Babylon (1K. 37.1-11) with disastrous results. In later days Judas Maccabaeus sought an alliance with the Romans as a counterpoise to the Greco-Syrian

Liban." The red sandal-wood is employed in the E. "in the manufacture of idols and for medicinal purposes, which may be seen in the Indian Museum at South Kensington" (Grosier). Almuq may be regarded as an erroneous form; unless, as Col. Conder suggests, the word is Assyrian and = "precious (or strong) wood." [Ormer.]

But the most attractive, and as it proved, the most deceptive alliance, for both kingdoms was with Egypt, which was looked to as a protection against both Assyria and Babylon (Is. 7, 11), etc. 18-30.

The later kings of Judah either allied themselves with Babylon, or tried (like Zedekiah) to play off Egypt against Babylon (1K. 37.1-11) with disastrous results. In later days Judas Maccabaeus sought an alliance with the Romans as a counterpoise to the Greco-Syrian
enemy (1Mac.8). This alliance was renewed by Jonathan (ch. 12) and by Simon (15:17); and the independence of the Jews was recognized by Rome, and formally notified to neighbouring nations 140 b.C. (15:22,23). Treaties were at the same period concluded with the Spartans, under the impression that they came of a common stock (15:6,15,20).

The Roman alliance, renewed in 128, ultimately proved fatal to Jewish independence, but it also gave the opportunity to place the country under tribute. The formation of an alliance was attended with religious rites, a victim was slain and divided into two parts, between which the contracting parties passed (Gen.15:10-17; Je.34:18-20). Generally speaking, how in a quarrel referred to Rome gave Pompey the opportunity to place the country under tribute. The formation of an alliance was attended with religious rites, a victim was slain and divided into two parts, between which the contracting parties passed (Gen.15:10-17; Je.34:18-20). Almon, a city of Benjamin, with "suburbs" given to the priests (Jos.21:18). In 1Chr.6:60 ALMETH. [C.R.C.]

Almon-diblatha'im, one of the latest stations of the Israelites, between Dibon-gad and the mountains of Abarim (Num.33:16-47). [Beth-diblatha'im.]

Almond-tree. Almond. These words are found in Gen.43:11: Ex.25:33,34,37,19,20; 17:8; Ec.12:5; Je.1:11, in the text of A.V. They are invariably represented by the same Heb. word (shāqēḏh), which sometimes stands for the whole tree, sometimes for the fruit or nut; e.g. in Gen.45:11, Jacob commands his sons to take as a present to Joseph a little honey, spices and myrrh, nuts and almonds. Here the fruit is clearly meant, and the expressions of Exodus given above, the "bowls made like unto almonds," which were to adorn the golden candlestick, seem also to allude to the nut. Aaron's rod, that budded miraculously, yielded almond-nuts. In Ec.12:5 and Je.1:11 shāqēḏh is translated almond-tree, which the context certainly requires. It is clearly then a mistake to suppose, as some have done, that shāqēḏh stands exclusively for "almond-nuts," and that līz signifies the "tree." Probably this tree, conspicuous for its early flowering and useful fruit, was known by both names. The Heb. līz occurs only in Gen.30:37, where it is translated hazel in A.V.; but undoubtedly R.V. is correct in rendering it almond, the Arab. name of which is lōc. shāqēḏh is derived from a root which signifies "to be wakeful," "to hasten," for the almond-tree blossoms very early in the season, the flowers appearing before the leaves.

Hence it was regarded by Hebrews as a welcome harbinger of spring, and as a token of the passing of winter (Job 18:11,12). A tree which hastēns to blossom is, therefore, a very fitting poetical description of the lēz, or almond-tree. This tree has been noticed in flower as early as the 9th of January; the 19th, 23rd, and 25th are also recorded dates. This fact explains the play upon words in Je.1:11,12: "The word of the Lord came unto me, saying, Jeremiah, what seest thou? And I said, I see the rod of an almond-tree [shāqēḏh]." Then said the Lord unto me, Thou hast well seen, for I will hasten [shāqēḏh] my word to perform it."

The almond-tree has always been regarded by Hebrews with reverence, and at the present day English Jews carry a bough of flowering almond to the synagogue on their great feast-days, just as Hebrews of old used to present palm-branches in the temple. The almond-tree is about 12 or 14 ft. high; the flowers are pink, and the leaves are lanceolate and serrate. The covering of the fruit is downy and succulent, enclosing an edible shell which contains the kernel. It is curious to observe, in connexion with the almond-bowls of the golden candlestick, that, in the language of lapidaries, almonds are pieces of rock-crystal, even now used
ALMS

in adorning branch-candies. Gen.43.11 implies that the almon was not cultivated in Egypt in the days of Jacob, and it is little grown there now, much less so than in Syria. It is mentioned, however, by Pliny among Egypti-

Anchus, or aloes-wood of commerce, much valued in India on account of its aromatic qualities for fumigating and for incense. It grows to the height of 120 ft., being 12 ft. in girth. Dioscorides mentions that the wood of loes was formerly exported to Gaul. The best sort of this wood (agallock) comes from Sumatra and the Moluccas. "Aoles," has, of course, nothing to do with the flowering Aloe or Agave of modern gardens. [Spices.] (t.c.c.)

Altoth (high places; R.V. Bealoth), forming with Aher the jurisdiction of the Judith of Solomon's officers. (1 K.4.16). The name may survive at 'Alia, a ruin about 9 miles E. of Achiob. (c.r.c.)

Alph, the first letter of the Gk. alphabet, used typically of a beginning, as the last, Omega, is of an end (Rev.1.8.11.21.6.22.13; cf. 1s.41.). The Greeks employed the letters of the alphabet as numerals. [Number.]

Alphabet. [Writing.]

Alphæus.—1. Father of Levi (Mk.2.14). [Matthew.—2. Father of James, who is always described as son of Alphæus (Mt.10.3), to distinguish him from James, son of Zebedee. Alphæus has been identified with Copas (Acts 1.13, and by U.19.25), and thus Alphæus and Copas are one and the same. It is also suggested that Alphæus, like Alphæus, is a transliteration in another form of the Aramaic Halphai, more accurately represented as Alphæus. But Aramaic scholars deny the possibility of this. If the man is the same, the names are different. Double names, Aramaic and Gk., for the same man were common. No probable Aramaic or Gk. origin for Copas has been suggested. It can hardly be an anomalous contraction for Cleopas, which is a shortened form of Gk. Cleopatros. If it were, Cleopas might be identical with the Copas who went to Emmaus (U.24.18). The identification of Alphæus and Copas is important for the display of the "brethren of the Lord." [James.] Hege-
sippus mentions a Copas, brother of Joseph, husband of the Blessed Virgin. But all conclusions are precarious on account of the vagueuess of the Gk. geneitures, before which we have to supply by guesswork. "son," "wife," daughter," etc. [E.B.-]

ALTAR erected (Gen.33.20), where, however, "altar" may have been read for "pillar," the two Heb. words being very similar in form; or it may have been an altar-pillar (Ariel). In one instance the altar was not intended for sacrifices, but as a Witness (Jos.22.10-29). The Covenant code prescribes altars made of earth (Ex.20.24), with the permission added to build them of unhewn stones, without steps (ver. 25), not restricting the number or locality of such altars. Hence Moses commanded the children of Israel to build an altar of stones on mount Ebal (Deut.27.6; cf. Jos.8.30); others were built by Gideon at Ophrah (Judg.6.24), by the people at Bethel (21.4), by Samuel at Ramah (1Sam.7.17), by Saul after Michmash (14.35), by David on the threshing-floor of Araunah (2Sam.24.25; cf. 1Chr.22.1), and by Elijah on Carmel (1K.18.30). The law prescribing one altar, to be located at the central sanctuary (Deut.12.2,11-14), had no reference to the preceding, which were not under regular priestly control. This, and the altar for incense, were to be made (Ex.27.1, 30.1,37.25,38.1,30; 2Chr.4.1,19, etc.). A most important distinction was made between the (national) altar at the central sanctuary, administered by the regular order of priests, and local or occasional altars. An integral and most sacred part of the great altar was the horns, one at each corner, a feature which was copied in the rival altar made by Jeroboam for the shrine at Bethel (1K.12.33; Am.3.14). The altar of incense had the same appendages. Their origin is obscure, but not so their purpose. (1) They were an essential and distinctive part of the structure of these two altars, and had a definite place in the ritual of the sanctuary. Sin was represented as engraved on the horns of the altar (Je.17.1), hence the blood of the sin-offering was applied to these horns (Ex.29.12,30.19; Lev.4.7,18,25,30,34,8.15,9.9,16.18). (2) The horns of the great altar were square, and bordered sanctuary, which failed only in certain cases (Ex.21.14; cf. 1K.1.50,51,2.28,29). (3) There may be a reference to an ancient custom in Ps.118.27, "Bind the festal victim with cords, (even) unto the horns of the altar." I. Altars in Tabernacle. (1) Altar of burnt-offerings (Ex.27.1-8,38.1-7). It was a hollow frame of acacia wood overlaid with copper or bronze. It was 5 cubits square by 3 high, and had a border or edge half-way up the sides, probably for the priests to stand on. Extending from the edge of this border to the ground was a grating or network to which brass rings were attached for the acacia wood staves with which to carry the altar. There was a horn at each corner of the altar, "of the same piece with it" (27.2). The utensils for the service of the altar are enumerated in ver. 3—viz. pans for removing the ashes, shovels, basons for the blood, flesh-hooks (cf. 1Sam.2.13,14), and firepans. [Censer.] The prohibition against steps (Ex.20.26) would obviously have no meaning in connexion with an altar only 3 cubits in height (27.1). (2) Altar of incense (20.1-5, also called mizbe'ah by an extension of use). This also was made of acacia wood overlaid with gold, and was 1 cubit square by 2 high (ver. 2). It had a flat top with a gold moulding round it (ver. 3), beneath which at each corner was a gold ring for the gold-covered poles used in carrying it. Its horns were, like the other parts, covered with gold. It was only to be used for the burning of incense. On the Day of Atonement Aaron was to apply the blood of the sin-offering to the horns (ver. 10). It is called the golden altar (39.38,40.5,26; Num.4.11, where directions are given for its care when carried about), and the altar of sweet incense (Lev.4.7). It stood in the centre of the W. end of the holy place (Ex.30.2). In Solomon's Temple. (1) The altar of burnt-offerings was made of bronze (1K.8.64; 2K.16.14; 2Chr.4.1, where it is said the altar was 20 cubits square by 10 high. No other details are given). Ahaz had this put on one side, and used in its stead a
Al-taschith, a station of the Israelites on their journey to Sinai, the last before Rephidim (Num. 33.13, 14). Al-shul, a name of the Builders (Gen. 36.40), written Ahiah in 1 Chr. 1.51.

Alvan, a Horite, son of Shobal (Gen. 36.23), written Ahun in 1 Chr. 1.49.

Amad, in Asher, between Almammeelech and Mishael (Josh. 19.26, 30). Probably the ruin of Amald, N. of Accho.

Amalekites, a very ancient nomad race, declared by Balaam to be "the first of the nations" (Num. 24.20). In the account of the expedition of Chedorlaomer and his allies, Amalek is mentioned as one of the defeated peoples, together with the Emim, Rephaim, and Zuzim, the ancient giant races of Palestine (Gen. 14.7). At one time they appear to have occupied the territory westward of the Ephraim and Dan, between the Mediterranean and the Jordan. "Out of Ephraim came down they whose root is in Amalek," R.V.: Judg. 12.15, "In the land of Ephraim, in the dint of the Amalekites." [Benjamin.] An Amalek is mentioned in Gen. 36.12 as a grandson of Esau, by the union of Eliphaaz with a concubine called Timna; but nothing certain is known of this branch of the race. Possibly some Amalekite clan was incorporated with Edom. All references serve to show that the Amalekites were an ancient nomad tribe, constantly changing their abode, and passing through many vicissitudes, and to connote nothing against the Arab tradition that they came from the Persian Gulf, and were pushed westward by the growth of the power of Babylonia and Assyria. After the Exodus the Amalekites appear as the earliest enemies of Israel, who defeated them under Joshua at Rephidim, in the Sinaiic peninsula, or in the extreme S. of Palestine, according to the route the Israelites actually took, which is not shown in dispute. The Amalekites were vouched against by Amalek by Moses (Ex. 17.8-16). (See also Deut. 25.17, 18, where Amalek is said to have harassed Israel in the rear.) The spies found the Amalekites in the nashibb (Num. 13.29), and when the people, against the divine command, tried to enter the promised land, "the Amalekites came down, and the Canaanites which dwelt in that hill, and disappointed them, even unto Hormah." During the times of the Judges the Amalekites assisted in two great invasions of Palestine, that of Eglon, king of Moab (Judg. 3.13), and the more famous incursion of the Midianites (Judg. 6.3). In the time of Saul, when Israel was strong and united, a holy war, with all its terrible accompaniments, was declared against Amalek. Saul smote them from "Havilah until thou comest to Shur, that is over against Egypt," and devoted all to destruction, sparing none but Agag their king, whose name (Num. 24.7) probably was an hereditary title. For the violation of the ban against Amalek, Saul was solemnly cursed by Samuel, and the kingdom rent from him (1 Sam. 15). The Amalekites, however, survived the expulsion of Saul, and were still formidable in

**Al-taschith**

_AL-TASCHITH_

A station of the Israelites on their journey to Sinai, the last before Rephidim (Num. 33.13, 14). Also called Al-shul, a name of the Builders (Gen. 36.40), written Ahiah in 1 Chr. 1.51.

**Amalekites**

Alush', a station of the Israelites on their journey to Sinai, the last before Rephidim (Num. 33.13, 14). Also called Al-shul, a name of the Builders (Gen. 36.40), written Ahiah in 1 Chr. 1.51.

Alvan, a Horite, son of Shobal (Gen. 36.23), written Ahun in 1 Chr. 1.49.

Amad, in Asher, between Almammeelech and Mishael (Josh. 19.26, 30). Probably the ruin of Amald, N. of Accho.

Amalekites, a very ancient nomad race, declared by Balaam to be "the first of the nations" (Num. 24.20). In the account of the expedition of Chedorlaomer and his allies, Amalek is mentioned as one of the defeated peoples, together with the Emim, Rephaim, and Zuzim, the ancient giant races of Palestine (Gen. 14.7). At one time they appear to have occupied the territory westward of the Ephraim and Dan, between the Mediterranean and the Jordan. "Out of Ephraim came down they whose root is in Amalek," R.V.: Judg. 12.15, "In the land of Ephraim, in the dint of the Amalekites." [Benjamin.] An Amalek is mentioned in Gen. 36.12 as a grandson of Esau, by the union of Eliphaaz with a concubine called Timna; but nothing certain is known of this branch of the race. Possibly some Amalekite clan was incorporated with Edom. All references serve to show that the Amalekites were an ancient nomad tribe, constantly changing their abode, and passing through many vicissitudes, and to connote nothing against the Arab tradition that they came from the Persian Gulf, and were pushed westward by the growth of the power of Babylonia and Assyria. After the Exodus the Amalekites appear as the earliest enemies of Israel, who defeated them under Joshua at Rephidim, in the Sinaiic peninsula, or in the extreme S. of Palestine, according to the route the Israelites actually took, which is not shown in dispute. The Amalekites were vouched against by Amalek by Moses (Ex. 17.8-16). (See also Deut. 25.17, 18, where Amalek is said to have harassed Israel in the rear.) The spies found the Amalekites in the nashibb (Num. 13.29), and when the people, against the divine command, tried to enter the promised land, "the Amalekites came down, and the Canaanites which dwelt in that hill, and disappointed them, even unto Hormah." During the times of the Judges the Amalekites assisted in two great invasions of Palestine, that of Eglon, king of Moab (Judg. 3.13), and the more famous incursion of the Midianites (Judg. 6.3). In the time of Saul, when Israel was strong and united, a holy war, with all its terrible accompaniments, was declared against Amalek. Saul smote them from "Havilah until thou comest to Shur, that is over against Egypt," and devoted all to destruction, sparing none but Agag their king, whose name (Num. 24.7) probably was an hereditary title. For the violation of the ban against Amalek, Saul was solemnly cursed by Samuel, and the kingdom rent from him (1 Sam. 15). The Amalekites, however, survived the expulsion of Saul, and were still formidable in...
AMAM

his latter years. David, as a Philistine vassal, used constantly to invade their territory from Ziklag (1Sam.27.8), and in revenge, when he had defeated the captains of Israel at Salem, they plundered and burnt his city. David on his return pursued them, and rescued the spoil and his two wives (1Sam.30). In the account of Saul's death on mount Gilboa, we read (1Sam.31) that he fell on his own sword, but an Amalekite (2Sam.1), hoping for a reward from David, claimed to have persuaded to put him to death. [SAMUEL, BOOKS OP.] Nothing more is told us of the Amalekites in the Bible, save in 1Ch.4.42, 43, where a record is preserved of how 500 Simeonites, in the days of Hezekiah, smote the remnant of the Amalekites in mount Seir, in the territory of Edom. In Ps.83.7 Amasa, son of Abigail, with 200,000 warriors of Judah in Jehoshaphat's reign (1Ch.17.11—19).

AMASIAH, son of Azareel, a priest in the time of Nehemiah (Ne.11.13, apparently =MAASIAH (1Ch.9.12)).

Amasiah, son of Zichri, and captain of 200,000 warriors of Judah in Jehoshaphat's reign (1Ch.17.16—19).

AMATH. [HAMATH.]

AMATHIS (1Esd.9.29). [ATHLAI.]

Amathis, The land of, a district to the N. of Palestine (1Mac.12.25). From the context it is evidently HAMATH.

AMAZIAH.—1. Son of Joash, and eighth king of Judah. On his accession (c. 795 B.C.) he slew his father's murderers, and permitted their children to live (2K.14.1-6; cf. Deut.24.16). He made war on the Edomites, who had revolted from Judah during the reign of Jehoram (8.20-22), defeated them in the valley of Salt, and took their capital Petra or Sela (14.7; 2Chr.25.11), to which he gave the name of Joktheel, i.e. God-subdued. He carried back with him the gods of Seir and set them up as objects of worship (2Chr.25.14-16). Elated by success, Amaziah challenged Jehoash, king of Israel, to battle (2K.14.8), who replied by the contemptuous parable of the thistle and the cedar (vv. 9, 16). The king of Judah, however, refused to listen to the king of Israel's well-meaning advice, and, at the battle of Beth-shemesh, Judah was defeated and Amaziah himself taken prisoner and carried by Jehoash to Jerusalem, which opened its gates to the conqueror. A portion of the wall of Jerusalem was broken down, and treasures and spoil was carried away into the house of the Lord (2K.14.10). Amaziah's successor, the fifth king of Judah, Hezekiah (see), was a wise and pious monarch, who reclaimed the city of Jerusalem (2K.18.17), captured the fortress of Horonaim, and was saved from the invasion of the Assyrians by Sennacherib. 

AMBASSADORS. [ALLIANCES.]

AMBER. (Heb. hézōnāh. Ezk.1.1-27, 8.2 only) is usually supposed to denote a metal, and not the fossil resin called amber. The LXX. and Vulg. afford no certain clue, for the word elektros was used by the Greeks to express both amber and an alloy of gold and silver, which was rather similar in colour and was highly esteemed by the ancients. The latter sense of the word, however, seems the less ordinary, and amber was undoubtedly well known in ancient times. It is probably mentioned by Homer, and was found by Schliemann in tombs at Mycenae and Tiryns. It is mentioned by Herodotus, and Pliny gives a long account of it (Hist. Nat. xxxiv. 11, 12). It is found in many countries—for instance, occasionally on the coast of Norfolk; but the best and clearest coloured varieties are obtained in the parts of Prussia adjacent to the Baltic. The
Amen. This Aramaic word is identical with the Heb. verb "אָמַן, " he was firm," and, throughout, it indicates a confirmation. (1) It is used for the purpose of adopting a remark of another as one's own, and chiefly in a religious sense as an expression of the faith of individuals in divine promise or revelation. Hence in Deut.27:15-26 it is used by the people in confirming the curse on Mount Ebal [OATH.]. From this comes its liturgical use in the services of the synagogue (Ps.74.13; Ne.8.6), from which, at a very early period, it was introduced into Christian worship (1Cor.14:16). From this its use by individuals to emphasize their own prayers is natural; see Ro.1.25, 9.5,15,13; Gal.6.18; Rev.1.7, etc. (2) A special application is found in our Lord's language. He employs the word, not at the end, but invariably at the beginning, of a sentence: His object being not to emphasize His own faith in the statements, but to make a special appeal for faith on the part of His hearers. This verb translated "verily" appears about 50 times in the Synoptic Gospels, and of these passages 30 are in St. Matthew. The double use of the word is confined to St. John, where it occurs 25 times. (3) The word is found in a few passages as an ordinary noun. In 2Cor.1.20 it is used in contrast with "yea," where "yieh" stands for the promise and "amenn" for the fulfilment. In Is.65.16 God is, by a Hebrew idiom, twice called "the God of amen" (E.V. "God of truth"); in Rev.3.14 Christ is Himself called the Amen. [T.A.M.]

Amethy [Heb. אַתְתָּם]. This name is given to the third stone in the third row of the high-priest's breastplate in Ex.28.19,39.12. In 2Chr.39.13; Gal.6.18; Rev.1.4, etc. it denotes the twelfth stone in the foundations of the wall of the heavenly Jerusalem. Commentators generally are agreed that the Heb. word denotes the ordinary anethym, as the Gk. ἀμέθυστος in Rev. certainly does. This a transparent purple variety of quartz (crystallized silica) which is found in many countries, and has been used for ornaments and carved objects of art from very early times. The name is derived from the Gk. α (privative) and μεθυστος, "a drunkard," because wine drunk from cups of it was supposed to lose its intoxicating properties. With the Heb. name we may compare a stone called hiltus mentioned in 15th cent. B.C. in the Amarna tablets (Berlin 26). The modern Oriental anethym is a choice variety of corundum, very similar to the above in colour. [ADAMANT.]

Ami, one of "Solomon's servants" (Ezr.2.57); = Amón (Ne.7.59) and Alon (Esd.5.34). Aminadab (Mt.1.4; Lu.3.33). [Aminadab.]

Amital, father of the prophet Jonah (Z.K.14.25; Jos.1.11). Amman, Hill of (ZSam.2.24). The Heb. may be read: "To Gibeah Amman facing the fountain on the Gibeon-desert road." These sites are unknown. [C.I.C.]

Ammon, i.e., as explained in A.V. marg. (Ho.2.4), "my people," a figurative name applied to the kingdom of Israel in token of God's reconciliation with them, in contrast with the negative name Lo-ammi given by the prophet Hosea to his second son (Ho.1.9, 10). Similarly, Ruhamah (having obtained mercy) contrasts with Lo-ruhamah.

Ammonid (1 Esd.5.20 only; R.V. Ammi- dū, named among those who came up from Babylon with Zerubbabel [O.T.].

Ammiel. - 1. The spy selected by Moses from the tribe of Dan (Num.13.12-22). Father of Machir of Lodebar (2Sam.9.4,5,17.27). - 3. Father (1Chr.3.5) of Bathsheba (= Bathsheba); called Eliam in 2Sam.11.3. He was the son of Ahithophel, David's prime minister. - 4. A descendant of Pharez, son of Judah (1Chr.9.4).

Ammihud. - 1. An Ephraimithe, father of Elishama, 1 (Num.1.10.21.18.4,5.10.22), and ancestor of Joshua (1Chr.7.26). - 2. A Simeonite, father of Shelemuel, 1 (Num.34.20). - 3. Father of Pedahel prince of Naphtali (34.20). Father of Talmai, king of Geshur (2Sam.13.37). - 5. A descendant of Pharez, son of Judah (1Chr.9.4).

Aminadab (my people is generous). - 1. Son of Ram or Aram (Ru.4.20; 1Chr.2.70), father of Nahshon, and father-in-law of Aaron (Ex.6.23). He was of the fourth generation after Judah in the genealogy of Jesus Christ (Mt.1.4; Lu.3.33). - 2. The chief of the 112 sons of Uzziel, a junior Levitical house of the family of the Kohathites (Ex.6.18) in the days of David, for whom that king sent, together with other chief fathers of Levitical houses, to bring the ark to Jerusalem (1Chr.15.10-12). - 3. In 1Chr.27.22 Zhar, son of Kohath and father of Korah, is called Aminadab, probably by a clerical error.

Aminadib (Can.6.12, A.V. and R.V. marg.: or "my willing people," A.V. marg. and R.V.). If a proper name, nothing else is known of him, nor is he elsewhere mentioned in the Bible.

Ammishaddai (people of the Almighty), the father of Ahiezer prince of Dan at the Exodus (Num.1.12.2.25.7.66,71.10.25).

Ammizabad, son of Benahiah, apparently his father's lieutenant in the third division of David's army, which was on duty for the third month (1Chr.27.6).

Ammon. Ammonites. The Ammonites were, with the Moabites, descendants of Lot, and consequently allied in blood and language to the Israelites. The story of their origin is one of drunkenness and lust (Gen.19.36-38); and it implies that the Israelites, whilst recognizing them as kindred, entertained a strong moral repugnance to such a nation. Just before the entry into Canaan, Moses commanded the Ammonites and Moabites to be excluded from the congregation till the tenth generation, for hiring Balaam to curse Israel, Edomites and Egyptians being allowed to enter in the third (Deut.23.3-8); and we find this association of Ammon and Moab throughout the O.T. The Moabite and Ammonite territories lay close together on the E. of the Jordan, Moab occupying the S. part on the shores of the Dead Sea, and Ammon the N.E. district, its border being in the days of Sihon, when the Israelites invaded his territory, at the town Jazer (see Nm.21.24, where
AMMON, AMMONITES

for “strong,” some MSS, of the LXX. read Jazer). Their chief city was Rabbath-ammon, known in later times as Philadelphia. They are first mentioned as holding their territory from Jehovah, together with the Moabites, and therefore not to be attacked by Israel. It is said that they had occupied the land of the Zemummim, a race of Rephaim, like the Anakim or Emim, whom their Amorite brethren had dispossessed (Deut.1.19-21). Eglon, the Moabite king, was assisted by the Ammonites in his invasion of W. Palestine (Judg.3.13). At a later time they passed the Jordan, “to fight against Judah and Benjamin and the house of Ephraim” till the election of the freebooter Jephthah as judge (Judg.10.6,11), who, before attacking them, sent an interpretation that David merely coveted the disputed territory conquered by Israel from Sihon three centuries before. In the interesting statement of Israel’s claims (Judg.11.15-28), the identity of Ammon and Moab is so far assumed that both nations are said to worship Chemosh, whereas Milecom is elsewhere said to be the god of Ammon, and there is no indication of his worship in Judg. (Judh.11.33), but in the days of Saul their king Nahash threatened the city of Jabelgilead. They were distinguished alike for craft and cruelty, and refused on this occasion to come to any terms with the inhabitants, unless they would all submit to have their right eyes put out. Then Saul, who thereby justified his election by Samuel (1Sam.11.14.47). David seems to have been on good terms with another Nahash, and on the latter’s death sent an embassy to his son Hanun. The brutality of the Ammonites was shown in their treatment of the envoys of a friendly king, and David began against them one of his most formidable wars (2Sam.10). The Syrians were hired by the Ammonites, and until they were subdued nothing could be done. Then Joab drove the Ammonites into Rabbah, and captured the place after a long siege, in which Uriah the Hittite perished (2Sam.12). The capture of this place, “the city of waters,” as it was called, was possibly the downfall of David’s reign. The crown of his kingship was placed on his head (2Sam.12.30). Perhaps the victory was marred by acts of exceptional cruelty on the part of the Israelites, provoked by the conduct of the Ammonites before the war. 2Sam.12.31, however, is capable of the interpretation that David merely occupied the Ammonites to serve labour. By Amos, who prophesied in the reign of Jeroboam II., the Ammonites are denounced for their atrocious cruelty practised in Gilead, “that they might enlarge their border”; from which we may infer that in the days of Israel’s distress, they had begun to occupy its trans-Jordanic territory (Am.1.13). A cent. or more later we find the Ammonite king in possession of the territory of the tribe of Gad (Je.49.1; see also Zeph.2.8-11). In the days of the Babylonian invasion, the Ammonites seem to have been among the bitterest enemies of Israel (Ezek.21.28; 25.1-7), and in Jehoiakim’s reign they invaded Judah, at the instigation of Nebuchadnezzar (2K.24.2). Nevertheless, during the last siege of Jerusalem by the Chaldeans many Jews sought refuge with the Ammonites (Je.40.11), and their king Baalis sent one of these, Ishmael, the son of Nethaniah of the seed royal, to slay Gedaliah, the Jewish governor of the unfortunate remnant (Je.40.12; 41.2). When Nechemiah was governor, his bitterest enemies were Sanballat, perhaps of Horonaim in Moab, and Tobiah the Ammonite (Ne.4.3), who hindered his attempt to fortify Jerusalem. Tobiah, whose name would imply that he was a worshipper of Jehovah, was allied by marriage with some of the noble families in Jerusalem. The Ammonites are alluded to as enemies of Israel in Ps.83.7. In the Maccabaean war Judas gained a victory over the Ammonites, commanded by a certain Timotheus, and the fugitives were destroyed in the temple at Carnaim or Carnion (1Mac.5.6, 26, 37-44; 2Mac.12.21-26). The Ammonites are also alluded to in Judith (5.6,7), and last mentioned by Justin (Dial. cum Tryph. 119), who says (166 A.D.), “There are a number of Ammonites still.” As Justin was a native of Palestine, this statement deserves some credit. The Ammonites appear to have been a more barbarous race than the Moabites, and there are few traces of civilization or culture among them. They were known to the Assyrians, being mentioned in the inscriptions of Shalmaneser II., Tiglath-pileser, Sennacherib, and Esar-haddon. They worshipped Milcom or Molesh, “the abomination of the children of Ammon.” [ASHEROTH KARVAIM.] [R.J.F.J.]

AMMONITESS, an Ammonite woman. Of the Ammonite race. Such were Naamah, the mother of Rebohoam, one of Solomon’s foreign wives (1K.14.21.31; 2Chr.12.13), and Shimeath, whose son Zabad or Jozachar was one of the murderers of Joash (2Chr.24.26). [MIXED MARRIAGES.]

AMMON.—1. Eldest son of David by Abinoam the Jezeelitess, born in Hebron (1Sam.3.2). He violated the seventh commandment, and was in consequence slain at the command of his brother (2Sam.13.1-29). [ABSALOM.—2. Son of Shimon (1Chr.4.20].

AMOK, a priest whose family returned with Zerubbabel (1Ne.12.7,20).

AMON (אֹם; ‘Aμων: the hidden one), an Egyptian god, the chief divinity of Thebes, whose worship spread over the whole land.
under the great Theban kings. Thebes is mentioned by Nahum (3:8, see R.V.) as Noph, the city of Ammon. The Egyptians called her Amon-Ra, identifying her with Ra (the sun). He is the head of the triad of Thebes: Amon the father, Mut the mother, and Khonsu the son, a lunar god. Amon is represented in human form, sitting or standing, and wearing two tall plumes. He is sometimes ram-headed. The Greeks likened him to Zeus and called him Ammon, whose oracle was in the oasis now called Siwa.

Amon.—1. King of Judah, son and successor of Manasseh, reigned two years from 643 to 641 B.C. Following his father's example, Amon devoted himself wholly to serving false gods, and was punished in a way spiracy. The people avenged him by putting all the conspirators to death, and secured the succession to his son Josiah (2K. 21.18-26; 2Chr. 33.20-25). To Amon's reign we must refer the moral and religious declension of Jerusalem pictured by Zephaniah (1,3) and a little later by Jeremiah (2-6); idolatry spread, and thieves and prostitutes, poor ruthlessly oppressed, and shameless indifference to evil.—2. Prince or governor of Samaria in the reign of Ahab (1K. 22.26; 2Chr. 18.25). The precise nature of his office is not known. Perhaps the prophet Micahiah was entrusted to his care as his captain of the守卫. [Am.]

Amorites. The name has been supposed to signify "a mountaineer," the Amorite being the highlander and the Canaanite the lowlander of Palestine. The Hebrews regarded the Amorites as the sons of Canaan (Gen.10.16; 1Chr. 1.14); but, according to the report of the spies (Num. 13.29), distinguished them from the Canaanites: "The Hittites and the Jebusites and the Amorite dwell in the mountain, and the Canaanite dwells by the sea and by the side of Jordan." They were in Palestine from a very early period, and gave their name to the country. The Egyptians used the form Amur, and in the Bab. and Syr. texts the name is written Amur. It is possible that it is a form of "land of Martu" in the inscription of Sargina of Akkad (3800 B.C. (?) and Gudea (2600 B.C.) is another form of "land of the Amurri"—Amorites (Sayce). In Gen.14.7 (the account of Chedorlaomer's expedition) the Amorites are at Hazazon-tamar, near En-gedi, on the W. shores of the Dead Sea, Abraham's allies. Aner, Eschol, and Maamre (Gen. 14.13) were Amorites. According to the Amarna tablets, the Amorri or Amorites occupied N. Palestine; but in the Bible they are generally mentioned in connexion with E. or S. Palestine, and in Judg. 1.35-36 the boundary of the Amorites was from the pass of Akkarum on the Dead Sea to Atjalon, etc. The first lands conquered by the Israelites were the Amorite kingdoms of Sihon and Og. Sihon had conquered the Moabites, and forced them to take refuge beyond the deep valley of the Amon; and it is possible that Num.21.27-29 enshrines an ancient Amorite song of triumph over Moab. Sihon's refusal to allow Israel a passage through his territory led to an attack, which resulted in its capture by the Israelites, and the Moabite portion of it was assigned to the tribe of Reuben (Num.21.21-25; Deut. 2.36; Num.32.33,37,39). The kingdom of Bashan, with its 60 cities, is described as Amorite, though Og himself was the last of the Rephaim or giant inhabitants of E. Palestine (Deut.3:1-17). We have here the root of Hermon (Num.21.25-35; Jos. 12.1-5). The possession of the Moabite territory conquered by Sihon, and occupied by the Israelites, was the subject of the dispute between Jephthah and the king of Ammon. The Israelite judge in his embassy claims the land of Sihon by right of conquest, and pleads the silence of the Moabite king Balak at the time (Judg. 11.19ff). So much for the E. Amorites: those of the S. are apparently identified with the Hivites (cf. Gen.34.2; Jos.9.2,11-19 with Gen.48.22; 2Sam.21.2, the Jebusites (cf. Jos. 15.63,18.28; Judg.1.21,19.11; 2Sam.5.6 with Jos.10.5,6), and the Hittites of Hebron (cf. Gen.25 with 14.13). In the Egyptian monuments the same name is usually depicted as a tall race, with fair skin, light (but also black) hair, and blue eyes. The same type, with profiles resembling those of the Amorites in the Egyptian monuments, is still met with in Palestine, especially in the extreme south. It is interesting to observe that Ezekiel, in his prophecy concerning Egypt, quotes: "Thy birth and thy nativity is of the land of Canaan: thy father was an Amorite, and thy mother an Hittite" (Ezk.16.3). According to Amos (2.9) the Amorites were giants "whose height was like the height of cedars"—a proof that they had in the 8th cent. B.C. become a tradition of the past to the Israelites. [P.t.f.j.]

Amos—1. (Dl).23, probably burden-bearer; A'djos). The earliest, save for the doubtful exception of Joel, of the writing prophets. He prophesied in the reign of Uzziah of Judah and Jeroboam II. of Israel, in a period rather than his contemporary Hosea. Amos does not name God's minister of vengeance, Hosea repeatedly names the Assyrian. In Amos the northern kingdom is still intact (6.14; cf. 2K.14.25); in Hosea it is tottering to its fall. The mention of the earthquake (1.1; cf. Zech.14.5) sheds no light on the date, but tends to show that the prophecy was all delivered at one time. Amos, perhaps alone among the prophets, was not a member of a prophetic guild, but a herdsman of Tekoa, and a dresser of sycomore fruit. Yet though he lacked the training of the "schools," there is nothing rude or uncultured in his style. His language has a simple beauty all its own, which is enhanced by the illustrations drawn from the outdoor life in which he was placed. We have the cart laden with sheaves (2.13), the lion attacking the flock (3.12), the view of the starlit skies, as he gazed on the Pleiades and Orion (5,8.), the locusts spoiling the vineyards and oliveyards (6,9.), the "shearings" [Mowing] (7.1), the plowman, the reaper, the treader of grapes (9.1). The only TEKO known to us is the village 10 miles S. of Jerusalem, whose 'wise woman' was suborned by Joab (2Sam. 14). It is indeed said that the bleak and
harmonize high ground of Tekoa would be unsuitable for sycomores, and attempts have been made to assume a Tekoa in the N., but there is no real evidence for this, and the home of the sycomores may have been lower down in the valley. We thus have a Judaean declaring God's message to the northern kingdom. The prophecy naturally falls into three divisions. (1) 1-13. Her we have dooms pronounced upon various neighbouring nations, Edom, Ammon, Moab, and others, culminating in Israel. (2) 3.1-6.14. This consists of three discourses, each introduced by "Hear ye this word," inveighing against idolatry, luxury, and oppression. (3) 7.1-9.20. Here are five visions, displaying a number of narratives: the plumbed line, and the which may have a greater effect than more direct appeals. Inserted amid these is the account of the visit of Amos to Bethel to protest against the doings of Jeroboam, as an earlier prophet had gone thither in the time of Jeroboam I. (1.13). Yet whether it be direct appeal or symbolically is not clear, for there is evidently the shadow of a parallelism in God's judgment on sinful Israel. Then from amid the gloom the Messianic hope shines forth (9.11 ff.) that God will build up again the ruined tabernacle of David. The message of Amos is allied in time and in aim with that of Hosea, but the treatment of the message is very different. Amos writes filled with burning zeal, while Hosea is shaken with strong emotion. The literary style of Amos, from its finish and polish, plainly presupposes a long line of prophets before him. A certain amount of acquaintance with the Pentateuch is clearly shown. See, for one marked case, Am.2.5, and cf. Ex.22.26, 27. There is a significant parallel between the picture presented by Amos and the social evils of the present day, more glaring even than those of the France of Louis XIV. — a selfish, grasping plutocracy, keen for pleasure and luxury, regardless of the great masses of the poor, whom they directly or indirectly oppress. Amos, it is evident, is in a very pure state, though the meaning of 4.3 is doubtful, and may mark a corruption. Some extreme critics have urged that 2.4.1, 4.13. 5.8 ff. 9.5 ff. are interpolations, either because they break the thread of thought, or because the ideas contained in them are indicative of a later period. We believe that the objections are purely subjective and fanciful. Amos is twice quoted in the N.T. — 5.25-27 by St. Stephen (Ac.7.42, 43), nearly in accordance with the LXX.; and 9.11,12 by St. James (Ac.15.16, 17), freely from the LXX. Ewald's Die Propheten des Alten Bundes (or Eng. trans.); G. Baur, Der Prophet Amos erklart; Pusey in Minor Prophets; G. A. Smith in Book of the Twelve Prophets, vol. i.; Driver in the Cauth. Bible for Schools and Colleges; and for a recent critical view, Harper, "Amos," in Intern. Crit. Comm.— 2. Son of Naum, in our Lord's genealogy (Lu.3.25). [R.S.].

Amphipolis, a city of Macedonia, through which SS. Paul and Silas passed on their way from Philippi to Thessalonica (Ac.17.1). It was distant 33 Roman miles from Philippi, and called Amphipolis, because the river Strymon flowed almost round the town. It stood upon an eminence on the left or E. bank of this river, just below its egress from the lake Cercinthis, and about 3 miles from the sea. It was a colony of the Athenians, and in the Peloponnesian war the battle was fought under its walls, in which Brasidas and Cleon were killed. Its site is now occupied by a village called Neochori, in Turkish Yeni-Keui, or "New Town."

Amphilias, a Christian at Rome, possibly of Caesar's household (see Speaker's Comm., ad loc.; Ro.16.8). [R.S.].

Amram.—1. A Levite of the family of the Kohathites, and father of Moses, Aaron, and Miriam (Ex.6.18,20; Num.3.19; 1Ch.8.2, 3, 18). He is called the "son" of Kohath, but it is evident that in the genealogy several generations must have been omitted; for from Joseph to Joshua ten generations are recorded, while from Levi to Moses there are but three. Again, the Kohathites in the time of Moses are mentioned as a month old and upward (Num.3.28), a number to which they could not have attained in two generations from Kohath. The chief difficulty then remaining is that Jochebed, wife and aunt of Amram, is described as a daughter of Levi, born to him in Egypt (28.59); but it disappears if by tribe and not the individual is intended. His descendants, the Amramites, are mentioned in Num.3.27; 1Ch.26.23.—2. A son of Dishon and descendant of Seir (1Ch.1.41); R.V. reads "Harman" = Hemdan in Gen.36.26.—3. A son of Bani who had married a foreign wife (Exz.10.14). [R.S.].

Amraphel, or Amraphel, of Shinar (Babylonia) who took part in the expedition of the Elamite Chedorlaomer against Sodom, Gomorrah, and the cities of the plain (Gen.14). The identification of this king with the well-known Babylonian ruler Hammurabi (Hammurabi, Ammurapi) is generally admitted, the final "H" which is the nukha being probably due to a scribal error. Otherwise the two forms agree, and the date assigned to Hammurabi (2000 b.c. or later) is satisfactory. Though belonging to "the dynasty of Babylon," he was not of Babylonian origin, but descended from a royal stock supposed by some to have originated in an Arab tribe. In his reign of 43 or 55 years (the documents vary) he did much to promote the prosperity of his country, principally by digging irrigation-canals, as was the custom of the time. He took part in many warlike expeditions, the most noteworthy being that referred to in Gen.14, and one against Rim-Sin of Larsa in the 1st year of Chedorlaomer. The account of his relations with Chedorlaomer have not been discovered, but the existence of late inscriptions which apparently refer to Chedorlaomer, Tidal, and Arioch make it probable that more light will be thrown on his reign. Many contracts of his time exist, as well as chronologically later, bearing his name; but inscriptions. Bas-reliefs representing him are preserved in the British Museum and in the Louvre, the latter on the celebrated Code of Laws bearing his name; for an account of which see LAW in O.T. See The O.T. in the Light of the Records
AMULETS

Amulets were worn as safeguards against evil spirits, and against the "evil eye"; the latter could belong to man, woman, or beast. Anything that tended to attract this away from the eye of a person was held to be efficacious. The belief in the ubiquity of demons was strongly held, and therefore prophylactic means to counteract their evil machinations were deemed indispensable; the "evil eye" (strictly speaking, the "envious eye") was the result of a co-operation with a demon. Amulets of the most varied kinds existed, and still do exist, for in the East the ancient superstitions regarding evil spirits have altered very little; bones of horses, metal discs, knotted cords (called "fringes") in Num.15:38, scrolls, and ornaments of various descriptions are among the most popular.

**Amzi.**—1. A Merarite Levite, ancestor of Ethan the minstrel (iChr.6:36).—2. A priest, whose descendants served the temple in the time of Nehemiah (Ne.11:12).

**Anab**', a town in the mountains of Judah (Jos.15:50), named, with Debir and Hebron, as once belonging to the Anakim (Jos.11:21). Fixed by Robinson at 'Anab, a run 21 miles S.W. of Debir. [C.R.C.]

**Anael**', brother of Tobit (Tob.1:21).

**Anah**'.—Both A.V. and R.V. use this name in one chapter of O.T., as if of three different people: (1) The parent of Esan's wife, and daughter ("son," LXX.) of Zibeon the Hivite (Gen.36:2,4). (2) Son (or descendant) of Seir the Horite (36:20). (3) The son of Zibeon, who found the yəmmîm (36:24). As all the occurrences are in a list dealing with the dukes of Edom and descendants of Esan, it seems probable that there has been some confusion; that Horite should be read in ver. 2, and that all three represent the same person. yəmmîm is translated "hot springs" by R.V. and Vulg.: A.V. "mules" is only a guess from the context. If the former is correct, the hot springs referred to are probably some near the Dead Sea. [Năhālīel.] [B.F.S.]

**Anaharath**', a place within the border of Issachar, named with Shiloh and Rabbith (Jos.19:19). Now the village en Nā'ūrah, in the valley of Jezreel. [C.R.C.]

**Anai**ah.—1. One of those who stood on Ezra's right hand as he read the law to the people (Ne.8:4); called Ananias in 1Esd.9:43.—2. One of the "heads of the people" who signed the covenant (Ne.10:22).

**Anak, Anakim.** [GIANTS.]

**Anamim,** (plur. form). Mizraim (Egypt) is said to have begotten Ludim, Anamim, and

**ANANIAS**
ANANIEL

the office by Herod king of Chalced in 48 A.D.; and in 52 A.D. sent to Rome by the prefect Ummidius Quadratus to answer before the emperor. He is mentioned as a Sacerdotium. He appears, however, to have resumed his office on his return. He was deposed shortly before Felix left the province; but still had great power, which he used violently and lawlessly. At the outbreak of the last revolt he was murdered by the sicarii as being a leader against the servant party—a terrible fulfilment of the prophecy of St. Paul (Ac.23.3).—2. Husband of Sapphira. The second and fuller account of the common fund of the Christians of Jerusalem is followed by two instances of contributions to it, one in good faith by Barnabas (Ac.4.36,37), and the other fraudulent by Ananias and Sapphira (8.1-17). On St. Peter's denunciation of the fraud Ananias fell down and died. In the case of Sapphira the sentence of death was more explicitly pronounced. The sin was an attempt to deceive the Holy Ghost. Reversence for the Holy Ghost was the principle in danger, and its vindication was the occasion of a terrible denunciation of the outrages of the two servant women. 

ANDRONICUS

[Curse; Crimes; Vow.]

Ananeth—a Son of Becher son of Benjamin (1Chr.7.8). One of "the heads of the people" who signed the covenant (Ne.10.19); unless, as is not unlikely, the name stands for "the men of Ananeth" (7.27). 

Anathoth, a priest's city, in the lot of Benjamin, with "suburbs" (Jos.21.19; 1Chr.6.60). Hither Abiathar was banished by Solomon to his home in the nature of an attempt to put Adoni-jah on the throne (1K.2.26). It was the native place of Abiezer, one of David's 30 captains (2Sam.23.27; 1Chr.11.28,27.12), and of Jehu, another of the mighty men (1Chr.12.3); and here, of "the priests that were in Anathoth," Jeremiah mentioned "men" of Anathoth returned from the Captivity with Zerubbabel (Ezr.2.23; Ne.7.27; 1Esd.5.18). Anathoth was N. of Jerusalem (Is.10.30), and is placed by Eusebius (Onomastikon) 3 miles from the city. It was discovered by Robinson at 'Anatha, on a ridge 2 miles N.E. of Jerusalem. [C.R.C.]

Anchor. [Ship.]

Andrew, a disciple of the Baptist, who with another was the first to follow Christ (Jn.1.40). He was brother of Simon, and brought him to the Lord. Hence his name and day have been specially associated with missionary effort. When the disciples were summoned to render allegiance, Andrew and Simon were the first two called (Mk.1.16). He is a link between the 1st and 2nd of the 3 sets of 4 in which the names of the apostles are arranged. He is included in the first quaternion, and is among them when they ask the solemn question about the "end." (Mk.13.3). On the other hand, he is closely connected with the second quaternion through Philip, who is always placed at his head, and thus immediately follows Andrew in two of the lists. Both were of Bethsaida and both have Gk. names, though this must not be held to imply Gk. origin. In the miracle of the feeding of the 5,000, and in the introduction of the Greeks to Jesus, these two disciples are closely associated. In Acts, Andrew, like the majority of his colleagues, is only mentioned in the list in 13. The scene of his labours is variously stated, but traditions agree in assigning Patrae as the place of his martyrdom. 7.32. [F.B.]

Androni'cus.—1. An officer left as viceroy in Antioch by Antiochus Epiphanes during his absence (171 B.C.). At the instigation of Menelaus, Andronicus put to death the high-priest Onias. This murder excited general indignation; and on the return of Antiochus, Andronicus was publicly degraded and executed (2Mac.4.31-38).—2. Another officer of Antiochus Epiphanes, left by him on Gerizim (5.23), probably in occupation of the temple there.—3. A Christian at Rome, saluted by St. Paul (Ro.16.7), together with Junia (R.V. Junias). The two are described by St. Paul (4) "as being Jews;" as "fellow prisoners" either as having shared his imprisonment on some unrecorded occasion, or as being, like himself, spiritual captives of Christ; (3) "of note among

ANEM

40 ANGEL

"apostles," i.e. among the delegates of the churches employed on special missions, as was Epaphroditus (your messenger, Gk. apostile, Ph. 2:25); (4) "in Christ before me," e.g. "an angel," i.e. that special guardian angel belonging to the Gershonites (1Chr.6:73). Probably 'Em'in, 9 miles N.W. of Jenin, or En-Gannim, which is named instead in Jos.21:29. [c.r.c.

Aner, one of the three Amorite chiefs who aided Abraham in the pursuit after the four invading kings (Gen.14:13,21).

Aner, a city of Manasseh, W. of Jordan, given to the Kohathites (1Chr.6:70). Possibly 'Ellar, 8 miles N.W. of Samaria. [c.r.c.

Aneth'othite (2Sam.23:27). An'eth othite (1Chr.27:12, and An tothite (1Chr.11:28, 12:3), inhabitants of Anathoth.

Angel (Gk. angelos, "messenger") = Heb. mal'akh; both frequently of men, e.g. Haz.1.13; "abbir, "mighty," Ps.78:25 only. The terms used of angels are "sons of God" (br'ne 'elohim), Gen.6:2. Job 1:6,33,7; sons of gods (br'ne 'el'im), Ps.29:1,89.6 (A.V. sons of the mighty); "holy ones," Job 5:1, Ps.89:5,7, Dan.8.13 (A.V. saints): "a watchet and a holy one," Dan.4:13,23, cf. ver. 17: "spirits," Heb.1:14. The angels existed in Babylon long before the time of Abraham (the Sukkalit being apparently inferior persons who were the messengers from the higher gods to dwellers on earth); it was elaborated especially in the Persian empire, heir of much of the religion as well as of the power of Babylon; and was modified in the Hellenistic period. The need of intermediate beings between man and God. The Biblical doctrine shows traces of non-Israelite influence through all the periods.

1. O.T. Angels are mentioned in the "primitive strata" (even according to the alleged "sources" quoted below; for an account of which see PENTATEUCH) of Bible history, both directly and indirectly (cf. Lord of hosts, i.e. originally the heavenly hosts). (1) In the earliest histories the distinction between God and angels is not clearly expressed. (i) This is especially the case with the term "the Angel of the Lord" (J and Judg.), and "the Angel of God" (E and Job). The "Angel" (E.g. "the angel") is not found in D or P. He speaks sometimes as messenger (Judg.13:16), but sometimes as God Himself (Judg.13:18; Ex.3:2,6,14; Gen.22:15), and accepts worship (Judg.15:20-22). Cf. Is.63:9, "the angel of His presence," i.e. perhaps an angel who dwelt in God's immediate presence (cf. infra, II. (3)), but more probably the angel in whom God's presence was especially revealed (Ex.33:2,3 with 14,15; cf. Deut.4:37, R.V.); but probably not mal'akh habberith (Mal.3:1), which at that date naturally meant "messenger of the covenant." (ii) We find THOROAMTA, where God is manifested as an angelic being in human form to Abraham (Gen.18:2,22, cf. 19:1, to Jacob at Penuel (32:24,30; Heb.12:1), to Joshua at Gilgal (Jos.5:13-15). Christians naturally connect this identification of angelic beings and God with the Word Who reveals God and was afterwards incarnate (see a summary of patristic views in BIEL, DOGMAIC THEOLOGY (1896), I. 105 ff. from Burton, TESTIMONY OF ANTE-NICENE FATHERS (1832), pp. 38 ff.). (2) Generally the distinction is plain. (i) They have various activities. They are "with God in theophanies (Gen.28:12,32:2 (1E)), praising Him (Ps.103: 20,488.2); in His sight not without error (Job 4:18); charged with the care of the pious (Ps.91:11); the history of Jacob's angelic prophet (1K.13:18,19,5,7, 2K.1:3,15; Zech.1.9, and 18 times in 1:6; cf. Ezek.8:2,ff., 9:2,ff., 10:2,ff.,40,33f.); excellent, wise, powerful (1Sam.29:6, 2Sam.14:20,19,27; Zech.12:8); encamping round about the faithful (Ps.34:7, cf. 2K.6:17, Ps.68:17); chasing His enemies (Ps.35:5,6) destroying by the judgment of Ab- weth (2Sam.24:16,17 = 1Chr.21:12-30; 2K.1:19, 35 = Is.37:36 = 2Chr.32:21) "(OXFORD Heb. Lex.). There are hosts round God as king (Is.6:6,5; 1 K.22:19, Dan.7:10), Who has a council of the holy ones (Ps.89,7). (ii) They are guardians. The germ of guardianship of a person is seen in Gen.24:10. One has the guardianship of the nation of Israel (Ex.25:20,23,32,34,35). He has Michael with him in this office (Dan.10,20,21), and perhaps others who are called "watchmen" (Is.62:6). There are also guardians of Persia and of Greece (Dan.10,13,20). Possibly Is.24:21 alludes to guardians of nations, as the LXX. of Deut.32:8 (cf. 28:26) perhaps alludes to them. This use of the term "angel" is implied in Dan.10:13 ("Michael, one of the chief princes"); see below. (iv) Names. GABRIEL (8.16,9,21), Michael (10,13,21, 12:1); also "the Satan," i.e. the Adversary (Job 1:2, Zech.3:1,2,2).—II. APOCRYPHA and PSEUDOPigrapha. These present so much of the popular angel tradition and belief as is in N.T. times that it is important to consider them here. The principles are the same as in O.T., but carried further. Only some particulars can be mentioned. (1) They direct the elements (cf. Persian Fravashi). Cf. the O.T. reference of pestilence and other judgments to them (supra, 1. (2) (ii)). So repeatedly in Ethiopian Enoch (e.g. lx. 15,22): the Slavonic Enoch, xiv. xx. 1: Bk. Jubilees, ii. 2. (2) They become clearly guardians of individuals, e.g. Tobit (Jud. xxxv. 17). For guardianship of nations, see Ecles.17,17, "For every nation he appointed a ruler; and Israel has also a ruler in his midst. This is a sign of this angel in Dan.10,13,32). (3) Their ranks are more defined. Seven archangels (Tob.12:15; Eth. En. xx. 21, 22 [probably due ultimately to the seven Babylonian planets]) ten orders (Slav. En. xx. 1, 3); four presences (Eth. En. xl. 2; cf. lx. 10); "the angels of the presence" (Jub. ii. 2), "the one . . . from the seventh heaven" (Asc. Is. vi. 13). (4) They fight on behalf of Israel (Ass. Moses x. 2: Ass. Isca. vii. 0); cf. Michael. (5) They intercede for men (Eth. En. xl. 6, xlvi. 2, civ. 1; cf. xv. 2, Test. xii. Patr. Lut. v. 6). (6) Additional names in the Apocrypha are JEREMIEL (2Esd.4,6; R.V. Uriel, A.V.); PHAIRIEL (2Esd.5,16, R.V. Salathiel, A.V.); RAPHAEL (Ib. passim); Eth. Enoch; Uriel (2Esd. 4,1, etc. Eth. En. xx. 7, etc.).—III. N.T. (1) Rejecting the unbelief of the SADDUCEES (Ac. 23:8) and accepting the doctrine of the Phar- ises (ver. 6) and of the popular religion, the N.T. writers assume the existence of angels, and indeed regard them as almost numberless (Mt.26:53; Lk.2:13; Heb.12:22; Rev.5,11,12,7). (i) The forms of their activity are various,
representing the providence of God, e.g. towards Joseph (Mt.1.20), Zacharias (Lu.1.11), the widow of Nain (Lk.7.11), St. Peter (Ac.5.19), Cornelius (10.3), St. Peter (12.7), St. Paul (27.23), also at the beginning (Mk.1.13) and end (Lu.22.43) and perhaps during (Jn.1.51) the three years of our Lord’s public life. Also the law is said to have been given through them (Ac.7.53; Gal.3:19; Heb.2:2; cf. Jos.1:8). He said to the people in the presence, Write for Moses,” etc.; also cf. LXX of Deut.33.2. They govern elements—fire (Rev.14.18), waters (16.5 cf. Text. Rec. Jn.5.4); cf. Rev.9.1ff.), winds (7.1). So also a common interpretation of στρογγυλε in Gal.4.3, Col.2.5, 20. [Elements.] (ii) They are guardians of persons (Mt.18.10 [probably]; cf. Ac.12.15) and probably of localities, cf. “the angel of the Christian Church,” Asc. Isa. iii. 15. Apparently they are present in church assemblies (1Cor.11.10). They are deeply interested in the salvation of men (Lu.2.9-14, 15.10; 1Pe.1.12). (iii) Some fell (Ju.6; 2Pe.2.4). The cause is not stated, but perhaps as a result of an attack on pride (1Tim.3.6.5), or lust (cf. Gen.6.2, and Etn. En. xii. 4, xv. 3 ff.). [Satan.] The dragon and his angels fight Michael and his angels (Rev.12.7). (iv) They have many ranks (so probably Ro.8.38; Col.1.16; Eph.1.21) and an archangel (1Th.4.16). (2) Yet N.T. guards against certain wrong tendencies and points out that angels, though man, is not inferior to angels but far above them (Heb.1.4-2.9; Col.1.16, 2.15). (ii) Prayer to angels is wrong (Rev.19.10, 22.8, 9). So also Col.2.18, the Colossian Christians being inclined to identify the local gods with angels (doubtless especially Michael, as later history tells of his worship there).—IV. Their Nature and Form. Little is said in Scripture of this. They are termed “spirits” (Heb.1.14), but it is not asserted that they are incorporeal. Our Lord seems to imply the contrary, for they that attain that Age and the resurrection from the dead do not marry because they cannot die, and they cannot be confirmed in sin (1Cor.15.50). (Lu.20.35-36), or “as angels” (Mt.22.30; Mk.12.23). They appear always in human form (e.g. Gen.18; Ac.1.10), but often glorious (Dan.10.6; Lu.24.4). In Jacob’s dream they ascend and descend by a ladder, i.e. they apparently are wingless (Gen.28.12). Elsewise they are “flying” (Dan.9.21 [Gabriel]; Rev.14.6 [cf. Text. Rec. 8.13]); and the Seraphim of Is.6.2 are depicted with wings. [Sera- phim; Cherubim.] Everling, Die paulinische Angelologie u. Diänonologie (1888); Luken, Michael (1898); Jew. Encyclopedia, art. “Angelology”; J. M. Full; “Introduction to Tobit,” in Speeck’s Comm. J. T. Marshall in Diet. of Christ and the Gospels (especially valuable for the relation of modern thought to a belief in angels). [A.L.W.] 

Aniam’, a Manassite, son of Shemidah (1Chr.7.19).

Anim, a city in the mountains of Judah, named after the tribe of Eshtemoa (Jgs.1.15, 50). Eusebius and Jerome mention a place called Anea in Daroma, 9 miles S. of Hebron (Onomasticon), now el Ghwein, 2 miles S. of Eshtemoah. It is the Aina of the list of Thothmes III. (No. 93), immediately preceding Carmel of Judah. [C.R.C.]

Anise (Greek, anisum) occurs on the lists (Mt.23.23). It is by no means certain whether the anise (Pimpinella anisum, Lin.) or the dill (Anethum graveolens) is here intended, though the latter is more probable. Both belong to the natural order Umbelliferae, and are much alike in external character; and the seeds of both are, and have long been, employed as condiments and carminatives. Anethum is more especially a genus of Eastern cultivation than the other plant, according to Dr. Royle. Anise and dill were confounded by the Greeks under the one name ἀνήσυχον or ἀνόψιον. When distinctly become differentiated, the variant spellings in Latin (anisum and anethum) were used for that purpose.

Anklet. This word does not occur in A.V., but is referred to in Is.3.16, 18, 20, where the prophet speaks of “the tinkling ornaments about the feet of the daughters of Zion, and of the ornaments of the legs.” Anklets were as common as bracelets and armlets, and made of much the same materials: the pleasant jangling and tinkling which they made as they knocked against each other was no doubt one of the reasons why they were admired. They are still worn in the East, and Lane quotes from a song, in allusion to the pleasure caused by their sound, “the ringing of thine anklets has deprived me of reason.” Hence Mohammed forbade them in public: “let them not make noise with their feet, that their ornaments which they hide may [thereby] be discovered” (Koran xxiv. 31).

Anna.—1. The wife of Tobit (Tob.1.9ff.). —2. An aged “prophetess of the tribe of Asher in Jerusalem at the time of our Lord’s presentation in the temple (Lu.2.36-38).

Anna's (1Esd.5.23) = Senaah.

Annas.—1. (1Esd.9.32) = Harim, 4.—2.
ANNUS

Son of Seth appointed high-priest by Quirinius, imperial governor of Syria, A.D. 7, deposed by Valerius Gratius the procurator in A.D. 15. He lost office, but not power, for five of his sons held the office of high-priest as well as his son-in-law Joseph, who assumed the name Caiphas (I n.18.13). The sons of Annas monopolized the sale of all the materials for sacrifice, and so made the temple "a den of robbers" (Mk.11.17; cf. Edersheim: Life and Times of Jesus, vol. i. pp. 371-375). The title high-priest was retained by, and accorded to, one who had held the office, hence the usage in Ac.4.6; that in Lk.5.2 is unparalleled. The chief interest in Annas centres in the correction made by St. John for confusion in the first two gospels between the stages of our Lord’s trial (Mt.26.57,27.1; Mk.14.53,15.1). St. Luke avoids their mistake of transferring the morning meeting of the Sanhedrin to the previous night, and leaves room for such an informal inquiry as that of Annas really was (Lk.22.54). St. John sheds his inquiry concerning that one issue, and that it was as a condemned prisoner that Jesus was sent to Caiphas (Jn.18.19-24; cf. Mk.14.64). The Sanhedrin met at this time in the headquarters of the Annas faction, and it may have been when passing through the court from the apartments of Annas to the council that "the Lord turned and looked upon Peter" (Lk.22.61; cf. Westcott on Jn.18.25).

[CRDB.]

ANNUUS (I Esd.8.18). Possibly a corruption of the Heb. word rendered "with him" (cf. Ezra 5.19).

Anointing. 1. The hot climate of Eastern countries gave rise to the use of unguents on the skin, scorched by the sun, had a soothing effect, and was in daily use among the Jews for this purpose (Mt.6.17). Indeed, to such an extent was this use of oil regarded as a normal practice that the father of the olive harvest, from which the oil was obtained, is taken as typical of national calamity (Mi.6.15), and is especially regarded as a mark of God’s anger (Deut.28.40). The more expensive oils were prepared with great care, and their use was a mark of luxury (Am.6.6). From this entirely natural use of anointing, various ceremonial and symbolical customs arose. (1) Social Significance. Anointing was practised preparatory to a visit of ceremony, as when Ruth anointed herself before visiting Boaz (Ruth.3.3); and, on the other hand, the laws of hospitality required that the host should anoint his guest. It was by failure to perform this act of ceremony that Simon showed discourtesy to our Lord (Lk.7.46). (2) Official Significance. An important use of anointing was its employment as symbolic of admission to office; and here we find the introduction of a religious idea. The act of anointing represents a consecration, being the admission to an office which involves a special religious obligation. (i) Prophets are anointed to their office. Elijah is bidden to anoint Elisha (1K.19.16). Prophets are regarded as being in a special sense the Lord’s "anointed ones" (Ps.105.15, R.V.). (ii) Priests. The consecration of Aaron is described in detail, as being a typical example of the high-priestly consecration. It included a two-fold anointing, first by the anointing of anoints, a special oil to be prepared which might be put to no other use (Ex.30.32). The ordinary priests, of whom Aaron’s sons are taken as typical, were anointed once only, and that by sprinkling (Lev.8.30). (iii) Kings. Under special circumstances a man might be designated for the office of king by the ceremony of anointing, as in the case of Saul (I Sam.10.1) and of David (I Sam.16.13), and might be anointed a second time on his actual accession to the kingship (2 Sam.2.4). A conspicuous example of the act of anointing, as a public ceremony, is to be found in the anointing of Joash by Jehoiada (2 K.11.12). The custom was a widespread one, being found in other nations, as is recognized in Jotham’s parable (Judg.9.8), and it has passed into the usage of Christian countries. An extension of this use of oil for the purpose of consecration to office is the anointing of inanimate objects to sacred purposes. Jacob consecrated the stone of his pillow at Bethel (Gen.28.18). The tabernacle and its furniture were consecrated by the oil specially compounded for the purpose (Ex.30.26). From this ceremonial use, the idea of consecrating comes metaphorically to express the setting apart of persons for some special relationship to God. The prophets look forward to the coming of one Who in a unique sense shall be "the anointed one" (Dan.9.25, R.V.), and Whose anointing shall be from God Himself (Ps.45.7). These prophecies are fulfilled in Jesus of Nazareth (Heb.1.9), Who, unlike any of His types, was "anointed" to all three offices. Christians, as having received the gift of the Holy Ghost, are similarly spoken of as God’s anointed (2 Cor.1.21; 1 Tim.2.20,27). [LAVING OX or HAMS.—II. Oil was widely recognized in the OT as having a peculiar spiritual value. It was prescribed for use in diseases of the skin, and for the healing of wounds. Thus it was used by the Good Samaritan (Lk.10.34). So, too, it was used as a remedy by the Twelve on their mission to the cities (Mk.6.13). Here, however, a fresh element is introduced in the fact that special powers of healing were bestowed upon the apostles. In conjunction with their exercise of these powers, they employed the natural remedy with which men were familiar. After the Ascension the disciples seem, in part at least, to have changed their method. They laid their hands upon the sick for the purpose of healing them (Mk.16.18; Ac.28.8), following in this the example of the Lord Himself. But the use of anointing still survived, at least among the Jewish Christians (Jas.5.14). In this practice the fact that oil possesses qualities as a natural remedy is still the underlying idea; but the power of faith is recognized as quickening its beneficial effect. Incidentally this use of oil is connected by St. James with the forgiveness of sins. Sickness was regarded as being frequently the result of some definite sin (1 Cor.11.30). In such a case the act of faith, by which the remedial
application of the oil is accompanied, will win the forgiveness of the sin and so make the bodily healing possible (Jas.5.13). In later times the bodily healing, which is the purpose of the act of anointing as described by St. James, in some cases passed out of sight; and so sprang up the doctrine of extreme unction, which has obscured and prejudiced the right and Scriptural use of unction. [J.c.v.d.]

**Anos** (1 Esd.9.34) = VAINAH.

**Antichrist** (Heb. 2:18). The antichrist is mentioned twice in O.T. : in Pr.8.36 the diligence of this insect is quoted as an example worthy of imitation; in Pr.30.25 the ant's wisdom is pointed out. The ancients believed that ants stored up food in summer for winter consumption; and although this is incorrect, there is considerable justification for the idea, owing to their habit of carrying many kinds of objects (not to mention their own pupae) to and from their nests. European ants become dormant in winter, and consequently require no food. The words of Solomon do not necessarily teach that ants store up food for future use, although they seem to imply that such was the ant's general idea. If this was the general opinion, it is no matter for surprise that the wise man should select the ant as an instance on which to ground a lesson of prudence and forethought. Numerous species of ants inhabit Palestine, some of which are referable to the typical genus *Formica* (L.).

**Antichrist** (Gr. An'tioch). A word first used in the Christian Church by Christian prophets, rather than made by St. John (as Grimm wrongly supposes; see 1 Jn.2.18, "as ye heard"), means properly "counter-Christ," one over against the Christ. It adds to the idea of antagonism or impurity the idea of deceptive substitution (cf. "evil men and impostors," 2 Tim.3.13, R.V.). St. John says there were many already. The idea belongs to the Christian age, called emphatically "the last time," because, though the thing is old (as old as anything Messianic : Gen. 3.15; Dan.7.11; cf. Aberlen, Gunkel), its character is new, it is in the time of the Christ. To make it a piece of Christian folklore is shallow exegesis and shallow thought. It is the last development of an ancient war with subtle deception. All that Boussert's interesting researches in the later pseudo-apocalyptic literature have proved is that it is a point of Christian doctrine, which by its mysterious appeal to unchastened curiosity has ever lent itself, with additions from elsewhere, to heretical perversion and Christian mistake. The terrific images of Rev.13.17 have their roots deep in history and experience. We have seen the resurrection of the old world-power as opposed to God, the subtle thought and wonder that incites its worship, and the false, adulterous, religious sanction and sentiment that courts and guides it (see Aberlen, Kliefoth; Arch-bishop Benson, *Apocalypse*, p. 45). If the N.T. had nothing to say of these things, we should be without chart or compass. That the presence and the influence, the wild, monstrous, extreme, of them, is bound up with our belief in goodness. The chief references to this subject in N.T. are Mt.24. Mk.13. Lu.21 (our Lord's eschatological discourse); 1 Th.5.1-11; 2 Th.2.1-14.; 1 Tim.4.1-5; 2 Tim.3.1-10; Rev.13.17. In the midst of much diversity of presentation, there is a singular unity in thought. The marks of Antichrist's reign are set forth (1) at great length in Christian life (Mt.24.11-14; 2 Th.2.3; 1 Tim.4.1; 2 Tim.3.5; Rev.13.8,17). (2) A false content- and the exaltation of man, even above all that has been called or thought divine (Mt.24.38; Lu.17.27,28; 1 Th.5.2,3; 2 Th.2.4,9; Rev.13.6,9). (3) The consequent weakening of the Twin spirits of Antichrist (Mt.24.10; 1 Tim.4.2; 2 Tim.3.1-6). (4) Great increase of subtlety "to deceive, if it were possible, even the elect" with false wonders, evidently such as are fitted to their age (Mt.24.24; Mk.13.22; 2 Th.2.9,10; Rev.13.13, 14). (5) The gathering of these characteristics into a type (Mt.24.23; Mk.13.22; Jn.6.54; 2 Th.2.; Rev.13.18). (6) The continuous victory of suffering truth (Mt.24.13,14; 1 Th.5.4, 5; Rev.14.1,15.2); and finally (7) the abrupt termination of all these oppositions, associated with the presence and word of Christ Himself (Mt.24.30,31; Mk.13.26,27; Lu.21.27; 1 Th.5.28; 2 Th.2.8). We quote Paul's earliest letters embody the idea of Antichrist in a person, "the lawless one." The early Church followed him. In his last letters he speaks only of principles. The idea of Antichrist has been embodied in men—e.g. Nero, Bar-cochba and his false prophet Akiba, Mohammed, Napoleon, Hitler. In his most deceptive phase, it is to be finally and completely set down, is, we believe, intentionally left uncertain. But the destruction of all sense of revelation, the deification of human faculty and invention (Stauss), and the substitution of a false philanthropy, would leave the world clear for it (2 Th.2.6). The idea of Antichrist is necessary for those who hold the real progress of the world and yet would not be misled by its false lights. There is an important sermon on this subject by Bishop Harold Browne, *Church Congress Report*, 1883; see also Swete, Milligan, and Huntingford on places in Rev.; Alford; Wohlenberg in Zahn's *Kommentar* (Gottingen). The idea of Antichrist (Gottingen), with criticism of Gunkel; Gunkel's *Schöpfung und Chaos in Urzeit und Endzeit* (Gottingen); Bishop Martensen's *Christian Ethics* (T. & T. Clark, or Berlin); and suggestive on this subject throughout, last chapter on Antichrist; Bishop Gibson's *Warburtonian Lectures*, 1903-1907, suggestive as to Christ's eschatological discourse; and see art. in this Dict. on THESSALONIANS II. [F.E.S.]

**Antilbanus** (Jth.1.7). [LEYBANON.]

**Antioch.—1.** The Greek capital of Syria, built by Seleucus in 300 B.C. (1 Mac.3.37,4-35.11.13; 2 Mac.4.33,5.21,8.35.11.16.15-23.), mentioned as near Daphe. Now the small town of Antakya on the S. bank of the Orontes, with ruins of mediaeval walls and buildings, extending S. up the steep slopes of mount Silpius. Only a few fragments of Gk. texts have been found, with one of greater importance (Waddington 2713 a) at Daphne dating from 180 B.C., and by the site of the temple of Apollo, which the emperor Julian found neglected when visiting Antioch. The city lay on the main trade route from Assyria, and had a port [Seleucia] at the river mouth.
ANTIOCHIA

It was a free city by Pompey (65 B.C.), and a pillared street was built by Herod the Great (1 Wars xxi. 11). Seleucus had made the Jews of his capital (12 Ant. iii. 1). The Roman emperors added amphitheatres, baths, and aqueducts. The city remained the capital of Syria down to 1268 a.d., when it was destroyed by the Egyptian sultan Bibars.

"GATE OF ST. PAUL," ANTIOD.

Nicholas of Antioch was one of the first deacons of the Christian Church (Ac.6.5), and a mission to the Jews of Antioch began after the death of St. Stephen (11.19,27), before the conversion of St. Paul (13.1), who returned to the city after his first journey (14.20), when the dispute concerning Jewish rites there took place (15.1.2) on St. Peter's arrival (Gal.2.11). In Antioch the "Christians" first received that name (Ac.11.26). St. Paul revisited the city in 56 A.D. (18.22).—ANTIOCH IN PISIDIA (Ac.13.14,14.19,21; Tim.3.11), on the borders of Phrygia (now Yalovaikh), was also founded by Seleucus I., and was a Roman colonia; also called Caesarea. [C. R. C.]

ANTIOCHIA (1Mac.4.35,6.63; 2Mac.4.33,5.21). [ANTIoch 1.]

ANTIOCHIANS, partizans in Jerusalem of Antiochus Epiphanes, organized by JASON, 4 (2Mac.4.9,19).

ANTIOCHIS, concubine of Antiochus Epiphanes (2Mac.4.30).

ANTIOCHUS II., king of Syria (201-146 B.C.), is distinguished by the title OROBSTOWED UPON him by the Milesians for freeing them from their tyrant Timarchus. He was son and successor of Antiochus I. (Soter). He inherited from his father the war against Ptolemy Philadelphus, king of Egypt. During this conflict Ptolemy laid waste most of the Western Asiatic countries in dispute, and compelled his adversary to sue for peace. Antiochus was weakened at this time by the revolt of Hyrcania, Parthia, and Bactria, which finally succeeded in throwing off the Seleucide yoke and founding the Parthian dynasty of the Arsacides (c. 250 B.C.). In accordance with the treaty between Syria and Egypt, concluded in the same year, Antiochus divorced his wife Laodice and married Ptolemy's daughter Berenice, undertaking to leave the throne to the new queen's firstborn son (Dan.11.10). When Ptolemy died (247 B.C.), Antiochus sent away Berenice and her infant son and restored Laodice to her former position. Antiochus died in 246, it is supposed by poison administered by Laodice, who instigated her own son Seleucus to murder Berenice and her child at Daphne. To avenge his sister's murder, Ptolemy's kurgers of Egypt invaded Syria and would have entirely overthrown Seleucus Callinicus had not a revolt in Egypt compelled him to return home (Dan.11.7-9) with much booty. [L. ST. C. R.]

ANTIOCHUS III., (1Mac.1.10), so named "the Great." Seleucide king of Syria (223-187 B.C.), was son of Seleucus Callinicus. When quite young he succeeded to the throne on the murder of his brother Seleucus Ceraunos. Ptolemy Philopator of Egypt was then in possession of Coelosyria and Phoenicia. To expel him thence, Antiochus twice attacked him, and on each occasion pressed forward victoriously; as far as Dora, 8 miles N. of Caesarea. On the second occasion a four months' truce was made, and Antiochus withdrew his forces to the Orontes (Dan.11.10). Hostilities being renewed, Antiochus was again successful (218), overran Samaria and Gilead, drove the Egyptian army back to Sidon, and, advancing still farther, went into winter quarters at Acre. But the tide turned in 217, when he was defeated at Raphia, near Gaza, with a loss of over 10,000 dead and 4,000 prisoners. Peace was then made for a time, Coelosyria, Palestine, and Phoenicia being surrendered to Ptolemy (11.11,12). When Ptolemy Philopator died in 205, Antiochus renewed the war, hoping that the minority of Ptolemy V. (Epiphanes) would enable him, in conjunction with Philip III. of Macedon, to conquer the whole of the Egyptian dominions (11.13). Aided by a party among the Jews, Antiochus seized the three provinces which had so long been the objective in the struggle between Syria and Egypt, but they were soon after recovered by Ptolemy's forces, owing to the outbreak of a war between Philip and the Romans on the one side, and between Antiochus and Attalus I. of Pergamus on the other. But when Antiochus returned to Palestine, he defeated the Egyptian general Scopas at Panaces (198 B.C.) and compelled him to sur-
render at Sidon soon afterwards (11.15). The Jews welcomed Antiochus as their deliverer from rapine. Antiochus was compelled by Roman ambassadors to desist from following up his success by invading Egypt. He accordingly made a treaty with Ptolemy Epi-

phanes, promising to restore to him (at the command of Rome) the Phoenician provinces, but giving them ostensibly as the dowry of his daughter Cleopatra, who became the bride of the Egyptian monarch, and afterwards took her husband's part against her father (11.17). Antiochus after this crossed the Aegean, gaining certain successes among its islands, and, by the advice of the Aetolians and Hannibal, declared war against the Romans. Defeated at Thermopylae in 191, he returned to Asia, where the Scipios, with the aid of Eumenes of Pergamos, completely overthrew him at Magnesia (190 b.c.), where he is said to have lost 50,000 killed and 17,000 prisoners. Compelled to sue for peace, Antiochus had to cede all his dom-

inions in Asia Minor, surrender his ships, captives, and deserters, and pay an enormous war indemnity to the Romans (188 b.c.)). Partly, perhaps, to raise this money, he next year endeavoured to plunder a temple in Elymais—that of the "Elymaean Jove," says Trogus Pompeius—but was slain in the at-

tempt (11.19). He was succeeded by Seleucus Philopator, his son (11.20).

**Antiochus IV.** (Eriçaphèn), afterwards called in mockery Eriuaviás the Maniem instead of the Illustrious) (1Mac.1.10 ff.), was king of Syria (175-164 b.c.) and second son of Antiochus III. After the battle of Magnesia he was given as a hostage to the Romans for the fulfilment of the terms imposed upon his father, but after the latter's death his elder brother (Antiochus IV. (Philopator), who succeeded him, gave his own son Demetrius as hostage in his brother's stead (175 b.c.) and secured Antiochus' release. Shortly after this (Dan.11.20) Seleucus was murdered by Heliodorus, and Antiochus usurped the throne, to the exclusion of his nephew having met only the resis-

tance of Eumenes II. and then of his son Attalus II. of Pergamos to enable him to put down Heliodorus (11.21). It was the policy of Antio-

chos to Hellenize the Jews in religion, manner of life, and language, so as to make Palestine a more integral part of his kingdom. A party among the Jews was only too ready to favour the scheme. Led by Joshua, brother of Onias III., the high-priest, whose office he obtained for himself through bribery, the Hel-

lenizers for a time became supreme in Jerusa-

lem. A gymnasion was erected to train the Jews, as the heathen Greeks were trained, amid heathen surroundings; and their pro-

gress in what was supposed to be enlighten-

ment and liberality of thought was still further displayed by sending deputies and presents to Tyre to the quinquennial games in honour of Hercules. [HELENIST.] In 172 Joshua (who adopted the name of Jason) was posed in favour of Menelaus, who had offered the king a larger bribe. Antiochus marched against Ptolemy VI. (Philipometor), king of Egypt, in 171 b.c., and took him prisoner in 170 b.c. Antiochus then endeavoured to con-

quer the whole country. He unsuccessfully laid siege to Alexandria in 170. Another campaign in 168 gave, however, every prospect of entire success, until prevented by the ar-

ival of "ships of Kittim"—i.e. the Romans sent Popilii to command Antiochus, under penalty of being declared an enemy of the Roman people, to withdraw from Egypt. On his return homewards through Palestine he found that Jason had succeeded Menelaus and deposed Menelaus. This gave Antiochus an opportunity of satisfying his army, disappointed in their hope of plundering Egypt. He sent Apollonius with a large force to take possession of the holy city and punish the Jews for their unrulefulness. Two years before they had received a severe lesson, when An-

tiocbus had plundered the temple and "made a great massacre" (1Mac.1.24); but now the king resolved to put down the law of God and compel the Jews to conform to the religion and practices of the rest of his dominions. He issued an edict that all should be one people" (1.41 ff.). All copies of the Law which could be found were destroyed, while burnt-offerings and sacrifices in the temple were forbidden. An altar in honour of Jupiter Olympius, prob-

ably "the Abomination of Desolation" (Dan.11.31; 1Mac.1.54), was set up on the altar of God on Kislev 15, and on the 25th December the temple was desecrated thereon. But the cause of religious freedom was nobly upheld, at first by Mattathias, and, after his death, by his son Judas Maccabaeus, who rose in arms against the tyrant. In the battle of Beth-horon (167 b.c.) Judas utterly defeated the Syrian host under the command of Seron (and Apollonius?), and overthrew an army of 47,000 men under Gorgias near Emmans later in the same year. In 166 Lysias' army of 65,000 men was defeated at Beth-sura (Beth-zur), after which Judas captured Jeru-

salesm and cleansed and re-dedicated the temple. Meanwhile Antiochus had crossed the Euphrates at the head of an army and marched into Elymais. There he attempted to plunder a temple dedicated to Anaitis or Nanea, but was repulsed. He retired to Babylon, and marched thence into Persia, where in 164 he died, having failed in every one of his leading projects. He left the throne to his young son Antiochus Epipator. [MAC-

CABES, THE:] Winer, Bibl. Realwörterbuch (cf. Dan.11.27-45). [w.s.t.c.t.]

**Antiochus V.** (Epipator, 164-162 b.c.), son and successor of Antiochus Epiphanes, was only 9 (others say 13) years of age when he ascended the throne. His father had on
his death-bed named Philip his foster-brother regent and guardian of the young king (1 Mac. 6.14f., 55). But Lysias, governor of the whole region between the Euphrates and Egypt, had been previously entrusted with the care of the prince’s person (3.32f. 6.17), and now made himself regent. For the struggle between Philip and Lysias for the possession of the young king, and for the war waged by Lysias against the Jews, see Philip, 3. Lysias. Finally, Lysias overthrew Philip, but meanwhile Demetrius, cousin of the young king, had escaped from his captivity as a hostage in Rome and landed at Tripolis. His claim to the throne obtained popular support, and he captured and put to death both Antiochus and Lysias in 162 B.C. (1 Mac. 7.2-4; 2 Mac. 14.1-2; Jos. 12.1. Ant. x. 1; Polyb. xxxi. 19). [w.st.c.t.]

Antiochus VI. (1 Mac. 11.54), king of Syria (145-143 B.C.), surnamed 666, was son of Alexander Balas by his wife Cleopatra, daughter of Ptolemy Philometor. Brought forward by Tryphon (Diadoctus) as a rival to Demetrius II., Antiochus was put to death by the ambitions general in 143 while still very young (13.31; cf. 12.39). [Demetrius II.] [w.st.c.t.]

Antiochus VII. (1 Mac. 15), king of Syria (137-128 B.C.), surnamed Sidetes from having been brought up at Sidé in Pamphylia, was the 2nd son of Demetrius I. (Soter), and is sometimes styled Eucrater (Benedictus), and sometimes Eucebes (the Pious). After the capture of his brother by the Parthians, Antiochus made a treaty with Simon the Hasmonean, granting him many privileges, among others the right to coin money. He then marched against the usurper Tryphon, who with a small force took refuge in “Dora, which lieth by the seaside” (1 Mac. 15.11), most of his troops having joined Antiochus. The latter besieged the town by land and sea, and, when Tryphon escaped, pursued and overthrew him, recovering the revolted cities which had owned his sway (137 B.C.). Antiochus had meanwhile broken his agreement with the Jews, and demanded the payment of tribute and the surrender of the tower in Jerusalem, which had been in Simon’s possession since 141, from which year the Jews dated their freedom from the Syrian yoke. To enforce these demands he sent an army under Cendebeus to invade Judaea. After some slight successes, the Syrians were entirely defeated at Jannia by Judas and John, sons of the aged Simon. The latter with his sons Mattathias and Judas was soon after (135 B.C.) treacherously murdered by a traitor, Ptolemy, son of Abibus, who then sent to invite Antiochus to invade the country.

Having nothing further to fear from Tryphon, Antiochus marched against John Hyrcanus, 2nd son of Simon and his successor in the high-priesthood. Beside him a year in Jerusalem, he compelled him to surrender and become tributary (133 B.C.), but, fearing Roman interference, granted him favourable terms. Antiochus then turned his arms against the Parthians, John Hyrcanus and a body of Jewish troops accompanying him. The Syrians gained three battles and occupied Babylonia. This induced many provinces of the Parthian empire to revolt and join the invaders. But in 128 Antiochus fell in battle and his army was destroyed. His body was placed in a silver coffin and sent by Phraates to be buried in Syria. Antiochus’ defeat and death enabled Hyrcanus and the Jews to recover their liberties.

Antipas.—1. Martyr at Pergamos (Rev. 2.13), according to tradition bishop of that place, and martyred under Domitian (Menol. Gr. iii. 51).—2. [Herod.]

Antipater, son of Jason and Jewish ambassador to the Lacedaemonians (1 Mac. 12.16.14.22).

Antipatris (Ac. 23.31), a town between Jerusalem and Caesarea, no doubt on the Roman road to the latter seaport. It was built by Herod the Great, in the plain of Caphar-Saba (16 Ant. v. 2), at a place with “rivers and trees” (1 Wars xxii. 9), which does not apply to Kefar Saba, though the passage—perhaps corrupt—seems to identify the two (13 Ant. xv. 1). In the Talmud they are distinct, for Antipatris was on N.W. boundary of Judaea (Tal. Bab. Gittin 76a; Sanhed. 91b), while Caphar-Saba was in Samaria (Tal. Jer. Demor ii. 2). The true site appears to be at Kifs d’Afen, the source of the river ‘Ayyeh, at the foot of the hills, on the Roman road to Caesarea, as the following distances indicate:

Jerusalem Itinerary.

Lydda (Ludd) to Antipatris, 10 miles (11). Bether (Tirhe) to Antipatris, 12 miles (1). Antipatris Itinerary.

Caesarea to Antipatris, 28 miles (30).

Onomasticon.

Cgalgo to Antipatris, 6 miles (61). The actual distances (in brackets) are as close as could be expected. Fine springs here gush out under the ruins of the Crusader’s castle, Mirabel. The ditch dug from Antipatris to the sea, by Alexander Jannaenus (1 Wars iv. 7), probably canalized the ‘Ayyeh, and Antipatris is here placed “near the mountains,” which does not fit Caphar-Saba (Sure. II. Ful. ii. p. 258). [g.r.c.]

Antothi, a Benjamite of the sons of Shashak (1 Chr. 8.24).

Antothite. [Anethothite.]

Anub, son of Coz and descendant of Judah through Ashur the “father” of Tekoa (1 Chr. 4.8).

Anus (31 ed. 9.98) = Band, 7.

Apamea, cornucopia of Darius, and daughter of “the admirable Bartacus” (1 Esd. 4.29; cf. Josephus, 11 Ant. iii. 5).
Apelles (Ro.16.10), honoured by St. Paul with the designation “approved in Christ.” Horace (1 Sat. v. 100) takes Apella as a personification of the Jewish nation. See Lightfoot, note on Caesar’s household. [E.R.N.]

Apes (Heb. กֹּפְהִין) are mentioned in I K. 10.22, “Once in three years came the navy of Tharshish, bringing gold, and silver, ivory, and apes, and peacocks,” and in the parallel passage of 2 Chr. 9.21. Since peafowl are restricted to the Indo-Malay countries, where elephants and apes (if the latter term be taken to include the species commonly designated monkeys) are also found, there is a strong presumption that “Tharshish” refers to some part of India or Ceylon, unless indeed it be a general term for those countries. This is supported by Sir E. Tenison, who states that the Tamil names for monkey, elephant, and peacock are identical with their Hebrew titles. On the other hand, as African ivory is now carried from Zanzibar to Bombay and thence re-exported, so anciently peacocks may have been transported from Ceylon or India to the Persian Gulf, and thence to various Solomonese merchants with African ivory and apes or monkeys. A totally different interpretation is given, however, by Paul Haupt (John Hopkins Univ. Circular, No. 163, p. 51, and Proc. Amer. Phil. Soc. xlv. p. 157, 1907), who claims that Tharshish (or Tarshish) is a Phoenician term for Timbuctoo, and that the names of African animals, especially dressing of ores, are referring in this instance to the mining district of southern Spain. “Stones of Tharshish,” he urges, are crystals of cinnabar from the Spanish mines. Ships sailing from the S. of Spain might obtain apes and ivory from the African coast; but peacocks in this connexion present an apparently insuperable difficulty; but see also Tarshish for yet another explanation. [R.A.L.]

Aphrathites, Aphrathites, names formed from cities or districts from which colonies had been settled in Samaria by the Assyrian ruler Assarpar (Ezr.4.4-5.6). The first and last have been respectively identified. Assarpar has been identified with the Assyrian king Assur-bani-pal, but his records contain no names which can be compared with these. [T.G.P.]

Aphek’ (strong), Aphekah’ (Jos.15.33), Aphik’ (book), Judg.1.31.—1. A royal city in the Lower Galilee (Jos.12.18), perhaps N. of Jezreel (1 Sam.29.1).—2. A town of Asher from which the Canaanites were not driven out (Jos.19.30 ; Judg.1.31).—3. Noticed with Gebal, now Apja, the source of the Adonis River (Jos.13.4).—4. A Philitish camp perhaps near Ebenezer (1 Sam.4.1).—5. A city of the mishmar (pl. of Bashan) now Fig. E of the sea of Galilee (1 K.20.25,26,30 ; 2 K.13.17).—6. Aphekah in the mountains S.W. of Hebron (15.53). [C.R.C.]

Aphere (Mac.11.34), capital of a district added to Judaea about 146 B.C. It is noticed with Lydda and Ramathem; and is described by Josephus (Ant. 12.5). When it was by Aquila and Priscilla. After this he became a preacher of the gospel, first in Achaia and then in Corinth (18.27,19.1), where he watered that which St. Paul had planted (1 Cor.3.6). When St. Paul wrote 1 Cor., Apollo was with or near him (1 Cor.16.12), probably at Ephesus in 57 A.D. : we hear nothing else of him till the time of his journey to Corinth, but would do so at a more convenient time. His reluctance to revisit Corinth at the moment probably arose from his loyalty to St. Paul. Despite his wish, he

Aphra (book), one of the sons of the servants of Solomon whose descendants returned with Zerubbabel (Ez.5.34 only).

Apelah, a forefather of Saul (1 Sam.9.1).
had been made to figure as a party leader, in opposition to St. Paul, among the Corinthian Christians, and his reappearance in their city might have revived that spirit of faction so sternly rebuked in 1 Cor. He is mentioned but once more in N.T., in Tit. 3.13, where Titus is desired not to "bring Zenas the lawyer and Apollos on their way diligently, that nothing may be wanting to them." After this nothing is known of him. Tradition makes him bishop of Caesarea. It has been supposed by Luther and others that Apollos was the author of the epistle to the Hebrews.

Apollos. [ApoTfios.] 2 (Apostle. 1. Meaning and usage of the word. Literally "envoy," derived from Gk. ἀποστόλος, to send on a special mission (Jn. 17. 18). Christ Himself was the "apostle" of the Father (Heb. 3.1). The word was already in use among the Jews for the delegates who collected the tribute for the temple service, and was applied in a similar sense to the Jews charged by St. Paul or the Churches with various commissions, as in 2 Cor. 8.23, Ph. 2. 25, and probably Ro. 16. 7. But the ordinary N.T. application is to the twelve disciples and to those subsequently added to their number— John, Barnabas, Silas (and perhaps James, the Lord's brother). Though the name was conferred on the Twelve by Christ Himself (Lu. 6. 13), it seldom occurs in the Synoptists (once only in Mt. and Mk.), and never in the Fourth Gospel, where they are always called "the disciples." It did not obtain currency at first, however. Discipleship, not apostleship, was in Christ's lifetime the primary function of the Twelve. Late in the 1st cent. the name was assumed by travelling evangelists, and traces of this begin to appear in 2 Cor. 11. 13, Rev. 2. 2, 11. Call and Training. Restricting the title to the Twelve, we may distinguish in the special instances given us three stages in the association of the apostles with Christ. (1) Their individual acquaintance with Him (Jn. 1. 41-51). (2) Definite call to follow Him (Mk. 1. 16-20). (3) Selection of the Twelve from a larger body of followers (Lu. 6. 13). We next observe the twofold purpose of the selection as given us by Christ. He wanted to teach them with Him, that He might send them forth (ἀποστολή) to preach (Mk. 3. 14). These two clauses summarize the training of the Apostles: (1) the personal influence of close association with Christ, including His teaching by word and act; (2) the mission on which they were sent (Mt. 11. 1), which could not have lasted long, and must be regarded chiefly as forming the training of their faith, discretion, and courage (10. 7, 16, 31), and as conveying lessons for future endeavours. As the training by association and teaching includes the greater part of the gospel narratives, it is impossible to present a summary of it, but one or two aspects must be given. The wandering life to which they were called (8. 19, 20) was necessary in order to detach them from the world. The method of teaching by parables was stimulating to their intellectual life on the spiritual side. The miracles taught them faith in Christ's Person and in His power to save (Mk. 4. 37-41), while His calm insight into their thoughts and His calm reproofs dealt with wrong tendencies as they arose (9. 33, 34). On the side of belief they had begun by acknowledging Jesus as the Messiah, but the political conception of Messiahship which they held in common with the men of their time had to be transformed. St. Peter's confession (Mt. 16. 13-20) means that a real advance had been made. The course, as it would seem, by which His means of grace, as recorded, may be followed is that described in Acts (Jn. 14-15) and is in part confirmed by the course of events. The lessons of this period of the history of the Church are much greater than those of the actual history. The apostle's life, which is nothing more than the history of the Church, was a life of faith, and a life of faith which had been preceded by the history of the Church. It is therefore not possible to separate the history of the Church from the history of the Church.
APOTHECARY

delegates, such as SS. Timothy and Titus, over the Churches he had founded. When he claims this authority, he puts it forward his position as Apostle (Gal. 1:1); and a similar claim may be recognized in the epistles of St. Peter and St. John. The apostolate as the foundation of the Church is emphasized in Eph. 2:20 and Rev. 21:14 — passages which look back to the Lord's words to Peter (Mt. 16:18). Sustentation by the Church was an established privilege of apostles (1 Cor. 9:4-7), though this is extended at a later date to the elders (1 Tim. 5:17, 18). On the name and office of an apostle reference should be made to Lightfoot's Galatians, detached note on Gal. 1; on the training of the apostles to Latham's Pastor Pastorum, especially ch. viii., ix., xi.; and to Bishop [E.R.B.]

Aphorism, The Heb. root *rāqāh* means "to mix ointments or spices"; perfumer would therefore be a more correct rendering, which agrees with the context in Ex. 30:25,35 and the four other passages in which the word occurs. [W.O.E.O.]

Appa'im, younger son and successor of Nadab, in the line of Jerahmeel of the tribe of Judah (1 Chr. 2:30,31).

Appeal. For this subject in O.T. see Judge. Heb. law made no provision for appeal to a higher tribunal for the rehearing of a cause which had been decided by an inferior one. In N.T. times, when a local Hebrew court failed to come to a finding, the cause could be taken before the two Lesser Sanhedrin in Jerusalem, and thence if necessary to the Great Sanhedrin, whose decision was final (Mishna, Sanh. xi. 2). [Sanhedrin.] But this did not constitute an appeal in the true sense. St. Paul exercised his privilege as a Roman citizen (Ac. 25:25-29) when he appealed from the provincial to the supreme Roman tribunal —Caesar himself (25:11). The magistrate at Caesarea decreed a rehearing to be held in Rome (25:18). The result of these circumstances justified an appeal (25:12,25), but he refused the claim at his peril (Suetonius, Galba, 9). [H.H.]

Apphia, a Christian woman (Ph. 2) whose name occurs between those of Philemon and Archippus, probably wife of the former and mother of the latter. Lightfoot has shown that it is an Aramaic name, and, so far, a testimony to the genuineness of the epistle, as her home, Colossae, was a Phrygian city. [E.R.B.]

Apphus, "the Dissembler," a surname of Jonathan the Hasmonean (1 Mac. 2:5), perhaps earned by his deceit, of which this is an example, 1 Mac. 9:37-41. [C.D.]

Appii Forum, a well-known station on the Appian Way, the great road which led from Rome to the neighbourhood of the bay of Naples. St. Paul, having landed at Puteoli (Ac. 28:13) on his arrival from Malta, proceeded under the charge of the centurion along the Appian Way towards Rome, and found at Appii Forum a group of apostles who had gone to meet him (ver. 15). Its position is fixed by the ancient Itineraries as 43 miles from Rome. Horace describes it as full of taverns and boatmen. This arose from the circumstance that it was at the end of a canal which ran parallel with the road through a considerable part of the Pontine Marshes. There is no difficulty in identifying the site with some ruins near Treponti; and in fact the 43rd milestone is preserved there. [Three Taverns.]

Apple-tree, Apple (Heb. *tappūāh*). The tree is mentioned in A.V., in Can. 2:3,8,5 and Jl.1:12, where it is named with the vine, fig, pomegranate, and palm-trees, as withering under the attacks of the locust, palmner-worm, etc. The fruit is mentioned in Ps. 25:11; Can. 2:5 and 7. It is difficult to say what tree is denoted by the Heb. *tappūāh*. The quince, citron, and apricot have been supported by modern writers. The fragrance of the quince was held in high esteem by the ancients. "Its scent," says an Arabian author, "cheers my soul, revives my strength, and restores my breath." The quince was sacred to Venus. Dr. Royle says, "The rich colour, fragrant odour, and handsome appearance of the citron, whether in flower or in fruit, are particularly suited to the passages of Scripture mentioned above." But neither the quince, citron, nor apple appears to satisfy all the scriptural allusions. The *tappūāh* must be some tree the fruit of which is sweet, and possessing fragrant and restorative properties. Neither the quince nor the citron is sweet. As to the apple-tree (Arab. *tujūfah*), travellers assert that its fruit is generally of inferior quality. Moreover, the apple would hardly merit the character for excellent fragrance which the *tappūāh* is said to have possessed. On the whole, Canon Tristram decides in favour of the apricot. The citron yields no shade, and the fruit is hard and indigestible. Oranges were unknown sufficiently early, and our apple will not meet the requirements—a term more-

ARC OF DRUSUS. W.D.A.
APRON

over which was used with the widest latitude. The apricot, a native of Armenia, was probably introduced as early as the vine. The Neapolitan name for it, crismomolo, is identical with Pliny's chrysomela, a kind of quince, or golden apple. The apricot is one of the most abundant fruits in Palestine, and like the quince is made into excellent marmalade. There need be little hesitation in accepting it as the "apple," or tappūhā, a word whose root signifies sīvet. "There can scarcely be a more deliciously perfumed fruit than the apricot, and what can better fit the epithet of Solomon (Pr. 25.11)"? (Tristram, Land of Israel). It is right to mention, however, that one competent authority at least (Post) still believes it to be the true apple. Col. Conder also, in our Palestine article, says that El Mughaddasi speaks of "excellent apples" from Jerusalem (985 A.D.). [For "apples of Sodom," see VINE OF SODOM.] The expression apple of the eye occurs in Deut. 32.8; Ps. 17.8; Pr. 7.2; Lam. 2.18; Zech. 2.8. The Eng. words are the Heb. 'ishôn, "little man"—the exact equivalent of Eng. pupil, Lat. pupillus. [H.C.H.]

APRON. [HANDKIRCHER.

Aquilla, a Jew of the province of Pontus (Ac. 18.2), who had left Rome when the Jews were expelled by Claudius. The St. Paul found him and his wife Priscilla at Corinth, and joined them at once, which implies that they were already Christians. St. Paul worked with them at their trade, the manufacture of tents from the rough Cilician haircloth, a product of St. Paul's native city of Tarsus. When he left Corinth, they accompanied him to Ephesus, where they remained till his return. For their share in the instruction of Apollos, see Apollos. Ac. 18.26 confirms the impression given by Ro. 16.4, that both at Ephesus and elsewhere the Gentile church owed much to Aquila and Priscilla. Moreover, they had rendered some personal service to St. Paul at the risk of their own lives (Ro. 16.4). Hence their names are honoured with the first place in the salutations to the Christians at Rome, to which city they had returned at the date of that epistle. Later we find them again at Ephesus (2 Tim. 4.19). Both at Ephesus and Corinth, as at Corinth, or the capital of Christian worship (see Lightfoot, Col. 4.15 note). Prisca (this form is used by St. Paul, and Priscilla, its diminutive, by St. Luke) precedes her husband Aquila in four of the five passages, in which they are mentioned together. This has been explained as implying, either that she was very active in Christian work, or that she was of higher social rank. Her importance in Roman tradition seems to point to the latter view (Ramsay, Paul the Traveller, p. 268). The prominence given to Prisca accords with the marked recognition of the ministry of women by St. Luke both in his Gospel and in Acts. [DAMARIS.] [E.B.B.]

ARABIA

or Ar or of Moab, one of the chief places of Moab (Is. 15.1; Num. 21.28). In later times the place was supposed to be Arecopolis or Rabbath-moab, i.e. the great city of Moab, a site still called Rabbah, halfway between Kiriath-arba and the Arnon, to 10 miles each from each. The Roman road passing through it. The remains are not important. See Deut. 2.9, 18, 29; and also Num. 21.15.

Ar'a, son of Jether, an Asherite (1 Chr. 7.38).

Arab, a city of Judah in the mountainous district of Hebron, mentioned only in Jos. 15.52. Probably the ruin of Rabiyeh, 8 miles S.W. of Hebron. [ARUBOTH.] [C.R.C.]

Arabah. Although this word appears in A.V. in its usual shape only in Jos. 18.18, in the Heb. text it is of frequent occurrence. It is used generally to indicate a barren district, but "the Arabah" indicates more particularly the valley extending from the slopes of Hermon to the Elanitic Gulf (gulf of Agabah) of the Red Sea. [EDOM.] S. of the Dead Sea the valley retains its old name as Wady el-'Arabah. In Deut. 1.1.2.8 (A.V. plain in both cases) the allusion is to the southern portion. In Deut. 3.17.4.49: Jos. 3.16.11.12.3; and 2 K. 14.25, both the Dead Sea and the sea of Cineroth (Gennesaret) are named in close connexion with the Arabah. The allusions in Deut. 1.17.4.49; Jos. 3.16.11.12.3. and 2 K. 14.25: Je 39.4.52-7, become once intelligible when the meaning of the Arabah is known. In Jos. 11.16 and 12.8 the Arabah takes its place with "the mountain," "the lowland," "the south," and "the valley" of Coelosyria, as one of the great natural divisions of the conquered country. In all these cases R.V. reads Arabah. [C.R.C.]

Arabateline (1 Mac. 5.3). [AKRABBIM.]

Arabian. The great peninsula stretching S.E. of Palestine, between the Red Sea and the Persian Gulf, to a length of 1,500 miles, with a width of 700 in the N. and 1,200 in the S., and including the peninsula of Sinai, S. of Beer-sheba. The Arabia of St. Paul (Gal. 1.17) is, however, the desert S. of Damascus, which, after 105 A.D., became the Roman province of Arabia Prima, with its capital at Bostra, E. of Bashan. This region had an Arab population yet earlier. The classic division of Arabia included the three regions Arabia Felix, or the Yemen (the south), in the S.W. part of the peninsula; Arabia Deserta, or the main plateau; and Arabia Petraea, or the deserts of Petra and Sinai. The main provinces are now called the Hijaz, or the W. shores and hills, including the trading towns of Mekkah and Medinah, the capital, and Taif, the capital of the Yemen, with its towns of Aden and Mocha and its capital at San'a (the tank, originally called Anazal); Hadramaut [Hazar-maveth], the desolate region, inland of the S. shores, between the Yemen and Oman near the mouth of the Persian Gulf; N. of the last two is the desert region Arabia Lyzma. The great Nebi plateau is mainly a bare expanse of red gravel; but Arabia is not destitute of rain, and includes oases and pastoral regions. It has always had a considerable settled population, called "Arab el Had, or Arabs of the enclosures," as contrasted with the nomads ("Arab el Beda, or "Arabs of the waste"). The trading route from the Yemen [Sheba], passing N. to Eloth and Petra, appears to have been very ancient; and the traders not only brought myrrh and other products of Arabia, but gold, probably sometimes from Nubia, over the routes of Aden. Arabia is first mentioned by name in the time
of Solomon, to whom the "kings of Arabia" brought presents, and whom the queen of Sheba visited, bringing gold, spices, and precious wood (1K.10:2,10,15; 2Chr.9:1,9,10,14; Ps.72:15). The gold came from Ophir, in Arabia itself (Gen.10:29; 1K.9:28; Is.13:12); and Dedan, shortly before the Christian era, also speaks of gold dug from the ground in S. Arabia (iii. 4). These riches were brought on "camels," no doubt along the Hind trade route. But Arab sea trade brought also "sweet cane from a far country," as well as incense from Sheba (Je.6:20); and Herodotus (iii. 111) also says that the cinnamon in which the Arabs traded came (in 5th cent. B.C.) from some far land—apparently India. Isaiah (21:13) speaks of the thickets of Arabia, and of its "travelling companies," referring (see ver. 11) to the N.W. near Duhah. Jeremiah, again, mentions the "kings of Arabia" (11:21), also the N. Arabians Dedan, Tema, and Buz. In a later chapter of Isaiah (50:6-7) the gold and incense of Sheba are mentioned with the camels of Midian, and the flocks of Kedar and Nebaioth. In Ezekiel we find the Tyrian trade, about 600 B.C., to have included the sheep and goats of Arabia, and Nelson says that it was also traded with the Arab "nomads" fought as allies of the Greeks, according to a late account (2Mac.12.11), against Judas Maccabaeus, and gave tribute of cattle. In most of these notices the region immediately S.E. of Edom seems to be indicated. St. Paul includes Sinai in Arabia (Gal.11:17), and the classical historians Herodotus, in the 5th cent. B.C., says that the Bactrian and camels of Arabia (vi. 69, 86), and gives an account of the riches brought by Arab traders to the Phoenicians, who carried them to the Greeks, specifying frankincense, myrrh, cassia, cinnamon (from India probably), and laudanum, or gum-cistus. His account agrees therefore with O.T. notices. O.T. Inhabitants. [ARABIANS.] The earliest inhabitants were Cushites (Gen.10:7), apparently of the same race with the non-Semitic Akkadians of Chaldea, and probably settling on the W. shores of the Persian Gulf. [CUSH.] The classical inhabitants came from the same region (10:5-6), thus also (though the O.T. Qahtan of Arab tradition) signifies the "lesser" or younger branch of the Semitic race of Babylonia. The known regions mentioned as inhabited by these immigrants include Uzal, Sheba, and Hazar-maveth, representing a dispersion over the S. and S.W. of Babylonia, and closely akin by race to Hebrews and Egyptians (appearing, on the other hand, to have been tribes of the N.W., mentioned according to their "towns and forts" (Gen.25:13-16), for the known names in this list include Nebaioth, Kedar, Duhah, and Tema, also, from Aram, spread S. to the same region, according to the Assyrian localization of Huz and Buz (Gen.22:21); and other descendants of Abraham are noticed in Sheba and Dedan among the sons of Keturah, who also dwelt in some cases in Midian (Gen.25:2-4). The list of the "kings of Arabia" from monuments confirms this account, as the Arab and Babylonian languages are akin, while the Aramaic of N.W. Arabia is nearer to the Hebrew. [SEMITIC LANGUAGES.] Accounts of the stepped pyramid of Gudmân and the worship of the gods Istar, Sin, and Nebo in Hadramaut also indicate an early Babylonian influence. History. At Zirgul (now Tell Lob), in Chaldea, the statues erected by prince Gudea (about 2800 B.C.) are of granite similar to that of Sinai; and the inscriptions inform us that the stone was brought by ship from Mad-gan (ship-port), which is the name given by the later Assyrians to the Sinaic peninsula, or to some part in the gulf of Suez. These data, taken together, seem to indicate that, at this very early period, the Akkadians of Chaldea had circumnavigated the peninsula of Arabia to reach Mad-gan, and in order (as the same inscriptions state) to bring gold dust from the Tyrian Peninsula, or from some part in the S. Arabian peninsula. The history of Arabia, from sources other than the Bible, does not, however, begin before the time of Tiglath-pileser III., who invaded it from Edom in 734 B.C. A picture, accompanying his account, represents an Arab on his camel pursued by an Assyrian with a sword and horseman, and agrees with the representation of a modern Bedawi. The Assyrians, however, penetrated only into the N.W. of Arabia, on the borders of Edom. They attacked Samsi, successor of Zabibeh—each called "queen of the Arabs"—capturing 30,000 camels and 20,000 oxen, with the queen, and bound the king of Edom in tribute. A certain Hazael from the same region was subject to Esar-haddon, and recovered from Nineveh the images of Arab gods which Sennacherib had captured. Esar-haddon (after 680 B.C.) marched 900 miles from Nineveh into N. Arabia, to the region of Huz and Buz (Huzz and Buz), which would thus have been no more than 100 miles S. of Elath. He defeated eight local rulers, including Akbar of Nebaioth, Mansaku of Marabanu (perhaps M'arib), Yapaph "queen" of Dedan, and B'aliiu "queen" of Idlu (perhaps Uzai, Auzâl, though this seems too far S.); and he afterwards received tribute (from Yatah, probably an addition of 10 manehs of gold, 50 camels, gems, etc.). The frequent notice of queens besides kings in Arabia, in this age, agrees with O.T. notices of the queen of Sheba and of the kings of Arabia. In the next reign, when Assur-bani-pal was confronted (about 650 B.C.) by the revolt of Babylon, Yavat, and his queen Adiya, joined by the king of Kedar, invaded Edom, Gilead, and Moab, but was defeated by Assyrian generals in Zoab, and deserted by the Nabatanean king Nathan. He and his queen were taken as prisoners to Nineveh. Other Arabs had marched to Babylon to aid Sama-sun-uki, the revolted brother of Assur-bani-pal, and perished (in 648 B.C.) in the siege, by famine after a vain sally. Yautah II., nephew of the former Yautah, joined by Nathan the Nabatanean, raided the Assyrian borders a little later; and Assur-bani-pal marched 700 miles from Nineveh to the desert to confront them, but the movement only brings us to the Nabatanean country
near Edom. The Assyrians suffered from thirst, but took many captives back to Damascus. After these events we hear nothing of Arabia—excepting the deserts E. of Edom and Gilead—until the Roman age, when Aelius Gallus (in 24 B.C.) conducted an unsuccessful attack on the Sabeans. The Arab sea-trade had prospered under the Ptolemies, and the Sabeans were celebrated for their wealth (see Horace, Odys i. 29; ii. 12; iii. 21); their power extended not only over the Yemen, but also into the low-lands of Abyssinia. They became the great carriers of the East in our 2nd cent., trading with India, and with Africa down to the Zambesi. The power of the Himyarites, or Sabeans, continued till about 552 A.D., when they became subject to the Arab kings of Axum in Abyssinia. Arabia was included in the Persian empire of Chosroes I. (about 532 A.D.), and Mecca was unsuccessfully attacked by an Abyssinian army with elephants in 570 A.D. Arabia became finally a free country under Muhammad in 630 A.D., though afterwards owing allegiance to Egypt and to the Turks.—Antiquities. The study of the ancient Sabeans is not yet begun; the discoveries of Seetzen in 1810, Halévy in 1856, and Doughty in 1875. Glaser added 1,000 texts, from M'arib and elsewhere, twenty years later. [Writing.] But none of these records appear to be of very high antiquity. The Assyrian and Greek influences are visible in several rock-carvings from remote fragments of the N.W.; and Doughty's texts, from M'ain and farther S., are in an Aramean alphabet probably not older than 500 B.C. The coins and texts of the Sabeans, as far as they can be dated, belong to the 3rd cent. B.C., and those discovered by Glaser in Hadramaout and at M'ain are possibly quite as late. The Sabeans were ruled, it appears, by kings, who called themselves by the title magrib (suppliant) on votive monuments, and "kings of Saba"; as late as the 6th cent. A.D. they were still styled "kings of Saba, Dhu-Raidan, Hadramaut, and Yamnat." The Sabeans and the Titians of Ma'in or of the island of N.) fought on another; and one interesting text refers to a Minean king, Abiyad'a, as having a governor in Musqan (Egypt). A king so named was set up by Assur-bani-pal about 648 B.C., and even Tigháth-pilesér III. made an Arab chief a governor in N. Egypt. The wars between Yammat and Shamat (the south and the north), and the hosts of "Saba and Khawilân" (Havilah), are noticed in a votive text in honour of Athtar (Istar), set up by M'áin traders (Halévy, 535 and 578), who led caravans from Egypt to Assyria and the regions "beyond the rivers." This record has been supposed to be as late as 525 B.C. In others a trade with Egypt in incense is said to have taken the route to Gaza.—Religion. The Arabs worshipped many gods, symbolized by rough stones. The chief deity was Amon, the god of "heat," whose name is found not only in S. Arabia and ancient Sabeans Abyssinia, but even in Gk. texts of Bashan set up by Ghasian Arabs there settled. Samsi, "the sun," was female, the 'Athtar (Istar), "the moon," was male in Arabia. In Hadramaout the latter was adored with Nebo and Sin (Babylonian gods). The Assyrian texts speak of Adar-Suain as a supreme Arab deity, and among others were Nisr (Eagle), Al-makah, and Ashat (the goddess). In the Korán many Arab idols are named, and others by Herodotus, the chief goddess being Allât or Lut, who is mentioned in S. Arabian texts. [c.r.c.] Arabian, the nomadic tribes inhabiting the country to the E. and S. of Palestine. Their roving pastoral life in the desert is alluded to in Is.13.20; Je.3.2; 2Mac.12.11. [Arabia.] During the prosperous reign of Jehoshaphat, the Arabians, in conjunction with the Philistines, were tributary to Judah (2Chr.17.11), but in the reign of his successor they revolted, ravaged Judah, plundered the royal palace, slew all the king's sons with the exception of the youngest, and carried off the king's wives (2Chr.21.16,17,22,1). The Arabians of Gur-baal (Mehumin from M'ain in Edom) were again subdued by Uzziah (2Chr.26.7). They were among the foremost in hindering Nehemiah in his work of restoration. A.D. 535, Hezekiah led with the Ammonites and others (Ne.4.7). Geshem, or Gashman, one of the leaders of the opposition, was of this race (Ne.2.10,6,1). In later times the Arabians served under Timothæus in his struggle with Judas Maccabæus, but were defeated (1Mac.5.30; 2Mac.12.10,11). The Zabadeans, an Arab tribe, are called the brother and successor of Judas (1Mac.12.31). Zabdiel, the assassin of Alexander Balas (1Mac.11.17), and Simeæus, who brought up Antiochus, the young son of Alexander (1Mac.11.30), afterwards Antiochus VI., were both Arabians. Arab, a Benjamite, son of Beriah (1Chr.8.15). Arad, a royal city of the Canaanites, in the negeb region (Judg.4.16). In Num.21.13,33,30 "the Canaanite king of Arad" (see R.V.) is noticed. It is mentioned in the Onomasticon as 4 miles from Malatha, a few miles beyond the ruin town, and 7 miles from the ruined town 17 miles S. of Hebron, and 7 miles N.E. of El Milkh or Malatha. [c.r.c.] Aradas (1Mac.15.23) = ARVAD. Arath.—1. An Asherite, of the sons of Oola (1Chr.7.30).—2. The sons of Arath returned with Zerubbabel (Ezr.2:5; Ne.7:10). His descendant Shechaniah was father-in-law of Tobiah the Ammonite (Ne.6:18). Aram (highland), Gen.10.22. The name is held in the high regions of Lebanon and the Taurus (Syria in A.V.) and of the hills in N. Mesopotamia, called more especially Aram-naharah (Gen.24:10, see R.V. marz), or "highland of the two rivers."—The Phœnicians and the Tigris. The Syrian Aram included petty kingdoms called: (1) ARAM-ZOBAH, or Zobah (1Sam.14:47; 2Sam.8:8; 1Chr.18:5,19:6; Ps.60, title), mentioned (as in Assyrian texts also) with Damascus, and extending N. in the Anti-Lebanon above the trade route of Tadmor; (2) ARAM-MIBH-REHOB, or Rehob (2Sam.10:6), noticed with the preceding, (3) ARAM-MACHAIAH (1Chr.19:6), or MAACHIAH (2Sam.10:6), apparently including
ARAMITESS

Hermon; (4) Geshur "in Aram," near the preceding (Deut.3.14; Jos.13.11,13); (5) Aram
of Damascus (2Sam.8.5,6; 1Chr.18.5,6), all these "Syrian" principalities lying close
to the land of Israel on the N.E. In the 10th cent. B.C. they owed allegiance to
Damascus (1K.20.4), and were allied a century later to oppose the Assyrians. Even c.
1000 B.C. the king of Damascus ruled Aram (1K.11.25, see 15.18), for "the head of
Aram is Damascus" (Is.7.8). The Assyrians are, however, also called Arameans (Je.35.11),
and their language Aramean (2K.18.26; Is.36.11). The family of Laban (Gen.25.20)
belonged to the Arameans of Padan-Aram, "the tilled highland" in Haran (Gen.28.2)
or "the East" (29.1,4; Deut.26.5). In early Egyptian accounts, and in the Amarna letters,
Naharin is often mentioned, referring to Aram-naharaim, otherwise rendered Mesopota-
mia (Judg.3.10) in A.V. As a personal name Aram occurs (1Chr.7.34) for a son of
Asher, and in N.T. (Mt.1.4; Lu.3.33) for Ram. But "the father of Aram" (Gen.25.21)
appears to mean the ancestor of the Aramean family in Haran (Gen.11.31). Aram
Naharin, a female inhabitant of Aram
the mother of Machir (1Chr.7.14). [ARAM.]
Aram-naharaim (Ps.60, title). [ARAM.]
Aram-zobah' (Ps.60, title). [ARAM.]
Aran', a Horite, son of Dishan (Gen.36.28; 1Chr.1.42).

ARARAT, a mountainous district in Asia,
mentioned as the resting-place of the ark after
the Deluge (Gen.8.4); as the refuge of the sons
of Sennacherib (2K.19.37; Is.37.38; A.V. Ar-
menia); and politically as the ally of Minni
and Ashkenaz. The name is exceedingly an-
cient, the Assyro-Babylonian syllabaries giving
it as Ur-tu, and the later Assyrian inscrip-
tions as Urartu. In the Alarodians of Herodotus
(iii.94) the first r. has become l. Moses of
Chorene gives the name of Ararat to the central
province, but in O.T. it stands for the Arme-
nian highlands in general—the lofty plateau
overlooking the plain of the Araxes on N. and
Mesopotamia on S. This district has an ele-
vation of 9,000 to 7,000 ft. above sea-level.
From its extensive plains spring other lofty
mountain-ranges, having a generally parallel
direction from E. to W., and connected by
transverse ridges of moderate height. Both
plains and mountains give signs of volcanic
agency. As Armenia has the peculiarity of
expanding into plains or steppes, separated by
graduated subordinate ranges, it is far more
accessible, both from without and within its
own limits, than other districts of similar eleva-
tion. The Araxes, which flows into the
Caspian, rises W. of either branch of the
Euphrates, and at first runs N.; the Euphrates,
which flows S., rises N. of the Araxes, and
takes a westerly direction, indicating that the
fall of the ground in the centre of the plateau
is not decided in any direction. The winter
(Oct. to May) is severe, and is succeeded by a
brief spring and a hot summer. Pasture is
abundant, and wheat, barley, and grapes ripen
at high altitudes, the vine being indigenous in
the country. There are various statements as
to the spot where the ark rested. Berosus the
Chaldean sets it in the mountains of the Cor-
dyaceans or Kurds (Josephus, 1 Ant. iii. 6),
and Nicolaus Damascenus states that a mountain
called Baris, beyond Minyas [MINNI], was the
spot (ib.). Baris is given more correctly as
Lubar in the book of Jubilees, and was the
boundary between Armenia and Kurdistan.
In the Babylonian records the ararat of
the ark is Nisir or Nizir, E. of Assyria. It
is natural that the scene of such an interesting
event should be transferred to the loftiest and
most imposing mountain in the district. Jose-
phus (1 Ant. iii. 5) states that Noah's landing-
place was called "the place of descent" (Apo-
batieion), the site of which has been seen in
Nakhitishevan, on the banks of the Araxes.
The Armenians have so closely connected Noah
with the district of Ararat, that Europeans
have applied that name exclusively to the
mountain, which, however, is called Massis
by the Armenians, Agri-dagh (painful mountain,
so Redhouse; or snowy mountain, so Conder)
by the Turks, and Koh-i-Nubah (Noah's moun-
tain) by the Persians. Rising out of the plain
of the Araxes, it terminates in two conical
peaks, named the Great and the Less Ararat,
about 7 miles apart. The former reaches a
height of 17,260 ft. above sea-level, and about
14,000 above the plain of the Araxes, whilst
the latter is 4,000 ft. lower. The mountain
the higher is covered by eternal snow for about
3,000 ft., and is of volcanic origin. Regarded
as inaccessible, it was first ascended by the
German Prof. Parrot in 1829 from N.W. He
described a secondary summit about 400 yds.

VIEW OF ARARAT.

W.D.A.
ARABATIS, a district of Palestine (1Mac. 5:23 only), perhaps a corruption of Acrabattine, the district or toparchy S.E. of Schem near the present village ‘Agrabachi. [C.R.C.]

ARBELA, mentioned in 1Mac. 9:2 only, as describing the situation of Masdath, or the town taken by Baccides. According to Josephus (12 Ant. x. 1), this was Arbela of Galilee, a place remarkable for impregnable caves, the resort of robbers and insurgents (14 Ant. xv. 5). The topographical data are fully met by the existing Ḳabid, a site with a ruined synagogue W. of Mejdel, S. of Ḳady Hamam, in a small plain at the foot of the hill of Qurn Ḳabīn. The cairns are in the opposite face of the ravine, and are called Qa‘at ‘Ibn Ḳumān. [Beth-‘Arbel.] [C.R.C.]

Arbite, The. Paarai the Arbite was one of David’s guards (2Sam. 23:35). The word signifies a native of Arab. [C.R.C.]

Arbonai, River of (Jb. 2:24). The Vat. MS. reads Abrona; apparently the Khabir river (Habor) is meant. [C.R.C.]

Archangel. [Angel; Michael.]

Archelaus, son of Herod the Great by Malthake, brought up at Rome with his younger brothers, to whom he will give the largest and most valuable share of the Herodian dominions, including Judaea, Idumaea, and Samaria, with the title of king. The ratification of the will was dependent on the decision of Augustus, to obtain which Archelaus went to Rome. A Jewish embassy was sent to Augustus, who, on his return, sent Archelaus to Rome to deliver them from such rulers as the Herods, and to annex Judaea to the province of Syria. Doubtless the journey of Archelaus, and the embassy sent after him, suggested the similar features in the parable of the pounds (Lk. 19:12ff.). Augustus confirmed the will, but gave Archelaus the title of ethnarch only. The words “did reign” (Mt. 2:22) are used loosely, and need cause no difficulty, for Josephus also speaks of him as king. His reign lasted till a.d. 6, when another deputation from Judaea and Samaria went to Rome to complain of his cruelties. The emperor condemned him, and sentenced him to banishment and death, which he died. [T.K.B.]

Archer. [Arms.]

Archivists, evidently inhabitants of Erech who had been placed as colonists in Samaria (Ezr. 4:6). [C.R.C.]

Arch. (Jos. 16:2). whence Hushai, David’s friend, was called ” the Archite” (2Sam. 15:32, 17:5, 11; 1 Chr. 27:31). The “border of Harach” lay between Bethel and Beth-horon. The name survives at ‘Ain ‘Arik, 2 miles N.E. of the latter, though the Heb. aleph (as in the case of Ashkelon, etc.) becomes a guttural ‘ayin. [C.R.C.]

Archippus, a Christian teacher in Colossae (Col. 4:17), called by St. Paul his “fellow-soldier” (Phm. 2). As this last-quoted epistle is addressed to him jointly with Philemon and Apphia, it seems probable that he was a member of Philemon’s family. There is a legend that he was one of the Seventy, and suffered martyrdom at Chalcis, near Laodicea, but it has no historic weight. [C.R.C.]

Architecture. The first notice of building style in O.T. (Gen. 11:3-9) refers to a tower of
burned brick set in bitumen [Babel, Tower of], describing one of the ziggurat towers of Babylonia. The Phoenicians aided as masons and carpenters (1 K.6.7) in Solomon's Temple and Palace, and the description of these buildings shows that they resembled in style the contemporary architecture of the Phoenicians, Hittites, and Babylonians, being constructed of large squared stones, with roofs and pillars of cedar, and adorned with precious metals and with bas-reliefs, representing symbolic winged animals flanking palm-trees. Ivory seems also to have been often used in decoration (1 K. 10.18,22,39; Am.3.15); lions and oxen were represented as well as the Cherubim (1 K.6.23-36), just as they are in Phoenicia and Babylonia. The temples of this type and style [Cities; Gezer; Lachish; Palace; Palestine] presents few special features of style; houses and town walls being of rudely squared stones of no great size, or of sun-dried bricks [House]. The bronze pillars of the temple had, however, capitals as elaborate as those of Egyptian or Assyrian buildings. These structures already existed when Israel conquered Palestine (Lev.14.34,35; Deut.6.11). Many kings of Judah and of Israel were builders (1 K.15.17,23,16.24,32,22.39; 2 K.12.11,12; 20.22.6; 2 Chr.32.27-30). After the Captivity the temple appears to have been restored in its original form and style (Ezr.3.10). The plan of the temple, the gate-house [Cities; Gezer; Lachish; Palace; Palestine] is purely Gk. The palace of Herod in Gilead built before 176 B.C. [Palestine] presents drafted stones 8 ft. high and 20 ft. long; it is adorned with carved lions; many details are, however, purely Gk. The temples of this type and style throughout Palestine present rock pillars in their porches with Doric and Ionic capitals, triglyphs forming a frieze above, while vine bunches and other designs of native origin give a mixed character to this Jewish style. The art of the later Hasmonaean coins in, similarly, half Greek, half Jewish, and in the temple and similar architecture for his temples, the finely squared masonry being drafted after the Gk. fashion, and the stones being 3 to 6 ft. high, and sometimes 40 ft. in length (Mk.13.2; Lu.21.5). He used the arch in building the great Tyropoeon bridge; and at the Double Gate on S. side of the Jerusalem temple, the gate-house has four flat domes supported on two pillars 6 ft. each in diameter. Their capitals are of simple, semi-Egyptian design, and one dome is adorned with geometrical patterns in low relief, connected by a vine, such as also surrounded the Great Gateway of the temple both at Jerusalem and at Sukkoth in Bashan. At the latter site the pillars are of semi-Corinthian style, like those of the royal cloister at Jerusalem (Josephus, Ant. xi. 5). The vast larger masonry at Ba'albeck, Gerasa, and Râmleh el Khilil (Abraham's tank) near Hebron, differs entirely in the tooling of the stones, and adornment with precious metals and with and in each case related to the great age of Roman architecture (2nd and 3rd cents. A.D.). The latest Jewish buildings—in Greco-Roman style—are the Galilene synagogues, which are also probably not older than 2nd cent. A.D. The Ba'albek masonry is marked with Gk. letters, while that of Herod has Hebrew masons' marks. This Herodian style is illustrated by the plates of de Vogüé's Temple de Jerusalem, and by those giving the details of the S'p an temple by the same authority. [c.r.c.]

**Aretur'us.** The Heb. words 'asher and 'avish, rendered 'Areturus in A.V. of Job 9.38,39.32, as in the Vulg. of the former passage, are now generally believed to be identical, and to represent the constellation Urs Major, known commonly as the Great Bear, or Charles's Wain. Niebuhr (Desc. de l'Arab. p. 101) relates that he met with a Jew at Šaan'â, who identified the Heb. 'asher with the constellation known to the Arabs by the name Umm en-n'ash, or N'ash sin, as a Jew of Bagdad informed him. The four stars in the body of the Bear are named En-n'ash in the tables of Ulugh Bev, those in the tail being called el Benî, "the daughters" (cf. Job 38.32). The ancient versions differ greatly in their renderings. The LXX. render 'asher below the constellation, (unless the text which they had before them had the words in a different order), and 'avish by "Hesperus," the evening star, in Job 38.32. In the former they are followed or supported by the Aram., in the latter by the Vulg. R. David Kimchi and the Talmudists understood 'asher by 'dš nh. The Hebrew "brightness of the Bull, by which they are supposed to indicate the bright star Aldebaran in the Bull's eye. But the greatest difficulty exists in the rendering of the Syriac translators, who give as the equivalent of both 'asher and 'avish the word Iyvîhâ, which is interpreted to signify the bright star Capella in the constellation Auriga, and is so rendered in the Arabic translation of Job. On this point, however, great difference of opinion exists. Bar 'Ali conjectured that Iyvîhâ was either Capella or the constellation Orion; while Bar Bahluh hesitated between Capella, Aldebaran, and a cluster of three stars in the face of Orion. Following theément of the Arabic, Hyde was induced to consider 'asher and 'avish distinct; the former being the Great Bear, and the latter Capella, the brightest star, α, in the constellation Auriga.

**Ard,** a son (Gen.46.21) or grandson (Num. 26.40) of Benjamin. In 1 Chr.8.3 he is called ADDAR (LXX. Ared).

**Ardath** (the field called Ardath): 2 Esd.9.26. Unknown, but suggested to be a corruption of 'Arbath, "desert," indicating the condition of the land (cf. 10.21,22). [R.g.p.]

**Ardites,** descendants of Ard (Num.26.40).

**Ardon,** a son of Caleb ben Hezron by his wife Azubah (Gen.46.16). His descendants are called ARELITES (Num.26.17).

**Aree'li,** a son of Gad (Gen.46.16). His descendants are called ARELITES (Num.26.17).

**Aereopagite,** a member of the court of Areopagus. The title is given to Dionysius (Ac.17.34). [Mars' Hill].

**A'res** (1 Esd.5.10) = Arah, 2.

**A'retas,** a son of Solomon (1 Kg.11.2) or of Harith (Num.5.16) of several kings of the Nabatean Arabs.—1. A contemporary of Antiochus Epiphanes (2 Mac.5.8).—2. "Aretas the king" (2 Cor.11.32), whose ethnarch (governor), at the instance of the Jews (Ac.9.
Aretus I., king of Sparta 369–265 B.C., wrote, at some date between 309 and 300 B.C., to Onias I, high-priest 323–300 B.C., a letter which is quoted in the letter sent by Jonathan Maccabaeus to Onias II, c. 144 B.C. (Mac. 15:7–20:23). [SPARTA.]

Ariosto, a tract of country E. of Jordan, in Bashan, containing 60 great and fortified cities. Ariosto was allotted to the half-tribe of Manasseh, and was taken possession of by Jair, a chief man in that tribe. It afterwards formed one of Solomon's districts, under the charge of an officer whose residence was at Ramoth-gilead (Deut. 3:4, 13; 1 K. 4:13). Ariosto means “stone heaps.” In later times it was called Trachonitis, or “basalt region”; and it is now called the Lejah, from a local term for “basalt.” It is a very remarkable district, S. of Damascus, about 22 miles from N. to S. by 14 from W. to E., and of a regular, almost oval, shape, described as an ocean of basaltic rocks and boulders, tossed about in the wildest confusion, with fissures and crevices in every direction. But this forbidding region has many magnificent, solidly built and of considerable antiquity. More than 100 Gk. texts have been copied here. [C.R.C.]

Ariosto (2K. 15:25). Probably a place. [Areh.] Jarchi regards both words as local. Perhaps Rājib, a village 2 miles S.E. of Shechem. [C.R.C.]

Ariadna, sixth son of Haman (Esth. 9:8).

Ariamethes V. (Philopator), king of Cappadocia 163–130 B.C. For his obedience to Rome he was expelled by Demetrius Soter, 158 B.C., but he was presently restored. Letters were addressed to him from Rome in favour of the Jews, 150 B.C. (1Mac. 15:22).

Aridatha, sixth son of Haman (Esth. 9:8).

Arieh (Heb. haarech = “the lion”). 2K. 15:25. The LXX., in here describing the murder of Pekahiah by Pekah, reads parâ ro’î before both Argo and Arieh, which suggests the translation “they slew him in Samaria, at a castle—a king’s house—near Argo, and near the lion (mounument).”

Arieh. The etymology of the word is uncertain. 1. The name of one of the chief men among the returning exiles (Ezr. 8:16).—2. “The two sons of Ariel of Meholah” (R.V.) whom Beniah smote (2Sam. 23:20; 1 Chr. 11:22; see LXX. In A.V. “ben-like men”; see Moav).—3. Applied to Jerusalem (Is. 29:1, 2). The city, which has been designated Ariel (ver. 1), is then compared to Ariel (ver. 2), perhaps with reference to the blood that would be shed in the coming siege. In this respect the city would be as—4. The Ariel of the Altar (Ezk. 43:15,16, see R.V. marg.), the altar hearth on which the sacrifices were consumed by fire. Hence some translate No. 2 as “the altar hearths of Moab.” It has also been suggested that the Ariels were altar-pillars on which sacred fire was fed by the fat of sacrifices. In the Meshes inscription, line 12, the Aral is something moveable. Fire hearths on the top of monoliths have been found in Abyssinia (Theodore Bent, Sacred City of Ethiopians, 188 b.c.). In the first dynasty of Egypt the serpent, an object of popular worship, appears as a fender around the hearth (Petrie, Relig. of Anc. Egypt, 21, 26). The derivation “lion [lioness] of God” has been suggested. See also Smith, Relig. of Semites, i. 469; Toy, Ezekiel in Sacred Books of O.T. 191; Sayce, Higher Crit. and Mon., 349, 376. [H.L.H.]

Aristoch. I. 1. King of Eflasar, one of the four kings who invaded Palestine in the time of Abraham (Gen. 14:1). In the Babylonian monuments the name Eri-aku, king of Larsa (identified with Sengereh in Lower Babylonia) and contemporary of Hammurabi, frequently occurs.—2. Captain of Nebuchadnezzar’s bodyguard (Dan. 2:14).—3. King of the Elymians or Ilan (Jth. 1:6).—4. [J.R.]

Aristoch, the third son of Haman (Esth. 8:9).

Aristarchus, a Jew (cf. Col. 4:10 with 4:11) of Thessalonica (Acts 20:4, 27, 2), first mentioned at Ephesus as a travelling-companion of St. Paul, and as being dragged into the theatre by the rioters (19:29). He accompanied St. Paul on his departure from Macedonia for Jerusalem, at the close of the third missionary journey (20:4), probably going as delegate for the church of Thessalonica in charge of their share of the contribution to the poor at Jerusalem. He seems to have remained in Judaea during St. Paul’s imprisonment, and may have been some of those who were summoned by the apostle to him (21:23). He embarked with the apostle on his voyage to Rome, and was with him there when St. Paul wrote to the Colossians and to Philemon (Col. 4:10; Ph. 24). For a discussion of “fellow prisoner,” see Lightfoot, Colossians, i.r. [E.R.N.]

Aristobulus.—1. (2Mac. 1:40). A Jew of priestly descent, “teacher” of Pollemy Philometor (180–145 B.C.); identified by Clement of Alexandria and Eusebius with the Hellenistic philosopher of that name. Aristobulus wrote an account of the Pentateuch, in which he contended that the Gk. philosophers derived their teaching from Moses.—2.
ARK, NOAH'S

(Ro.16.10.) St. Paul salutes "them which are of the household of Aristobulus" (τοὺς έκ τῶν Ἀριστοβούλων). Lightfoot (Philippians, p. 175) surmises that this Aristobulus was the grandson of Herod the Great, and friend of Claudius. Assuming that Aristobulus died shortly before the epistle was written, it would be usual for his household, which would contain many Jews, should on passing to the emperor retain their former master's name. See also Sanday and Headlam, Romans, p. 425. Aristobulus is said to have been one of the Seventy, and is mentioned as bishop in Britain. [J.A.D.]

ARK, Noah's. [Noah's.]

ARK of the COVENANT (Ex.25.10-15, 37.1-5). (1) Names. The ark; the holy ark (2 Chr.35.3); ark of the Lord; of God; of the testimony; of the covenant; of the covenant of the Lord. (2) Structure. A chest 2½ cubits long by 1½ broad and deep; of acacia wood, overlaid inside and out with pure gold. A moulding of gold round the top; four gold rings, one at each "foot" or corner, through which were passed two staves of acacia wood overlaid with gold, used in carrying it. These staves were not to be removed (but cf. Num.4.6), and in the temple of Solomon were seen from the Holy Place, but not from the entrance to the Tabernacle (Ex.25.17-21). It probably when the veil was drawn aside for the high-priest to enter the Holy of Holies. The ark was made by Bezaleel (Ex.37.1), after the pattern shown to Moses in the mount (25.9). According to Dent.10.3 Moses made an ark of acacia wood before ascending the mount to receive the second copy of the Decalogue. It was consecrated with the holy anointing oil (Ex.30.26), and stood within the Holy of Holies (40.3). When the tabernacle was taken down, Aaron and his sons covered the ark with the veil of the screen, then a covering of sealskin (R.V.), and over all a cloth of blue (Num.4.5, 6). The carrying of the ark devolved on the Kohathites (4.4). It was a complete coffer, on the top of which was placed a plate or slab of gold of the same length and width as the ark. The thickness is not specified (Ex.25.17-21, 37.6-9). The Heb. term for this covering is rendered "mercy-seat" in E.V.; R.V. marg. "covering"; "propitiatory" is better. (Hamburger, Realencyc. des Judentums, i. 199; "Sühndeckel"). LXX. ἀνάστηρων, occurs also in Heb.9.5, R.V. marg., Gk. "the propitiatory." On the Day of Atonement the high-priest sprinkled the blood of the bullock and of the goat on the mercy-seat (Lev.16.14, 15). On this golden slab were fixed two cherubim, one at each end (Ex.25.18-20, 37.7-9). These were of solid gold, of beaten work, and faced one another, their wings meeting above. This was the throne from which Jehovah would speak with Moses (Num.7.89). (3) Historical Notices. At the river Jordan (Jos.4.7) and the siege of Jericho (6.26). In the midst of the congregation when the Law was read at Ebol and Gerizim (8.33; tabernacle set up at Shiloh, 18:1). In Bethel at the time of the battle between Israel and Benjamin at Gibeon (Judg.20.27). In Shiloh (1 Sam.3.3); taken into the battle with the Philistines at Ebenezer (4.3); captured (4.11), and set up in the house of Dagon at Ashdod (5.2); sent to Gath (5.5) and Ekron (5.11); in the house of Hophni (17.1-5). Returned by the Philistines, on a cart, with a coffer containing presents of golden mice and tumours (6.8). Men of Beth-shemesh smitten for "looking into the ark" (6.19); 20 years in the house of Abinadab at Kirjath-jearim (7.1-2). With Israel at Gibeon during the war with the Philistines (1 Sam.4.3); carried by LXX. X, as has been shown above. (4.8) LXX. has "ephod" for "ark"; cf. 1 Chr.13.3, "We sought not unto it [i.e. the ark] in the days of Saul"). David had it taken thence in a new cart; Uzzah was smitten by God for touching the ark (2 Sam.6.6, 7). Three months in the house of Obed-edom the Gittite (ver.10). Carried by David (16.10) into the city of David (2 Sam.6.12), and put in the tent prepared for it (ver.17). With the army at the siege of Rabbah (11.11). David would not permit the ark to be carried with him when he fled before Absalom (15.24-29). Solomon had it placed in the Holy of Holies in the temple (1 K.6.19, 8.6; 2 Chr.5.7). It was probably removed by Manasseh when he set up the idol (2 Chr.33.7); restored by Josiah (35.3). Its ultimate fate is not known, but it probably perished when the temple was destroyed by Nebuchadnezzar (2 K.25.9). There is a legend that Jeremiah hid the ark with the tabernacle and altar of incense in a cave on mount Nebo (2 Macc.2.4). It is mentioned J.e.3.16; Ps.78.61,132.8; cf. Rev.11.19. There was no ark in the second temple (Josephus, 5 Wars v. 5). (4) Purpose. It was the receptacle for the two tables of the law (Ex.25.21, 40.20; Deut.10.2; cf. 1 K.8.9); and in a special sense the dwelling-place of Jehovah (Ex.25.8; 1 Sam.4.4; 2 Sam.6.2; 1 K.8.12,13). Hence it was more than a symbol of the presence of Jehovah; He was personally present in it. "Let us fetch the ark ... that it may come among us and save us out of the hand of our enemies" (1 Sam.4.3). It was consulted by the Israelites after their defeat by Benja-min at Gibeon (Judg.20.27); Saul was too impatient to consult it before engaging in battle with the Philistines (1 Sam.14.18,19; cf. 1 Chr.13.3). Joshua lamented before it after the defeat at Ai (Jos.7.6-9); and Solomon worshipped before it (1 K.3.15). In form it resembled the movable shrines in which the Egyptians, Babylonians, etc., carried their idols about. According to Heb.9.4, the ark contained, besides the two tables, Aaron's rod
USE OF BATTERING-RAM IN SIEGE. (From a monument in the Nimrud Gallery, Brit. Mus.)

PORTION OF BATTLE-PIECE.

meaning of the Heb. (nadphāq), "to shatter," sufficiently explains its use. (2) Next in age would be the × [Image 0x0] (Judg.20.16; 1 Sam.17.40; 2 Chr.26.14). Besides being a weapon for war, it was used by shepherds, as well as hunters. Its use was fairly general among the Israelites, Egyptians, Persians, and Greeks employed it in warfare. It was made of the sinew of animals, or of leather, sometimes also of the hair of animals plaited together, and was sometimes fastened in length. In the centre it was broader than at the ends. When about to be used, a stone was placed in the centre, and the slinger took hold of the two ends and swung it round over his head a few times, and then let go of one end. (3) Next in order of priority times the × [Image 0x0] (Job 18.14) for two distinct kinds: 1. the × [Image 0x0] (Job 18.14). Another word for spear is rōnah (called "lance") in 1 K.18.28, A.V., and "javelin" in Num.25,7, A.V., while R.V. uses this latter term more suitably for the kīdānōn), but the difference between these two is unknown. That there was a difference is shown from 1 Chr.12.24.34, according to which the men of Naphthali used the former, those of Judah and Gad the latter: the Arab. rumāl is a lance 15 ft. long. The spear consisted of a wooden shaft (2 Sam.21.19), with a bronze (later, iron) point fixed into it (1 Sam.13.19). On account of the bright metal, when polished, it was called a "flame" and "lightning" (see 1 K.18.34, 35.21; 2 Chr.32.1; cf. N. T. 2 Cor.10.4). The other kind of spear was shorter, and was used for throwing (Jo.8.18). This was called kīdānōn. Of similar character was the × [Image 0x0], the root of which word shows that it was something that was thrown; but otherwise we know nothing of its use. It was probably only another name for the former. It was, like the × [Image 0x0], made of iron (1 Sam.13.19; 15.24). It was straight, and sometimes two-edged (Judg.3.16). It was apparently carried in a leather sheath (cf. Ex.15.9; Ezek.21.28-30), and fastened to a girdle on the left-hand side (Ex.32.27), outside the apparel (1 Sam.17.39). It was used for combat with a shield and a sword or a × [Image 0x0] (see 1 Sam.31.4). In 1 Th.3.6 A.V. uses the word × [Image 0x0], probably a curved sword (Pers.). (5) The × [Image 0x0] (gessēth) and × [Image 0x0] (hirēm), carried in a × [Image 0x0] (ashpakh), formed with spear and sword the commonest offensive weapons. Bows were made of wood, and sometimes of copper or bronze (2 Sam.22.35 = Ps.18.34; Job 20.24; see STEEL). Those of wood were probably drawn with the hand (2 K.13.16); for the "steel" ones the foot was used—hence the expression "tread" the bow. At Susa Dr. Morgan found a small model of a bow made of bronze. The string of the bow was made of animal gut, ox or camel; the arrows of light wood, with iron tips—in early times the tips were of stone. The quiver was worn on the back, or left-hand side, or else on the outside of the chariot, according to whether the archer was a foot-soldier or charioteer. Arrows were sometimes poisoned (Job 6.4). At other times, during sieges, burning substances were attached to them (Ps.7.13; Is.50.11). (6) Another offensive weapon, used only at sieges, was the × [Image 0x0] (kar). The root means to "dig," the reference being to the breaches made in the walls of the beleaguered city (Ezk.21.22[27]). It ran on wheels, and, judging from Assyrian sculptures, archers (shielded by a wicker-work screen) stood on it (2 Chr.26.15). The word here used (ḥishshābōn) means simply "contrivance." It was undoubtedly borrowed from Assyria. In A.V. and R.V. this is called × [Image 0x0]—Defensive. (1) The earliest form of defensive armour was the × [Image 0x0]. Of the two kinds mentioned in the Bible, the × [Image 0x0] (usually × [Image 0x0] in A.V.) was the former, and it was used and carried by archers (2 Chr.14.8[7]), where R.V. renders wrongly "buckler" for × [Image 0x0], and "shield" for × [Image 0x0], as well as by the ordinary swordsman (1 Chr.5.18). The larger one, × [Image 0x0] (often × [Image 0x0] in E.V.), covered the whole body, and was accordingly of oblong shape. Another word for it is × [Image 0x0] (saddleonly). The shields were made, at first, of wicker-work (cf. the shields on the battering-rams referred to above), covered with leather, and could therefore be burned (Ezk.39.6). Metal shields were used later (1 K.14.26ff.; 2 Chr.12.8ff.; Na.2.3[4]), both for ornaments and for war; and, judging from Judg.15.16, were sometimes ornamented with bosses. They were smeared with oil, either for the purpose of polishing or against damp. But this "anointing" may, in early days, have had another meaning, according to which the oil made the shield a charm against wounds. The shield was worn on the left arm, to which it was attached by a × [Image 0x0] (or myrrh); for preservation it was kept covered (Is.22.6) when not in actual use. In the metaphorical language of the Bible, the shield generally represents the protection of God (e.g. Ps.3.3, 28.7); but in Ps.47.9 it is applied to earthly rulers, and in Eph.6.16 to faith. The shield is the only piece of defensive armour which was always present and wore it where it was rendered × [Image 0x0] (A.V. × [Image 0x0] (pers.) or × [Image 0x0] (saddle). (2) The × [Image 0x0] (coat-of-mail, × [Image 0x0]), was, it is true, introduced, or one in two or three rare cases—probably from foreign countries—but it was only worn by the king (1 Sam.17.38; 1 K.22.34, marg.: cf. 1 Sam.17.5, where the Philistine giant, Goliath, is said to have worn one). A similar word for it occurs in a passage (Ps.91.4) where it is rendered × [Image 0x0] (A.V. × [Image 0x0] (Pers.)) or × [Image 0x0] (saddle). The R.V. has × [Image 0x0] (coat-of-mail), but in the text "pointed shaft." In Je.46.4 it is rendered × [Image 0x0] (A.V. × [Image 0x0] (Pers.)). In later days, it is possible that, owing to Assyrian example, breast-plates, as well as (3) × [Image 0x0] (armour), were more widely used. Greaves are said to have been part of Goliath's armour (1 Sam.17.6). They covered the shin, while the × [Image 0x0] (leather boot) served as a protection to the feet. Though this latter hardly comes under defensive armour, it may be here mentioned, as it was only worn by soldiers, and was common among the Assyrian soldier (cf. Is.9.4). The × [Image 0x0] was ancient, being mentioned in the Amarna tablets. (4) Like the breast-plate, the × [Image 0x0] (gōbā) was, in early days, worn only by those in high estate (1 Sam.17.38)—it was of bronze. Judging from the inscriptions, it is possible that the Israelite soldiers wore leather or felt caps; for the inscriptions present to us Hittite and Syrian, as well as Egyptian, warriors wit,
a head-protection, which represents a cap of this kind still worn in Syria. [W.O.E.O.]

Army. 1. Hebrew Army. From the time the Israelites entered the land of Canaan until the establishment of the kingdom, little progress was made in military affairs; their wars resembled border forays. No general muster was made at this period; but the combatants were summoned on the spur of the moment. With the kings arose the custom of maintaining a body-guard, which formed the nucleus of a standing army. Thus Saul had a band of 3,000 select warriors (1Sam. 13.2, 14.52, 24.2). David further organized a national militia, divided into twelve regiments under their respective officers, each of which was called out for one month in the year (1Chron. 27.1); in active service he appointed a commander-in-chief (1Sam. 14.50). Riber- to the army had consisted entirely of infantry (4.10,15.4), the use of horses being restrained by divine command (Deut.17.16); but as the foreign relations of the kingdoms extended, much importance was attached to them for use in chariots. David reserved a hundred chariots from the spoil of the Syrians (2Sam. 8). He did not appear in the system established by him was maintained by the kings of Judah; but in Israel the proximity of the hostile kingdom of Syria necessitated the maintenance of a standing army. Occasional reference is made to war-chariots (2K.8.21); but in Hezekiah's reign the Jews were on the side of Egypt for horses and chariots (18.23,24; Is.31.1). With regard to the arrangement and manoeuvring of the army in the field, we know but little. A division into three bodies is frequently mentioned (Judg.7,16,9,43; 1Sam.11.11; 2Sam.18.2). Jehoshaphat divided his army into five bodies, apparently retaining, however, the threefold principle of division, the heavy- armed troops of Judah being considered as the proper army, and the two divisions of light-armed of the tribe of Benjamin as an appendix (2Chron.17.14-18). The maintenance and equipment of the soldiers at the public expense was fixed by law, and there was a standing army. It is doubtful whether the soldier ever received pay even under the kings (the only mention of pay applies to mercenaries, 2Chron.25.6); but he was maintained, while on active service, and provided with arms (1K.4.27,10.16,17; 2Chron.26.14). The numerical strength of the Hebrew army is doubtful, the numbers, as given in the text, being manifestly incorrect. —II. Roman Army. The Roman army was divided into legions, the number varying considerably, each under six tribuni (chief captains, Ar.21.31), who commanded by turns. The legion was subdivided into ten cohorts ("band," Ar.10.1), the cohort into three maniples, and the maniple into two centuries, containing originally 100 men, as the name implies, but subsequently from 50 to 100 men, according to the strength of the legion. There were thus 600 soldiers in a legion, each under the command of a centurion (Ar.10.1,22; Mt.8.27,54). In addition to the legionario cohorts, independent cohorts of volunteers served under the Roman standards. One of these cohorts was named the Italian (Ac.10.1), as consisting of volunteers from Italy. The cohort named "Augustus" (Ac.27.1) may have consisted of volunteers from Sebaste. Others, however, think that it was a cohorts Augusti, similar to the legio Augusta. The head-quarters of the Roman forces in Judea were at Caesarea.

Arna" (2Esd.1.2) occupies the place of Zerubbabel, in the genealogy of Ezra.

Arnan. In the received Heb. text "the sons of Arnan" are mentioned in the genealogy of Zerubbabel (1Chron.2.21). According to the LXX., Arnan was apparently the son of Raphaiah.

Arnon, the river or torrent which formed the boundary between Moab and the Amorites (Num.21.13,14,21,26,28), and afterwards between Moab and Israel (Deut.2:21,36,3:8,12,16.4,18; Jos.12.1,2,13.9,16; Judg.11.18,15,22,26). There can be no doubt that Wady el Mofjeb is the Arnon. Its principal source is near Qatrinch on the Hafl route. It flows W. in a deep gorge, on the N. bank of which is the ruin 'Ar'Air. [AERON, r.] The width of the gorge is about 2 miles; the descent to the river is precipitous. The stream is some 40 yds. in width, with a few ocelanders and willows on the margin, and grass in places. [C.R.C.]

Arod (= Arodi. Gen.48.16), a son of Gad and ancestor of the Arodites (Num.25.17).

Aroer (bare.-).—1. A city by the brink, or on the bank of, or by the torrent Arnon, the southern point of the territory of Sihon, king of the Amorites, and afterwards of the tribe of Reuben (Deut.2:36,3.12,4.48; Jos.12.2,13.9,16; Judg.11.25; 2K.10.33; 1Chron.5.8; Jer.48.16). Burckhardt found ruins with the name 'Ar'Air on the old Roman road, upon the very edge of the precipitous N. bank of Wady el Mofjeb. [ARONOS.] Mecha of Moab on his stone (at Dibon) says in (9th c. B.C.), "I built Aroer, and I made the steps at Arnon." It is probably intended in Num.32.34.—2. Aroer, facing Rabbâh (Rahobah of Ammon), a town of Gad (Jos.13.25; 14.16). According to Judges 11.13; 1Sam.33, now unknown.—3. Aroer, in Is.17.2, if a place at all (see LXX.), is probably 'Ar'Air in Bashan, 9 miles S.E. of Ashtaroth. It is noticed in the Amarna letters (Brit. Mus. 64) with the latter, in 15th c. B.C.—4. A town in Judah, named only in 1Sam.30.28. Robinson identified it as the ruin 'Ar'arzah, 12 miles E. of Beer-sheba. [C.R.C.]

Aro'vite. Hotom, the Arovite was the father of two of David's captains (1Chron.11.44). [AEROX.]

Ar'am. Thirty-two "sons of Ar'am" were among those who returned with Zerubbabel (1Esd.5.10). Probably a mistake for Asom (1Esd.9.133; cf. Ez.10.33), and therefore representing Hasmu (Ezr.2.19; Neh.7.22).

Arp'ad or Arphad (Is.36.19,37.13; 49.63), a city in Syria. It is named with Hamath, as conquered by Assyrians (2K.18.11,19.1); Is.39.1. Now Tell Ar'fud, 13 miles N.W. of Aleppo. It is noticed in an Amarna letter (Berlin 158) in 15th cent. B.C. It was attacked by Assyrians in 806 and 754 B.C., and fell in 730 B.C. [C.R.C.]
ASSYRIAN WAR-ENGINE.
(From Botta, pl. 160.)

ASSYRIAN CHARIOT WITH QUIVERS.

COAT OF MAIL.

A "SHAYRETANA" OF THE GUARD.

BATTERING-RAM.

p. 60]
ARPHAXAD

Arphaxad (ʼarpakshahad).—1. Son of Shem and ancestor of Eber (Gen.10.22, 24, 11.10).
Schrader has suggested that the word means "the coast of the Chaldeans," and Hommel at one time regarded it as being an Egyptian form of Ur of the Chaldees (Ur-pa-Kezah).
Ewald rendered it "the stronghold of the Chaldees," and the name has also been compared with Arrapachitis (Arraphka) in N. Assyria.—2. A king "who reigned over the Medes in Ecbatana, and strengthened the city by vast fortifications" (1 Th.1.11). He is often identified with Darius, the founder of Ecbatana (609-646 B.C.).
Niebuhr has suggested Asytyzes (584-549 B.C.), which would suit much better. As, however, this king was captured by Cyrus, he could not have put to death by Nebuchadnezzar. Both identifications are veiy uncertain. [T.G.P.]

APROWS. [Arms.]

Arsaces VI., a Parthian king, better known as Mithridates I. He is called king of Persia and Media (1Mac.14.2), the two chief provinces of his kingdom giving their name to the whole. His general defeated the army of Demetrius I at Issus, and brought him to Mithridates, who treated him well, but kept him a prisoner till his own death, 130 B.C. Arsaces was the name of the first king, but was assumed by all his successors. [C.D.]

Ararseth (2 Esd.13.45), explained by Strabo as a corruption of ἐρασθῆς, "another land." Cf. ver. 46. [R.C.P.]

Artaxerxes (Heb. Artakhshathâ, Akkhâm. Pers. Artaxštâ; Ass. Inscrip. Artaxshar, Artâ∑ssu, Arâ∑ksstû; fr. Akkaem. Pers. arta [Skt. râ∑ta], Avest. arêta, ereta, "high," "true," and khshatram, "sovereignty"). There is only one king of this name mentioned in the Bible, Artaxerxes I. (465-424 B.C.,): Macedon (Longimanaus). Ez. 4.6-23 inclusive is an early addition to the book, probably a marginal note (Lord A. Hervey, Expositor, July 1893), just as Ez. 2 is extracted from Ne. 7.6-73. This removes the difficulty which led Josephus (Ant. ii. i., 2) wrongly to identify Artaxerxes I with the Persian king Xerxes I (358-323 B.C.), according to the epitome of Strabo by the Pair, Christologie, ii. 143, etc.: Schrader (Riehm's Handwörterbuch, s.v.): Sayce, Ezra, Nehemiah, and Esther; Oetli (Strack u. Zöckler's Kgl. Komma. [PERSIANS.] [W.S.T.G.T.]

Artemas, a companion of St. Paul (Tit.3.12). According to tradition he was bishop of Lystra.

Arts. The Hebrews do not seem to have been naturally an artistic people. Most of their works of art were either imported, or made by foreign workmen. The stern spirituality of the Heb. religion, however far the practice fell short, and the forbidding of "graven images" by lawyer and prophet, contributed undoubtedly to repress a free development of art. Yet it must be remembered that the arts in themselves were recognized as a gift of the Spirit of God (Ex.31.1-6). The period of the judges was certainly not favourable to the growth of art. Although the "grave stones" imaged by lawyer and prophet was known to the Israelites, no trace of building on any scale of splendour is found before the period of the monarchy, and then it is obviously an imported art. The temple and other buildings of Solomon were Phoenician in design, and partly also in materials. The decorations—e.g. the gold and ivory plating, the "hollow pillars," the "hollow workmen" (1 K.7.24; 2 K.2.20)—are characteristically Tyrian. At a later period the prophets allude with disapproval to the growing splendour of domestic architecture. (Is.5.9; Jer.22.14; Am.6.4; Hag.1.4.) Engineering works are attributed to several of the kings, notably to Uzziah (2 Chr. 26), Ahaz (Is. 22), and Hezekiah (2 K.20.19). These were chiefly concerned with fortification, and the conveyance and storage of water. Sculpture was mostly of foreign importation—e.g. the lavers in Solomon's temple (1 K.7.40)—though apparently native artists had fashioned the cherubim for the tabernacle, and Aaron at Sinai had shown a too-ready skill in making the golden calf. The prophets mention sculpture to denounce it as connected with idolatry. Its methods are graphically described in Is.44.12-17. Cf. the imitation of this passage in Wis.13.10-16. Painting is chiefly connected in O.T. with the service of idols or demons (see Ezek. 13.14). [COLOURS.] The contrast which the art and civilization of neighbouring nations must have presented to the simpler life of the Hebrews is well seen in such passages as the famous description of Tyre, Ezk.27. Camb. Companion to the Bible (1893), art. on "The Arts, Trade, and Labour of the O.T.

Aruboth' (R.V. Aruboth), the third of Solomon's districts (1 K.4.10). It included Sochoh, and Hepher in the Hebron mountains, and was probably a district named from Arab. [C.R.C.]

Arumah, a place apparently in the neighbourhood of Shechem, at which Abimelech resided (Judg.9.41). Perhaps el 'Ormeh, 6 miles S.E. of Shechem. [C.R.C.]

Arvad, Aradus, a town on a small rocky island off the coast of Phoenicia, 13 miles N.W. of the mouth of the river Eleutherus. The Arvadites were Canaanites (Gen.10.18), and great sailors (Ezk.27.8, 11), who traded to the isles of Chanaan andSimyra as early as the 16th cent. B.C. as taken by Tholomius III. In the Amarna letters, a century later, the ships of Arida are noticed; they joined with the Amorites in attacking Tyre (Berlin 51, Brit. Mus. 28, 44); and c. 1130 B.C. Tiglath-pileser I. embarked on a ship of Arvad to hunt dolphins. The second (or third) monarch of this name, in 732, received tribute from Matabar of Arvad, and Sennacherib, 30 years later, from another ruler of the island. Assur-bani-pal even married an Arvadite princess. The island is now called or Kuwad. [C.R.C.]

Arza, a short distance from the house of Tirzah, where Abner was slain (2 Sam. 3.27). Third king of Judah (c. 927-856 B.C.), was conspicuous for his earnestness in supporting the worship of God. In his zeal against immor-
ality and idolatrous rites he did not spare his grandmother Maachah, who occupied the special dignity of "king's mother," to which grace was accorded in the Jewish court. Asa burnt the symbol of her religion (1K. 15.13), threw its ashes into the brook Kidron, and then deposed Maachah from her dignity. He also placed in the temple certain gifts which his father had dedicated, and renewed the great altar which the idolatrous priests apparently had desecrated (2Ch. 15.8). Besides this, he fortified cities on his frontiers, and raised an army, amounting, according to 2Ch. 14.8, to 580,000 men, perhaps an error in figures. Thus Asa's reign marks the return of Judah to a consciousness of the high destiny to which God had called her. The good effects of this were visible in the enthusiastic resistance offered by the people to Zerah, an invader who is called a Cushite or Ethiopian. [Zerah.] At the head of an enormous host ("a thousand thousand," the expression probably meaning only that the host was too great to number), he attacked Mareshah or Moladah, W. of the Amalekite, near later Eleutheropolis (2Ch. 14.9). There he was utterly defeated, and driven back with immense loss to Gerar. The peace which followed was broken by the attempt of Baasha of Israel to fortify Ramah as a frontier stronghold (1K. 15.17). To stop this Asa purchased the mountain land 1., king of Damascus, king of large payment of treasure taken from the temple and palace, forced Baasha to abandon his purpose, and destroyed the works which he had begun at Ramah. The "pit" which he sunk at Mizpeh was famous in Jeremiah's time (41.9). The chronicler tells us that his alliance with Damascus was censured by the prophets Hanani, who seems even to have excited some discontent in Jerusalem, for which he was imprisoned, and suffered other punishments (2Ch. 16.16). In his old age Asa suffered from gout, and "he sought not to the Lord, but to the physicians." He died greatly honored and revered. Ancestor of Berechiah the Levite who presided in one of the seven lobbies of the Netophathites after the return from Babylon (1Ch. 9.16).

Asadias, an ancestor of Baruch (Ba.1.1). The name is probably the same as Hasadiah (1Ch. 3.20).

Asael, an ancestor of Tobit (Tob. 1.11); perhaps the same as Jazel or Iaziel, one of the four sons of Naphtali (Gen. 46.24; 1Ch. 7.13).

Asheal. - 1. Nephew of David and youngest son of his sister Zeruiah. He was celebrated for his swiftness of foot, a gift much valued in ancient times, and was one of David's 30 heroes (2Sa. 23). When fighting under his brother Joab against Ishbosheth's army at Gibeon, he pursued Abner, who, after vainly warning him to desist, was obliged to kill him in self-defense (2Sa. 2.21f.). [Abner.] - 2. One of the Levites in the reign of Jehoshaphat, who went throughout the cities of Judah to instruct the people in the knowledge of the law (2Ch. 17.8). - 3. A Levite in the reign of Hezekiah, who had charge of the tithes and dedicated things in the temple under Conaniah and Shimez (2Ch. 31.11). - 4. A priest, father of Jonathan in the time of Ezra (Ezr. 10.15).

ASCENSION

Asahiah, a servant of king Josiah, one of those sent by him to inquire of Jehovah respecting the book of the law which Hilkiah found (2K. 22.12ff.; 1Ch. 3.20, as R.V. in both passages).

Asaiah. - 1. One of the Simeonite princes who drove out the Hamite shepherds from Dedor (1Ch. 4.36). - 2. A Merarite (1Ch. 6.30) who took part in bringing the ark from the house of Obed-edom to the city of David (1Ch. 15.13), thereby fitting the "Shilonites," who with his family dwelt in Jerusalem after the return from Babylon (1Ch. 9.5). In Ne. 11.5 he is called Maaseiah, and his descent is there traced from Shiloh, explained by the Targum of R. Joseph on 1Ch. as a patricymonic from Shelah, son of Judah, attributed to the "dove or inhabitant of Shiloh." - 4. (1Ch. 3.20) [Asaiah].

Asana (1Esdr. 5.31) = Asaiah.

Asaph. - 1. A Levite (1Ch. 6.39, 15.17), to whom are attributed Ps. 50 and 73-83; one of those whom David set over the service of song in the house of the Lord (Lev. 21.16; cf. 1Ch. 6.31), was known later as "a seer" (2Ch. 29.30). It is hardly possible that he was one of the sons of Asaph" (1Ch. 25.1; 2Ch. 20.14; Ezr. 2.21; Ne. 7.41). - 2. Recorder or chronicler to Hezekiah and father of Isaiah (2K. 18.15,37; Is. 36.3,22). - 3. The keeper of the king's forest whom Artaxerxes ordered to supply Nehemiah with timber (Ne. 2.8). - 4. Ancestor of Mattaniah, the conductor of the temple choir after the return from Babylon (1Ch. 9.15; Ne. 11.17-21. - 5. (1Ch. 26.1) = Abiaiah; cf. A.V. marg. and 9.19. [C.R.D.B.]

Asareel, a son of Jehallelel in the genealogy of Judah (1Ch. 4.16).

Asarelah, son of Asaph, head of the seventh ward of the "princes of the musicians who were set apart by David to "prophecy with harps and with psALTERS and with cymbals" (1Ch. 25.2; = Jesharelah, ver. 14).

Ascalon. [AsHELON].

Ascension. (1) The position in the gospels of the Ascension is obscure than might have been expected. The text ending contained it cannot be certainly affirmed or denied. St. Matthew's gospel cannot be fairly said to omit the Ascension, for it does not carry the reader so far, stopping short with the meeting in Galilee (Swete, Apostles' Creed, p. 65). St. Luke contains interpolations. "When these have been removed, the text runs: "And it came to pass while He blessed them, He parted from them, and was carried up into heaven" (R.V.). Some uncertainty remains about the last six words. Even if they ought to be omitted, the apostles' return to Jerusalem "with great joy" seems to imply Ascension—a parting from them different in character from any previous experiences (cf. Plummer on S. Luke). Westcott and Hort consider that the Ascension belongs rather to the history of the Church than to the gospel, and therefore begins the Acts (Notes on Select Readings, p. 242, but see Chase in Camb., Thel., Essays, 397, and Syr.-Lat. Text of Gospels, p. 130). On the other hand, the present ending of St. Mark, which "belongs at the latest to the earlier sub-apostolic age" (Swete, Apostles' Creed, p. 66; see Conybeare, Expositor,
ASCENSION

sr. iv. vol. viii. for ascription to Aristion; Nestle, Textual Crit. Gk. Text, 266), contains it in the plainest terms. The Fourth Gospel contains significant allusions (Jn.6.62,20.17). In the epistles see Eph.4.8-10; 1Tim.3.16; 1Pe.3.21-22. The analogy of the Ep. to the Hebrews suggests visible entrance into the heavenly place. Except, however, in this epistle, the Ascension is not presented as final preeminence in N.T., being subordinated to, perhaps assumed as included in, the Resurrection, of which it is the sequel and consummation (but cf. Acts2.34). "On the whole it may be said that while the epistles give great preeminence to the thought of our Lord's exaltation, they do not point to the process by which that exaltation was achieved; nevertheless, they express themselves precisely as they would do if the fact of the visible Ascension were tacitly assumed as known in the general first principles of Christian conviction" (Our Lord's Resurrection [Oxford Library], p. 193). (2) As to the essential necessity of the Ascension, a distinction must be drawn between Christ's spiritual exaltation and the visible process of withdrawal from the earth. (i) The latter was not necessary for His sake, (ii) but for the disciples' sake it was very necessary indeed, as terminating the period of manifestation, as suggesting transcendence of earthly conditions and exaltation to heavenly glory. The visible Ascension was not created by belief in His exaltation, but conversely, belief in the latter was strengthened by sight of the former. (iii) It was not only necessary for apostolic faith, it is necessary still. "A gifted critic of our time says he can well imagine a Christian of such a type that for them, at any rate, a physical journey up through clouds is a necessary medium for belief in the abstract idea. May we not fairly ask whether in this case it is not also conceivable that the Almighty, Who is well aware of this uncultivated multitude and their prejudices, simply has not provided that symbolic medium for conveyance of the idea which the critic himself acknowledges to be necessary for them?" (3) The difficulties presented to modern thought by the physical Ascension are: (i) Its relation to the laws of Nature. How could a natural body be lifted above earth's gravitation? But Christ's Resurrection Body was a Body Spiritualized, of Whose capacities and limitations we can know practically nothing. What the apostles saw was a temporary form of visible self-manifestation. (ii) Its localization of the spiritual world. But such localization is a necessity to our complex existence. While it is true that heavenly bodies cannot be seen over our heads than under our feet, it is also true that our half-material state necessitates symbolical expressions; nor is it completely adequate to say that heaven is a condition rather than a place. So long as language describes the dead as the departed it must be justifiable to represent the exalted as the ascended. We are compelled by our constitution to utterances not necessarily conforming with metaphysical exactness. (4) The dogmatic value of the Ascension, as expressing Christ's exaltation and heavenly priesthood. This we owe chiefly to the Ep. to the Hebrews. The priestly functions of Christ are discharged in the heavenly sphere (Heb.9.24,10.12,4.14; "passed through the heavens"). Christ, by His sacrificial death, obtains entrance into the Eternal Sanctuary; that entrance being the consummation of His great redemptive act. It is an abiding presence in the Eternal Sanctuary, and permanently endures. Thus the Ascension realizes what the symbolism of the Jewish sanctuary shadowed and suggested. For St. Luke's text, cf. Graefe in Studien und Kritiken for 1888 and 1896. For the Ascension, cf. B. Weiss, Life of Christ; Swete, Appearances; Liddon, sermon, Our Lord's Ascension the Church's Gaudium. Miligan, Ascension and Heavenly Priesthood; Lacey, The History of Christ, pp. 131-149.

Ase'as (1 Esd.9.32) = Ishihja'ah.
Asebebia (1 Esd.8.47), called Esebrias (ver. 54) = Sherebeibah.
Ase'biah (1 Esd.8.49), called Assanias (ver. 54) = Hashanah.
Asenath (Asenath, 'Assereth, 'Asereth), daughter of Poti-pherah, priest of On (Gen.41.45,50), wife of Joseph and mother of his two sons, Manasseh and Ephraim. No satisfactory explanation has been given of this Egyptian name. The last syllable has been connected with the name of the goddess Neith — she who belongs to Neith — but Neith is not a divinity of On. Others have recognized the name Semit, or the fem. form, Asetif, of the masc. Asen.

A'ser—1. (Tob.1.2); probably = Hazer,8.2.

—2. (Lk.2.36; Rev.7.6) = Asier.
A'serer (1 Esd.5.32) = Sisera, 2.
A'sh (Heb. As'hab) occurs only in Is.44.14 as one of the trees out of the wood of which idols were carved. It is impossible to determine what tree is denoted by 'oren. The LXX. and the Vulg. understand some species of pine.
A'shan', a city in the low country of Judah (Jos.15.42). In Jos.19.7 and 1Chr.4.32 it is given to Simeon, and in 1Chr.6.59 again mentioned as a city of the tribe of Judah for Asin in Jos.21.16. The notice (Jos.19.7) which Remmon suggests the ruin 'Asetelah, 3½ miles from Remmon.
[A.C.
A'shbe'a, House of, a proper name, but whether of a person or place is uncertain (1Chr.4.21). Possibly the Aramaic form for Sheba (Jos.19.3). The family made fine linen. [Sheba].
A'shbel', second son of Benjamin and ancestor of the Ashbelites (Gen.46.21; Num.26.35; 1Chr.8.1). [Jediael, 1.4]
A'shchenaz (rChr.1.6; 1Chr.5.27) = Ash'kenaz.
A'shdo'd (fortified), one of the five cities of the Philistine princes. It is now the mud village Esdud, on S. slope of a great sand-dune, 2½ miles from the sea-shore, and 8 miles N.E. of Ashkelon. On the S.W. a fine khān lies in ruins, near a marsh which is of considerable size in spring. Gardens surround the village. [Smyth, W. P. L., ii. pp. 409, 422.]
In later times it is called Azotus (Acts5.8 ex. 10.84; Ac.8.40). Though claimed by Judah (Jos.15.47), it remained a Philistine town (1Sam.6.17), probably till the time of Solomon. The inhabitants spoke a peculiar dialect even
in Nehemiah's time (Ne.13.23,24). Isaiah notices its capture by a Tartan, or general, sent by Sargon (20.1), which happened in 711 B.C. A "remnant" of its old population remained in 607 B.C. (1:25,26), and in the early part of the 8th cent. it was a prosperous Philistine town (Am.1.8.3.9; see Zeph.2.4) as well as c. 530 B.C. (Zech.9.1). Judas Maccabeus destroyed its idols c. 162 B.C., and Simon his brother burned its temple of Dagon in 147 B.C. The monumental notices include the capture of Ashdod by Tiglath-pileser III. c. 734 B.C., the capture by Sargon in 711, and by Sennacherib in 702 B.C. The latter mentions Mitinti as its king. Mitinti had been established after the defeat of Yavan, an usurper of the throne of Azuri and of his brother Ahmiti, established by Sargon. Yavan being betrayed by the Pharaoh to whom he fled. A Mitinti (in 734 B.C.) was also king of Ashkelon. In 680 B.C. Esar-haddon received tribute from Ashdod, a kingdom of Ashdod.

Ashdodites, the inhabitants of Ashdod (Ne.4.7); called Ashdothites in Jos.13.3.

Ashdod-pisgah (the streams of Pisgah; Dent.3.17,4.14; Jos.12.3,13.20), the stream immediately N. of the ridge of Nebi. There are two springs (Hvwy Mva) noticed by St. Selmon (c. 7.30; cf. Num.26.43,47). In the wilderness, under Pajiel (Num.20.12-27), the tribes marched on the N. flank. Its numbers increased (1:14,26,47), but it was not one of the strongest tribes. The surveyor selected from it was Ahilud (34.27), and the spy was Sethor (13.5). In the blessing of Jacob we read, "Asher, his bread shall be fat" (Gen.49.20, R.V. marg.), and the blessing of Moses, which refers to the meaning of the name, predicts that Asher shall "thip his foot in oil" (Deut.33.24), no doubt in allusion to the olive groves on the low hills of the assigned lot. The tribe stood on Ebal to respond to the curses of the law (27.13). Asher did not join in Barak's revolt, but "sat still" at the "haven of the sea, and abode in his creeks" (R.V. Judg.5.17). The tribe was probably weak, and had not succeeded in conquering the Phoenician seaports of Arco, Zidon, etc. (1.11). It, however, aided Gideon (6.13,7.21). It formed Solomon's ninth district (1K.4.16), but is omitted from the account of David's census (1Ch.27.16-22), though the warriors of Asher are elsewhere noticed in his time (7.40,12.36). Some of the tribe came to Hezekiah's passersby (2Ch.30.11), and the name occurs in Ezekiel (48.2,13). In N.T. the prophets mention Asher as a descendant of Aser (Lk.2.30), and the name of the tribe appears last in Rev.7.6. The Tribal List included some 300 square miles of shore plains and low hills W. of Naphtali (Jos.19.34) and N. of Manasseh (17.16,17), and this included fertile and well-watered corn lands, and hills fit for the olive, fig, and vine. The W. border was the sea, to Carmel westwards (19.26), including "the region of Aschish" (R.V. ver. 29), but not the cities of Accho, Tyre, Hosah, and Sidon, held by the Canaanites. Carmel was apparently the S. boundary; for though Dor belonged to Asher, it was held by Manasseh (17.11), and Josephus (5 Ant. I. 23) includes Dor in the latter tribe, and speaks of Asher as holding the "valley" over against Sidon. The N. border was probably extended after David's conquests in Syria. The E. border marched with Naphtali and with Zebulun, running S. to Nekej, and thence W. to Beth-Dagon (19.27). Apparently the shore S. of Accho was claimed by Asher to the foot of the Carmel promontory, and it has been thought that the "haven" (Judg.5.17, R.V.) of Asher was the later town of Hafia (at S. end of the bay of Accho), which is mentioned in the Talmod (Tal. Bab. Sabbath 26 a).

Asher (Jos.17.7), a place on the border of Manasseh mentioned with Micmetha. The description is not easily followed, as these ancient names have not survived. The LXX. (Vat. MS.) has quite another reading: "And the border of the sons of Manasseh was Delanath [Δηλανᾶ] which is opposite the sons of Asher, and placed on the border on Lumin [Heb. right
ASHERA

hand, or S.) and Jassib, on the spring Taphthoth ('Ehuv. En-tappuah). Anath may be connected with Anawth (Josephus, 3 Wars iii. 5), on the border of Samaria, placed by the Onomasticon 15 Roman miles S. of Shechem; now the spring 'Anna, near Borkeos (Beriq), with which it is noticed. The site of Jassib (representing Heb. Ysbeih [A. Merkaba, Ysbele, Ysbele]) would thus be Yastif, a village 2 miles N.W. of Beriq. It has a fine spring, which may be the En-tappuah, or "spring of apples." This line agrees with the situation of the river Kanah, near Tappuah (Jos.16.8), for Wady Quda rises at Yastif. It also agrees with the supposition that Micmethah was the Mukbahah Plain. The name Asher does not occur anywhere near. [G.R.C.]

Asherah', and plur. Asherim (three times Asheroth), the original word retained by K.V., which A.V., following LXX. and Vulg., translates grove, groves. It is usually defined by the article, and in the great majority of cases is recognized as a by-name or surname, stake or pole, erected in the vicinity of an altar, and often occurs in conjunction with a stone pillar orobelisk (maggelitha). It was a feature of the Canaanite worship, which the Israelites were commanded to uproot (Ex.34.13; Deut. 16.21; Judg.6.25), but to which they largely conformed (2Ki.17.10; 15.9; 18.4; 24.4; 25.14), even in connexion with the temple at Jerusalem (2K.23.6). What was its original intention is not clear, whether merely to indicate a sacred locality, or more probably to be a symbol of the deity that was worshipped, as, e.g., in Judg.6.25, where one is found beside an altar of Baal. On some have supposed that there was a Canaanite goddess Ashera, of which the post was the symbol; and some countenance is given to this by the manner in which later writers, recognizing the idolatrous nature of the object, speak of it (2K.21.7; cf. ver. 3.23.7) as of an idol. The inscriptions and monuments can scarcely be said to give conclusive evidence of the existence of a goddess so named. Asheroth is spelled differently. [J.R.]

Asherites, descendants of Asher, and members of his tribe (Judg.1.32).

Ashes. The ashes on the altar of burnt-offering were gathered into a cavity in its surface (1Ki.4.3; 2Ch.31.22). Some have supposed that there was a Canaanite goddess, Ashtaroth, of which the post was the symbol; and some countenance is given to this by the manner in which later writers, recognizing the idolatrous nature of the object, speak of it (2K.21.7; cf. ver. 3.23.7) as of an idol. The inscriptions and monuments can scarcely be said to give conclusive evidence of the existence of a goddess so named. Asheroth is spelled differently. [J.R.]

Ashima', a deity whose worship was introduced into Samaria by the Hamathite colonists whom the Assyrian king settled there (2K.17.30). Nothing further is known about him. [A.H.S.]

Ashkelon, Ashkelon, Ascalon. One of the five cities of the Philistine lords, now the ruined fortress 'Ascalon' on low cliffs with a small port, between Ashdod and Gaza; inhabited by Esbalonites (Jos.13.3). It is not mentioned as belonging to Judah (see Jos.15.45-47) even in Judges (1.18), according to the LXX., reading, "took not," which agrees with ver. 19. It was a Philistine city in the time of Samson (Judg.14.19), and of Samuel (1Sam.6.17) and David (2Sam.1.20). It still had a Philistine king in 6th cent. b.c. (Je.25.20; Am.1.8; see Zeph.2.4; Zech.9.5). It surrendered to Jonathan the Hasmonean in 142 b.c. (1Mace.10.11). The Jerusalem Talmud (Shebith vi. 1) places it just outside Judaea. Herod the Great adorned the city (1 Wars xxi. 11), which continued to be famous down to 1192 A.D., when the walls, rebuilt by Richard Lionheart, were destroyed by Saladin. They still lie in ruins; the interior is covered partly with sand, partly with gardens. The lake of the Philistine goddess Derceto (Didymus Sic. ii. 1) was probably at El Furah (the hollow), just N. of the walls. Semitic rulers of Askalon are recorded in the Amarna tablets as subject to Egypt c. 1380 B.C., but the place was taken by the Abiri, or gave tribute (Ber. 109, 110, 121, 122; 2Sam.5.23). It was recaptured about 150 years later by Ramaeous II. In 734 B.C. Mitinti of Ashkelon rebelled against Tiglath-pileser III., but died, leaving a son, Rukhibi, who submitted to Assyria. In 702 B.C. Sennacherib took the city, and sent its king Zulka with his family prisoners to Assyria, establishing Samudari, son of Rukhibi, in his stead. A seal found near Ascalon represents a man-fish. The kings of the 15th cent. B.C. bore the names Dagon-takala, and Yamir-Dagon, showing the worship of this god by a Semitic race. [Dagon.]

Ashkenaz', eldest son of Gomer (Gen.10.3). In Je.51.27 Ashchenaz is coupled with Ararat and Minni. Hence the name has been identified with that of the Asguz (identified by Winckler with the classical Scythians), who together with the Medes and Cimmerians (or Gomer) attacked Assyria in the reign of Esar-haddon. Others see in it the Askau of the Ascanius, chief of Ascani in Asia Minor. [A.H.S.]

Ashnah', the name of two cities, both in the sephela of Judah: (1) named between Zoreah and Zanoah (Jos.15.33); and (2) between Jiphthah and Nebiz (Jos.15.13). Neither of the two is known. [G.R.C.]

Ashpenaz, the name of the eunuchs of Nebuchadnezzar (Dan.1.3). [A.H.S.]

Ashriel, properly Asriel' (1Chr.7.14).

Ashtaroth. [Asheroth Karna'im.]

Ashterathite, an inhabitant of Ashteroth. Uzzia the Ashterathite was one of David's mighty men (1Chr.11.44).

Ashteroth Karna'im (the towered Ashlodesh), one of the capitals of Og, king of Bashan, a city of Rehobeh ("giants") in Abraham's time (Gen.14.5), otherwise Ashteroth only (Deut.1.4; Jos.9.10,12.4); given to Manasseh (Jos.13.31), and to the Levites (1Chr. 6.71). It is called later Carnaim, or Carnion (1Mac.5.26; 2Mac.12.21,26), and was near the brook "havveh" (1Mac.5.24), which the Jews of Lake Baheus destroyed (1Mac.5.12-24). Eusebius (Onomasticon) places it 6 Roman miles from Edrei, but the passage is corrupt in the Greek—probably 16 is the proper reading. Now the ruined town, Tell 'Ash'harah, 16 miles W. of Edrei. The site stands 80 ft. above the
plain, and remains of fortifications are traceable. It is well watered by a fine "brook," running S. on its W. (Schumacher, *Across the Jordan*, p. 209). It was evidently named from a temple of Ashtoreth (Atergatis, 2 Mac. 12:26). In the Amarna tablets of 15th cent. B.C. it is called 'Astarat (Brit. Mus. 43, 64), and is connected with seven cities, all of which retain their names in the same district. It appears as 'Astaratu in the list of Thothmes III. (No. 28) a century earlier. [C.R.C.]

**Ashtoreth**, the chief female divinity of the Canaanites and the counterpart of Baal. As there were many forms of Baal, there were correspondingly many forms of Ashtoreth, collectively spoken of as Ashtaroth (Judg. 10:6; 1 Sam. 7:7). Originally Ashtoreth had been derived from Babylonia, where she was called Istar and identified with the evening star. When the identity of the evening and morning stars became known, the morning star also was identified with Istar, and 'Ashtaroth was described as androgynous, both male and female. In Canaan, however, her male and female attributes were divided; the female Istar was provided with the feminine suffix (th) and in time identified with the moon (which was a male deity among the Babylonians), while the male star survived even after her, and in later times the Syrians united her name with that of the goddess 'Ati, whence the classical Astartes. The Phoenician colonists in Cyprus carried the worship of Ashtoreth to Cyprus, where a temple was erected to her at Paphos, and she was adored under the form of a conical stone. As Aphrodite her name and cult passed to the Greeks, who, however, in the classical age more correctly transcribed the name Ashterat, another Canaanite goddess of Babylonian origin. [See Plate XIV.]

**Ashur**, the posthumous son of Hezon by his second wife (v. 22:14, 5). He became "father" or founder of the town of Tekoa.

**Ashurites**, in 2 Sam. 2:9 Abner made Ishbosheth, the son of Saul, king over Gilead, the Ashurites, Jezreel, Ephraim, Benjamin, and "over all Israel." For Ashtoreth the Syr. and Vulg. read "Geshurites." Geshur was, however, an independent kingdom at this time (2 Sam. 3:3; 13:17). Perhaps the Tarshish and Jonaathas in 1 Kings 4:21 is right in rendering the word "the house of Asher." The Ashurites would then include the inhabitants of the country W. of Jordan and N. of Carmel. [Asher; 8:1-3-1.]

**Asvathan**, one of the sons of Japheth, of the tribe of Asher (1 Chr. 7:33).

**Asia**, the provinces in T. where this word occurs, are: Ac. 2:8; 6:9; 16:6; 19:10; 22:26; 27:20; 416; 18:21; 27:22; 7 Cor. 16:10; 2 Cor. 1:8; 2 Tim. 1:15; 1 Pet. 1:1; Rev. 14:11. [Chief of Asia; see ASIARCH.]

In all these it may be confidently stated that the word is used, not for "the continent of Asia," nor for what we commonly understand by "Asia Minor," but for a Roman province which embraced the W. of the peninsula of Asia Minor with Ephesus as its capital. This province originated in the bequest of Attalus, king of Pergamus (or Asia), who left to the Roman Republic his hereditary dominions in the W. of the peninsula (133 B.C.). In the division made by Augustus of senatorial and imperial provinces, it was placed in the former class, and was governed by a proconsul. It contained many important cities, including the seven churches of the Apocalypse, and was divided into assize districts for judicial business (Ac. 19:38). It included the territory anciently subdivided into Ascriowith, and Doris, and afterwards into Myria, Lydia, and Caria. The title "king of Asia" was used by the Seleucid monarchs of Antioch (1 Mac. 11:13).

**Asiarchae** (Ac. 19:31; chiefs of Asia). The Asiarch was the president of the confederation of the cities of the province of Asia (τοις κατόις της Ασίας), whose office was connected with the custody of a great festival and games, defraying most of the expenses; thus the office was limited to wealthy men. Past presidents retained the title. It was also assumed by the high-priests of the worship of Rome and of the emperor at Ephesus, and probably in other cities. The Asiarch is often in use among the early Christians, and his use of the title is now confirmed by monumental evidence. Nied., *Recent Archaeol. of Bible*, p. 313. [H.S.]

**Asiibls** (1 Esd. 9:26) = Malchijah. 3.

**Asiel**, 1. A Simeonite whose descendant Jehu represented the family in the reign of Hezekiah (1 Chr. 4:35).—2. One of the five swift writers whom Ezra was commanded to take down the law and the history of the world (2 Esd. 14:24).

**Asipha** (1 Esd. 5:29) = Hasipha.

**Askelon.** [ASHELON.]

**Asmodeus** (R.V. Asmonaclus; L.X.X. [A.]). 'Asmodaios; in Rabbinical Heb. Ashmedai, in Rabbinical theology the king (as Lilit [Ovwt.] is to Eve) of that mediocrity with which originated, according to one account, from the intercourse of fallen angels with Eve, or, according to another account, with "the daughters of men" (Gen. 6). These demons were supposed to be semi CORPORAL, of both sexes, and, though long-lived, mortal. [Doros, 3:6, 7; Dorotheus, 3:7.] More probably the name is Heb., signifying "destroyer," from shāmadh, "to destroy" (cf. the destroyer), Wis. 18:25, and Apol. Rev. 9:11. [AHADDOX.]

**Asnah** 1. The children of Asnah were Nebishim who returned with Zerubbabel (Ezr. 2:50). In the list of Ne. 7:52 the name is omitted, and in 1 Esd. 5:31 written Assana.

**Asnapper** (Ezr. 4:10), described as "the great and noble." He has been variously identified with Shamannah, Sennacherib, and Esar-haddon. As, however, he is mentioned as the personage who settled the Dinitaes, the
Archevites (people of Erech), the Babylonians, the Susanchites (Susamians), the Dehavites, and the Elamites in Samaria, the general opinion now is that Assur-bani-apli (Assurbanipal), being the only ruler who could have moved the Babylonians and the Elamites to a distance at that period, is the prince intended. And Jos. 6.7 perhaps. Is. 11.8. [C.R.C.]

eena while

fication, could represent ing S.

See captured, R.V. under

haddon, and ascended the throne of Assyria in 668 B.C., Samas-sum-ukin (Saosuchinos), his brother, assuming the sovereignty of Babylonia. His armies made two expeditions to Egypt, with varying success; besieged Tyre, and brought it, with the neighbouring districts, into subject. Gilead, Juda and the Vale of万亿 were also conquered. Later, he repulsed the invasion of Urart, king of Elam, and afterwards carried the struggle into the enemy’s country, routing the army of Te-unman, Urta’s successor, and placing Ummân-ïagás on the throne. He also defeated the combined forces of the Babylonians, Elamites, and Arabians, and annexed Babylonia to Assyria, his “rebellious brother” setting fire to his palace, and perishing in the flames. Elam was again subjugated under king Ummân-khadâs, who, having been captured, was brought to Nineveh and compelled, with other captive princes, to drag his chariot to the temple called Šamaš. Assur-bani-apli thus appears as a conqueror in some of the districts where Asnapper would seem to have held sway, and his sculptures represent him as having a presence which could be described as noble. He was one of Assyria’s greatest rulers, and probably also one of the most learned men of his time. The R.V. has Osnapper, but in view of the pronunciation, Assnaper (Assnapher) is probably the pronunciation intended (As = Assur; eva = bani; par = pal, the late pronunciation for āpl or āpli). See G. Smith, History of Assur-bani-pal (1871); S. A. Smith, Keilschriften Assyriens (1887). [T.G.P.]

Asom (1 Esd. 9.33) = Hashum, 1.

Asp (pethen). The Heb. word occurs in six passages: Deut. 32.33; Job 20.14,16; Ps. 58.5, 91.13; Is. 11.8. It is translated in Ps. adder sages; while from Ps. 58.5 we see that pethen was a snake upon which the serpent-charmers practised. The wicked are there compared to “the deaf adder that stoppeth her ear, which will not hearken to the voice of charmers, charming never so wisely”; and from Is. 11.8, “the sucking child shall play on the hole of the asp,” it would appear that the pethen dwelt in holes of walls, etc. The explanation of Ps. 58.5 is that there are certain serpents which defy all attempts of the charmer; and in this sense may be termed deaf. [Snake-charming.] Since the cobra (Nâa hâitê), which infests old buildings and ranges from Egypt to India, is the species upon which snake-charmers chiefly exercise their skill, it has the best claim to represent the pethen. Cobras do not belong to the viper tribe (Viperidae), but to the Elapidae, which includes the harmless British grass-snake.

[A.R.]

Aspalathus, mentioned as some sweet perfume in Exclus. 24.7. It has been identified with it with cinnamon, cassia, and many other articles as used for ointments. The Lignum rhodanum is by some supposed to be the substance indicated by the aspalathus. The plant which yields it is the Convolvulus scoparius of Linnaeus. Pliny says: “In the same tract [Egypt, Cyprus] groweth Aspalathus: a white thorny shrub it is of the bignesse of a small bush; and a flower resembling a rose. The root of it is in request for the making of sweet perfumes and ointments... Some call it Erisisceptron, and others Sceptrum. The good Aspalathus is red or rather of a fiery colour, massie and heavy in hand, with a smell of Castoreum. It is sold for fifteen guineas in bulk.” (Holland’s translation, 1601, xii. 24.) [H.C.R.]

Aspatha’, third son of Heman (Esth.9.7).

Asphar, the pool in the “wilderness of Theoc” (Rom.9.33). There is a well called Zafarân 3 miles S. of Tekoa. [C.R.C.]

Aspha rasus (1 Esd. 3.8) = Mispereth.

Asriel, son of Gilead, founder of the great city of Manasseh (Num. 26.31; Jos. 17.2). He was the founder of the family of the Asrielites, the name is erroneously written Ashriel in A.V. of 1 Chr. 7.14. According to the LXX., he was son of Manasseh by his Syrian concubine.

Ass. Five Heb. names referring to various kinds of asses occur in T. (1) hamor denotes the male domesticated ass, though the word was no doubt used to express any ass. The ass is frequently mentioned in the Bible, and was used for burdens, for riding, ploughing, and grinding at the mill. Jews of high rank rode on asses; and in this manner our Lord made His entry into Jerusalem (Mt.21. 2), fulfilling the prophecy of Hezekiah: “He came “meek and lowly,” but it is a mistake to suppose that the fact of His riding on an ass had aught to do with this meekness, although doubtless meant to show the peaceable nature of His kingdom, as horses were used for war purposes. White asses (see Judg. 5.10) are said of Gilead, and at the time of Elisha were not for riding, and Baghdad is famous for a much-esteemed breed. In Deut. 20.11 “plowing with an ox and an ass together” was forbidden by Moses, probably because they could not pull evenly together; perhaps also this prohibition may have some reference to the in the text of A.V., and asp in the margin; else where the text of A.V. has asp as the equivalent of pethen. That some kind of venomous serpent is denoted is clear from the above pas-
law given in Lev. 19.19. The ass was not used for food, the Mosaic law considering it unclean, as 'not dividing the hoof and chewing the cud.' In extreme cases, however, as in the famine of Samaria, when "an ass's head was sold for eighty pieces of silver" (2K. 6.23), the flesh was eaten. The statement that it chews the cud is incorrect. (2) 'athon, the domesticated she-ass. Balaam rode on a she-ass; the asses of Kish which Saul sought were she-asses; and the Shunammite (2K. 4:22,24) rode on one when she went to seek Elisha. She-asses formed the care of one of David's officers (1Ch. 27.30). (3) 'ire, the name of a young ass, which occurs Gen. 32.15, 49.11; Judg 10.4, 12.14; Job 11.12; Is. 30.6, 14; Zech. 9.10. Sometimes 'ire is used for asses old enough for riding, carrying burdens, and ploughing. (4) 'pera, a wild ass mentioned Gen. 12.10; Ps. 104.11; Job 6.5, 11.12, 24.5, 39.5; Hos. 8.9; Je. 2.24, 14.6; Is. 32.14. Hosea compares Israel to a wild ass of the desert, and Job (39.5) gives a vivid description of this animal. (5) 'adab occurs in Job 39.5; but in what respect the animal described differs from 'pera' is uncertain. Two entirely distinct types of wild ass were probably known to the ancient inhabitants of Palestine: first, the Nubian wild ass (Equus asinus africanus), a tall, long-eared, grey animal, which (or its near relative the Somali wild ass, E. a. somaliensis) is the ancestor of the domesticated breeds; second, the Syrian onager (E. onager hemippus), a smaller, redder, and shorter-eared animal, connecting the African asses in some measure with the horse. Other races of the onager, or ghor-khar, are found in Persia and N.W. India. The wild ass of Scripture is doubtless the onager, which inhabits desert tracts in herds of considerable size, and is noted for its fleetness. [R.L.]

Assal imoth (1 Esd. 8:30) = Shelomith, 6.
Assanias (1 Esd. 8:54) = Hashabiah, 8.

Asshir. [Assyria.]
Assurim (plur. form), an Arab tribe descended from Abraham and Keturah; the three "sons" of Dedan, being Assurim, Letushim, and Leummid (Gen. 25.3). [F.J.F.-J.]

Assideans (R.V. Hasideans), i.e. the pious, a Jewish party, not identical (in spite of 2Mac. 14.6) with the followers of the Hasmonaeans, which arose in opposition to the efforts of Antiochus Epiphanes, 168 B.C., to Hellenize Judaism. Indifferent to national independence, the Hasideans aimed solely at religious freedom and the preservation of the national faith. Thus they supported Mattathias, 168-166 B.C. (1Mac. 2.42). But when, 162 B.C., they had in Aleimus "a priest of the seed of Aaron" (7.13), they acquiesced in the Syrian domination. As the Maccabean struggle became political rather than religious, the Hasideans fell into the background, to reappear under John Hyrcanus (135-104 B.C.) as the Pharisees. [E.D.]

Assir. 1. Son of Korah (Ex. 6.24; 1Ch. 6.22).—2. Son of Eliasesaph (1Ch. 6.23,27).—3. Son of Jescosta (1Ch. 6.37), unless "Jecosta the captive" (R.V.) be correct.

Assos or Assus, a seaport of the Roman province of Asia, in the district anciently called My西亚. It was situated on the N. shore of the gulf of ADRAMYTUM, and was only about 7 miles from the opposite coast of Lesbos, near Methymna. A good Roman road, connecting the towns of the central parts of the province with Alexandria Troas [TROAS] passed through Assos, the distance between the two latter places being about 20 miles. These points illustrate St. Paul's rapid passage through the town (Ac. 20.13,14). The ship in which he was to voyage from Troas to Caesarea went round Cape Lectum, while he took the much shorter journey by land. Thus he was able to join the ship without difficulty, and in sufficient time to anchor off Mitylene at the close of the day on which he had left Troas.
ASSURUS

Assue'tus (Tob.14.15) = Ahasuerus.
Assur'.—1. (Ezr.4.2; Ps.83.8; 2 Esd.2.8; Judg.2.14, etc.) = ASSYRIA.—2. (Ezr.5.31) = HARHUR.

Assurance. The words "assurance" and "full assurance," which occur in A.V. as a translation of πιστολογία in Col.2.2, 1 Th.1.5, Heb.6.11,10.22, can scarcely be appealed to in support of the Galatian Argument of "assurance," by which is meant a supposed inward conviction of the individual believer that his personal salvation is assured. The Gk. word means rather a conviction of the certainty of the Christian faith and hope, as divine truth. It is certainly the teaching of N.T. that personal experience of the blessings of faith does constitute an irrefragable evidence of the truth of the gospel (e.g. Jn.7.17). There are also passages which seem to imply an inward witness of the Holy Ghost to the soul of the believer that he is in a state of grace and covenant with God—e.g. Ro.8.16; 1 Jn.3.13,24, 4.15,16. Otherwise, there is nothing to justify the idea that the mere feeling of assurance is always trustworthy, but rather there are warnings to the reverse (Mt.7.22,23).

And, in the light of 1 Cor.9.27 and Ph.3.11,12, it must seem presumptuous for any individual Christian to regard his own final salvation as already assured. See Schaff, Creeds of Christendom, vol.3, p.834; Harold Browne, Exposition of XXXIX. Arts. (Arts. xvi. and xvii.), 12th ed. 1882. [A.R.W.]

Assyria, Asshur, an important nation dwelling by the Tigris (Gen.2.14), whose capital was Nineveh (10.11, etc.). According to A.V., Assyria was colonized from Babylonia by Asshur, but A.V. makes the colonizer to have been Nimrod, who built its great cities. The country is named after its old capital ASSUR, whose god Assur, Asur, or Assur became the national deity. At first merely a province governed by a viceroy (patesi or iššaku), Assyria gradually extended its borders until it embraced the whole region from the Armenian mountains to the Tigris; the mountains on S., and from the Zagros mountains on E. to the desert on W. On N. and E. the high mountain-chains of Armenia and Kurdistan are succeeded by low ranges of limestone hills of a somewhat arid aspect, which, separating from the principal chains, run parallel therewith, and occasionally enclose rich plains and fertile valleys. To these ridges succeeds an undulating tract, well watered and productive, ending somewhat suddenly in the great Mesopotamian plain (al Jastān), which, extending for 250 miles, is interrupted by a single mountain-range, Jebel Sinjar. It is less abundantly watered. On the upper course of the Tigris there are barley fields on the left, and numerous ruin-mounds testify to its having anciently supported a large population. The classical geographers divided Assyria into provinces, named after certain of its chief cities: Arbela from Arbela; Calacene from Calah (Gen.10.11); Apollonia from Apollonia, E. of the Tigris; Sittacene from Sittac in the same neighbourhood; Adiabene, supposed to be the district of the river Zab; Arrachitis, from Arrapha, etc. The chief cities were Assūr, now Qala' sherqat; Ninu'a or Nineveh; Kalâh or Calah; Arba-il or Arbelâ: Dûr-Sarru-ukîn, now Khorsabad; Uþâ or Upi'a, the classical Opis; Resin, supposed to be the modern Selamieh; Tarhibi, now Sherif Khan; Ribû Ninu'a (Rehoboam-Ir); and others whose sites have to be identified. There seems to be no reason to doubt the statement in Gen.10.11 that Assyria was colonized from Babylonia, though there may have been other original inhabitants before the foundation of Assûr. In Herodotus (i.7), Ninus, the mythical founder of Nineveh, was son of Belus (= Merodach = Nimrod), the founder of the great cities of Babylonia. This naturally points to the higher antiquity of Babylonia, from which Assyria obtained her civilization. From the recent German excavations at Assûr, it would seem that the history of the country goes back beyond 2100 B.C., which is about the date of Uspi'a, the builder of the temple of Assûr in that city. As in the case of the earlier kings of Babylonia, the rulers of Assûr were at first not called kings, but viceroy as alogen inhabitants before the acknowledged Babylonian overlordship. To all appearance there were kings of Assyria before there were vicerows, as one of the Babylonian chronicles makes Ilu-summa, king of Assyria, to have been contemporary with the Babylonian king Su-abu, who reigned about 100 years before Hammurabi. [ARAMPHIL.] This title of "king," however, may not be directly due to a Babylonian usage. Among other early rulers were Kikia, Ikunum, Šar-kenkate-Asîr, and Asîr-nirari son of Ismê-Dagan, who are mentioned as having built the wall of the city of Assûr, which was restored by Asîr-rîn-nîsî-Sû c.1500 B.C. Assûr-bel-nîsî-Sû somewhat later made a treaty with Kara-indâs, king of Baby-
lonia, as did also Puzur-Asûr with Burna-
Bu'riâs c.1440 B.C. Assûr-uballit (c.1410) married his daughter to a Babylonian king, who, however, was killed by the Kâsîtitites, thus enabling Assyria to interfere in the affairs of Babylonia, and set Kuri-galzu on the throne. Tukulti-Ninur (c.1300 B.C.) conquered Baby-
lonia and Megiddo. He is named in Babylonian chronicles as having been driven out of Babylonia, is said to have attained to great length of years. Tiglath-pileser I. (c.1120 B.C.) gives long and detailed accounts of his conquests, and we learn that he led his armies against Mesoç, Comagene, Mesopo-
tamia, etc., and also punished the Hitittes. A-sûr-našir-apâlî (884 B.C.) has likewise left ex-
tensive records of his reign, and states that he received the tribute of the Tyrians, Sidonians, Gebalites, and of Arvad, which is in the midst of the sea. His son Shalmaneser II. (860 B.C.) aimed at the destruction of what is known as the Syrian league, which seems to have been headed by Adad-idri (praenomen of Adad-îdri = Be-nadad) of Damascus, and included Ahabbu the Sir'ilite, who is generally regarded as Ahab of Israel. Shalmaneser had at least three conflicts with Adad-idri, and received tribute later from Hazael, who then sat upon the throne of Damascus, as well as from Tyre and Sidon, and also Jehu of Samaria. [SON OF ORMI (= the Israelite)] (842 B.C.) Samši-Adad (825 B.C.) warred in Babylonia, but never came nearer to Syria than Carchemish. His son Adad-nirari III. (812 B.C.) also warred in the W., including Tyre, Sidon, the land of Omri (Israel),
Philistia, and Damascus. Schrader sees in Adad-nirari the deliverer sent in answer to the prayers of Jehoahaz (2K.13.5). The queen of this king was named Sammuramat, generally compared with the somewhat mythical Semiramis of Herodotus. Adad-nirari was succeeded by Shalmaneser III. in 793 B.C. He fought against Damascus and Hatarika, which, it is suggested, may be Hadrack (Zech. 9.1). The next ruler was Assur-dan (773 B.C.), who also warred in Hatarika. An eclipse of the sun which took place in his reign has been identified with that of June 15, 763 B.C., and is thought to be referred to in Am.8.9. This ruler had to contend with plague and rebellion within his dominions. Assur-nirari II. (754 B.C.), his successor, warred against Hatarika and Arpad. Discontent, however, seems to have risen, and a rebellion broke out, in consequence of which, seemingly, Tiglath-pileser III., also called Pul (2K.15.19) seized the throne (745 B.C.). He attacked Babylon, as well as on the E. and N. In 739 B.C. he captured Kullamni, possibly the Calho of Is.10.9. Azariah of Judah is mentioned at least four times in his inscriptions, but the earlier notices are obscure. Nineteen districts owning allegiance to Azariah were captured, and Menahem of Samaria paid tribute. After this, various operations took place in Mesopotamia, Media, etc. An expedition to Philistia was undertaken in 734, when Abil-akka, on the borders of Israel, was attacked, and later Ijon, Abil-beth-maachah, etc. (2K.15.29). The prayer of Ahaz to deliver him from Syria and Israel led Tiglath-pileser to capture Hadara, Rezon's native city, and devastate the district around. He refers to the overthrow of Pekah and the payment of tribute by Hoshea, but there is no reference to the visit paid by Ahaz of Judah to the Assyrian king at Damascus (2K.16.10). Tiglath-pileser died in 727 B.C., and was succeeded by Shalmaneser IV. (727-722 B.C.), who carried the Israelites captive, and is mentioned in the Babylonian Chronicle as having captured Sabarain or Samarin (? Samaria). This ruler besieged Tyre for many years. The next king was Sargon, who took the throne in 722 B.C. He prosecuted the Sargonid war against Egypt, and annexed Samaria. Later, he had considerable success at the battle of Raphia, and Careheninnis was made part of the Assyrian empire in 717 B.C. In 711 Ashdod was captured and its king Azuri deposed. Judah is mentioned with Edom and Moab as a country which went after Pekah, king of Menisi, a prince who could not help them. Sargon defeated Merodach-baladan, the Babylonian pretender, in 709 B.C., and died (to all appearance was assassinated) in 705 B.C. He was succeeded by Sennacherib, whose siege of Jerusalem is referred to in 2K.18.17ff. According to Sennacherib's inscriptions, Hezekiah had sided with the Ekronites against Padi, their king, and shut him up in Jerusalem for safe keeping. Forty-six cities of Judah were taken. Padi was delivered and set on the Ekronite throne again, and Hezekiah paid tribute. The general opinion is, that two expeditions against Hezekiah took place, though one at least may have been referred to in 2K.17.14. In 701 B.C., Sennacherib fought with the pretenders, one of them being Merodach-baladan, who had arisen in Babylonia. Sargon had attacked the Elamites, who had carried off his son, Assur-nadin-shum, king of Babylonia; and Berosus and Herodotus say that he made an expedition to Egypt. He was killed by his sons (the Babylonian Chronicle says "a son") in 680 B.C. Esar-haddon, who succeeded him, tried to pacify the Babylonians, whom Sennacherib's severity had aroused. His first act was to make an expedition to Armenia, where his brothers, after the murder, had taken refuge. Later, he put down a revolt in Babylonia headed by the son of Merodach-baladan. In 675 B.C. the king of Sidon was beheaded by his orders, and he then assembled all the kings of Hatti and the sea-coast. It was possibly on this occasion that he "took Manasseh with hooks" or "chains" (2Ch.33.11); but the Israelitish king is only referred to in the inscriptions as one of the rulers who paid tribute. This time, however, Esar-haddon was attacked by "Til-Assur," the Medes, Chaldeans, and Ararians. He made two expeditions to Egypt, but died on the road whilst returning from the second, and was succeeded by his son Assurban-äphi (Assurbani-pal) in Assyria, and Saosduchinos in Babylonia (668 B.C.). The former, who is identified with "the great and noble Asnapper" of Ezr.4.10, was one of the greatest of Assyrian monarchs. He also received tribute from Manasseh, and his armies made determined attempts to complete the conquest of Egypt, but did not succeed in retaining the country. He received the submission of Tyges, king of Lydia, and later of his son, and his wars with the Elamites throw a vivid light on the condition of that country. As his brother would not acknowledge his overlordship, Babylonia was again annexed to Assyria, Saosduchinos having apparently committed suicide by perishing in the flames of his city. Babylonia was last under the Assyrians in the reign of Sennacherib, when he sent an expedition to Babylon, the capital of Babylonia. Having done this, Nabopolassar made an alliance with the Medes, and marched against Nineveh, which was taken after a two years' siege; whereupon Saracoch raised a funeral pyre, and perished in the flames with all his entourage (666 B.C.). After this, the country has no history, though Cyrus mentions the city of Assur as one of the places to which he returned the gods which had been carried away in former times, apparently by the Babylonians, and possibly under Nabopolassar. It was a great and sudden downfall which overtook the empire of Assyria. About 30 years before the end, Assyria had claimed dominion from Elam on E. to Egypt on W., and from Armenia and Lydia on N. to the Persian Gulf on S. Among the princes who had acknowledged her supremacy had been Manahem (2K.15.19), Ahaz (16.9), Hoshea (17.4), Hezekiah (18.1), and Manasses (2Ch.33.1-13), as well as the latter's rulers of Sidon, especially the W. Sargon, indeed, set up an
ASSYRIA, ASSHUR

image of himself, with an inscription, in the island of Cyprus. It is not quite certain whether Assyria required religious conformity from the people subject to her, but there seems to have been no real compulsion in that respect; if a ruler acknowledged the Assyrian gods, it was probably to curry favour. The Assyrian religion was the complex polytheism of Babylonia, differing, however, in having at its head the national deity Assur, the great protector of the land, its people, army, and king. The gods most often mentioned by Assur-bani-apli are Assur, Sin (the moon), Samaš (the sun), Adad (the rain), Adad-šumas (the rain), the divine queen of Kidrimu, Istar of Arbela, Nirig, Nergal, and Nusku; but the religious inscriptions mention many other deities, besides protecting spirits and demons. To all appearance the civilization of Assyria was derived, with its writing and literature, from Babylonia, its kingship was from Babylonia, the Assyrians were Semites, with, probably, a certain admixture of Sumero-Akkadian blood, as the statement in Gen.10:11 suggests—Nineveh, indeed, must have been a Babylonian (non-Semitic Sumerian) foundation. Besides their writing and literature, their religion and worship, the Babylonians were noted for their system of building temple-towers, their method of ornamentation, and, last but not least, their language, were all derived from Babylonia. In the course of years, however, their national characteristics naturally became more pronounced, so that they no longer thought of themselves as being of Babylonian origin. Their language, so different from those of Babylonia, their art assumed a style quite its own, with a spirit and boldness, and with efforts towards fidelity and realism, which are altogether admirable. Their pictures of war, the chase, and the camp, with the few representations of the more peaceful incidents of life, carried to the severest limits the spirit of national feeling. Their art was dependent much on account of these characteristics as because of the talent which their sculptors display. The advanced civilization of the country is proved alike by the details of their sculptures and the remains of their buildings. In many respects they were, even at their most advanced period, more advanced than peoples of their own time and place. The worship of the merciful Merodach," was on a high level, and there are signs of that tendency to monothism which characterized the original Babylonian form. Nevertheless, they were always very superstitious, and believed in the efficacy of charms, incantations, magic, and all things connected therewith. They studied astronomy for the purpose of fixing the date of the equinoxes, and also to foretell events. Divination was practised, and calendars of lucky and unlucky days consulted. Their knowledge of medicine was primitive, but probably not more empirical than that in use in the same part of the world at the present day. Their literature shows, however, that whatever their faults, the Assyrians were a great nation, and had not their empire come to an untimely end, there is every probability that they would have advanced along the road of civilization until arrested by the cause which has retarded it throughout the Semitic East.

T.G.F.

Astaroth

Ashtaroth (Assyr. Assur-tartu, known in the Bible as Assur; A.S. Ashtaroth; Hiph. Ashtarot; R.V. Ashteroth.)

Ashteroth Karnaim

As'sath (tEzr.8,38) = Azgad.

As'tyles, last king of the Medes, 538–549 B.C. He was conquered by Cyrus, son of his daughter Mandane. Thus "Cyrus the Persian received his kingdom" (Bel 1). [C.D.]

As'suppin, and House of (tCh.28,15,17). A.V. marg. the house of the gatherings, R.V. storehouse; Ne.12,25. A.V. thresholds of the gates, marg. treasuries or assemblies, R.V. storehouses of the gates). Nothing is known of it, except that it is the name of a storehouse outside the court of king Solomon's temple. It was probably the portico from which the king watched by night. From the context (tCh.26,14,16,17,18) it may be assumed that the situation was towards the S.W. of the temple courts. The Vulg. seems to have understood the word to refer to the council-chambers immediately outside the courts of the temple, in which the elders held their deliberations. [C.W.]

Asyn cuitus, a Christian at Rome (Ro.16,14). A doubtful tradition makes him bishop of Hycania.

Atad (thorn), a threshing-floor (goren) between Egypt and Hebron (Gen.50,10).

Atarah, a wife of Jerahmeel, and mother of Onan (tCh.2,26).

Atargatis, corrupted by Gk. writers into Derketo, a Syrian goddess who owed her name and attributes to a combination of "A'thar, the Assyrian Istar [Ashtoreth], and 'Ati (Gatis in Gk.), a Syrian goddess of allied nature. Her most famous temples were at Hierapolis (Ma-bug) and Ascalon. Plutarch says that some regarded her as ”Aphrodité, others as Herè, others as the cause and natural power which provides the principles and seeds for all things from moisture.” A temple of Atargatis (2Mac.12,26) at Carnion was destroyed by Judas Maccabaeus (Mac.5,14).

Ataroth, or Ataroth (tCh.2,26). A little town in Gilead, and built by the tribe of Gad (Num.32,3,34), mentioned with Dibon. On the Moabite Stone, in 9th cent. B.C., it is noticed as a "land" where "the men of Gad dwelt from of old." The name survives in Jebel 'Atarûs, with ruins of the same name, N.W. of Dibon.—2. A place on the boundary of Ephraim and Leviites (Jos.16,7), now unknown.—3. "A'ATAROTH-ADAR," or "ADDAR," on the border of Benjamin, "near the 'mountain' that is on the S. side of the nether Beth-horon" (Jos.16,2,5,18,19). Evidently the ruin ed Dârîh, in the required position.—4. "A'taroth", the house of Joab, a place occurring in the list of the descendants of Judah (tCh.3,55).—5. [A.R.C.]

Ater.—1. The children of Ater were among the porters or gate-keepers of the temple who returned with Zerubbabel (Ezr.2,42; Ne.7,45). They were called in tEzr.5,28, "the sons of Jatai."—2. The children of "Ater, of Hezekiah" returned with Zerubbabel (Ezr.2,16; Ne.7,21). and were among the
heads of the people who signed the covenant with Nehemiah (10:17). In 1 Esd.5.15 the name is contracted into Aterezias.

**Aterezias.** [ATER, 2.]

Atheya, a city friendly to David while at Ziklag (1Sam.30.30). The Vat. MS. reads *Nombe*, perhaps for Nebo, or Naba, a village 4 miles S. of Adullam.

**Athaliah.** a descendant of Pharez the son of Judah, dwelling at Jerusalem after the return from Babylon (Ne.11.4).

**Athaliah.**—1. Daughter of Ahab and Jezebel, and grand-daughter of Omri, king of Israel. On the making of a treaty of peace between the two kingdoms of Judah and Israel, after a war of 60 years, she was married to the crown prince of Judah, Jehoram, son of Jehoshaphat. The bridegroom was not more than eighteen years of age, and she was still younger. Not till he was 32 years old did Jehoram come to the throne. His first act was to destroy his six younger brothers, as possible religious rivals and claimants to the throne, together with those princes of Judah who were zealous for the ancient faith of the nation. Athaliah inherited the strength of mind of her mother,
ATHALIAH

as well as her fervent devotion to the cult of the Phoenician god, Melkarth—usually addressed as Baal or Lord—and it is to her influence over her husband that we must attribute this act of unnatural ferocity. Athaliah survived her husband, who was succeeded by his son Ahaziah, over whose mind she exercised the same sinister influence as over her late husband. Ahaziah was married to a daughter of the house of Ahab, whose name is not given; and when, after a reign of a single year, he died, Athaliah procured the massacre of her grand-children—Jehoash excepted, who was rescued by an aunt. She now seized the reins of power in Jerusalem and ruled for six years (2K.11: 2Chr.22.10-23.15). Two events alone of this dark period in Hebrew history can be extracted from the records of the time. (i) A portion of the temple of Jehovah was broken up, and its materials used for the erection of a house of Baal in Jerusalem. (ii) The Zadokian high-priesthood was changed from the family of Ahimaaz to that of Meshullam—Jehoiada, who had married a daughter of Athaliah, being now promoted to the primacy. This action led to the undoing of the usurper, as Jehoiada proved staunchly true to the religion of Jehovah. For six years he and his wife Jehosheba concealed in their private apartments, near the temple, the youngest child of Ahaziah, rescued as she fled at the time of the massacre, and then six years old. When he was thirteen a revolution was planned, in conjunction with all the better elements of the nation, and Jehoash proclaimed king. Athaliah’s personal attempt to stay the revolt failed, and she was cut down by one of the soldiers at the door of her palace, as she fled from the temple. The years of her reign are not counted separately by the Heb. historiographers, but are taken to form part of the reign of Jehoash. [CHRONOLOGY.]—2. A Benjamite of the sons of Jehoram (1Chr.8.26).
—3. Father of Jeshiah, 3 (Ezr.8.7). [W.S.C.]

ATHENIANS, people of ATHENS (Ac.17.21). Athenobius, an envoy sent by Antiochus Sidetes to Simon the Jewish high-priest to demand the surrender of Joppa and Gazara (1Mac.15.29-36).

ATHENS, the capital of Attica, and the chief seat of Grecian learning and civilization during the golden period of the history of Greece. It is only mentioned in the Bible in connexion with St. Paul, who visited it in his journey from Macedonia, and appears to have remained there some time (Ac.17.14-34; cf. 1Th.3.1). During his residence he delivered his memorable discourse in the Areopagus to the “men of Athens” (Ac.17.22-31). The Agora or “market,” where he disputed daily, was situated in the valley between the Acropolis on the N.E. and E., the Areopagus

ACROPOLIS, ATHENS. (Suggested restoration by R.d. Bohn.)

on the N., the Pnyx on the N.W. and W., and the Museum on the S., as shown in the annexed plan. The remark of the sacred historian respecting the inquisitive character of the Athenians (17.21) agrees with the unanimous witness of antiquity. Demosthenes rebukes his countrymen for their love of constantly going about in the market, and asking, What news? The remark of St. Paul upon the “superstitious” character of the Athenians (17.22) is also confirmed by ancient writers. Thus Pausanias says that the Athenians surpassed all other states in the attention which they paid to the worship of the gods; and hence the city was crowded in every direction with temples, altars, and other sacred buildings. Of the Christian church founded by St. Paul at Athens, Dionysius the Areopagite was, according to ecclesiastical tradition, the first bishop.

Athlai, an Israelite who put away his foreign wife at the exhortation of Ezra (Ezr.10.28), called Amatheus in 1Esd.9.29.

ATIPHA (1Esd.5.32) = Hatipha.
ATONEMENT

Atonement. This is the A.V. translation of a word which R.V. translates "reconciliation" (Ro.5.11; 2Cor.5.18), and in early English meanings precisely the same, and is better written "At-one-ment." Cf. Beamont and Fletcher:

From this atonement let our lives begin; Be all the rest forgotten.

The current meaning of the word as expiation has arisen from a false explanation of the Jewish sacrifice, which regards the death of the victim as representing the vicarious punishment of the worshippers. [Sacrifice, B.; Atonement, Day of.] True, Lev. 16:6-8, shows that it was intended as the expression of obedience, that expression being most clearly marked in the whole burnt-offering and in the presentation of "the blood which is the life" (Lev.17.11). We must therefore regard Christ as representing the obedience of the sinner, and therefore the rebellion against God, and "putting away sin by the sacrifice of Himself" (Heb.9.26). The atonement of Christ has therefore an objective value, and Christ is to be regarded as the propitiation for the sin of the world in exactly the same sense as every Jewish sacrifice was a propitiation by a priest, by fulfilling the law "even unto death," satisfied it in a far deeper and more real way that it could be said to be satisfied by the infliction of punishment upon an innocent substitute. This explanation is free from the moral difficulties of substitution, which seem greater the more they are stressed. The weakness of the popular doctrine lies in the small place it gives for the human side [Repentance; Faith; Conversion], and in the too great stress it lays on the removal of punishment in place of the removal of sin. Christ most certainly bore our sins in the sense that He removed them out of the way; so that they need no longer be a problem to us today. The dedication of the day and the obedience and sacrifice of Christ man is called to share. This seems the main significance of both sacraments; and is essential to justification and salvation. See also Saviour; Salvation; and for the Pauline doctrine see Paul, Molony, A. and Personality. McLeod Campbell, "Nature of the Atonement," in the Bible, pp. 138-146. Scott Lidgett, Spiritual Principle of the A. Aubrey Moore, Appeal and Claims of Christ. De Buse, Soteriology of N.T. Leighton Pullan, Atonement. J. J. Lias, Atonement. Oxenham, Catholic Doc. of the A. Denney, Death of Christ: A. and the Modern Mind. D. W. Simpson, "The Atonement," in the Bible, pp. 147-159. Scott, Crucifix. Bushnell, Forgiveness and Law. Liddon, Passiontide Sermons. Art. in Lux Mundi, s.v. [Jesus Christ.]; [M.S.]

Atonement, Day of (yôm haqippūrīm = Lit. day of coverings, or of atoning, observed on the 10th day of the 7th month [Tishri = Sept.-Oct. 5 days before the Feast of Tabernacles, being the only periodical fast day represented as of Mosaic origin [Fasts], was styled in later days (Av.27-a), "The Fast." Its annual observance is referred to in Ex.30.10, and described in Lev.16. It occurs as a day of humiliation and of obligatory abstinence from work and food, in the lists and special days in 23.27-28, and the prayer calendar of Num.28.29 (see 29.7-11); and is mentioned in Lev.25.9 as the day on which the jubilee year was to be proclaimed. The principle of atonement is enunciated in 17.11—"it is the blood that maketh atonement, by reason of the life." [Atonement], and in that book alone the verb to atone occurs, and it occurs in very varied contexts, from the formal sacrifices of burnt-, sin-, and guilt-offerings (1.4, 4.40, 15.16, etc., etc., and those connected with priestly consecration (3.3-9, 7), to the rites of purification of a woman after child-birth (12.8), a leper (14.18, etc.), a leprous house (14.53) and other uncleannesses, physical (15.15, 20) and moral (19.22). This comprehension is reflected in some degree the wide scope of the rites of the Day; which, however, in spite of the summary language of Lev.16.30, interpreted most liberally by later Judaism, cannot be supposed to have touched those "high-priestly and ceremonial expiation truths" for its own purposes. Beza (1650) i.e. c. 180 B.C. Passing over Ac.27-9, where "the Fast" is mentioned simply as ushering in the rough weather of autumn, the day plays an important part in the symbolism of the Ep. to the Hebrews (see below).—In describing the day's ceremonies we follow the order of the Lev.16.8 and references. The offering—a bullock, a ram, and seven yearlings, and a he-goat as sin-offering; distinct from the goats of the atonement ceremony, which is described as follows (Lev.16.22-30, ifs. 29-34). The high-priest having selected his own offerings (a bullock for sin-offering and a ram for burnt-offering and a handful of leavened bread in white linen garments. Then he received the people's offerings at the door of the tent of meeting (Holy Place)—a ram for burnt-offering and two goats for sin-offering. From these latter he selected by lot one for the Lord and one "for Azazel" (see below). Next he killed his own sin-offering and with its blood entered within the veil into the Most Holy Place (Holy of Holies), carrying also a censer with live coals from the altar of burnt-offering and of incense. Having ceased the ark and the mercy-seat by casting the incense on the coals, he dipped his finger in the blood and sprinkled it once upon the E. side (front) of the mercy-seat, and seven times in the space before it. Hitherto (16.1-11) he had been acting for himself and his family; next he proceeded to act for the people. Returning from the Holy of Holies to the Holy Place, he slew, as the people's representative, the goat dedicated for the Lord and representing with the veil, dealt with its blood as with that of
the bullock, thus completing the purification or "atonement" of the Holy of Holies. Next he proceeded in solitude to purify the Holy Place, sprinkling the victim's blood (see Ex.30.10) on the horns of the golden altar of incense; after which, emerging into the court of the tabernacle, he "atoned for" the altar of burnt-offering, sprinkling its horns with the blood of his own bullock and of the people's goat (Lev.16.15-19). This completed the threefold purification of the Holy of Holies, the Holy Place, and the altar representing the outer court. The goat for Azazel, or "scapegoat," was now presented by the high-priest, who, laying his hands upon it, made a comprehensive confession of all the sins of the people; after which it was led off to the wilderness by one waiting in readiness, as a symbol of the putting away of the nation's iniquities (cf. Ps.103.12). The high-priest then returned to the tent of meeting, bathed, donned his official garments. Thus, the outer vestments of burnt-offering, his own and the people's (Lev.16.20-24; cf. lv. 3 and 5). Thus the day's ceremonies were completed. When the fat of the burnt-offerings had been consumed, the remains of the victims were carried, as usual (4.11,12), outside the camp; and those persons who participated in the sacrifice of the goat, were to wash themselves and their clothes before returning to the encampment (16.25-28). The phrase ἐξατάζαμαι is "for Azazel" (R.V.), rendered in A.V. scape-goat (cf. LXX. ὁ ἀποστάζων, Λέοντος, δ. τρίτος ἀπολελογίας, Sym. τρ. ἀπεργήσιον, Vulg. caper emis-sarius; as though = ἦν τῷ "goat for going away," occurs in this context only. The root ἐξατάζαμαι is not actually found, but inferred from Arabic 'azala= "to remove to a distance." The phrase may thus signify "for dismissal," (as R.V. marg.), but in the context the parallelism with ἐξατάζαμαι makes it probable that Azazel is a proper name denoting an evil spirit inhabiting remote and desolate places (so Origen makes Ἀζαζαλ is ὁ διάδοχος). If so, he may be the 'Azazel who appears in the book of Enoch (c. 2nd cent. B.C.) as leader of the bad angels of Gen.6.2-4. In any case the symbolic meaning of the ceremony is broadly the same. The Mishnaic tract Yoma supplies various details of this ceremony, some of which are inconsistent with Lev.16. Our view of the date at which this group of ceremonies assumed the form here depicted will depend upon critical problems which are discussed in the art. The Driver, Introd. to O.T. (chap. ix.), and others hold that they were subsequent to the 1st and 7th days of the 1st month. Hence some critics have regarded Ezekiel's words as furnishing the original idea from which the rite of Lev.16 was subsequently developed. Stress has also been laid on the fact that Zechariah (c. 520 B.C.), while referring (7.3-5, 8.19) to four commemorative feasts, one of them actually in the 7th month, makes no allusion in that context to the Day of Atonement; and also upon Ne.8 and 9, where three observances are recorded, all in the 7th month of 444 B.C.—(a) Feast of Trumpets on the 1st day; (b) Tabernacles, 15th-22nd; (c) a general fast on 24th—which says nothing of the fast on the 7th day. It has been inferred that Lev.16 (and the parallel passages), as being part of the "New Code" just introduced (Ne.8), was not yet in force. It is possible, however, that the fast summarily described in Ne.9.1 may be the Day of Atonement, transposed, like Hezekiah's Passover (2Chr.30.15), for practical reasons; especially as the following chapter (Ne.10.33) refers to a provision "for the sin-offerings to make atonement for Israel." Nor was it absolutely necessary that Ezekiel, Zechariah, or Nehemiah (of whom the second alone mentions the Passover) should name the Day of Atonement, even were it a living institution of their time. It had been true of the age of Leviticus, we may doubt whether the post-Exilic institution of the Day of Atonement has been demonstrated, and whether, however considerable the subsequent development, the Mosaic nucleus in its ceremonial may not yet prove to be much greater than has perhaps been supposed. Certainly it is true that one of the purposes of fasting and humiliation in religion is of immemorial antiquity [Fastes], and must have found some expression among the Hebrews earlier than the 6th-cent. fast-days of Ezekiel. But the permanent significance of the ceremony—fully enacted, at any rate, in N.T. times, as Philo and Josephus show, is dependent on the exact date of its origin. That significance lies in its relation to the atoning work of Christ, as expounded in Heb.9 and 10. In Christ's atoning death there is nothing of the figurative, imperfect, limited character which marks the Levitical ordinance. The high-priest enters the material temple once a year with a host of external victims: Christ enters once for all into God's actual Presence with, and through, His own infinitely more efficacious Blood, wherewith He obtains no temporal but an eternal deliverance. Moreover, access to the throne of grace, open of old to the high-priest alone, and that under strict limitations of time and mode, is now, by Christ's "new and living way," free at all times to those mystically purged by His atoning Blood. [Hebrews, Ep. to.] Oehler, O.T. Th. § 140 f.; Ebersheim's Temple, pp. 263-285; Willis, Worship of the Old Covenant, pp. 190-214; Westcott, Hebrews, pp. 279-280; Driver, Introd. to O.T. Philo, Libro de los Festivos. [ chap. x.]; Josephus, 3 Ant. x.; Mishna, Yoma (ed. Surenhusius, ii.). [L.R.]

Atroth, a city of Gad (Num.32.35). Perhaps the name should be taken with that following it, Shophan, to distinguish this place from Aratoh in the same neighbourhood.

Attal a. The son of Attalus, Holy of Holies, an Egyptian slave (1Chr.2.35, 36). One of the warriors of Gad, captains of the host, who joined David in the wilderness (12.11).—3. Second son of king Rehoboam by Maachah the daughter of Ab salom (2Chr.11.20).
their return to Antioch from their missionary journey in the interior of Asia Minor (Ac. 14. 25). It was built by Attalus Philadelphus, king of Pergamum, and named after him. All its remains are characteristic of the date of its foundation. Leake fixes Attalia at Adalia, on the S. coast of Asia Minor, N. of the Duden, N. of Catarchaeus.

**Attalus II.** (Philadelphus) was king of Pergamum, 150-138 B.C. To him were addressed letters from Rome in favour of the Jews, 139 B.C. (1 Mac. 15.22), in response to the embassy sent to Rome by Simon the Hasmonaean (14.24). [C.D.]

Attharates (1 Esd. 9.49), a corruption of the Trachitana.

Augustus (1 Esd. 5.38), daughter of Berzelus (Barzillai, Ezr. 2.61). Her name is not given in the parallels in Ezra or Neh. [Add. S.]

Augustus, first Roman emperor, in whose reign Christ was born (Lu. 2.1). His father was C. Octavius, and his mother Atia, daughter of Julia, the sister of C. Julius Caesar. He came under the care of his great-uncle, the Dictator, who made him his heir. After Caesar’s murder, Octavius was adopted into the Julian family, and was thenceforth known as C. Julius Caesar Octavianus. He became triumvir with Anthony and Lepidus, and the struggle between them for supreme power ended in his defeating Antony at Actium, 31 B.C. On his return to Rome, 29 B.C., he did not surrender his command of the military and naval forces, but by degrees strengthened his position by one after another of the higher magistrates. The surname Augustus by which he is usually spoken was conferred on him by the senate, 27 B.C. It did not bestow political power, but suggested a sacred and awful character. As such it was continued to his successors, and designated Nero in Ac. 25. 21, 25. The principal link between Augustus and Jewish history lies in his relations to Herod the Great described by Josephus (15 Ant. vi. 5; vii. 3). Augustus died at Nola, 14 A.D., aged 77. The peace which his reign gave to the Roman world has been regarded as a pre-

---

**Axe**

Augustus’ band (Ac. 27.1). [Army.]

Aur’anus, leader of a riot at Jerusalem (2 Mac. 4.49).

Auteas (1 Esd. 9.48) = Hodiham, 1.

**Authorized Version.** [Version, Authorized.]

Av’ar (properly ‘avawed), a place conquered by the Assyrians and apparently the same as Iwah (2 K. 17.24). [Ivah.]

Av’aram (1 Mac. 2.5) or Sav’aram (6.43), the surname of Eleazar, 8. It probably means the "paler"; but one derivation makes it mean "the piercer," in connection with the feat of 6.

**Avai** (empty).—1. Am. 1.5., a plain mentioned with places in Syria. The LXX. seems to understand On in Egypt.—2. Ezk. 30. 17, mentioned with Pibesethi; this is the Egyptian On or Helopolis, the city of Un (the rising sun), in Egypt.—3. Ho. 10.8 (N. T. 4.15). "The word means apparently "Aven" were idolatrous shrines apparently at Bethel (1 K. 12.29; Am. 7.10), which is now Beitin; for the wilderness of Beth-aven (Jos. 18.2; 13) was E. of Bethel. [C.R.C.]

**Avenger of blood.** [Goel; Homicide; Crimes.]

Avites (Avites), correctly A’rim (as R.V.). The LXX. identifies them with the Hivites, rendering both names by E’ana. In Deut. 2.23 the Avim are mentioned as an ancient race destroyed by the Caphtorim who occupied their land in Hazerim (probably not a proper name, but = villages) "even unto Azzah" (Gaza). It has been inferred that they were one of the ancient giant races of Palestine. In Jos. 13.3 the Avites are mentioned after the five lords of the Philistines, six instead of five districts being enumerated. In Jos. 18.23 a city allotted to Benjamin is called ha’awim = the Avites, and it is noteworthy that the district assigned to Benjamin was Hivite (Jos. 9.27). The word means apparently "tentants of ruins." Some trace of the root may survive at Beit ‘Awak, a group of ruined sites about 12 miles S.W. of Hebron, in the lower hills 30 miles E. of Gaza. [C.R.C.] The Avim have also been identified with the Anakim; and the city ha’awim (Jos. 18.23) is supposed to be a misreading for the Benjamite town of Ai [Samaria] (2 K. 17.31). [Avi.]

**Avith (ruins),** the city of Hadad ben-Bedad, one of the kings of Edom before there were kings in Israel (Gen. 36.35; 1 Chr. 1.46). Perhaps the same as Irith (= ruins). [C.R.C.]

**Awi (mar’ia),** a tool, the only notice of which is in connexion with boring the ears of slaves (Ex. 21.6; Deut. 15.17). The Heb. root means to "pierce," and the cognate Arab. root means to "stab." We may assume that in this form this instrument resembled a small pointed bar of iron. [W.O.E.O.]

**Axe.** Seven Heb. words are rendered "ax" in A.V. (1) garen, from a root signifying "to cut or sever," as "hatchet," from "hak," corresponds to the L.t. securis. It consisted of a head of iron (cf. Is. 10.13, 4), fastened, with thongs or otherwise, upon a handle of wood, and so liable to slip off (Deut. 19.5; 2 K. 8.5). It was used for felling
trees (Deut.20.19), and also, for shaping the wood when felled, perhaps like the modern

EGYPTIAN AXE. (Brit. Mus.)

adze (1K.6.7). (2) herōb, usually rendered sword, is once rendered “axe” (Ezk.26.9), evidently denoting a weapon for destroying buildings, a pick-axe. (3) kaphshil (Ps.74.6) only denotes a large axe. It is also found in the Targum of Je.45.22. (4) maqshrib (2Sam.12.31) and (5) meghērō (1Chr.20.3) are found in the description of the punishments inflicted by David upon the Ammonites of Rabbah. The latter word is properly “a saw,” and is

apparently an error of the transcriber for the former. (6) maʿārādīth, rendered “ax” in the marg of Is.44.12 and Je.10.3, was an instrument employed both by the iron-smith and the carpenter, and is supposed to be a curved knife or bill, smaller than:—(7) gardōm, which was a large axe used for felling trees (Judg.9.48; Ps.74.5, etc.). The words 1, 5, and 7 have an etymological affinity with each other, “cutting” being the idea expressed by their roots.

Azāel (1Esd.9.14) = Asahelel, 4.

Azāe'lus, mentioned 1Esd.9.34, but not Ezr.10.41, as putting away his “strange” wife in the time of Ezra. [C.d.]

Azā'el (R.V. Azael), a name only occurring in Zech.14.5. Perhaps not a proper name. The Heb. may mean, “Ye shall cleave the ravine of my mountain: for the ravine of the mountains shall come close”—referring to the cavities, as in the next clause. [C.r.c.]

Azā'lah, the father of Shaphan the scribe in the reign of Josiah (2K.22.3; 2Chr.34.8).

Azāniah, the father or near ancestor of Jeshua the Levite (Ne.10.9).

Aza'phion (1Esd.5.33; R.V. Assaphiion) = Sophereth.

Azā'ra, one of the “servants of the temple” (1Esd.5.31).

Azā'rael, a Levite-musician (Ne.12.36).

Azā'reel (R.V. Azārel).—1. A Korhite who joined David at Ziklag (1Chr.12.6).—2. A Levite-musician of the family of Heman (25.18); called Uzziel in 25.4.—3. Son of Jeroham, prince of the tribe of Dan when David numbered the people (27.22).—4. A son of Bani, who put away his foreign wife on the remonstrance of Eliza (1Ezr.8.11); apparently = Esriel in 1Esd.9.34.—5. A priest, the son of Ahasai (Ne.11.13). [H.c.r.]

Azāri'h, a common name in Heb., especially in the families of the priests of the line of Eleazar, whose name has the same meaning as Azariah. It is nearly identical, and often confounded, with Ezra, Zerubbabel, and Seraiah.—1. Son of Ahimaaz (1Chr.6.9).

He appears from 1K.4.2 to have succeeded Zadok, his grandfather, in the high-priesthood, in the reign of Solomon, Ahimaaz having died before Zadok. [AHIMAAZ.] To him, instead of to his grandson, Azariah the son of Johanan, probably belongs the notice in 1Chr.26.30, “He it is that executed the priest's office in the temple that Solomon built at Jerusalem.”—2. A chief officer of Solomon's, the son of Nathan, perhaps David's grandson (1K.4.5).—3. Tenth king of Judah, more frequently called Uzziah (2K.14.21, etc.). He is called "Azriyahu;" the son of Zerahiah, though Zerahiah is the more probable reading (1Chr.2.8).—5. Son of Jehu and grandson of Obed, of the family of the Jerahmeelites, and descended from Jasar the Egyptian slave and son-in-law of Sheshan (2:38,39). He was possibly identical with one of the captains of the hundred, the sons of Zerahiah, called the son of Obed (2Chr.23.1).—6. The son of Jo'hanan and father of Amariah (1Chr.6.10,11; cf. Ezr.7.3, where several preceding generations are omitted). He was probably high-priest in the reigns of Abijah and Asa, as we know his son Amariah was in the days of Jeshua. —7. Another Azariah is inserted between Hilkiah, in Josiah's reign, and Seraiah, who was put to death by Nebuchadnezzar, in rChr.6.13,14. The name may have been inserted here to assimilate the genealogy to that of Ezr.7.1.—8. Son of Zephaniah, a Kohathite, and ancestor of Samuel the prophet (1Chr.6.36). Apparently the same as Uzziah in ver. 24.—9. Azariah, the son of Oded (2Chr.15.1), called simply Oded in ver. 8, was a remarkable prophet in the days of king Asa, and a contemporary of Azariah the son of Johanan the high-priest, and of Hanani the seer. —10, 11. Two sons of Jehoshaphat, king of Judah (21.2).—12. In 22.16 Azariah is succeeded by his son Azariah (10.11); apparently = Esriel in 1Esd.9.34. —13. Son of Jeroham, one of the captains of Judah in the time of Athaliah (23.1).—14. The high-priest in the reign of Uzziah, king of Judah. The most memorable event of his life is recorded in 26.17-20. When king Uzziah, elated by his prosperity and power, transgressed against the Lord his God, and went into the temple of the Lord to burn incense upon the altar of incense,” Azariah the priest, accompanied by eighty of his brethren, went in boldly after him, and withstood him. Azariah was contemporary with Isaiah the prophet, and with Amos and Joel, and doubtless witnessed the great earthquake in Uzziah's reign. —15. Son of Jo'hanan, one of the captains of Ephraim in the reign of Ahaz (28.12), who sent back the captives and spoil that were taken in the invasion of Judah by Pekah.—16. A Kohathite, father of Joel in the reign of Hezekiah (29.12).—17. A Merarite, son of Jehaleel, in the time of Hezekiah, the son of Nepheg, the son of the prince (29.12).—18. The high-priest in the days of Hezekiah (31.10,13). He may have co-operated with the king in the thorough purification of
the temple and in the restoration of the temple services. He succeeded Urijah, the high-priest. He repaired the temple of Maaseiah, who repaired part of the wall of Jerusalem (Ne.3.23-24). — 20. One of the leaders of the children of the province who went up from Babylon with Zerubbabel (7.7). Called Seraiah (Ezr.2.2) and Zacharias (1Esdr.5.8). — 21. One of the Levites who assisted Ezra in educating the people in the knowledge of the law (Ne.8.7). Called Azarias in 1Esdr.9.43. — 22. One of the priests who sealed the covenant with Nehemiah (Ne.10.2), and probably the same as the Azariah who assisted in the dedication of the city wall (12.33). — 23. (J.e.45.2) | EzEANIAH. — 24. The original name of Abed-Negev (Dan.1.6,7,11,19). — 25. (9.13) possibly = Urijah. 3. — 26. (9.48) = Azariah, 21. — 27. Priest in the line of Ezra (2Esdr.1.1), elsewhere Azariah, 7, and Ezeriahs. — 28. Name assumed by the angel Raphael (2Chr.5.12,6,6.13,7,8,9,2). — 29. A captain in the army of Judas Maccabaeus (Mac.5.15.8,56,60). — 30. Azaz' Ash, the Reubenite, father of Bela (1Chr.5.5). — 31. Azaz' Al. A Levite-harpist when the ark was brought from the house of Obed-edom to Jerusalem (1Chr.15.21). — 32. The father of Hoshea the prince of Ephraim when David numbered the people (27.20). — 33. One of the Levites in the reign of Hezekiah, who had charge of the tithes and dedicated things in the temple (2Chr.31.13). — 34. Azbaza'reth, king of the Assyrians, probably a corruption of Esar-haddon (1Esdr.5.6). — 35. (cf. Ezr.4.2). — 36. Azbuk', father or ancestor of Nehemiah the prince of part of Beth-zur (Ne.3.16). — 37. Az€'ak'ah, a town of Judah, with dependent villages, lying in the shaphela, near Shocoh (1Sam.17.1). Joshua's pursuit of the Canaanites after the battle of Beth-horon extended to Azekah (Jos.10.10,11.15-35), which was fortified by Rehoboam (2Chr.11.8), and was still fortified with the tower of the watchman in the Babylonian invasion (Je.34.7), and is mentioned as one of the places reoccupied by the Jews after the Captivity (Ne.11.30). The position of Azekah is still doubtful. [c.r.c.] — 38. Azel, a descendant of Saul (1Chr.8.37,38,9.4-14). — 39. Azem', a city in the extreme S. of Judah (Jos.15.29), afterwards allotted to Simeon (19.3). Called in 1Chr.4.29 Ezem. — 40. Azephurith (R.V. Arshiphurith). The name answers in the LXX. of 1Esdr.5.16 to Jorah in Ezr.2.18 and Hariph in Ne.7.24. It perhaps originated in a mistaken combination of the names, C being read for X. The Vulg. omits it. [c.e.d.] — 41. Aztas. [Cehlan.]. — 42. Azgad'. The children of Azgad, to the number of 1,222 (Ezr.2.12: 2,322, Ne.7.17), were among the kenyen who returned with Zerubbabel. A second detachment of 110, led by Johanan, accompanied Azgad in the second caravan (Ezr.8.12). They joined in the covenant (Ne.10.15). The name appears as Astath in 1Esdr.8.38 and Sadas in 5.13, where the number is given as 3,222.
PLATE IV

WORSHIP OF THE SUN-GOD AT SIPPARA, c. 900 B.C.
(From a stone tablet in the Brit. Mus.) See art. "Baal."

SARCOPHAGUS FROM SIDON.
(Hamdi Pasha supposed this to be the tomb of Alexander the Great, but this is highly improbable. See art. "Sidon.")
BAAL

B

Ba'al.—1. A Reubenite, father or ancestor of Beerah (1Chr.5.5).—2. The son of Jehiel, father or founder of Gibon, by his wife Maachah (1Chr.8.30; 9.36).

Ba'al (plur. ba'älîm), a word found in all the Semitic dialects in the sense of master, owner (not ruler), as, e.g., owner of a house, land, ox, etc. It is also used in the sense of husband, though not applied to the owner of a slave. Some suppose it was used in N. Israel as equivalent to the word 'adôn (lord) used in the S., but the words are not equivalent. It is found particularly in connexion with the local worship of the Canaanites, which the Israelites found on their entrance into Canaan, and to which they so largely conformed. A local divinity was supposed to have his seat in a particular spot or district of which he was lord, and to exercise special influence over the agricultural operations of his more elaborate Israelites, in their transition from a pastoral to an agricultural life, became habituated to the modes of speech of their neighbours, and conformed to their customs, celebrating the days of the ba'älîm, and giving offerings of the produce to the local deities who were supposed to control the operations of nature. Microscopically this was the more insidious that the word ba'al, or lord, harmless enough in itself, was actually applied by the Israelites to their own God, and they no doubt persuaded themselves that they were giving Him reverence by this service. The result was practically the worship of the ba'älîm, with all its impurities, in the name Jehovah (Ho.4.13,14). So it was reprobated by the prophets as a defection from the worship of Jehovah; and so heinous did it appear to Hosea that he rebuked it as open idolatry, and said the time would come when Israel would see its error, and the very name ba'al would be so abhorred that it would not be mentioned. [ISHT.] Hence later writers substitute for it the word bôsheth (shame) in compound words forming proper names, writing Ishbosheth for Ishbaal, Mephibosheth for Meribbaal, etc., though these names had been at first used without any conscious reference to the Baal-worship. This influence in families most devoted to the Jehovah religion. As the word Ba'al has never been confined to Hebrew, so we find Baal-worship outside the bounds of Palestine. The Baal of Tyre was Melkart, and it was the worship of this deity that was introduced into N. Israel by Ahab, under the influence of his Sidonian wife Jezebel. This seems to have been a worship of a much more moderate type than that of the local ba'alîm (1K.18.22); and though perhaps it was not designed by Ahab to take the place of the worship of Jehovah, Elijah perceived clearly that the nation must choose between the two, and made that solemn appeal and trial by fire which gave a check to the foreign worship. It is, however, to be noted that though this form of Baal-worship was stamped out by Jehu at a succeeding time, the worship of the local ba'alîm, associated from time immemorial with the cultivation of the soil, and claiming to be not inconsistent with the acknowledgment of Jehovah as a national God, was still practised, as the book of Hosea shows. Though put down from time to time by reforming leaders, it ever again asserted itself (cf. Judg.6.25 with 8.33, Judg.10.10 with iSam.7.4, 2K.3.2), and seems never to have been permanently abolished till the Exile (2K.17.16). In the Assyro-Babylonian religion the name occurs in the form of Bel, who is one of the first triad of gods, the god of the earth, as Anu is god of the heavens, and Ea the god of the abyss. At a later stage he became identified with Marduk, the city-god of Babylon. Among worshippers of the heavenly bodies the name Baal would be naturally, and apparently was sometimes, given to the sun: but this does not warrant the conclusion that Baal was originally the sun. In 2K.23.5 the worship of Baal is distinguished from the worship of the sun. The name enters into a great many compounds, denoting the god of a locality or potency, and then the name of the place of this supposed influence. It also occurs in the formation of some personal names. The chief of these compounds (besides the place-names in next art.) are:—1. BAAL-BERITH' (lord of covenant), also called El-berith, a deity worshipped at Shechem (Judg.9.14,16).—2. BAAL-GAD' (lord of good fortune), in the valley of Lebanon under the name of Baalbek, or Baalbek, or Baal, and some with Ba'albek, by others supposed to be the same as Baal-hermon, and located at Hasheba (see next art. and GAD).—3. BAAL-HAANAN' (Baal has been gracious), proper name of (a) one of the kings of Edom (Gen.36.38), (b) one of David's officers (1Chr.27.28).—4. BAAL-PÉOR' (lord of the IEA) (see art.) one deity, into whose impure worship the Israelites fell (Num.25.3).—5. BAAL-ZEBUB' (q.v.). W. Robertson Smith, Religion of the Semites, lect. iii.; F. Baethgen, Beiträge zur semitischen Religionsgeschichte (1888), pp. 17 ff. [J.R.]

Baal, Baalah, Baalah (geographical). "High," an element in various town names.—1. BAAL (1Chr.7.37) on S. beach of the Beer-sheba desert, called also BAALATH-BEER (Jos.19.8; height of the well), otherwise Ramath-neghebeh (1Sam.30.27; height of the dry region). The site is unknown.—2. BAALAH (Jos.15.9), BALAH (2Sam.6.2), or KIRJATH-BALAL (Jos.15.60; 18.14), names for KIRJATH-HARIM ("Emek,' or "Plain of Elam," a district in Jud.20.14), tablets, in 15th c. b.c., as Bithelath (Berlin 106), rebelling from Jerusalem (see 9.17).—3. Mount BAALAH (15.11), the high land W. of Ekron.—4. BAALATH, a town of Dan (19.44), near Gezer and Beth-horon (8 Ant. vi. 1), fortified by Solomon (1K.9.18), possibly the village Bel'aha (Can.8.11), is unknown till Bethhoron. —5. BAAL-GAD', the N. limit of Joshua's conquests "in the valley of Lebanon," and "under mount Hermon" (Jos.11.17; 12.7, 13.5), perhaps at 'Ain Jedeideh, in the road to Damascus, N. of Hermon. See also preceding art.—6. BAAL-HAMON, where Solomon had a vineyard (Can.8.11), is unknown, unless we may read BAAL-HERMON (Jos.11.23; rChr.5.23), Hermon being noted for the vineyards on its slopes.—7. BAAL-HAZOR, near the town of Efipram (2Sam.13.23), now the high summit Tell 'Asur, N. of Bethel, and E. of the road to Shechem.—8. BAAL-MEON (Num.32.38; 1Chr.5.8), a town of Reuben near...
NEBO; Eusebius places it 9 miles from Heshbon (Onomasticon), which is correct for Ma‘aim, a high mound with Byzantine ruins S. of Heshbon. On the Moabite Stone (after 900 B.C.) it is called BETH-Baal-MeOn, as also in Jos.15:17; and Je.48:23 BETH-MEOn.—9. BAAL-PERAZIM (2Sam.5:20), a hill near the valley of Jericho, S.W. of Jerusalem.—10. BAAL-SHALISHA (2K.4:42), perhaps in the land of Shalisha (1Sam.4:4). Eusebius places it 15 Roman miles N. of Lydda; perhaps at Kefer Thilith (the Arab. th being the Heb. sh), 18 miles N. of Lydda.—11. BAAL-TAMAAR (hill of the palm), near Gibeah of Benjamin (Judg.20:33), perhaps near the palm S. of Bethel (4:3).—12. BAAL-ZEPHON (height of the north; Ex.14:29), near the old head of the gulf of Suez. [C.R.C.]

Baale of Judah. [BAAL, geogr. 2.]

Baali. [Isit.]

Baalim. [BAAL, the god.]

Baalits, the Ammonite king who used the traitor Ishmael to slay Gedaliah (Je.40:14). [ISHMAEL, 6.]

Baal-zephon (2:19; 7:2); LXX. Baal Mu‘arr, 2K.1:2,3,6,16), the Philistine god of Ekron, whose oracle was so famous, that when Ahaziah, king of Israel, was dangerously sick, he sent to inquire of it whether he should recover, and was accordingly rebuked by Elijah. The name Baal-zephon (lit. lord of flies), assumes it to be correct, would probably mean among the Philistines, "he who sends and averts plagues of flies"; cf. the worship of Zeus are the averter of flies in Ellis, attested by Pausanias and Clement of Alexandria. But probably the second component, 22[2] (z'bæbh = fly) is a contemptuous Jewish substitute (cf. the substitution of bosheth, shame, for Baal) for an original 22; bæbh, lofty abode, a word used of Solomon's temple (1K.8:13), and of heaven (Is.63:15; Hab.3:11). The true form, therefore, is Baal-zebul (cf. N.T. Beel'zebul), and the true meaning is, either, lord of the temple (at Ekron), or (more probably) lord of the earth (at LXX. wrongly renders Baalszephon "the lord of the land, Zebul") the meaning of the LXX. wrongly renders Baal-zephon "the lord of the land of Zebul." Josephus has a further error. Misled by the feminine article of the LXX. (of 77 Baal Mu‘arr, 2K.1:2,6,16), which merely indicates that, in reading, aqīxv (shame) is to be substituted for the hateful word Baal, he makes Baal-zebul a goddess (v. Ant. ii. 1). In N.T. the word occurs 7 times (Mt.10:25,12:24,27; Mk.3.22; Lk.11.15. Mt.12:23). It is a title of Satan, an application natural enough at a time when the gods of the heathen were generally identified with demons. The true N.T. form is undoubtedly Beel'zebul, Bezzeboul (W. H. 's Beelzebul is a palpable blunder), and the N.T. meaning is, therefore, "lord of the abode" (cf. the play upon the meaning, Beel'zebul = abode; of Satan), always a title of Satan being understood to be not human, but hell. J. Lightfoot's suggestion that Bezzeboul is a contemptuous alteration of Baal-zebul (lord of flies) into 22[2] 22, ba‘al zebhel (=lord of dung), is less probable. Baudissin in Theol. f. prot. Theol., "Baal and Bel"; Enc. Bib., arts. "Baal-zephon," "Beel-zebul." [C.R.C.]

Babel, Babylon.

Baal. —1. Solomon's officer in the towns of Issachar (1K.4:12). [Jehoshaphat, 4.—2. The father of Zadok who assisted in rebuilding the wall of Jerusalem under Nebuchadnezzar (Ne.3:4).—3. (1Es.5.5) = Baanah, 4.

Baanah. —1. Son of Rimmon, a Benjamite, who with his brother Rechab murdered Ishbosheth. For this they were killed by David, and their mutilated bodies hung up over the gates at Hebron (2Sam.2:5-6).—2. A Netophathite, of the tribe of Gad, one of David's mighty men (2Sam.23:29; 1 Chr.11:30).—3. Accurately Baana, son of Hushai, Solomon's commissariat officer in Asher (1K.4:16).—4. One of the "guides" of Zerubbabel on his return from the Captivity (Ezr.2:2; Ne.7:7; = Baana in 1Es.5:5). Possibly the same person is intended in Ne.10:27.

Banaas = Benazah, 8, of the sons of Phorosh = Phorosh (1Es.9:26; cf. Ezr.10:25).

Baara, one of the wives of Shaharaim, a descendant of Benjamin (1 Chr.8:8).

Baaseiah, a Gershonite Levite, forefather of Asaph the singer (1 Chr.6:40[25]).

Baasha. c. 925-902 B.C., 3rd king of the separate kingdom of Israel founded on that of its 2nd dynasty. He was son of Ahijah of the tribe of Issachar, and conspired against king Nadab, son of Jeroboam, when besieging the Philistine town of Gibbethon (1 K.15:27), and killed him with his whole family. His origin appears to have been humble (16.2). He made war on Asa, probably in the 3rd year of the latter's reign (Chronology), and began to fortify Ramah. He was defeated by the unexpected alliance of Asa with Benhadad I. of Damascus. Baasha "walked in the way of Jeroboam," and therefore Jehu, the son of Hanani, pronounced against him Jeroboam's tate (16.1-4); he himself, however, died a natural death in the 24th year of his reign, and was buried in the beautiful city (Can.6.4) of Tirzah, which he had made his capital (1 K.16:6; 2 Chr.16:1-6). [C.R.C.]

Babel, Babylon, was properly the capital of the country called, in O.T., Shinar, and in later times Chaldea, or the land of the Chaldees, who were called the proper name of Babylon, the root word of the Accadian word for Erech, Accad, Calneh, and other cities, is doubtful, but it is certain that it existed in the time of Sargon of Agade (c. 2200 B.C.), or even earlier. It probably attained the position of capital of the country c. 2000 B.C., when the "Duchy of Babylon" ruled, the provinces not included being Elam (10.14.1) and the southern states, which last always retained a measure of independence. According to Herodotus, the city formed a vast square of 120 stades each way (close upon 14 miles, or nearly 50 miles in circuit). It was surrounded by a deep and broad ditch, and by a wall 50 cubits high, 200 cubits broad, and 200 cubits high, with 100 gateways with brazen gates. The city was situated on both sides of the Euphrates, and at the point where the wall met the river, return-walls in the form of ramparts stretched along each bank. Its houses were of three and four stories high, and the roads by which it was entered. It was a straight line of about 24 miles, and the river was closed by brazen gates set in the ramparts. Within the great outer wall was another "not much weaker, but enclosing a
smaller space." In each division of the city was a building, one being the king's palace, large and "strongly fortified around," and the other the great temple of Belus. The latter was a tower in stages to the number of eight, with a sanctuary at the top in which the god was said to visit the woman who dwelt there. [BABEL, TOWER OF.] The two divisions of the city were united by a bridge formed of stone piers connected by movable platforms, said to have been built by queen Nitocris when she changed the course of the Euphrates to prevent invasion. Ctesias gives the circuit of the city as 360 stades only (rather less than 4½ miles). The two divisions were connected by a bridge 5 stades (more than 1,000 yds.) long, and 30 ft. broad, of the kind described by Herodotus. At each end was a royal palace, that in the eastern city being the grander of the two. Besides the bridge, the two palaces were also connected by a tunnel under the river! Ctesias' description of the temple of Belus has not come down to us. All the ancient writers represent Babylon as occupying a tract of large size, and enclosed within lofty walls, but their estimates differ. (To the above may be added Strabo, 385 stades; Q. Curtius, 368; and Clitarchus, 365 stades.) From Herodotus' and Diodorus' descriptions it seems clear that this space was not covered with houses, and Q. Curtius says that as much as ninetenths consisted, even in the most flourishing

ATTENDED RESTORATION OF BABYLON.
times, of gardens, parks, paradises, fields, and orchards. The reference to the height of the gates of Babylon and the breadth of her walls (Je.51:58; cf. 50:15 and 51:53) indicates that it was these dimensions, rather than their extent, that were renowned. About 21 in. has been suggested as the length of the royal cistern, which would make their height, as indicated by Herodotus, about 360 ft., which is clearly impossible. According to Ctesias, the wall was strengthened by 250 towers, irregularly disposed so as to guard the weakest parts (including, probably, the gates).—The Ruins. These lie about 5 miles above Hillah, on the E. bank of the Euphrates, and consist chiefly of three great masses of buildings. The northernmost is a squarish mound called Babil; some distance S. is a group of mounds designated al Mujeilibeh, “the overthrown,” the lower one, which is called the Qasr, or “castle,” being the most considerable. Still farther S. is the mound ‘Amrān ibn Ali, so called from the tomb which, with the sanctuary named Ibrahim al Khālil, occupies the summit. ‘Amrān is about 650 yds. long by 440 wide, and has at its N. end a depression about 110 yds. square, called al Nabopolassar (or Nabū-pāl-iššar), i.e. “the mound named Merkes—i.e. “centre,” on account of its position. All these mounds are enclosed by the remains of the ancient wall of the city. Beginning by the old bed of the Euphrates W. of Babil, it runs E. for about 660 yds., and bending S. (350 yds.), runs S.E. for a couple of miles. Being then E. of the mound Merkes, after a gap, it turns almost at a right angle and goes S.W. towards the Euphrates for about 15 miles, where its traces are lost. The wall probably made a slight bend and then ran to join the two small isolated mounds, and then continued on to the river. The wall on the W. bank is practically the remains of a rectangle, and seems to be a continuation of that dividing the Qasr mound into two parts, its N. end being distant from it about 1 mile 200 yds. in a W.S.W. direction. It then makes a right angle, and runs for about 1 mile 220 yards S.S.W., when it again bends, and after running N.E. for a short distance, is lost. Extensive gaps occur on all three sides. In the eastern division of the city, E. of the group al Ahmarch, is a rampart which is regarded as part of the inner wall of the city, running nearly N. and S., with a break, the point near the southern part of the great outer wall. As has long been known, the Euphrates (see p. 1007) took a much straighter course than now. It entered Babylon close to the mound Babil. N. of the Mujeilibeh it occupies its old bed, but anciently, instead of making two bends to the W., it practically skirted the river, and ran almost in a line, making a couple of bays, and a few 200 yards farther. The outer wall, which is Southwards again. The Arafah Canal began some distance N. of the Qasr, skirting its eastern side, and continued S. past the mound ‘Amrān, entering the river W. of Babil, E. of the city. Two other canals are indicated by Weissbach—the Merodach Canal N. of the Qasr, fed from the Euphrates, and the canal Libīl-hēgalla S. of the same, running from the Euphrates to the Arafah. The most important ruin is the Qasr, or castle, regarded as being the remains of the great palace at Babylon. It seems at first to have consisted only of the building S. of the continuation of the western city wall, and had been several times destroyed and rebuilt. After its restoration by Nabopolassar, it was devastated by an overflow of the Euphrates, whereupon Nebuchadnezzar enlarged it, rebuilding it with baked brick so firmly that the lower portion remains still in existence. Its roof was of cedar, and its doors of cedar covered with bronze. The thresholds were of bronze, and the palace was adorned with gold, silver, and costly stones. On the N. side of the wall he built another edifice to serve both for fortress and royal residence. It was connected by a corridor with the old palace already referred to. This building is said to have been completed (without the decorations, apparently) in 15 days (India House Inscr.-
to the Chamber of Fate. Near it seems to have been Bit niqē, "the temple of Offerings," but its position has not yet been ascertained—possibly it lies under the mound Aḫmāreh. Weissbach is of opinion that some of the chambers of Dū-azaga, "the Holy Seat," as the Chamber of Fate was called, exist where the N. end of the procession-street meets the Merodach Canal. The mound al Aswad conceals the ruins of a temple called E-pa-tu-tilla. Among the temples still to be discovered are

**VIEW OF BABIL FROM THE WEST**

W.D.A.
made war in N. Babylonia. Another, Lugalzag-Si, king of Kiš, fought in Babylonia, and carried his arms as far as the Mediterranean. Both these kings reigned before 4000 B.C.

Of special interest is the state of Lagáš (Tel-leh), the growth of which can be traced in its records. In the time of Uru-ka-gina, Lugalzag-Si made an inroad, and spoiled all its palaces and temples. In 3800 B.C. (according to the chronology of Nabonidus), or somewhat later, the Lagashian king владил the city of Agád, whose dominions extended from the Persian Gulf to the Mediterranean, though whether his rule was effective or not over that extent of country is uncertain. His son Náram-Sin was also a conqueror, and a wonderfully beautiful bas-relief showing him marching over the mountains has been discovered at Sussa. About 2600 B.C. came the dynasty of Ur (of the Chaldees), the greatest of whose kings was Dungi, with a reign of 58 years. He warred in Elam on the E. and Marash on the W. Rather earlier than 2000 B.C. came the dynasty of Babylon, which, not-withstanding the name, was of a foreign origin. Sixth in the list of kings we find the name Hammurbâ, who is identified with the Amraphel of Gen. 14. Contemporary with him was Eri-Aku (Arioeh) of Larsa (Elasar), who seems to have been succeeded by Rim-Sin, the king captured by Hammurbâ in the 31st year of his reign. During this period other dynasties ruled in the S., and came into conflict with Sannin-iluma, Hammurbâ's son and successor. About the 15th cent. B.C. the Kassites became masters of Babylonia, but gradually assimilated with the people whom they governed, though Kassite names constantly occur. For many centuries the power of Assyria had been growing, and its kings began to interfere actively in Babylonian affairs. One of these occasions was when Assur-tuballit (c. 1400 B.C.) invaded Babylonia to avenge the murder of king Kadasman-murus, his daughter's son, and set Kuri-galzu on the throne. It was apparently a third Kuri-galzu who was challenged by Dur-Durri, king of Elam, to fight at Dur-Durri, which he accepted by this, Kuri-galzu attacked the Assyrians, but was defeated at Sagun on the Tigris. We are not surprised to find, after this, an Assyrian king, Tukulti-Nirig (c. 1300 B.C.) ruling the country. In the reign of Nabi-nasir (Nabonassar), who came to the throne in 747 B.C., there was a feud between the Babylonians and the Borsippites. In 726 B.C. the Assyrian king Tiglath-pileser III. took the throne. He appears in the royal list as Pul (Pul). 727 B.C. saw the accession of Shalmaneser IV. (Elilacæus), Sargon followed him on his death in 722, but being occupied with the E., confided the government to his Babylonian province, and Merodach-baladan seized the throne three months later. Sargon made good his position in Babylonia, however, and was succeeded by his son Semacherib in 705; but in 704 Merodach-baladan again took the throne. Having deposed him, Semacherib set on the throne Bel-ilum, a Chaldean, but his rule not being satisfactory, he was replaced in 700 B.C. by Assur-nadin-sum, Semacherib's son, who reigned 6 years. This prince was captured by Ḫallušu, king of Elam, whereupon Nergal-usgib (Szuzb) mounted the throne. Taken prisoner by the Assyrians after a troubled rule of 17 months, he was followed by Merodach-nisrâ (U Bryan), who reigned in 682 B.C. He being captured in his turn by the Assyrians, Semacherib again mounted the throne (689 B.C.), which he occupied until his death in 681. Semacherib's ravages during the final struggle for supremacy were remembered by the Babylonians long afterwards. His son Esar-haddon (680-681 B.C.) was successful in the people by rebuilding the destroyed temples, but met with much discontent. He was succeeded by his second son, Šamaš-sum-ukin, in 669 B.C. This ruler incurred the enmity of his brother Assur-bani-apli, king of Assyria, and fearing to fall into his hands, set fire to his palace and perished in the flames. The next three rulers were Kandalana, who reigned from 669 to 625 B.C., and accompanied by the same as Assur-bani-apli, his son Assur-ēt-il-ilani, and Sin-sarra-iskun (Sara-cos). Nabopolassar is thought to have been a general in the army of the last-named, who, having been sent to Babylonia to put down a revolt, turned his arms against his royal master, and became king of Babylon. His reign of 21 years (625-604) was a most successful one, and under him Babylonia again became a great power. Wishing to conquer Syria, he sent his son Nebuchadnezzar with an army to reduce the country to submission, but died at Babylon whilst the operations were in progress. Nebuchadnezzar succeeded him in 604. He reduced Jéboiaikin to submission (2 K. 24. 1 ff.), and later on captured Jerusalem, carrying off Jéboiaikin and his court captives to Babylon (598 B.C.). Jerusalem was besieged and captured again in 586 B.C., when the temple was destroyed, and Tyre and Egypt also felt the force of his arms. Evil-merodach succeeded him in 561 B.C., and showed marked favour to Jéboiaikin. He was murdered by his brother-in-law Neriglisar, who mounted the throne in 559 B.C., and was followed by his son Labâši-Marduk in 556. This last was assassinated after a rule of only 3 years by Enûma-Elû, who assumed the throne 553 B.C. Belshazzar was elected to succeed him. Belshazzar, who held the post of commander-in-chief, seems to have failed to keep the country in a proper state of defence. This attracted the attention of the conquering Cyrus, who sent his general Gobryas of Gut (a part of Media—see Darius), and Babylon was captured in 538 B.C. The case with which the conquest was effected suggests that the Babylonians rather desired the change. Nabonod is said to have been transferred to Carmania, but Belshazzar was apparently killed in an attack on the night of March 11th. As a part of the Persian empire Babylon con- tinued to be a royal residence. Alexander the Great intended to make it the capital of his eastern provinces, but died before he could carry out his plan. To all appearance it was the foundation of Seleucia on the Tigris which gave the death-blow to the prosperity of the city. As a part of the Persian empire Babylon con- tinued to be a royal residence. Alexander the Great intended to make it the capital of his eastern provinces, but died before he could carry out his plan. To all appearance it was the foundation of Seleucia on the Tigris which gave the death-blow to the prosperity of the city. As a part of the Persian empire Babylon con-
until within a decade or two of the Christian era, and perhaps even later (cf. 1 Pe. 5:13). Babylon has formed quite a mine of building-material for the towns around, and still does so. The "great city, the beauty of the Chaldees' excellency," has thus in reality "become heaps" (Ez. 51:37). Her walls have "fallen" (51:14), been "thrown down" (50:15), become "utterly broken" (51:58). A drought is upon her waters (50:38), for the system of irrigation on which, in Babylon, fertility largely depended, no longer carried out in the same systematic way. Her cities are everywhere "a desolation" (50:15), her "land a wilderness"; "wild beasts of the desert lie there," and "owls dwell there" (cf. Layard, Nineveh and Babylon, p. 484, with Is. 13:21, 22 and Je. 50:39). The natives are said to regard the whole site as haunted, and the Arab will neither pitch his tent there nor the shepherd fold sheep (Is. 13:20). For the ruins, see Fried. Delitzsch, Im Lande des einstigen Paradieses (1903); Weissbach, Das Stadtbild von Babylon (1904). For the occurrence of the name in 1 Pe. 5:13 and in the Apocalypse, see Babel, Tower of.

Babel, Tower of. This edifice is only mentioned in Gen. 11:4-5, and is spoken of as having been built of brick, with bitumen (A.V. slime) for mortar, and left in an incomplete state in consequence of the builders ceasing to understand each other. Jewish tradition states that fire fell from heaven, and split the tower through to its foundation; whilst Polyhistor and other writers say that the winds overthrew it. Traditionally the tower of Babel was regarded as the great ziggurat or temple-tower of Nebo at Borsippa (the Birs-Nimrud), though the distance of that site from Babylon is against this identification. Notwithstanding the statement in Gen. 11:8 that the building of the tower was stopped, there is every reason to think that it was ultimately finished, and it is probably the building called "the Tower of Babylon" by Nebuchadnezzar—namely, E-temen-an-kī (the house of the foundation of heaven and earth). N. of the same name is called in that city Esagila, and E-temen-an-ki is called by Herodotus (i. 151) the temple of Belus, and described as a solid step-pyramid within an enclosed space 400 yds. square, to which access was gained through doorways closed by gates of bronze. The stages of the pyramid (not reckoning the lowest, which was the foundation-platform) were seven in number, and an ascent going round the structure gave access to the top. At this point was a chapel or shrine regarded by the Babylonians as the god's dwelling-place, though no statue represented him there; his image, a seated statue said to have been of solid gold, was in a shrine lower down. Before it was a table, and beside this table were the shrines of the gods, and the steps thereto. Outside were two altars, the smaller (for the sacrifice of unwrought lambs only) being of gold. The larger altar was for full-grown victims. A Babylonian description of this building is probably in existence, a tablet containing one having been found. Those of the gods were of brass, and the steps thereto. The temple-area was provided with six gates. The platform within it, however, was square, and its wall had four gates opening towards the points of the compass. The building connected with the ziggurat or temple-tower had on the E. shrines to Nebo and Tasmit, his spouse; on the N. to Ea (Hea) and Nusku; and on the S. to Anu and Bel. On the W. was a building consisting of two wings, to encompass a temple dedicated to Merodach (Belus), for it was there, according to Smith's tablet, that they kept the couch and throne of gold, together with other things of great value. Adopting Smith's measurements, the lowest stage of the tower itself was 300 ft. square by 110 ft. high, and ornamented with recessed groovings which were characteristic of Babylonian architecture. The second stage was 260 ft. square by 60 ft. high, and had apparently sloping or hollow sides. Stages 3 to 5 were 20 ft. high, and respectively 200, 170, and 140 ft. square. The measurements of the sixth stage were a little smaller, but it would still have preserved the same proportion as the others. The text made the seventh stage to be the sanctuary of the god, its dimensions being 80 ft. long, 70 ft. broad, and 50 ft. high. The total height of the structure Smith estimates to have been the same as the length and breadth of the lowest stage—namely, 300 ft. above the plain. Like other temple-towers, the stages were probably tinted with the planetary colours, the order, beginning at the top, being gold, silver, yellow, blue, black, and white, the first two being emblematic of the sun and moon. There was probably no idea of "scaling heaven" in the minds of those who raised either this or any other of the Babylonian temple-towers; the expression used in Gen. 11:4 is a mere exaggeration for great height (cf. Deut. 4:28; Dan. 4:11, etc.), and is not to be taken literally. Diodorus says that the great temple-tower dedicated to Belus was used by the Chaldeans as an observatory (ii. 19), but it is doubtful if there is any confirmation of this. These decretions may have been partly due to the
feeling that, when sacrificing or worshiping, those on the summit were nearer to the deity than on the plain below. It has been stated that the temple-tower at Calan was built over a tomb. See Athenaeus, February 12, 1876; Weissebach, Stadtbild von Babylon (1904), pp. 18-20.

[BABI]

Babylonia, in a special sense the inhabitants of Babylon, were analogous to the colonists planted in the cities of Samaria by the conquering Assyrians (Ezr.4.6). These people were of Semitic stock, but probably had a considerable admixture of non-Semitic (Sumarian) blood, and spoke, from about the middle of the third millennium onwards, the Semitic-Babylonian language. When, however, the warlike Chaldeans became predominant about the 7th cent. B.C., the names Chaldean and Babylonian became almost synonymous (Ezk.23.11,15; cf. Is.48.14,20).

[BABYLONEAN GARMENT]

Babylonish garment (lit. robe of Shinar; Joz 6.17,21). An ample robe ornamented with embroidery, or perhaps a variegated garment. It was worn by such as were uninvolved in the celebrated Babylonian fashion.

Baca', Valley of, a valley through which the Psalmist sees in vision the pilgrims passing in their march towards the sanctuary of Jehovah at Zion (Ps.84.6). The R.V. reads "of weeping," or "of balsam trees." Perhaps habb'elaha is connected with hab b'kham (A.V. madberries; 2Sam.5.23,24), near the Rehobah Valley. (c.e.c.)

Bac'hides, a friend of Antiochus Epiphanes, and governor of Mesopotamia, was sent by Demetrius I. (Soter), 162 B.C., to install Aelius as high-priest in Jerusalem. Having gone to Rome, the latter withdrew (Mac.8,23). After Nicaran's defeat by Judas, Bacchides was again sent into Judaea, and defeated and killed Judas at Elasa (9.1-18). To maintain Syrian dominance there against Jonathan (9.25-32, 45-53), he remained in Judaea till the death of Aelius (160 B.C.), when he returned to Antioch (9.57). He was the 138 B.C., to hold a Parliament in Jerusalem, at the request of the Syrian party there, but met with ill success, and was glad to make terms with Jonathan and withdraw (9.68-72).

Bach'rus, one of the "holy singers," who had taken a foreign wife (1Esdr 9.24). Possibly the name of the "longer" text of Ezr.10.24, which is not otherwise represented in 1Esdr., has got displaced and corrupted into Bacherus (see Speaker's Comm., on 1Esdr., l.c.).

Bacchus. [DIONYSIA.]

Bacenor (2Mac.12.35), apparently a captain of horse in the army of Judas Maccabaeus: 9:7; or possibly a title of the company.

Ba'chites, The, the family of Pocah, son of Ephraim (Num.26.35).

Badger-skins. The Heb. tab'ash, which A.V. renders "badger," occurs in connexion with or, ‘orod (skin, skins), in Ex.25.28,29,14, 25.7,32,36.10; Num.4.14,25. In Ezk.16.10 "tabash" occurs without 'orod; and is mentioned as the substance out of which women's shoes were made; in the former passages the tabash skins are named in relation to the tabernacle, ark, etc., and appear to have formed the exterior covering of these. There is much obscurity as to the meaning of tabash. Most ancient versions give some agreement in this, not an animal, but a colour, either black or sky-

BADGER-SKINS
blue. It is difficult to understand why it should be thus interpreted, since there is no justification for such a meaning, either from etymology or from cognate languages; while from Ex. 35. 23 taššāh seems to be a common original. It is frequent in the Exodus, and the construction of the sentences where the name occurs points to a skin rather than a colour. In the German of Luther and in A.V. it is translated `badger'; but although a badger (Meles fuscus canescens) near akin to the European animal is common in the Central parts of Palestine, it is certainly cannot occur in the Sinaiic desert in numbers sufficient to have furnished skins for the purposes indicated. On the other hand, taššāh appears equivalent to the Arab. takhas, a term which seems to be applied to the Red Sea porpoises, dolphins, and dugongs; Tristram adds seals, which are, however, absent from the seas connected with the Indian Ocean. The Red Sea dugong has been named Halicore tabernaculi on the supposition that its skin, which forms excellent leather, constituted the real taššāh. Dugongs and manatis (Manatus), collectively known as sea-cows, are marine and estuarine mammals constituting the family Odontoceti. Although often confounded with whales and porpoises (Cetacea), they are really more nearly akin to elephants.

Bag. (1) *[bārī†]* (k.5.23; Is.3.22; A.V. *crisping-pin, R.V. *satchel*), only in plur. used to carry money, or as a lady's ornament, to give to indications as to size, shape, or material. (2) *kēš*, a bag for carrying weights (Deut.25.13; Pr.16.11; Mi. 6.11), also used as a purse (Pr.1.14; Is.46.6). (3) *kōlī†*, translated "bag" in 1Sam.17.40, 49, is a word of most general meaning (see Gen.42.25; 1Sam.9.7). The shepherd's "bag" which David had seems to have been worn by him as necessary to his calling, and was probably, from a comparison of Zech.11.15,16 (where A.V. *instruments* is the same word), for the purpose of carrying the lambs which were unable to walk, and contained materials for healing such as were sick and binding up those that were broken (cf. Ps.54.4.16). (4) "[bāg] properly "a bundle" (Gen.42.25; 1Sam.25.29), appears to have been used by travellers for carrying money during a long journey (Pr.7.20; Hag.1.6; cf. Lu.12.33, Tob.9.5). In such "bundles" the priests bound up the money which was contributed for the restoration of the temple under Jehoiada (2K.12.10; A.V. *pledge, R.V. *in bags*). The "bag" which Judas carried was probably a small box or chest (1Jn.12.5-13,29; γωνακόμων, used in L.X.X. for "chest" in 2Chr.24.8,10,11). In Lu.12.33 ἀλλάξτων is used for "bag" (A.V. *purse in 10.1,22.25,36*).

Bag (1Esdr.8.10) = BİGVA. 1.

Bagas (Jth.12.11.13,15.13,13.14-14). The name of Hellenes' confederate enemy is probably borrowed by the author of this apocryphal romance from that of the favourite Egyptian enemy of Artaxerxes III. of Persia. The historical Bagas poisoned Artaxerxes in 338 B.C. and killed Arses 3 years later, but was himself put to death in 334 B.C. by Darius Codomannus. The name is Persian (Bagavas or Bagavô nom., cf. Skt. bhagavân, "fortunate," "lucky"); Akhæmenian Pers. *baga*, "god"; Avestic *baga, bagha, bagā*; "lot," "gilt," "bagā* "wealth"). Another form is Largearus (Hebr. b.31.6; II Chron. ii).

Bagol (1Esdr.5.14) = BİGVA. 1.

Bahurim (youths), a town of Benjamin (2Sam.3.16,15.17.15.19.16), on David's route to Mahanaim (1K.2.8). The hero Azavemeth was a Bahurumite (1Chr.11.33), or a Bahurumite (2Sam.25.3), probably of Bahurim. The Targum of Jonathan reads "Almon for Bahurim, perhaps only as meaning "youth," but suggesting Almon ("Almit"), a little N. of the old road to the Jordan Valley, which crosses N. of the mount of Olives. It is remarkably also that Bēth-azavemeth (now Hizmeh) is only a mile N.W. of the tomb of Olives. It is the metaphorical that in the “hill side” slopes thence, separated from it by a ravine to “go over” (see 2Sam.16.9.13). [C.R.G.]

Ba'jith (the house; R.V. Bayith, Is.15.2), preceded by the def. article in the Heb. The LXX. does not mention it. Perhaps a "temple." [C.R.G.]

Bakkakkar, a Levite, apparently a descendant of Asaph (1Chr.9.15).

Bakbuk', "Children of Bakbuk" were Nethinim who returned from captivity with Zerubbabel (Ezr.2.51; Ne.7.53).

Bakbukiah. - 1. A Levite in the time of Nehemiah probably the same as 2. A Levite porter (Ne.12.25).

Baker, Baking. [BREAD.]

Balaam, son of Beor (Num.22.5), lived at Pethor in Mesopotamia (Deut.23.4), and was summoned hence, "brought from Aram out of the mountains of the East" (Num.22.7), by Balak, prince of Moab, in order to curse Israel. The morphology of desire and reluctance in his mind with regard to Balak's request has led to many studies of Balaam's character, most noteworthy of which is that by Bishop Butler, containing the clever suggestion that in Mi.6.5ff. we have the traditional dialogue which took place between the two writers. He comes to Balak from the high places of Baal, next he goes to the field of Zophim near the caem of Nebo, and lastly to the cliff of Peor, on the narrow spur which runs out to Minyeh, each of which was a place sacred to one of the Moabite deities corresponding to Abu, Apollo, Mercury, and Priapus, and at each seven altars were raised, one to each of the seven planetary gods, whose aid was invoked against the God of Israel by the sacrifice to each of a bullock and a ram. But at each place Balaam, wishing to curse, blessed, and at last, recognizing his defeat, "he went not, as at the other times, to seek enchantments, but hid his face towards the wilderness." Then "the Spirit of God came upon him," and, to Balak's disgust, he not only foretells the victories of Israel, but indicates their future triumph over Moab. Then he rose up and went his way, having first given the advice to Balak by which the children of Israel were to be seduced, his face punished by plague (Num.25.15.31.16; Rev.2.14). He joined himself with Midian, and was slain in company
with five Midianite kings by the sword of the people he had endeavoured to curse (Num. 31:8). The speaking ass (Num. 22:28) occasions no difficulty to those who believe in miracle or are familiar with folklore. It is enough that the ass gave intelligible expression to its resentment and sense of wrong in such language as was natural to an ass, and that it attained all the ends of language, since it spoke home comprehensively to the evil conscience of Balaam. *Butler's Sermons,* serm. 71. F. D. Maurice, *Patriarchs and Law-givers of O.E.* pp. 229 f.; F. W. Robertson, *Sermons,* vol. iv. serm. 4. 5; cf. art. in *Guardian,* Sept. 27, 1905, by A. Smythe Palmer on "The Speaking of Balaam's Ass." [Nicolaitanes.] [C.R.D.B.]

**Balac** (Rev. 21:14) = *Balak.*

**Baladan.** [Merodach-baladan.]

**Balalh** (waste: Jos. 19.3), or **Bilhah** (1 Chr. 4.29), a town of Simeon. The site is unknown; it has no connexion with Balaam. [C.R.C.]

**Balak**, son of Zipor, king of the Moabites at the close of the Israelitish wanderings in the wilderness. Balak entered into a league with Midian and hired Balaam to curse the Moabites. Perhaps orí does not refer to any excudation from any particular tree, but denoted any resinous substance with a medicinal value. [Spices: Mastick.] Hasselquist (Travels, 293) describes the true balsam-tree of Mecca. As the true balm or balsam was a rare and costly medicament, several other sophistications did duty for it, or contained it in adulterated state and received its name. The tree yielding balm belonged to the genus *Balsamodendron,* of Asiatic and N. African growth. Coverdale was the first to render orí "balm"; previously it was translated as a modern term, arising naturally out of Jericho. For a summary of what is known of the history of the balm-tree (*B. opobalsamum*), which grew in the region about Jericho according to Josephus, and was lost by the time of the Crusades, see Smith's *Dict. of Economic Plants.* But Pliny's account is the most important. He says (xii. 25): "The tree that yieldeth it, Nature hath bestowed only upon the land of Furie. In old time it was even found in woods or hortyards, belonging both to the kings of Furie. . . . The Emperours Vespasian, both father and son, brought one of those little balm trees to Rome, and shewed it openly. . . . Pompey the Great likewise made proud boast [of it]. At the sacking of Jerusalem . . . about this very plant, there was a cruel bataillé fought." See the whole chapter. [H.C.H.]

**Balnuus** (1 Esd. 9.31) = *Binnui,* 2.

**Balthasar** (Ba. 1.11.12) = *Belshazzar.*

**Bamah.** This word appears in its Heb. form only in one passage (Ezk. 20:29; see R.V. marg.). The cuneiform sign for Bamati represents an altar or shrine, and the Heb. word has always this meaning. [C.R.C.]

**Bamah (báma).** [High Place; Sanctuary.]

**Bamoth baal (high places, or monuments, of Baal; Jos. 13.17), a town S. of Heshbon, otherwise Bamoth** (Num. 21.20, 20) "in the ravine," where Balaam found a "high place" (Num. 22.1, 33; see Is. 15.2). Possibly the remarkable dolmens of Wady Jelled, 6 miles S.W. of Heshbon, mark this site (Surv. F. Pal. p. 254). [C.R.C.]

**Ban** (1 Esd. 5.37) = *Tobiah,* 1.

**Banuas** = Benaiam, 8, of the sons of Nebo = Ethma (1 Esd. 9.35; cf. Ex. 10.43).

**Band.** [Foroer.]

**Bani.** -1. A Gadite, one of David's mighty men (2 Sam. 23.36). -2. A Levite of the line of Merari, and forefather to Ethan (1 Chr. 6.46). -3. A man of Judah of the line of Perez (1 Chr. 4.4). -4. "Children of Bani" returned from captivity with Zerubbabel (Ezr. 2.10.20, 11; Ne. 10.14; 1 Esd. 5.12). -5. An Israelite "of the sons of Bani" (Ezr. 10.38). -6. A Levite, father of Rehum, 3 (Ne. 3.17). -7. A Levite who taught the people and
sealed the covenant (Ne.8.7,9,4,5,10,13); called Anus in 1 Esd.9.48. Possibly the same as 6, if the name is that of a family.—8. Another Levite, of the sons of Asaph (Ne.11.22).  

Banid (Banias, R.V.; 1 Esd.8.36). This represents a name which has apparently escaped from the present Hebrew text (see Ezr.8.10).  

Banni (1 Esd.9.33) = Zabad, 5.  

Banu (ENSGN.)  

Banu (1 Esd.9.34) = Bani, 5, or Binnui, 3.  

Banquets, among the Hebrews, were not only a means of social enjoyment, but often a part of the observance of religious festivity. At the three solemn festivals, when all the males appeared before the Lord, the family also had its domestic feast (Deut.16.11). Both males and females (1 Sam.1.9) went up together, to hold the festival. Sacrifices, both ordinary and extraordinary, as amongst heathen nations (Ex.39.15; Judg.16.23), included a banquet, and Elie's sons made this latter the prominent part. Besides religious celebrations, such events as the weaning a son and heir, a marriage, the separation or reunion of friends, and sheep-shearing, were customarily attended by a banquet or revel (Gen.21.8,29; 22.31,27,54; 1 Sam.25.29; 2 Sam.13.23). Birthday banquets are only mentioned in the cases of Pharaoh and Herod (Gen.40.20; Mt.14.6); but see Birthdays. The usual time of the banquet was the evening, and to begin early was a mark of excess (Ec.10.16; 15.5,11). The most essential materials of the banqueting-room, next to the viands and wine, which last was often drummed up with spices (Pr.8.7; Can.8.2), were perfumed ointments, garlands or loose flowers, white or brilliant robes; after these, exhibitions of music, singers, and dancers, riddles, jesting and merriment (Judg.14.12; 2 Sam.19.35; Ne.8.10; Ec.10.19; Is.5.12,25; 28.1; Am.6.5,6; Wis.2.7ff.; Mt.22.11; Lu.15.25). Seven days was a not uncommon duration of a festival, especially for a wedding, but sometimes fourteen (Gen.29.27; Judg.14.12; Tob.8.19); but if the bride was a widow, three days formed the limit. The "table" (shulhan) was often merely a mat spread on the ground; round this the guests sat on the floor. The recumbent position referred to in N.T. belonged to a time when town-life had brought with it more luxurious habits. The separation of the women's banquet was not a Jewish custom (Esth.1.9). At the Pass-over four cups of wine, mixed with three parts of water, were blessed and passed round by the master of the feast.  

Banuas (Banuas, R.V.). In 1 Esd.5.26 "Banuas and Sudias" answer to "the children of Hodaviah," 3, in Ezr.2.10.  

Baptism. (1) O.T. Preparation. As through divine providential guidance pagan rites had their ceremonial usages as signs of the need of purification and grace, so also under the more direct revelation of God there was in O.T. a foreshadowing of the sacramental principle which was to be prominent in the Christian religion, and an anticipation of the use of water in one of the chief ceremonies. The rite of Circumcision; the ceremony of washing after conditions symbolical of sin (Lev.13-17; Num.19) and before approach to God (Ex.19.10,11,29.1,30.18-21; Num.8.7,21); the bathing of Naaman (2 K.5.10-14); and the references to washing in the prophecies of the Messiah (Is.52.13; A.V. and R.V., but not R.V. marg.; Ezk.36.25; Zech.13.1; cf. Heb.9.10,10.22) may all be regarded as being in their different ways preparations for the institution of Christian baptism. They, or some of them, may have led to the Jewish belief that the Messiah and His forerunner would baptize
BAPTISM

(Ba.1.26). The deliverance of Noah and the passage of the Red Sea and the overshadowing of the Israelites by the cloud are types of baptism (1Pe.3.21; 1Cor.10.1,2). (2) Jewish Baptisms and the Baptism of St. John the Baptist. Baptism was not used by the Jews in the case of those who were Jews by birth or the children of proselytes; but the rite of circumcision of proselytes a ceremony of baptism was necessary in addition to circumcision and a sacrifice, and some Jewish teachers held this baptismal rite sufficient for proselytes without circumcision. Partly through the O.T. purifications and partly through these Rabbinical baptisms, the idea of baptism would be familiar to Jews at the beginning of the ministry of St. John the Baptist. The "baptism of John," in a sense, placed all those who were invited to it in the position of Gentiles. While not itself a means of grace or of the forgiveness of sins, it was an indication of the will of God to forgive sinners, a sign of the remission of sins which would be brought about by the work of Christ, a preparation for the baptism of regeneration which Christ was to institute, and it may have conveyed some anticipatory touch of the effects of what Christ was to do in the future. By an act parallel to His submission to circumcision in His infancy, our Lord effects a baptism of St. John as well by fulfilling all righteousness, dedicating His ministry to the Father, and indicating the future sanctification of water through His death and resurrection to be a sacramental instrument (Mt.3; Mk.1.9-11; Lu.3.22; Jn. 1.19-34). (3) Anticipations by our Lord and His disciples. In His discourse with Nicodemus (Jn. 3.1-17) the Lord observes that the water and the Spirit are "given in one" (Jn.3.5). By the ministry of His disciples, but not by His own personal act, He administered a rite of baptism during His life on earth which was probably similar in its purpose and effects to that of St. John the Baptist (Jn.4.1,2). The flow of blood and water from His side on the cross after His death is not unreasonably regarded as having had a mystical significance, and as pointing to the efficacy which the sacramental use of water derives from the death of Christ (Jn.19.34; cf. 1Jn.5.6). (4) Institution and Administration of Christian Baptism. The sacrament of Christian baptism was instituted by our Lord between His resurrection and ascension, when He gave command to His apostles, "All authority hath been given unto Me in heaven and on earth. Go ye therefore, and make disciples of all the nations, baptizing them in the name of the Father and of the Son and of the Holy Ghost, teaching them to observe all things whatsoever I commanded you; and lo, I am with you alway, even unto the end of the world" (Mt.28.18-20). It is more likely that the apostles received the grace of Christian baptism together with the other gifts of the Holy Ghost on the day of Pentecost than that they were on this, or on any other, occasion baptized by our Lord, though there were other occasions on which He baptized them (St. Augustine, Ep. ccxlv. 3), or that He baptized the Blessed Virgin and St. Peter and that St. Peter baptized the other apostles (Euthymius Zigabenus, In Joan. Ev. iii. 3), or that our Lord baptized St. Peter. St. Peter granted baptism to the sons of Zebedee, St. Andrew and the sons of Zebedee baptized the other apostles, and St. Peter and St. John baptized the seventy disciples (Nicephorus, H.E. ii. 3). After the descent of the Holy Ghost on the day of Pentecost, and the sermon of St. Peter which won the multitude to Christ, the Holy Ghost was given to the rest of the apostles, "Brethren, what shall we do?" and received from St. Peter the answer, "Repent ye, and be baptized every one of you in the name of Jesus Christ unto the remission of your sins; and ye shall receive the gift of the Holy Ghost;" and the subsequent baptism as the result of this \(\text{H.E. ii. 3} \quad \text{Ac.ii.} \quad \text{Jn.4.1,2}.\)

Baptisms were administered as a result of the preaching of St. Philip the deacon in Samaria and to the Ethiopian eunuch (Ac.8.12,13,36-38). Saul of Tarsus after his conversion, Cornelius and his company after receiving the Holy Ghost, the proselyte Lydia and her household after she had given heed to the things which Paul spoke, the gaoler at Philippi, (after asking what he must do to be saved and receiving the answer, "Believe on the Lord Jesus, and thou shalt be saved" together with "all his") the Corinthians who believed, and the disciples at Ephesus who had already received the "baptism of John," were baptized (Ac.18.10,47,18,16.14,15,30-33,18.8,19.1-5). Baptism is spoken of by SS. Paul and Peter in their epistles, and by the author of Hebrews, as if it was assumed that all those in the Christian community had been baptized (Ro.6.3,4; 1Cor.1.13; Gal.3.27; Col.2.12; 1Pe.3.20,21; Heb.11.27). The Lord of whom the apostles were begotten is mentioned in the last section, coupled with the command to baptize "all the nations" (Mt. 28.19), indicate that baptism was regarded as a necessary rite for all who wished to become Christians. That infants as well as adults were baptized is not expressly mentioned in N.T. A concurrence of reasons suggests a high probability that they were so baptized. The relation of Christian baptism to the Jewish religion would make it likely that the administration of circumcision to Jewish infants and of the Jewish baptism to the children of proselytes together with their parents would suggest to the early church the baptism of infants who were members of a household receiving baptism should be baptized. It is likely that there were infants in the "households" baptized. The natural inference from the history of baptism in the Church is that infants had been baptized from the days of the apostles. The theological reasons for the baptism of infants which have been held weighty in later times are of such a character as would be likely to appeal to the earliest Christians. These general considerations derive some support from expressions in N.T.—e.g. the words of St. Peter, "To you is the promise, and to your children"; St. Paul's exhortations to children
and his teaching as to their duties and those of the parents, and his description of children as "holy" (1Cor.7.14; Eph.6.1-4; Col.3.20, 21). Thus, that infants were baptized in N.T. times, while it cannot be proved, is very highly probable. (6) Matter of Baptism. It is obviously assumed throughout N.T. that baptism was administered with water. This is expressly stated in Ac.8.36-39, and necessarily implied in the three persons baptized by St. Paul, "by the washing of water" (Eph. 5.26), and of the writer of Hebrews (10.22), "having our hearts sprinkled from an evil conscience, and our body washed with pure water." In some cases the method of using the water may have been by the complete immersion of the person being baptized. This may be the meaning of the words "they both went down into the water," "they came up out of the water," in connexion with the baptism of the Ethiopian eunuch by St. Philip (Ac.8.38, 39). Such a practice might give special significance to St. Paul's comparison between baptism and the three persons baptized in one day in Jerusalem (Ac.2.41), or those baptized at Caesarea and Philippi in or near the houses of Cornelius and the goleter (Ac.10.44-48,16.33), were all completely immersed. An examination of the verb βαπτίζω in the LXX. and N.T. shows that, while it sometimes means to immerse completely, it does not always do so (Mt.5.14; 15.21; 18.12; Ecclus.34.21; 31.30; Mt.20.22,23; T.R.; Mk.7.4, T.R., and revisers' text, but not marg. 10,38,39; Lu.11.39, 12.50). The nouns βάπτισμα and βαπτισμός do not occur in the LXX. In N.T. βάπτισμα is always used either for baptism or for the baptism of suffering; βαπτισμός is used for baptism in Heb.6.2, and as a variant reading for βάπτισμα in Col.2.12, and for ceremonial washing in Mk.7.4 (also ver. 8.T.R.). Thus, both the records of practice in N.T. and the terminology leave it uncertain whether complete immersion was ever used in N.T. times; while it was unlikely that it was always used. (7) Form of Baptism. Our Lord's command, as recorded in Mt. 28.19, is for the administration of baptism "in the name of the Father, and of the Son, and of the Holy Ghost"—a command which goes far to explain the reference to the doctrine of the Holy Trinity in such early passages as 1Th.1.1-6, 2Cor.13.14. The phrases "in" or "upon" or "into," "the name of," "Jesus Christ," or "the Lord Jesus," or "the Lord," are used in Ac.2.38,8.16,10.48,19.5. The most probable explanation of these differing phrases is that the actual form of baptism was "in the name of the Father, and of the Son, and of the Holy Ghost," and that the phrase "in the name of Jesus" meant that the baptized were enrolled among the servants of Jesus. The phrase ἐκ τοῦ δρόμου in Mt.28.19 and Ac.8.16,19.5 possibly ought to be translated "into the name"; it is perhaps more likely that, owing to the influence of Aramaic on N.T. Gk., it is rightly rendered "in the name." (8) Minister of Baptism. In the N.T. period baptism appears to have been administered by the apostles themselves, by deacons, and by Christian laymen. No statement is made as to who administered the earliest baptisms (Ac.2.41) or baptized Lydia or the Corinthians or the disciples in Ephesus (Eph.4.4-5). But either St. Paul or St. Silas apparently baptized the Philippian gaoler and his household (16.29-33). St. Paul says that it was not his ordinary custom to baptize, but that he had baptized in some cases (1Cor.1.14-17). St. Philip, one of the "seven men of good report" of Ac.6.5, probably baptized those at Samaria (8.12,13) and certainly baptized the Ethiopian eunuch (8.38,39). Ananias, a Christian disciple, apparently baptized St. Paul (9.17,18, 22.12-16); and "brethren from Joppa" appear to have baptized Cornelius and his company (10.44-48). (9) Conditions of Baptism. Repentance and belief are everywhere assumed in the N.T. to be conditions of baptism, and these are explicitly mentioned in 2.38,8.12,13,16.31. The words of St. Philip to the Ethiopian eunuch and the eunuch's reply in 8.37, "And Philip said, If thou believest with all thine heart, thou mayest." And he answered and said, I believe that Jesus Christ is the Son of God," are found in a very early reading, but are apparently not part of the original text of the Acts. (10) Doctrine of Baptism. In our Lord's discourse with Nicodemus baptism is described as the means of seeing or entering the kingdom of God, and of being "begotten anew" or "from heaven" (Jn.3.5). Similarly, St. Paul describes it as a "washing of regeneration" (Tit.3.5). Being thus begotten anew and regenerate, the baptized are said by St. Paul to be the sons of God (Gal.3.26; 27; cf. Ro.8.14-19), to have put on Christ (Gal.3.27), to be members of the body of Christ (1Cor.12.12,13,27, cf. 6.15; Eph.5.26-30), and to have been united with Christ by the death and resurrection of Christ (Ro.6.3, 4; Col.2.12-20,3.1). In thus being made sons of God and members of Christ, the baptized come under the agency and gift of the Holy Ghost. St. John the Baptist foretold of the work of Christ in Christian baptism, "He shall baptize you with the Holy Ghost by water" (Mt.3.11; Mk.1.8; Lu.3.16, cf. Jn.1.30). St. Peter promised the first converts that on being baptized they should "receive the gift of the Holy Ghost" (Ac.2.38). Ananias, in speaking of St. Paul's coming baptism, said that he should be "filled with the Holy Ghost" (9.17,18). St. Paul connects the "renewing of the Holy Ghost", with the "washing of regeneration" (Tit.3.5) by which, then, is represented in N.T. as the outward means whereby great gifts are bestowed on the Christian. Through the reception of these gifts his sins are forgiven (Ac.22.16), and he is placed in the way of salvation (Mk.16.16; Ac.2.41,47,16.30-33; T.P.1.3,4,3-21; Tit.3.5). Yet, as a way to the true and deep conversion, so it is possible through sin to fall from the high state which baptism is the means of conferring (Ac.8.13,21-23; 1Cor.3.16,17,5.3-5; Gal.5.2,4,19-21). (11) The Gift of the Holy Ghost in Baptism. Some writers have
supposed, that, while the operation of the Holy Ghost is exercised on the soul in baptism, his indwelling presence in the soul is withheld until confirmation, because of the statements, "When the apostles which were at Jerusalem heard that Samaria had received the word of God, they sent unto them Peter and John; who when they were come down, prayed for them, that they might receive the Holy Ghost: for as yet he was fallen upon none of them: only they had been baptized in the name of the Lord Jesus. Then laid they their hands on them, and they received the Holy Ghost." They were baptized in the name of the Lord Jesus, and Peter and John laid their hands on them, the Holy Ghost came on them" (Ac.8:14-17,19,5,6). It appears to be easier to explain these statements of the reception of the Holy Ghost at the laying on of hands as referring to His special gifts at confirmation than to explain "they shall receive the gift of the Holy Ghost by laying on of hands" (Ac.6:5-8) and "that they mayest be filled with the Holy Ghost" in 9:17, as referring not to baptism itself, but to the laying on of hands which was to follow it. [LAYING ON OF HANDS.] (12) Baptism for the Dead. In 1 Cor.15:29 St. Paul writes, "Else what shall they which are baptized for the dead do? shall we not that we should be baptized with them also?" (Ac.2:20). St. Paul refers to baptism as a means of escape from death (cf. 1 Cor.15:51-54). It is not stated that the resurrected body shall be raised in the same form as the dead (Ac.2:26). (13) Confirmation. The one who has been baptized and who has professed the faith is not necessarily confirmed, for he may be prevented from being confirmed. Confirmation shows the individual to be emotionally ready for the reception of the Holy Ghost. (14) Non-offensive Baptism. In the New Testament the call to repentance is often associated with the baptism of Jesus. In the early Christian church, the baptism of non-Christians was performed by the operation of the Holy Spirit. This practice was later discontinued, but the idea of non-offensive baptism is found in the Church fathers. [BARLEY] Barber. The Heb. word (Ezk.5:1) only is formed from the root meaning "shave"; cognate words occur in the whole Semitic group. [RAZOR.] Bar-Jonas. [JONA; PETER.] Barkos. "Children of Barkos" were Nethinim who returned from the Captivity with Zerubbabel (Ezr.2:53; Ne.7:55). Barley. (Heb. sərād, Aram. ˹s̱erād˷) is mentioned in many passages of the Bible. It was grown by the Hebrews (Lev.26:16; Deut. 8:8; Rv.2:17, etc.), who used it for baking into bread (Jdg.7:13; 2K.4:42; Jn.6:13), also mixing it with wheat, beans, lentils, millet, etc. (Ezk.4:9,12); and as fodder for horses. The fact that it was used as fodder is mentioned Rn.11:22,23; 2Sam.21:5,10. It takes place in Palestine in March and April, and in the hilly districts as late as May. Barley harvest always precedes wheat harvest, in some places by a week, in others by fully three weeks. In Egypt barley is about a month earlier than wheat, and it is the total destitution produced by the hail-storm (Ex.9:31). Barley was sown at any time between November and February, according to the season. Barley bread is still generally eaten in Palestine (Num.5:15). The homer and a half of barley, as part of the purchase-money of the adulteress (Lev.5:14), represents a trilling sum of 4. Ez.13:19, Will
BARUBAS, an Aram. name signifying "son of prophecy," i.e. endowed with the gift of prophecy; and as the main function of N.T. prophets was to give prophecy, Luke renders it correctly "son of exhortation" (Ac. 4:36, R.V.). This additional name was given to him by the apostles to distinguish him from others who bore the common name Joseph. He belonged to a Levite family settled in Cyprus, but had kindred living in Jerusalem, namely, his cousin John Mark, and Mary the mother of Mark. (1) He is first mentioned as an example of those who made over their property to the Christian community, and in contrast to the case of Ananias and Sapphira. That he was highly respected in the church of Jerusalem appears from the help which he was able to give to the apostles when a crisis arose after his conversion (9:25ff.). On the occasion of the conversion of Greeks at Antioch, Barnabas was chosen to investigate the work, and, appreciating its importance, he fetched Saul from Tarsus to assist him in carrying it forward (Ac. 11:22-26). During the year so occupied we must place the mission to Jerusalem recorded Acts 11:30, and their return to Antioch (Ac. 11:23). St. Luke appears to have thought it correct to separate their journey in this way when his Antioch, and Barnabas, together with Saul, for missionary work. The selection of Cyprus for their destination, and Mark for their attendant, was probably due to Barnabas. He returned to Antioch at the close of the mission, and was sent thence with St. Paul to plead the Gentile cause at the Council of Jerusalem (Ac. 15:2). On their return an incident occurred which may have prepared the way for the subsequent separation of the two friends. Barnabas, though fully aware of his inconsistency, had not strength to resist the example of St. Paul, who was himself separated himself, and would not eat with the Gentile Christians (Gal. 2:12, 13). But the breach did not actually take place till, on their intended departure for the second journey, Barnabas insisted on taking John Mark, who in St. Paul's estimation had forfeited his position by his desertion of his companions on the first journey. Barnabas sailed to Cyprus with Mark, and passes out of the history. A single verse (1Cor.9:6) implies that at the date of that epistle he was still labouring, and the reconciliation between St. Paul and Mark may surely be taken to imply a reconciliation between St. Paul and Barnabas. St. Paul's debt to his colleague Barnabas by way of his life was undoubtedly very great. He owed to him much of that impulse and guidance which he denies having owed to the other apostles. Two questions remain: (a) the apostleship of Barnabas. The title is clearly given him Ac. 14:4, 14. He is recognized by James, Cephas, and John as holding, together with Paul, the same position towards the Gentiles as they held toward the circumcision (1Cor.9:5, 6). (b) The (so-called) Epistle of Barnabas. Though the external testimony to its authenticity is strong, yet its substance is so alien from apostolic teaching in its view of O.T., that it is impossible to regard it as the work of a fellow-labourer of St. Paul.

BARUCH, BOOK OF

Bartholomew, one of the Twelve, of whom nothing is recorded, unless he is to be identified with Nathanael. [E.R.B.]

Bartimaeus (i.e. the son of Timaeus), a beggar whom our Lord healed of blindness on the outskirts of Jericho during his last journey up to Jerusalem. St. Matthew (20:29ff.) speaks of two men healed as He was leaving the town. St. Mark (10:46ff.) agrees with him as to the place, but only mentions one and him by name (apparently because Bartimaeus was the chief spokesman on the occasion or because he was afterwards a well-known character among the brethren). St. Luke (18:38ff.) speaks of Isaias, but one (and not by name), but infers that the miracle took place the day before, as our Lord was approaching the town. On the discrepancy, see, e.g., Saldar, St. Mark, pp. 236ff.

Baruch.—1. Son of Neriah, the friend, amanuensis, and faithful attendant of Jeremiah (Je.32:12,36:4,6,17,18,32,45:1) in the discharge of his prophetic office. He was of a noble family (Je.51:59; Ba.1:1), a worthy and trusted assistant. Seraiah his brother held office in the court of Zedekiah. Slanders accused him of influencing Jeremiah to deliver his countrypeople to the Chaldeans (Je.43:3), reviving an old reproach to the prophet (37:13). On the destruction of Jerusalem, 586 B.C., Nebuchadnezzar allowed him to stay with Jeremiah at Mizpah (Joseph., 20. Ant. ix. 1), but later they were forced to go into Egypt (43. 6). Baruch perhaps hoped to succeed Jeremiah as Elisha succeeded Elijah, and Je.45:5 may have been intended to check such an aspiration. The production of the book of Baruch suggests the survival of the idea.—2. Son of Zachariah. He assisted in rebuilding the walls of Jerusalem (Ne.3:20).—3. A priest who signed the covenant (10:6).—4. Son of Col-hozeh, descended from Perez (Pharez), or his brother Shelah, sons of Judah (11:5).

Baruch, Book of. Baruch is the only apocryphal book cast in the style of the Hebrew prophets. Though having largely the character of an imitation, with little originality, it is not without striking passages of considerable force, such as 4:9-19; so that the unprejudiced reader, saying "La Font," is fairly just, "Quel était donc ce Baruch? c'était un beau génie." Sound advice is offered to the distressed Israelites in an encouraging and hopeful tone, while submission to, and prayer for, their captors is counselled (2:2:11); yet a tinge of melancholy, as it records well the last reflection of O.T. prophecy. Two main divisions of the book, differing in style, and in the names for God, are generally agreed upon—viz. 1-3.8 and 3.9 to the end. The first is supplicatory, preceded by...
14 verses of narrative: the second is hortatory. The latter has itself been divided into two at 4.5: and even further subdivision has been tried. — Langdon records in his notes the divergent opinion—suitable to both parts, assigning the Gk. original to the dexterity of the translator, which he says “the lateinische Übersetzung.” —Author. Except among R.C. writers the traditional authorship by Baruch is now rarely suggested. 4.11, 12 and 3.10 are especially difficult to attribute to the historic Baruch. This is a strong argument for writing by different authors for the first and second parts. We may postulate Jewish writers, but these remain anonymous. — Date. This is as much disputed as the language. Schürer, Kiele, Streane, and others would place Baruch, as we now have it, after Titus’s destruction of Jerusalem, making 4.30 ff. refer to that event. But the early Christian acceptance of the book, from Athenagoras and Irenæus onward (not to mention a possible reference in Logion iii. ser. 2), does not imply so late a date; nor does the strong similarity of the LXX. text to that of Jeremiah, e.g. 2.25, 3.2, 4.26 compared with 3.32, 33, 25, marked on the one hand, as a parallel to Dan.9,16,17, to which the writer’s coorespondences in the earlier part of ch. 2 naturally lead him up, and which would be very appropriate at that time. This very late date is largely grounded on the clear correspondence of 5.7 with Ps. Sol. xi: but which document had priority is not so clear. Ryle hesitatingly decides for Ps. Sol., because “a Heb. writing would not have been based upon a Gk. writing” (Smith, D.B.3). A Gk. original of pt. ii. is therefore essential to his argument. He also adduces “the absence of testimony to the existence of Baruch until the 2nd cent.” But were books added to the LXX. as late as this? Hoberg reasonably alleges its inclusion in LXX. as proof of pre-Christian Jews’ acquaintance with it. Rothstein, while conceding the possibility of an A.D. date for the book in its present form, yet thinks the separate parts earlier. Those, however, who, with Reuss and Ewald, would place Baruch in the 4th cent. n.c. have either to accept an earlier date for Daniel or to assume the existence of Dan.9 before the rest of the book. This divergence as to date has been taken by Philippe as a testimony to Baruch’s authorship (Vigouroux, B.D.): an argument used against the defenders of Judith’s historic character by Bissell (p. 157). Although there is much support for an A.D. date, the haphazard way in which the attendant upon it appear little lighter than those involved in the other notion of placing pt. i., at any rate, about the close of the Persian period, and the latter half in 2nd cent. n.c.—History. The statement in the Gk. Apostolic Constitution, v. 20, that Baruch was read, with Lamentations, in the synagogues on the Day of Atonement is mecurorobated. It does not accord with Baruch’s expressed view of its suitability for festal reading (1.14); and, unless a mistake, must refer to some local and temporary usage. In a large part of the Christian Church, Baruch was early regarded as an appendage to Jeremiah. Patristic writers were naturally attracted by 3.37, which they often quoted as foretelling the Incarnation. The Council of Trent, after some hesitation, decreed the book canonical. Protestant bodies generally reject Baruch, though individuals have highly esteemed it; while the English Church and Church of Ireland accept it in their present calendar from what Art. vi. styles “Baruch the Prophet.” The Apocalypse of Baruch is a distinct extra-Biblical work. Speaker’s, S.P.C.K., and Bissell’s Comm.: art. in Hastings’s and Vigouroux’s Dicts.: Streane, Age of the Maccabees (1878); J. J. Kuenen, Comm. on Baruch (Freiburg i. B., 1902); I. E. T. André, Les Apocryphes (Florence, 1903). —[W.B.D.]

Barzillai.—1. A wealthy Gileadite who showed hospitality to David when he fled from Absalom (2Sam.17.27). On the score of his age, he declined the king’s offer of dwelling at court, but sent his son Chimham in his stead (2Sam. 19.31-40). The descendants of his daughter (called Augia, 1Esdr.5.38), who married into a priestly family, were unable, after the Captivity, to prove their genealogy (Ezr.2.61; Ne.7.63, 64).—2. A Meholathite, whose son Adriel married Michal, Saul’s daughter (2Sam.21.8). —Barzillai (Heb. Barzillai) [Barzillai].

Bashan, a name in Gilead where Jonathan was killed by Trypho (1Mac.13.23). Called Basca by Josephus (13.Jul. vii.6). The site is unknown. —[C.R.C.]

Bashan (soft soil), a district on the E. of Jordan; sometimes spoken of as the “land of Bashan” (Ch.5.11), and sometimes as “all Bashan” (Deut.3.10,13; Jos.12.5, 13.30), but most commonly without any addition. It was taken by the children of Israel after their conquest of the land of Sibon. They “turned” from their road over Jordan and “went up by the way of Bashan” to Edrei (Num.21.33; Deut.3.1-13). Bashan extended from Gilead on S. to mount Hermon on N. (Deut.3.14; Jos.12.5; 1Ch.5.23), from the Arakah or Jordan Valley on W. to Selahe (Salihkat) on E., and to the border of the Geshurites, and the Maachathites near Hermon. This district was bestowed on the half tribe of Manasses (Jos.13.20-31), together with “half Gilead.” It is named in the list of Solomon’s districts (1K.4.13). Bashan was devastated by Hazael in the reign of Jehu (2K.10.33). After the Captivity it is mentioned as divided into four provinces—Golanitis [Golan], Auranitis
Bashan-havoth-Jair (Deut.3.14). If not a gloss, Bashan may here be a corruption of Be'-shem, and we may read “called them by the name of villages of Jair.” Cf. Num.32.41; Judg.10.4; 1K.4.13. [Havoth-Jair.] [C.R.C.]

Bashmath (R.V. Basemath), daughter of Ishmael, the last married of three wives of Esau (Gen.36.3.4.13), from whose son Reuel four tribes of Edomites were descended. When first mentioned she is called Mahalath (Gen.28.9), and the name Bashemath is given in Gen.36.34 to another wife of Esau, the daughter of Elon the Hittite. The Hebrew text corrects this by reading Mahalath for Bashemath in the genealogy. Possibly this name (Bashmath) has been assigned to the wrong person in one of the passages; but if so, it is impossible to determine which is erroneous.

Basket. (1) salt, so called from the twigs of which it was originally made, especially used for holding bread (Gen.40.16ff.; Ex.29.3.23; Lev.8.2.26.31; Num.6.15.17.19). The form of the Egyptian bread-basket is delineated in Wilkinson’s Ancient Egypt, iii. 226, after the specimens represented in the tomb of Ramses III. The term salt apparently passed from its strict etymological meaning to any vessel applied to the purpose. In Judg.6.19 meat is served up in a salt, which could hardly have been of wickerwork. (2) salsillath, a word of kindred origin, applied to the basket used in gathering grapes (Je.6.9). (3) lene, in which the first-fruits of the harvest were presented (Deut.26.2.4). From its being coupled with the kneading-bowl (A.V. store, Deut.28.5.17), we may infer that it was also used for household purposes, perhaps to bring the corn to the mill. (4) k’hâkh, so called from its similarity to a bird-cage or trap, probably because it had a lid: it was used for carrying fruit (Am.8.1.2). (5) dâkh, used for carrying fruit (Je.24.1.2), as well as on a larger scale for carrying clay to the brickyard (Ps.81.6; pote, A.V.), or for holding bulky articles (2K.10.7). In N.T., baskets are described under the three terms, κύβον, σπιρατ, σαργανη. The last occurs only in 2Cor.11.33, in describing St. Paul’s escape from Damascus. The first is exclusively used in reference to the miracle of feeding the five thousand (Mt.14.20.15.9; Mk.6.43; Lk.9.17; Jn.6.13), and the second to that of the four thousand (Mt.15.37; Mk.8.7): the distinction is most definitely brought out in Mk.8.19,20.

Basmath’, a daughter of Solomon married to his officer Ahimaaz (1K.4.13).

Bason. Among the smaller vessels for the tabernacle or temple service, many were required to receive from the sacrificial victims the blood to be sprinkled for purification. Moses, at the great ceremony of purification in the wilderness, put half the blood in “the basons,” bowls, and afterwards sprinkled it on the people (Ex.24.6,8). [Goblet.] Among the vessels cast in metal, whether gold, silver, or brass, by Hiram, for Solomon, besides the laver and great sea, mentioned also were basons, bowls, and cups. Of the first (margin. bowls) he is said to have made 100 (2Chr.4.2; 1K.7.45,46; cf. Ex.25.29 and 1Chr.28.14,17). Their form and material can only be conjectured from the analogy of ancient Assyrian and Egyptian specimens. The “bason” (Jn.13.5) from which our Lord washed the disciples’ feet, κρείτης, was probably deeper and larger than the hand-bason for sprinkling.

Egyptian Baskets. (Brit. Mus.)
BATH

Babylonian idols. Bats of many kinds, inclusive of long-eared and "horseshoe" species, are common in Egypt; but the most numerous appear to be the cave-bats of the genus *Taphozous*, characterized by the tail being free for much of its length from the membrane connecting the hind-legs. The Palestine species is *T. nudiretra*, which swarms in the caves of Galilee, and is nearly allied to the Egyptian species shown in the cut. [R.L.

Bath. [Weights and Measures.]

Bath, Bathing. Among the Jews, as with other Easterns, bathing was usually a religious act, and in cases of Levitical uncleanness was required by the law as the restitution to religious privileges. [Purification.] There is no mention of bathrooms in the houses, but there were cisterns for the purpose in the court (2Sam.11.2) or garden (Sis. 15). When possible, running water was selected (Ex. 2.5, 7, 13; Lev. 15.13; 2K. 5.10). Harlots bathed in the pool of Sæmaria (1K. 22.34, R.V.). Public baths were erected by Agrippa (10 Ant. vii. 5), and the pool of Bethsaida had porches or colonnades (Iu. 5.2). There was a bathroom in Herod's temple for the priests (Yoma iii. 2). Hot springs were discovered by Anah (Gen. 36.24, see R.V.), and there were hot baths at Calalhioe (17 Ant. vi. 5) and Tiberias (2 Wars xxi. 5). Newborn infants were bathed before being dressed (Ezk. 16.4). Women anointed themselves after the bath with oil (2Sam.14.2) or sweet odours (Esth. 2.12; Joth. 10.3). Swimming is alluded to (Is. 25.11; Ezk. 47.5; Ac. 27.42). [R.L.

Bathsheba. Gate of, a gate of Hebron (Gen. 7.4), near as occurs in the stream W. of the city. [C.R.

Bathsheba (2Sam.11.3, etc.) or Bathshua (1Chr.3.5), the daughter of Eliam (2Sam.11.3) or Ammiel (1Chr.3.5) the son of Amithophel (2Sam.23.34), and wife of Uriah the Hittite. The child of her adulterous intercourse with David died; but after marriage she became the mother of four sons, Solomon (Mt. 1.6), Shimea, Shobrah, and Nathan. When Adonijah attempted to set aside in his own favour the succession promised to Solomon, Bathsheba was employed by Nathan to inform the king of the conspiracy (1K.1.11-31). After the accession of Solomon, she, as queen-mother, requested permission for Adonijah to marry Abishag the Shunammite (1K. 2.13-24).

Bath-zachari as, a place, named only (Mac.6:32-33), to which Judas Maccabaeus marched from Jerusalem, and where he encamped for the relief of Beth-sura. The two places were about 70 stadia apart, and the approaches to Bath-zachariah were intricate and confined (12 Ant. ix. 4). This description is met by the modern Beit Shikra, 6 miles N. of Beit Sir. [BEIT-ZUR]

BEARD

Battle-ax (Je.51.20). [Aras.]

Bavai, ruler of the "half part" of Keilah, who assisted in repairing the wall of Jerusalem (Ne.3.18).

Bay-tree (Cerat, lit. "nurse"). It is difficult to see upon what grounds A.V. renders this word in Ps. 37.35 "bay-tree." Most Jewish doctors understand by "cerat" "a tree which grows in its own soil," i.e. has never been transplanted, as A.V. marg. and R.V. The bay-tree, or laurel, has therefore no place in the Bible excepting upon Coverdale's introduction.

Bazith (Ne.7.54). Bazluth (Ezr. 2.52). "Children of Bazith" were Nethinim who returned with Zerubbabel.

Bdellium (b'deloh), a precious substance mentioned in Gen. 2.12, with "gold" and "onyx stone," as one of the products of the land of Havilah, and in Num. 11.7, where *numa* is in colour compared to *bdellium*. Some authorities think *bdeloh* means the pearl, others the carbuncle or at any rate a gem, but the majority believe it to be some kind of gum-resin. That now denoted by *bdellium* resembles myrrh in appearance and character, but is much inferior. It is called "more acid" (Chambers's Encyd. s.v.). It is produced by more than one kind of tree, and is obtained in Egypt as well as Asia. [T.G.B.]

Bealiah, a Benjamite, one of those who joined David at Ziklag (1Chr.12.5).

Bealoth, a town in the extreme S. of Judah (2Sam. 23.34).

Be'an, Children of, a tribe of predatory habits in Edom, destroyed by Judas Maccabaeus (1Mac.5.4). Perhaps for Mean (Ma'ain) in Edom. [C.R.

Beans are cultivated in Palestine, as are many leguminous plants, such as lentils, kidney-beans, vetches, etc. (2Sam.17.28). Beans blossomed in January. They have been noticed in flower at Lydda on the 23rd, and at Sidon and Acre even earlier. They continue in flower till March. The cultivation of beans is of the highest antiquity. Homer mentions both beans and peas. Pliny says beans challenge the first rank as a principal place amongst the legumes, "they are thought among the oldest that were cultivated," and "thereof man have assumed to make bread" (cf. Ezk 4.9). [I.N.C.]

Bear. The Syrian bear (Ursus arctos syriacus), a grey variety of the European brown bear, is the animal of the Bible, and is said by Tristram to be still found on the mountains of Palestine. During summer these bears keep to the snowy parts of Lebanon and Hermon, but descend in winter to the villages; while in former days doubtless occurred in other parts of Palestine. We read, for instance, of bears in a wood between Jericho and Bethel (2K. 2.24); and it is probable that the destruction of the children who mocked Elisha took place in winter. The ferocity of the bear when deprived of its young is alluded to in 2Sam.17.8, Prov.17.12. Hos.13.8; its attacking flocks in 2Sam.17.34, etc.; its craftiness in ambush in Lam.3.30; and that it was dangerous to man in Am. 5.19. The word "bear," as in 2Sam.11.9, should be translated "we groan like bears." Bears are also mentioned in Rev.13.2; Dan. 7.5; Wis. 11.17; and Ezech.47.3.

Beard. Semitic races have always
cherished the beard as the badge of the dignity of mankind. The Egyptians, on the contrary, usually shaved the hair of the face and head, and were compelled to do so, like the Semitic enemies of the Egyptians, including many of the nations of Canaan, Syria, and Armenia, etc., are nearly always represented bearded. On the Ninevite monuments is a series of battle-views from the capture of Lachish by Sennacherib, in which the captives have beards very like some of those in the Egyptian monuments. The precept (Lev.19.27) regarding the “corners of the beard” refers to the well-known hair-offerings among all ancient peoples. [H.A.R.] Size and fullness of beard are regarded by Arabs, at the present day, as a mark of respectability and trust-worthiness. The beard is the object of an oath, and that on which blessings or shame are spoken of as resting. The custom was and is to shave or pluck it and the hair out in mourning (Ex.9.3; Is.15.2,50.6; Jer.41.5,48.37; Isa.6.5), to neglect it in seasons of permanent affliction (2Sam.19.24), and to regard any insult to it as the last outrage which enmity can inflict (10.4). The beard was the object of salutation (20.9). The dressing, trimming, anointing, etc., of the beard was performed with much ceremony by persons of wealth and rank (Ps.133.2). The beard was a part of the ceremonial treatment proper to a leper (Lev.14.9).

Beast, the representative in the A.V. of the following Heb. words. (1) b'hēmāt, the general name for “domesticated cattle” of any kind, is also used to denote “any large quadruped,” as opposed to fowls and creeping things (Gen.6.7,20.7; Ex.9.25; Lev.11.2; 1K.4.33; Pr.30.30, etc.) for “beasts of burden,” horses, mules, etc., as in 1K.18.5; Ne.2.12,14, etc.; or for “wild beasts,” as in Deut.32.24, Hab.2.17, Isa.17.14. (2) b'ēr is used either collectively of “all kinds of cattle,” like the Latin pecus (Ex.22.5[4]; Num.20.4,8,11; Ps.78.4[8]), or specially of “beasts of burden” (Gen.45.17). It has a more limited sense than the preceding. (3) háyāh is used to denote any animal. It is, however, frequently used specially of “wild beasts,” when the meaning is often more fully expressed by the addition of the word ḥâdēh, “of the field” (Ex.23.11; Lev.26.22; Deut.7.22; Ho.2.12[14], 13.8; Je.12.9, etc.).

**Beautitudes. [Sermon on the Mount.] Beautiful Gate. [Temple.]**

Bebai. "Sons of Bebai," 623 (Ne.6.28) in number, returned from Babylon with Zerubbabel (Ezr.2.11; 2Ch.35.12). More returned with Ezra under Zechariah, who is further described as “the son of Bebai,” which may however be used as the family name (Ezr.8.11). Four of the family had taken foreign wives (Ezr.10.25; 1Esdr.9.29). The name occurs also among those who sealed the covenant (Ne.10.15).

Bebai (1Jth.15-14), an unknown town in central Palestine. [C.R.C.]

Becher. The second son of Benjamin, according to the lists in Gen.46.21 and 1Ch.7.6,8; but omitted in Num.26.38 and 1Ch.8.1. The Heb. text of 1Ch.8.1, however, suggests that "Becher" is, with anointing, a corruption of Becher, so that the genuine reading would be "Benjamin begat Bele, Becher, and Ashbel," in agreement with Gen.46.21. Some have thought that 1Ch.8.1 is right, and that in Gen.46.21 and 1Ch.7.5 Becher, as a proper name, is a corruption of b'khōr, "first-born," so that Benjamin begat Bele, Becher, and Ashbel, and it is possible that Becher, or his heir and head of his house, married an Ephraimitish heiress, a daughter of Shuthelah (1Ch.7.20,21), and that so his house was reckoned in the tribe of Ephraim, just as Jair son of Segub was reckoned in Manasseh (1Ch.2.22; Num.32.40,41). Becher, son of Becher (Num.26.35), called Bereith or Beder (1Ch.7.26).

Bechorath, an ancestor of king Saul (1Sam.9.1,2).

Bec'tileth, The plain of, mentioned in Jth.2.21 as lying between Nineveh and Cilicia. The name has been compared with Ba'ktaijlā, a town of Syria named by Ptolemy. Bactria in the Peutinger Tables, which place it 21 miles from Antioch.

Bed and Bedchamber. We may distinguish in the Jewish bed five principal parts: (1) the mattress; (2) the covering; (3) the pillow; (4) the bedstead or support for (1); (5) the ornamental portions. (1) This consisted of a mere mat or mattress, usually quilted. (2) Some quilts were of a more fine type of quilted, finer than those of (1). In summer a thin blanket or the outer garment worn by day (Isa.19.13) sufficed. Hence the law that it should not be kept in pledge after sunset, that the poor man might not lack his needful covering (Deut.24.13). (3) The only mention of the material for this is in 1Sam.19.13, and the word used is of doubtful meaning, but seems to signify some fabric woven or plaited of goat's-hair. As, however, it was something hastily adopted to serve for a pillow, it is not decisive of the ordinary use. In Ezk.13.18 those mentioned are probably not bed-pillows, but fillets or amulets for the arms (so Ephrem Syrus). Pillows are common to this day in the E., formed of sheep's fleece or goat's-skin, with a stuffing of cotton, etc. (4) The bedstead was not always necessary, a platform along the side or end of an Oriental room serving as a place for the bedding. Yet some slight and possible polishing of the senses of two of the six Heb. words translated in A.V. "bed," and used variously for a "bier" (2Sam.3.31; 2Chr.16.14), for the
ordinary bed (2 K. 4: 10), for the litter for carrying a sick person (1 Sam. 19: 15), for Jacob's sick-bed (Gen. 47: 31), and for the couch on which guests reclined at a banquet (Esth. 1: 6). For the "bedstead" of Og, see Og. (5) The ornamental portions were pillars and carvings (1 K. 13: 9), ivory carvings, gold and silver, and probably mosaic work, purple and fine linen (Esth. 1: 6; Can. 3: 9, 16). The ordinary furniture of a bedchamber is given in 2 K. 4: 10. The position of the bedchamber in the most remote and secret parts of the palace seems indicated in Ex. 8: 3 and 2 K. 6: 12. The "bed-chamber" in the temple where Joash was hidden (2 K. 11: 2; 2 Chr. 22: 11) was probably not a sleeping-room, but a store-chamber (perhaps a mere cupboard such as is used in the East in the present day) for the rolled-up mats. 

Bedad, the father of Hadad king of Edom (Gen. 36: 35 = 1 Chr. 1: 46).

Bedan'.—1. (1 Sam. 12: 11.) Samuel refers to him as a deliverer of Israel. Nothing more is known of him. I. XX. identifies him with Barak. He has also been identified with Samuel and Abdon. —2. (1 Chr. 7: 17.) A Manassite. [N. M. R.]

Bedeliah, a son of Bani, in the time of Ezra, who had taken a foreign wife (Ezr. 10: 15). 

Bee (d'bhàri; Deut. 1: 44; Judg. 14: 8; Ps. 118: 12; Is. 7: 18). That Palestine abounded in bees is evident from the description that it was a land "flowing with milk and honey." There is some evidence to suppose that this expression is to be understood otherwise than in its literal sense. Dr. Thomson (Land and Book, p. 269) records swarms of bees inhabiting a cliff of Wady el Quarn, "the People of Mahia, several years ago," he writes, "let a man down the face of the rock by ropes. He was entirely protected from the assaults of the bees, and extracted a large amount of honey, but he was so terrified by the prodigious swarms of bees that he could not be induced to repeat the exploit." This illustrates Deut. 32: 13 and Ps. 81: 16 as to "honey out of the stony rock." While Deut. 1: 44 and Ps. 118: 12 suggest the fearful nature of the attacks of these insects when irritated. In Palestine, as in India, the attacks of bees are more to be dreaded than in more temperate climates, the swarms being larger, and their stings not unfrequently causing death; hence the force of the Psalmist's complaint, "They compassed me about like bees." (118: 12). The passage about the swarm of bees and honey in the lion's carcase (Judg. 14: 8) can be easily explained when we remember that in a hot dry country, after a carcase has been picked nearly clean by vultures, jackals, and ants, the skeleton might well form a nidus for a swarm of bees. Is. 7: 18, "the Lord shall hiss for the bee that is in the land of Assyria," has been understood by some to refer to the practice of "calling out the bees from their hives by a hissing or whistling sound to their labour in the fields, and summoning them again to return" in the evening. More probably the expression has reference to the Eastern custom of calling the attention of any one by a hiss or "hissi." The honey-bee of Palestine, although nearly allied to the European Apis mellifica, is regarded as a distinct species, A. fasciata. [R. L.]

Beel'it'ada (Baal knows), one of David's sons, born in Jerusalem (1 Chr. 14: 7). In 2 Sam. 5: 16 the name is Eliada (Eli knows).

Beel'saru', a son of Elber (1 Esd. 5: 8). 

Beel'th'mus, an officer of Artaxerxes residing in Palestine (1 Esd. 2: 16, 25). The name is a corruption of the title of Rehum (chancellors), the name preceding it (Ezr. 4: 8). This title, according to Saucy (Introdt. to Ezr., Ne., and Esth.), signifies "lord of official correspondence." [R. L.]

Beelzebub. [Baal-zebub.]

Beer (well).—1. One of the latest halting-places of the Israelites, lying beyond the Arnon, and so called because of the well which was there dug by the "princes" and "nobles" of the people (Num. 21: 16-18). This is the Beer-elim referred to in Is. 15: 8. —2. A place to which Joshua sent a swarm of bees, the son of Gideon, fled for fear of his brother Abimelech (Judg. 9: 21); perhaps Beeroth.

Beera', an Asherite, son of Zophah (1 Chr. 7: 37).

Beera'h, prince of the Reubenites, taken captive by Tiglath-pileser (1 Chr. 5: 6).

Beer-elim, a spot named with Dimon in Is. 15: 8 as on the "border of Moab." [Beer.]

Beeri.—1. The father of Judith, one of the foreign wives of Esau (Gen. 26: 34). [Anah.]

—2. Father of the prophet Hosea (Ho. 1: 1).

Beer-lahai-roi (well of the Living One Who sees me, R.V. marg.), one of the wells of Kadesh and Beeroth, which in the wild days of Israel was "in the way to Shur," and therefore in the "south country" (Gen. 24: 62). According to the explanation of the text, it was so named by Hagar, because God saw her there (Gen. 16: 14). By this well Isaac dwelt both before and after the death of his father (Gen. 24: 62, 25: 11). In both these passages the name is given in A.V. as "the well Lah-i-roi." Near Kadesh (Qudis), S. of Beer-sheba. [Kadesh; Ke'desh.][C. R. C.]

Beeroth, one of the four cities of the Hivites who deputed Joshua into a treaty of peace with them; the other three being Gibeon, Chephirah, and Kirjath-jearim (Jos. 9: 17). Beeroth was allotted to Benjamin (18: 25), in whose possession it remained at the time of David (2 Sam. 1: 2). It is named with Chephirah and K.-jearim in the list of those who returned from Babylonia (Ezr. 2: 25; Ne. 7: 29; Beroth, 1 Esd. 5: 19). Sansabeel (Dnmon) or Biron (Beeroth) "under the hill Gibeon," as visible from the road to Lydda at the seventh milestone. Now el-Birch, a village about 8 miles N. of Jerusalem by the road to
and condemned as such yet earlier," (Am.5.5; 8.14). It was reoccupied by descendants of Judah after the Captivity (Ne.11.27-30). The site is now called Sheba or Soap, and supports flocks of goats and cattle. There are two wells, with a constant supply of good water even in autumn, cut in rock in the bed of the boundary valley, which runs W. to Gerar. There is also a third dry well. (Shur. W. Pal. iii. pp. 394-396.) The largest well is over 12 ft. in diameter, lined with masonry to a depth of 28 ft., and with water at 37 ft. The masonry in the 11th course of stones is about 1 ft. thick, and is of large size. The water-pressure is very considerable. There is a well, which may have held a piston or pump, 6 ft. 4 in. high, and is 3 ft. 6 in. less in diameter at the top than at the bottom. The wadi descends to a depth of 150 ft. from the extremity of the portion of the table-land covered with floors of stones, which forms a sort of an amphitheatre to the north of the wadi, and is about 200 ft. in diameter. A slope of about 100 ft. of this amphitheatre is covered with sand, and is preserved. The water-table of the wadi is about 20 ft. below the surface of the sand-soil, and the water is about 15 ft. below the surface of the permanent soil of the sandy bed of the wadi. The water is of good quality, and is used for drinking, cooking, and irrigation. The water is also used for the irrigation of the fields of the district. The well is surrounded by a wall of stone, about 12 ft. high, and is the only water-supply of the district.

**Bela**.—1. The old name of Zoar (Gen.14.2; 18).—2. A king of Edom son of Beor (Gen.36.32), whom some Jewish commentators identify with Balaam son of Beor (Num.22:5) and the LXX. renders Balak. —3. The eldest son of Benjamin (Gen.46.21), Belah in A.V.; the ancestor of the Belaites (Num.26.38,40).—4. A son of Azaz, of the tribe of Reuben (1Chr.5.8).

**Belah, Be'itites, The.** [BELA.]

**Belam's.** [BISHAMON.]

**Belial (Heb. 'bilya'ad, lit. "worthless-ness," from b'li, "without," and ya'ad, "worth") occurs generally in such phrases as "sons of B.," "men of B.," "daughter of B.," "thing of B.," etc., and always in O.T. as a common noun, denoting an extreme degree of depravity; e.g. Deut.13.13 (apostasy); Judg. 19.22 (sodomite and rapist); 1Sam.11.16 (female drunkenness). 212 (the profanation of the priestly office), 20.1, 2Chr.13.7 (rebellion); 1K.21.10, Pr.19.28 (perjury). In two passages it seems to mean the perdition of the soul—viz. Ps.41.8 (see marg.), "a matter of perdition," i.e. a matter which brings a man to perdition;
and Ps. 18.4 (see marg.), "the floods of perdition." In N.T. the word has become a proper name, and is a title of Satan (2 Cor. 20.15). The correct N.T. form is Bélial (Βελιαλ), probably an intentional alteration of the word (cf. Bala- zert). The form Bélôvs is also found in the Testaments of the Twelve Patriarchs and in the book of Jubilees. In Milton’s Paradise Lost Belial is the spirit of lust. [SATAN.] [C.H.]

**Bells.** The word occurs only in Jer. 6:29, where it is used figuratively, "The bells are burned," their use being to heat a smelting furnace. A picture of two different kinds of bells, both of highly ingenious construction, may be found in Wilkinson, *Anc. Egypt.* iii. 338. "They consisted," he says, "of a leather, secured and fitted into a frame, from which a long pipe extended for carrying the wind to the fire. They were worked by the feet, the operator standing upon them, with one under each foot, and pressing them alternately while he pulled up each exhausted skin with a string he held in his hand. In one instance we observe from the painting that when the man left the bells, they were raised as if inflated with air; and this would imply a knowledge of the valve. The pipes, even in the time of Theodores II., [supposed to be] the contemporary of Moses, appear to have been simply of reed, tipped with a metal point to resist the action of the fire."

**Bells.** The use of large bells for calling assemblies or similar purposes seems to have been unknown in Palestine, trumpets of various kinds being used instead. The small golden bells (Heb., pa’adonim) which alternated with the tricoloured pomegranates round the hem of the high-priest’s long robe are twice mentioned, Ex 28:38ff. and Ezek. 44:9 (cf. Josephus, 3 Ant. vii. 4): their object is described as being to give forth a sound as he went in and out of the sanctuary. The number of these bells is given by the Rabbis as 72 in all, while others give 12 or 365 (Kasch, *Comment. on Exod., in loc*). This bell and pomegranate arrangement has been thought to be derived from the old Egyptian ornamental border of lotus and bud, with its original meaning lost or altered. The word translated "bells" in Zech. 14:20 is quite a different one (mr; dldh), and is represented by "briddles" in I.XX. (so A.V. marg.); but a metal substance that would tinkle when shaken seems here indicated rather than leather.
one of the porters for the ark appointed by David (1 Chr. 15:18).—2. [Son.]

Ben-elah.—1. The son of Jehoiada, the chief priest (1 Chr. 27:5), and therefore of the tribe of Levi, though the latter of Kadesh (2 Sam. 23:20; 1 Chr. 11:22), in the S. of Judah; set by David (1 Chr. 11:25) over his bodyguard of Cherethites and Pelethites (2 Sam. 8:18; 1 K. 1:38; 1 Chr. 18:17; 2 Sam. 20:23), and occupying a middle rank between the first three of the "mighty men," and the 30 "valiant men of the armies." His exploits which gave him this rank are narrated in 2 Sam. 23:20-21. 1 Chr. 11:22. He was captain of the host for the third month (1 Chr. 27:5). Beniah remained faithful to Solomon during Adonijah's attempt on the crown (1 K. 1:8, 10, 32, 39, 44), and was raised to the name of Joab as commander-in-chief (2 Chr. 25:4). He appears to have had a son, called after his grandfather, Jehoiada, who succeeded Ahithophel about the person of the king (1 Chr. 27:34). But this is possibly a copyist's mistake for "Beniah the son of Jehoiada."—2. "The Pirathonite," an Ephraimite of the house of David, 30 mighty men (2 Sam. 23:30; 1 Chr. 11:31), and noted as the chief of the eleventh monthly course (1 Chr. 27:14).—3. A Levite in the time of David, who "played a psaltery on Almonoth" (15, 18, 20, 16, 5).—4. A priest in the time of David, appointed to blow the trumpet before the ark (1 Chr. 18:6).—5. One of the sons of Assaph (2 Chr. 20:14).—6. A Levite in the time of Hezekiah, one of the "overseers of offerings" (31:13).—7. One of the "princes" of the families of Simeon (1 Chr. 4:36).—8. Four laymen in the time of Ezra who had taken strange wives: 1. (Ezr. 10:25) [Baanias]; 2. (10:30) [Nadus]; 3. (10:35) [Maidai]; and 4. (1:43) [Baanites].—9. The father of Pelatiah, "a prince of the people" in the time of Ezekiel (Ezk. 11:1:3).

Ben-ammi (son of my kindred), son of the younger daughter of Lot, and progenitor of the Ammonites (Gen. 19:38; cf. Deut. 2:19).

Ben-berak, one of the cities of Dan, number 19 of the same (Josh. 19:41). It was burned by Sennacherib in 702 B.C. Now the village Ibn Ibrayj, 4 miles E. of Joppa. [C.R.C.]

Bene-jaakan. [BEEROTH OF THE CHILDREN OF JAAKAN.]

Bene-ke'dem, "the children of the East," or people, dwelling to the E. of Palestine (Gen. 29:1; Job 1:3; Judg. 6:33, 12:8, 10), mentioned with the Midianites and Amalekites. From Judg. 7:11-15 we infer that they spoke a dialect intelligible to an Israelite, and the name itself is Semitic. From 1 K. 4:30 it is evident that the term is used in a very general sense, but in Is. 11:14, Jb. 49:28, Ezk. 25:4, 16, they are noticed with Ammon and Edom. The term thus includes all the tribes between Israel and the Euphrates. [C.R.C.]

Benhadad', the name of three kings of Damascus.—Benhadad I. was (1 K. 15:18) son of Tabrimon and grandson of Hezon (2 Rez), and in his time Damascus was conquered by King Rezon, the last of the true Omri's, and had a portion of the territory of Aram—by both Baasha of Israel and Asa of Judah. He finally closed with the latter on receiving a large amount of treasure, and conquered a great part of the N. of Israel, thereby enabling Asa to pursue his victorious operations in the S. It would appear (1 K. 20:34) that he continued to make war upon Israel till the death of Jehoshaphat (2 Chron. 19:2). On his death it was succeeded by sixteen others, the names of which are not given. It is not certain that Benhadad I. must have reigned 50 or 60 years, which, however, is not impossible. [see King David's expeditions.] Long wars with Israel characterized his reign, of which the earlier campaigns are described under Ahab. He was signally defeated at Aphek (1 K. 20:34ff.). His power is shown by the 32 vassal kings who accompanied him to his first siege of Samaria. In Jehoram's reign Benhadad renewed the war with Israel, attacked Samaria a second time, and pressed the siege so closely that there was a terrible famine in the city. But the Syrians dispersed in the night in consequence of a sudden panic (2 K. 7:7). Soon after, Benhadad fell sick, and sent Hazael to consult Elisha as to the issue of his malady. Hazael, the day after his return, smothered his master and seized the throne (2 K. 15:17-21). Ben-hadad III., son of Hazael. When this king succeeded Hazael on the throne of Syria, Jehoash recovered the cities which Jehoahaz had lost to the Syrians, and beat him in Aphek (2 K. 13:17-23). Jehoash gained two more victories, but did not restore the dominion of Israel on the E. of Jordan. This honour was reserved for his successor. Benhadad III.'s misfortunes in war are noticed in Am. 1,4.

Ben-ha'll, one of the princes whom king Jehoshaphat commanded to teach the law in the cities of Judah (2 Chr. 17:7).

Ben-hanan, son of Shimon, in the line of Judah (1 Chr. 4:20).

Beninu, a Levite who sealed the covenant with Nehemiah (Ne. 10:13f).

Ben'amin (son of the right hand), the youngest child of Jacob, and the 2nd of Rachel, own brother of Joseph, and the only one of the family born in Palestine (Gen. 35:18). His mother called him his "father's son" (Gen. 33:3).—The name means "son of the right hand," the meaning of Benjamin (ben-yamin) may be "son of the south," as he was born so far S. of Haran. Since Joseph was 30 years old when he stood before Pharaoh (Gen. 41:46), and Benjamin apparently only a year younger (30:23), the latter must have been more than 37 years old when Israel went into Egypt (41:53). He already had ten children (46:21), yet (in A.V.) he is called a "lad" (43:8). The Heb. word however (natan) is of very indefinite meaning, and applies not only to David when he was more than 20 (1 Sam. 17:42), and a "man of war" (16:18), but also to Absalom, who was married (2 Sam. 18:32), and to others, like the spies (Jos. 6:23) who were grown men. The only indication of Benjamin's personal character is found in the blessing of Jacob (Gen. 49:27), where he is compared to a wolf. In the wilderness the tribe, under Abidan, is by no means one of the smallest (Num. 1:37-2:23, 26), nor does it take the smallest lot in Palestine the least territory. But when divided, the smallest tribe of Israel (1 Sam. 2:1), we must remember that, about three centuries and a half
before his time, after the massacre at Gibeah, Benjamin had been reduced to only 600 men (Judg. 20.47). In the blessing of Moses there appears to be an allusion to the fact that the three most sacred centres of Israel all lay within this tribe's border (Deut. 33.12). The men of Benjamin appear to have been famous as bowmen and slingers (Judg. 20.16; 1 Chr. 14.8, 17.17), and it is remarkable that all left-handed persons mentioned in O.T. are Benjamites (Judg. 3.15, 20.16; 1 Chr. 12.2). The song of Deborah a difficult verse may (see LXX.) be rendered "From Ephraim was their robbing out; against Amalek their stand. Benjamin, in thy people." (Judg. 5.14). Benjamin was destined to destroy Amalek under Saul (1 Sam. 15.1-33).

and the war cry "after thee, Benjamin," was known (as was the story of Gibeah) to Hosea (5.8, 10, 9). The sin of Gibeah (Judg. 19-21) almost blotted out the tribe for a time. David had friends among the Benjamites (1 Chr. 12.16) before Asner deserted Saul's heir (2 Sam. 3.19); and, though he was bitterly hated, he was the only son of the tribe—such as Shimea (16.5, 19, 17), yet one of his brethren. Benjamin became a name of Gibeah (2 Sam. 23.29; 1 Chr. 11.31), and after the separation of the two kingdoms Benjamin adhered to the house of David (4 K. 12.21) without any inclusion. The Benjamite genealogies (1 Chr. 7.6-12, 8.1-40) go down apparently to the time when Benjamin occupied towns of Dan after the captivity (1 Chr. 8.12; Ne. 11.35). In the Psalm (68.27) Benjamin is still a small tribe. The E. gate of Jerusalem was named from it (Je. 37.13, 38.7; Zech. 14.10). The ethnic form occurs in full (1 Sam. 21:25, 7; 2 Sam. 16.11, 19, 17; 1 K. 2.8; 1 Chr. 27.12; Ps. 77, title), but it is sometimes shortened to rehim in Heb. (Judg. 3.15, 19, 16; 1 Sam. 9.14; 2 Sam. 20.1; Esth. 2.5), the last-cited passage referring to Mordecai; while St. Paul, yet later, was of this tribe (Ph. 3.5, 3). The Tribal Lot (Jos. 18.11-28) was all occupied early except Jeru- salem (Judg. 1.21), and coincided with Solomon's eleventh district (1 K. 4.18). Its borders are described under Ephraim and Judah, and it included about 100 square miles, mostly consisting of very rugged hills, but considered very good land by Josephus (5 Ant. 1, 22) because it included the plain of Jericho. The W. border ran S. along the east of the mountains from Araunah to Kirjath-jearim (Jos. 15.13-14), for it "turned about on the W. quarter southward." (R.V.). Two of the tribe who were named after its founder are noticed in later times (1 Chr. 7.10; Ezr. 10.32). Benjamin is last mentioned in Rev. 7.5. [C.R.C.]

Benjamin, High gate, or Gate, of (J. 16.5, 19.17), apparently a Mereite Levite; more probably a proper name, not meaning his son as describing Jaaziah (1 Chr. 24.26-27).

Ben-oni (son of my sorrow, or hurt—i.e. last effort), the name given by the dying Rachel to her second son, but changed by his father into Benjamin (son of the right hand; Gen. 35.18).

Ben-zoheth, a descendant of Judah (1 Chr. 4.20).

Beon (Num. 32.3) is probably an early clerical error for Meon (ver. 38). [C.R.C.]

Beor.—1. The father of Bala (I. of the early Edomite kings (Gen. 36.22; 1 Chr. 1.13).—2. Father of Balaam (Num. 22.5, etc.).

Bera, king of Sodom, one of the 5 kings who rebelled against Chedorlaomer (Gen. 14.12f.).

Berachiah, a Benjaminite, archer who joined David at Ziklag (1 Chr. 12.3).

Berachah, Valley of (R.V. Berachah), a valley in which Jehoshaphat and his people assembled to "bless" Jehovah after the overthrow of the hosts of Moabites, Ammonites, and Moab, and which thus acquired its name of "the valley of blessing." (2 Chr. 20.26). The name Berekût still survives, attached to the plain 4 miles W. of Tekoa. [C.R.C.]

Berachia (1 Chr. 6.39) = Berechiah, 6.

Berulah, son of Shimhi, a chief man of Benjamin dwelling in Jerusalem (1 Chr. 8.21).

Berea, a city of Macedonia, to which St. Paul retired with Silas and Timotheus during his first visit to Europe, on being persecuted in Thessalonica (Acts. 17.10), and whence, being again persecuted by emissaries from Thessalonica, he withdrew to the sea for the purpose of proceeding to Athens (14.15). The community of Jews must have been considerable in Berea. The place is described very favourably (11). Sopater, one of St. Paul's missionary companions, was from this place (20.4). Berea, now called Verria or Quara-Verria, is situated on the E. slope of the Olympian mountain-range, commanding an extensive view of the plains of the Euphrates and Haliacmon, and has now 15,000 or 20,000 inhabitants. A few ancient remains, Greek, Roman, and Byzantine, still exist here. —2. (R.V. Berea; 2 Mac. 13.4). The modern Alexpo. —3. A place in Judaea (1 Mac. 9.4), probably Berotho. (Azotus, Mt.)

Berechiah.—1. A son of Zerubbabel, and in the royal line of Judah (1 Chr. 3.20).—2. The father of Meshullam. 13 (Ne. 3.4, 30, 6.18).—3. A Levite of the line of Elkanah dwelling in the villages of the Netophathites (1 Chr. 9.16).—4. A doorkeeper for the ark (15.24).—5. One of the chief men of Ephraim in the time of King Azah (2 Chr. 28.12).—6. A Gershonite Levite, father of Asaph the singer (1 Chr. 15.17).—7. Father of Zechariah the prophet (Zech. 1.1, 7). [Zacharias, 11; Zechariah, 1.]

Be-red.—1. A place in the south of Palestine, between which and Kadesh lay the well Libnah-roi (Gen. 16.14).—2. A descendant of Ephraim, in the list of the 25th great-grandson of Aaron (1 Chr. 24.1). Possibly a clerical error for Becher in Num. 26.35. }
BETHABARA

BERENICE. [BERNICE.]
Beri, an Asherite, son of Zophah (1 Chr. 7:36).

Besai, Num. She—brother attained account berith. of Jacob's 26.44, 45). time with Agrippa Israel. The but greet Sat. hath Hamath Bib. Zobah, Can. 5.

Bepithes, The (zSam. 20.14) mentioned with Abel in the extreme N. of the land of Israel. Perhaps not a proper name. [G.R.C.]

Berith, The god (Judg. 9.46) = Baal-berith. [BAAL, 1.]

Bernice. Eldest daughter of Herod Agrippa II. She first married to her uncle Herod, king of Chalcis, and after his death lived under circumstances of grave suspicion with her own brother Agrippa II. (Juvenal, Sat. vi. 156), who brought her with him to greet Festus on his arrival in Judaea as procurator (Ac. 25.13). She listened to St. Paul's defence as her sister Drusilla had done (24. 24). She married, as her second husband, Ptolemon king of Cilicia, then, leaving him, became the mistress of Titus, who at last dismissed her from Rome to appease public discontent on account of his connexion with her. [E.R.B.]

Beroadach-baladan (zK. 20.12) = Mero-

Dach-baladan.

Beroath, (1Esd. 5.19) = BEEROOTH.

Beroath, a city named (Ezk. 47.16) with Hamath on the N. of the land of Israel; possibly, but not certainly, the same as Berothai.

Berothai (zSam. 8.5) is the name of a city of Zobah, tributary to David, noticed with Tibhath (see BETAH), both belonging to Damascus. The LXX. gives, as chosen titles for Berothai (i.e. Heb. barâ’, “to choose”) and for Chun (in the parallel passage (1 Chr. 18.8). The latter is supposed to be the later Conna (Rob. Later Bib. Res. p. 535), now Ras Ba‘albek, 24 miles N. of Ba‘albek. The village Breatâ‘in, 5 miles S. of Ba‘albek, is a possible site for Berothai. [C.R.C.]

Berophai (zSam. 11.70). [BEEROOTH.]

Beryl (tarshish) occurs in Ex. 28.20, 39.13, Can. 5.14, Ezk. 1.16, 10.9, 28.13, Dan. 10.6, as the translation of the Heb. tarshish, and of the Gk. βόρειος in Rev. 21.20. It is generally supposed that the tarshish derives its name from the place so called. The beryl was known to Pliny, who admits several varieties, stating that the palest one, called chryspopase, was by some considered a different stone, and he mentions the relation between the ordinary kind and the emerald. Theophrastus does not use the name, but probably knew the stone as one variety of his smaragdus; apparently Rev. 21.20 is the first appearance of this term. In Ezek. 27.15-19 there it almost certainly denotes the modern beryll. This, the aquamarine of jewellers, is hardly more than a variety of emerald, containing less of the colouring material. Whether tarshish also signifies this stone is more doubtful. The emerald was known to the Egyptians, for there are ancient mines near an Egyptian Sea, slightly N. of the latitude of Assouan, and the gems there obtained are rather pale in colour; but some think that tarshish refers to the chrysolithus of Pliny, a golden-coloured gem, probably the modern topaz, which also occurs in that part of Egypt. [T.G.B.]

Berzelus (zEsd. 5.38) = BARZILAI, S.

Besai. “Children of Besai” were Nethinim who returned to Judaea with Zerubbabel (Ezr. 2.49; Ne. 7.52).

Besodeia', father of MESSHULLAM, 14 (Ne. 3.6).

Besor, The brook, a torrent-bed in the extreme S. of Judah, mentioned only in 1Sam. 30.9, 10, 21. It was in the Amalekite district or Tih desert. [C.R.C.]

Betah, a city belonging to Hadadezer, king of Zobah, mentioned with Berothai (zSam. 8.5). In 1 Chr. 18.8 the name is perhaps better called Tibhath. Tibhath is probably the Tubakhi of the Amarna letters (Berlin 171) noticed for, there are ancient mines near an Egyptian traveller) in 14th cent. B.C. Possibly Keft Dubbeh, W. of Ba‘albek. [C.R.C.]

Bet’ane, a place apparently S. of Jerusalem (Jth. 1.9); probably BETH-ANOTH. [C.R.C.]

Bet enon, on the border of the tribe of Asher (Jos. 19.25). By Eusebius it is said to have been then called Rishab, and to have lain 8 miles E. of Ptolemais (Onomasticum). He perhaps means el B’aneh, a village 12 miles E. of Acre. [C.R.C.]

Beth (house, temple, or tent as among modern Arabs; Judg. 18.31, 1Sam. 17). BETH- EKED, the “shearing house” (zK. 10.12) between Jezreel and Samaria, is about 35 miles from Jezreel, 15 miles from the town of Legio, and in the plain of Esdraelon, probably Beit Qaad. 13 English miles S.E. of Lejiún. BETH-HAGGAN, the “garden-house” (zK. 27) near bleach (Yebla), possibly Beit Jenn. 9 miles N. of Yebla, or otherwise Jenin near Belmam, according as Ahaziah fled N. or S. from Jezreel. [C.R.C.]

Bethabara (house of crossing), where St. John baptized (Jn. 1.28). It was “beyond Jordan.” The three oldest MSS. read “Bethania beyond Jordan,” which could not mean Bethany (where there is no water, and which is not “beyond Jordan”), but probably refers to Batanea. [BAASHAN.] Origen states that, in 3rd cent. A.D., nearly all the MSS. had this reading; yet he considers Bethabara to be the true reading, as did Epiphanius in 4th cent. A.D. Eusebius (Onomasticum) indicates the traditional site at the ford E. of Jericho (as still shown), but while Bethabara was only a day’s journey from Cana of Galilee (Jn. 1.29, 35, 43, 21), it was two or three days distant from Bethany (Jn. 10.40, 11.3, 6, 17), and must have been on the upper Jordan. The name of a ford N. of Bessâin was ascertained in 1874, by
the surveyors of Jordan, to be well known as 'Abārāh, and this is about 20 miles from Kēfr Kenna, and 60 from Bethany. The site is suitable, and the name shows St. John's knowledge of the place, as the place is otherwise unnoticed. It can have no connexion with either Beth-barah or Beth-arabah. [c.r.c.]

Beth-anath,' one of the "fenced cities" of Naphtali, named with Beth-shemesh (Jos. 19. 38): from neither of them were the Canaanites expelled (Judg. 1.33). Now 'Āmilthah, a village now in the "Prince's land," was a place of unknown localisation until the time of Josephus, who, however, like other writers, believed it to be mentioned in the Bible (13 Ant. i. 5) as Bethaglaia. [BETH-HOGLAIA.]

Beth-anot,' a town in the mountains of Judah, named with Hallul, Beth-zur, etc., in Jos. 15.59 only. Now Beit 'Amin. [c.r.c.]

Bethany, a village on the mount of Olives (Mk. 11.1; Lu. 19.29), nearly a mile from Jerusalem (Jn. 11.18), on the road from Jericho to Bethphage. It was the home of Lazarus (Jn. 11.1), and hence is now called d 'Aṣrīyaych, on the road which crosses the S. shoulder of Olivet. It was a "sabbath day's journey" from the city (Ac. 1.12): for near Bethany Jesus was last seen by His disciples (Lu. 24.50). See Mt. 21.17; 28.6; Mk. 11.11; 12.12. This may be a "house of dates," and a date palm still grows there, with figs [cf. Bethphage] and olives. It is a small stone village, dominated by the tower of Queen Melisinda's convent (1148 A.D.), and a very small underground chapel is shown as the tomb of Lazarus. The ancient tombs adjoin the road E. of the village (S. W. Pal. iii. pp. 27-28). [BETH-AZMA'ATH.]

Beth-arabah,' one of six cities of Judah which were situated in the Arabah (Jos. 15.61), on the N. border of the tribe, and near Beth-hoglah (15.6). It is also included among the towns of Benjamin (18.22). In Jos. 15.18 (cf. R.V.) we find "the Arabah" for Beth-arabah, the site of which is unknown. [BETH-ZUR.]

Beth-aram (R.V. Beth-haran), a town of Gad, described as in "the valley" (Jos. 13.27), and no doubt the same as Beth-haran in Num. 32.36. Eusebius (Onomasticon) says that Syrians called it Bethramphatha, and that, in honour of Augustus, Herod had named it Lucentius, and called it Arbat (Arbela, Araba), fortified Betharamphatha, calling it Julius in honour of the Emperor's wife Julia, or Livia (18 Ant. ii. 1). Ptolemy gives the locality of Livias as 31° 26' lat. and 67° 10' long., or near the N.E. shore of the Dead Sea. It is now Tell er Rihineh, 7 miles N.E. of the Jordan mouth (S. W. Pal. ii. 238). [BETH-DIBLATHAIM.]

Beth-arbel (Ho. 10.14 only), the scene of a sack and massacre by Shalman. No clue is given to its position: it may be Arbela in Galilee (Irbid), or another Arbela near Pella, E. of Jordan. Now Irbid (cf. Savec. Higher Crit., and Mon. of G.2). [BETH-DIBLATHAIM.]

Beth-a'ven, a place on the mountains of Benjamin, E. of Bethel (Jos. 7.2, 18.12), and between it and Michmash (1Sam. 13.5, 14.23). In Ho. 4.15; 5.8, 10.5 the name is transferred, with a play on the word very characteristic of this prophet, to the neighbourhood of Bethel once called of God, but then [c.r.c.]

Beth-a'zma'ath (No. 7.38 only), a town of Benjamin which is elsewhere called Bethsamos (1Esdr. 5.18). Noticed with Alme- meth (Ailmith), close to which, 1 mile to N., is the village Hiszneh. [AZNAVUTH.]

Beth-baal-me'on (Jos. 13.17). [BAAL, 8.] Beth-baal-me'on (Jos. 17.24), at a point S. of the scene of Gideon's victories. It was apparently in the Jordan Valley. [c.r.c.]

Beth-ba'si, a town in which Jonathan and Simon took refuge from Bacchides (1Mac. 9.62,64). Josephus (13 Ant. i. 5) calls it Bethaglaia. [BETH-HOGLAIA.]

Beth-bri'nah (1Cr. 6.9,10). A town of Simeon (1Cr. 4.37), otherwise Beth-leraboth (Jos. 19.6), near Hazar-susah and Sharmen. It was probably Birah, a ruined site 13 miles S.W. of Hebron, and 12 miles N.E. of Tell esh Sheria. [BETH-NEGEB.]

Beth-car, a place named as the point to which the Israelites pursued the Philistines (1Sam. 7.11). From the expression "under Beth-car" it would seem that the place itself was on a height. Josephus says that the stone Ebenezer was set up here (6 Ant. ii. 2). The site is doubtful. [EBENEBER.]

Beth-dagon (temple of Dagon).—1. The town of Judah (15.41), in David's time, called Beit Delan, a village 6 miles S.E. of Joppa, called Caphar-dagon in 4th cent. A.D. (Onomasticon), between Lydda and Jannina. It was taken by Sennacherib in 702 B.C.—2. A town apparently on the N. border of Zebulun, near the sea (Jos. 19.27), probably the ruin near Pauh in the hill 5 miles S.E. of Accho, near the Belus River. This agrees with the situation of Gabul, and other points on the border of Asher and Zebulun. [BETH-DIBLATHAIM.]

Beth-diblatha'im, a town of Moab (Is. 48.22) apparently the place elsewhere called Almon-diblathaim. It lay between Dibon and Nebo. [BETH-DIBLATHAIM.]

Bethel (house of God).—1. Jacob, fleeing to Haran, found a certain "place" (Heb. maqôm, Arab. maqâm), or "shrine," near Luz (Gen. 28.11,19), which he called Bethel. It was perhaps the site of Abraham's altar, E. of the town afterwards itself called Bethel (Gen. 12.8). On his return from Haran (35.7,6,15), this shrine, called "a pillar" (Amos 9.3) and "the place," has been so named by him when he "fled from the face of his brother." He again raised up a pillar and anointed it (ver. 11) when God appeared to him "again" (ver. 9). The second episode thus refers back to the first. The town of Bethel—now Bethin—is a small stone village, on a high, bare, and very rocky ridge, 4½ miles N. of Jerusalem. It contains the ruins of a 12th cent. church; and in the valley 3 miles to W. the spring called 'Ain Lōsch preserves the name of Luz. Bethel lay within the N. boundary of Benjamin, and E. of Luz (16.2,18.13): but the place was besieged by the sons of Joseph (Judg.1.22). It was a sacred centre to which the ark was brought in war-time (see R.V. Judg. 20.18,26,21.2), and was one of the places where Samuel judged Israel (1Sam. 7.16). Here Jeroboam set up a calf idol (1K.12.26), which remained till David brought back the ark, and bethel was for a time recovered by Abijah (2 Chr. 13.19), and inhabited by "the sons of the prophets" (2K.2.3). About 772 B.C. it is called the "holy place," and "royal house," of the
PLATE V

BETHANY, FROM THE NORTH.
king," or of Moloch (Am. 7.12, 13), to whom, as a calf, human sacrifices appear to have been offered (Ho. 13.2; R.V. marg.). Bethel was re-consecrated after the Captivity (Ne. 11.31), and fortified by Jonathan the Hasmonaean (1 Mac. 9.50). In 1 Esd. 5.21 it is called Betolias.--2. A royal Canaanite city (Jos. 12.16) apparently near Tappuah. Perhaps the present village Beilt Aula, 7 miles N.W. of Hebron, and 4 miles N. of Taffah. [C.R.C.]

Bethel, Mount (Jos. 16.1; 1 Sam. 13.2). The mountain region round Bethel.

Beth-emek, a place on or near the northern border of Asher (Jos. 19.27). Probably 'Amqua (Robinson), 7 miles N.E. of Accho; E. of it the border ran N. to Dabbasheth. [C.R.C.]

Bether, Mountains of (Can. 2.17). Bether (Juchith) was near Jeremah on S.W., where the Jews were massacred in 135 A.D.; but the word may only mean "division" (LXX.), or may refer to Bethiron, the hills W. of Mahanaim (2 Sam. 2.20). [C.R.C.]

Bethesda. Probably "house of the stream," at Jerusalem (11.5-2), a pool by the "sheep place," perhaps where the sheep were watered. It had "five porches," and the water was periodically troubled. Steps led down to the water (ver. 7). Robinson suggested the Gihon spring ('Ain Umm ed Dera), which is reached by a long flight of steps on the N.W. side of the city, and rises perpendicularly from the fountain. The sick still bathe in it, and flocks are watered thence. In 4th cent. A.D. Bethesda was shown at the Twin Pools, just outside the temple enclosure on N.W. In 12th cent. it was placed at the Inner Pool, a tank to the N. of the preceding. Since the 14th it has been shown at Birket Israill, outside Bent N., wall of the temple enclosure. But none of these pools appears to have existed in the time of Christ, and none of them has any "stream." [C.R.C.]

Beth-ezel, named only in Mi. 1.11, with places on E. border of Philistia. [C.R.C.]

Beth-gader (1 Chr. 2.51). Possibly the same as Gedera.

Beth-gamul, a town of Moab, in the mishor, E. of Jordan (Je. 48.23, cf. 21). Probably Jemal, a ruin E. of Dibon. [C.R.C.]

Beth-haccerem (house of vineyards). From Je. 6.3 we find it was used as a beacon-station, mentioned with Tekoa. In the time of Nehemiah (6.14) it seems to have been in the "environs" (A.V. "part") of Jerusalem. The site is unknown. [C.R.C.]

Beth-haran (Num. 33.36). [Beth-aram.] Beth-hogla or -hoglah, a place on the border of Judah (Jos. 15.6) and Benjamin, to which latter tribe it was reckoned to belong (18.19, 21). The name occurs at 'Ain Hajla, in the required position E. of Jericho, by the old monastery Qasr Hajlah. [C.R.C.]

Beth-horon, the name of two towns or villages, an "upper" and a "nether" (Jos. 16.3-5; 1 Chr. 7.24), on the road from Gibeon (Jos. 10.10, 11) to the Philistine plain (1 Mac. 3.7), and on the boundary-line between Benjamin and Ephraim (Jos. 16.3, 4 and 18.13, 14); it was counted to Ephraim (Jos. 21.22; 1 Chr. 7.24), and given to the Kohathites (Jos. 21.22; 1 Chr. 6.68[53]). These two towns are the modern villages of Beilt-ar el-tahla and Beilt-ar el-hoka—that is, "the lower" and "the upper" Beilt-ar. The old road to Jerusalem rises 500 ft. in about a mile between the two; the pass was thus always important for defence. Beth-horon is noticed in Shishak's list of conquests (20th cent. B.C.) next to Gibeon. See 1 K. 9.17; 2 Chr. 8.5; 1 Mac. 9.50; Jth. 4.4. From Gibeon to the Upper Beth-horon is about 4 miles of broken ascent, and this appears to be the "going up" to Beth-horon which formed the first stage of Joshua's pursuit. With the upper village the descent commences; the road is rough and difficult. This is the "going down to Beth-horon." [C.R.C.]

Beth-jeshimoth, or -jesimoth, a town of E. of Jordan, at the S.-end of the Jordan Valley (Num. 33.49). It was one of the limits of the encampment of Israel before crossing the Jordan. Later it was allotted to Reuben (Jos. 12.3, 13, 20), but came at last into the hands of Moab, and is described as "the glory of the country" (Ezk. 25.9; LXX. "best land"). Now the ruin Surrimeh near the N.E. corner of the Dead Sea shore.

Beth-lebaoth, a town of Simeon (Jos. 19.6; Leshoath. 15, 32). [Beth-birel.]

Bethlehem (house of bread).—1. BETHLEM OF JUDAH. Its old name was Ephrath, or Ephratah (Gen. 35.16, 19; Ru. 4.11; 1 Sam. 17.12; 1 Chr. 4.4; Ps. 135.6; Mi. 5.2), meaning "fruitful." Perhaps "place of fruit" or "stone," from the ruins Jachin (Je. 31.35). It is now called Beit Lahm, a small town on a high ridge 5 miles N. of Jerusalem. The site of Rachel's tomb, according to early tradition, is fixed on the main road a mile N. of the town, and is now covered by a modern shrine. Bethlehem seems to have been quite a small place (Mi. 5.2), and is not mentioned in the geography of Joshua, except in the verse (15.59) added in LXX.: "Ephratah which is Bethlehem." [Eltekon.] It is called "of Judah" (Judg. 17.7, 19.2; 1 Sam. 17.12; Mt. 2.6) to distinguish it from No. 2. Jonathan the grandson of Moses [Jonathan, S] (Judg. 17.7-9, 18.30) was a Levite living as a gér.
or protected member of another tribe, at Bethlehem, as did another Levite (19:2,18); and the same (see 2 Sam.19:37; 1 K.4:17) seems to have been a "dwelling given to a Gileadite near Bethlehem. There were fields (Ru.2,3) and pastures (1 Sam.17:15) near the town, the latter in the wilderness to S.E. Yearly sacrifices were here offered (1 Sam.16-2,5;20,6) before the temple was built. It had a natural water supply—for there is only a small spring 2 miles E.—but had a well (b'rer), now supposed to be a cistern N.W. of the town (2 Sam.23:14,16; 1 Chr.11:6), which depends on Pilate's aqueduct for water; this no doubt is the reason why it was not a large place originally. It was inhabited by the family of Caleb (1 Chr.2:51,54,4,4), and after the Captivity (Ezr.2,21; Ne.7,26). But, in consequence of prophecy (Mic.5,2), it was a general Jewish expectation in our Lord's time that the Messiah would be born here (Mt.2:5; Jn.7,42); and in the manger the "inn," or "lodging," Jesus was laid (Lk.2:7). Justin Martyr, c. 150 a.d. (Trypho 78), says that the place where Jesus was laid was shown in his time; and Origen intimates that it was well known (A. Eul. Colus i. 51). Jerome (Epist. ad Paulin. xiii. 49) says that this cave had become a scene of Adonis-worship before Constantine cut down the grove and built his first church on the site in 330 a.d. It is remarkable that on iron hills there are still many rock-cut stables, with mangers, in ancient ruins. The site is the only one in Palestine of which there is Christian tradition traceable before the 4th cent. a.d. The ancient basilica is still standing—the oldest church perhaps in the world—adorned with glass mosaics added, c. 1150 A.D., on the nave walls (above the original pillars), and with a roof of English oak put up in 1482 A.D. Bethlehem was the retreat where Jerome translated the Bible into Latin at the close of 4th cent. a.d. It has now a population of 4,700 Christians and 300 Moslems, and is a thriving town with its markets, olive trees, and vineyards near it. (Surw. W. Pal. iii. pp. 28, 83, 129, 130.)—2. Bethlehem of Zebulun (Jos. 19. 15). Now the village Beit Lahem, 7 miles N.W. of Nazareth. It is not said which of the two towns was the home of the judge Ibzan (Judg. 12,8,10).—[C.R.C.] Bethlem son (1 Esd.5,17) = Bethlehelmian. 1. Beth-ma'akah, named in 2 Sam.20,14,15 as a definition of the position of Abel in or close to Maacah, or Aram-maakah, one of the petty Syrian kingdoms in the N. of Palestine (cf. 2 K.15,29).—[C.R.C.] Beth-mar-ca'bath (house of the chariots), one of the towns of Simeon, mentioned with Ziklag and Hormah (Jos. 19,5; 1 Chr.4,3). In Jos.15,30,31 Madmannah occurs instead. The place, like Hazar-susah, which name stands next, refers no doubt to a military post with a force of chariots, dating perhaps from the Egyptian occupation of such posts in the plains in the 15th and 16th cents. B.C.—[C.R.C.] Beth-noon (Je.48,23).—[Ba'al. 8.] Beth-nimrah, one of the fenced cities of Gad (Num. 32,36) lying in the valley near Beth-han an (Jos.13,27). In Num.35,3 it is called simply Nimrah. Now Tell Nimrin, at the foot of the hills of Gilead, 10 miles N. of the Dead Sea (Surw. E. Pal. p. 237).—[C.R.C.]. Beth-pa'let, Beth-phe'let (R.V. Bethpel), a town among those in the extreme S. of Judah, named in Jos.15,27 and Ne.11,26 with Moladah and Beer-sheba. The site is unknown.—[C.R.C.] Beth-pa'zazz', a town of Issachar named with En-ha'ddah (Jos.19,21).—[C.R.C.] Beth-peor (temple of [Baal] Peor) Deut. 3,29,4,46,34,6; Jos.13,20, a place apparently not far from Necho, in Moab, probably near the "top of Peor" (Num.23,28), which commanded a view of the Jezirun on W. of the Dead Sea. If Peor was at Mimieh, the very remarkable stone circle with its central standing stones at el Mareight (sacred things) on the same ridges may represent this " temple of Peor." [Peor.] (Surw. E. Pal. pp. 181-189).—[C.R.C.] Beth-pha'let. [Beth-palet.] Beth-rapha occurs in the genealogy of Judah as the son of Eshto-ton (1 Chr.4,12), probably a place-name.—[C.R.C.] Beth-rathb, a place near the valley in which lay the town of Laish and Dan (Judg. 18,28). It was one of the little kingdoms of Aram or Syria (2 Sam.10,6). In ver. 8 the name occurs in the shorter form of Rehob. [C.R.C.] Bethsai'da, the home of SS. Philip, Andrew, and Peter (Jn.1,4,12,21), a place important as defining the site of the miracle of feeding the five thousand. There is no doubt that a town so called lay immediately E. of the Jordan, close to where it entered the sea of Galilee, in "lower Gaulonitis" within the tetrarchy of Herod Philip, who died and was buried there. He named the city Julias from Caesar's daughter (Joseph. Ant. vi. 7,9,1,1, 7,2), and pasture (Pliny (Hist. Nat. v. 25) places Julias on the E. side of the lake, with Hippus (Sisach). In this position we were described by L. Oliphant in 1884, including possible remains of a synagogue, and Greco-Roman fragments, at ed Dikkeh (the platform) on the slope of a barren hill a few hundred yards E. of the river, a mile N. of the ruin of Tell. The Jordan has probably filled up the N. shores of the lake considerably since 34 A.D., when Philip died; but this site is still only 2 miles from the point at which it enters the lake. Two difficulties have been found, from early times, in applying all the N.T. references to Bethsaida Julias, though most of them clearly apply to this site. First, that Bethsaida is said to be "of Galilee" (Jn.12,21): this, however, might be an early clerical error for the less familiar "of Golan." Secondly, that the disciples took boat, from near the desert where the feeding of the five thousand occurred, "to go to the other side before unto Bethsaida" (A.V. Mk. 6,45), or simply "the other side to Bethsaida" (R.V.). The distance from their starting-point to Capernaum (Jn.6,17,10) exceeded 25 or 30 furlongs, that is 3 or 4 miles; and "the land of
BETHUEL
Judg. (Mk.5.41).
and Bethsaida and 2Sam.2i.12) else-
side require occur "the but any which returned the the miracle occurred W. of the lake. The Sinaitic MS. (see 1Chr.7.29), just within the limits of Issachar (Jos.17.11), and therefore on the W. of Jordan (cf. 1Mac.6.52). The Canaanites were not driven out from the town (Judg.1.27). In Solomon’s time it seems to have been a town to a district extending from the town itself to Abel-meholah; and "all Beth-shean" was under charge of one of his officers (1K.4.12). The korps of Saul and his sons were fastened up to the wall of Beth-shean by the Philistines (1Sam.31.12,12) in the open "street or space, which then, as now, was the gate of an Eastern town (2Sam.21.12). Bethsan is mentioned c. 150 B.C. in 1Mac.12.40,41. The later name SCYTYPOLIS appears first in 2Mac.12.29, but has not survived, and the place is still called Beisan. It lies in the Jordan Valley, about 12 miles S. of the sea of Galilee, and 4 miles W. of the ruin of Beisan, a city of the valley of Jezreel. The ruins on N. include those of a Roman theatre. It has recently become the seat of a district governor, but is only a poor village of mud huts. [c.r.c.]

BETHSHEMOS
(temple of the sun).
Four places so named include— 1. A town on the borders of the Lelamites and W. of Kirjath-jearim, otherwise Ir-shemesh (town of the sun; Jos.19.41), a city of Levites (Jos.21.16), who are here noticed early (1Sam.6.9,14,15); now *’Ain Shems, a ruined village in the valley of Sorek, 4 miles W. of *’Erna (Surv. W. Palt. p. 231), distinguished from other similar *’Hums (see 1K.14.11). Amaziah was here defeated (2Chr.25.18). It was in the skhafa (2Chr.28.18).— 2. A place on the border of Issachar (Jos.19.22), apparently near Jordan on S.E. boundary. It is possibly the ruin at *’Ain Shemysykh, 7 miles S. of Beisan in the Jordan Valley.— 3. A town of Naphtali (Jos.19.38; Judg.1.33), possibly the ruin Shemsan, 3 miles E. of Tabor.— 4. In Egypt (I Ec.43.13). The LXX. reads "Heliopolis"—that is, On, named from the Egyptian Un, the "rising sun." The site is 10 miles N.E. of Cairo, and the mediaeval Arabs called it *’Ain Shems. [c.r.c.]

Beth-shittah (house of the acaia; Judg. 7.22). The name, perhaps corrupted, is not a problem of N.T. geography, is due, not to any discrepancy between the various accounts, but to the misunderstanding that arose about the 4th cent. A.D. The site of Julias is not noticed in the Onomasticon, and the scene of the miracle was then wrongly shown W. of the lake of Gennesaret. The Sinaitic MS. took this view, as it took the prevailing view as to Emmaus; but its writer is responsible also for supposing an eclipse of the sun to occur at full moon (Lu.23.45), and for ungrammatical Aramaic in substituting ṛadāda wawā for "Talitha cumi" (Mk.5.41). To reconcile all known notices of Bethsaida, we require only to read Golgotha for "Galilee" or "Bethsaida," take the latter as rather loosely used in contrast with Judaea-Bethsaida, "the house of fishing," being only a quarter of a mile outside the Galilean border. [c.r.c.]

Bethsamos, [BETH-AZMAVETH].
Bethsan’ (1Sam.31.12,12; else where Beth-shan’ (1Sam.31.12,12); etc. of Beth-zur, a town of Simeon in the far S. The site is unknown Perhaps Bethel, 2 (1Sam.30.27). [c.r.c.]
Bethulia, the home of Judith, the topography of which is very minutely described. It was "over against Esdraelon," and near the plain of Dothan (Jth.4:6). The enemy camped in the latter plain, as far as Belmaim or Balamo (7.3-5), or from Dothikin E. to Wady Belamleh. But Bethulia was in the hills, on the slope of a mountain (6.11,12) with springs at its foot (7.7,12), but no water at the town (7.13,20). Other mountains surrounded it (15:3), and the view extended down to a valley (10:10). These details apply to the village Mithithia or Moselieh (Surv. W. Pal. ii. p. 150), on the N. slope of a hill, 5 miles S.E. of Tell Dothan. It has only wells, but on S. side of the mountain there is much water in the Merj al Ghuruk, or "the meadow." The view on N. extends over Esdraelon to Nazareth and Tabor. [c.r.c.]

Beth-zacharias. [Beth-zacharias.]

Beth-zur, a town in the mountains of Judah, named between Halhul and Gederoth (Jos.15.58). Beth-zur would appear from 15.34 to have been a frontier town of the people of Maon, and was fortified by Rehoboam (2Chr.11.7). The people of Beth-zur assisted Nebemiah in rebuilding the wall of Jerusalem (Ne.3.16). In the wars of the Hasmonaean, Beth-zur, or Beth-sura, played an important part. The name means "house of the rock"; most close to the Haikal on W., a ruin on a cliff at a narrow pass of the road from Hebron to Jerusalem. [c.r.c.]

Betolius (1Esd.5:21). [Bethel.]

Betomas them and Betomes tham, a town "over against Esdraelon, facing the plain that is near Dothan." (Jth.4:6,15:4.) An unknown site. [c.r.c.]

Betonim (Jos.13:26), named on N. border of Gad. Probably the Butein district of N. Gilead. [c.r.c.]

Betvothal. [Marriage.]

Beulah (married). In the imagery of Isaiah (62:1; cf. 49.14,53.16) the name which the land of Israel is to bear when the Gentiles share its spiritual privileges. [c.r.c.]

Beza. "Children of Beza" returned from captivity with Zerubbabel (Ezr.2:17; Ne.7:23). The name occurs again among those who sealed the covenant (Ne.10:18). [c.r.c.]

Bezaeeel.—1. Son of Uri the son of Hur, of the tribe of Judah; the artificer to whom was confided by Jehovah the design and execution of the skilled work, especially in metal, wood, and stone, for the tabernacle (Ex.31:1-6).

—2. One of the sons of Pahath-moab who had taken a foreign wife (Ezr.10:30).

Bezek.—1. A Canaanite town (Judg.1:4,5). Probably the ruin Bezegh in S.E. of Lydda. 2. A place evidently in Central Palestine, a day's march from Jabshe-Gilean (1Sam.11:8), where Saul gathered Israel within a week. Eusebius (Onomasticon) mentions a Bezek 17 Roman m. from Shechem, now Bizya, an ancient ruin 14 English m. N. of Nablus. This lies immediately W. of the probable site of Jabesh, about 2S. m. distant (Surv. W. Pal. ii. pp. 211, 237). [c.r.c.]

Bezer, an Asherite, son of Zophah (1Chr.7:17).

Bezer, a town of Reuben in the desert (midibbar), and in the mishor or "plateau" (Deut.4:3; Jos.20:8; 1Chr.6:78), given as a city of refuge, and to the Levites (Jos.21:36). The site is doubtful. [c.r.c.]

Bezeth (1Mac.7:19), a place outside Shechem where Bacchides camped. [Josephus reads Beth-zetho (12 Ant. x. 2).] [Azotus, Mount.]

Bietas (1Esd.3:48) = Pelaijah, 2. [c.r.c.]

Bible. 1. Name. Derived from byblos, (435:340), the Gr. name for the papyrus reed. In Jer. (25:27) it was frequently of the books, and its diminutive bibliotheca was used not only for the material paper, but also for what was written on it. The plur. biblia thus became a collection of papers and books, whilst bibliotheca was used both for a depository of books and also for the books themselves. After a time the word developed between the 16th plur. and became a fem. sing., as in the De Imitatione Christi (Du Cange). It is curious that the word was used in another sense in the Middle Ages—viz. for a weapon of assault against a besieged city. —11. Divisions. The various books and parts of the Bible are dealt with under their respective headings. As there is the purpose of the present article to regard the book as a whole, and it stands in English, it contains 66 documents, 39 in O.T. (exclusive of the Apocrypha) and 27 in N.T. Each book is divided into so many chapters and verses, which have taken the place of old paragraph divisions in the Heb. [c.r.c.]

Bible and its place in the history of man. The Bible is the book which the Jews undertake to read daily; the gospels are recommended as the key book for the growth of the church and for use in religious instruction. It is a law that has been divided into 54 sections for synagogal reading in ancient days, and the same was the case with the prophets. The division of the Bible into chapters is frequently ascribed either to Cardinal Hugh de St. Cher or to Stephen Langton; while the O.T. verses were marked by the Massoretes, and those in N.T. date from the middle of the 11th cent. and first appeared in Stephens' ed. of 1551.—III. Contents. These extend from the beginnings of human history to the mission of Christ and the foundation of His Church. They may be divided into seven portions—viz. the origin of man, primitive history, patriarchal narratives, Israel's history, the first book of Samuel, the period of the Kings, the return from captivity, and the events connected with the coming of Jesus Christ into the world. The histories thus sketched out are by no means in equal proportion. Thus, the first eleven chapters of the Bible comprise half of the whole period which the book covers. There is nothing in it of the nature of annals. It is only a selection of events written by prophets (i.e. specially gifted men), intended for the instruction of those who should come after. But the Bible is not wholly historical. It contains poetry, proverb, and prophecy. Nor are these kept rigidly apart—they are all blended and are closely related to the history; and it may be said that what the prophets are to the historians in O.T. that the epistles and Apocalypse are to the gospels in N.T., and all work together for good.—IV. Unity. It is evident that this collection of books must present a great deal of variety. There are many authors of different ages, ranks, and degrees of culture, living under diverse circumstances, some writing at great length, others very shortly, others again being compilers rather than original
BIBLE

contributors. Yet beneath all these varieties of composition there is a remarkable and significant unity of spirit. This is not only because all, or almost all, the writers are of one nation, but because they teach the same truths about the nature of the Divine Being and His relation to man, and—perhaps unwittingly—testify to a great scheme or purpose running through the ages and culminating in the manifestation of the Son of God. This is led up to not only by direct prophecy, but also by type and ceremony and by God’s dealings with men exhibited during the long course of Jewish history, so that when the Lord Jesus had accomplished His work He might be identified by means of the broken lights afforded in the O.T. as a whole. It is natural that this relationship of the books should be dwelt upon in N.T., as it formed part of the justification of Christ in presenting His claim, through His accredited followers, to the world. Whilst the later O.T. writers make far more use of their predecessors than is usually supposed, it is still the case that the 600 passages from O.T. (vide Gough’s N.T. Quotations), and thus reveal the true meaning and bearing of God’s dealings with the seed of Abraham in ancient days.—V. LANGUAGE. The O.T. is mainly in Hebrew, a simple, massive, yet graphic language, possessing a remarkability of which the Greek is not particularly suited for the purpose it had to fulfil. The Chaldee or Aramaic is closely related to Hebrew, and seems to have been almost a lingua franca in the East in one or other of its dialects, having been spoken in Canaan, Syria, and Mesopotamia. It was a Hebrewized form of it which was the spoken “Hebrew” of N.T. In O.T. it is to be found in Ezr.4.8—6.18, 7.12—26, in Dan.2.4—7.28, and in Je.10.11. There are various “provincialisms” in the Hebrew Bible which were formerly regarded as marks of late date, but which probably point in a very different direction. The N.T., as we have it, is all in Greek, though there are strong reasons for believing that St. Paul and St. Peter wrote in Hebrew, and we know that some of the speeches in the Acts which we now have only in Greek were uttered in Hebrew. At first sight there seems to be a great gulf between the Semitic O.T. and the Gk. N.T. But in the providence of God this has been bridged over by the preparation of the Gk. translation of O.T. (250—150 B.C.). This magnificent undertaking gave to the world what has well been called Hebrew thought in Greek clothing; and although, as Deissmann pleads, there has been too great a tendency during the last century to create or imagine a Hellenistic or Judaizing Greek writer behind St. Paul, yet, as Dalman and Abbott in their studies on N.T. emphasize, the Greek of N.T. must always be read in the light of the LXX., which practically became almost an authorized version of O.T. amongst the earliest Christians; and consequently every word in the Gk. Testament has to be examined in the light of the Hebrew word to which it answered the LXX. reading of O.T. Thus our N.T. combines the strength and depth of Hebrew conviction with the refinement and elasticity of Greek.—VI. ARCHAEOLOGY has done much to make the Bible a living and real book during the past century. The land of Palestine, as we now call it, has been opened up, its ruined heaps or tellis have been identified, the country has been mapped out, the manners, customs, land-laws, traditions, and dialects of the people have been investigated. We owe much to the labours of Robinson and to the enthusiasm of Stanley, and still more to the work of the Palestine Exploration Fund, and to the diggings of Petrie, Bliss, and Macalister. The history of the land can now be traced from the time of the old Amorite inhabitants through all the ages that have followed. The Amarna tablets have been a revelation as to the politics of Canaan in the Mosaic age and as to its links with Egypt and the East. The situation of the walls and buildings of old Jerusalem is gradually being elucidated; and speaking generally, it may be said that whilst the Bible is the best handbook to Palestine, the land with all that it has to tell us is the best commentary on the Bible. The countries round Palestine have yielded to our knowledge in the last 250 years a history of the past as recorded in Scripture. This is true to some extent of Egypt and Sinai, but still more of Assyria, Babylon, and Persia. The dealings of ancient Eastern kings with one another and with Israel and Judah are becoming increasingly clear, and there is hardly a notable event in Hebrew history which does not throw light on the history of the East, and particularly on those kingdoms which are concerned from the time of Abraham onwards which is not capable of illustration or direct confirmation from modern discovery. The same is true in the case of N.T. The few difficulties which formerly existed are now removed,—e.g. concerning the census (vide Ramsay’s Was Christ born in Bethlehem?); the narrative of St. Paul’s shipwreck has been tested and confirmed in every particular (vide James Smith’s Voyage of St. Paul); and the record of St. Paul’s travels in Asia Minor has proved to be a marvel of accuracy (vide Ramsay’s Paul the Traveller and other works). What remains to be done in this department is chiefly the exact dating of some of the events recorded in N.T. The want of a fixed era in ancient Egyptian history is one of the most serious hindrances to this. Old Babylonian methods of recording reigns are becoming clearer (vide King’s Babylonian Records); and it seems that some of the dates assigned by Assyrian and Babylonian kings to ancient events were given through misunderstanding rather than deliberate exaggeration, and have to be brought down considerably lower. It should be added that whilst Oriental discoveries (often very fragmentary) furnish frequent illustrations of the truth of Scripture, the Bible itself throws considerable light on early history; and, if the tendency of the earliest Babylonians and Ninevites to the age of the Roman empire, telling us by the way much about the Canaanite, Syrian, Phoenician, and Egyptian kingdoms, and bringing us the story of the rise and fall of Eastern nations in a most instructive manner. This is so strikingly the case that, were it not “a Bible,” it would be universally accepted as the most valuable historical document which has come down to us from ancient times.—VII. LEGISLATION. The Bible is not a book of philosophy or of ethics, but rather the record of the manifestation of God in history,
yet it contains the germs of a noteworthy scheme of legislation. The laws and customs of the Babylonians and Medes are compared with those of Hammurabi (Anraphel); while the Mosaic law received much light from an investigation of old Arabian laws by Michaelis. The peculiarity of the law of Moses is that it is not a complete code, but was delivered piecemeal, and by divine revelation. First, there was the covenant of the Ten Words; then the laws of Ex. 20:22–23:19; then, after the construction of the sacred tent and its accompaniments, the rules of ritual cleansing, marriage, purity, and land tenure (Lev. 1–25). Subsequently, the parting addresses of Moses recapitulate many of the laws with occasional amplification, searching, and interweaving them throughout. All these acts of legislation are interspersed with portions of Israel’s history. They are not the results of national discussion, but are imposed by divine authority, and are regarded as authoritative, even if occasionally modified in the later books. The root of all obedience is love, and by love is meant the love of God, the people of Egyptian bondage, and all the history and life of the people was to be animated by the spirit of love. Many of the laws which seem to us almost barbarous were by no means behind the age when they were laid down, but quite the contrary.—VIII. A thoughtful survey of the whole Bible, which leads to the conclusion that this Divine library is UNIQUE. It cannot be regarded or studied profitably as mere “literature.” Its pages point to God as related to man yet contrasted with man. Though so much of it is at first sight national history, it proves to be exceedingly personal and has a constant bearing on the spiritual side of life. It is a God-like standard of holiness, purity, justice, and loving-kindness, dealing with the depths of our nature, illustrating the divine by the human and inspiring the human by the divine. Its sublime truths are set forth in simple concrete language, and all nature is laid under oath to help in illustrating the ways of God. It is adapted to young and old, to men of all nations, to every phase of life. It is saturated with Salvation, national and personal, temporal and eternal. All roads in it lead to Christ, Who is its Alpha and Omega. Its great men are living epistles. It is at once a lesson-book, a prayer-book, and a hymn-book for all the world. When it is translated into a new language it tends to conserve and also to sanctify that language. As Christ is supreme among men, so is the Bible among books. It is spiritual in its origin, and is to be read with spiritual intent and a receptive mind, as a divine message to the world and to the heart. All nations are beginning to recognize its force and its authority, and to learn through its sacred pages the love of the Father, the way of redemption through the Son, and the secret of life through the Spirit. [E.B.C.]

**Bigtha**, one of the seven chamberlains or eunuchs of the harim of Ahasuerus (Esth. 1:10).

**Bildad** (Job [r.b.g.]). Yet another of the three friends, who, according to the Captivity with Zerubbabel (Ezr. 2:14; Ne. 7:19), and laz of them later with Ezra (Ezr. 8:14).—2. Apparently one of the chiefs of Zerubbabel’s expedition (Ezr. 2:2; Ne. 7:7), whose family afterwards signed the covenant (Ne. 10:16).

**Bildad**, the second of Job’s three friends. He is called “the Snubite” (Job 2:11), which indicates his descent from Shaphan, son of Abraham and Keturah (Gen. 25:2).—[H.C.B.]

**Bileam** ([1Chr.6:70], a town in the western half of Manasseh, given with its “suburbs” to the Kohathites. Possibly Bilesh, 12 miles N.W. of Shechem.—[Bileam.], [C.R.C.]

**Bilhah** (Gen. 29, and concubine of Jacob to whom she bore Dan and Naphtali (Gen. 30:3–8, 35:25, 46:25; 1 Chr. 7:13). Reuben afterwards lay with her (Gen. 35:22; cf. 49:4; 1 Chr. 5:1).—2. [Balah.]

**Bilgai**, a priest who sealed the covenant with Nehemiah (Ne. 10:8).—[Bilgai.]

**Bilhah**.—1. Handmaid of Rachel (Gen. 29, and concubine of Jacob to whom she bore Dan and Naphtali (Gen. 30:3–8, 35:25, 46:25; 1 Chr. 7:13). Reuben afterwards lay with her (Gen. 35:22; cf. 49:4; 1 Chr. 5:1).—2. [Balah.]

**Bilgai**.—1. Son of Ezer, 1 (Gen. 36:27; 1 Chr. 1:42).—2. A Benjamite, son of Jedidiah, 1, possibly descended from Bela (1 Chr. 7:10; cf. 8:3, 6).

**Bill.** [Writing.]

**Bilshan**, one of Zerubbabel’s companions in the return from Babylon (Ezr. 2:22; Ne. 7:7).

**Bimhal**. An Asherite, son of Japhlet (1 Chr. 7:33).

**Binea**, a descendant of Saul (1 Chr. 8:37, 9:43).

**Binnul**.—1. A Levite, father of Noadiah (Ezr. 8:33).—2. One of the sons of Pahath-moab, who had taken a foreign wife (10:30).—3. Another Israelite, of the sons of Bani, who had taken a foreign wife (10:35).—4. (Ne. 7:13; cf. Ezr. 2:10) = Bani, 1, 2. A Levite, son of Hodaad, who assisted in repairing the wall of Jerusalem, under Nehemiah (Ne. 3:24, 10:9). He is possibly also the Binnui in 12:8.

**Birds.** [Palestine.]

**Birsha**, king of Gomorrah at the time of the invasion of Chedorlaomer (Gen. 14:2).

**Birth.** Labour among Eastern people, and indeed among all open-air or nomad tribes, is generally very easy. Cases of difficult labour sometimes occur in O.T. (Gen. 25:26, 35:17, 38:28; 1 Sam. 4:19). But the fact of circumcision being fixed for the eighth day (Gen. 17:12) seems to point to easy parturition as the natural and expected course of events. For references to miscarriage, see Ex. 21:22; Job 3:16; Ps. 58:8; Is. 26:18. [Family. D. iv. b.]

**Birthdays.** The observation of birthdays is very ancient (Gen. 40:20; cf. Job 1:4; Ho. 7:5). In Persia (Herod. i. 133) and in Egypt they
were celebrated with great pomp. In Mt.14.6 by τὰ γεράσιν (A.V. birthday), which in classical Gk. is used for a memorial feast for the dead. Herod’s accession feast is probably intended, for such feasts were common in Herod’s family (Josephus, 15 Ant. xi. 6).

**Birthright.** The eldest son by a full wife had a birthright, consisting mainly of an addition to the paternal inheritance which could be transferred by agreement between the eldest son and a younger brother (Gen.25.31ff.; or by the father (48.22; 1 Chr.5.1). On Deut.21.15-17, see Family, E (1) (b). Precedence went by seniority (Gen.43.33), but the father could vary this while living (1 Chr.28.10), or after his death by his blessing (to be distinguished carefully from birthright; Gen.27.36), which dealt with property (9.25ff., 27.3ff., 49.4).

**Missioner** (1 Tim.3.1-13), or elder (Rom.12.8; 1 Pet.5.1-4), was an officer of the church appointed to perform various ministerial duties. He is comparable to the secular inspector or “captain” (1 Tim.5.17).

**Bishops** (πρεσβύτεροι) which occur in several passages, e.g., Is.15.23, 24.11, and Zeph.2.14, appears to indicate a creature inhabiting marshy or ruined situations. In the first passage it is stated, “I will also make it [Babylon] a possession for the bitttern, and pools of water; while in the other two the word is also translated bitttern, whose companion in such situations is stated to be the corromant. Some commentators have identified the word with the Arabic qinfadh, the porcupine, or hedgehog; but neither hedgehogs nor porcupines frequent swampy situations, climb about ruins, or utter a cry (Zeph.2.13, 14). The general opinion favours the view that the rendering of qippdh by “bittern” is correct; this bird (Botaurus stellaris) frequents marshy situations, which may sometimes occupy, or be near, the sites of ruined buildings. The loud booming of the bitttern was formerly a familiar sound in the English fens. The
Blasphemy. [R.L.]

Blessing. In early times the blessing was regarded as being a real, material power, capable of influencing the future of those upon whom it was pronounced. Thus the future of the sons of Noah was decided by his blessing or curse (Gen. 9:20). So potent was it that when once spoken it was no longer under the control of the one who pronounced it, and could not be recalled (27:37). The blessing, even when obtained by guile, had the power to transfer birthright precedence from the elder to the younger son. It was regarded as being a real, material power, capable of influencing the future of those upon whom it was pronounced. Therefore, it was necessary to have a specific blessing for each new member of the family, as recorded in the family blessing (Blessing)

112 Bitterness, Water of

Bitterness, Water of. [Water of Bitterness.]

Bitterness, Water of. [Water of Bitterness.]

Bitterness. The word occurs in A.V. only in Lev. 13:18; 2 K. 20:7; Is. 38:21; Job 2:7. The word is frequently connected with the word "water," and is often used in the New Testament (e.g., Lev. 24:11, 18; 2 Sam. 13:14; Ps. 74:15; 15:32, 5; cf. Ro. 2:24; Rev. 13:6). In view of this it is instructive to note that the application of the word to the name of Christ by one so imbued with Jewish thought as St. James (2:7). In classical Greek, the primary meaning of the word was an utterance of ill-will, opposed to ἀγάπη, as when one unilaterally prays for evil instead of good (Eur. Ion, 1189). It then came to have a general sense of slanderous, contumelious speech against either God or man. And while in the New Testament, this wider use is found (Mt. 15:19; Ro. 14:16; 1 Cor. 10:30; Tit. 3:2, etc.), the word also has a special sense of an accusation, as when one who is accused, says, "I say what I say because God has told me so." On this charge both our Lord and St. Stephen were condemned to death by the Jews (Mt. 26:65; Ac. 6:13). The Jewish punishment for this was death by stoning (Lev. 24:11-16). According to the teaching of Christ, blasphemy was of various degrees of sinfulness, that against the Holy Spirit being of so serious a nature as to deprive one guilty of it of all hope of pardon in this world and the next (Mt. 12:32; Mk. 3:29; see also Lk. 5:16). What blasphemy against the Holy Ghost really implies has been a fruitful source of controversy. Those Jews were apparently in danger of committing this sin who attributed to the power of Satan those unquestionable miracles which Jesus performed by the finger of God, and the power of the Holy Spirit. But blasphemy, like lying, may be acted as well as uttered, and implies the deliberate preference of evil to good. Then, habitual and determined opposition to the influence of the Holy Spirit renders repentance, and therefore forgiveness, morally impossible. Grace, like bodily nourishment, may be rejected till the power to receive it vanishes. There is no question of the efficacy of divine grace. The obstacle lies in the wrong-doer alone, who, by persistent sin, brings upon himself, as was the case with Pharaoh, a judicial hardening of heart, which of itself excludes the possibility of pardon. [R.S.M.]

Blas'atus, the chamberlain of Herod Agrippa I., (Ac. 12:20), who was persuaded by the people of Tyre and Sidon to gain them a hearing from the king. [L.R.B.]
BLINDNESS

to the younger son, and was irrevocable (v. 29, 33, 41). [LAYING ON OF HANDS; BIRTHRIGHT; FAMILY; OATH.] [H.H.

in and b'ne Lu.8.43). first, in authorities.) thrombosis his blindness and not be offered in sacrifice (Lev.22.22; Deut.15.21; Mal.1.5), nor were blind priests permitted to officiate (Lev.21.18). Several cases of blindness as the direct result of divine interposition are recorded in Holy Scripture. Deut.28 is specially interesting as suggesting to any one with medical knowledge the direct and natural results of moral transgression, esp. in vv. 22, 27, 28, and 35. 2K.6.18 and possibly Gen.19.11 may be explained as referring not to loss of physical eyesight, but to dense fog or mist in which those "smitten" lost their way; but the case of Elymas the Sorcerer (Ac.13.11) is capable of another such interpretation. His seizure was probably either glaucoma or embolism. Either of these would produce a sudden blindness, especially under the stress of great excitement. If we accept the "fog" theory for 2K.6.18, there is no specific case of the healing of blindness recorded before N.T., except that of Tobit in the Apocryphal books. However, it is constantly mentioned as a special prerogative of the Almighty and of the coming Messiah (see, inter alia, Ps.146.8; Is.35.5,427; Mt.9.27; Lu.4.18, etc.). Accordingly, there are several cases recorded of our Lord's healing the blind. In some He accomplished this by simple touch (Mt.9.26): in others He used physical means—clay (Jn.9.6) or saliva (Mk.8.23). None of these are capable of reasonable explanation except on the basis of pure miracle. There is one other recorded case of blindness which is of special interest, that of St. Paul, the salient facts of which are: Saul (i) is struck blind suddenly (Acts 9), and (ii) remains blind for three days in a state of great nervous depression (9.9—"did neither eat nor drink"); (iii) is visited by Ananias, who delivers his message and puts his hands upon him. This results in a scaly substance falling from his eyes and he receives his sight. (N.B.—In 9.18 the word "forthwith" is omitted by R.V. and by all the best authorities.) Now, there are three diseases which might cause sudden blindness such as is here described, but one of these (remitis of renal origin) is quite inconsistent with St. Paul's living a life of hardship for thirty years afterwards. This leaves the possibility of thrombosis (the blocking of a blood-vessel of the central nervous system by clot or foreign substance, thereby temporarily disturbing the visual centres), or of trachoma. This last (which coincides best with the story of the healing) is an acute form of purulent ophthalmia, and would quite possibly (especially if accompanied by the breakdown of vision under the influence of the intense and miraculous light. Under these circumstances the patient would remain, probably,

greatly depressed and afraid of the least ray of light (photophobia), and repulsive purulent secretions would collect around the eyelids. Upon Ananias' visiting him ("the Lord put his hands upon him") and encouraging him to use his eyes, he would find his sight slowly returning, though it would never be very strong. If we compare this theory with Gal.4.15.6.11 (R.V.) and 2Cor.10.16, we get perhaps as near as is possible to a working theory as to the symbolical "blood and the flesh" (q.v. for other theories) of 12.7. [Cf. PAUL, I. (5), (i.)] [F.J.] Blood. [Sacrifice, 2; 3. iv. d; Unclean Meats.]

Blood, Avenger of. [Goel; Homicide; Crimes.]

Blood, Issue of. The phrase is used in two senses: first, of the ordinary periodical menstrual discharge which, according to the Levitical law, involved one week's uncleanness; and secondly, of a permanent disease (see Mt.9.20; Mk.5.25; Lu.8.43). This latter meant a permanent uncleanness (Lev.15.10ff.). It is impossible to say whether any disease spoken of in the gospels, but probably it was either menorrhagia (excessive bleeding at the menstrual period) or some sort of cancer or tumour of the uterus. [F.J.]

Blue. [Colours.]

Boanerges, a name given by Christ to SS. James and John, Mk.3.17; and there explained to mean "sons of thunder." The spelling of the Heb. name has probably been corrupted in its transliteration into Gk.; and if so, it may represent two Heb. words: br'ne = sons, and re'ges, which is used Job 37.2 of the sound of the voice of God, in a passage descriptive of thunder. The name referred to the impetuosity of their character (cf. Lu.9.54). On its aptness, see Westcott's St. John, Introd. p. xxiii., and Trench, Studies in the Gospels, art. "Sons of Thunder." [E.R.B.]

Boar, Wild. [Swine.]

Boaz (in him is strength).—1. A wealthy Bethlehemite possibly identical with Ibzan, the third of the Judges. N. of Naashon, in his days (Jgs.12.2). Finding that the nearer kinsman of Ruth was unwilling to become her gô'él, he had the obligation publicly transferred with the usual ceremonies to himself; hence it became his duty to marry Ruth, and to redeem the estates of her deceased husband Mahlon (4.1ff.). Being himself precluded from marriage with an Israelite, as the child of Salmon and Rahab (Deut.23.2; Mt.1.5), he gladly undertook these responsibilities; and his obedience to the two-fold law of manzêr and gô'él was blessed by the birth of Obed, from whom in a direct line our Lord was descended. S. Cox, The Book of Ruth.

2. The name of one of Solomon's brazen pillars erected by Jeroboam I (1K.3.10). It stood on the left, and was 18 cubits high (1K.7.15.21; 2Ch.3.15; Je.52.21). [C.R.D.B.]

Boe'cas (1Esd.8.2). [Bukki, 1.]

Bocheru', son of Azel according to the present Heb. text of 1Chr.5.38 = 9.44.

Bochim (the weepers), a place on the W. of Jordan, east of Gilgal (Judg.2.15).

Body. [Man.]

Bo'han (Jos.15.6.18.17), a Reubenite who erected a stone on S. bank of the valley of Achor,
and N.W. of Beth-hoglah. The name has not survived in this position, nor elsewhere. [c.r.c.]

**Boils.** [Blains; Medicine.]

**Booster.** [Pillows.]

**Borrowage.** [Captivities of the Jews; Slave; Law in O.T.]

**Bonnet.** [Headaddress.]

**Book** (Heb. sopher, a writing). Not a book of pages, but a document, whether "roll" or "tablet," or set of tablets. [Writing.] [c.r.c.]

**Booths.** [Succoth; Tabernacles, Feast of.

**Booty** consisted of captives of both sexes, cattle, and whatever a captured city might contain, especially metallic treasures. Within the limits of Canaan no captives were to be made; beyond those limits, in case of war, all the women and children were to be made captives and the men put to death (Deut.20.14-16). The law of booty was an equal division between the army and the people of Israel, but of the former half one head in every 500 was reserved to God, and appropriated to the priests, and of the latter one in every 50 was similarly reserved and appropriated to the Levites (Num.31.26-47). David added a regulation that the baggage-guard should share equally with the troops engaged (1Sam.30.24-25).

**Booz** (Mt.1.5; Lu.3.32) = Boaz, 1.

**Bo'riith** (2Esd.1.2). [Bukki, 1.]

**Bosanath.** [BozKath.]

**Bosor.** A fortified city in Gilead or in S. Bashan (1Mac.5.26), noticed with Casphon, Carnaim, and Alema. The last may be Kefr el Mâ‘, 11 miles W. of Ashteroth Karnaim, and either Bosor or Bosora may be Busr, 5 miles S.E. of Edrein, not far from Casphon or Kisfin (5.36).—2. Bosor, for Bisor, 2 (A.V. 2Pe.2.15), is more correctly Borer in the Sin. and at T. MSS. (R.V. Beor). [c.r.c.]

**Bosora** (1Mac.5.26,28; Vat. MS. Bosor), reached from Gilead "by the way of the wilderness," may be the latest Bostra (Busrab), which is not otherwise noticed in the Bible. [Bosor, Bozrah.]

**Bosor.** [Arms.]

**Bosany.** [Palestine.]

**Botch.** [Blains.]

**Bottle.** (1) the skin bottle; (2) the bottle of earthen or glass ware, both of them capable of being closed from the air. (1) The Arabs and all nomads often keep water, milk, and other liquors in goatskins. When the animal is killed, they cut off its feet and its head, and draw it out of the skin, without opening its belly. In Arabia the skins are tanned with acacia-bark and the hairy part left outside. They afterwards sew up the places where the legs and the tail were cut off, and when it is filled they tie it about the neck. The effect of external heat upon a skin bottle is indicated in Ps.119.83, "a bottle in the smoke" (or "vapour"), and of expansion produced by fermentation in Mt.9.17, "new wine in old bottles." (2) Vessels of metal, pottery, and glass for liquid use are in use among the Greeks, Egyptians, Etruscans, and Assyrians, and also among the Hebrews, especially in later times. In Je.19.1 a "potter's earthen bottle" is noticed. The Hebrews probably borrowed their manufacture of glass from Egypt, which was celebrated for glass work, as remains and illustrations of Egyptian workmanship are extant at least as early as 15th cent. n.c. (Wilkinson, ii. 59, 60).

**Bow.** [Arms.]

**Bowl.** As in the case of the Bason, the precise form and material of the bowl is uncertain. Bowls would probably be used at meals for liquids, or broth, or pottage (2K.4.40). Modern Arabs are content with a few wooden bowls. In the Brit. Mus. are several terra-cotta bowls with superstitions Aramaic inscriptions, expressing charms against sickness and evil spirits, which may possibly explain the "divining cup" of Joseph (Gen.44.5). The bowl was filled with some liquid which was drunk as a charm against evil.

**Box-tree.** The Heb. t'ashshir occurs in Is.41.10,60.13; Ezek.27.6. The Talmudical and Jewish writers generally consider that the box-tree is intended. The Syr. and the Arab. version of Saadia understand a species of cedar called skir was distinguished by the small size of its cones and the upright growth of its branches. But the evidence for the box-tree is on a better foundation than that for the sherbet. In Ezek.27.6, a passage of great difficulty, t'ashshir is rendered "the Ashurites" in A.V. R.V. reads "they have made thy benches of ivory inlaid in box-wood." The box is a native of cold climates, and hardly to be expected in the Bible; and although it occur in sub-Alpine situations in the Lebanon chalk, its mention amongst forest-trees is incongruous. However, it has always been a favourite when luxuriantly grown, and its excellent wood for engraving and carving was in use amongst the ancients. In 2Esd.14.2, "box tables" (tables) are mentioned; see A.V. marg. R.V. omits "box." Pliny commends it for arbours, and says the best wood for ornamental carving is found in the root. He distinguishes three sorts. [n.c.u.]

**Bozor.** (Skirra.) noticed with Senneh (thorn; Is.19.14,4,8) as two "teeth of the cliff," near Michmash and Gibeah. Josephus (4 Wars ii. 1) mentions the "valley of thorns" at Gibeah, now Wady es Suanenif (valley of
small thorn-trees), and here, just E. of Jeb' a and S. of Muhhmds, are two remarkable crags, N. and S. of the gorge. The northern (called el Qā'lah, “the castle”) shines in the midday sun, and is no doubt Bozez, on the top of which the Philistine “post” was established. The ascent on the S.W., though very steep and some 500 ft. high, is still climbable. [C.R.C.

Bozkath', a city of Judah via the lowlands (Jos.15.39). It is mentioned once again (2K.22.1; A.V. Boscath) as the native place of the mother of king Josiah.

Bozrah (fortress).—1. A town in Edom (Gen.36.33; Is.34.6,63.1; Je.49.13,22; Am.1.12). In Mi.2.12 there is a play on the name baqrd and bqd (sheep-fold). The site is now Busreik, N. of Tophel, in Edom.—2. A town of Moab [Bezer], the site of which is doubtful (Je.48.24), unless (1) is intended. This town appears in the 9th cent. B.C. as Bosor, in the list of Moabite cities rebuilt by king Mesha, as noticed on the Moabite Stone.

—3. The city called Bostra in Roman times is unnoticed in the Bible, unless it be the Bosora or Bosor (Vat. MS.) conquered by Judas Maccabaeus, in the “wilderness” (1Mac.5.26,28). This place became important after 105 A.D., when it was made the capital of the Roman province of Arabia Prima. The ruins of Busrah, S.E. of Bashan on the desert trade route from Arabia to Damascus, are those of the Roman city, including a theatre, baths, a triumphal arch, colonnades, a cathedral built in 513 A.D., and a Moslem castle on the S. dating from the 13th cent. The extant inscriptions, in Gk. and Lat. (Waddington, Nos. 1906-1958), begin in 2nd cent. A.D., and go down to 539 A.D. or later. Some are Christian. They show a mixed population, partly of Arab pagans adoring Dhu-She' a (the lord of gleaming) down to 6th cent. A.D., and the Gk. Zeus Epikarpios, or god of crops. A Nabatean text of king Malchus and Nabatean coins have also been found here. Christians paid honour to the martyrs Sergius and Bacchus in the cathedral, and to the Virgin Mary. [C.R.C.

Bread. The Heb. w'r'sheth (Gen.18.6; Ex. 29.2) usually employed in the sacred offerings (Ex.29.40; Lev.2.1; 2Sam.1.14; Ezk.46.14) and in the meals of the wealthy (1K.4.22, etc.) “Barley” was used only by the very poor (Jn.6.9,13), or in times of scarcity

Venetian gold are still common in Egypt. In Gen.38.18,25 the word rendered “bracelet” means probably “a string by which a seal-ring was suspended.” Men as well as women wore bracelets. Layard says of the Assyrian kings, “The arms were encircled by armlets, and the wrists by bracelets.” [Armlet.]

Bramble. [Thorns; Bush.]

Brass. [Bosor.

Bread (leaven, a word often used also for food in general). The preparation of bread as an article of food dates from a very early period. The corn or grain employed was of various sorts; the best bread was made of wheat, which being ground produced the “flour” or “meal” (1K.17.12, etc.), and when sifted the “fine flour” (Gen.18.6; Ex. 29.2) usually employed in the sacred offerings (Ex.29.40; Lev.2.1; 2Sam.1.14; Ezk.46.14) and in the meats of the wealthy (1K.4.22, etc.)

Bread. The word 'flour' (Gen.18.6; Ex. 29.2) usually employed in the sacred offerings (Ex.29.40; Lev.2.1; 2Sam.1.14; Ezk.46.14) and in the meals of the wealthy (1K.4.22, etc.)

Bread. The word ‘flour’ (Gen.18.6; Ex. 29.2) usually employed in the sacred offerings (Ex.29.40; Lev.2.1; 2Sam.1.14; Ezk.46.14) and in the meals of the wealthy (1K.4.22, etc.)
BREAD

(Ru.3.15; cf. 1:1; 2K.4.38,42; Rev.6.6). "Spelt" (R.V.; rye, triticum, A.V.) was also used both in Egypt (Ex.9.32) and Palestine (1K.19.6; Is.28.25; Ezk.4.9). Occasionally the grains above mentioned were mixed, and other ingredients, such as beans, lentiles, and millet, were added (Ezk.4.9; cf. 2Sam.17.28); the bread so produced is called "barley cakes" (Ezk.4.12; "as barley cakes," A.V.), barley being the main ingredient. The baking was done in primitive times by the mistress of the house (Gen.18.6) or one of the daughters (2Sam.13.8); female servants were, however, employed in large households (1Sam.8.13). Baking as a profession was carried on by men (Ho.7.4,6). In Jerusalem the bakers congregated in one quarter of the town, as we may infer from the names "bakers' street" (Je.37.21), and "tower of the ovens" (Ne.3.11,12;38; furnaces, A.V.). The bread taken by persons on a journey (Gen.45.23; Jos.9.12) was usually unleavened bread. In the process of making bread the flour was first mixed with water, then kneaded with the hands (in Egypt with the feet also) in a small wooden bowl or "kneading-trough" until it became dough (Ex.12.34,39; 2Sam.13.8; Je.7.18; Ho.7.4). When the kneading was completed, leaven was generally added (leaven); but when the time for preparation was short, it was omitted, and unleavened cakes, hastily baked, were eaten, as is still the custom among the Bedouins (Gen.18.6,19;3; Ex.12.39; Judg.6.19; 2Sam.28.24). The leavened mass was allowed to stand for some time (Mt.13.33; Lm.13.21). The dough was then divided into round cakes (Judg.7.13), not unlike flat stones in appearance (Mt.17.9; cf. 4.3), about a span in diameter and a finger's breadth in thickness. The cakes were sometimes punctured, and hence called halla (Ex.29.2,223; Lev.2.4,8, 26, 24, 5; Num.15.20; 2Sam.6.16), and dipped in oil. Sometimes they were rolled out into wafers (Ex.29.2,2,23; Lev.2.4; Num.6.15-19), and merely crowned with oil. The cakes were now taken to the oven, having been first, according to the practice in Egypt, gathered into baskets (Gen.40.16, cf. R.V.) which were placed on a tray and carried on the baker's head. In the towns, where professional bakers resided, there were no doubt fixed ovens; but more usually each household possessed a portable oven (tannar), consisting of a stone or metal jar about 3 ft. high, which was heated inwardly with wood (1K.17.12; Is.44.15; Je.7.18) or dried grass and flowerstalks (Mt.6.30). Other modes of baking were specially adapted to the migratory habits of the pastoral Hebrews, as of the modern Bedouin Arabs: the cakes were either spread upon heated stones, or they were thrown into the heated embers of the fire itself, or they were roasted on a fire of cakes of dried dung, which is specially suitable as it burns slowly (Ezk.4.12,15). The cakes required to be carefully turned during the process (Ho.7.8). Other methods were used for other kinds of bread: some were baked on a pan and

EGYPTIANS KNEADING THE DOUGH WITH THEIR FEET.

appear to have been chiefly used as sacred offerings (Lev.2.5,6,15,7,9; 1Ch.23.29). A similar cooking utensil was used by Tamar (2Sam.13.9). A different kind of bread, probably resembling the khlib of the Bedouin Arabs, a pasty substance, was prepared in a saucepan (frying-pan, A.V.); this was also reserved for sacred offerings (Lev.2.7,7-9).

AN EGYPTIAN CARRYING CAKES TO THE OVEN.

(Wilkinson.)
PLATE VI

EGYPTIAN BRICKS. (Brit. Mus.)

BABYLONIAN BRICK,
Inscribed with titles of Nebuchadnezzar II. (604-561 B.C.).
explorers. Babylonian bricks were either kiln-burnt or sun-dried like the Egyptian. They are usually from 12 to 13 in. square, and 3½ in. thick, and most of them bear the name, inscribed in cuneiform character, of the king who caused the structure to be erected. They thus resemble excessively thick tiles (Ezk. 4.1). They were sometimes glazed and enamelled on one side with patterns of various colours, which, when built into a wall, produced those mural decorations for which the Babylonians and also the Persians were noted. As brick-stamps of the time of Sargon of Agadé exist, it is certain that brick-making was an exceedingly ancient art, going back perhaps to 4,000 B.C. or even earlier. The Israelites, in common with other captives, were employed by the Egyptian monarchs in making bricks and in building (Ex. 1.14, 5.7). Egyptian bricks were not generally dried in kilns, but in the sun, and even without straw were as firm as when first put up in the reigns of the Pharaohs whose names they bear. As the Nil mud, they required straw to prevent cracking; and crude brick walls had frequently the additional security of a layer of reeds and sticks, placed at intervals to act as binders. A brick pyramid is mentioned by Herodotus (ii. 136) as the work of king Asy bios. The Hebrews practised brick-making in Egypt, and the brick-kiln was common in David's time (2Sam. 5.11). A complaint is made by Isaiah that the people built altars of brick instead of unshewn stone as the law directed (Is. 65.3; Ex. 20.25).

Brother. The Heb. and E.V. use this term also of any kinsmen or member of the same clan (Family). A.V., or tribe, or people; or of kindred peoples, e.g. Num. 20.14; of covenant brothers or allies (2Sam. 1.26; Am. 1.9), or royal brother (1K. 9.13, etc.) as salutation of strangers (Gen. 29.1).

Brook (Heb. y'or and 'aphiq). [River.]

Brother. The Heb. and E.V. use this term also of any kinsmen or member of the same clan (Family). A.V., or tribe, or people; or of kindred peoples, e.g. Num. 20.14; of covenant brothers or allies (2Sam. 1.26; Am. 1.9), or royal brother (1K. 9.13, etc.) as salutation of strangers (Gen. 29.1). [H.M.W.]

In N.T., besides the literal sense, one of the same nation (Mt. 5.47; Ac. 2.29, 17, 22, 7, 23, etc.). A kinsman—e.g., according to some, the brethren of Jesus (Mt. 12.46ff., 13.55; Jn. 7.3; Ac. 1.14). One of the same order, an equal (Mt. 23.8; Rev. 6.11, 19.10, 22.9). A disciple, beloved, beloved as a brother (Mt. 12.50, 25.40; Heb. 2.11, 12). One of the same faith (Ac. 9.30, 10.23, 22; Ro. 12.20; 1Cor. 5.11; Eph. 6.23; Ph. 1.14; 1Tim. 6.2; Rev. 1.9). A colleague (1Cor. 1.1; 2Cor. 1.1, 2.13, etc.).
Bubastis. [PIBESETH.]

Buckler. [AXMS.]

Buckiah. [BUCCHIARRCTS. (3.)]

Bukki. — 1. Son of Abishua and father of Uzzi, fifth from Aaron in the line of the high-priests (1Ch 6.5,51). In 15Ed 8.2, Bocass, corrupted to BORITH in 2Ed s.2. Whether Bukki ever filled the office of high-priest we are not informed in Scripture. Josephus (Ant. 11.5.1) mentions him as the last of those priests who lived a private life, while the sacerdotal dignity was in the house of Ithamar. — 2. Son of Jogi, prince of the tribe of Dan, one of the ten men chosen to apportion the land of Canaan between the tribes (Num 34.22).

Bukkiah, a Levite-musician in the temple, one of the sons of Heman (1Ch 25.1,13).

Bul. [MONTUS.]

Bull, Bullock. [CATTLE.]

Bull, Wild (Heb. tō or tō'o). In Deut 14.5 the Heb. is rendered "wild ox," while in Is 51.20 we read, "They lie at the head of all the streets, as a wild bull [tō] in a net." Were it not the opinion that the wild ox, or aurochs, was the animal denoted by tō [CATTLE], that animal might stand for tō. As it is, there is no possibility of any satisfactory identification. Tristram was, indeed, of opinion that the white or sabre-horned oryx (Oryx leucoryx, or O. algazal) is the animal denoted by tō; but, in spite of his statement that he has seen it in the desert and noted its horns in the bazaar at Damascus, the species apparently does not occur anywhere out of N. Africa. The horns seen by him doubtless belonged to the rather smaller Beatrix oryx (Oryx beatrix) of Arabia and the deserts near Baghdad. It is a white animal with brown patches on the face, brown legs, and long, clyindrical, slightly curved black horns. There is no evidence that bison or buffalo ever occurred wild in Syria. [R. L.]

Bulrush. [REED.]

Bunah, son of Jerahmeel of the family of Judah (1Ch 2.23).

Levite in the time of Nehemiah (Ne 9.4); possibly the same as the Bunni in 10.15. — 2. Another Levite of earlier date than 1 (Ne 11.15).

Burial. Customs. The first act in reference to the departed was the closing of the eyes (Gen 46.4). It is probable that the dead were, in early times, buried in the clothes they wore when living (cf. 1Sam 28.14; 1K 14.19; Ezk 32.27); recent Palestinian research confirms this. "Grave clothes," belong to a later time (1K 14.19; 11.14-15). Objects of various description were placed in tombs; such were, vessels with food which was believed to be required after death; objects which the departed had been accustomed to use when living, e.g. swords for warriors, trinkets for women, etc., the idea being that these would comfort their possessors; amulets, designed as safeguards against evil spirits, who were believed to be specially active near dead bodies. The custom of this office of corroboration is afforded by recent excavations in Palestine. The underlying idea regarding the above was that no separation between soul and body took place until long after death. In the case of kings, and possibly also those in high estate generally, incense was burned in the presence of the body (2Ch 16.14,21.19; Je 34.5); this was perhaps a remnant of ancestor-worship. In early Israel the embalming of the body was practiced (it is an Egyptian custom that is referred to in Gen 50.26); in later times it was in vogue among those who could afford it (cf. Jn 19.39,40). The burning of dead bodies was reserved for especially wicked criminals (Lev 20.14; Jos 7.25), it being regarded as a terrible aggra- vation of the death-sentence already inflicted. Very awful, too, was the thought of being buried outside one's native country, i.e. in an "unclean" land (Am 7.17); scarcely less abhorrent was the idea of non-burial (1K 14.11,19.17; 2K 9.10; Je 33.8,2, etc.). this was on account of the belief that the spirit of an unburied body wandered about, a theory which entailed a twofold evil, for not only was it a cruel hardship to the departed, since he could not rest, but also it constituted a grave danger to the living, because of the harm to be apprehended from a wandering spirit who would resent such neglect. The corpse thus burned was generally either buried or burned not later than the day after; the hot climate demanded this (cf. 1K 21.23; Je 11.39, as it still does in the East. The use of any form of coffin was unknown in early Israel (cf. 2K 13.21); see supra as regards that in Gen 50.26); the body was carried to burial on a bier (milh, 2Sam 3.3); and this form of procession was, as man in the East.—The Place of Burial. In pre-Exilic as well as in later times it was a matter of supreme importance that the departed should rest in the family tomb; hence the oft-recurring expressions, "going to his fathers," "gathered to his fathers, or people," "sleeping with his fathers" (Gen 15.15,47.30; 2Sam 17.21,21.14; 1K 14.15.13,13.8, etc.); the belief was that the spirits of the fathers were present in or about the tomb, and that the dead man joined their company if buried in the same tomb. The tomb was usually constructed in the plot of land belonging to the family (cf. Gen 23.19); 2Sam 17.21.14.21; it is best likely a nook in the house— at all events in early times; Naboth's refusal to part with his land (1K 21.3) was mainly due to the belief just mentioned. Recent excavations on the site of ancient Gezer have shown that in some cases people were buried in their houses; thus 1Sam 25.1 is evidently to be taken in a literal sense. This is further borne out by the fact that the kings of Judah, up to the time of Ahaz, were buried in the city of David; from the death of Manas- seh onwards they were buried in the garden of Uzza, which was close to the king's palace (2K 21.18).—Structure of Tombs. Natural caves, which exist in great quantities in Pales- tine, were utilized for the purposes of burial; tombs hewn out of the rock were, however, also abundantly constructed. Examples of both have been discovered within quite recent years; these have proved that, besides the tombs which were cut out of the rock, even the rock itself was also the custom to make caves for burial purposes under the surface of the ground; the still visible marks of the tools used in chiselling out the rock, or in digging...
out such caves, prove that these were artifici-
ally constructed in some cases, even in the very early times. Sometimes a tomb was found with large stones—in one case the stone was 
found in situ over a burial cave constructed 
underground—with the object, primarily, of 
keeping out the wild animals with which Pale-stine abounded in days gone by. The O.T. gives us few, if any, details as to the construc-
tion. Generally, tombs, but the O.T. provides no 
more especially archaeological research, enable 
us to form accurate ideas on this subject. As 
far as the Hebrews were concerned, they 
were entirely lacking in originality in this 
respect; the term architecture cannot be ap-
plied to their sepulchres any more than to 
their buildings generally; whereas signs 
and architecture, in the real sense of the word, 
appear, it is always due to foreign influence. 
[TEMPLE. Thus in every case in which tombs 
in Palestinian art are of an ornate nature, 
it is owing to external, mostly Greek, in-
fluence; the very conception of a tomb hewn 
out of the face of the rock (as distinct from 
subterranean tombs) is Phoenician while the 
highly ornamental facades of these—such as 
those of the so-called tombs of the judges 
and tombs of the kings, as well as the built tombs 
in the Kidron Valley—all show the marks of 
Greek influence; even the really ancient 
"monolith of Siloa" shows distinct Egyptian 
design. Generally speaking, tombs were con-
structed in the following ways: (1) They were 
dug or hewn out of the ground (e.g. 
[24 Sam.11.38]. In these large numbers of bodies were 
sometimes deposited; indeed, one of the burial 
caves of this kind excavated on the site of 
Gezer would seem to have been a public place of 
burial. (2) They were cut into the fans of the 
rock (e.g. 
[25 Lu.23.53]). These usually 
contained 8 bodies placed in loculi, 3 on either 
side and 2 opposite the entrance; sometimes, 
however, a considerably larger number of 
loculi can be found. (3) They were built above 
the ground. These are practically all of, compara-
tively speaking, the same general plan; 
they were of an exceptional character, as they belonged 
only to the rich. Cemeteries, in the more 
modern sense of the term, belong to later times: 
they were always, unlike older tombs, outside 
the city. [TOMB.] [w.o.e.o.]

Burnt-offering. [Sacrifice, esp. 3. ii. 
b, v. b; CRIMES.] 

Bush. The Heb. word sōnē occurs only 
in passages which refer to Jehovah's appearance to 
Moses "in the flame of fire in the bush" (Ex. 
3.2, 3, 4; Deut.33.16). The Gk. word is ἄνθρω 
both in the LXX. and in N.T. (Lu.20.37; Ac. 
7.55; see also Lu.6.44, where A.V. correctly 
renders it "bramble bush"). Celsius (Hierob. 
ii. 14, where A.V. rendered it "bramble bush"); 
R. crustaceus, the bramble or blackberry bush, 
representing the sōnē, and relates, but without 
justification, the etymology of Mt. "Sinaí," 
to this name. Spenel identified the sōnē 
with what he terms the Rubus sanctus, and says 
it grows abundantly near Sinaí. It is quite 
imperceptible to the eye, and it is likely the term 
basin intended by the sōnē; but Sinaí is almost beyond 
the range of the genus Rubus. [THORN.] 

Bushel. [Weights and Measures.]

Butcher. As among the Bedawin Arabs
Buzi, father of Ezekiel (Ezk.1:3).

Buzite. Barachel, the father of Elihu, is called the Buzite of the kindred of Ram—i.e. Aram (Job 32:26)—and was therefore probably a descendant of Buz, whose family seems to have settled in Arabia Petraea (Jer.25:23). An alternative suggestion, rejecting the emendation of Aram for Ram, is that Barachel was a descendant of Ram (Ru.4:19) and only a descendant with the Buzites.

Byssus. [LINEN.]

C

Cab. [Weights and Measures.]

Cabbon, a town in the low country of Judah (Jos.15:40).

Cabal, a place named as one of the landmarks on the border of Asher (Jos.19:27), to which we should read "goeth out N. of Cabul," which lay in Zebulun. It was included among 23 cities of Galilee (1K.9:11-14) given to Solomon to Hiram of Tyre. Now Kâbûl, a village 9 miles E. of Accho, which latter was a Phoenician city. [C.R.C.]

Caddis. [Joannan.]

Cades (1Mac.11:63,73). [Kedesh.]

Cades-barne (1Jh.5:14). [Kadesh-barnea.]

Cad-miel (1Es.5:26,58) = Kadmiel.

Caesar, always in N.T. the Roman emperor reigning at the time. It was the family name of C. Julius Caesar, and when his dynasty became extinct, was assumed by successive emperors as a title for themselves, and afterwards for their heirs. Caesar in Mk.12:14 and Jn.19.12 is Tiberius; in Ac.25:11,21 and Ph.4:22 Nt. [Augustus]. [K.R.B.]

Caesarea, the seaport city (now Qatif-rich) built by Herod the Great (19 b.c.) on the site of the old "Strato's Tower" where Philip the deacon settled and made converts (Ac.8:40,21,8:16). Hence St. Paul embarked for Tarsus (9:30), and hence Cornelius the centurion sent for St. Peter at Joppa (10:1,24,11:11). It was the seat of government under Herodians and procurators (12:10,25:1.4,6:13), and the centre of an early church (18:22). It was more than a day's journey from Jerusalem (23:23,33). Herod named it after Augustus Caesar, to whom he erected a temple with statues of Rome and of Caesar. He made an artificial harbour, with a pier, a theatre; and on the S. an amphitheatre; these works occupied 10 or 12 years till 9 b.c. (15 Ant. ix. 6; 16 Ant. v. 1). The chief tower on the walls was called after Drusus, Caesar's son-in-law (1 Wars xxi. 5-8). This city, which remained a fortress till Bishops destroyed it (in 1265 a.d.), has since then been a ruin, with a few vestiges of Bosnian exiles. The walls of the Roman city included a space 1,600 yds. N. and S. by 900 E. and W. (300 acres). The harbour is much smaller than Josephus supposed, measuring 180 yds. N. and S. across the entrance, the S. reef and mole being 160 yds. long. The remains include a theatre (covered with earth and sand) on the S.; a forecourt of a temple, over which a 12th cent. cathedral was built, the walls of which remain; a hippodrome on E. (1,056 by 264 ft.), with remains of a large granite goal-post; and 2 aqueducts, the low level from the Crocodile River 3 miles N., and the high level from springs 6 miles N. The mediaeval walls were greatly strengthened by St. Louis in 1251 a.d. They enclose an area 600 yds. N. and S. by 250 yds. E. and W. (30 acres) close to the port. Caesarea lay within Samaria, and was reckoned as outside the Holy Land. It had a Samaritan population until 12th cent. a.d., mingled with Jewish traders. It was the scene of the journeys and afterwards of a council (Surv. W. Pal. ii. pp. 13-29). [C.R.C.]

Caesarea's Philippi, the city whence our Lord ascended a "high mountain" (Mt.16:13,17; Mk.8:29,9:2), which was no doubt Hermon. This city, originally Panaces, and called Caesarea by Herod Philip (Josephus, 18 Ant. ii. 17) was at the "fountain of a lion." Herod the Great had already built a temple of white stone, called Panion, near the cave whence the river springs (15 Ant. x. 3); the name Panaces applied to the district also (2 Wars ix. 1). The city lay on the E. border of the Holy Land (Tal. Jer. Shebith vi. 1). The cave has now partly fallen in, and swept by the Hermon snows, rushes out from under a cliff, and dashes between poplars and bushes to the village of Baniats hard by—a place with mediaeval walls, but now only holding 350 Moslem inhabitants. The great fortress on the hill E. was built about 1120 a.d. At the summit is a ruin with three niches for small statues, one inscribed to "Pan and the nymphs," in Gk.; another to the "goddess"; a third Gk. text in honour of the emperors was carved by Valerius Titianus, "priest of the god Pan"; and a fourth by Agrippa, son of Marcus Agrippa, archon in the 21st year before Christ (Waddington, Nos. 1697-1694). [C.R.C.]

Caesars' household (Ph.4:22, oî òk òii 7̄ ̄) Kaisaros oikon, qui de Caesare domo sunt). Members of Caesar's household send salutations to the church at Philippi. It has been supposed that these must have been persons of high importance, or even members of the royal family. At the end of the 1st cent. Clemens and his wife Domitilla, cousin of the emperor Domitian, were charged with "atheism," by which was meant Christianity. But the members of Caesar's household referred to in Philippians were probably slaves or freedmen. The domus or familia Caesaris included a very large number of the household. An epitome of this list was given in the various offices in the imperial household. There are extant a great many inscriptions from the columbaria where members of Caesar's household were buried. Many are of the reign of Nero, and several of the names
are identical with Christians to whom St. Paul sends salutations in Ro.16, e.g. household of Narcissus, Tryphena, Tryphosa, Philologus, Julia, etc. It has also been supposed that the words, “My bonds in Christ are manifest in all the palace” (Ph.1.13, A.V.), mean that converts were made in the imperial household. But the words ἀποκρητικοὶ refer probably to the Praetorian Guard (see R.V.), and not to the camp built by Tiberius outside the city walls or the barracks on the Palatine. The converts would then be soldiers to whom St. Paul had been chained, or their companions. C. Lamech.

Cage. In Je.5:27 more properly as a trap in which decoy birds were placed (cf. Ecclus.11.50, καταρχήν) [hunting]. In Rev.18.2 φιλακή means rather a prison.

Calaphas, surname of Joseph, high-priest from 18 to 36 A.D., son-in-law of Annas. Under the lead of Calaphas the Sadducees advanced to the position thenceforth held by them as the bitterest enemies of Jesus, and afterwards of the Church (Ac.4:1, 5.17). The counsel of Calaphas that Jesus “would die for the people” is noticed by St. John (11.50) as an unconscious prophecy. Calaphas is referred to in the Lord’s words to Pilate, “He that delivered Me unto thee hath the greater sin” (Jn.19.11). [E.R.B.]

Cain. The eldest son of Adam and Eve followed the business of agriculture (Gen.4.1). In a fit of jealousy,roused by the rejection of his own sacrifice and the acceptance of Abel’s, he murdered his brother, for which he was expelled from “the presence of the Lord” (Gen.4:16; cf. Heb.11.4; Jn.3.12; Jl.11). He settled in the land of Nod, and built a city which he named after his son Enoch. According to rabbinical tradition, he was killed accidentally by Lamech. The following points deserve notice in the fragmentary Biblical narrative: (1) The position of the land of Nod, which it seems vain to attempt to identify with any special locality. (2) The “mark set upon Cain” probably means that Jehovah gave a sign to Cain, very much as signs were afterwards given to the Hebrews (Gen.9.13). (3) II. of Nod (Gen.3.21, 12), Elijah (I K.19.11), and Hezekiah (Is.38.7,8). (3) The existence of a considerable population in Cain’s time (Gen.4:14). (4) The descendants of Cain are enumerated to the sixth generation, with names almost identical with those of the Sethites, and the connexion between them and men of a later day seems not to have been broken by the Deluge (Gen.4.21, 22). (5) The social condition of the Cainites is prominent in the history: Cain founded the first city; Lamech instituted polygamy; Jabal introduced the nomadic life; Jubal invented musical instruments; Tubal-cain was the first smith; Lamech’s language takes the strictly tone Poem.; and even the names of the women, Naamah (pleasant), Zillah (shadow). Adah (ornamental), seem to bespeak an advanced state of civilization. But along with this there was violence and godlessness: Cain and Lamech furnish proof of the former, while Gen.4:26 implies the latter. Ryle, Early Chapters of Genesis.

Cain (R.V. Kain; Heb.11.27; Jos.18.57), a town of Judah in the Hebron mountains. Now Yiqun, a ruin 3 miles S.E. of Hebron. [c.r.c.]

Cainan.—1. Son of Enos and father of Mahaleale (Gen.5.9-14; Lu.3.37-38). The rabbinical tradition that he first introduced idol-worship and astrology was by the Hebrews transferred to the post-diluvian Cainan. —2. Son of Arphaxad and father of Mahalalel (Lu.3.35,36) is found in the LXX. in the genealogy of Shem (Gen.10.24,11.12, and 1 Chr.1.18), but not in the Heb. nor in any version made from the Heb. It seems certain that his name was introduced into the genealogies of the Gk. O.T. to bring them into harmony with one of the descendants of Shem. Cainan was found in the time of Jerome. Probably Cainan was not inserted by St. Luke himself, but added afterwards, either by accident, or to make the number of generations 17, or for some other cause not now known.

Cakes. [Bread.]

Calah’, one of the four ancient cities of Assyria, whose foundation is ascribed to Asshur (Gen.10.11) or to Nimrod (R.V.). Its ruins were discovered by Layard beneath the moulds of Nimrod between 1845 and 1850, and lie about 20 miles S. of Koyunjik (Nineveh), on a tongue of land formed by the Tigris (W.) and the Greater Zab (E.). Shalmaneser I. (c. 1309 b.c.) is said by Assur-našir-apli to have been the founder of the city, but this may be simply in the sense that Sargon of Assyria founded Duršarru-ukin—i.e. by choosing as his residence a site already existing. Assur-našir-apli (885 B.C.) raised at Calah the extensive and magnificent N.W. palace; the extensive and magnificent N.W. palace, built by Tigris (W.) and the Greater Zab (E.). Shalmaneser II., his son (850 B.C.), built the central palace, where the celebrated Black Obelisk was found. This was also the palace of the Biblical Tithathpilesar (III.), who has left some very fine sculptures with valuable historical inscriptions. Sargon (722 B.C.) restored the N.W. palace; and Esar-hadad I. (878-872 B.C.) built the S.W. palace with materials taken from the central palace, Tithathpilesar’s slabs being sometimes planed off to receive new reliefs. The temple-tower of Calah is exceedingly interesting, as it has in the basement a long vault, which suggests that it was originally a tomb. One of the immense temples on the site was dedicated to Nebo, and the other to Ninip or Nirig. There was also a shrine to Istar. Assur-šuil-lāni, son of Assur-bani-apli, was the last king to reside at Calah. The city itself was defended by extensive walls, those to the S. showing traces of more than 50 towers. It is thought that Calah formed one of the suburbs which were added to Ninip. It is remote, being about 50 miles from Nineveh, the enormous size of which is referred to in the book of Jonah, and also by Diodorus Siculus and others. [Nineveh.] Sayce (Higher Crit. and Mon. p. 170) points out that the statement (Gen.10.12) that Calah is “a great city” must have been written before the overthrow.
of Assyria, and is therefore an evidence of the early date of this chapter.

[Calamosalus (t Esd 5.22), a corrupt place-name, apparently agglomerated of Lod and Hadid (cf. Ezr 2.33).]

Calamus. [Reed.]

Caldor, a man of Judah, son or descendant of Zerah (1 Chr 4.6). Possibly = Chalol (1 K. 4.31).

Caldron (Isa 2:14; 2 Chr 35.13; Job 41.20; Mi. 3.3). [Pan; Reed.]

Caleb, son of Jephunneh (Num 13.6), called son (i.e. descendant) of Kenaz (Jos 15.17; Judg 3.9), and "son of Jephunneh the Reubenite" (Jos 14.6), son that in JE and D, Caleb alone is faithful, while P associates Joshua with him. As the phrase "and thee" (Jos 14.6) contradicts this, it is put down as a harmonistic gloss. There are reasons for thinking that Caleb was not a Judaean by birth, for the Kenizzites were an Edomite tribe (Gen. 36.42, cf. 15.19); but there is little to justify Moore's guess that Caleb was a separate invasion from the S. The Calebites, like the Jerahmeelites, are treated as distinct from Judah proper (Isa 30.14.29); and both Jerahmeel and Caleb are in 1 Chr 2 the sons of Hezron and great-grandsons of Judah. The passages, however, are not trustworthy (notwithstanding ver. 40), and the people, probably concerned with the clan, its position in the tribe, and its geographical distribution. The confusion of clans and their subdivisions with persons who from their prominence bore the clan name is only natural. Robertson Smith (Kinship and Marriage, p. 233, new ed.) describes the Calebites as, with the dog as their totem. Hence they may have derived their name, but that is no reason for believing that the Caleb of history was concerned with totems. Sayce (Early Hist. of Heb, p. 265) says that cuneiform inscriptions show Caleb to be an individual name, that the Amarna tablets have Kalhu (dog) in the sense of officer or messenger, and he suggests that Caleb may have been a messenger of Pharaoh before becoming a Hebrew spy. Col. Conder, however, maintains that Kalhu is only used in the Amarna tablets as a term of abject basality, and that on the other hand, it occurs in cuneiform texts as meaning a "priest," and he suggests that this and not "dog" may be the meaning of Caleb. Caleb's tribe was afterwards of importance in the neghebd. Nabal was of the house of Caleb (1 Sam 25.3).

[Calameh (1 Chr 2.24). The text is corrupt. The LXX. reads καλαμόν πατρός Χαλαμής και Εφραήμ. This has been further amended, and the verse may mean, "And after Hezron's death Caleb went in unto Ephrath, the wife of his father Hezron [cf. ver. 10]; and she bare him Ash-hur, the founder of Tekoa." C. J. Ball, Chronicles. Cf. "Genealogy," Hastings, D. B. (5 vols. 1904), and article on Caleb.]

Calf. In Ex. 32.4, it is stated that Aaron, constrained by the people in the absence of Moses, made a molten calf of the gold earrings of the people, to represent the Elohim which brought Israel out of Egypt. It does not seem likely that earrings would have provided the enormous quantity of gold required for a solid figure. More probably, the figure plated with gold—a type of image known to have existed in Egypt. "A gilded ox covered with a pall" was an emblem of Osiris (Wilkinson, iv. 335). To punish the apostasy Moses burnt the calf, and then grinding it to powder scattered it over the water, where, according to some, it produced in the drinkers' effects similar to the water of jealousy (Num. 5). The process used is difficult of explanation. Bochart and Rosenmüller considering that Moses merely cut, ground, and filed the gold to powder. It seems probable that the image of the calf (or, better, "steer") is the origin of Apsis, the sacred ox of Egypt and the incarnation of the god Ptah. The "calfs" set up by Jeroboam at Dan and Bethel, on the other hand, were probably of Canaanitish origin (1 K. 12.28.29). Hosea is full of denunciations against the calf-worship of Israel (Hos 8.5, 6, 10.5), and mentions the calvinistic custom of kissing them (13.2). The expression "the calves of our lips" (14.2) might be the prophet's application, in a higher and spiritual sense, of a thought suggested by 13.2: but the more usual explanation is that the word calves is used metaphorically for victims or sacrifices, and that the phrase signifies "tribute of the lips," (14.2): "this tribute of thanking and praise," or else "the sacrifices which our lips have vouched." [Cattle.]

Calitas. [Kellita, 1 and 2.]

Callisthenes, a partisan of Nicanor, burnt by the Jews for setting fire to the holy gates (2 Mac 3.31).

Calneh appears in Gen. 10.10 among the cities of Ninrod. Probably the site is the modern Niffer, which was certainly one of the early capitals, and which, under the name of Nopher, the Talmud identifies with Calneh. It had a renowned temple-tower dedicated to the older Bel, and its ruins, as excavated by the American explorers, show exceedingly interesting remains of various dates. A number of tablets have also been found, the latter ones showing that a large Jewish colony lived there. See Clay's Light on the O.T. from Nebuchadrezzar to Ptolemy (1907). [P.]

Calneh (Am. 6.2) or Calno (Is. 10.9),
PLATE VII

THE SO-CALLED "GARDEN TOMB," IN THE TEMPLARS' HOSPICE, JERUSALEM.

VIEW, LOOKING W., OF A GRECO-JEISH TOMB W. OF THE SUPPOSED SITE OF CALVARY.
(From an original sketch by Col. Conder in 1881.)
probably the Κυνία of the Assyrian inscriptions. Fried. Delitzsch suggests that it may be Κυλλάνθος, about 6 m. from Arpad. \( \text{[r.g.p.]} \)

**Calvaphi (A.V. Lu.23.33; R.V. the skull),** from Lat. calvaria, derived from calva (skull), a translation of Gk. σκαλπαίον. The Heb. (or rather Aramaic) word was GOLGOtha (place of a skull; Mt.27.33; Mk.15.22; Jn.19.17). The exact situation is not stated in the gospels, and neither Calvaphi nor the tomb beside it are mentioned elsewhere in the Bible. It was probably the ordinary place of execution, and as such well known. Crucifixion was not exclusively a Roman punishment; it was a custom of Greeks, Carthaginians, and even Jews (Josephus, \( \text{[r.g.p.]} \) Ant. xiv. 2), and Pilate "gave up" Jesus to the Jews (Lu.23.25; Jn.19.16), though providing a guard. From Mt.28.11 we learn that the "new sepulchre" was outside Jerusalem; and Christ "suffered without the gate" (Heb.13.12). From Lu.23.49 we gather that Golgotha was a place visible "afar off," and therefore probably on high ground. From St. John we know that this was the "place of crucifixion" (Mt.27.33), and that the tomb was at, or "in," the place of crucifixion, but in a garden (19.41,42). The place where Stephen was stoned was also outside the city (Ac.7.58). There is no known reference to the position of Golgotha in any writer before the time of Constantine. In 330 A.D., this emperor declared it a sepulchre, and pulled down a temple of Aphrodite, under which a tomb was found. Eusebius does not say why this was accepted as the true site, but only that Constantine was divinely inspired in his search (Life of Constant., iii. 26). Twenty years later fragments of the true cross were shown on the rock S.E. of this tomb, which was included in the church, and recognized as Calvaphi. Thus, as at Bethlehem, Gerasa, Baalbek, etc., a Christian church was built on the site of a pagan temple. The difficulty in accepting this site for Calvaphi is, that the ground slopes steeply away from the high rocky knoll to the deep valleys on its S. and E. It is certain that Calvaphi was outside the city wall at the time of the Crucifixion; but if that wall was drawn to exclude the traditional rock, it would be entirely commanded by the rock, which no ancient builder would have permitted. The old "house of stoning," or place of execution, is noticed in the Mishna

**Camel**

(\( \text{Sanhedrin vi. 1-4} \)) about 150 B.C. It was some distance from the temple, in which the Sanhedrin sat, since a horseman was employed to carry thither the criminal's last words at the place of execution. It is said that the latter was "the height of two men," and the person stoned was first cast over this cliff, and finally "hung up," on a cross with a transverse beam, planted in the ground or leant against the cliff. The Jews identify this site with the remarkable knoll outside the N. gate of the city; it has a cliff on the S. side, and is visible from a distance all round. Here also, in the 5th cent., the site of the stoning of Stephen was fixed. The Templars built a hospice immediately to the S. after 1187 A.D.; and in the W. end of the cliff a tomb, marked with two Latin patriarchal crosses in red paint, was found in 1873 filled to the roof with human bones. On W. of the main N. road (cf. Mt.27.39; Mk.15.29), close to this knoll, a Jewish tomb, with an outer chamber with a single grave, was also found in 1850. This knoll (\( \text{el Heidhenich}, \) the cutting), now covered with Moslem graves, is generally regarded as the true site of Calvaphi by the Christians, especially by the traditional site. It was certainly outside Jerusalem, but nigh to the city, in the time of our Lord (see Surv. W. Pal., Jerusalem vol., pp. 380-386, 429-435). [C.R.C.]

**Camel.** Under this head may be considered the Heb. words gāmil, bēkher, or bikhrā (\( \text{[r.g.p.]} \) ביכרה), kirōth (\( \text{[r.g.p.]} \) כירות),Pers. eter, "mule") are erroneously translated "camels" by A.V. in Esth.8.10. (1) gāmil is the common Heb. term for camel, irrespective of age, sex, or breed. It is clear from Gen.12.16 that camels were early known to the Egyptians. The Ethiopians had "camels in abundance" (2Chr.14.15; the queen of Sheba came to Jerusalem with them (1K.10.2); the men of Kedar and of Hazor possessed camels (Je.49.29,32); David took away the camels from the Geshurites and the Amalekites (1Sam.27.9,30.17); forty camels' burden of good things was sent to Elisha by Benhadad king of Syria from Damascus (2K.8.9); the Ishmaelites used camel-transports (Gen.37.25); the Midianites and the Amalekites possessed camels "as the sand by the sea-side for multitude" (Judg.7.12); Job had 3,000 camels before his affliction (Job1.3) and 6,000 afterwards (42.12). Camels were used for riding (Gen.24.64; 1Sam.30.17); as beasts

---

**Bactrian or Two-humped Camels on Black Obelisk. (Layard.)**
of burden (Gen.37.25; 1K.10.2; 2K.8.9, etc.); and for draught purposes (Is.21.7); while from Is.30.17 we learn that they were used in war. John the Baptist wore a garment made of camel's hair (Mt.3.4; Mk.1.6), and some have supposed that Elijah "was clad in a dress of the same stuff." Camel's flesh, although esteemed by the Arabs, was forbidden to the Israelites (Lev.11.4; Deut.14.7), because, though the camel is "chewed the cud, it divideth not the hoof." (2) bêkher and bikhîrâ, the masculine and feminine forms of the same word, occur only in Is.60.6 and Je.2.23, where A.V. reads "dromedary," and there is little doubt that this is correct. (3) As to kirkârotôh of Is.66.20 (A.V. swift beasts) the explanation that dromedaries are meant is unsatisfactory and it more probably indicates the "paniers" or "baskets" carried on the backs of camels or mules. The camel in use among the Jews and the heathen nations of Palestine was the Arabian or one-humped species (Camelus dromedarius). The dromedary, which is swifter than the baggage-camel, and used chiefly for riding purposes, is merely a finer breed than the other, called by the Arabs Hajin. The camel is the subject amongst Orientals of many proverbial expressions; see many cited by Bochart (Hieroz. I.50), and cf. Mt.19.24 and 22.24, where, in Tristram's opinion, A.V. is correct, notwithstanding attempts made to explain away the expression. The very magnitude of the hyperbole, observes the same writer, is evidence in its favour: in the Talmuds "an elephant passing through a needle's eye" is a common figure to denote anything impossible. The only other species in the same genus is the Bactrian (Camelus bactrianus), which was employed in the domesticated state by the Assyrians, as it now is in N. Persia and Central Asia generally. It occurs wild in Mongolia, the one-humped species being unknown in the wild state. Camels, although allied to the true ruminants (Bovidae), are separate species from the Bovinae, s. a. from their cushion-like feet. [*n.t.]

**Camon**, the place in which Jair the judge was buried (Judg.10.5). Josephus says that it was a city of Gilead. In modern times, however, it has not been recovered on the E. of Jordan.

**Camp**.[[Encampment.]]

**Camphire.** This is undoubtedly an incorrect rendering of the Heb. kôphâr, which occurs in the sense of some aromatic substance in Can.1.14,4.13 only. The margin in both passages has "cypress," giving the form but not the signification of the Gk. word. Camphor is the product of a tree largely cultivated in the island of Formosa, the Camphora officinarum, of the natural order Lauraceae. It has the expression repute of an antaphrodisiac: so that its unsuitability is quite pronounced. For the expression cluster of kôphâr in the vineyards of Engedi, in Can.1.14, the Chaldee reads "much of scents." [PAUL.] Several versions retain the Heb. word. The substance really denoted is the Lawsonia alba of botanists, the henna of Arabian naturalists. The Nubians call henna khotreh Arâb, kafar. Hasselquist (Trans. 246, Lond. 1766) says, "the leaves are pulverized and made into a paste with water; the Egyptians bind this paste on the nails of their hands and feet, and keep it on all night. This gives them a deep yellow, which is greatly admired by Eastern nations. The colour lasts for three or four weeks before there is occasion to renew it. The custom is so ancient in Egypt that I have seen the nails of the mummies dyed in this manner." Somnini (Voyage, i. p. 297) says the women are fond of decorating themselves with the flowers of the henna-plant; that they take them in their hand and perfume their bosoms with them. (Cf. Can.1.13.) The Lawsonia alba when young is without thorns, and when older is spinous, whence Linnaeus's names, L. incermis and L. spinosa; he regarding his specimens as distinct species. The henna-plant grows in Egypt, Syria, Arabia, and N. India. The flowers are beautiful and very fragrant, and grow in clusters. The shrub is from 4 to 6 ft. high. The Lawsonia alba, the only known species, belongs to the natural order Lauraceae. R.V. reads henna in both passages. Harris points out that the expression "pare her nails," in Deut.21.12, may rather mean adorn or prepare her nails, the proper signification of the Heb. words. This may imply the antiquity of the practice described by Hasselquist, and earlier by Dioscorides. The correct interpretation of kôphâr (rendered "cypress tree" in Wyclif) was of an early date. R. Ben Melek, in his note on Canticles, expressly says, "Botrus copher id ipsum est quod Arabes vocant Al-hina." It is noteworthy that the earliest sense of pare (not obsolete in 1011) was to adorn, or deck out; get ready, prepare (New Eng. Dict.); so it is not impossible that A.V. left the sense open. Wyclif reads "kytt about the taulis." [PAINTER.]**

**Cana of Galilee** (Jn.2.1), the site of the miracle (2.11), and the home of Nathaniel (21.2; see 4.16). The position is not mentioned; nor does Josephus (Life 16 and 71; 1 Wars xvii. 5) assist us, except that it appears to have been on the high-road from Bethsaida (Julias) to the W. The site is not
defined in the *Onomasticon*, but rather later was shown at Kefr *Kenana* on the road to Tiberias, [3] though *Mount Nazareth*. This Arab. name does not properly represent the Heb. Kanah. In the 12th cent. the site shown was the ruin *Qânāţa*, 8 miles N. of Nazareth; but though the name is exact the place is not on the direct route to Tiberias. There is also a spring called *'Ain *Qânāţa*, about a chil. N. of Nazareth by the N.W. slope of Mt. Reineh, and this site, both as to position and as to the spelling of the name, would be suitable.

[**G.R.C.**]

**Canaan, Canaanites.** Canaan was the youngest son of Ham (Gen.10.6,15f.) and the "father of" Zidon, Heth, the Hittites, etc. Noah's curse for the sin of Ham is directed against Canaan (Gen.9.18-25), who is to be a "servant of servants" to Shem and Japheth. The name is widely used; it occurs under the form Kînâ-'a-na in the Amarna tablets of 15th cent. B.C., where the "kings of Canaan" (cf. Judg.4:2-5,19; Ps.135:11) are noticed (Brit. Mus. 87, 58). In particular in the history of the Canaanites generally as revolting from Egypt (Berlin 8, 92; Brit. Mus. 2, 24, 30). The name "mother of the Canaan" also appears on Phoenician coins of the Syrian Laodicea (Lataqia) in the later Gk. age. The Phoenician form found in Eusebius, Hecataeus, and Stephen of Byzantium was *Xwâ*. Augustine says that country-folk in the province of Africa in the 5th cent. A.D. were asked who they were, they replied "Canaanites"—i.e. lowlanders (Exp. Ep. Rom. 13). The Heb. word is from a root meaning "to live," and is properly applied to the inhabitants of the plains, i.e. the Canaanites dwelling in the lowlands of Phoenicia, e.g. Zidon (Zeph.2:5) and in the Jordan Valley (Gen.10.15,16). But the term is used in the Bible in several senses: (a) Applied, as distinguished from the Israelites, to all inhabitants of the land (Gen.12.6; Jos.11.3; Ps.105.11), even including the Hebron mountains (Gen.23.2, etc.). Canaan answering to the old Akkadian name *Mar-Tu* (the country of the Euphrates (Assyr. *Aharu*, "west")). (b) More commonly restricted to the lands W. of Jordan (Num.13.2,17,33.40,51; Jos.21:2; Judg.21.12). (c) Limited to the sea-coast and the Jordan Valley, the Canaanites being distinguished from the Amorite inhabitants of the mountains (Num.13.29). (d) Applied to the inhabitants of Phoenicia proper. As the Phoenicians were, above all traders, and the great trade routes were in the plains, "Canaanite" came naturally to mean a "merchant," and is so translated in *Job* 41.6: *Ps*.31.24: *Is*.23.4; *Ex*.2:12 (cf. R.V. marg.); and probably should be in *Zech*.14.21 (see R.V. marg.). In N.T. the word is used for Phoenician, so γαλατικα της Χαραλα: (Mt.15.22) is the equivalent of γαλατικη Ελληνιστική, Συροφωνικαϊσια τω γενεια (Mt.7.26). For "language of Canaan" (Is.19.18), see SEMITIC LANGUAGES. [**F.R.F.-R.**]

**Canaanite, properly Cananaean (R.V.).** The name of a turbulent Jewish sect (cf. Josephus, 18 Ant. 1. 1: 4 de Bell. Jud. iii. 9, etc.) headed or revived by Judas of Gamala in protest against the Quiriniun census [TAXING: CYRENIUS], and conspicuous for its excesses during the final siege of Jerusalem. The T.R. had *Kavanwîn*, which A.V. wrongly renders "Canaanite," i.e. descendant of Canaan; nor does it mean an inhabitant of Canaan, which would be "Canaan." *Karaváos*, as used in Mt.10.4 = Mk.3.18, is the additional name of the apostle Simon, to distinguish him from St. Peter, and represents *gans anayyá*, signifying "jealous" (cf. Ex.20.5; Deut.4.24, where "et gannáni, "jealous God," is rendered in LXX. *Théos ýllywn*). In a general sense it would signify zeal for the law, e.g. Rom.12.1, and the kingship of Jehovah; in a particular sense it was applied to the sect which so violently rejected the Roman rule as derogatory to that kingship. St. Luke gives Zelotes (the Zealot) as its equivalent (Lu.6.15; Ac.1.13). This need not necessarily imply Simon's actual membership of the sect. Possibly the name merely suited his character. [**E.H.P.**]

**Candaœ (Ac.8.27).** A queen of Ethiopia (now the Egyptian Soudan). The name was not that of an individual, but of a dynasty of Ethiopian queens. Their capital was Napata, in the district now known as Bakariwya (Murray's *Guide to Egypt*). [**E.R.B.**]

**Candlestick** (Heb. נ'מ'רעה, lampas, always referring to the "holy candlestick" (Ecclus.26.17), except in 2K.4.10. (1) In the tabernacle. Made by Bezaleel (Ex.31.2,37.17), after the pattern shown Moses in the mount (25.10). Directions for making (25.30-30, cf. 17.37-44) of pure gold, hence called the "pure candlestick" (St. John 21.24); not cast by fusion but wrought by hammer (Ex. 25.31); a talent of gold was used for the candlestick and its utensils (25.39). It consisted of a pedestal; a shaft, from which sprung three branches on each side; and seven lamps, one on each of the branches and one on the shaft. [**LAMP.**] The branches probably curved upwards to the height of the shaft, so that the lamps were on a level. Three kinds of ornament are mentioned, cup, knop, and flower (Ex.25.31), but their form is uncertain. If the candlestick was intended to represent an almond-tree (for symbolism, see Je.1.11,12), the ornament may resembled a flower. (2) In Solomon's temple there were ten golden candlesticks, five on the S. side, and five on the N. side, of the holy place (1K.7.49). These are not described, but were probably of the same design (1K.7. 49, "flowers"); 2Chr.4.7. They were carried to Babylon (Je.52.19). (3) Zerubbabel's temple had only one candlestick (1Mac.1.21,4.49, 50; Josephus, 14 Ant. iv. 4). This was in the Herodian temple (1K.8.6; 2K.15.35), and was taken to Rome after the fall of Jerusalem. The representation on the arch of
Titus can scarcely be correct in all details; e.g., the figures on the base are improbably (cf. Josephus, 7 Wars v. 5). Reland, De Spoliis Templi Hierosolymitani. [H.H.]

Cane. [Reed.]

Canker, probably any sort of spreading tumour or growth is referred to in 2 Tim. 2:17, not necessarily in that particular form which we call R.V. gives "gangrene." [F.J.]

Cankerworm. [Locust; Palmer-worm.]

Canneth' (Ezk.27, 23), a contraction of Canneh (Calno), which is the reading of one MS., or else the Kannu' of certain Assyrian contract-tablets, in which case it was probably in N. Syria.

Canon of O.T. 1. Definition. By "canon" we understand the collection of the holy writings recognized by the Christian Church, writings given by God, and therefore the Church's rule of faith and life. The word, which is borrowed from the Semitic language (Heb. qānā', "a reed "), signifies anything straight (e.g. an horizontal line or a rod); and prefiguring rod, which flexibility is the perversive idea. From this original meaning is easily derived the metaphor of a standard, measure, hence a regulative precept or directive principle in the philosophic, grammatical, ethical, or ecclesiastical senses, e.g. as applied to the baptismal creed, or to the decisions of synods. Hence, likewise, our idea of a canon of Scripture must be in accord with the foregoing significations, despite the fact that Zahn, an acknowledged authority on the canon, has revived the old opinion of Semler, viz. that it meant merely a "list" or "catalogue," an opinion which has long become obsolete, though a tendency to put it forward in the interests of Rationalism, had at times existed. The use of the word "canon" and its derivatives in this connexion dates back to c. 350 A.D. We find it (357 A.D.) in the preamble to the festal epistle of Athenasius (lxx.), in a canon of Laodicea, and in Anabiblius. The Latins adopted the word, but call the collection canonicus, in a sense which our language has assigned to it. — II. The Formation of the O.T. Canon. The treatment of this subject is much more difficult and much more important than it was formerly, when more certainty and more agreement prevailed as to the composition of the several books. Our estimate of the beginning and close of the canon unquestionably depends largely on our attitude towards each separate problem of scientific introduction; as is shown by, e.g., the hypothesis of Wellhausen, the critical handling of the Psalms, or the late dating of parts of the prophets. But assuredly scientific introduction is not the only factor in our decision as to the canon. If it is possible by other arguments to show its close at a time before that at which criticism postulates the origin of many parts of it, it will become necessary to revise and modify the supposed results of scientific introduction, the methods of which are often in a high degree arbitrary and despotie. Hence it is necessary to note the limits within which scientific introduction rightly has free play, but which it must not over-pass. We will begin from the conclusion of the canon and trace it back. A. The Close of the Canon. Josephus (Contra Apion, i. 7, 8) gives us a clear account of the credibility of the Heb. historical writing in contrast with the Gk. Its composition was not due to the personal predilections of any individual writer, but to the instrumentality of inspired prophets. "We have not," he continues, "an innumerable multitude of books among us, disagreeing from one to another, but only 22 books which contain the records of all the past times, which are justly believed to be divine" (whether or no "divine" is a possible addition of Eusebius is immaterial). He further specifies that the historic records which were valued as having prophetic authority ended with the reign of Artaxerxes, and continues, "How firmly we have given credit to those books of our own nation is evident from what we do; for during so many ages as have already passed, no one has been so bold as either to add anything to them, to take anything from them, or to make any change in them; but it becomes natural to all Jews, indeed to all men, to rest satisfied with those books to contain divine doctrines, and to persist in them, and, if occasion be, willingly to die for them." Although this account dates from c. 100 A.D., and although we may be unable to accept every detail of his account indiscriminately, yet this testimony of Josephus has undoubted importance, since he is no mere private opinion, but expresses the general judgment of his times—that since the time of Artaxerxes nothing had been added to the canon, because the prophetic succession was wanting, without which no one would have ventured to admit new books to the canon. Passing over Philo, whose only relevant writing (De Vita Contemplativa, § 3) is held to be spurious, and the N.T., where in Lu. 24, 44 we find the well-known threefold division, and where in Mt. 23, 35 (Abel to Zacharias i.e. from the first murder to the last in the last book of the Heb. canon; see 2 Chr. 24, 20 f. and Zachariah, 1) the present order (i.e. the Books of the Chronicles at the end) of the Heb. canon is implied, we come to the prologue of Jesus the grandson of Sirach, which was composed 132 B.C., where the threefold division and the close of the canon as early as the time of Sirach himself is implied (Yeb, to Ecclus., three times). This witness places at least to 180 B.C., if the author of the book was the grandfather of the writer of the prologue. But if it were Simon I, "the Righteous," and not Simon II, who was contemporary with Sirach, then we must not translate παράγγελμα of "grandfather," but "ancestor," and the date of the composition of the book would be c. 290 B.C. (See Halaedr. and the additional evidence in Ecclus. 48, 20-25, 49, 6, 8, 10 there is a distinct testimony to three major and twelve minor prophets, it is superfluous to discuss Marti's dating of Zech. 9-14 in 160 B.C. It does not follow from the varying and indefinite designations of the third group that this was only just begun, for a better exposition is found in the various contents of the collection (cf. "Psalms" in Lu. 24, 44); and the definite article, which occurs in all three sentences, requires that we should recognize that the Hagiographa was closed, just as much as was the second group, the name of which also varies ("the prophets","
or "the prophecies"). It follows that whatever date we assign to the composition of the book of Daniel, it did not first see the light as late as 164 B.C., nor can it be maintained that the assumption that so accurate a prediction is impossible, and which has against it the fact that Daniel's prediction of the future extends far beyond the times of Antiochus Epiphanes (see, e.g., all that is prophesied concerning the fourth kingdom). All other conclusions of criticism, which date any canonical book later than 290 B.C., or at latest 180 B.C., are purely arbitrary, and in contradiction to the evidence already set forth. In earlier times no analogous literature is extant. It is possible, however, to adduce very important indirect testimony to support the affirmations of Josephus. To this unimpeachable (or Nehemiah) and the text is possible." (Eph. 5:29) as true of nations as of individuals. Now, it is a fact that none of the literary fragments, which are stated to be so late, ever date themselves, or are dated by tradition, beyond the period which Josephus assigns as the latest period of canonical and therefore also of his writing. Further, it is surely inconceivable that a generation which preserved the stones of a desecrated altar for burnt-sacrifice till a prophet should arise (1Mac.4:44-46) and thus showed that in the very smallest particulars it felt itself without any power of imitation, should have ventured to settle the canon. It is not, moreover, that Nehemiah and the Chronicles later than the period assigned by Josephus; for 1Chr.3:14f. carries us no farther than to Zerubbabel's grandson, since the posterity of Rephahim, who seem to be later, stand without any congruity with what goes before. In Ne.12:23, we may have to do with one or other of Nehemiah's contemporaries. Further, we have a contemporary notice that four generations of high-priestly descent were then alive—as we Germans used to speak of a famous picture as representing "Four Kaisers "—and it is possible that Nehemiah himself, who in 430 B.C. was acquainted with a married grandson of Eliashib (13:28), may have lived to see his great-grandchildren. We cannot here treat in detail the notorious mistakes of Josephus with regard to this period. It is clear, however, that in Ne.12:22, Darius III. (Codonaunus) is not meant (336-322 B.C.), but Darius II. (Nabuchodonosor) (423-404 B.C.). It is, moreover, a fact not without importance that not one of the many genealogies is continued beyond the time given by Josephus. It is further to be remarked that this date is from all points of view intelligible in itself. The entire framework of the faith (including the Synagogue; the liturgical books; the smaller prophetic books; the apocryphal books) have their origin in religious documents; they felt that inspiration was on the point of passing away, just as was the use of the old Hebrew language. On the other hand, the close and selection of the canonical writings was a need of the times, especially if they were to be put into the temple for safe keeping (Josephus, Ant. v. and De Bello Jud. vii.), and the same assumed in Ezra ("the scribe," Ezr.7,6) and in Nehemiah commanding personalities; and the much more limited range of interests which presented themselves to the little colony of Jews after their Return left them leisure to collect all that they now possessed, and sufficiently explains the general acceptance of the canon which was drawn up in later times. These conclusions enable us to extract what there is of truth from the medley of confused notices of the canon which have come down to us, and at the same time to find support in them for results which have already been assured by other modes of reason-able argument. (i) To hand them on to the wise amongst the people." From this passage in itself nothing can be argued, because of its mechanical idea of inspiration and because it puts a higher value upon the 70 apocryphal books than upon the 24 canonical; yet, when it is taken with what has already been proved, there is light thrown upon the Scripture in the Fathers which present us with similar notices either refer directly to 2Esdr. or arise probably from the same source. Only Irenaeus (Adv. Haer. iii. 21), where the statement has a simpler form, has the appearance of being independent. (ii) The tractate Baba Batra (xiv. 2; xv. 1) states that "Moses wrote [hadhabbit] his book, the section about Balama and Job. Joshua wrote his book and eight verses in the law. Samuel wrote his book, the book of Judges and of Ruth... Jeremiah wrote his book, the books of the Kings, and Lamentations. Hezekiah and his colleagues wrote JMSK. (i.e., Is., Pr., Can., and Ec.) The men of the great synagogue wrote 1,2,3 Ezech., 12 prophets, Dan., and Esther). Ezra wrote his book and brought down the genealogies of the Chronicles to his own times." Since the time of Kuenen the men of the Great Synagogue have been definitely held to have shaped the canon of the Hebrew Bible; though doubts as to their extent have been expressed much earlier. But we may use this passage as a witness to the genuineness of the underlying fact of the close of the canon.
from the times of Ezra and Nehemiah which is reflected in it. (iv) Is not the threefold division of the canon anachronistic? Was the canon that the canon was closed in the days of Nehemiah? It is true that this division has often been represented as haphazard, but the other positive investigators maintained that in it is discovered a principle, which postulates the closing of the canon at a definite date. This brings us, however, to our next section.

B. The Beginning of the Canon. We believe that it is true that there is an underlying principle, but one that has been in part historically evolved. (i) The work of Moses forms the foundation. We must quite certainly set his inspiration yet higher than that of the prophets (cf. Ex. 33.11; Num. 12.6; Deut. 5.5). See the present writer's Are the Critics right? and the articles in this volume on the Pentateuch and on the several books for evidence that views which do not refer Deut., the priestly Codex, and the book of the Covenant in their main fundamental elements to Moses, must lead to inextricable contradictions and conclusions. We must therefore recognize in Deut. 31.9, 26, 17.18 the beginnings of the formation of the canon (cf., further, Ex. 17.14, 24.4, 34.27; Num. 33.2). Jos. 24.25f. is an analogous instance; for the early existence of written laws (Toroth), see Ho. 8.12 (Heb.) which mentions "innumerable" precepts of the Law as "written" (cf. R.V. marg.; the "though" in R.V. text is not in the Heb., and destroys the vivid balance of the sentence). How much of the Law, and what also in its historical parts was canonical, is, as to details, the problem of the science of introduction, and different answers to it are given. Whether, for instance, or rather recombination, and is generally referred to Deut. In Ne. 8-10 the Pentateuch is, according to Wellhausen, given canonical status; according to his school, who contradict the statements of the text, only the priestly Codex. The conclusion of the Torah (Lev. 27.30f.) is assigned arbitrarily to Deut. How, in this case, would the adoption of the Pentateuch by the Samaritans be conceivable? What is it that is referred to in Is. 34.16 and Ps. 40.7,8 is not certain. (ii) An early collection of the prophetic books must also have existed; otherwise the cross-references to one another, which are everywhere numerous, and which reach their climax in Ezekiel, Jeremiah, and Zechariah, remain unintelligible. Je. 36 throws interesting light upon the way in which the several parts of the canon originated. (cf. further, Dan. 9.2, and the expression "the earlier prophets" in Zech. 1.4, 7-12. We must therefore conclude from the authoritative official position of the prophets, that as a rule their writings received canonical recognition as soon as they appeared, so that the prophetic collections were continually growing. Whether these were in earlier times complete, or how far complete, we are no longer in a position to say. But we may not have, in the way in which the sage consecutively stands at the beginning of Jonah and Ezekiel, a clear indication that they were consciously connecting themselves with the prophecies of their immediate predecessors (in the order of Heb. Bible) Obadiah and Jeremiah respectively? That this "accurate succession" or "consecutive prophecy" existed at once from the facts. Moreover, Zech. 7.12 seems to know of an incorporation of the law with the prophets as already in existence. Rightly, in any case, does the canonical collection of the historical books (Joshua-Kings) as "former prophets" connect itself with the "definitive designation of 'latter prophets," not because prophetic passages occur in them, or because their authorship was ascribed to individual prophets (as in later times Joshua was ascribed to Joshua, Samuel to Samuel, Kings to Jeremiah), but because it belonged to the prophetic office to set off from the different degrees of inspiration itself in history. Even profane historians have thus been called "prophets who face backwards." Whether the canon of the "former" prophets arose successively one by one, like that of the "latter" (see, for a special instance, 1 Sam. 10.25), or at some time in the Exile, we have no way of knowing. We may, however, joining with the "latter" prophets may well have taken place at the time of the closing of the canon. (iii) Since parts of the Hagiographa also were certainly collected at an early period (see Pr. 25.1), it follows that the threefold division of the canon does not correspond simply to the historical succession in time, but that here a definite principle of division has been in reality the ruling factor. This alone explains why the order of the individual books in the Heb. Bible varies, while yet each book is always placed in the same section. This principle arises objectively from the different status of the writers in the theology, subjectively from the differentiation of degrees of inspiration. Often both these reasons are taken into account, but at other times one or other is predominant. Abarbanel and Maimonides push the matter further into what are often very subtle distinctions, with which we may compare the right distinction of Witsius between the "deutero-canonical," the "apocryphal," and the "apocryphal" by which Daniel's place in the Hagiographa becomes intelligible. In any case, however, a principle implies the conclusion of the canon at some definite time. The later Jewish discussions, which concern Pr., Ec., Esther, Ezk., Can., have nothing to do with their reception into the canon, which, indeed, these discussions always assume; still less with any later exclusion from it, which could not be reconciled with the demonstrably high estimation in which Esther was held; but are concerned with their exclusion from public reading in divine service, which, however, was not carried out. The reason for them was not critical impeachment of their genuineness, but arose from their content, e.g. Ezekiel was supposed to be inconsistent with the law. Critics in earlier times cited the Alexandrian canon against the Hebrew, but this is not justified. For as revelation in the Alexandrian view had a wider scope, they allowed themselves additions (cf. the many apocryphal additions and see under 111.) and alterations. Despite these, the LXX. canon is in the main the same as the Hebrew. Yet Philo, according to Strack, quotes from all the Biblical writings with the exception of Ezekiel,
Daniel, and the five Megilloth, and gives only one citation from the Apocrypha. What Josephus thought, though he makes frequent use of the LXX., and favours Alexandrian views, we have already seen. The computation of 24 books in which is the total of the Jewish tradition (2Esdr.14.44-48, see supra, and Talmud) as far as it is uninfluenced by the LXX., is to be held, with Strack against Zahn, to be original, i.e. 5 books of the law, 4 + 4 (i.e. Jos., Judg., Kings, Sam.; + Is., Je., Ezek., and the book of the 12 minor prophets) of the prophets, and 11 of the historical, poetic, and halachic, and the Christian writers, which makes them 22, is conformed to the alphabet, and is only obtainable by uniting Ruth with Judges and Lamentations with Jeremiah; yet if this were originally so, their present position in the Hagiographa would be hard to explain. Equally artificial is the number 27, favoured by Epiphanius and Jerome, which arises from the final letters of the alphabet being added. With regard to the varying order, which we find in the LXX., in the Fathers, in the Vulg., Talmud, Rabbis, and German and Spanish MSS., see Strack, Introduction, or Hertzog, Real-encyc. edd. 2 and 3. The LXX., e.g., gives us a division into historical, poetic, and prophetic writings, and gives the first five lesser prophets in the order of their size. Because Baba Bathra and the larger number of German and French MSS. make Isaiah follow Jeremiah and Ezekiel, it does not follow that we are to see in this a reminiscence of the origination of Isaiah and Jeremiah and Ezekiel, from a principle that we have trouble itself with such criticism, and, long before, Jesus Sirach (Ecclus.48.22ff., esp. 21) had held these chapters to be genuine. The Jews themselves give a different explanation of this order—viz. that threatening should follow threatening, and comfort, comfort. It is often difficult to discover a principle in the varying order of the Hagiographa; though that the five Megilloth follow the order of the feasts, at which they were read, is intelligible enough. Even in the names a constant tradition is wanting. The abbreviations uesta (i.e. Torah, Nebim, Ketubim), hmn (i.e. books with special names), the first three, we find also in the LXX. and the general, and the denomination of the books of the latter, by the first word or one of the first words in them, are well known.—III. History of O.T. Canon in the Christian Church. (a) The Early and Middle Ages. The most important point for us is that Christ and the apostles recognized our O.T. as canonical, for only passages from it are found in the New Testament, and only very occasional reminiscences of the Apocrypha are to be found (e.g. Heb.11.35ff. refers to 2Mac.6ff.). Of the canonical writings, references are wanting only to Ezra, Nehemiah, apparently to Esther, and probably to Ecclesiastes. For the attitude of Christ and His apostles towards the O.T. in these several parts, the following passages may be especially noted: Mt.5.17, 15ff.; Lu.24.25, 14ff.; Jn.5.39, 10.34ff.; Ro.3.2; 2Tim.3.15, 16; Heb.1.1; 1Pe.1.10ff.; 2Pe.1.19ff. Even the apocryphal Fathers are still far from quoting the Apocryphal writings as Holy Scripture, though they used them, and have thereby alluded to them. Clem. Rom. refers to Wisdom, Ecclus., Tobit, and Judith; Justin Mart. (Ap. i. 46) to the additions to Daniel, and in the Dia. with Trypho (c. 120 A.D.) even to the Ascensio Isaiac. As Christian converts from paganism were often unable to read the O.T. in the original, and could only use the Gk. translation, the distinction between canonical and apocryphal writings was soon obliterated, since in the LXX. the two were blended, and it was an accepted opinion that, by the instrumentality of the Logos, inspiration had a wider scope. In this way the Apocrypha succeeded in obtaining a place in the Greek Church, and a lasting recognition in the Latin. We give in the table on the next page a synopsis, which, though it makes no pretension to completeness, may serve to give at a glance the general position taken on this question by the Church of the Early and Middle Ages. It is desirable to point out that the Fathers observed the difference of their Bible from the Hebrew, Melito and Origen set about inquiries into the limits of the Jewish canon. Notwithstanding the opinion of Origen that canonicity was to be defined as the Church had received it and that so the Apocrypha was to continue to be read, as Holy Scripture, by the times of the Laodician Council, which (Canon lix.) forbade the public reading of books "not received into the canon," and of Athanasius, who distinguished between "what was canonical, what was read, and what was apocryphal," the Hebrew canon came into currency in the Greek Church; but the writings incorporated in the LXX. (Baruch and a letter) were still regarded as canonical. (For the change in the meaning of the word "apocryphal," see art. Apocrypha.) The Apost. Can. (lxxv.), dating from the 5th cent., introduced a position which was at that time abnormal in the East, and for this reason Canon lxxv. is put in brackets. The attitude is taken so that the Latin Church from the end of the 4th cent. onwards is different. The Councils of Hippo (393 A.D.) and of Carthage (397 A.D.), in the name of Augustine, pronounce ecclesiastical tradition to be authoritative, in default of fixed criteria by which to judge canonicity. Here and there, irregularly, but more especially in the East, the writers who, following Jerome, recognize the Hebraica veritas, but they are the exceptions, and are consequently bracketed in the table. The last column refers to the book of Esther, the only canonical writing which (certainly on account of its contents) was generally misliked or of which the canonical authority was questioned, and that almost without exception by the Greeks. It is only necessary, further, to mention the critical position of Theodore of Mopsuestia, who recognized Baruch and Ecclus., but, on the contrary, did not regard Job, Can., Chron., Esther, Ezra (Nehemiah), or the superscriptions of the Psalms as canonical; and who upon him Julian, in his immediate time, was certainly dependent (see Strack). The oldest Syrian Church did not recognize the Apocrypha. On the contrary, the conception of what was canonical in the Ethiopic Church seems to have been even more comprehensive than that of the LXX. itself. (b) The course of opinion since the Reformation. The Reformed Churches mainly agree with the judgment of Luther, who intro-

- signifies canonical acceptance; — rejection; | a middle position; ? uncertain.

* Distinguishes "books not canonized" from those "of the new and the old covenant which are canonical."

duces the Apocrypha in his first publication of the entire Bible in 1534, with the words, "Apocrypha, that is a collection of books which are not held on an equality with the Holy Scriptures, and yet are useful and good to be read." He did not, however, accept 1 and 2 Esdras, and he expressed himself freely about Esther. He followed the order of the Vulg., but placed the Apocrypha at the end. The superlative of the Apocrypha is shown in the symbols of the reformed Churches: e.g., Conf. Gall. (1559), art. iv.; Conf. Belg. (1562), art. iv.—vii.; Conf. Augl. (1562), art. vi.; Conf. Hete. (after 1566), ch. i., Declar. Thorun (1645). The table in the book of Common Prayer appoints lessons from the Apocrypha for All Saints' Day and other days. Much more cautious and tentative was the Synod of Dortreicht, 1618, which markedly separated 2 Esdras, Tobit, Judith, and the Story of Bel and the Dragon from the canonical writings. For the Roman Church the Council of Trent (session iv.) pronounced all the Apocrypha in veteri vulgata Latina to be canonical, and anathematized every one that should think otherwise. The Greek Church has rejected the confession of Metaphrones Kritopoulos (1625) and of Cyrilrus Lukanis (1629), which only receive the Hebrew Canon, and at the Synod of Jerusalem (1672), in the confession of Dioscurus, designates most of the Apocrypha as "genuine parts of Scripture"; whereas the catalogue of Philaret (1850) returns pretty much to the opinions of Athanasius. **Canon of N.T.** (The article by Bp. Westcott in Smith's *D.B.* (4 vols. Murray, 1893) is still acknowledged by the general consent of authorities to be the most reliable and recent controversies, and the historical facts are necessarily unchanged; hence the present article is, in all essentials, and with but slight additions, a condensation of that scholarly production. A final paragraph, referring to the discussions since Bp. Westcott's time, has been added—Ed.) The history of the N.T. Canon may be conveniently divided into three periods. The 1st extends to the time of Hegesippus (c. 170 A.D.), and includes the era of the separate circulation and gradual collection of the apostolic writings. The 2nd is closed by the persecution of Dioecletian (303 A.D.), and marks the separation of the sacred writings from other ecclesiastical literature. The 3rd closes with the 3rd Council of Carthage (397 A.D.), at which a catalogue of the books of Scripture was formally ratified by conciliar authority. (1) The history to 170 A.D. The writings of N.T. themselves contain little more than faint, perhaps meaconciliion, claims to the position which they were destined to occupy [but see Sprunt, Hoi., 4]. The mission of the apostles was essentially one of preaching, not of writing: of founding a
present Church, not of legislating for a future one. The prevailing method of interpreting O.T., and the peculiar position which the first Christians occupied, as standing upon the verge of the coming age, seemed to preclude the contemplation of putting forth New Testament. Yet a public use (Col.4.16; 1 Th.5.27; Rev.22.18), and an authoritative power (Lk.1.1-4; Jn.21.24; 2Th.3.6; 1Tim.4.6; Rev.22.19) is claimed for their writings, and, at the same time, it is clear, which on any hypothesis is extremely early, the epistles of St. Paul were placed in significant connexion with "the other Scriptures." The transition from the apostolic to the sub-apostolic age is essentially abrupt and striking. An age of conservatism succeeded an age of creation, but in feeling and general character faithfully reflected it. The writings of the Apostolic Fathers (c. 70-120 A.D.) were carefully copied and seldom necessitated the quotation of the earlier writings. In apologetic and missionary treatises especially the appeal would naturally be rather to O.T. At the same time they show that the canonical books of N.T. supply an adequate explanation of the belief of their age, and that the earlier teaching on which that was based: and Clement of Rome (Ep. 47), Ignatius (ad Eph. 12, and Polycarp (Ep. 3)—the latter of whom († 155 A.D.) was a personal disciple of St. John—refer to apostolic epistles written to those whom they were addressing. The casual coincidences of the writings of the Apostolic Fathers with the language of the epistles are much more extensive. With the exception of the ep. of Jude, 2 Peter, and 2, 3 John, with which no coincidences occur, and 1 Thessalonians, Titus, and Philemon, with which the coincidences are questionable, all the epistles were clearly known, and used by them, though not quoted with the form, which perhaps suggests from O.T.; nor is the famous phrase of Ignatius (ad Philad. 5) sufficient to prove the existence of a collection of apostolic records as distinct from the sum of apostolic teaching. The coincidences with the gospels, on the other hand, are numerous and interesting, but not such as must be regarded as the products of the apostolic age. The gospels themselves were not yet a recognized body of Scripture. The collection of the apostolic gospels, the details of the life of Christ were still matters of general knowledge; and the sense of the paramount authority of O.T. was too powerful (even among Gentile converts) to require or admit the immediate addition of supplementary books as Scriptures. Nevertheless, the sense of the writings of the apostles, as the original inspired teachers of the Christian Church, was already felt in the sub-apostolic age. The Teaching of the XII. Apostles clearly assumes a recognized body of evangelic tradition, and its language suggests acquaintance with the gospels of SS. Luke and John, 1 Corinthians, 1 Peter, Jude, and possibly Ephesians, 2 Peter, and the Apocalypse. The next period (120-170 A.D.), which may be fitly termed the age of the Apologists, carries the history of the formation of the Canon further. The facts of the life of Christ acquired a fresh importance in controversy with Jew and Gentile. The oral tradition was at one distance, and therefore less authoritative, and a variety of written documents claimed to occupy its place. Then it was that the canonical gospels were definitely separated from the mass of similar narratives. Other narratives remained current for some time; but whenever the question of authority was raised, the four gospels were ratified by universal consent. The testimony of Justin Martyr († 165 A.D., or earlier) is in this respect most important. An examination of his evangelic references shows that they were derived, certainly in the main, from St. Matthew; but each gospel is distinctly recognized by him, and he frequently quotes the protasis of St. John's gospel. Of other books of N.T. he mentions by name the Apocalypse only, and attributes it to "a certain . . . John" (Dial. c. Tryph. 81), and offers some coincidences of language with the Pauline epistles. The evidence of Papias (c. 140-150 A.D.), who was traditionally the only true apostle in Marcion's judgment, is of interest, but is too meagre. It seems clear that he was acquainted with our present gospels of SS. Matthew and Mark, the former of which he connected with an earlier Heb. original; and probably also with the gospels of St. John, the former epistles of SS. John and Peter, and the Apocalypse. Mean-}
authoritative and inspired, and co-ordinate with O.T.; as is proved by the testimony of contemporary Fathers of the Churches of Asia Minor, Alexandria, and N. Africa. Irenaeus (c. 177 A.D.), disciple of Polycarp, speaks of the Scriptures as a whole, without distinction of the O. or N. T., as "perfect, inasmuch as they were uttered by the Word of God and His Spirit." "There could not be," he elsewhere argues, "more than four gospels or fewer." Clement of Alexandria (c. 150 A.D.) regards "the apostle" as a collection definite as "the gospel," and combines them as "scripts of the Lord" with the law and prophets. Tertullian (c. 202 A.D.) notices particularly the introduction of the word Testament for the earlier word Instrument, as applied to the dispensation and the record, and appeals to the New Testament, as made up of the "gospels" and "apostles"; and in his Adv. Marc. analyses ten of St. Paul's epistles. This comprehensive testimony extends to the four gospels, Acts, 1 Peter, 1 John, 13 epistles of St. Paul, and the Apocalypse; and, except the Apocalypse, no one of these books was ever afterwards rejected or, until modern times, even questioned. This important as well as the principal contents of the Canon left several points still undecided. The E. and W., as was seen above, each received some books which were not universally accepted; and in other cases apocryphal or unauthentic books obtained a partial sanction or a popular use before they were finally excluded. Generally it may be said that of the "disputed" books of N.T. the Apocalypse was received by all the writers of the period, with the single exception of Dionysius of Alexandria, who questions its authorship rather than its canonicity; and the Hebrews were accepted by the churches of Alexandria, Asia (τ), and Syria, but not by those of Africa and Rome. The epp. of SS. James and Jude, on the other hand, were little used, and 2 Peter was barely known.

(3) From 303 A.D. to 307 A.D. The persecution of Diocletian was directed in great measure against the Christian writings, and was successful. Some were found worthy of protection by surrendering the sacred books, and, later, the question of the readmission of these "traitors" (traditores), as they were emphatically called, created a schism in the Church. The Donatists, whose judgment on their crime was the sternest, maintained in its strictest integrity the popular judgment in Africa on the contents of the Canon of Scripture; and Augustine allows that they held in common with Catholics the same "canonical Scriptures," and were alike "bound by the authority of both Testaments." The list of the 59th Council of the Council of Laodicea (c. 367 A.D.) omits the Apocalypse, but our present Canon of N.T. exactly agrees (f. of Theod. Studies, i. 558) with that of the Council of Rome (382 A.D.) and of the 3rd Council of Carthage (397 A.D.), from which time it was accepted throughout the Latin Church, though occasional doubts as to the Hebrews remained among the Syriac churches, representing the conservative East, retained the Peshitta Canon. Chrysostom († 407 A.D.), Theodore of Mopsuestia († 429 A.D.), and Theodoret, who represent the church of Antioch, furnish no evidence in support of the epp. of Jude, 2 Peter, 2, 3 John, or the Apocalypse. Junilius, in his account of the public teaching at Nicæa, places the epp. of James, Jude, 2 Peter, 2, 3 John, and the Apocalypse among the canon; and mentions doubts in the East as to the Apocalypse; and though Ephrem Syrus was acquainted with the Apocalypse, yet his genuine Syrian works exhibit no habitual use of the books not contained in the Syrian Canon. The churches of Asia Minor seem to have occupied a mean position as to the Canon between the E. and W. With the exception of the Apocalypse, they received generally all the books of N.T. contained in the African Canon. A festal letter of Athanasius († 373 A.D.) bears witness to the Alexandrine Canon. This contains a definite list of the books of N.T. as received at present; and the judgment of Athanasius is confirmed by the practice of his successor Cyril. One important catalogue yet remains. After noticing in separate places the origin and use of the gospels and epistles, Eusebius (c. 315 A.D.) sums up the results of his inquiry into the evidence on the apostolic books; as a translation of earlier works, or of the Apocalypse. The class of disputed books he subordinates into two parts, the first consisting of works already recognized, including the epp. of James, Jude, 2 Peter, 2, 3 John; and the second of those which he pronounces spurious, i.e. either unauthentic or unapostolic, as the Acts of Paul, the Shepherd of Hermas, the Apocalypse of Peter, the Apocalypse of John (if not a work of the apostle), and, according to some, the gospel according to the Hebrews. These two classes contain all the books which had received ecclesiastical sanction, and were in common distinguished from a third class of heretical forgeries (e.g. the gospels of Thomas, Peter, Matthias, etc.). At the era of the Reformations the subject of the N.T. Canon was much discussed. Besides the earlier views, with Erasmus, Calvin, and Luther, the latter from a purely subjective standpoint, expressed their doubts as to certain books, the reopening of the question resulted in the general acceptance of the old Canon. The language of the Articles of the Church of England with regard to N.T. is, however, remarkable. In the Articles of 1552 no list is given; but in the Elizabethan Articles (1562, 1571) Holy Scripture is defined as the "canonical Books of the Old and New Testament, of whose authority we never any doubt in the Church." (Art. vii.) This is followed by an enumeration of the books of the O.T. and Apocalypse; and then it is said summarily, without a detailed catalogue, "All the Books of the New Testament, as they are commonly received, we do receive and account them canonical." It seems, therefore, possible that the framers of the Articles intended, as in so many other matters, to leave a freedom of judgment on a point on which opinions were then divided. [Recent N.T. criticism does not call for much remark under this head, and is dealt with in the
articles on the several books. Harnack has taken the place of Paulus, Strauss, and Baur as the hero of the moment. His conclusions are different, but they are based on the same groundwork. It is true that in his latest work he condemns "the impressionism that is the ruling fashion of the day." But his own works are conspicuous examples of this "impressionism." He has been forced, indeed, to admit that, in the matter of dates, at least, criticism is "gradually returning to the traditional standpoint." But he still disputes the authority of the N.T. writers, though on purely subjective grounds. Historical testimony, among writers of his school, is ignored or evaded. They depend on the ingenious invention of difficulties and contradictions in the subject-matter of the writers with whom they deal. Harnack promises us further "startling discoveries" by methods of this kind. We are confident that they will prove, as previous discoveries of a like kind have proved, but a "nine days' wonder." The principle on which we may dismiss them is, that a society such as the Christian Church was not likely to accept the N.T. of the age of Solomon, were the genuineness of those title-deeds we have evidence such as no other records in the world can show. On the traditional side the fullest account of the Canon will be found in Westcott's Canon of N.T.; Salmon's Introduction to the N.T.; Scrivener's Introduction to the Crit. of Canon; and, perhaps, most of all, in the Harnack, natural Religion. On the side of modern criticism there are a vast number of recent books, bearing more or less on the subject; but those which have found the widest acceptance are the works of Harnack. [J.-L.]

**Canopy** (Ith. 10. 21, 13. 9, 16. 19). The canopy of Holdernes is one of the library. Although, perhaps, the "pillars" of the latter described in Can. 3. 10 may indicate that its equipment included a canopy. It probably retained the mosquito nets or curtains which gave it its name (κανωντερ. from κανων, "gnat"). Although its description (Ith. 10. 21) betrays luxury and display rather than such simple use.

**Canticles**, or Song of Solomon: Vulg. Can- ticom Canticorum, from Heb. shir hashshirim, "Song of the Songs," i.e. the best or most beautiful of songs. It was apparently not without some hesitation that the Jews placed this exquisite but obscure poem in the Hagio- grapha. Once admitted to the sacred canon, however, it became invested with peculiar sanctity, for, like the book of Ezekiel, it was not allowed to be read by any before the age of thirty; and it gained the dignity of being included in the five Megilloth (or Rolls) read liturgically on the great Jewish festivals. The Song was read thus on the 5th day of the Passover (cf. the use of 2. 10-17 as the 1st lesson at Evensong on Easter Monday in the Anglican Calendar). Passing with the other books of the Hebrew canon into the service of the Christian Church, the Song became a favourite study of mediaeval devo- tion. S. Bernard of Clairvaux left 86 sermons on Cant. 1. 3. 1. Thomas Aquinas even on his deathbed was besought by the monks of Fossa Nuova to undertake a commentary on it.—Authorship and Date. The title (1r) need not of necessity have more authority than the titles of the Psalms. It expresses simply an ancient tradition of the Hebrews, that the allusions in the Song to Solomon are the prophecies of the "one thousand and five" songs attributed to Solomon by R. 4. 32 may be sufficient to account for. Modern scholars have assigned widely different dates. Deane believes it to be the work of some prophet contemporary with Solomon, and intended for that king's reformation. Driver (so also Stiebel and Oetlii) considers it to belong to a time not long after the division of the kingdoms. On the other hand, many (e.g. Graetz, Roth- stein, Cheyne) consider it post-Exilic. The scenery is mostly that of the northern kingdom (see frequent allusions to Lebanon in ch. 4, 8, 7; to Tirzah, 6. 4; to Baal-hamon, 8. 11; and to vineyards generally). Some of its peculiar words are usually explained as belonging to the northern dialect. The freshness and vigour of its imagery, the glow of its passion, might naturally suggest an early period of literature, and would fit in with the time of Solomon. But the genuineness of these phrases themselves suggests that the author himself possibly has been its author. We may, perhaps, will depend considerably on the view taken of its literal meaning and purpose.—Scheme. The Song has been regarded by some (e.g. Herder, Budde, Cheyne) as without dramatic unity, being rather a loose collection of love and marriage lyrics. The modern criticism shows that the Song is a dramatic poem, having pure wedded love for its theme. Here again agreement ends, and not unnaturally, for little is known of Hebrew dramatic poetry. There are no external divisions of speeches, nor any names of characters prefixed. There is, however, a distinction in the Heb., which cannot be represented in an Eng. version, between the speeches of the "bride" and "bridegroom," made by the use of the 2nd pers. poss. pronoun masc. and fem., and in some MSS. of the LXX. the dramatis personae are inserted throughout the book. Hence it is possible to divide the Song in various ways, and even to construct entirely other versions. But there are two main schools of literary interpretation. 1. (Supported by Delitzsch and Orelli.) Two principal characters, Solomon and a country maiden of great beauty and simplicity, called Sulamith or the Shulamite. The court ladies form a sort of chorus, which comments on the course of events. Solomon is assumed to have discovered the Shulamite and won her love, while disguised as a shepherd. The play opens with her introduction to his harim in Jerusalem: the dialogue describes the course of their courtship, the purpose being to glorify monogamy, in contrast with the polygamy of Solomon. The speeches of the king are said by some to show a gradual elevation of tone, as he learns more of the maiden's character. The royal wedding takes place between ch. 4 and 5, and they return together to the old scenes of rural beauty, where among the vineyards and the flocks they had first loved each other. The poem ends with a panegyric upon the pure wedded love of one man for one woman (8. 6, 7). (2) (Originated by Jacob in 1771, though partly suggested by Ibn Ezra in 12th cent., and
CANTICLES

Je.2.2

supported by Ewald, Driver, and most modern scholars. There are three characters in addition to the chorus, Solomon, the Shulamite, and an unnamed shepherd-lover, to whom the maiden responds faithfully in spite of the entreaties of Solomon, and to whom she is eventually allowed to return. This view has much to recommend it from the dramatic point of view. Instead of a marriage with the king in 4.10-5.1, the drama leads up to a triumphant consummation in ch. 8 in the meeting of Solomon and the lovers (vv. 1-2) in the praise of the maiden's Chastity (vv. 6, 7), and the vindication of the maiden's chastity (vv. 8-12). The ethical value of the drama is much clearer than in (1)

True love triumphs over fear and the seductions of the court. A parallel has been pointed out in the Arabic story of the loves of Hamada and Habib (Wetzstein, Zeitschrift der Deutschen Morgenländischen Gesellschaft, xxii. [1868], p. 75); the former is on the point of marriage with her cousin Ali, when the real state of her affections is disclosed, and she returns to her true lover. It has also been suggested that the starting-point of the story may be found in that of the fair Shulamite Abishag, who preserved her purity at the court of David and Solomon, and disappears from the history after 1K.2.22, presumably returning then to her old home. Yet (2) is not without great difficulties. To some its very completeness and its modern flavour will be arguments against a too ready acceptance, and (5.1) is still very obscure. A marriage certainly seems to be assumed here. On the shepherd-lover theory, however, Solomon at this point discovers the truth, and retires from the stage. On the other hand, there is a curious unreality about the whole movement of the drama on theory (1); and the supposed conversion of Solomon to a purer love is by no means clear. The literal interpretation of the Song cannot yet be regarded as satisfactorily solved.—Spiritual Interpretation. It was universally believed by the later Jews that the poem was a designed allegory of the love of Jehovah and His people Israel, conceived in the ritual of the liturgical life of the O.T. Ezek. 16: 1-5; Jer. 2:2; Ezek. 16: 1 Ho.2, etc. It was even visualized as an allegorical account of the whole history of Israel from the Exodus onwards. Origen introduced this conception into the Christian Church, and it dominated all the primitive and mediæval Catholic interpretations. Theodoret of Mopsuestia was even more strongly opposed by the 5th General Council (553) for deeming that the Song had any but a literal meaning. Most modern scholars reject any allegorical purpose in the Song, and assume that its ethical motive is its sufficient justification. It certainly cannot be proved that any allegorical meaning was in the mind of the writer, nor does it seem prima facie at all necessary or even likely. Nevertheless, the practically universal feeling of both the Jewish and Christian Churches ought not to be disregarded. And the controversy between allegorists and literalists does not touch the question of how the Song of Solomon in the O.T. is typical of and preparatory to the Incarnation. But it is not necessary, in order to justify this, either to allegorize or ignore the plain literal meaning of the text. The original purpose of the Song, the glorification of pure wedded love, in accordance with God's creation, is a sufficient starting-point for a higher and fuller meaning in spite of the marriage of Solomon or the shepherd-lover may be seen a type of the Son of God (cf. 2.8-10); and in the Shulamite a type (a) of the Church of God in every age, her desires, her dreams, her struggles, and her triumphs; (b) of the B.V. Mary, the epitome and flower of the Church; (c) of the Christian soul, living over in its Church's experience. Thus the great poem of love and spring-time not only rightly finds its place in the Canon, which has room for every side of human nature, but is also eloquent of God's great purpose of the restoration of human nature and of the second spring of the Resurrection. To deny the possibility of spiritual interpretation would be tantamount to denying the connexion of the O.T. with the Incarnation, or indeed its general inspiration. Ginsburg, Song of Songs (1857); Ewald, Dichter des A.B.s (1867); Renan, Le cont. des cantiques (4th ed. 1870); R. F. Littledale, Comm. on Song of Songs (1860); Graetz, Shirk ha-Schim (1864); A. A. Driver, Intro. to Lit. of O.T. (1894); H. Deane, Smith's D.B. (vol. i. new ed. 1893); Rothstein, Hastings's D.B. (vol. iv. 1902); Cheyne, Encyc. Bib. (vol. iv. 1903). [A.R.W.]

Canticles of N.T. [Hymns.]

Caper (Heb. abbyyôn). This word occurs only in Ec. 12.5, where the A.V. reads "desire shall fail" (concipiscence, Geneva version), but in Wyclif it stands "the erbe capers shall be scattered," or "and caparris schal be dis- tried." This meaning has been restored by R.V. The caper was regarded as a stimulant to the appetite, which was no longer of service when the body was too weak to receive it. "Caper-berry" of R.V. introduces an old blunder, since the part made use of as a condiment or pickle is the unopened flower-bud, not the berry. Capparis spinosa is a small, prickly, trailing shrub, usually clinging to walls, ruins, and dry rocky places. It may be seen near Jerusalem and in the Jordan Valley, and often in the Sinaitic peninsula (Wady c' Ain, etc.). Some writers have endeavoured to prove that herbs (q.v.) was the caper; chiefly, perhaps, because it grows on walls. [N.C.H.]

Capernaum (Sinai M.S. Capernaumn, apparently "village of Nahum." Our Lord's "own city" [Mt. 9.1]), in Galilee (Lu.4.31), on the coast of the sea of Galilee (Mt.4.13), and apparently in the plain of Gennesaret (Lu.6.17. cf. Mt.14.31). It was apparently at least 4 Roman miles from the N.E. shore of the lake or shore S. of Bethsaida (Julias), which agrees with the situation of Capernaum on the route from the Sea of Galilee to Cana and Nazar- eth (Lu.4.31 ; Jn.2.12), and not on a height—according to the Sinai MS. reading (Mt.11.23 ; Lm.10.15), "Shalt thou be exalted to heaven?"
It was in Naphtali, while Nazareth was in Zebulun (Mt.4:13; Is.8:1). It had a synagogue (Mk.1:21; Lu.4:33; Jn.6:59) built by a Roman centurion (Lu.7:1,5); and was a military station, and a town where taxes were levied (Mt.9:9, etc.). In the Midrash (Qoheleti vii. 20) Caphar-nahunam is noticed as the town of minim, or Christian "heretics." It is perhaps the Capernaum to which Josephus was carried when wounded at Julias (Life 72). He says that the fountain of Capernaunm watered the plain of Gennesaret (3 Wars x. 8), which applies to the 'Ain el Madoverah, or "round spring," especially because the Coracinus fish, which he notices in the Capernaunm fountain, still exists in the latter spring. In visited it in 1334, and found there a "tomb of Nahum." He says (probably following the Midrash, as above quoted) that it was once inhabited by minim (heretics). Quaresmius in 1626, and Robinson in 1852, advocated a site called Minieh, which might be named after the minim, by a spring close to the shore in the N.E. corner of the Gennesaret plain; and, as being on the shore, and on the Roman road where the cutting would form a good station for a guard and a custom house, this site seems most suitable. The descriptions of early travellers are vague after 530 A.D., and it is doubtful to which of the two sites they refer. But they have no real authority, and the Jewish tradition is preferable. [c.r.c.]

CAPPADOCIA

Caphar', one of the words employed in the Bible to denote a village; the modern Arabic Kefr, "hamlet." In names of places it occurs in Chephar-haamonai, Chephirah, Caphar-salama, and Capernaum. [c.r.c.] Caphar-salama (1Mac.7.31), a place where Judas Maccabaeus in 161 B.C. defeated Nicanor, who fled back to Jerusalem; apparently in Judaea (7.24). Possibly Selme, a village 3 miles E. of Joppa. [c.r.c.] Caphenatha (1Mac.12.37), a place so called on E. side of Jerusalem. Probably the Aramaic Kaphenatha (heap), equivalent to Heb. Ophel (mound). [c.r.c.] Caph'ira (1Esd.5.19). [Chephirah.] Caphtor' and Caphtorim' (Gen.10:14; Deut.2.23; 1Chr.1.12; Je.47.4; Am.9.7). All these references concern the Philistines, who are said to have come from Caphtor, but were perhaps not Caphtorim. Caphtor is generally thought to be Crete. [Philistines; Cappadocia] [h.m.s.] Cappado'cia (Ac.2:9; 1Pe.1.1), the mountain region of E. Asia Minor immediately N. of Syria. In the time of the Apostles it had a Jewish population dispersed among the natives. The capital was at Mazaka (shrine of Ma), the later Caesarea. The researches of Ramsay, Hogarth, and Chantre (Mission en

SEA OF GALILEE, FROM TELL HUM. (From an original sketch by Col. Conder.) W.D.A.
CAPTAIN

Cappadoc. (1893–1804) show an early population akin to the Hittites speaking an agglutinative language. The Akkadian tablets, early as about 3000 B.C.—with Babylonian traders whose tablets are in Semitic language and cuneiform script. In and after the Persian period there was also a strong Persian element, and the Cappadocian calendar was Persian. Tablets in Persian cuneiform were also found by the excavators at Eshnunna. The Romans left texts and temples, and the Jews were introduced as colonists by Seleucus I. The LXX. (Deut. 2:23; Am. 9:9) renders Καρπιντορ by Kappadokia, and makes the Philistines (who were Semitic, and adored the Babylonian god Dagon) Cappadocians originally, which is possible as there was an early Semitic population in this region. Cappadocia is a grazing mountain-plateau, deficient in wood, and producing grain. Ptolemy extends its W. limits even to include Iconium. The Babylonians called this region Kat-pad-aka, apparently Akkadian for "great north region." [c. 10 B.C.]

Captain answers usually to सूर or αδίκη, both used of civil as well as military officers. "Chief captain" (χαλαρός: Ac. 21:31, etc.) represents tribunus or "coloneal." [Army.] Lysias commanded the Roman garrison of Jerusalem, the "band" or cohort. "Captain of the guard" (στρατηγὸς ἐν θέρμῃ: Ac. 28:16) means either prefect of the praetorians or the prē̄̂πος Πρεσβύτερος, head of the couriers R.V. omits clause. The "captain of the temple" (οἰκονόμος τῆς ἱερατίας: Ac. 4:1, etc.) commanded the priests and Levites and kept order in the temple. For "captain [ἀρχικύριος] of our salvation" (Heb. 2:10) R.V. has "Author," as 12:2, but "Prince" in Ac. 3:15, 5:31; lit. "leader." [i.e.]

Captivities of the Jews. The term captivity is applied to the deportation of the people of Israel and Judah by their conquerors. —I. Israel. Rezin king of Syria, and Pekah king of Israel, laid siege to Jerusalem. Ahaz king of Judah appealed for aid to Tiglath-pileser (Pulu, or Pull), king of Assyria, to whom he was vassal (2K. 16:5–9). In 723 B.C. the king of Assyria sent against Hanoe of Galula, as stated in the Eponym Canon, and, apparently, on that occasion went against Damascus, and, having taken it, punished the kings of Syria by annexing a part of their territory (15:29), and deported the inhabitants to Assyria. A few years later Hosea, the last king of Israel, revolted against Assyria, and sought help of So (Sabaka) king of Egypt (17:4). Thereupon Shalmaneser IV. laid siege to Samaria in 724, and the city was taken in 722 by his successor, Sargon (Smith, Assy. Canon, 201). It is not necessarily implied in 17:5, 6, 18:9,10, that it was the Shalmaneser who brought the siege to a close. After the fall of Samaria the inhabitants were deported to Media and Gozan, in Mesopotamia, their place being taken by colonists from Babylon, etc. (17:21). Thus ended the Northern, or Ephraimitic Kingdom.—II. Judah. Jehoiakim, king of Judah, having withdrawn from allegiance to Babylon, marauding bands were sent against him, until the regular army could lay siege to Jerusalem. Meanwhile, he died and was succeeded by his son Jehoachin, who after three months' resistance submitted to Nebuchadnezzar. He and 10,000 captives, including the chief men of the kingdom, were carried away to Babylon. This occurred in the year 597 B.C., and was the beginning of the Babylonian Captivity (24:1–16). Ten years later, in 587, Jerusalem was a second time besieged by Nebuchadnezzar, to punish Zedekiah for breaking his oath of fidelity. The siege lasted about a year and a half, and the city fell on Tammuz 9 [Montius], 586 B.C. Zedekiah and the army left the city by night and sought to escape to some place of safety in the Jordan Valley. They were overtaken in the plains of Jericho, and the king captured. He was taken first to Riblah, where his eyes were put out, and then he, with the rest of the people, including those who had sought refuge in the Babylonian camp, were carried to Babylon. A certain number of the poor were left behind to till the land, and about eighty of the principal men, among whom was Seraiah the high-priest, were put to death. The city was destroyed by fire on Ab 10; and the gold, silver, and brass were taken to Babylon (2K. 25:11; Je. 39:11, 15, 22:26, 37; Ezk. 24:11 ff.). A third deportation of Jews to Babylon took place by order of Nebuchadnezzar in 582 B.C. (Je. 52:30). There is some difficulty in the texts as to the number of exiles given in 2K. 24:14, 16 and Je. 52:28–30. According to the former there were 10,000 in 597 b.c., and according to Je. one only, 3,023, with 832 in the deportation in 586 B.C., and 745 in 582 B.C., making a total of 4,600. The smaller numbers probably count men only, but even then seem far too small to account for the denudation of the land.—III. Duration of the Captivity. The exiles from the northern kingdom never returned as a community. The beginning of the restoration of the Jews in the year 536, when they returned under the leadership of Zerubbabel and Jeshua, is based on the act of permission which was given by the Edict of Cyrus (Ezr. 1). The number of those who returned is given as 42,360 (2:64). If the period of the Exile is reckoned from the deportation in 597 it was 67 years, but if from the destruction of Jerusalem, in 586, then only 50 years. No system of computation gives a complete of years (Je. 29:10); but see Chronology for another view.—IV. Condition of the Exiles. It is not known how the exiles were distributed in the province of Babylon—i.e. whether they were scattered or permitted to live in defined districts or towns (cf. Est. 3:8). They were regarded rather as colonists than captive slaves, and were permitted to build their own houses, cultivate their land, and live the family life (Je. 29:5–7). They might attain to the highest offices of state (Dan. 2:8), or discharge functions which brought them into close contact with the king (Ne. 1:11). They observed fast-days (Is. 58:3), and their religious laws and customs generally (Esth. 3:8). [n.h.]

Carabasion, a name to which it is difficult to find anything corresponding in the Hebrew text (Esth. 9:31).

Carbuncle represents in L.V. two Heb. words. (1) ʾeqāḏīh occurs only in Is. 54:12, in
the description of the beauties of the new Jerusalem. The term may be a general one for any bright sparkling gem, but it is impossible to identify it with certainty from this single occurrence. (b) bēregheth, bār-gath, the third stone in the first row of the sacerdotal breast-plate (Ex. 24.17, 39.10), also one of the mineral treasures of the king of Tyre (Ezk. 25.13). Braun supposes that the smaragdus is meant. This name generally, but not invariably, means the same as that of the Roman smaragdus, which was short-sighted, used an eyelash of smaragdus, from which some have thought the term must include other minerals, such as the rock-crystal. But it seems clear (Nat. Hist. xxvii. 16) that he means the emerald, so it was probably a pale variety approaching beryl. The caruncle (Gr. ērōph) is the same as the Romans and Persians. The name is applied to blood-red varieties of the spinel and garnet. The first name was known to both the Pharaohs and Pliny, but is not likely to be seen by modern writers, and its hardness would then have baffled the engraver. [R. N.]

Carcas, seventh of the seven "chamberlains" (r.ea umm nvk) of King Ahasuerus (Esth. 1.10).

Carchamis. The form in A.V. of rESd. 1.25 of Carchemish, though some editions here read Charchamis.

Carchemish (2Chron. 35.20, R.V.; Is. 10.9; Je. 46.2), a Hittite city on the Euphrates, W. of Carchemish, now the site of the modern city of Tishrāt, where G. Smith found Hittite monuments now in the British Museum. The famous temple of the Dea Syria described by Lucian stood here. It was the scene of the decisive battle (607 B.C.) in which Nebuchadnezzar defeated Pharaoh Necho. The ruins lie W. of the river, and Hittite monuments still lie among them. In the 12th cent. B.C. Tyautopileser 1. passed Carchemish after swimming his soldiers over the Euphrates on inflated skins, or small rafts such as are still used. In 870 B.C. Carchemish, the Hittite king of Carchemish, submitted to Assur-nazir-pal of Assyria. In 744 B.C. Pisisir of the same city was tributary to Assyria. Sargon attacked Pisisir, and took the city, and the Hittites away as captives. The fall of the fortress opened the way for Assyria to Palestine. Hittite princes in this region are, however, mentioned in a text of Nebuchadnezzar as late as 600 B.C. [C.R.C.]

Careae (2K.25.23), elsewhere KAREAH, as R.V. here.

Cari'a, the S. part of the region which in N.T. is called ASIA, and the S.W. part of the peninsula of Asia Minor. In the Roman times the name of Caria was probably less used than previously. In 139 B.C. it is mentioned as a separate district (Mac. 15.23); it was then enjoying the privilege of freedom from taxation enjoyed by the Romans. A little earlier it had been assigned by them to Rhodes, and a little later was incorporated in the province of Asia.

Carmenians (2Esd. 15.30). As referring to conditions about 100 A.D. [see 10.45], this probably alludes to the Parthians of Kerman or E. Persia, the successors of the Hidrutonians (i. 125). The Parthians opposed Trajan on the Assyrian frontier in 116–117 A.D. [C.R.C.]

Carm'el (rEsrd 5.25) = Harim, 2.

Car'mel (forest or wood).—1. A city of Judah in the Hebron mountains (Jos. 15.55; Josh. 15.54), near Maon and Ziph. Now called Kernil, with a conspicuous mediaeval tower, 7 miles S. of Hebron. Saul, on his way from the S. desert to Gilgal, here erected a "hand" or monument (1Sam. 15.12) as a memorial of victory. It was a grazing country (25.5, 5.7, 40), as it still is, and had vineyards also (2Chr. 26.10). It is mentioned in the 16th cent. B.C. by Thothmes III. (No. 96), and a century later in one of the Amarna letters (Berlin 109).—2. Mount Carmel is the ridge running S.E. for 15 miles, from Haifa and the promontory which it forms at S. end of the bay of Acco. It rises from about 400 ft. at this promontory, to about 1,800 ft. near its S.E. limit, where the ground falls rapidly towards the sea. The N.E. side are very steep, and the Kishon runs at the foot of the mountain on this side. The S.W. spurs are much longer, stretching to the sea plain. The sea is visible from all parts of the ridge. The mountain is densely clothed with copse of mastic, dwarf oak, hawthorn, and stunted shrubs. Solomon's queen was luxuriant as Carmel, and dark as the "purple" fished in its bay (Can. 7.5). The scene of Elijah's sacrifice is supposed to be at the Mahragah (place of burning), a cliff near the S.E. end of the ridge, 1,687 ft. above sea level, and about two miles N. of the sea. It is from this spot, where the mountain is abruptly detached from the sea cliffs, that the sea, rushing towards the land, gives this mountain its name. There is a well just below the cliff, whence water might have been drawn high up on the mountain, and the prophet's servant ascending thence to the cliff top saw the sea (I Kings 19.18, 33; 40, 42, 43). Carmel was by the sea (Jos. 19.26): the retreat also of Elisba (2K. 2.25); a mountain (4.25) with a forest (19.23) or cedars. It was celebrated for the luxuriance of its growth (Is. 35.2, 3.27, 24; Je. 48.18.50.19; Am. 1.2.9.3; Mi. 7.14; Na. 1.4), and a natural hiding-place (Am. 9.3). Jokneam (Jos. 12.22) lay near its foot. The "nations of Carmel" are noticed in Jth. 1.8. Tacitus says that a god called Carmel was adored on this mountain without a temple (Hist. ii.). Pliny says it was the name of the god and of the shrine (Hist. Nat. xxxi. 2). [C.R.C.]

Carmelites, a native of Carmel. Applied to Nabal (1Sam. 30.5; 2Sam. 2.3, 3.3) and to Hezrai or Hezro (2Sam. 23.35; 1Chr. 11.37).

Carmelites, a woman of Carmel. Applied only to Abigail, wife of David (1Sam. 27.3; 1Chr. 3.1) and formerly wife of Nabai. [Carmelites.]

Carm'l, the fourth son of Reuben and progenitor of the family of the Carmites (Gen. 46.9; Ex. 6.14; Num. 26.6; 1Chron. 5.3.—A man of Judah, father of Acham (Jos. 17.18; 1Chr. 2.7.4.1), the son of Zamri, 1.

Carnaim, Carnion. [Asherithoth Karna'im.]

Carpenter. [Handicrafts. 3.]

Car'pus, a Christian at Troas (2Tim. 4.13). Carriage. This word occurs ten times in the text of A.V., and sometimes now called "baggage," and represents three Heb. and three Greek words (i) kelim (1Sam. 17.22 bis; Is. 10.28), generally translated "stuff" or "vessels"; = Gk. οξεβος.
Wagons were also used in Egypt (Gen. 45:10,27) to convey women and children. Carts carried the corn to the threshing-floor (Am. 2:13), and were used even in the desert (Num. 7:3); but the "cart wheel" (Is. 28:27) is probably a mistranslation. [Harrow.] [C.R.C.]

Carrying. [Handicrafts, 3;]

Carshena, one of the seven princes of Persia and Media (Esth. 1:14).

Cart (Heb. ḥēḇēhāḥ). Though wheeled vehicles are not now used in Palestine, carts with two and with four wheels appear on early Babylonian and Assyrian monuments, as drawn by oxen (Is. 6:10; 2 Sam. 6:3).

CARSHENA

(2) ḥēḇēdā (R.V. goods), Judg. 18:21 only.
(3) The word rendered "cartriages" in Is. 46:1 means "things carried." (4) ἁπαρτία ([Ith. 2:17,5:30].) (5) ἅπαρτιον (I.Mac. 9:35,39). (6) ἔπαρτοναμάρα ([Ac. 21:15].) In the marg. of 1 Sam. 17:20 and 26:5—and there only—"cartriage" is employed in the sense of a wagon or Cart. [Encampment.]

Carshena, one of the seven princes of Persia and Media (Esth. 1:14).

Cart (Heb. ḥēḇēhāḥ). Though wheeled vehicles are not now used in Palestine, carts with two and with four wheels appear on early Babylonian and Assyrian monuments, as drawn by oxen (Is. 6:10; 2 Sam. 6:3).

CASTOR AND POLLUX

He made a "bridge" (Schedia, 3 Mac. iv. 11) to attack Caspis. The rum Kuseifeh, 4 miles S.W. of the lake, is a possible nature, as this was marshy in spring—and the road thence to Kerak (50 miles in a direct line E.) might be estimated at 100 miles. [C.R.C.]

Cassia, the representative in A.V. of two Heb. words. (1) qidād occurs in Ex. 30:24, as an ingredient in the "oil of holy ointment"; and in Ex. 37:19. The accounts of cassia as given by ancient authors are confused. It is clear that the Lat. writers understood the term cassia both the Oriental product now under consideration, and some low, sweet, herbaceous plant; but the Gk. word is limited to the Eastern product. Dioscorides mentions several names, as produced in Spicy Arabia. One kind is known by the name of masyetstis, or, according to Galen, of mosyllos, from the ancient city and promontory Mosyllon, on the coast of Africa and the sea of Bab el Mandeb. This fact probably suggested the "Mezal" of A.V. marg., but the names are not equivalents. In this wonderful account of the trade of Tyre in Ezek. 27:10 there is considerable variety of reading, but perhaps "both Dan and Javan" (= Ionia) belong to ver. 18, and we should then read "From Uzal [in Sheba; LXX. ζ' Ἀραχί] of. R.V. marg.], they occupied thy fairs," etc. The R.V. (text) "with yarn" is not probable. The cassia would be brought from Sheba to Tyre, and then exported to Tyre and elsewhere. Cassia is not produced by any trees now found growing in Arabia. Gk. authors sometimes mistakenly regarded products imported into Arabia, and thence exported northwards to other countries, as the natural productions of that country; hence may appear in the case here, though that cassia may have grown there formerly is the more probable if the masyetis was grown on the shore of Somaliland opposite, and not merely imported to Mosyllon. Cassia may be regarded as inferior cinnamon, chiefly obtained from the bark of Cinnamomum cassia, and known as Cassa or Cista indica, native in Cochinchina, and belongs to a family including also the bay-tree and the camphor. Harris quotes the opinion of Scæcclus, "that by qidād we are to understand that fragrant composition extracted from a plant which the ancients called cassia and it appears from Propertius (lib. iv. c. 5) that it was used on the altars, together with frankincense." Pliny describes "Cassa or Canell" at length. He says "the blacke is most employed in sweet perfumes and ointments. There is no drague that variet more in price than the Canell; for whereas the best will cost little deniers Romane a pound; all the rest a man may buy for five." (xii. 16.) His account of their transport and preparation is full of interest. Herodotus (iii. 107, 110) and Diodorus (iii. 3) say that cassia came from the shores of Arabia. (2) qidād (Ps. 45:8 only) is generally supposed to be another term for cassia. The old versions as well as the etymology of the Heb. word, favour this interpretation. [H.C.N.]

Castor and Pollux. The Dioscuri, as the Greeks called them, were, according to a later legend, the twin sons of Jupiter and
conical caps with stars above their heads. Their sign was sometimes seen on ships, as in Ac.28.11, where a ship of Alexandria is mentioned as bearing the sign of the Twin Brothers.

**Cat**, mentioned but once in Scripture (Ba.6:22). The Gk. word ἀλατος, which refers to a domesticated animal and is commonly translated “cat,” really indicates the marten, or marten-cat; and it is not till Byzantine Gk. that we meet with the word σατρα, or κάτρα, used to designate domesticated cats imported from Egypt, where the African wild cat (*Felis ocreata*, or *maculata*), was tamed, worshiped, and eventually embalmed, as at Bubastis. Possibly this cat may occur in Syria, where a variety of the European wild cat (*Felis catus morea*) is met with.

The general opinion is that the passage in Baruch relates to wild cats.

**Catechizing.** The word κατηχέω occurs 8 times in N.T.: twice in the ordinary sense of giving information (Ac.21.21,24), elsewhere of instruction (Lu.1.4.; Ac.18.25; Ro.6.18.; 1Cor.14.19.; Gal.6.6.). In Lu.1.4., Ac.18.25, R.V. must be translated “taught” by word of mouth, and it evidently has that meaning, as distinguished from the common word διδασκω. Teaching cannot help beginning with catechizing, which no doubt underlay the whole system of education in O.T. and N.T. (Education.)

Cf. Herbart, Science of Education: “From first to last, that form of preparation in which the teacher alone takes part, which subjects the pupil to discourses by him, and which the pupil must silently follow, must be declared inadmissible.” The catechetical method, however, was not methodized by those who first used it. It is commonly called the Socratic Method; but we must understand that, in contrast to what is now called ‘method,’ it rose not in the consciousness of Socrates formally as method—and in abstraction, therefore, from every concrete case—but that it had spontaneously grown up with the very mode and manner of his philosophizing” (Schwegler, History of Philos. xii. 6.). The incessant questioning of Socrates has been divided into (1) mątic (an assumed ignorance which evokes from the person questioned statements by which he is eventually overthrown; (2) the maieutic method: where the Socrates likened himself to his mother Phae- narete, a midwife, because he “helped to birth his pupils’ intellectual throes.” The subject of the philosopher’s catechizing is the authority of an answer, because it is the foundation of the “method” of a greater teacher even than Socrates. Our Lord was continually asking questions, He catechized more than any other teacher, and His “method”—though entirely unconscious, as in the case of Socrates—may be systematized to a limited degree. (1) He evokes evidence by questions, so that they were afraid to meet Him. “The baptism of John, whence was it?” “Why did David call him Lord?” “Whose is this image, etc.?” “For which of those (good) works do ye stone me?” “The whole passage is a condensed account of an inductive Socratic discourse (Ju.132-38); to be noticed (2) that our Lord enforced the most important doctrines by questions. His first recorded words are two questions, and assert the most important doctrine of all—His divinity. Cf. “Whom do men say that I am?” “Whom do ye say that I am?” “What think ye of Christ?” “Do not the eyes of the earth take tribute?” “Why callest thou Me good?” “Whether is easier to say, etc.?” Also that remarkable discourse on the way to Emmaus—the record of which one longs for more than for anything else unrecorded in connection with the question “Ought not Christ to have suffered these things?” (Lk.24.27.)

Cf. “Dost thou believe on the Son of God?” (Jn.20.28.)

(3) Our Lord used the catechetical method, more than any one else has ever used it, to draw people to Himself. This category begins with the first words to the disciples, “What seek ye?” it develops to the “Whom seek ye?” of the Resurrection morning, and the “Loves Me?” to His chief apostle; and is not complete till the ascended Christ asks His final question, “Saul, Saul, why persecutest thou Me?” “Will ye also go away?” “It is to be noticed too, that our Lord attimes asked for information which was of use not to Him but to the person questioned. In Luke we have such questions, as “Lazarus and Mary and Martha; Whence shall we buy bread?—This He said to prove him; for He Himself knew what He would do” (Jn.6.5,6). Similar questions were asked concerning the lunatic, “How long is it ago since this came upon him?” and Lazarus, “Where have ye laid him?”

The catechetical method of our Lord’s teaching is equally recorded in all four gospels: the psychology of His teaching is a subject which repays study, and proves that He spake as never man spake. It is not without purpose that the cry of the heathen world was expressed to Him, by the most important representative of it whom He ever met, in a question, “What is this that we see?” (Jn.6.1.)

**Caterpillar.** The translation in the A.V. of the Heb. חָשָׁל and (in three passages) yeleq. The former occurs in R.K.8.37: 2Chr.6.28; Ps.78.46; Is.33.4; Jl.1.4.2.5.; in most cases in connexion with “locust.” From this association it has been suggested that the term has been transferred to refer to immature locusts, or locusts in the pupal and larval conditions, when, although wingless, they are even more destructive to
vegetation than the adult insects. For יכֵּכָה, see Loeb. 1138.

**Cathua** *(Ezd.5:30) = Giddeh, t. r.*

**Cattle**. In ancient Heb., as in mod. Eng., several terms were used to designate domesticated cattle, according to sex, age, etc. Although each appears to have had a more or less definite meaning, they are frequently translated indifferently in A.V. as bull, cow, ox, or bullock. Among these the more important of these terms, הָּבָּה (derived from a root signifying to cleave, and hence to plough: or perhaps referring to their cloven hoofs) seems to be properly used for adult cattle of either sex, especially those suitable for ploughing. It is translated bullock in Josh.25:10, Ho.6:3, etc.; for draught purposes, when they were generally yoked in pairs (Num.7:3, Is.34:7, and Jer.50:11). No animals in the rural economy of the Israelites were held in higher esteem than cattle, on whose labours depended the ordinary operations of farming. Oxen were used for ploughing (Deut.22:10; 1Sam.14:11, etc.), for treading out corn (Josh.3:10, 2Sam.15:3, etc.), for draught purposes, when they were generally yoked in pairs (Num.7:3; 1Sam.6:7; etc.), as animals of burden (1Chr.12:30). Their flesh was eaten (Deut.14:4; 1K.1:9, etc.); they were used in the sacrifices; and the cows supplied milk, butter, etc. (Deut.32:14; Is.57:22). Among the Phoenicians the importance of oxen in these respects are the laws enacted by God for their protection and preservation. The ox that threshed the corn was not to be muzzled, and was to enjoy its rest on the sabbath (Ex.23:12; Deut.5:11). The law prohibiting the slaughter of any clean animal, except as an offering unto the Lord before the tabernacle," during the time that the Israelites abode in the wilderness (Lev.17:1-6), contributed to the preservation of oxen and sheep. It seems clear from Pr.15:17 and 1K.4:23 that cattle were sometimes staffed, though this was probably not the rule. Humped cattle, or zebu (Hos.11:10), were kept in Syria, where there were also breeds of ordinary humpless cattle (Hos.7:8, one of which was "polled," or hornless. The long-horned humpless cattle of ancient Egypt have been referred to a distinct species by the present writer, under the name of *Hos.24:9*. The domesticated Indian buffalo (Hos.2:8), now common in Syria and Palestine, appears to have been unknown there in early Biblical times. For a full account of the various breeds of cattle kept in Syria and the neighbouring countries in Biblical times, see Dr. J. U. Dürst's *Die Rinder von Babylonien, Assyrien, Arzhen* (Berlin, 1899). Dürst shows that the phrase "the cattle of Bashan" indicates the extinct wild ox, or aurochs, elsewhere probably denoted by "unicorn," the A.V. translation of רֶעָם. *Calf; Unicorn.*

**Caul** (שְׂבִּישַׁס). Only used in Is.8:18 (in plur.). It was a little glass ornament (strictly speaking an amulet) worn at the neck, like a locket. A.V. also renders the Heb. יְחוֹרֵת by "caul." This was a fatty substance which hung to the liver, and is referred to in connexion with the sacrificial animals (Ex.29:13; Lev.4:3-4). In Prov.18:2 the word is sechor in Ho.13:8, where it is figuratively used, and means the covering of (lit. something that endorses) the heart.

**Cave.** (1) **mâ’ârâ.** The chalky limestone of which the rocks of Syria and Palestine chiefly consist contains, like all limestone formations, a vast number of caverns and natural fissures, many of which have been artificially enlarged and adapted to purposes both of shelter and defence. This has given rise to the use of a large number of words in the Scriptures to denote caves, holes, and fissures, some of them giving names to places in their neighbourhood (from these we may mention: (2) har, or hwr, "a hole." From this come (a) the name of the Horites of mount Seir, a Troglydite race spoken of by Strabo, and of whom remains have been found in recent excavations in Palestine (Gen.14:6, 36:21; Deut.2:12; Job.30:6), (b) Hauran (Ezk.47:16, 18), (c) The scientific term for a hole in a mountain called by the ancient writers the "mount Horonaim" (Is.15:5), (3) hâqâdâm, "places of refuge in rocks" for birds (Can.2:11; Ob.5; A.V. clets). (4) minâhâ (A.V. den), a ravine through which water flows (Judg.6:2). The most remarkable caves noticed in Scripture are: (1) That in which Lot dwelt, after the destruction of Sodom (Gen.19:30), (2) Maicphelah (23:17). (3) Makke-dah (Jos.10:16), (4) Adullam (1Sam.22:1). (5) En-gedi (24:3). (6) Obaddiah's cave (1K.15:1). (7) Elijah's cave in Horab (19:9), (8, 9) The rock sepulchres of Lazarus and of our Lord (11:53; Mt.27:60). The existing caverns near the N.E. end of the Dead Sea serve fully to justify the mention of a cave as the place of Lot's retirement: as those on the W. side agree both in situation and in name with the caves of En-gedi. There is also frequent mention in O.T. of caves generally as places of refuge. Thus the Israelites are said to have taken refuge from the Philistines in "holes" (1Sam.14:11), and in the time of Gideon from the Midianites in dens and caves and strongholds, such as abound in the mountain region of Manasseh (Judg.6:2). Cf. Heb.11:38. Nor is Adullam the only
cave in Palestine where banditti made their accustomed haunt. Josephus (15 Ant. x. 1; 1 Wars xvi. 2-4) speaks of the robber inhabitants of Galilee and of Trachonitis, who lived in larger groups and who were subsequently destroyed by Herod. The caves which lie beneath and around so many of the Jewish cities formed also the last hiding-places of the Jewish leaders in the war with the Romans; and in modern and ancient times alike, the rock caverns of Palestine and the adjacent regions have been the scenes of political and religious activity. The rocky soil of so large a portion of the Holy Land almost forbids interment, except in caves either natural or hewn from the rock. Accordingly, numerous sites are shown in Palestine and adjacent lands of reputed sepultures of saints and heroes of O.T. and N.T., and visited both by Christians and Mohammedans.

Cedar. There is little doubt that the Heb. 'erez, invariably rendered "cedar" by A.V., is, in most passages, a correct rendering. The 'erez (Arab. ʻerṣ), from a root signifying "firmly rooted and strong tree," is the cedar of Lebanon (Cedrus Libani) as the wisdom of the ancients, in a wider sense to denote other Coniferæ in some passages. E.g. "cedar wood" (Lev. 14:6) can hardly be the wood of the Lebanon cedars, as the Cedrus libani could never have grown in the Sinai peninsula. In Ezk. 27:5, 'erez perhaps denotes some fir; probably, as Dr. Hooker conjectures, the Pinus Halepensis, which grows in Lebanon, and is better suited for ship-making than the Cedrus libani. Probably both these trees, and also the Juniperus excelsa, were included under the term 'erez; but undoubtedly it especially denotes the cedar of Lebanon, the finest and grandest of the conifers. The cedar is found in various parts of Syria [Lebanon], but the best-known grove is in a valley of the Lebanon range, viz. that of the Kindisha River, which flows W. from near the highest point of the range to the Mediterranean at Tripoli. This grove is at the very upper part of the valley, about 15 miles from the sea, 6,500 ft. above that level, and above all other areas extends the ancient name, which is conjectured by Dr. Sibthorpe to be derived from the millet (k'hē'yrā), which still grows there.

Cendebeus, accurately Cendebaeus (as R.V.), a general left by Antiochus VII. in command of the sea-board of Palestine (1Mac. 15:38, etc.) after the defeat of Tryphon 138 B.C. He fortified Kedron and harassed the Jews, but was defeated by Simon the Hasmonean, with great loss (1Mac. 16:9-10).

Censer. A bowl-shaped vessel for burning incense. It was filled with live coals from off the altar, and on this fire was put the incense. The censer was then carried to the altar of incense and placed upon it. This appears to have been its general use, since incense was to be burned night and morning on the altar of incense (Ex. 30:7, 8, 40:26, 27). Censer is the rendering of two Heb. words. (1) miglēresh (2Chr. 26:19; Ezk. 8:11). The form mīqglē′rōth occurs 2Chr. 30:14, and is rendered "altars for incense" (R.V. marg. vessels; Oxf. and Gesenius, "incense altar, vessel for incense"). It probably had a stand or flat base. (2) maḥāt, rendered (a) censer (Lev. 10:1, 16:12 [ritual for
CENSUS

Day of Atonement]; Num.16.6,17,18,37-39,46. These were of brass, except the one for use on the Day of Atonement, which was of gold, and had a handle (Yoma iv. 4). Also (b) firepans, of brass in the tabernacle and of pure gold in the temple. The word occurs in this sense in lists of utensils intended for the service of the altar of burnt-offerings (Ex.27.38,39; Num.4.14,17,20; cf. 30.12,13); the numbers probably given are (c) snuff-dishes of pure gold, "into which the snuffings of the lamps were put" (Keil, Bib. Arch.): mentioned in connexion with the golden candlestick (Ex.25.32,37,23; Num.4.6). In Heb.9.4, 1\(\theta\)ουα\(\psi\)α\(\tau\)ωνο\(\acute{\iota}\) is rendered "censer" (R.V. marg. altar of incense). The former is probably correct. 1\(\theta\)ουα\(\psi\)α\(\tau\)ωνο\(\acute{\iota}\) is the LXX. for μι\(\gamma\)ρεχθα in 2 Chr. 26.19. Ezek.8.11. [R.H.]

Census. 1. Moses laid down the law (Ex.30.12,13) that whenever the people were numbered, an offering of half a shekel should be made by every man above 20 years of age, by way of atonement or propitiation.—Instances of numbering recorded in T.T. (1) Under the express direction of God (Ex.38.26), in the 3rd or 4th month after the Exodus during the encampment at Sinai, chiefly to raise money for the tabernacle. The numbers then amounted to 603,550 men. (2) In the 2nd month of the 2nd year after the Exodus (Num.1.2,3). This census took place 14 the reign of David. This was probably necessary because the protracted campaigns of David's foreign wars made it impossible for the whole male population capable of bearing arms, who formerly acted as the army of Israel, to serve for so long away from home. The military nature of this census is shown by its execution being entrusted to Jehab and his captains; but it was no doubt intended also as a basis for the taxation required for an organized government. This measure was viewed with suspicion, and its instigation is accredited to evil influence—"Satan stood up to provoke Israel"—whilst the pestilence which followed was regarded both by David and the people as a sign of divine displeasure. The Chronicler presupposes (1 Chr.23-27) records of numbers and divisions of the people, such as show an elaborately organized system of religious, civil, and military officials, which some consider far in advance of the time of David, though fragments of old records may be incorporated in his work; but we may well assume that the system of taxation under later kings followed upon the registration inaugurated by David. The numbers given are: men of Israel above 20 years of age 800,000, Judah 500,000, total 1,300,000. rChr. gives Israel 1,100,000, and Judah 470,000, total 1,570,000; but adds that Levi and Benjamin were not numbered (1 Chr.21.6, 27-28). (3) The census of David was completed by Solomon, by the numbering of the foreigners and remnants of the conquered nations resident within Palestine. They totalled 153,600, and were employed in forced labor (1 K.5.15,20,21; rChr.22.2; 2 Chr.2.17, 18). Between this time and the Captivity mention is made of the numbers of armies under various kings of Israel and Judah. [Number; Palestine.] For N.T. references to the Roman census (Lu.2.1; Ac.5.37), see TAXINOMION. [S.N.S.]

Centurion. [Army.]

Cephas. [Peter.]

Ceras (1 Esd.5.26) = Keros.

Cetab. Sons of Cetab were Nethinim who returned with Zerubbabel (1 Esd.5.30). No corresponding name is found in the lists of Ezra and Nehemiah.

Chabris, son of Gothoniel, and an "ancient" (παρασιπότερος) of Bethuliah (1 Th. 6:15,8.10,10.6).

Chai dias, an unknown place in Judaea. Perhaps Hadid, but the text is very corrupt. 1 Chr.4:20-21 returned from Babylon with Zerubbabel. There are no corresponding names in the lists of Ezra and Nehemiah. [C.R.C.]

Chaff. The Heb. words rendered chaff in A.V. have not precisely the same meaning: ḫashšach (Arab. Ḫāššikh), "grass" withered by heat, occurs twice only (Is.5:24,33.31). mōg is chaff separated by winnowing from the grain. It was in the form of straw. The Hebrew word kōm rendered straw in Ex.5:7,16.11, etc., and stubble in Job 21:18, means straw cut into short portions, in which state it was mixed with the mud of which bricks were made to give it consistency; as the Arab. ibn is still used, as well as for fodder with barley. In Ex.4:28 mention is made of a mixed fodder for horses and cattle. Of barley and tebbat. The word ṣār (Arab. Ṣār) occurs in Dan.2:35 for "chaff of the summer threshing-floors." [C.R.C.]

Chain. Chains were used (1) as badges of office; (2) for ornament; (3) for confining prisoners. (1) The gold chain placed about Joseph's neck (Gen.41.42), and that promised to Daniel (Dan.5.7), are instances of the first use. In Egypt it was one of the insignia of a judge, who wore an image of truth attached to it: it was also worn by the prime minister. In Persia it was considered not only as a mark of royal favour, but a token of investiture. In Ezek.16.10 it is a mark of sovereignty. (2) Chains for ornamental purposes were worn both by men and women in
NECKLACE OF GOLD, CARNEILIAN, LAPIS-LAZULI, AND FELSPAR BEADS, COWRIE SHELLS, AND SYMBOLIC FIGURES. (Brit. Mus.)

NECKLACE OF CARNEILIAN, AMETHYST, JASPER, AND QUARTZ BEADS, INCLUDING TWO SYMBOLIC EYES. (Brit. Mus.)

GOLD NECKLACE OF AN EGYPTIAN QUEEN OF ABOUT THE TIME OF JOSEPH. p. 142]
CHALCEDONY was evidently (King, Precious Stones, p. 157) dioptase, a crystalline hydrous silicate of copper, green in colour. [T.G.B.]

**CHALDEA** [CALCOL; DARDAN]

**CHaldea** (Chaldean). This was properly the southern portion of Babylonia, without the tract through which the Shaṭṭ al-’Arab (which did not anciently exist) passes. It was known to the Babylonians as "the Land of the Sea," but was sometimes called 모t Kaldā, on account of the numerous Chaldean (and Ara- mean) tribes which had settled there, (Bit-Dakuri, Bit-Aṣur; Bit-Anshuhlu, Bit-Silāni, Bit-Sa’ālli, Bit-Sa-la-Larahkī, Bit-Yahhu to which Merodach-baladan [2K.20.12, etc.] belonged). The important position which the Chaldeans attained, however, caused the nations around to extend the name to the whole of Babylonia. In this sense it embraced the alluvial plain formed by the deposits of the Euphrates and the Tigris, which extends, nearly N.E. and S.W., about 400 miles along the courses of those rivers, with an average width of about 100 miles. In consequence of its alluvial nature, the country is exceedingly flat, and the monotony of the landscape is only broken by the towns built here and there, and the ruins of ancient settlements. Everywhere there are to be seen the remains of ancient canals pointing to a much more extensive system of irrigation than exists at present. Above Chaldea proper, which was occupied by the tribes, the country was divided into provinces, named, seemingly, after the chief cities (the province of Babylon, Sippar, etc.). The capital of the country was Babylon, at the present site of Dur-Kurigalzu. Among their chief cities were Sippur (Abu-habbah); Calneh or Nippur (Niffer); Ur (Museir); Erech (Warka); Larsa, the Biblical Ellasar (Senqāra); Agadē, the city of the Babylonian Sargon; Kiš (Haimar); Lagaš (Tel-loh), with many others. To these may be added Cuthah (Ibrahimî); Chilmâd (Kalkindâd); Larsâk (Or-Larancha); Is (Hit); Sūrîppâk, the city of the Babylonian Noah (? Fara); Erīdu (Abu-Shahrain); Debbâ; Dur-Kurigalzu, etc. Among the canals which were such a remarkable feature of the country were the Naḥr Malik (Nār Šarrī) or "Royal Canal," the Nār Kutu or "canal of Cu-thah," the "New Canal," the Pašlikatu or Palaçopas, the canal of Borsippa, the canal of Pekod, and many others. These ancient waterways can still be traced, and some at least will ultimately be identified. Chaldea has one natural feature worthy of note—viz. the great inland fresh-water sea of Nejef, a permanent lake of considerable depth, extending in a south-easterly direction for 40 miles, with a maximum width of 35 miles. From the site of Babylon extend, in a south-easterly direction, the famous Chaldean marshes, where Alexander was nearly lost. The extreme fertility of the Chaldean soil has been noticed by various writers. It is said to be the only country in the world where wheat grows wild; and Herodotus states (i. 193) that grain returned sometimes from a fold, and occasionally 300-fold, to the sower. The date-palm has been from remote ages one of the principal objects of cultivation, its fruit being a staple food of the country. The soil is rich, but ill-cultivated,
much of the land being dry and waste for want of a proper system of irrigation, which would probably also drain the marshes. [BABEL; CHALDEANS.]  

Chaldeans, Chaldees. These words, like the word Chaldea, do not occur in the Heb. of O.T. (which always has Kasdim; 77 times altogether, of which 46 are in Jeremiah, and the Eng. trans. comes from the LXX. The term is used for the people of the S. portion of Babylonia, but designating, in later times, the inhabitants of Babylonia in general, including the tract anciently called Shinar. In Dan.5:30,91 they are classed with magicians and astrologers, and seem also to form a kind of priestly class, with a "tongue" and "learning" of their own (1:4). The Gk. authors make the same distinction. In the Assyrian inscriptions, "Chaldean" is the ordinary designation of certain S. Babylonian tribes associated with the Arameans, and it is thought that Ur of the Chaldees, if it be the modern Muqair, was so called from its southern position on the Euphrates (it lies near its junction with the Shat al-Hai). To all appearance this district was also referred to by the Babylonians and Assyrians as "the Land of the Sea," because of its position at the head of the Persian Gulf. This tract seems to have attained prominence about 2000 B.C., when Hammurabi's son and successor, Samsuiluna, with his son Absi (Ahsu, Ebusi), came into conflict with Hu-ma-ilu (Amanu), who apparently ruled there. The name mai Kaldu, "the country Chaldea," is first mentioned by the Assyrian king Adad-nirari I, c. 810 B.C. Merondash-baladu, whose tribe was Bit-Yakin, and who belonged to "the Land of the Sea," is described by Sargon as a Chaldean, the nationality given by Sennacherib to Susa, the Nergal-uêrib (Rhegebolos) of the Babylonian Chronicle. The name Chaldean soon spread to the whole of S. Babylonia, and thence to the northern provinces also. The Chaldean kings of Babylon bear names indistinguishable from those of the true Babylonians, so that the suggestion that Nebuchadnezzar was of Chaldean origin may be correct, and may account for the term being applied to the whole Babylonian nation. The language of the Chaldeans seems to have been similar to Biblical "Chaldee." The use of Chaldean to indicate one learned in Babylonian lore must have been due to its application to the inhabitants of Babylonia in general. According to Strabo, the chief seats of Chaldean learning were Borsippa and Ur, and Pliny speaks of Babylon and Sippa. These towns were not within the boundaries of Chaldea in its restricted sense, and Babylonian scribes or priests must be intended. Their special tongue was, therefore, the ancient Sumerian language, and their learning that derived from its literature. To the centres of learning mentioned may be added Nippur, Erech, and probably other towns. "Chaldeans" with the meaning "wise men" does not occur in Assyro-Babylonian literature. The period being taken into consideration this Babylonian reputation for learning was well deserved. [SEMITE LANGUAGES.] [T.G.P.]  

Chamberlain. Erastus, "the chamberlain (R.V. treasurer) of the city," of Corinth (Ro. 16:23), held an office which was apparently that of public treasurer, or curator (as the Vulg. renders his title. These arcari were inferior magistrates, who had the charge of the public chest (arca publica), and were under the authority of the senate. They kept the accounts of the public revenues. The office held by Blastus, "the king's chamberlain" (Ac.12:20), was entirely different: it was a post of honour which involved great intimacy and influence with the king. The marg. of A.V. reads "that was over the king's bedchamber." For "chamberlain" in O.T., see EUNUCH.  

Chameleon. The translation of the Heb. קֶרֶב, used in Lev.11:30, as the name of some unclean creature, is generally regarded as incorrect. It has been suggested—and Tristram accepts the view—that the large Syrian and Egyptian lizards known, from a misconception of the meaning of their Arabic name waran or travan, as monitors (Varanus) are those indicated. One species (V. griseus) common in Egypt attains a length of 3 or 4 ft., but a second (V. salvator) grows to at least 6 ft., and is, in fact, the largest of all lizards. These lizards are often incorrectly called iguanas. The chameleon itself may perhaps be the animal indicated in Lev.11:30 by the name tinskelem, there translated "mole" in the A.V., although another Heb. word is elsewhere rendered as that animal. The reason for the chameleon being called by this word indicates the chameleon is that the meaning of this word is "to breathe," in allusion, it is suggested, to the old table that this reptile lives on air. Nothing more definite can be affirmed in either case. [Mole.] [R.L.]
CHAMOIS

Chamois (Heb. zemer). In the list of animals allowed for food (Deut. 14:5) the zemer, a term translated in the LXX., Vulg., and some other versions "camelopard" or "giraffe," and in A.V. "chamois." If, as is believed, the word is related to the Arab. zamar, it indicates some leaping animal. As the chamois is unknown E. of the Taurus and Caucasus, it cannot be the species intended. It has been suggested that the N. African wild sheep, or udad (Ovis lervia), is the animal referred to; but against this is the fact that this species is unknown in Asia. The udad is an aberrant, foxy red sheep, with a fringe of long hair on the throat and chest; and in some degree serves to connect the more typical wild sheep with the goats. zemer might indicate the wild goat, or possibly the gazelle, but other Heb. words have been assigned to those animals. [PALESTINE.] [R.L.]

Chanaan, the form in which Canaan appears in A.V. of Apoc. and N.T. (Jth. 8:3ff.; Ba. 3:22; Sus. 56; 1 Mac. 9:37; Ac. 7:14; 15:19). Chanaanite for Canaanite (Jth. 5:16).

Channun'us (1 Esd. 8:43) perhaps = Merari (Ezr. 8:19).

Chapter, the capital of a pillar. The A.V. so renders three Heb. words. (1) kōthereth, "crown" or "circlet," applied to pillars (1 K. 7:16-20; 2 K. 25:17; 2 Chr. 4:12-13; Je. 55:22), and also to the ornamental rings of the temple lavers (1 K. 7:31). (2) čepelith, "adornment" of a pillar (2 Chr. 3:13). (3) rōsh, "head" (Ex. 38:3, 38:17, 19:28), applied to the pillars of the tabernacle; the word is otherwise rendered top in connexion with pillars (1 K. 7:16-19, 22). The capitals of Solomon's bronze pillars were adorned with "checker work" or "net work" (šbhabbāh) probably in low relief [LATTICE, 3], and these designs were finished above and below by rows of pomegranates (1 K. 7:17-20, 41). [C.R.C.]

Charaath'al'ar (R.V. Charaath'al'an) is given in 1 Esd. 5:36 as the name of a leader under Zerubbabel; but is probably a corruption of two place-names, Cherub and Addan (cf. Ezr. 2:59).

Chariot

145

Characa (2 Mac. 12:17). Perhaps Kerah, E. of the Dead Sea. [CASPIS. ] [C.R.C.]

Charashim, Valley of (1 Chr. 4:14). The R.V. has "Geharashim" in 1 Chr. 4:14, "Valley of Craftsmen" (marg. R.V. Geharashim) in Ne. 11:35, or perhaps "of ploughmen," or "wood-cutters." Probably the town is represented by the ruin Hirsha, 12 ½ miles S.E. of Lydda, 4 ½ E. of Yâlo (Surv. W. Pal. iii. p. 26). [C.R.C.]

Charashim'. [CARCHAMIS.]

Charchenchish' (2 Chr. 35:20) = Carchemish (as R.V.).

Char'cus (1 Esd. 5:32; R.V. Barchus) = Barkos.

Char'ea (1 Esd. 5:32) = Harsha.

Charger. A vessel used in the tabernacle for presenting offerings of fine flour with oil (Num. 7:79). The charging vessels in Numbers are said to have been of silver, and to have weighed each 130 shekels, or 87 oz. Judging from the analogous word in Syriac, the vessel was deep, acorn-shaped. Quite different was the charger mentioned in Mt. 14:8, which was probably a shallow dish, yet deep enough to contain the beverage that must have been dripping from the head of the Baptist. [W.O.F.O.]

Chariot. (1) rôkheb, sometimes including the horses (2 Sam. 8:13, 18). (2) rôkhabb, a chariot or horse (Ps. 104:3). (3) merkâbâh is the most usual word, occurring 42 times in O.T.; it is used, e.g., of the chariots of the Egyptians (Ex. 14:22, 24, 25; 15:4), of the Canaanites (Jos. 11:5, 6), and of the Assyrians (Na. 3:2). (4) merkâbâ' (only in Lev. 15:9 [E.V. saddle], 1 K. 4:26, and Can. 3:10) does not differ radically from merkâbâh, but a distinction may be discerned in their use in that merkâbâh represents rather the seat in the chariot, merkâbâ' the chariot itself. (5) ághâl (Ps. 46:9 [100]), of the Assyr. r'khuhh, is used mostly for war-like purposes. [ARMS.] The earliest mention of them in Scripture is in Egypt, where Joseph, as a mark of distinction, was placed in Pharaoh's second chariot (Gen. 41:43), and went later in his own chariot to meet his father on his way from Canaan (46:29). In the Aramaic version of Jacob's chariots also formed a part (50:9). The next mention of Egyptian chariots is for a war-like purpose (Ex. 14:7). Pharaoh in pursuing Israel took with him 600 chariots. The Canaanites of the valleys of Palestine successfully resisted the Israelites in consequence of the number of their chariots of iron (Jud. 4:18, 19). Jud. 14:6 reads "Jabin chariot of Canaan, had 990 chariots (Judg. 4:3). David took from Hadadezer, king of Zobah, 1,000 chariots (2 Sam. 8:4), and a little later 700 from the Syrians (10:18), who in order to recover their ground collected 32,000 chariots (1 Chr. 19:7). Up to this time the Israelites possessed few or no chariots. But Solomon raised an army and maintained a force of 1,400 chariots (1 K. 10:26) by taxation on certain cities, agreeably to Eastern custom in such matters (1 K. 9:19, 10:25; Xen. Anab. 1. 4, 9). The chariots and the horses were both imported chiefly from Egypt, and each chariot cost 600 shekels of silver, and each
horse 150 (1K.10.29). From this time the possession of chariots was regarded as most important, and they, as well as horses, appear to have been still supplied mainly from Egypt (1K.22.34; 2K.9.16,21). Commonly two persons, sometimes three, rode in the chariot (2K.9.20,24; 1K.22.34; Ac.8.38), the third being employed to carry the state umbrella. A second chariot usually accompanied the king to battle to be used in case of necessity (2Chr.35.24). Chariots are often alluded to as typical of power (Ps.20.7,104.3; Je.51.21; Zech.6.1). Chariots of other nations are mentioned, as of Assyria (2K.19.23; Ezk.23.24), somewhat technical connotation of giving to the poor is of late acquisition, and quite contradicted by St. Paul, who considers the possibility of bestowing all one's goods on the poor, and yet being destitute of this virtue. It is from 1Cor.13 that all our ideas of this "greatest of gifts" are derived. This charity is more important than eloquence, prophecy, knowledge, faith, philanthropy, or the martyr's zeal; because it is a motive, in the absence of which all these things are destitute of merit. This is quite in accordance with modern Ethics. Its manifestation is set out in vv.4-8. It is long-suffering, patient, hopeful, enduring; neither envious, proud, nor cynical. It is the one thing that shall never fail, but shall be able to endure the searching and perfect light of heaven. 2Pe.1.7 bids "charity" be added to "brotherly kindness," and 1Pe.4.8 speaks of it as "covering a multitude of sins." [B.F.S.]

Char'mis, son of Melchiel, an "ancient" of Bethulia (Judg.6.15,8.10,10.6).

Char'ran (Ac.7.2,4) = Haran.

Chas'eba, named in 1Esm.3.31 only among those whose sons returned with Zerubbabel.

Chebar, a river or canal in "the land of the Chaldeans" (Ezk.1.3), on the banks of which Jews were located during the Captivity, and where Ezekiel saw his earlier visions (Ezk.1.3,15-23; etc.). It is often identified with the Habur, or river of Gozan, whose Israelites were removed by the Assyrians (2K.17.6). The Chebar of Ezekiel, however, must be looked for in Babylonia, and is probably the nahr Kabari, a canal near Niffer (Calneh, Gen.10.10), as suggested by Hilprecht. Its course has still to be determined. See Hilprecht and Clay, Business-Documents of Mari and the Dead Sea Expedition, vol. ix. p. 28; Clay, Light of O.T. from Babyl., p. 405. [T.G.F.]

Chedorla'o mer, king of Elam in the time of Abraham, who with three vassal princes suppressed a rebellion of the Canaanites in the neighbourhood of the Dead Sea (Gen.14.1-16). Babylonia had been conquered by the Elanites, northern Babylonia.
with its capital Babylon being left to the young king Ḥammurabi or Ammurapi (Amar-
rāphēl), while southern Babylonia with its capital Babylon, the Elamite prince Ḫa-"nim, the national deity of the Moab-
ites (Num.24.17), is mentioned after Judg. 11.24 he also appears as the god of the Ammonites. Solomon introduced, and Josiah
abolished, the worship of Chemosh at Jerus-
alem (1K.11.7; 2K.23.13). In the inscription of the Moabite king, Mesha, language is applied
to him after not unlike that used of Jehovah in
D.T. [Moah.12.1].

Chenaanah. —I. Head of a Benjamite
house (1 Chr.7.10). [Jediael, 1; Biljan.]—
2. Father or ancestor of Zedekiah the false
prophet (1K.22.11.24; 2 Chr.18.10.23).

Chenani, a Levite who assisted at the
solemn purification of the people (Ne.9.4).

Chenaanah, —I. Head of a Benjamite
house (1 Chr.7.10). [Jediael, 1; Biljan.]—
2. Father or ancestor of Zedekiah the false
prophet (1K.22.11.24; 2 Chr.18.10.23).

Chenani, a Levite who assisted at the
solemn purification of the people (Ne.9.4).

Chenaanah. —I. Head of a Benjamite
house (1 Chr.7.10). [Jediael, 1; Biljan.]—
2. Father or ancestor of Zedekiah the false
prophet (1K.22.11.24; 2 Chr.18.10.23).

Chenani, a Levite who assisted at the
solemn purification of the people (Ne.9.4).

Chenaanah. —I. Head of a Benjamite
house (1 Chr.7.10). [Jediael, 1; Biljan.]—
2. Father or ancestor of Zedekiah the false
prophet (1K.22.11.24; 2 Chr.18.10.23).

Chenani, a Levite who assisted at the
solemn purification of the people (Ne.9.4).
Cherin, the Brook

Cherin, the brook, or "torrent," was probably the Jordan noted by Eusebius as the brook in which the town of Gabbath was situated (Jos. 15.10). It was the brook which divided the Jordan from the Dead Sea, as it proceeds to the east of the sea, on which some writers have identified with the Jericho temple. See Cappadocia, Crete, and Peleth for another view which would make the Jericho temple and Philistia the site of Chereth, who married Philistia. See Cherethites.

Cherin, Cherubim. These were looked upon, in the Heb. view, as celestial beings whose function it was to attend upon the divine presence of the Most High God, and to whom certain tasks were allotted. It has been usual to connect them, in the religious symbols of the Orient, with the creatures of the description in Ezekiel's vision, and with the cherubim's architectural forms which find expression in the art and sculpture of Assyria, Egypt, and Persia. From such sources, doubtless, certain notions may have been derived: yet it is not easy to say definitely what conception the Hebrew mind had of the form of the cherubim. The sphinx has been supposed to resemble the cherubim's description of beings in Egypt, and the Assyrian winged bulls, having human heads, would suggest might, wisdom, and the power of flight, together with other attributes of the deity. "Both name and thing," it is alleged, "were derived from a primitive stage of religious thought in western Asia." If so, it is easy to appreciate the Hebrew reluctance to describe definitely either the duty or the appearance of the cherubim. In Gen. 3.24, cherubim were placed at the E. of the garden of Eden, to keep the way of the tree of life. In Ps. 18.10 we read, "He rode upon the cherub, and did fly; yea, he did fly upon the wings of the wind." The cherub in this passage has been described as "the mighty winged spirit of the storm." The king of Tyre is, in Ezek. 28.14, compared thus: "Thou art the anointed cherub that covereth"; or, as one upon the holy mountain, in the very presence of the throne of God, "whom thou wast set in the presence of the Lord." The cherub's function is described as the "wings of the cherub." The sound of the cherubim's wings was heard even to the outer court, as the voice of the Almighty God when He speaketh."

Chesalon (Jos. 15.10), a place important as fixing the limits of Israel's conquests, was the royal city of Judah. It was known in 4th cent. B.C. as a large village in the vicinity of Jerusalem, and is now Kedda, 10 miles W. of the city, on a high ridge N. of the valley of Sorek, and 2 miles N. of Kirjath-Jearim (Emron), which is immediately S. of the valley. From the latter town the body of David was carried to Mount Seir (or "the rugged hill"), and "went over mount Jearim's shoulder, north of which is Chesalon, and went down to Beth-shemesh." Thus Chesalon lay in Benjamin, and the boundary between the tribes, from Kirjath-jezre to Beth-shemesh (on the border of Dan), was the valley of Sorek. [c.a.c.]

Chesed, fourth son of Nahor (Gen. 22.22). Chesil', (Jos. 15.30), [Bethul.]

Chesnut-tree (Heb. "armón, LXX. styxais and pîne), mentioned in Gen. 30.37 and Ezek. 31.8. The balance of authority favours the Oriental plane. The context indicates a tree which thrived best in low-lying ground whereas the chestnut-tree prefers dry and hilly ground. Platanus orientalis ranges from Europe across Asia to Cashmere. Its value for shade in the East is well known, and it was exceedingly prized by early writers. Pliny says it was first brought over the Ionian Sea to beautify the towns of Ion. From thence translated into Sicily, and so bestowed at length upon Italy, and there planted as a most singular, rare, and special tree . . . who would not marvel that our people should fetch a tree . . . only for the shade that it giveth?" (xii. 1). He gives accounts of many famous and royal plane-trees. In Ecclesiastes 23.10, Wisdom praises herself, and says she "grew up as a plane-tree [platan in Wyclif] by the water." This accords with the R.V. rendering of plane-tree in Gen. 30.37 and Ezek. 31.8. Travellers in the East will remember the gigantic plane-tree at Damascus, still standing in 1883. It was said to be the largest tree in Syria, and as old as the times of Abraham! But the fame of the plane-tree fills all antiquity, cast and
and (b) the "chest" in which Jehoiada the priest collected the alms for the temple repairs (2 Chr. 12,9,10 = 2 Chr. 24,8-11). (2) gûzdîm, Ezk. 27,24 only; elsewhere "treasuries." Chellesloth. [Chisloth-tabor.]

Chettim (1 Mac. 1,1) = Chittim.

Chezib. [Achzib, 1.]

Chidon' (1 Chr. 13,9), the owner of the threshing-floor at which the accident happened to the ark, on its transport from Kirjath-jearim to Jerusalem (2 Sam. 6,6; Nachon). The LXX omits the first name, and reads Nahor for the latter.

Chiel or Chief of Asia. [Asiarchae.]

Children. [Family.]

Chip or Chab (Aramaic: Daniel, 1.)

Chillon or Chilion (Ku. 1,2,5,4,9), the husband of Orpah. [Mahlon.]

Chilmad', a place or country mentioned with Sheba and Assur (Ezk. 27,23). Probably Kalam Déda near Baghdad The Targum substitutes Media (Madâî), therefore, Mez amends Chilmad to kol Medâî, "all Media." Other identifications have been made, but are unsatisfactory. [T.G.P.]

Chimham', a follower, probably a son of Barzillai the Gileadite, who returned from beyond Jordan with David (2 Sam. 19,37-38,40). David seems to have given him a possession at Bethlehem, on which, in later times, was an altar or zebad (1 Chr. 17,1). In 2 Sam. 19,40 the name in the Heb. text is Chimham.

Chinne'reth, Chinneroth (Jos. 19,35), a city of Naphtali near Hamath and Rakkath. It is called Kermathu in the list of Thothmes III. (No. 34). The Jerusalem Talmud (Megilla, l. 1) makes its later name Guinosaar. The "sea" of Chinnereth (Num. 34,11; Josh. 13,27) or of Chinneroth (Jos. 11,2,12,3) was the lake of Gennesaret, and the name applied to the region generally (Deut. 3,17, and R.V. 1 K. 15,20 for Cinneroth). It is remarkable that while Gennesaret has been rendered "garden of princes" as a Semitic word, the old name, in the Akkadian language—Gin-nir-ta—would also mean "enclosure of the king." It may have been the name given by Canaanites of the Akkadian race. [C.R.C.]

Chios. The position of this island in reference to the neighbouring islands and coasts could hardly be better described than in the account of St. Paul's return voyage (19,18), a town of Troglodytae. Having come from Assos to Mitylene in Lesbos (Acts 20,14), he arrived the next day over against Chios. the next day at Samos and tarried at Troglodytum, and the following day at Miletus (ver. 15); thence he went by Cos and Rhodes to Patara (21,1). At that time Chios enjoyed the privilege of independent freedom, and was politically a part of the province of Asia, though only a short distance separates it from the mainland. It is about 32 miles long, and its breadth varies from 5 to 18. It is mountainous and bold, and has always been celebrated for beauty and fruitfulness. In the last century it was well known, under its modern name Scio, for the sufferings of its inhabitants in the Greek war of independence.

Chisleu. [Months.]

Chislon', father of Eldad (Num. 34,21).

Chisloth-tabor (loins of Tabor; Jos. 19,12), a place W. of Daberath, on S.E. border of Zebulon. Chisloth-tabor is the same as Chillam, or Chilmad', or Chittim, and was politically a part of the province of Asia, though only one-third of a mile separates it from the mainland.

Chittim, Kittim', a people descended from Javan (Gen. 10,4; 1 Chr. 1,7; E.v. Kittim), mentioned with Elishah, Tarshish, and Rodanim (Dedanirem), as distributed among the isles of the Gentiles. In Num. 24,24 Balaam predicts that a fleet should come thence to destroy Assyria, and in Is. 23,1,12 it appears as the resort of the fleets of Tyre. In Je. 20,2 the "isles of Chittim" are to the far W., as Kedar to the E. of Palestine, and the Tyrians procured their cypress wood or cedar which, inlaid with ivory, they used for the decks of their vessels (Ezk. 27,6). In Dan. 11,30, "ships of Chittim" are to come S. against the king of the N. Later, Alexander the Great is described as coming from the land of Chittim (1 Mac. 11,1), and Perseus, king of the Crims, is referred to (1 Mac. 8,5). Josephus (Ant. vi. 1) states that Cyrus was called Cethina, from Cethinus, its possessor; and for that reason "all islands, and the greatest part of the sea-coasts, are named Cethim by the Hebrews." the name having been likewise preserved in Citham, now Larnaca. Though the land of Chittim, as a part of Asia Minor, could therefore be applied either to Rome, or to Macedonia, or to any other power likely to become prominent in the opinion of the Hebrews. With regard to the island of Cyprus, the S. and E. was occupied by Phoenicians, the remainder being inhabited by Greeks. For this reason it was known to the Assyrians as Yâmanô, or Yaswanu ("of the Ionians"). Sargon of Assyria (709 B.C.) set up a monolith with his own bas-relief at Citham, and Esarhaddon and Assur-bani-apli both received tribute from ten of its princes, whose names

Egyptian Chest or Box from Thebes. [Wilkinson.]

CHIUN. [REMPHAN.]

CHL. Some members of the household of Chlo (probably slaves or freedmen) informed St. Paul of the divisions in the church of Corinth (1 Cor. 1:11). Of Chlo herself nothing is known, though she wrote. [E.R.B.

Choba (χοβά; Jth. 4.4-15.5), Chobai (15.4), a place near Esora (Arôbā') and Salem (Sâlim), not far from Bethulia (Mîthîlib). The Gk. probably represents a Semitic Hobhah, or “hiding-place,” perhaps at el Melhubbî (the hiding-place), a ruin 9 miles S.E. of Jenin, and 10 miles E. of Bethulia, on the main road from Beth-shean to Shechem. [C.R.C.]

Chopashan (R.V. marg. Por-asahan), “spring” or “pit” of Ashan (1 Sam. 30.30). Like Ashan, it is unknown. [C.R.C.]

Chorazin (Mt. 11.21; Lm.10.13), mentioned with Bethsaida and Capernaum. Now the ruined village Kerâzî, 2½ miles N. of Tel Hûm. There are remains of a synagogue, adorned in rude Greco-Roman style, perhaps not earlier than 2nd. A.D., when Simon and bar-Yohai is said to have built various Galilean synagogues. [C.R.C.]

Chozebra (1 Chr. 4.22), a place apparently in Judah; probably Kûzîzîba, a ruin in the Hebron mountains, 2½ miles N.E. of Halhum. It was possibly the native place of the rebel Bar-cocheba, who in 135 A.D. brought ruin on his brethren the Jews. [C.R.C.]

Christian. In N.T. this word only occurs three times (Ac. 11.26, 26.28, and 1 Pe. 4.16). Outside N.T. it is noteworthy that it does not occur in the earliest Christian writers, before the apologists, except in Ignatius, a native of Antioch, with which place St. Luke connects the origin of the word. Ignatius uses the name frequently, and also χριστιανός and χριστιανεία. With the apologists it becomes a natural term to use. In pagan writers the most important early references are the following: Tacitus (Ann. xx. 44), writing (c. 116 A.D.) of the Neronian persecution of 64 A.D., says: “Neronesque persecutus est ... apud Christianos appellat”; Suetonius, writing just afterwards (Nero 16), says, “Affliciit suppliciis Christiani genus hominum superstitionis novae a malefice.” Pliny, a few years earlier (Ep. x. 96), asks Trajan whether Christians are punishable for the name ishian (i.e. of Christians) or the flagitia cohorsientia. The name also occurs in the well-known and probably interpolated passage of Josephus about Christ (18 Ant. iii. 3), and perhaps in an inscription at Pompei (i.e. prior to 79 A.D.). Much discussion has gathered round these references to the name, but we may say that there are no real grounds for distrusting St. Luke’s assertion (Ac. 11.26) that it originated at Antioch before 44 A.D. Neither the termination -inos, nor the early date discredits the statement. His notice of the fact implies that the word was in frequent use by the time he wrote, and its origin, it seems, a matter of interest. The reference in St. Peter implies that it was well known to those in Asia Minor, to whom he was writing, and to the same date belong the allusions to the word in connexion with Nero’s persecutions found in Tacitus and Suetonius. The name was not given by the Christians to themselves, for they used other titles (ζηοι, διδσλφοι, etc.), nor by the Jews, who would not have recognized Jesus as Christ. It was coined by the heathen inhabitants of Antioch, perhaps by Romans in the retinue of the legatus, after the analogy of words like Caesariani, on the supposition that Christians were of proper Roman birth. (see above) says the name was used by the valluvs at Rome, and his use of the imperfect appellaat may imply that, once used only by the vallus, it had come into general use by the time he wrote, and, as we have seen, it was, not long after, generally used by the Christian apologists. Pliny’s question to Trajan suggests the interesting problem as to when Christians were first persecuted as such, and we may say that such persecution is implied by 1 Pe. 4.16, and probably began with Nero. A variant form, Christiani, is found in K in all the passages of N.T., and is to be connected with a proper name, Christus (cf. Suetonius, Claud. iv. xxv). To the use of this allusion is made by Justin Martyr and others, who play upon the meaning of χριστός. Har

Chronicles, Books of (originally one book), called in the LXX. Παραλείπομενον πρωτόν and δεύτερον—which is understood, following Jerome, to mean that they are supplementary to the books of the Kings. The constant tradition of the Jews (in which they have been followed by the great mass of Christian commentators) is that these books were compiled by Ezra or possibly by Daniel, and the internal evidence as to the time when they were compiled seems to demand that in their final form they must be put somewhat later. In 1 Chr 28.20 Shemenath, Shechanniah, is described: but 1 Chr 3.22-24 apparently takes us three generations later, and is thus parallel with the latest addition in Nehemiah (12.10, 11). The integrity of Chronicles has been impugned by various critics of late years for a variety of reasons. It is of course a compilation, in which has high authority. The plan of the book becomes apparent immediately we consider it as the compilation of Ezra or some one nearly contemporary with him. Among the greatest difficulties connected with the Captivity and the Return must have been the maintenance of that new religious order. of the land which was a vital point of the Jewish economy; and the maintenance of the temple services at Jerusalem, which could only be effected by the residence of the priests and Levites (including porters, singers, etc.) in Jerusalem in the order of their courses; this residence being only practicable by the payment of the annual offerings, first-fruits, and other offerings, which was dependent upon the different families of Israel being established each in his inheritance. Hence the obvious need for trustworthy genealogical records. Moreover, nothing could more effect-
usually aid their leaders to re-infuse something of national life and spirit into the people, than setting forth a compendious history of the kingdom of Judah which should embrace a full account of its prosperity, and trace the sins which led to its overthrow, and should also carry the thread through the period of the Captivity, and continue it on the other side; and those passages in their former history would be especially important which exhibited their greatest and best kings as engaged in building or restoring the temple, in reforming all corruptions in religion, and zealously regulating the affairs of the kingdom of Israel. The kingdom of Israel had utterly and hopelessly passed away, and the inhabitants of the land, being among the bitterest "adversaries of Judah and Benjamin," would naturally engage very little of the compiler's attention. These considerations explain exactly the plan and scope of the two books of Chronicles and the book of Ezra. The language of these books, the resemblance of the style of Chronicles to that of Ezra—which is, in parts, avowedly Ezra's composition—the re-ckoning by darics (1 Chr. 29.7, R. V.), as well as the breaking off of the narrative in the lifetime of Ezra, are among other valid arguments by which the authorship, or rather compilation of 1 and 2 Chronicles and Ezra by Ezra is supported. As regards the materials used by him, and the sources of his information, they are not difficult to discover. The genealogies are obviously transcribed, sometimes rather imperfectly, from public or family registers. A wide diversity of sources is evident, yet it is not the less true that the sources in the books is at times apparent. Thus the information in 1 Chr. 1.43ff. concerning the kings of Edom before the reign of Saul was obviously drawn from very ancient sources. The same may be said of the incident of the slaughter of the sons of Ephraim by the Gittites (7.21, cf. 8.13) and of the account of the sons of Shela, and their dominion in Moab (4.21,22). The curious details concerning the Reubenites and Gadites in ch. 5 must have been drawn from contemporary documents, while other records used by the compiler are as late as after the return from Babylon, e.g. 9.2 ff.; 2 Chr. 38.20 ff. Hence it is evident that the compiler did not regulate the course of events in their present form by one hand, contain extracts from many different writings, which were extant at the time the compilation was made. In more closely examining the sections of Chronicles which are to be found in Samuel and Kings, it is noteworthy that they not merely present a general resemblance, but are practically identical. This has been intimated in the Deuterographe (Oxford Press, 1894). The extracts are 57 in number, of varying length. The variations in the text between these two ancient documents show how liable the earliest copists were to make mistakes, and also that the Chronicler sometimes introduced a later word or phrase in order to correct the former. He especially does a comparison of these documents illustrate the method in which the long record in Samuel and Kings was put together. On the one hand, the Chronicler refers to certain authorities almost all through his book, beginning with Nathan, Samuel, and Gad for the period of David; on the other hand, his history is demonstrated to be largely an extract from the books we now possess under the names of Samuel and Kings. The conclusion must be, that Samuel and Kings were the work of prophetic men contemporary with the kings whose lives they record. These men were a "school," founded by Samuel to record such events as should be instructive for after-ages. We must carefully distinguish their works from the state annals (frequently referred to as "the chronicles of the kings of Israel and Judah"), which have all perished. This view of the books of Samuel and Kings explains their authority, their instructiveness, and their freshness and vividness in style. The author of Chronicles made use of an early recension of these ancient documents, selecting what best fulfilled his requirements. Beginning with the death of Saul (1 Chr. 10), he records the election of David, the removal of the ark, the Messianic promise, David's reign, the disappearance of the people, notable events in the life of Solomon, and outlines of the reigns of the kings of Judah. He omits many things contained in his authorities, such as the matter of Uriah and its sequel, also the sin of Solomon, and the history of the kings of Israel. On the other hand, he introduces a number of events which his authorities (as we now have them) did not contain. These include certain matters relating to David's administration, and also the accounts of the passovers held in the time of Hezekiah and Josiah. In these narratives it will be found that prophets are generally brought on the scene, and they may have left records which were taken up by the Chronicler and embodied in Chronicles. The chief source of Chronicles is in the main the same as that of Samuel and Kings, it is interesting to notice occasionally a different way of putting the same thing—as in the numbering of the people, the dialectical differences, changes of spelling, and variations of numbers. It is sometimes possible to correct the text of the earlier source by the later extract, and at other times the earlier is clearly the right text. When we find such variations as 22 for 42, 700 for 7,000, 3,000 for 2,000, 4,000 for 40,000, 8 for 18, and 3 for 7, we learn how easily numbers were corrupted. [NUMBER.] It is noteworthy that the LXX. was occasionally used as a source by the Chronicler; other—unless, indeed, the Heb. copies were different when the Gk. translation was made. The general conclusion is that the record left us by the Chronicler is of high religious and historical value, and that (after making due deductions for textual variations) the work is one of supreme importance to the students of the times of the kingdom of Judah. It remains to refer to the Genealogies (1 Chr. 1-9). The first chapter is extracted from Genesis, with slight textual variations. Parts of the chapters which follow may be tested by the contents of Exodus and Numbers, but were evidently extracts from later documents. They give an image of the family of Judah, including the house of David, up to the return from captivity; also of all the tribes but two, viz. Zebulun and Dan. In some cases very little is told us—e.g. of Naphthali, the record of which is taken from Num. 26 with no additions. It is observable that we have two copies of Saul's genealogy (1 Chr. 8.29, 35); also two of Saul's
one ascending and the other descending (cf. our Lord's genealogies in St. Matthew and St. Luke). In these old family lists we get interesting variations of spellings and omissions of names, showing that the ancient methods of keeping genealogies were not quite in line with our modern methods: whilst spellings varied in those days as much as they did in our own parish registers 300 years ago. The language of these books, as of Ezra, Nehemiah, Esther, and the later prophets, has a marked Chaldean colouring, and Gesenius says that "as literary works, they are decidedly inferior to those of older date."

[R.B.G.]

Chronology of O.T. and Archaeology.

The great importance of the bearing of archaeological research upon the chronology of O.T. fully justifies at the present day the insertion of a separate article by an acknowledged expert viewing the chronology chiefly from that standpoint of archaeology, while the very many varieties of opinion as to O.T. dates arising from the acceptance of varying data and schemes of harmonizing—see editorial note to next article) equally justify the presentation of two systems founded on different views. In all cases other articles have been allowed to suggest their own dates independently of either of the systems of the two following articles.—Ed.)

As far back as 722 B.C. the O.T. dates are well known to about a year, and agree with the statements of monuments and of classical writers. Before that date (the Fall of Samaria) there are differences of opinion, according as the Massoretic Heb. text, or the Gk. LXX., are preferred by scholars; but, if we accept Hammurabi as the Amraphel of Gen.14 (as Sir H. Rawlinson proposed), the claims of the Heb. text are the better. There are minor discrepancies in some of the cross-references of the books of Kings, showing corruption by later scribes—probably with a harmonizing intention. Thus it is, for instance, impossible that Ahab's son could succeed in 2nd of Jehoram of Judah (2K.1.17) and also in 18th of Jehoshaphat (3.1). But, if we follow the main statements, the O.T. chronology and the monuments of ascertained dates of accession except in two cases—viz: (1) Ahab cannot be the Ahab of Sīr′lā (or of Kīrbal), mentioned some 30 years after Ahab's death in a text of Shalmaneser II. (2) Menahem was reigning in 785 B.C., according to a text of Tiglath-pileser III., and appears therefore to have ruled some 20 years or more (O.T. 10 years), while Pekah (on the same authority) would have reigned only 4 years (O.T. 20 years). But these alterations nearly cancel one another, and cannot affect the totals by more than five or six years, as at present understood. As regards monumental dates, the Egyptian lists of kings unfortunately give no chronology at all. Scholars still have to depend on the corrected text of Manetho (who wrote c. 250 B.C.) as extant, second hand, in Eusebius and George the Syneculus, or in Julius Africanus. It is, however, known, from the Amarna tablets, that Amepeps IV. was contemporary with Bûnna-Burius of Babylon, who acceded c. 1430 B.C., and Egyptian dates require to be made conformable to this fact, which agrees with all the O.T. notes. In Assyria, before c. 640 B.C., there is a gap in the history, after which the Assyrian dates agree with O.T. except as above stated, and except that the expedition of Sennacherib to Lachish occurred in 703 B.C. i.e. the 24th instead of 13th of Hezekiah. Before 910 B.C. Assyrian dates can only be fixed by the cross-references to contemporary Babylonian kings such as Nabu-kudur-ussur (1154-1128 B.C.) and Burna-Burius (c. 1440 B.C.). We thus depend on the Babylonian chronicle, which is continuous back to the foundation of Babylon in 2250 B.C. This date also agrees within 18 years with that deduced by Rawlinson (i.e. 2232 B.C.) from various statements by Gk. writers. Before this epoch no chronicles exist, and (in spite of popular assertions) the age of the first Akkadian civilization under Sargina ("the founder king") is uncertain within 1,000 years, just as the date of Menes, in Egypt, is variously conjectured by scholars with a variation of some 2,000 years. The Babylonian chronology being the only one certain (up to 2250 B.C.), the various statements require detailed notice. The statement that a certain lagal ("king"), king of Babylon, was slain in 2070 B.C., c. 4000 B.C. is a conjecture not supported by the one known text of this ruler, since this contains no date at all. The totals of dynasties in the Bab. chronicle are confirmed and controlled by various independent statements.

(1) The text of Sennacherib at Bavian probably gives the accession of Sennacherib in Assyria as c. 1190 B.C. (2) The same Assyrian monarch fixes the conquest of Babylon by Tiglath-adar of Assyria as occurring c. 1292 B.C. (3) Tiglath-pileser I. fixes Isin-Dagon, ruler of Assyria, as c. 1850 B.C. (4) The contemporaries of Assur-Dan was Zaggara-sum-ēdû of Babylon (c. 1200 B.C.). (5) Nabû-na'id (Nabonidus), the last king of Babylon, fixes the accession of Burna-Burius of Babylon as being c. 1440 B.C. (6) He places Hammurabi 700 years earlier—i.e. c. 2140 B.C. (7) Assur-bani-pal fixes the date of Kudur Nan-bullû of Elam c. 2280 B.C. (8) Nabû-na'id also fixes the date of the Ur-Babylonian of Gudea of Zirgul, c. 2800 B.C. (9) He supposes Sargina ("the founder king") of Akkad to have lived c. 3800 B.C., but we have nothing to show how he came to calculate this date—more than 3200 years before his own time. (10) He also places Saggasati-Burius of Babylon c. 1350 B.C. These statements are all very valuable as checking the Babylonian chronology.—O.T. Dates. The Heb. and L.XX. dates differ, especially with respect to the earlier ages. The Heb. in 1K.6.1 gives 480 years, but L.XX. 440 years, from the Conquest to 4th Solomon. The L.XX., in Ex.12.40, considers that the 430 years include the 215 which the patriarchs spent in Palestine from the call of Abraham to Jacob's descent into Egypt. The L.XX. does not, however, agree with Gen.15.16 ("four centuries"); A.V. "fourth generation") nor with Ac.7.6 ("four hundred years"). The 480 years in 1K.6.1 also agrees best with Jud.11.26 ("three hundred years"), and these statements together agree with ten others in Jud., which make the various judges follow one another. The prevalent idea that they were often contemporaries, in various parts of Palestine, is quite contrary to all O.T. statements,
and also to Ac. 13.20 ("about four hundred and fifty years"), which is within some 20 years of the total details given in O.T. Lepsius supposed that the Exodus must be placed later than the time of Ramesses II, because the city Raamses is noticed in Ex.1.11. But the "land of Raamses" (Gen.47.11) is noticed even in the time of Jacob. For these reasons the Heb. text is preferable to LXX. Before the call of Abraham the LXX. gives 3,549 years up to Adam, but the Heb. only 2,083 years. In this case we have as yet no means at all of checking the O.T. chronology. From Solomon, however, down to 722 B.C. we are able to check the chronology of the kings of Judah by the contemporary chronology of the kings of Israel, and the O.T. totals represent about 96 years from the death of Solomon to the usurpation of Jehu (who was contemporary with Shalmaneser II.), and about 150 years from the latter epoch to 722 B.C. when Samaria fell. From these materials we thus obtain dates:

</tbody>
</table>

Incidentally, these dates are confirmed by other monuments. Thus Abraham had lived over 10 years in Palestine (Gen.16.3) when Ishmael was born, and Hammurabi’s inroad (14.1) occurred just before, as the text now stands. Hammurabi reigned from 2139 to c. 2094 B.C., as calculated by Peiser, in agreement with the statement of Nabonidus. The raid occurred early in his reign, before he became independent of Chedorlaomer. If so, this is a total discrepancy of only 10 or 20 years, at most, between the time of his inroad and the fall of Samaria in 722 B.C.—which is as near as we could expect to arrive in the long period of 14 centuries, and which is capable of several explanations. Again, it appears (Judg.5.5) that “Pharaoh oppressed” just before the revolt of Barak, which O.T. places c. 1312 B.C.—or in the reign of Ramses II., who conquered Tabor rather earlier. Sisera (whom Barak defeated) had an Egyptian-sounding name (it is not Semitic)—sir. Sesis-ri, “servant of Ra.”

Moreover, when Gideon (6.16) defeated Midian, Israel was “greatly impoverished,” c. 1295 B.C., and Meneptah (Merenptah) in his 5th year (c. 1265) says of Israel that it “is spoiled, it has no seed.” These coincidences are independent of the appearance of the ’Abir (or Habiru) in S. Palestine c. 1480 B.C., in whom Zimmern and others recognize the Hebrews, after the Conquest c. 1450 B.C. Details of O.T. Chronology. In Judg.11.26 Jephthah speaks of Israel as having conquered Palestine 300 years earlier. The details amount to the period of 326 years, as below, but the period of "rest" are given in round numbers, which may explain the discrepancy. These details are:

<table>

</tbody>
</table>

Total 500 years.

Regarding the 40 years of Philistine oppression (Judg.13.1) it is stated (15.20) that Samson was judge “in the days of the Philistines,” and this oppression continued till the beginning of Saul’s reign (1Sam.3.3). This indicates 20 years for the rule of Samuel. The Ark (7.2) was in Kirjath-jearim 20 years in Saul’s reign, and was taken out to war early in Saul’s reign (12.18). Thus, if Saul was made king (see "old," 8.1), but he died some 10 years later (25.1). The length of Saul’s reign is nowhere stated in O.T., but Josephus (as above) makes it 20 years, which is quite probable, as Jonathan was grown up at the time of Saul’s accession (13.4.1). While Ishbosheth (Saul’s younger son) was only 40 at the time of Saul’s death (2Sam.2.10). The discrepancy between the round number 480 (1K.6.1) and the details 475 may give five more years between Saul and Samuel.
The later chronology of the kingdoms of Judah and Israel presents only difficulties, if detail, due either to mis-copying or to harmonizing alterations; and the actual statements agree generally very well.

From chronology of O.T. 153
This coincides with the parallel reigns of kings of Israel, if Joram of Israel reigned not a full 12 years. It is here assumed that the Hebrews, like the Babylonians and Assyrians, dated the first year from the beginning of the new year, and would have called the months from accession to new year the "three year"—this applying to Israel and Judah alike.

</table>

Total 150 years.

The only numbers in this list not authorized by O.T. are: 52 years for Jeroboam II. (which, however, results from the cross-references to Judah), 21 for Menahem (O.T. 10), which agrees with the notice of his ruling in 738 b.c. —on a monument; and 4 for Pekah (O.T. 26), necessitated by the statement of Tiglath-pileser III. already quoted. After the fall of Samaria in the first year of Sargon, or 722 b.c., the differences of calculation amount only to two or three years in any date. Sargon took Ashdod in 711 b.c. (see Is. 20.1.) The embassy of Merodach-baladan (39.1) must have been sent to Hezekiah between 702 and 699 b.c. Jehoiakim must have served Nebuchadnezzar (under Nebuchadnezzar's father) till his fourth year (for "three years," 2K. 24.1), since it was then that Nebuchadnezzar acceded (for notice, see 2K. 24.1). The dated contract-tables of the dynasty of Nebuchadnezzar give a minimum interval between the death of Assyrian-pal in 626 b.c. and 1st Cyrus in 538 b.c., but we do not know that the latest dates of these tablets in any reign coincide with the last year of a reign, and later discoveries may therefore lengthen the total interval by a few years. The minimum is 82 years, which differs by four years from O.T. In Jeremiah (25.11, 29.10) the "seventy years" of affliction date back from 538 to 608 b.c., and the same book (25.1, 32.11, 32.14, 46.2) fixes the accession of Nebuchadnezzar in 605 b.c., which agrees with the chronology of 2 Kings, and is in no manner at discord with monuments. Texts of Nabonidus and of Cyrus show that the Median Gobrias (probably "Darius the Mede," Dan. 5.31) began the siege of Babylon in the summer of 539 b.c., after the surrender of Nabonidus at the "palace," which according to Berosus, as quoted by Curtius, was in the suburb of Borsippa, a suburb outside Babylon on S.W. The final attack was made about four months later, when the "king's son" was slain. His name we know (from another text) to have been Bel-shar-usur [Belshazzar], and it is clear that after his father's capture he reigned at least four months (Dan. 5.30), though the third year (8.1) of Belshazzar is either a clerical error for the third month, or represents his rule in Babylon during the absence of Nabonidus with the army. Belshazzar appears as the "son," or descendant, of Nebuchadnezzar (Dan. 5.2.18), who may have been his grandfather through his mother, or even through his father Nabonidus, since the genealogy of the latter is unknown from monuments, though his father's name is known to have been Nabu-balatsu-ibqi, who was a "wise lord." The chronology of Ezra and Nehemiah presents no difficulties if we remember that the Aramaic passage in Ezr. 4.7-24 pursues the history of attempts to frustrate the rebuilding of Jerusalem from c. 433 down to 424 b.c., the narrative then returning (5.1) to the history of Zerubbabel—Authorities. The lists of Manetho may be studied in Cory, Ancient Fragments (ed. 1876). Manetho's dates are correct back to 528 b.c. They are 10 years too late for the accession of Necho, and 10 years for that of Tirsakah, placing Sum-shak 33 years too late (there is also a difference of four years between the stated total and the details of 22nd dynasty), the date of his accession being 966 b.c. (Brugsch), or 3rd of Rebohab (1 K. 14.25). The dates given by Brugsch (Hist. Egt., 1879) only claim to be approximate, but fit with the known fact that Amonophis IV. was contemporary with Burna-Burias, who acceded in Babylon c. 1440 b.c. (Amanina Tablets, Brit. Mus., Nos. 2, 3, 4, 6, 7). Brugsch himself, however, has studied in Proceedings of Bib. Archæo. Soc., Dec. 1880, Jan. 1881, May 1884, March 1899. The Eponym Canon, and other Assyrian no-
CHRONOLOGY OF O.T.

ties, are in Schrader, Cuneif. Inscrip. and O.T. (Eng. trans., 1885). The contract-
tables, in the time of Nebuchadnezzar's
dynasty, are given in the Brit. Mus. Guide
(1900), pp. 173-186. The cylinder text of
Cyrus and those of Nabonidus are translated
by Dr. Pinches in Records of Persia (new series),
v. pp. 144 ff. The important text of
Meneptah was first published by Dr. Flinders
Petrie (who discovered it) in Contemp. Rev.,
May 1896. Biot's attempt (1831) to fix
astronomical dates is based on a fallacy.
Dr. Winckler's discoveries at Pterium (Deut-
schen Orient Gesell. No. 35, 1907, p. 26)
show that Ramses II. was reigning in 1350-1320
B.C., thus confirming Brugsch's dates. [Pales-
tine: Syria.]

For a discussion of the last date, see CHRO-
noLOGY of O.T., where the present writer gives
his reasons for preferring the date A.D. 4 to
the commonly accepted 4 B.C. [C.R.C.]

Chronology of O.T. (an attempted
harmonization). [The occasional corruption of
numerals in the Heb. text involves any harmonizing
of Chronology in some amount of necessary emenda-
tion; hence any suggested system must be open to
criticism in detail, according to the data and the
theory adopted by the particular critic. The system set
forth in the following tables and notes is therefore
offered, not as infallibly correct (which no system can be),
but as a suggested harmony which has been most
carefully drawn up and may be useful as a general
guide in these difficult questions. It is believed
that no general survey of Biblical chronology has been put
forward before in so clear a way as this tabular view
provides, and with such a minimum of emendation of
the text of Scripture. As there has been, however,
no wish to commit other writers to the suggestions of
this article, they have been left free to adopt their
own views, and hence their chronology is independent of
this—e.g. an alternative chronology of the kings
of Israel is given under ISRAEL, KINGDOM OF. —Ed.]

From the Creation to Abraham. It is easy for any student to construct from the ages of the patriarchs, as given in the Bible, a table of dates working back from Abraham to the Creation, as Archbishop Ussher (to whom the dates in the margin of A.V. are due) did in the 17th century. But such a system is wholly unsatisfactory, for scientific evidence demands
for the world, and probably even for the
inhabited world, a greater age than is so obtained, and the ancient monuments now
clearly bear witness to a considerable degree
development which many scholars consider
to date back a longer period than that allowed
by Ussher before Abraham. (But see pre-
ceding article.) The Bible, moreover, must
not be held responsible for the calculations of
Archbishop Ussher, and the Pentateuch
itself makes no such claim to give data for chronology; for the "generations" given may
not be successive ("son of " being very com-
monly used in Heb. for " descendant of "), or
the names may be different (as often in other
parts of the Bible) the founder or head of
a family, in which case no successive
chronology can be built up on them. Hence
Biblical chronology, for which any degree of
certainty can be predicated, begins only with
the birth of Abraham.
Abraham to David. The key to the chronology of this period is found in the fact that the Hebrews uniformly reckoned the number of years between the giving of a divine promise and its fulfillment as the figures to be borne in mind. Thus, (a) St. Stephen speaks of “the time of the promise drawing nigh,” and refers the promise of a numerous posterity when as yet he had no child (Ac.7.6, 17 ; Gen.15. 2-5) to the time when Abraham was in Hebron. To this interval—citing Gen.15.13—he gives 400 years, the dates of the birth of Isaac and the Exodus being 390 years apart, in the following table (see note B). Ten other years may have elapsed between the giving of the first promise to this effect and the second in Gen.16.10, which immediately preceded Isaac’s birth. (b) St. Paul in Gal.3.17, citing Ex.13.40, 41, gives the period of 130 years as intervening between the date of the giving of the Law on Sinai and the call of Abraham. This is the number of years separating items 3 and 16. The LXX. and Samaritan texts of the Pentateuch agree with the Heb. in making the affliction of the Children of Promise include the sojourn of the patriarchs in the land of Canaan, and thus to date from the call of Abraham in 1644. It is from this point of view that the text of Ex.12.40, 41 is to be read. It is, therefore, important to see how many years belong to the sojourn in Canaan and how many to that in Egypt. In Table I, we see that the birth of Isaac took place 25 years after Abraham’s removal from Haran. Jacob was born when Isaac was 60, and was 130 when he went down into Egypt. He was 15 years old when his grandfather Abraham died (cf. Heb.11.9, which states that Abraham dwelt in tents “with Isaac and Jacob”). This leads us to conclude that 215 years passed between Abraham’s departure from Haran and Jacob’s descent into Egypt, and 215 years between the descent and the Exodus. The two censuses at Sinai and at Shittim (Num.1.26) cannot be allowed to influence this decision, as these numbers are subject to revision in common with all military and population returns of O.T. Other than this uncertain factor there is no reason to ground the rejection of the view of the “130” into two equal periods.—Table I. and the Schedule of the Judges depend upon two suggestions: that as to the date of Hammurabi in note (a), and the theory held by many scholars that the judges were not successive. If these two hypotheses are rejected, Table I. would need to be dated back just about the period required to count the judges as successive, and the subsequent tables would not be affected.

(a) Abraham was a contemporary of Amraphel of Gen.14.1, who is undoubtedly the Hammurabi of Babylonian history. It is impossible to fix with certainty the date of Hammurabi (cf., e.g., Hommel 1772-1717 and Petrie 2190) from the cuneiform inscriptions of Babylon, as the names and dates of all the Babylonian kings have not yet been discovered; in particular, the names are missing between 1011 and 920 (see Dr. Sayce’s “Babylonian Chronology” in Appendix II. of Early Israel, pp. 280-283). In this interval the present writer suggests a Burnett-Burias in the “2nd dynasty of Babylon,” to complete the information of the table. Before the descent of the last king of Babylon (550 b.c.), that of Hammurabi, the ancient king who—700 years before Burnett-Burias—had built the Sun temple at Larsa. This allows us to fix the date of the rescue of Lot by Abraham from the camp of Amraphel at c. 1600.
(b) This is Dr. Petrie’s date, who, however, allows that it may possibly have been from 5 to 10 years later.
(c) The statement in 2Sam.7.1 that the ark abode a long time in Kirjath-jearim, “for it was 20 years,” has disturbed many chronicists. The context shows that the anomaly is with regard to the removing of the ark prior to the anointing of Saul. To the “20 years” must be added the 40 years of Saul’s wars and the first of David’s reign. The whole period of the separation of the ark from the tabernacle is thus more nearly 70 than 20 years. The 20 years of the ark’s captivity are supposed to coincide with the 20 of Samson’s judgeship; and to have immediately preceded the election of Saul.

**THE TIMES OF THE JUDGES AND SAUL.**

The dates here suggested of the Occupation (in or about 1174) and of the establishment of the monarchy in Judah under David (1027), leave rather less than a century and a half for all the events of Joshua’s later life, the rule of the Judges, and for Saul, who is included here, rather than under the monarchy, as being a Judæan writer, an illegitimate sovereign (Moore, Judges, p. 41 n.).

The Biblical records of these times are very complete, every event of importance in any part of the
CHRONOLOGY OF O.T.

the country having been written down and preserved. We have but to sort and rearrange these records to have a continuous and harmonious narrative of these years. This may be most successfully done in a schedule, which, omitting the first thirty years of the Occupation, as being those of Joshua’s later years, gives a bird’s-eye view of the years following his death.

**Episodes in the Military History of Palestine, occurring between the Death of Joshua (Table I., Item 18) and the Accession of David (Item 20), a Period of 117 years, numbered in the Order of their Record.**

**The Hebrew Monarchies.** The following tabular view of the Hebrew kings is constructed on the principle that while the southern kingdom (Judah) followed the Babylonian precedent of dating its kings’ reigns from the first day of the civil year—being Tishri 1 or September 21—the northern kingdom (Israel) reckoned any fraction of a year as a full unit, and included the same year as part of the reigns both of the deceased monarch and his successor. The former plan is known as post-dating, the latter as pre-dating. This peculiarity in the Israelitish mode of computing the reigns of their kings would account for a difference of 14 years in the sum of the years given to Israel, 227 years having actually passed between the division of the kingdom and the fall of Samaria. As the recorded number of years during which the kings of Judah reigned when the northern kingdom lasted amount to 260, and in Israel to 241, it becomes necessary to show how the gain of 33 years in the Judaean monarchy occurred, the reduction in the records of Israel to 227 being effected by subtracting the 14 duplicate years arising from their system of pre-dating.

By the following considerations, 33 years are eliminated from the total of 260 in the annals of Jerusalem, though they still stand as a portion of the national history.

(a) Athaliah, a female ruler and a blood-stained usurper, is omitted from the list of constitutional sovereigns and her years are included in the 40 given to Jehoash. A modern parallel is the dating, as is the case in all official records and legal documents, of the accession of Charles II. from the day of the death of Charles I.

(b) Twenty-seven other years—completing the 33—are gained by a consideration of the repeated statement that ‘Jotham the king’s son was over the household, judging the people of the land’ (2K.15:5; 2Ch.26.21). King Uzziah’s retirement from the duties and cares of State and Jotham’s accession is thus seen to have taken place before the former’s death, and is shown in these tables as occurring in his 41st year and in the 25th year of his reign. He lived for some 27 years longer (cf. 2K.15.2) in a separate house in Jerusalem, often spoken of as ‘king,’ but taking no part in the government, and died (ver. 7) late in the reign of his grandson Ahaz.

These corrections with regard to the two reigns of Athaliah and Uzziah, with the variations of reckoning in the two kingdoms, are alone needed to correct the whole machinery of Hebrew chronology during the time of the kings, and to bring the two systems of Judah and Israel into accord.
### TABLE II. THE HEBREW KINGS.

It must be borne in mind in making the deductions that such an expression as 18 Jeroboam

</table>

(A) In 1 K. 6.1. "the fourth year of Solomon's reign" is given as the synchronism of "the 48th year after the children of Israel were come out of the land of Egypt." The following figures make up 480 years, and the historian of Solomon's reign seems to have used them in his calculations. To the 3 completed years of Solomon's reign and the 40 of David's, we add the 497 years detailed in the book of Judges, as those during which there was a state of either peace or war in Israel. This total (see note ** on preceding page) does not include the 3 years following Gideon's death, during which the tribe of Ephraim made an abortive attempt at establishing a monarchy under his son, as these years are expressly included in the 490 years' peace secured by Gideon. To the 450 years thus obtained we add the 39 during which Jeshua lived after the crossing of the Jordan. The total is 480, a complete justification of the text, it looked at solely from an arithmetical point of view.

(B) The reigns of the two Jehorams present a problem of great complexity. The course of events would seem to be as follows: In 860, the 2nd year of his reign, Athaliah, the king in Samaria, had an accident (2 K.1.2) which left him bedridden until his death, and compelled him to hand over the duties of kingship to his brother Jehoram. This was in the 18th year of Jehoshaphat's reign in Jerusalem (item 14.). Athaliah survived his injuries for 3 years, during which time there was a co-sovereignty of the brothers. Then Athaliah died, and his brother became sole king; this might have been dated as 21 Jehoshaphat. It is not, however, so dated in the text, because during Athaliah's lifetime Jehoshaphat had taken his son—also named Jehoram—into partnership with himself on the throne of Judah, and the historian has preferred to date the northern Jehorahm's years of sole power from the 2nd year of the southern Jehoram's co-sovereignty—i.e. 863. This southern co-sovereignty, again, is not described as having taken place in his father Jehoshaphat's 20th year, but (2 K.8.19) in "the 5th year of Jehoram of Israel"—i.e., from the beginning of his reign, and (see correction in table, item 15). it being added, "Jehoshaphat being then king of Judah: but the "8 years" in ver. 17 refers to the time he was sole king (item 17). We thus find that the two Jehorams who ultimately became kings of Judah and Israel were not only contemporary sovereigns for 4 years, but that for some months previously they were simultaneously holding the positions of associate kings in Jerusalem and Samaria respectively.
CHRONOLOGY OF O.T.

WITH THEIR SYNCHRONISMS—DOMESTIC.

—i.e. "In the 18th year of Jeroboam"—means that he had then been 17 years on the throne.

of Abijam’s accession: and so elsewhere.

</tbody>
</table>

An alternative harmonizing, involving a change of about a year in most of the dates of accession, but not altering the principles of this chronology, was given by the present writer in Solomon’s Temple (2nd ed., R.T.S., 1907).

(C) The fact that Jehoshaphat and Jehoram of Israel became allies in a campaign against Mesha, king of Moab (2K.3.5-27), derives additional interest from the contents of the Moabite Stone, describing the war. The years during which the allied sovereigns could have co-operated are narrowed down to the last 7 years of Jehoshaphat’s reign (868–861). The victory commemorated by the Moabite Stone is veiled in the dubious phrase of ver. 27, “there was [or, came] great wrath upon Israel” (i.e. on the part of Jehoshaphat and the Judahites) for their panic and disgraceful flight from before the hostiers of Chemosh.

(D) The battle of Qarar in 854, at which the whole contingent of troops sent from Israel had been lost, was the event which, in all probability, led to the prophet Elisha’s sending a messenger to anoint Jehu as king of Israel, while still engaged as a captain in the defence of Ramoth-gilead (2K.8.28–9.23). But he had long been designated for that office by the prophet Elijah (1K.19.16). Some 3 years previous to the battle of Qarar, it would seem from the chronological evidence that political action of some sort in Samaria had raised him to the position of king de jure, though he still remained in a private station. The evidence of which is this: Ahaziah of Judah is declared to have been made king “in the twelfth year of Jehoram” (2K.8.25). Jehoram of Israel had two reigns: one, in 868 as regent, and one in 865 as sole king. That the latter of these is the one referred to in the above-cited texts is apparent, as 865 minus 12 brings us to 853, the year of Ahaziah’s elevation to the throne. That Jehoram was then alive, his death by the arms of Jehu at the same time as Ahaziah proves. But this was 4 years after Jehu had received his title to the throne. These 4 years, therefore, were those in which “Jehu conspired against Jehoram” (2K.9.14). The fatal results to Samaria of the battle of Qarar are seen in the visit of condolence paid by Ahaziah to his brother-in-law, and more especially in the easy conquest of Jehu over both kings. There were evidently not sufficient warriors left in Samaria to protect the person of the king.

(a) Item 16: "King" (when account was written, actually prince when events happened) Nebuchadnezzar commanded the army (cf. Note C). A similar suggestion (an account for the embellishment of the Hebrew history) is made in the form of a "chronological" account in which the Hebrew history is classified into small, distinct, and separate events (cf. Table II). Nebuchadnezzar's army from Jerusalem in 702. The embassy to Jerusalem was that of a refuge monarch, and followed the withdrawal of Nebuchadnezzar's army from Jerusalem in 702.

(b) The occasion of Nebuchadnezzar's sending ambassadors to Hezekiah was after his second expulsion from Babylon in 709 B.C. by Sargon. Sennacherib states that, in his first year, he again drove Merodach-babilad out of Babylon. The embassy to Jerusalem was that of a refuge monarch, and followed the withdrawal of Nebuchadnezzar's army from Jerusalem in 702.

(c) Ezekiel's prophecy against Tyrie was uttered a year previous to the siege and his celebration made a year or two after its close (c.f. Items 26 and 30).
HISTORICAL NOTES TO TABLE III.

(A) According to the black obelisk of Shalmaneser, the battle of Qarqar was fought in 854 on the line of march between Aleppo and Hamath. The obelisk records that a contingent of 2,000 chariots and 10,000 footmen took part in the battle, sent by "Ahabu mat Siril'ah" (so-called on the Kurkh monolith). In 854 Jehu was in the 4th year of his nominal reign as king of Israel, Jehoram, son of Ahab, being still alive (see Table II., note a). The inscription on the monument was not made by Shalmaneser, but in the reign of his son, Samasiramman, who reigned over Assyria from 824-812. It therefore records events of from 30 to 40 years before its own date, and when exact particulars of Heb. names were perhaps not available. The insertion of Ahab's name here, as representing the reigning dynasty of Samaria, is not unnatural, since, though he himself had died 15 years before, a son of his was de facto, though not de jure, ruler. (For an alternative solution of the chronological difficulty, see Ahab.)

(B) The monuments record that, in 842, "Jahua, son of Humri", "of Israel," paid certain specified articles of tribute to Shalmaneser II. As 842 = 16 Jehu, there is no chronological difficulty here, but an etymological one only. He is called the "son of Humri" — i.e. Omri. This is a further instance of Assyrian ignorance of Heb. history, or of the less accurate use of names (or designations) than modern records demand; for the dynasty of Omri had been destroyed by Jehu.

While neither Qarqar nor Shalmaneser II. is named in the book of Kings, we find there a statement of territorial loss which just such a series of events as the monument describes might produce. It tells how, in Jehu's day, Hazael, king of Damascus, as the ally or dependant of Assyria, "cut Israel short," and "smote them in all their coasts." E. of Jordan (2 K. 10.32-33).

(C) The statement that Menahem paid to Pul, king of Assyria, 1,000 talents of silver, in order to secure his peaceful occupation of the throne, is explained by the Heb. idiom by which personal titles and dignities afterwards acquired were often used by Biblical writers in anticipation of such official use (cf. note a). The occupants of the throne of Nineveh during the years of Menahem were Assur-dan III. and Assur-ninari. Five years after Menahem's death, Pul became king of Assyria, took the throne-name of Tiglath-pileser (III.), though still called Pul in the Babylonian list of kings, and reigned for nearly 20 years. We must suppose his relations with Samaria to have been these: Some time during Menahem's life he had led an army to the West and received Menahem's tribute, and after the fall of the Assyrian power. In 738—Pekah being then on the throne of Israel—as Tiglath-pileser he again invaded N. and E. Palestine and carried away many of their inhabitants (2 K. 15.29). To this year belongs the inscription of one of his tablets (Schrader, Keilinschriftliche Bibliothek, vol. ii. plate 31), giving the name of "Menihimme of Samaria" as one of his tributaries. Though Menahem had then been dead 12 years, the use of his name on the tablet is explained by the fact (2 K. 15.19) that during Pul's years of Assyrian generalship Menahem had paid him tribute. Pekah was in 738 the sufferer, and a few years later (722) his contemporary Ahaz of Judah also paid homage to Tiglath-pileser at Damascus. These two dates—738 and 732—are taken from cuneiform inscriptions, and cause no discord in our chronology.

* "The tribute lists were sometimes carelessly compiled, and in error as to names" (Geo. Smith's Assyrian Canon, p. 179).

Note.—The chronology after the conquest of Jerusalem (586 B.C.) presents few, if any, difficulties. Authentication of the earlier names is considerably aided by the inscription of Behistun, which gives the line of the Achaemenid kings of Elam and Persia to Darius I. (Hystaspis); while in the Canon of Pišmeš the successors of Darius I. are given to the fall of the Persian Empire (This Canon—written by an Alexanderian scholar c. 150 B.C.—gives, to the time of writing, the names of the rulers of Babylon, the Egyptian Ptolemies, and the Romans from 717 B.C., with the number of years each reigned. It is an accurate and reliable document, and its figures are confirmed for the years 597-666 B.C. by the Assyrian Eponym list. Each year of the Assyrian list bears the name of an officer called an Eponym. From the mention of a total eclipse which occurred in 763 B.C. is determined the date of all the remaining years.

"Darius the Mede" is to be distinguished from the three men of the same name who sat on the throne of Persia. All that the Bible states of him is that he was the son of a certain Ahasuerus or Xerxes, and was in the train of Cyrus the Great at the taking of Babylon. By him he was made king over the realm of the Chaldeans (Dan.9.1), and from him he received the kingdom, being about three-score and two years old (5.31). This was in 537, whereas Darius I. came to the Persian throne in 522. See the present writer's Second Temple (Murray, 1908); and for the usual identification with Gobryas, see Darius. 11

(a) The total eclipse of the sun, from which all the years of the Assyrian Eponym Canon are counted, happened June 15, 793 B.C. A reference to it is in the words of Amos 8:9.

(b) This is on the common assumption of the "second Isaiah," who wrote in exile, but it is fair to add that another view argues the equal applicability of these chapters to the time of Hezekiah (i.e. Thirle, O.T. Problems, 1907), in which case this would fit the date of the earlier part of Isaiah as given in item 2.

(c) His ministry began in the 5th year of his own age and 4th of Jehoiakim's captivity — i.e. 13 Nebuchadnezzar (c. Table III., item 22). Similarly, 35 Nebuchadnezzar 27th from Jehoiakim's captivity (Esth 29.17).

**Bibliography:** George Smith's Assyrian Eponym Canon remains indispensable to the student of Babylonian chronology. It should be supplemented by Dr. Sayce's volume on Early Israel for particulars of the first and second Babylonian dynasties. Mr. L. W. King's Chronicles concerning Early Babylonian Kings, in Luzer's series, are of immense importance, especially as bearing upon the question of Amraphel and Abraham. A little-known essay on the period of the judges, by Dr. Elders Petrie, is to be found in the Proceedings of the Society of Biblical Archaeology, for December 1896. In this the construction of the book of Judges is taken to consist of records of Northern, Eastern, and Western, Palestine, an idea which has been expanded above. Moore's Commentary on the Book of Judges is good, but fails in its chronology. Many treatises on the chronology of the Hebrew kings assume that Pekahiah and Pekah are variations of the same name, and are thereby rendered unreliable.

**Chronology of N.T.** There are no serious difficulties as to the dates of the N.T. period, and where authorities differ the variations are mostly slight. The date 4 B.C. for the Nativity, and for Herod's death, is Whiston's deduction from Josephus (11 Ant. xiv. 5, xv. 14; 17 Ant. viii. 4; 1 Wars xxxvi. 5). But Herod reigned 17 years, and the Battle of Actium (Sept. 2, 31 B.C.) was fought in his seventh year (1 Wars xix. 3). He took Jerusalem in the summer of 30 B.C. (14 Ant. xvi. 4). The date 1 A.D. for his death, thus obtained, fits with Mt. 2.1, 13.3, 1.2. A discussion of each of the crucial points will be found under the separate heads — e.g. Taxing (of Cyrenians); Star of Wise Men, etc., and questions as to the dates of the N.T. writings are left to the articles on the several books, and to such articles as Canon of N.T. But it will be useful to add, in an easily accessible form, the leading historical (as distinct from literary) dates, as in the list subjoined

Chrysole, one of the precious stones in the foundation of the heavenly Jerusalem (Rev.21.20). This name now denotes a choice variety (also called peridot) of the common mineral olivine, hard, transparent, and a yellowish-green colour, fine specimens of which are brought from Egypt, parts of Asia, and Brazil. But according to King, the chrysolithus of Pliny, or at least his best sort, the Indian, was the gem popularly termed the Oriental Topaz (i.e. a choice yellow variety of corundum), though some have suggested it may be the ordinary topaz (commonly a rich yellow) and others a yellow jasper, which were both engraved by the Egyptians from the 18th dynasty onwards. [r.g.b.]

Chrysolinus (Rev.21.20) only, now denotes an apple-green Chalcédony, found especially in Silesia. Darker varieties are called prase. Pliny, however, gives the chrysolase as the third variety of his beryl, paler or yellower than the ordinary one, and probably means by it (according to Mr. King) the Indian Chrysolase. But a more approved identification is chrysolase, only with a bluish tint, and thus something like turquoise, has been found in old Egyptian jewellery; and prase was used for scarabaeoid gems in the Levant at least as early as the 6th cent. B.C. So the tenth foundation-stone in the walls of the heavenly city may have been a variety of chrysolase. [r.g.b.]

Chub (212). Ezek.30.5) is mentioned only once in Scripture, in a passage referring to Egypt, where the translations differ considerably. The name does not occur in the LXX., and it is doubtful whether the Greek Ἀθάνατος, "Libyans," must be taken as its equivalent.

Some manuscripts have the variant ܡܴܠܠܐ, which might be compared to the Egyptian reneg, or ghenb, which, in the mystical table of Thothmes III., is the collective name for the nations of the S., the Ethiopians and the Negroes. [e.n.]

Chur (1 Chr.18:8; R.V. Chus). [Berogotha.]

Church. (1) Meaning of the Name. The word church is found in the Teutonic and Slavonic languages generally; e.g. Anglo-Saxon cire, Scottish kirk, German Kirche, Swedish kyrka, Polish cerkiew. It is usually thought to be derived from κυράκων, "the house of the Lord." Other derivations which have been suggested, but are now little accepted, are from the Lat. circus, circulus, and the Gothic kēlku (a tower, or upper chamber). The Gk. ἔκκλησια, which "church" is used to translate, denotes those who are called out from their tents or houses to the assembly; and so the assembly that gathered together in the LXX. It occurs frequently to translate gāhāl, e.g. Deut.18.16. (2) The Church in the Gospels. The word ἔκκλησια occurs in the gospels only twice: in Mt.16.18, "Thou art Peter, and upon this rock I will build My Church"; and 18.17, "If he refuse to hear them, tell unto the Church; and if he refuse to hear the Church also, let him be unto thee as the Gentile and the publican." In 16.18 the thought is closely connected with the kingdom of heaven; for our Lord goes on to say to St. Peter, "I will give unto thee the keys of the kingdom of heaven." Though the kingdom of heaven has a wider connotation than the earthly Church, yet the Church on earth is the kingdom of heaven in its outward and visible aspect. As such the Church has outward marks and organization. For admission into it baptism is necessary (Jn.3.3,5); to those who are in it the reception of the Holy Communion is commanded (Lk.22.19); the parables of the wheat and the tares, of the king's son cast out by the marriage feast, show that those of different inner character will be included in it and that some who have been in it will eventually be cast out from the presence of God, conditions which could not be fulfilled unless the Church was outwardly known and constituted (Mt.16.19, 20, 22.11-14). The same fact of the visible nature of the Church is shown also in the pains taken by our Lord in the training of the apostles to be the nucleus of the Church. Yet the consideration of other aspects of the kingdom of heaven shows plainly that this outward organization is a means to promote its spiritual life, its fellowship, the development of spiritual love and purity, the seeking of righteousness, the doing the will of the Father, the accomplishment of difficult tasks beyond the power of man unaided by divine grace, the recognition of claims on human love, the possession of characteristics going so deep as poverty of spirit, mourning, meekness, earnest desire for righteousness, mercy, pureness of heart, the love of peace, the willingness to be persecuted for the sake of righteousness, are all needed in those who are to justify their place in the Church [Mt.5.3-10, 13,19,20,6,33,7,21,18.1-4,19.14,23-26;
CHURCH

164

CHURCH

1Ch. 1.15, 12, 34; 2Ch. 8.10, 15, 17, 20, 21. [King-

The same characteristics of outward marks and

inward and spiritual life are seen in the Church

in the history in Acts. Baptism was the means of

admission (2.38-41, 8.12, 13, 16, 36, 39, 9.18, 10.

47, 48, 16.14, 15, 33, 18.8, 19.1-5; see also Bac-

tism). Those thus admitted by baptism were

in the fellowship of the apostles (2.42); they

formed part of a definite body of disciples (2.

41, 17.9, 26, 27); in the earliest days at Jerusa-

lem they took part together in the temple ser-

c
e

vices (2.46); they received Confirmation in the

Laying on of hands (8.14-17, 19.6); they took

part in the Holy Communion in the breaking of

bread (2.42, 46, 20.7-11); they frequently, though not of obligation, sold

their property for the common good of the

whole body (2.44, 45, 4.32-37, 5.1-11); as comprising

one society they were known as the Church

(5.18, 8.1, 3, 9.31, 11.22-26, 12.1, 5, 13.1, 14, 23, 27.

15.18, 19, 22, 20). The Church was thus an

outward society, spiritual qualifications of

reputation and belief were requisite in adults

who should join it (2.37, 38, 16.30, 31); and all that is
told of the life postulates that spiritual earnestness and devotion were

regarded as necessities for anyone who

regarded the Church as his spiritual home.

At the first the Church was a Jewish community,

though some of its earliest members were not

Jewish by nationality, but Hellenic Jews

(2.6, 9-11, 14, 4.36, 6.1, 3, 5). But its limits were

rapidly extended. Samaritans and the Ethio-

pians were next converted, and the

Samaritans confirmed (8.5, 17, 27-38); that

the privileges of the gospel might be received by

the Gentiles was shown in the vision seen by

St. Peter at Joppa, and the reception of

the Holy Ghost by Cornelius and his company at

Caesarea—so that baptism was administered

to them by the command of St. Peter; and,

though at first there were doubts at Jerusalem,

the apostles and brethren in Judaea eventually

"glorified God, saying, Then to the Gentiles also hath God granted repentance unto life"

preached at Antioch to Greeks (11.20, with the

words "Eλληνες, of which is the likely

translation). St. Paul and St. Barnabas turned

to the Gentiles at Antioch of Pisidia,

converted Greeks there and at Iconium, and

announced at Antioch that God "had opened

a door of faith unto the Gentiles" (13.46-48, 14.

1.27); at the Council of Jerusalem the way

was made clear for missionary work among the

Gentiles, and the recognition of their position

in the Church by the declaration that circum-

cision and compliance with the obligations of

the Jewish ceremonial law were not to be

required from them (15.1-20). As an indication

of the common and united life of all Christians

in one society, the use of the word Church will

remain important in them and in the Revela-

tion later.

(4) The Church in the Letters. The Church in the use of the world Church to denote a

local body, whether in relation to a house, a

city, or a country (Rom. 16.1-3, 4; 1 Cor. 1.2, 16, 19;

2 Cor. 1.1, 8, 11; Gal. 1.2; Col. 4.15, 16; 1 Th.

1.1, 2.14; 2 Th. 1.1; Rev. 1.4, 11, 20, 21, 8, 12,

13, 3.7, 14). But these local bodies are called

"churches" simply because they are parts of

the Universal Church. Thus St. Paul speaks

repeatedly of the Church as a whole—as one

society. To it, as a whole, offences may be

given (1 Cor. 10.32); in it, as a whole, apostles

and prophets and teachers have been set

by God (12.28); he had himself in the days

preceding his conversion persecuted it as a

whole (1 Cor. 15.9; Gal. 1.13; Php 3.6). The

explanation of this fact, that Christians every-

where and all local churches make up the

society of the Universal Church, is given in St.

Paul's teaching that the Church is the body of

Christ. It is a result of the gifts of member-

ship of Christ and partaking of the Holy Ghost

communicated in baptism, and of the gifts of

the Holy Ghost in confirmation [BAPTISM], and

of the предоставление власти of the Church, to which he alludes as a customary

and recognized part of the ordinary worship of

the Church (1 Cor. 10.16-22, 11.23-33), that

the supernatural society of the whole Church is

the body sometimes described as itself the

body of Christ, and sometimes spoken of as the

body of which Christ is the Head, the Church

as the Body of Christ, with its marvellous

and far-reaching consequences, is not con-

fined to one period in St. Paul's life, or to one

set of his epistles (see Ilc. supra). The
doctrine that the Church is the Body of Christ, and

that Christ is the Head of the Church, must be

linked St. Paul's teaching that the Church is the bride

of Christ. What is fundamental in this idea is

found in 1 Corinthians in connexion with the

view of Christians as members of Christ and in

connexion with the view of the Church as a whole.

More especially is it found in 2 Corinthians, where a parallel is drawn between

earthly striving, and the distinction between

Marriage and the Church is described as a

practical exhortation against sins of the

body (1 Cor. 6.15-20). A little later it appears

more explicitly in 2 Corinthians in a statement that

Christians have been betrothed to Christ

with the object of being presented to Him in

purity (2 Cor. 11.2). Later, again, the thought

is developed with care and at some length in

Ephesians, where a parallel is drawn between

earthly marriage and the relation between

Christ and the Church, and the thought is in

close connexion with those of Christ as the

Head of the Church and the Saviour of the

body. This comparison leads up to the

conclusion, "The twain shall become one flesh."

This mystery is great; but I speak in regard of Christ and of the Church" (Eph. 5.23-32).

In thus describing the Church as the bride

of Christ, St. Paul was carrying out the idea mys-

tically contained in Ps. 45.10-15. In his teaching

the Church is so viewed even in the present
day, that the Epistle to the Ephesians is a picture of the Church in her heavenly glory, in

which she is represented as the wife of the
Lamb, made ready for His marriage, as "a bride adorned for her husband," as the bride, the church, the Lamb's bride, is described (Revel.19.7, 21.17). The aspect of the Church as the temple of God, founded on our Lord's words in Mt.16.18, is found, like the teaching about the bride, in different periods of St. Paul's writings. The general idea of the work of the ministry as a work of building is in 2Cor.3.10, 11. This leads up to the aspect of Christians collectively as the temple or sanctuary of God, as inasmuch as they are indwelt by the Holy Ghost (3.16), and later Christians individually are spoken of as temples or sanctuaries of the Holy Ghost (6.19). The idea of Christians collectively as the temple or sanctuary of God occurs again in 2Cor.6.16, 17, and more fully explained in Eph.2.19-22. The Church, being thus the Body and bride of Christ, and the temple of God, has certain definite characteristics. In our Lord's teaching, the idea of the external unity of the Church is conveyed in the expression "one flock" (Jn.10.16). St. Paul tells us that the Church is a temple of God which results from participation in the one life of Christ is suggested by the comparison of the vine and the branches (15.1-8). These two aspects of the unity of the Church are found in St. Paul's writings, and again at different periods in Corinthians and in Ephesians. If the Church is considered in the older sense, and of some who are within her borders are sinners. St. Paul speaks of grievous sins on the part of those who are in the society of "the saints" (1Cor.5.12, cases in which one who is "named a brother" is "a fornicator, or covetous, or an idolator, or a reviler, or a drunkard, or an extortioner," have to be considered (5.11); he contemplates the building of work of very different qualities on the foundation Christ (3.11), declares that the "treasure" of the ministry is "in earthen vessels" (2Cor.4.7); and describes the "great house" of the Church as containing "not only vessels of gold and of silver, but also of wood and of earth; and one unto the faithful steward, and some unto the unfaithful steward," (2Tim.2.20). A different expression of the same fundamental truth is in the teaching of St. John that, while no one who is true to the state of regeneration in which his baptism has placed him can acquiesce in committing sin (1Jn.3.9), nevertheless, the lives of Christians are (as a matter of fact) marked by some sins (1.8, 9). (5) The Authority of the Church. The Church is represented in N.T. as having the guidance of the Holy Ghost and the authority of Christ (Mt.16.18,18.17; Jn.14.16, 26.16,13; Ac.1.2, 3.4,14-36,15.28; 2Cor.2.10,10.8; Gal.1.1,11,12; 1Tim.3.15). Thus, there is a divine sanction for the power of the Church. The authority is seen to have been exercised. The apostles exercised authority as teachers and rulers in their witness to our Lord and the facts' of His earthly life (e.g. Ac.1.8,22,4.33;) in making known the conditions of entrance into the Church (2.38,16.31,33); in instituting the office of the seven men of the apostles' report," and in appointing to it those on whom they laid their hands (6.26;); and in the proceedings of the Council of Jerusalem (15.1-29). In connexion with these matters, a prominent part was taken by St. Peter at the appointment of a new apostle in
the place of Judas (1.15) and the declaration of the conditions of entrance into the Church to the first converts (2.38); and some interpreters have assigned to him a chief place at the Council of Jerusalem (15.7.14), though there is a much stronger probability that the president was St. James, as being the chief at Jerusalem, while not so elsewhere (15.13.10). The selection of the two candidates from which the successor to Judas was to be chosen by lot was the work of the brethren in general (1.15, 16.23-26). The "seven men of good report" were chosen by the whole multitude of the disciples before their appointment and ordination by the apostles (6.2-6). Presbyters as well as the apostles were members of the Church, and joined with apostles in writing the formal letter declaring the decision, although the decisive voices at the council appear to have been those of the apostles; and both presbyters and laity shared with them in making the decisions of the council known (15.2.4.8.6.12.13.22.23). In the Epp. St. Paul exercises authority inapart from the apostles (e.g. 1Cor.15), and morality (e.g. 1Cor.5; 1Tim.1.20), and Church government (see the Pastoral Epistles, passim). To some extent the members of the Church in general, or the presbyters in particular, are associated with him in this exercise of authority (1Cor.5.5,12; 11.16,15.17; 2Cor.2.6.10; Eph.4.11, 27; Tit.1.6). [RELATIONSHIP.] (6) The Ministry of the Church. Before our Lord's ascension the apostles had been gradually and at intervals constituted as the ministry of the Church, with a commission to baptize, to administer the Eucharist, and to rule (Mt.16.19,17; 18.28-19; Lu.22.19; Ac.1.2-3; 3Cor.11.23-25), and had received some anticipatory gift of the Holy Ghost (Jn.20.22.23). Through the outpouring of the Holy Ghost on the Christian society, on the Day of Pentecost, those who thus formed the original ministry of the Church then possessed the effective use of the ministerial authority which they had received from our Lord (1Jn.24.19; Ac.1.4-8). The first delegation of any part of their ministerial position was in the appointment of the "seven men of good report," chosen by the Christian community, and appointed and ordained by the apostles as the laying on of hands (Ac.6.2-6). The character of the work afterwards done by two of these, SS. Stephen and Philip (6.8-10; 8.5-13, 26-40), joined with the subsequent almost universal tradition of the Church, makes it highly probable that these were the original "deacons" in the sense of being the second holders of the third order of the ministry, though it is not impossible that they held a unique office, from which both the subsequent presbyters and the subsequent diaconate were developed. [DEACON.] There is no explicit mention in N.T. of the institution of the office of presbyter, the second order of the ministry. Presbyters are referred to in Ac.11.30, 14.23, 15.24, 6.22.23, 16.4, 20.17, 21.18.23.14; 1Tim.5.1,2,17. 19; Tit.1.5; Jas.5.14; 1Pt.5.1; 1Jn.3.1; 3Jn.1. 1. The name "bishop" (ἐπίσκοπος) is applied to them in Ac.20.28; 1Pt.1.1; 1Tim.3.2; Tit.1.7; 1Jn.3.1. [BISHOP.] At Ephesus and Crete St. Timothy and St. Titus are seen to have possessed the authority of St. Paul to rule and ordain in the local churches of which they had charge (e.g. 1Tim.1.3,2.1,2; 8.9,11.5.19-22; 2Tim.1.13,4.2; Tit.1.5,13,2; 2Tim.3.10,11). St. Timothy was ordained or consecrated to this office by the laying on of St. Paul's hands (διὰ τὴν ἐπίσκοπον τῶν χεριῶν μου), together with the laying on of the hands of the presbyters (μετὰ ἐπίσκοπων τῶν χεριῶν τοῦ πρεσβυτερίου, 2Tim.1.6; 1Tim.4.14). In the Acts prophets and teachers are mentioned in 11.27, 28.13.1-3, 15.21.10.11, as foretelling the future, ministering to the Lord, laying hands on SS. Barnabas and Paul either in a formal act of appointment or, as is much more probable, in sending them out on a special mission, and preaching. St. Paul mentions "prophets," "teachers," "workers of "miracles," and possessors of "gifts of healings, helps, governments, divers kinds of tongues," as well as "apostles" in 1Cor.12.28-30; and, "prophets," "evangelists," "pastors," and "teachers," as well as "apostles" in Eph.4.11. Of these the word "apostolic" should be understood to mean "work done rather than the designation of an office; "prophets" and "teachers" may have denoted some such formal office as is held by the apostolic delegates SS. Timothy and Titus, or may also have been descriptive of work done. [EVANGELIST.] In the various parts of N.T. we find several mentions of the following officers of the ministry: (i) the apostles; (ii) apostolic delegates, such as St. Timothy and St. Titus; (iii) "presbyters" or "bishops," forming part of the local ministry; (iv) deacons, also part of the local ministry; (v) "prophets" and "teachers," supposing that these held a formal office; the rite of ordination consisted in the laying on of hands. The persons mentioned as ordaining are the apostles and the apostolic delegates, to whom must be added the "prophets" and "teachers" on the less likely hypothesis that their laying on of hands on SS. Barnabas and Paul were for the confirmation or validation of the work done. [DEACONESS: LAYING ON OF HANDS.] Meyrick, in Smith's D.B. (2nd ed.), i. 593-601; also in 1st ed. vol. iii. pp. c-ccviii; Armitage Robinson in Encycl. Bibl. i. 820-827; Gayford in Hastings, D.B. i. 425-439; Hort, Christian Ecclesiis; Conc. Church and Ministry; Mohrley, Ministerial Privilege; Armitage Robinson, Ephesians, pp. ii.15, 152; Stone, The Church and the Church, its Ministry and Authority; Murray's New English Dict. ii. 102, 103. [BISH.] Churches, Robbers of. [ROBBERS OF CHURCHES.] Chushan-rishathaim, the king of Mesopotamia (Arak-Nahrain), who oppressed Israel in the generation immediately following Joshua (Judg.3.8). His dominions probably lay between the Euphrates and the Khabur. Israel was freed from Chushan-rishathaim's yoke at the end of 8 years by Othniel, Caleb's nephew (Judg.3.10), and nothing more is heard of Mesopotamia as an aggressive power. The increased power of Assyria, c. 1270 B.C., would naturally check the activity of the smaller nations within her reach. Chusí (see in Vat. Ms., Jth.7.18), a town noticed as being near Ekkebel. Now
CHUZA

Kuzah, a village 6 miles S. of Shechem and 5 miles W. of Agraphe or Ekrebol. [c.r.c.]

Chuza, house-steward of Herod Antipas (Lu.8.3), and husband of Joanna.

[Herod's cup.] Heathen mount occurs in tK.6.15 only, and the verb in ver. 9, and in Deut.33.21, tK.7.3,7, Je.22.14, Hag.1.4. The roofs of the temple and palace of Jerusalem were of cedar, the rafters covered by planks on which thin plates of gold were nailed (2Chr.3.9); such ceilings were also painted red (Je.22.14) and no doubt resembled the brightly painted wooden ceilings of the old Arab palaces in Damascus, and in other Syrian cities, which may still be seen. Another word (Heb. sheqeph, tK.7.5) is supposed by Gesenius to mean a ceiling rather than a "window," the Arab. saqafi meaning still a "ceiling.

Cilicia, a maritime province in the S.E. of Asia Minor, bordering on Pamphylia in the W., Lycaonia and Cappadocia in the N., and Syria in the E. Lofty mountain chains separate it from these provinces, Mons Amanus from Syria, and Antitaurus from Cappadocia. The S. boundary is formed by the rivers of Antitaurus, and was denominated Trachaea (rough), in contradistinction to Pedias, the level district in the E. The connexion between the Jews and Cilicia dates from the time when it became part of the Syrian kingdom. In the Apostolic age they were visited by the apostle Paul (Gal.1.21; Ac.9.30), and again in his second apostolical journey, when he entered it on the side of Syria, and crossed Antitaurus by the Plate. Cilicia is thus included in Lycaonia (Ac.15.41).

Cinnamon, a well-known aromatic substance, the rind of the Laurus cinnamomum, called Korunda-gauhah in Ceylon. It is mentioned in Ex.30.23 as an ingredient of the holy anointing oil, which Moses was commanded to prepare; in Pr.7.17 as a perfume for the bed; and in Mt.23.20:21 as a seasoning. It is derived from the cinnamon tree, the image which is the image of the spouse. In Rev.18.13 it is included among the merchandise of Babylon. It was imported into Judaea by the Phoenicians or the Arabsians, and is now found in Sumatra, Borneo, China, etc., but chiefly, and of the best quality, in the S.W. of Ceylon. It probably first reached India and Phoenicia overland by way of Persia from China. The Heb., Gk., and Eng. words for cinnamom are the same. Wyclif keeps to the Latin term canel (canella, a little cane). Pliny says (xii. 28): "In Syria there is a drug which they call Cinnamum Carpyon. A juice or oil of this is pressed out of a certain nut. This Cinnamon differeth much in form from the sticke of true Cinnamon, in smell, it commeth neere." Herodotus says (iii. 107, 111) that the Greeks got the name from the Phoenicians. In another place (xvi. 32) Pliny goes out of his way to say: "The Cinnamon of Asia is a much more refreshing herb than those either the air or earth of Syria." [R.c.n.t.]

Cinneroth. [Chinnereth.]

Cirama. The people of Cirama (Kirama) and Gabdes came up with Zerubbabel from Babylon (Ezr.5.20). The text is corrupt; Ezra (2.26) and Nehemiah (7.30) have Ramaah (aRamaa or Saba) (Ezr.5.20).

Circumcision. Until comparatively modern times it has always been assumed that circumcision was, at least originally, an exclusively Jewish rite; this is, however, very improbable, and in the Southern and Eastern worlds circumcision is exceedingly prevalent, though only amongst certain peoples or religions. Mohammed was not circumcised, nor is circumcision enjoined in the Koran, but it has been practised almost universally by his followers for many centuries. Probably this is the outcome of a practice long anterior to Islam, and very possibly it is as old as the circumcision of Ismael (Gen.17.12). Various other nations also have the custom e.g. certain tribes of Bantus, Hottentots, and Australian aborigines. Herodotus (ii. 44) speaks of Egyptians, Chilians, Ethiopians, and Phoenicians as circumcised. But it is evident that either the nations surrounding the Hebrews in Scriptural times did not observe circumcision, or that the tribe of Judah did not always observe it in the case of individuals, not as a national custom. The constant use in both O. and N.T. of the phrase "the uncircumcised" to distinguish those who were not Hebrews is sufficient evidence of this—e.g. 2Sam.1.20; Ezk.28.10; Ac.11.3; Ro.3.30; Gal.2.7, etc. The curious observation of the Rabbins, that circumcision was enjoined in the Koran, is another explanation. The words "made themselves uncircumcised" have been taken to refer to some surgical operation, which should at least render the circumcision of those who practised it less obvious when they were stripped for the games in the gymnasium which Antiuchus Epiphanes had built in Jerusalem. This view is that of many of the Jewish commentators, and at first sight seems to be supported by the writings of contemporary Rabbis. Thus, R. Eleazer Hammudai (d. 69 A.D.) says, "He who profanes things sacred... and makes void the covenant of Abraham our father... has no right to call himself a Jew" (in the Book of Jubilees, Hyrcanus II, speaks of those who "make the members of their body appear like those of the Gentiles." On the other hand, the Jewish commentator Roschi interprets these passages as referring to those who, in obedience to the commands of the heathen tyrants, were not circumcised. As a matter of fact, any operation for the concealment of circumcision is almost, if not quite, impossible, and the phrase in tMac. should probably be taken to refer to the moral and spiritual sinking of the people concerned to the level of the "uncircumcised." Like the other laws given to the Jews, this command is based upon the condition of the race lived upon pure morals and religion. To a nation living in a hot country, with not too great facilities for personal cleanliness, the avoidance of accumulations around the glans is of no small importance, while experience goes to show that those tribes whose males are circumcised are, as a rule, much less liable to abscesses and inflamations of the glans than uncircumcised nations. The comparative insensitiveness of the glans, and the absence of accumulations of dirt or matter, contributes to this result, and it
is a curious fact that, while many circumcised people practise polygamy, sexual vice in its strict sense, and especially in the more abnormal forms, is comparatively unknown among such, although exceedingly prevalent in surrounding tribes. [CRIMES; FAMILY; Moses.] In St. Paul's time the Jews of Philippi wished to compel the Gentile converts to be circumcised in order to make them acceptable to their circumcision and, in order to get it, a play upon words (καταραθῶν, περιτομῆς) describing this circumcision as the circumcision of the conscience (Ph. 3:3). For the conflict in the early Church (Ac. 15:1) with regard to the circumcision of the Gentiles, see Paul. St. Paul considered himself the apostle of the unconcummption and St. Peter of "the circumcision" (Gal. 2:7, 8), and in his different treatment of the cases of Timothy (Ac. 16:3) and Titus (Gal. 2:3) respectively, which treatment was wholly consistent with his words and general principles. For the spirit attached to the circumcision and its application to Christian doctrine by St. Paul, see Ro. 2:25; Col. 2:11, etc. [F.J.]

Cis (Ac. 13:21) = Kish, 1.
Cisai (Est. Apoc. 11:2) = Kish, 2.

Cistern (Heb. בּוֹר, "pith"). These were cut in rock and filled with cement (Je. 2:13), and if not repaired, left only "broken cisterns." They are numerous in those parts of Palestine where the soft limestone is on the surface, and where in consequence there are no springs. They are shaped like a short-necked bottle, apparently with a wheel for the bucket, each having a crest (Ec. 12:6) in some cases. On the Moabite Stone, in 8th cent. B.C., cisterns in a city are noticed. The rain-water from the roofs was collected in them. They were private property (2 K. 18:31; Pr. 5:15; Is. 36:16). Jeremiah was let down into such a pit (A.V. dungeon), where only mud remained (Je. 38:6), and was drawn up by cords (12). In A.V. ord. in 22:26, 23:29, and "dungeon" in 41:14 (cf. 39:20-23). [C.R.C.]

Cithern. This instrument is mentioned in 1 Mac. 4:51, where A.V. gives, "With songs and citherns and harps and cymbals, as a translation of κιθάρα καὶ κιθάρας καὶ κιθάρας και κιθάρας. R.V. renders, "With songs and harps and lutes and cymbals." It has been held that κιθάρα is a gloss to explain the less familiar κιθάρας. This is supported by the fact that both words are used in the LXX. to translate the Heb. קִיטָר, the former being found in Ps., Job, and Is., and the latter in Sam., Kings, and Chron. If we do not adopt the supposition of a gloss, but accept the text as it stands, we must remember that 1 Mac. was undoubtedly originally written in Heb., and the terms κιθάρας καὶ κιθάρας stand for בּית-חדימ and בּית-חדימ. Kithara, the word translated "cithern," therefore here = κιθάρα, which is usually rendered by ἐμβαθροῦ. Our view of the nature of the cithern, or rather of the κιθάρα, in the passage will accordingly depend on what we suppose the Heb. κιθάρα to have been. [PSALM.] [J.A.] Citites (Heb. צִית or צ'ל; Assyr. uru), "Fenced Cities" (Heb. יבּוֹר), as distinguished from girya (town), kaphar (village), and ḫett (enclosure). The expression יבּוֹר va-ṭāḇūḥ (A.V. shut up or left; Deut. 32:36; 1 K. 14:10, etc.) seems to contrast a shut-up or fortified town with a temporary dwelling usually built in summer (2 Sam. 20:15), as waters of habitation (Je. 3:19, 30), or stood on one of the towers (2 K. 9:17) which strengthened the wall (Ps. 48:12). Such towers existed also in the villages (1 Chr. 27:25; 2 Chr. 26:10). On the city towers were engines to shoot darts and stones (2 Chr. 26:15), which defence opposed the filling of the ditch and the battering of wall (2 Sam. 20:15). Water was provided by a CONDUIT, or by a rock aqueduct; and at Jerusalem and Gibeaon a rock passage led down from within the city to a cave spring. The walls also stood on rock scarps, with an outer fosse. Samaria stood siege for 3 years (2 K. 18:10), and Jerusalem for 2 years (2 Chr. 26:12). As regards size, Babylonian and Memphis were very large cities. Jerusalem at its largest covered 300 acres, and so did Caesarea. Tyre on its island occupied only 100 acres, as did Rabbath-ammon in a restricted site. The Egyptian bas-reliefs represent Ascalon, and Kadesh of the Hittites, as cities with walls and towers in 14th cent. B.C. The Assyrian picture of LACHISH shows a city with 24 towers, having inside it both stone houses with two storeys and also cabins of mud with wooden props for the roof. Thothmes III. relates that the defeated king of Megido in 16th cent. B.C. was dragged up by the walls by his friends. Mesha of Moab (9th cent. B.C.) records that he caused cisterns to be dug inside his city, and fortified it by a wall on a mound (ארלה), and by an "additional" (试点工作) wall. Semachob, in 702 B.C., says that Hezekiah was "obliged to shut the gates of his city." [C.R.C.]

Cities of Refuge (Num. 35:6, 13, 15; Deut. 4:41-13:19.2); 1 Jos. 20-21. These cities, 3 E. and 3 W. of Jordan, appointed for Houbites as sanctuaries, were in the N., S., and centre of the land of Israel, on either side of the river. They are described under their names: Golan (Sib'im el Judin), Ramoth (Kemein), and Bezer (unknown). E. of Jordan: Kedesh (Qedes). Shechem (Nablas), and Hebron (el Khadith). W. of Jordan; and were priestly cities, apparently with walls in all cases. [C.R.C.]

Cities of the Levites (Jos. 21:13-42); 1 Chr. 6:54-55). These 48 walled cities are noticed only in connexion with the Levites, in the cases of Beth-shemesh of Judah
CITIES OF THE PLAIN

[iSam.6.15] and Anathoth (I.K.2.26). They had “suburbs,” or open spaces (mighrashim: see VILLAGES), extending about a quarter of a mile beyond the wall (Num.35.4); and the fields, to double that distance, belonged to the Levites on each side of the town (ver. 5; Lev.25.34).

Cities of the Plain. Before the destruction of these four cities the “whole kikkār [A.V. plain] of Jordan,” as seen from E. of Bethel, is said to have been like Eden (Gen.13.10; 18.14; Jer.27.1). The fields were, therefore, devoted to the culture of fruits and flowers, of which the Israelites were forbidden to partake, save in the month of Kiska (Lev.18.25). The burning, according to Josephus) the kikkār was ruined, and the pillar of salt no doubt resembled those still visible near the Dead Sea (Gen.19.25.26; Deut.29.23; Is.1.9.10; Am.4.11; Ho.11.8). The plain produced only the bitter apples of Sodom (the ‘osher tree” of Deut.32.32), included the Salt Sea (Gen.14.3): it had already been full of bitumen, such as is found still on the hills S.W. of Jericho and in the Dead Sea (ver. 10). Abraham (Gen.19.28), from some high hill near Hebron, looked “towards” Sodom and Gomorrah, and saw the smoke in the Jordan valley (Gen.14.22). In the days of the Babylonish Captivity (Bar.5.30.4), now Kefr Babara, is a hill 3 miles E. of Hebron (Surv. W. Pal. iii. p. 304), whence a view is gained over the desert of Judah. The Dead Sea and Jericho are hidden, but the smoke in the valley might easily be seen. The cities were not only in the kikkār of Jordan, but the desolate character of the plain is indicated by Gen.29.23, that suggests they were to the S. of the same, and this is also indicated by the proximity to Zoar (Tell Shaghrā): see Gen.19.15; 23. They have left no trace of their existence, unless in the case of Admah. (ADAM, CITY.) Josephus seems to have supposed that they lay S. of the Dead Sea, as the road from Egypt to Arabia (see i. Anti. xi. 4; 4 Wars viii. 4); an error (which still survives), for the “kikkār of Jordan” was not a S. of the mouth of that river. It is a curious coincidence, perhaps, that nearly all the required names still apply to natural features of the ground near Phaësli (Fūsālī; 12 miles N. of N. of the Dead Sea) and Sālim (Sālīm), both of which are places in the mountains S. of Hebron, and the road from Hebron to the Dead Sea, 3 miles E. of Sālim, often supposed to be the Salem of Melchizedek, where Abraham met the king of Sodom (Gen.14.18.21). Here we find ed Damēth (Admah) and Talat ‘Amra (ascent of Gomorrah) ; a valley called Siddith (Sidim), and another called el ḫmnir, or “of bitumen”; but Sodom (burning) is not represented. It was probably farther S. and near Jordan, being the city whence Lot fled to Zoar. The valley is now full of salt springs, and has a salt soil, even N. of Fūsālī; but the part near the hills is carpeted with grass and flowers in spring. [SALT SEA.]

Citizens (iMac.8.5). (CHRISTIAN.)

Clement, a fellow-labourer of St. Paul at Philippi. It was generally supposed that this Clement was identical with Clement of Rome. The difficulties as to date and place are not insuperable; and there

CLEMENT

inherited, not purchased like Lysias (22.28). Many Jews of Asia Minor were “Romans” (Josephus, 11 Anti. x.). Citizenship is mentioned metaphorically, Eph.2.19. Ph.1.27.3.20 (R.V. citizenship, mark, commonwealth). [H.S.]

Citron. [APPLE-TREE.]

Claudia (Ac.27.16), a small island nearly due W. of Cape Matała on the S. coast of Crete, and nearly due S. of Phænicè. It is still called Claudana, or Gaudonesi, by the Greeks, which the Italians have corrupted into Gozzo. The ship which St. Paul was seized by the gale a little after passing Cape Matała, when on her way from Fair Havens to Phænicè (Ac.27.12-17). The storm came from the island (ver. 14), and there was danger lest the ship should be driven into the African Syrtis (ver. 17). We read that she was driven to Clauda, but in regard to this island, where there would be smooth water, as the gal from the N.E. or E.N.E.

Claudia, a Christian woman mentioned in 2Tim.4.21: probably a freedwoman or slave of “Caesar’s household.” Her identification with the British maiden whose marriage with Claudius (Suetonius, Claud. xvi.) is mentioned by Josephus (Ant. xxv.) must be abandoned. See Lightfoot, Ap. Fathers, Clem. i. pp. 76-79. [E.R.B.]

Claudius, fourth emperor of Rome, 41–54 AD. He comes into N.T. history (1) in regard of the famine prophesied by Agabus, which is said to have taken place in his reign (Ac.11.28). It is not known whether he could have inflicted famine in all the (Roman) world. No such universal famine is recorded, but local famines throughout the empire were characteristic of this reign (Suetonius, Claud. xxv.): and Josephus mentions a famine in Judaea at a date very soon after the probable date of the prophecy (Josephus, 20 Anti. ii. 5, v. 2). (2) The other mention of Claudius in N.T. is regarding his expulsion of all Jews from Rome, including Aquila and Priscilla (Ac.18.2). Suetonius (Claud. xxv.) says that he expelled them because they were constantly creating disturbances, and he attributes these to “Christus,” which possibly means that the enmity of the Jews to the Christians was due to their reverence of Christ, but however, was a common name, and need not be a mistake for Christus. Claudius’ general policy was favourable to the Jews, partly because of his special obligations to Herod Agrippa I. (Josephus, 19 Anti. iv. v.). [E.R.B.]

Claudius Lysias. [LYSIAS, CLAUDIUS.]

Clay. The word most commonly used for “potter’s clay” is hömer (Is.29.16; Je.18.4, etc.). In Palestine vessels of dark blue clay are now chiefly made at Gaza. Another use of clay was for sealing (Job 38.14). Wine jars in Egypt and mummy pits were thus sealed, and remains of clay are still found adhering to the stone door-jamb. The seal used for public documents was pressed on the moist clay, and the tablet then placed in the fire and baked. Clay tablets with writing on them have been discovered recently on the sites of Lachish, Taanach, and Gezer. [HANDBRAFTS, (4).]

Clement, a fellow-labourer of St. Paul at Philippi. It was generally supposed that this Clement was identical with Clement of Rome.
would be a coincidence between the nature of the charge given to Clement in Ph.4.3 and his endeavour long afterwards to compose (by the epistle which bears his name) the dissensions of the Corinthian church. [K.E.B.]

Cleopas. [Alphæus.]

Cleopatra.—1. "The wife of Ptolemy" (Esth.1:11) was probably the granddaughter of Antiochus the Great, and wife of Ptolemy VI. (Philonictor.—2. A daughter of Ptolemy VI. (Philonictor) and Cleopatra, 1. She was given by her father in marriage, first to Alexander Balas, 150 B.C. (1Mac.10:58), and then, 146 B.C., to his rival Demetrius Soter (11:12). While Demetrius was a prisoner in Parthia she married his brother Antiochus VII. (Studec). She afterwards murdered Seleucus, her eldest son by Demetrius; and was herself poisoned 120 B.C. by a draught she had prepared for her second son Antiochus VIII.

Cleophas (R.V. Clopas). It is doubtful whether this is the same person as Alphæus. It has been, however, suggested that Κλεοφας (Jn.19:25) is derived from Gk. κλείφας, "to conceal," and that thus it might etymologically correspond to Alphæus from Aram. 'alphat = 'covering over.' Bp. Lightfoot's alternative suggestion is discussed under Alphæus.

Cloe. The actual word does not often occur in either A.V. or R.V. It strictly represents the flowing outer garment worn by the Jews (Mt.5:10; Lk.6:29); and this in O.T. is represented by several different words. [Dress.] In 2Tim.4:13 it represents φιλάνθρωπος (Lat. paenula), which was of a heavier and rougher material, and in shape and original purpose is thought to be the foundation of the Enchiridion. The following metaphorical uses of the word should be noted: Is.59:17; 1Th.2:5 (στράτευμα; cf. Jn.15:22); and 1Pe.2:16 (πτερανα). [C.E.]

Cloud. Among both Hebrews and Arabs the cloud was closely studied with a view to prognosticating rain (1K.18:14), and they enter largely into Oriental imagery. With both peoples a cloud without rain is a simile for want without performance (Pr.16:15; Is.18:4,15; Jl.12; Freytag, Arab. Prov. xii. 38, xxiv. 177). The morning or summer cloud is a figure for transitoriness (Job 30:15; 42:6,4; Freytag, xii.87), or of interpolation (Lam.2:1,3,44). In times of crisis Jehovah comes from Sinai in the midst of a thunderstorm (Judg.5:15; Ps.68:8; Ezek.1:4), riding upon a cloud (Is.19:1), called a "cherub" (Ps.18:10 = 2Sam.22:11). A bright cloud at times rested on the mercy-seat (Ex.16:2; Nm.8:16,11; 2Ch.5:14; Ezek.43:4), called by post-Biblical writers Shekinah. [T.H.W.] [Cockatrice.]

Cloud, Pillar of. In their journey from Egypt to Canaan the Israelites were preceded by a pillar of cloud by day and by fire by night. This fact is mentioned in the old narratives, Jno.13:22; Num.14:13-20, as well as in those which are regarded as late (Dent.1:33; Ex.40:38, 1 Pt.). The Lord descended in the cloud to speak with men at the door of the tabernacle (Ex.33:9,10). Reminiscences of these phenomena are found in Ne.9:13, 1S.4,5, and elsewhere. The word translated "pillar" is used for a column of smoke in Judg.20:40, and it has the same significance here. The pillar of cloud and fire made its first appearance at the crossing of the Red Sea, when it sheltered the Israelites from the Egyptians (Ex.14:19,20). Here, however, the rendering of the A.V., "And it was a cloud and darkness to them, but it gave light by night to these," is more manifest. The Heb. is hardly translatable. The Gk. has και ζωοντα ἄνθρωπον καὶ γῆν, καὶ διδῦσθη ἡ γῆ. In Ps.105:30 the cloud is for shade. After the desert period this cloud is not mentioned again until it reappears at the consecration of Solomon's temple (1K.8:10,11; 2Chr.5:13,14). After that cloud is not mentioned until Ezekiel saw this symbol of Jehovah's presence leave the temple for ever (10:3,4,11-23). [T.H.W.]

Cnidus is mentioned in 1Mac.15:23 as one of the Gk. cities which contained Jewish residents in the 2nd cent. B.C., and in Ac.27:7 as a harbour which was passed by St. Paul after leaving Myra, and before running under the heel of the Gorgon. It was a noted town on the extreme S.W. of the peninsula of Asia Minor, on a promontory now called Cape Creo, which projects between the islands of Cos and Rhodes (see Ac.21:1). The remains of Cnidus are those of a city of great magnificence.

Coal, the representative in A.V. of five Heb. words, not found in Gk. (1) The most frequently used is קָוֵל (qeval), a live ember, burning fuel, as distinguished from פֹּה (Pr.26:21). In 2Sam.22:9,13, "coals of fire" are put metaphorically for the lightnings proceeding from God (Ps.18:8,12,13,140:10). The proverbial expression, "Thou shalt heap coals of fire upon his head" (Pr.25:22), is adopted by St. Paul in Ro.12:20, to express metaphorically the burning shame which men must feel when their evil is requited by good. (2) פֹּה (Pr.26:21) this word clearly signifies only not yet lighted. The fuel meant in the above passages is probably charcoal, certainly not coal; for, though mentioned by the Grecian writers, known to Pliny, coal was but rarely and locally used, even by the Romans. (3) RECEP, or Ricpu (I S.6, properly a hot stone). In the narrative of Enijah's miraculous meal (1K.19:6) the word describes the mode in which the cake was baked—viz. on a hot stone, as is still usual in the East. (4) "burning coals," and in margin, "burning diseases." The former meaning is supported by Can.8:6, the latter by Dent.32:24; R.V. has "flery bolts." (5) shôr (Lam.4:8) is rendered in E.V. "their visage is blacker than a coal," "harder than blackness." [Coal. [Dress.]

Coat of mail. [Armors.]

Cock. There appears to be no mention of domesticated poultry in O.T. In N.T. the "cock" is mentioned in reference to St. Peter's denial of our Lord, and indirectly in the word "cock crowing" (Mt.26:34; Mk.14:30,33,36, etc.). Domesticated fowls were known to the ancient Greeks and Romans, and since no mention of them is made in O.T. and no figures of them occur on Egyptian monuments, they were probably introduced into Judea by the Romans, who prized them both as articles of food and for fighting. [Cockatrice.] [Adder; Serpent.]
Cockering. In Syria cocks crow at irregular intervals during the night, but the term is applied definitely to the period preceding dawn. "At dawn," before the cock clok, in the Zendavesta the cock is called "paradars, he who foresees the coming dawn;" and the Jews have a benediction, "Blessed be Thou, O God, ... Who gavest understanding to the cock to distinguish between day and night." (Ber. 60b). Mk.14:30 refers to two cockerings, the first probably being two and the second at dawn (13:35). There is no mention of the first in Mt. 26:34, 1. La. 22:34, Jn. 13:38. The term is applied to the third of the four Watches of the Night (Mk. 13:35). [H.H.]

Cockle (Heb. בָּרָשְׁתַּי) occurs only in Jos. 31:46. Gesenius says that בָּרָשְׁתַּי denotes any bad weeds or fruit, and may in Job signify bad or smutted barley. Harris says the word בָּרָשְׁתַּי or baseh appears to imply a weed, not only noxious but of a fetid smell. But it may mean base in quality. In Wyclif (1382) the reading in Mt.13:25 is: "But, when men slept, his enmye came, and sewed above durnel, or baseh (g'duah), in the midel of the good seed (hay). His reading in Job is thorn. The Aram. (Targum) rendering in Job is noxius herba. Undoubtedly in Mt., Lc., durnel was the plant intended. See the old dictionaries Promptorium Paradurum and Catholicon Anglicum, also the New Eng. Dict. Durnel (Zizania) was Lolium temulentum, a very prevalent and injurious weed in the Mediterranean and Levant. [H.H.]

Colesyria (R.V. Cœlesyria; "hollow Syria"). The name given by the Greeks, after the time of Alexander, to the remarkable valley or hollow (καῖά) which intervenes between Libanus and Anti-libanus, extending nearly 100 miles. The term Colesyria was also used in a much wider sense, to include Damascus and even the country E. of Jordan, through Trachonitis and Peræa to Idumea, including the Arabah. In the Apoc. Colesyria is frequently used somewhat vaguely, almost as an equivalent for Syria (Æsd.2:17, 23, 24, 48, 6:29, 7:1, 8:6, 13:10), Mac. 16:10, 19:5, 19:8, 19:10, 19:11.)

Colossus (the) (R.V. Colossus) the tower of the temple containing the images of the muses and emerods and found only in Is. 6:8, 11, 15. [Ecbatana.]

Colin. [Chest; Burial.]

Cohort. [Army; II.; War.]

Coia, a place (Jb.15:4 only) mentioned with Choba. Possibly Q'dain, a ruin in the Jordan Valley, 5 miles N.E. of El Mekkubbi. [Choba.]

Col-ho'zeh.-1. Father of Shallum (Ne. 3:15).—2. An ancestor of Masseiah, 9 (11:3).

Collnus = Calitas (R.V. 9:23). [Kelaia, 1.]

Collar. Used in A.V. for two different Heb. words, (1) In Job 30:15 of the collar of a coat collar. The Heb. word in Job is בּוֹרְשֵׁתָי from a root meaning "to drop," and is more exactly represented by the R.V. "pendants"; cf. Is. 3:19, R.V., where A.V. has chains.

College, The (R.V. second quarter). 2K.22:14 (A.V.) states that Huldah the prophetess "dwelt in Jerusalem in the college" (Heb. בַּשַמְיָס). The Heb. word in Job is בַּשַמְיָס and from a root meaning "to dwell," and is more exactly represented by the R.V. "pendants"; cf. Is. 3:19, R.V., where A.V. has chains.

College, a designation of Philippi (Ac.16:12). After the battle of Actium, Augustus assigned to his veterans those parts of Italy which had either rebelled or had been transported by the Romans. He divided some of the territories of Antony, and transportated many of the expelled inhabitants to Philippi, Dyrrachium, and other cities. Thus Philippi became a Roman colony with the "futile Italicum," and accordingly we find it described as a "colonia" in inscriptions and upon the coins of Augustus. [Colossi, a city in the upper part of the basin of the Maeander, on one of its affluents named the Lycurus. Two other colonies, Hierapolis and Laodicea, were in its immediate neighbourhood (Col. 2:14, 13:15, 16; see Rev. 1:11, 3:14).]

-Colossians, Epistle to. Colossae fell, as these cities rose. Not before 138 was suspicion of the converted close to the great road which led from Ephesus to the Euphrates. Hence we might conclude that St. Paul passed this way, and founded or confirmed the Colossian church on his third missionary journey (Ac. 18:23, 19:1), but Col. 2:1 seems to show that he had not been there when the epistle was written. He had hoped for this city to be delivered from his Roman imprisonment is clear from Ph. 2:24. Philemon and his slave Onesimus dwelt at Colossae, as did also Archippus and Epaphras. Mr. Hamilton was the first to determine the actual site of the ancient city, at some little distance from the modern village of Chonopeles.

Colossians, Epistle to the. The Pauline authorship has ample external testimony. Irenæus, Clement of Alexandria, Tertullian, Origen (all of 2nd and 3rd cents.), quote Colossians as St. Paul's without a doubt, and still earlier we find probable echoes of its phraseology. Not before 158 was suspicion alleged. The whole epistle was delivered by a Roman, and the epistle itself is the best witness to its own authenticity. Its bold and free expression of thought, and the vivid play throughout of a great personality, make it vastly unlikely that it should be an artificial production of the 2nd cent., an age of declining literary power and one which had (so far as general literary phenomena can guide our opinion) a barren of the particular gifts needed for the art of skilled fabrication. We may quote the brief verdict of Renan, no partial critic: "The epistle presents many features which negative the hypothesis of fabrication." The date of Colossians must lie within the "two years" (Ac. 28:30) of St. Paul's residence at Rome. The conjecture that it, with the other "epistles of the Captivity," was written at Caesarea (see 24:23, 27) has no traditional support, and does not agree with the other epistolary type of which it presents as compared with e.g. Rom. and Cor., which were written shortly before the two years at Caesarea. It was written, probably in 63 A.D., in the
threatening latter years of Nero, but before the great persecution. Whenever written, we may safely affirm that its date is the date of the "Ephesian" epistle (which in fact may be alluded to in [4:16] as "the epistle from Laodicea!"—a circular, travelling from mission to mission). Parallel to epistles and phrases are so numerous in the two epistles that, beyond all reasonable doubt, they are products of the same moment. These parallels may be tabulated with great profit by the student. He will find that Colossians is obviously the more local and particular of the two writings, while probably Ephesians grew up immediately after, in more general forms, on the lines suggested by Colossian problems. Weiss (Einleitung) writes: "The peculiar affinity of the two epistles is cleared up only on the hypothesis that both are the independent but contemporaneous compositions of the same author." Practically, eyes there is a "they were written at the same time," Weiss and both authors impress of St. Paul's wonderful mind." The occasion of writing is readily inferred from the epistle itself. Epaphras, a Colossian, and probably (17) the first evangelist of the place, had visited St. Paul at Rome. His report had much in it to rejoice the apostle. But there was a lack of discipline among the disciples, which tended to minimize the supreme greatness and significance of Jesus Christ, to emphasize rabbinic observances, and also to advocate a "philosophy" more or less occult. Circumcision, Jewish festivals, ceremonial laws of diet, were one side of the teaching, while pietistic and asceticism was another. The school was not openly, or perhaps even consciously, anti-Christian. But it was such in fact; obscuring the glory of the Christ, and the freedom and largeness of His promises, and the direct action of the Spirit upon the disciple. The full character of the "Colossian heresy" is a difficult problem. Lightfoot sees in it a blend of pharisaic Judaism with the Essene teaching on the essential evil of matter. Hort thinks that it was rather the ordinary Judaism, marked by some special phases, and taught by men nominally within the Church, like the disturb- ing Epistle to the Hebrews, and of which, Lightfoot's view, as recognizing some non-pharisaic elements (see e.g. the "neglecting of the body," 2:23), seems to us to meet the data most completely, but the question is too extensive for discussion here, and for an intelligent study of the positive teaching of the epistle we need no longer balance elaborately the rival views. In any case, the "heresy" threw the pre-cipience of Jesus Christ into the background, and obscured the supreme freedom and power of His Gospel under a growth of outward and gratuitous observances. This was to St. Paul a matter of doctrinal life and death. The epistle accordingly, in its dogmatic element, emphasizes with surpassing power the interdiction truths. Jesus Christ is set forth as "all and in all"; the First and the Last; the perfect Revelation of the invisible God, the Agent, Head, and End of the entire created universe; the Sacrifice for human sin, bringing peace by His cross to the guilty conscience, the indwelling Life; the living Head of His Body, the Church; the Hope of glory. He is, in fact, His own Gospel, and the salvation of man consists in union and harmony with Him. [Paul] Such is the epistle in its dogmatic teaching. This is followed, in vital connexion (3, 4), by instructions in detail upon the practical Christian life, as the fruit of living faith. Purity, truthfulness, and unselfish love, above all in the relative duties of home, are all enforced in the light of eternal truth and grace. Personal information and salutations close the epistle, giving to it the final touch of naturalness and reality. The region around Colossae (properly Colossae, and called also Colassae later) is volcanic. La- dicea, a few years after the writing of the epistle (which was to be read to the converts there also), was wrecked by earthquake. Colossae was not personally evangelized by St. Paul (2:1). But his three years at Ephesus (Ac. 19:20) allowed vast numbers of the resi- dents at Colossae to hear the Gospel from him there. Among them would be visitors from Colossae, and to these, in all likelihood, belong the names now so familiar to us (see this epistle and that to Philemon)—Epaphras, Philemon, Apphia, Archippus, and perhaps Philemon's slave Onesimus, afterwards a runaway, whom St. Paul recomposes, bought to repent, and of whom he believes, and to return to Colossae. [H.C.G.M.] Colours. The terms relative to colour, occurr- ing in the Bible, may be arranged in two classes, the first including those descriptive of natural objects, the second the artificial mixtures employed in painting and dyeing. It is to remember that the rigid that an exact terminol- ogy of colours is of modern growth. Ancient peoples, even so artistic a nation as the Greeks, used the names of colours very vaguely. The Hebrews had not the artistic faculty at all strongly developed, and their names for colours, especially those of the first class, cannot be interpre- led in any hard and fast manner. (1) The natural colours noticed in the Bible are white, black, red, yellow and green. (The "speckled," or "bax," R.V. "sorrel," of Zech.1:8 is uncertain. It was probably a variety of red. The "pale" colour of Rev. 6:8 is the familiar Gk. χρυσός, pale yellow; the importance, for green is apparently applied more to the freshness and beauty of vegetation than to its actual colour; while yellow (used very seldom) is difficult to discrimi- nate from some shade of green. White is prominent, especially as representing light, which deeply impressed the Heb. mind, not only by its brilliance and beauty, but by its divine symbolism, and its profound moral con- notation. Black is prominent also as the physi- cal and moral opposite of white, and also as the typical complexion of Orientals. Red was also vividly appreciated by the Hebrew, as the colour of blood (the sacred principle of life), and of many natural objects, especially perhaps the red soil and red cliffs of the coun- try most familiar to the Jews. (2) Artificial colours. These appear to have been known at a very early period (cf. Gen. 38:28; Ex. 26:1; Jos. 2:18; Judg. 5:30); but there is no evidence to show that the Hebrews knew anything of the operation (properly a word for "to cut with the art of dyeing. They were probably indebted
both to the Egyptians and the Phoenicians, to
the latter for the dyes and to the former for the
principals dyes which they largely used were extracted by the Phoenicians (Ezk. 27.16) and in certain districts of Asia Minor, especially Thyatira (Ac.16.14). The principal dyes were purples, light and dark (the latter being the "blue" of A.V.), and crimson ("scarlet," A.V.). Vermillion was introduced at a late period. (d) Purples ("Tyrian purple"). This colour, well known and valued over the whole ancient world, was obtained from the secretion of a species of shell-fish, the Murex trunculus of Linnaeus, found in various parts of the Mediterranean. It is difficult to state with precision the exact tint described by the Heb. name. The blacks of our Ajacinus and the English "phœnix" are applied to all sorts of bright colours, though generally with some shade of red intermingled. The purple of the murex was probably a lighter shade, in which red predominated over blue; while the darker purples, a violet ("blue of A.V.) was produced from another species of shell-fish. Robes of crimson were the characteristic decoration of the liny of kings (Judg.8.26) and of the highest officers, civil and religious. They were affected also by the wealthy and luxurious (Je.10.9; Ezk.27.7; Lu.16.19; Rev.17.4,18.16). (b) Blue ("phkēlēth"). This dye was procured from a species of shell-fish found on the coast of Phar- nacia, and called by modern nauts Helix Iunithina. The tint is best explained by the statements of Josephus (3 Ant. vii. 7) and Philo (and the translation of the LXX. vakw- θo), that it was emblematic of the sky: in which case it represents not the light blue of our northern climate, but the deep, dark hue of the Eastern sky. The A.V. (mnr) has rightly described the tint in Esth.1.6 as violet. This again was a colour used like purple for robes of office or splendour (Je.10.9; Ezk.23.6). (c) Scarlet (crimson, Is.1.18; Je.4.30). The terms by which this colour is expressed in Heb. vary; sometimes simply shāmîl is used, as in Genesis 30.14, and sometimes simply tōlā'ath, as in Ex.25.4; and sometimes simply tōlā'ath, as in Is.1.18. Another word, karmil ("crimson," 2Chr.2.7,14,3.14), was introduced at a late period, probably from Armenia, to express the same colour. One of the Heb. words, the first expresses the brilliancy of the colour, the second the want of gloss when the dye was procured. This was a cochineal insect, which is found in considerable quantities in Armenia, Palestine, and other Eastern countries (Tristram). The Arabian name of the insect is gîrînîs (whence crimson), the Linnaean name is Coccus ilicis. The tint produced was crimson rather than scarlet. The only natural object to which it may be compared is the scarlet rag or the scarlet robes which are compared to a scarlet thread (Can. 4.3). It was the characteristic colour of the soldier's dress, especially in the Roman armies. (d) Vermilion (shâshēr). This was a pigment of mineral extraction used in fresco paintings, either for drawing figures of idols on the walls of the Gospels and the Epistles dwell more particularly on the Parousia, but they in turn recognize the other "comings" (cf. Mt.18.20). The Apocalypse centres around the Parousia, yet speaks of the Lord as coming
always to the heart of the believer (Rev. 3:20), and as coming also in the judgment of the wicked (2:5). The doctrine of the Parousia has its root in the OT teaching of the Day of the Lord. In the world as at present constituted there are anomalies which seem to contradict the righteousness or the power of God. God "hides Himself," stands afar off? (Ps. 10:1); draws back His right hand, hides it in His bosom (Ps. 74:11). But the day is coming when "our God shall come and shall not keep silence," when He will vindicate Himself by an open, signal, decisive, and final judgment, which will make manifest to all men that verily there is a God that judgeth the earth (see Ps. 50:1-5). In N. T. it is Jesus Christ Who will come to execute this judgment (Acts 17:31), to set right all wrong, to give a reward to the righteous (the completion of our salvation, the fulfilment of our inheritance, is the chief thought in St. Paul's idea of the Parousia), to reward them to them (see Rev. 20:4, 6) and to destroy for ever all evil. The time of the Parousia is frequently called the Last Day, the Day of Judgment, the Day of the Lord Jesus Christ, "that Day" or "the Day" in reference to the OT, "the Day of the Lord" (e.g. Mt. 24.29; Mk. 13.22; Lk. 21.10; Jas. 5.8; 2Th. 2.1; 2Th. 1.7-10; cf. 1 Cor. 15.52, 1Th. 4.16). The angels will gather all men before Him to be judged; the present heavens and earth will pass away, to give place to new heavens and a new earth (2Pet. 3.12, 13; Rev. 21.1; 1S. 65.17, 66.22). This language is largely pictorial, and we cannot say how much of it is figurative,—The Time of the Parousia. The general belief of the apostolic age was that the exact moment of the Lord's coming was unknown of men, but that it was "near, even at the doors" (Mt. 24:33; Heb. 10.25: Jas. 5.9; 1Th. 2.18). The early Church was stirred by this thought to high unworlledness and enthusiasm; the Lord might come at any moment, and they must be ready for Him (with loins girded and lamps burning, as men that wait for their Lord) (Lk. 12.35-39). There is much in our Lord's teaching, as reported by the evangelists, to arouse this expectation (e.g. Mt. 16.28; cf. 10.23). In St. Matthew and St. Mark the coming is closely, in St. Luke more loosely, connected with the predicted destruction of Jerusalem (Mt. 21.29; Mk. 13.3; Lk. 21.27). Yet our Lord, even in the same context, looks forward also to a further future (e.g. Mt. 24.1), warning His hearers that the coming may be delayed (e.g. Mt. 24.8; cf. 25:5; Lk. 12.15), and says that "this and that hour knoweth not man, ... neither the Son" (Mt. 24.36; Mk. 13.32; cf. Ac. 1.7). The promise of that other spiritual coming fulfilled at Pentecost, and the idea that every signal judgment (esp. on a great scale, like the Fall of Jerusalem) is also an open manifestation of the righteous God, will lead us to widen our conception of the Parousia and see in it partly a gradual process to which every triumph of good contributes and which is completed at the Last Day (the kingdom growth imperceptibly, like the seed in the parable), and partly a great cataclysm at the end of time, a reversal of these present conditions under which it is possible for evil to triumph and the divine Omnipotence is an object of faith and not of sight. In this latter sense it is a possibly far-off, yet not isolated, event; one of and for which every judgment and defeat of evil in human history is a foreshadowing and a preparation. And as the Resurrection is the hope and consolation of the redeemed individual, so the Parousia is the hope of the redeemed race. The perfected spirit will rise again in a "spiritual body" (1Cor. 15.44); the Kingdom of God Church will come again in a "spiritual" world, an environment in which the will of God is no longer thwarted by sin, a new heaven and a new earth wherein dwelleth righteousness, where the perfect reign of order and right is realized because Christ has "come" with power. Hastings, E. (4th ed., 1964), 162. Salvation, Christian Doctrine of Immortality: J. Agar Beet, The Last Things, pp. 11-102. [S. C. G.] Commerce. The Israelites up to the time of David did not practise commerce; this was left in the hands of the Canaanites, so much so that "Canaanite" came to mean "merchant." It is clear that international trade must have existed and affected even the pastoral nomad races, for we find that Abraham was rich, not only in cattle, but in silver, gold, gems, and ornaments (Gen. 13.2, 24, 22, 53). Among trading nations Egypt holds in very early times a prominent position in Scripture, though her external trade was carried on, not by her own citizens, but by foreigners, chiefly of Asiatic races. It was an Ishmaelite caravan, laden with spices, which carried Joseph into Egypt. From Egypt, especially in times of general scarcity, corn would be exported, which was paid for in gold, silver, and silver ornaments (Gen. 42, 42, 57, 25, 34, 43.11, 12, 21). Intercourse with Tyre, with whom trade was carried on especially by the tribes of Issachar and Zebulun (Deut. 33.18f.), appears only to have occurred at a later period. At the same period trade was carried on between Babylon and the Syrian cities, and gold and silver ornaments were common among the Syrian and Arabian races (Num. 31.50; Jos. 7.21; Judg. 8.24). Until the time of Solomon the Hebrew nation may be said to have had no foreign trade. Foreign trade was indeed contemplated by the Law, but its spirit was more in favour of agriculture (Deut. 17.16, 17). Solomon, however, organized an extensive trade with foreign countries. He imported linen yarn, horses, and chariots from Egypt (1K. 10.22-29), and ivory, sandal-wood, monkeys, peacocks, precious stones, silver, and above all, gold. [For visit (1K. 9.11-12). The cedar and other timber for his great architectural works was brought by Phoenicians by
se to Joppa, and he found the provisions necessary for the workmen in mount Lebanon (1K.5.6,9; 2Chr.2.16). After his death maritime trade declined, and the attempt of Josaphat to revive it proved unsuccessful (1K.22.48,49). We know, however, that Phoenicia was supplied from Judea with wheat, honey, oil, and balm (1K.5.11; Ezk. 27.17; Ac.12.20), whilst Tyrian dealers brought fish and other merchandise to Jerusalem at the time of the return from captivity (Ne.13.16), as well as timber for rebuilding the temple (Ezr.3.7). Oil was exported to Egypt (Ho.12.1), and fine linen and ornamental girdles of domestic manufacture were sold to the merchants (Pr.31.24). Its successive invasions must have impoverished the country, but much wealth must nevertheless have existed, owing to the abundant natural products of the country—wine, oil, fruit, etc.; so much so that Jerusalem appears as the rival of Tyre, and through its port, Joppa, carried on trade with foreign countries (Is.2.6,16; Ho.12.7; Ezk.26.2; Jon.1.3). The internal and external trade of the Jews, like that of Egypt, was much promoted by the festivals, which brought large numbers of persons and merchants, and great outlay for victims for sacrifices and for incense (1K.8.63). According to the earlier prophets, dishonest dealing and oppressive acts on the part of traders was not uncommon (Am.8.5,10; Ho.12.5). The places of public market were, then as now, chiefly the open spaces near the gates (Ne.13.15,16; Zeph.1.10). Oil was exported and traders in olive oil were times included in the outer courts of the temple, where victims for the sacrifices were publicly sold (Zech.14.21; Mt.21.12; Jn.2.14).

Communion, Holy. [Eucharist]
Conaniah, a chief who gave passover-offerings in the time of Josiah (2Chr.35.6).

Concubine. [Family, D. III.]
Conduit (2K.18.17,20,20; Is.7.3,8,12, Heb. šir'ád, elsewhere rendered "trench" (1K.18.32) or "channel" (R.V. Job38.25; A.V. "watercourse"). This was not, apparently, the Gihon aqueduct, but a channel leading to the "Upper Pool." For the "pool which was covered with slime" see this translation from the Wàr, where Josephus places the "camp of the Assyrians" (5 Wars xii. 2). The Upper Pool would thus be the present Hammān el Bātrāb, called also Hezekiah's Pool, but by Josephus the pool Amygdalon (of the bower). A conduit still leads E. towards it from Birket Mamilla outside Jerusalem on W. [Dragon Well]. [G.C.B.]

Coney (Heb. šápāhān). The translation in A.V. of the Heb. šápāhān as "coney" is exceedingly unfortunate, seeing that, except in legal phraseology, the English word has completely dropped out of use in its original significance, and been supplanted by "rabbit." Consequently, the notion is prevalent that coney is really the proper English name of the animal indicated by the Heb. šápāhān (lit. the hide). As a matter of fact, Procavia syriaca, the animal in question, has no proper English name, although it is generally known as the Syrian "coney," from a now discarded scientific title. In Cape Colony a related species is commonly known as "dassie," from a corruption of its Dutch name, klip-dass, literally "rock-badger." The Syrian hyrax is an outliving member of a group of small African mammals, mostly of the size of rabbits, which form a special section (Hyracidae) of the great hoofed or ungulate order. They have no near existing relations, although represented by extinct forms of large size in the Tertiary rocks of Egypt and southern Europe. In general form they are somewhat rabbit-like, but the ears are short, the tail is rudimentary, the toes (4 in front and 3 behind) are cased in nail-like hoofs, and there is a bare glandular patch in the fur of the back. The two upper front (incisor) teeth are long and dagger-like, distinctly recalling those of a rabbit; but the molars, or cheek-teeth, are more like those of a rhinoceros. Although some of the African hyraxes are arboreal, the Syrian species, which is abundant in suitable districts, dwells in holes in banks or crannies amid rocks in large companies. The statement in Lev.11.5 and Deut.14.4, that the "coney" is unclean because it chews the cud without dividing the hoof, is not strictly correct, as it does not "ruminant." The expression, however, as in the case of the hare, doubtless refers to the rapid movements of its jaw, and although meaning "rechew," may perhaps indicate remastication without the regurgitation which occurs in ruminants. Strict interpretation of physiological processes should not, however, be expected among people like the ancient Hebrews. The expression "exceeding clean" may refer to the wariness of this "fleecy folk." [R.L.]

Confection (Ex.30.35). Confectionary (1Sam.8.13). [Apothecary; Ointment.]

Confirmation. [Church; Laying on of Hands.]

Congregation. The rendering of several Heb. words: (1) ἑδή, a company met together by appointment or acting in concert. It is applied to Israel as the organic union of the Twelve Tribes, the συναγωγή, and also to a community in its corporate capacity (Num.35. 24ff.). (2) γάλακτος, an assembly, the ἐκκλησία, used of an assembly specially convoked for a special occasion, purpose, or time—e.g. for feasts (1K.8.65; Ps.26.12; 68.28; Jl.2.16). It is used of the whole body of Israel: LXX, συναγωγή in Ex., Lev., Num., Deut.5.22, and ἐκκλησία in Deut. and the historical books. Hence no distinction between (1) and (2) can be proved from the LXX, but cf. Pr.5.14. (3)
CONIAH

môtâdh (same root as 1), Ps.74.4, R.V. "assembly"; cf. ver. 8, "all the appointed places of God in the land." The phrase "tabernacle or tent of the congregation" is correctly rendered in the R.V. by "tent of meeting"—i.e. of God with His people. [Tabernacle, Num.8.] In post-Exilic times συναγωγὴ was used for both the community and the place of worship; and ἐκκλησία for the assembly of worshippers. [Family; Elders.] [H.H.]

Coniah. [JECONIAH.]

Cononiah, the Levite, in charge of the offerings and tithes in the time of Hezekiah (2 Chr.31.12,13).

Conscience (συνείδησις). The word occurs in O.T. in deuto-canonical books only: Wis.17.11; Eccles.14.2 (R.V. soul); 2 Mac.6.11 (R.V. scruple). In N.T. 30 times (R.V.) in Academic systems, it is conscience to modern "consciousness." The doctrine of Conscience implies a stage in psychological analysis not attained in O.T., nor in Gk. thought till Stoicism, which first took a subjective view of the moral problem and gave a moral turn to the term συνείδησις (conscience). [Stoics.] This does not, of course, mean that the O.T. lacks the idea of a moral faculty in man; but it is at first not differentiated, and the moral law is conceived as external. God speaks audibly to patriarchs and to Israel; and the ordinances of the Mosaic law supersede the individual conscience. We first hear of a law written on the heart in Jer.31.33; cf. 15.17. The function of "accusing or excusing" actions is assigned to the heart in Job 27.6. When we reach the Gk. books of Wisdom and Eccles. and the N.T., Gk. influence has introduced the subjective standpoint; but Conscience is still a term of the Schools—it is lacking in the gospels (Jn.8.30; 18.20). Our Lord speaks simply of the heart as the moral organ, or metaphorically of the eye or the "light which is in man" (Mt.6.23). First in St. Paul and in Pauline speeches (Ac.23.1-24,16) do we find the word: outside St. Paul only in Heb. and 1Th., which are both in full Pauline дух. There is no definition of Conscience in the Bible, nor, indeed, any systematic treatment of the subject till the days of the great Schoolmen. St. Thomas Aquinas distinguishes Syncretis (possibly a corruption of συνείδησις), meaning the faculty which apprehends first principles in morals, from Conscientia, which applies them to particular cases. It is with the Schoolmen an act of the intellect—a practical judgment. When thought broke loose from scholastic tutelage, it tended to deny the absolute nature of any judgments, and Conscience became, e.g. in Hobbes, merely an expression of individual opinion or convention. Purely the "Moral Sense" school follow Hobbes, calling to their aid nowadays the theory of Evolution. Conscience has developed, and differs in different races and classes; how, then, can it claim objective truth? The same denial of objectivity follows from the premises of the "Moral Sense" school. This, however, is objection only to the subjective idea, not the function; and in that sense it is impossible to pronounce its deliverances true or false.

Two consciences, one declaring to be right what the other calls wrong, may be equally true, each for itself. But Conscience claims to pronounce what is objectively right and to legislate for all men; and this claim can only be justified if it is an act of reason. No doubt the moral judgment is accompanied by and largely dependent upon feelings; but in itself it is an affair of the head, not of the heart. The Evolutionary problem is met by a comparison of moral with, e.g., mathematical judgments. Because a child makes a mistake in the multiplication-table, it does not follow that one cannot assert that 12 x 12 always and everywhere = 144. Similarly, the fact that Conscience grows and requires education does not invalidate its judgments when it is developed and trained.—Christian Teaching. The Christian doctrine of Conscience is in agreement with the best moral philosophy, while it emphasizes the dependence of the moral faculty upon God. It is the witness to a moral law written in man's heart by God (Ro.2.14,15). Its voice is supreme over all other considerations, so that man must act "for conscience sake," not because of any external compulsion (13.5). Conscience is the sole final judge, and must be obeyed (1 Cor.8.7). In such a case the wrong practical judgment is "obeyed," and it is not by any means the judgment of conscience is sinful: "conscience, being weak, is defined." It may also judge wrongly, because "scared" or "branded" (1 Tim.4.2), or because "the light has become darkness" (Mt.6.23). Here the individual is himself responsible for wilful perversion of his moral judgment by disregarding it whilst sound. Thus Conscience is (a), in agreement with the Schoolmen and Kant, an act of the intellect, judging questions of right and wrong; and (b) requires education and guidance. Thus, its supreme need is a guide and standard of action; which Christianity, with Aristotle, provides for everyone, whatever he may be—and whom the Christian knows in Christ—the incarnate Wisdom of God, the Light of the world,—and in the teaching of Scripture and the Church, in which the mind of Christ is enshrined and revealed. The Bible goes beyond Moral Philosophy in recognizing the need of a "cleansing of the conscience" from past sin (Heb.9.14,10.2), and here again Christ affords the sole satisfaction of moral needs. [Atonement.] Thos. Aq. Summa I, a. q. 70, 1.; Butler, Sermons 1, 2, 3; Kashlula, Theory of Good and Evil, Bk. 1, ch. 6. Any treatise of Christian Ethics—Newman, Smyth is comprehensive—and see also our art. Philosophy. [C.L.H.]

Conversion [Cf. Salvation.] The term "conversion" does not occur except in Ac. 15.3, the conversion of the Gentiles. The verb, however, occurs several times in N.T., but in R.V. is uniformly translated "turn," the retranslators evidently feeling it inadvisable to introduce a word commonly used in a technical
sense, and expressive of a particular view of grace, when a simpler word conveyed a satisfactory and sufficient meaning. Since, however, the term is in frequent religious use, it seems advisable to appropriate it to a definite sense, as meaning the human part in salvation. It is granted that popularly it is used of the divine agency; but this is a mistranslation, since the word is only used in the active of human agency in turning a sinner from the error of his ways, and in the middle voice of a man turning himself to repentance, faith, and good works. When used in the former sense there is no danger of misuse, since human influence can hardly be so strong as to annihilate choice, as would certainly be supposed likely if the word was used (which it is not) of God. Any one can see the vast difference between "except ye be converted" and "except ye turn." The doctrine of irresistible grace appears therefore to have come in by way of a mistranslation. That it has been productive of great moral hurt will hardly be denied, since it has caused men, and especially the young, to neglect personal effort while waiting for a divine compulsion. Properly used, however, the term may be beautifully employed as a summary of the human side of salvation, including repentance, faith, and obedience. It is not inconsistent with baptismal regeneration, but may be considered as its realization, and the acceptance by the will of a position freely given by God. It is, however, particularly applicable to the case of those who have through ignorance of or want of the lives of carelessness or disobedience, and have gone in a way that is not good, and should therefore retrace their steps. "The way to heaven," said Bp. Selwyn, "is to turn to the right, and go straight on." In this series of articles (which includes also Salvation, Saviour, Faith, Repentance) it will be seen that the doctrine of substitution, and the doctrine of conversion, as popularly preached, both seriously deprecate the response of the will. Repentance is often slurred over, and faith restricted to trustful acceptance; and in some cases obedience is thought to partake of the nature of "works." This presentation of Christianity seems to arise from the misunderstanding of St. Paul, and the omission of very distinct teachings both of Christ and the apostles generally. For a fuller discussion, see the writer's Crux Crucis (Simkin, Marshall): 1907.

Convocation. With the prefix holy this was the technical term for a religious gathering on the sabbath and festivals. No servile work was to be done, necessary preparation of food only being permitted (Ex. 12.16). It occurs Is. 1.3, 4, 5 (E V. assemblies), without "holy"; elsewhere in the Pentateuch only. The phrase is applied to the sabbath (Lev. 23.2, 3); the first and last day of Unleavened Bread or Passover (Ex. 12.16; Lev. 23.7, 8); Pentecost (ver. 21); Trumpets, the first day of the civil year (ver. 24); Weeks, or Firstfruits (Num. 28, 26); first and last day of Tabernacles (Lev. 23.35, 36); to all these festivals (vv. 4, 37); and to the Day of Atonement (ver. 27). See also the enumeration in Num. 28, 18, 25, 29, 17, 12. [H.H.]

Cooking. As meat did not form an article of ordinary food among the Hebrews, cooking was of a primitive kind. Animals were only slaughtered for purposes of hospitality and sacrifice. On the arrival of a guest the animal, a kid, lamb, or calf, was killed (Gen. 18:7; Lu. 15.23), its throat being cut that the blood might be poured out (Lev.7, 26); it was then flayed and was ready either for roasting or boiling; if the former, the animal was preserved entire (Ex.12,16), and roasted over a fire (Ex. 12.8) of wood (Is. 44, 16), or perhaps in an oven, consisting simply of a hole dug in the earth, well heated, and covered up. The Paschal lamb was roasted in the first way (Ex. 12: 8, 9; 2 Chr. 35, 13). Boiling, however, was the more usual method of cooking flesh. Vegetables were usually boiled, and served up as potage

Cooking. (From Wilkinson.)

Copper (Heb. w-hosheth), in A.V. always rendered Brass except in Ezr. 8, 27 and Je. 15, 12 (A.V. steel). This metal is usually found as chalcopryite (sulphide of copper and iron), malachite (hydrous carb. of copper), or as an oxide; occasionally also native, but rarely in the Old World. It was almost exclusively used by the ancients for common purposes; for which its malleable and ductile nature rendered it practically available. Vessels of it have been found in tombs of kings of Egypt belonging to the 1st dynasty, and the copper mines near Wady en Naab (Sinai) were worked by them from very early times. It was known in Babylonia (Tel-lob) as early as 2500 B.C. We read in the Bible of copper, possessed in countless abundance (2 Chr. 4, 18), and used for every kind of instrument: as chains (Judg. 16, 21), pillars (1 K. 7, 15, 21), layers, the great one being called the copper sea (2 K. 25, 13; 1 Chr. 18, 8), and the other temple vessels. These were made in the foundry, with the assistance of Hiram, a Phoenician (1 K. 7, 13 f.), though the Hebrews were not ignorant of metallurgy (Deut. 4, 20, etc.; Ezk. 22, 18). We read also of copper mirrors (Ex. 38, 8; Job 37, 18), and even
of copper arms, as helmets, spears, etc. (1 Sam. 17. 51; 2 Sam. 21. 16). The expression "bow of steel" in Job 20. 21; Ps. 18. 34, should be rendered "bow of copper." They could hardly have applied copper to these purposes without being acquainted with some means of hardening it. Antimony was perhaps sometimes used, and Dr. J. H. Gladstone (see Proc. Brit. Soc. Feb. 19. 34) has ascertained that copper weapons from Tell el-Hesi, found in a pre-Israelite stratum, contained (like others from ancient sites in Egypt) a considerable proportion of sub-oxide of copper, and thinks the workers may have discovered a way of forming this during the smelting in order to keep the ornament, and supposed to be the only place in A.V. where "copper" is mentioned is Ezek. 8. 27 (cf. Ezek. 8. 57; but the R.V. renders it "brass," as in Jer. 15. 12). These vessels may have been of chalcedon, like the Persian or Indian vases found among the treasures of Darius. In Ezek. 27. 13 the importation of copper vessels to Tyre by merchants of Javan, Tubal, and Meshech is alluded to. Probably these were the Moschi, etc., who worked the copper-mines in the neighbourhood of the Caucasus. In 2 Tim. 4. 14 ἀλεξίος is rendered "coppersmith," but the term is perfectly general.

**COPPER (for). [Weights and Measures]**

**Corallium rubrum**, is the only, as the sole, doubtfully rendering of the Heb. ῥαμὼθ, in Job 38. 18 and Ezek. 27. 16. The old versions fail to give any clue, but as the natural upward growth of the **Corallium rubrum** is well suited to the etymology of ῥαμὼθ, it probably is rightly rendered "coral." This was known to Theophrastus and Pliny, who speaks of the whip which is used for tallowing articles of dress as the wreathe chains," which were twisted cords, worn by the high-priests (Ex. 28. 14, 22, 24, 39. 15, 17). For fastening awnings (Esth. 1. 6). For drawing water out of a well, or raising heavy weights (Job 2. 15; Jer. 38. 6, 13). Cords are also worn as a sign of humility (1 K. 20. 3). The materials of which cord was made varied according to the strength required; the strongest rope was probably made of strips of camel or ox hide, as still used by the Bedouins Arabs. The finer sorts were made of flax (Is. 19. 9), and probably of reeds and rushes. In N.T. the term **cora** is applied to the whip with which the condemned were scourged (John 2. 15), and to the ropes of a ship (Acts 27. 32).

**Cor** (Ex. 40. 18; Jn. 11) = **Korah**, 1. **Coriander.** The **Coriandrum sativum** is found in Egypt, Persia, and India, and has a round tall stalk. It bears umbelliferous white or reddish flowers, from which arise globular, red, viscous, seed-corns, closely connected with the early spread of Christianity. So famous was its *Isithmus* that that name has been given to every narrow neck of land between two seas. But, besides this, the site of Corinth is distinguished by another conspicuous feature—viz. the *Acrocorinthus*, a vast cluster of hills, 2,000 ft. above the sea-level, with a summit so extensive that it once contained a whole town. The situation of Corinth with its E. and W. harbours is the key to its history. Its importance probably began under the Phoenicians, but the first authentic records show the Greeks here in a position of wealth and military strength; and in the latest days of Gk. history Corinth was still conspicuous. But before St. Paul's day it had been rebuilt and established as a Roman colony. The distinction between the Greek and Roman cities of Corinth must be carefully remembered. The new city was hardly less distinguished than the old, and was the metropolis of the Roman province of ACHAIA. It was a place alike of great mental activity and of commercial and manufacturing enterprise. Its wealth, its vice, and the profligacy of its inhabitants were proverbial. The worship of Venus was here attended with bawdine licence. All these points are incidentally illustrated in 1 and 2 Cor. Corinth is still an episcopal see. The cathedral church of St. Nicolas, "a very mean place for such an ecclesiastical dignity," used to be, in Turkish times, in the Acrocorinthis. The city is now only a wretched village, on the old site,
Corinthians, First Ep. to

and bearing the old name, often corrupted, however, into Gotho. Pausianias, describing the antiquities of Corinth as they existed in his day, distinguishes clearly between those of Greek and Roman origin. Two relics of Roman work are still to be seen: a heap of brick-work which may have been part of the baths erected by Hadrian, and the remains of an amphitheatre with subterranean arrangements for gladiators. Far more interesting, however, are the ruins of the very ancient Greek temple. From the Posidonium, or sanctuary of Neptune, the scene of the Isthmian games, St. Paul draws some of his most striking imagery in 1 Cor. and other epistles. This sanctuary was a short distance N.E. of Corinth, at the narrowest part of the Isthmus, near the harbour of Schoenus (now Kalatáki) on the Saronic gulf. Its exact site is doubtful; but to the S. are the general remains of the stadium, where the foot-races were run (1 Cor. 9.24); to the E. those of the theatre, which was probably the scene of the pugilistic contests (ver. 26); and on the shore grow many small green pine-trees such as provided the fanning wreath (ver. 25) for the victors in the games.

The First Epistle to. Date. Some time before Pentecost (1 Cor. 16.8), and near the Passover (5.6-8), towards the close of St. Paul's visit to Ephesus; therefore a little before Easter, 58 a.d.—Place. Written from Ephesus (16.8.19), where St. Paul stayed more than two years (see Ac. 19.8.10), after he had sent Timothy and Erastus ahead (Tit. 1.5).—Address. To the Corinthians, all of Macedonia, 1 Cor. 16.10, and had already determined to journey round through Macedonia and Achaia to Jerusalem (1 Cor. 19.21; 1 Cor. 16.3).—Readers. Corinth, destroyed by Mummius in 146 B.c., was rebuilt by Julius Caesar, made a Roman colony, and under the care of the emperors was restored with wonderful rapidity to its former glory and luxury. It became a wide commercial city, the seat of the Roman proconsul, of the Isthmian games, of the fine arts, of learning, and of the worship of Aphrodite. Here, in 54 a.d., St. Paul planted Christianity (2 Cor. 3.6), on his second missionary journey, and stayed a year and a half (1 Cor. 16.17). He lodged with Aquila, his fellow-craftsman, whom he converted here (18.1.2), and afterwards with the proselyte Justus (18.2-7), when Silas and Timotheus had arrived (18.5), and Jewish opposition had caused him to turn to the Gentiles. This had the advantage of making the church from the first mixed (the Gentiles were in the majority, 1 Cor. 12.2) and very numerous (Ac. 18.2.8.10), the most important in Greece, the mother-church of the province (1 Cor. 12.2). Only a few of the upper classes believed (1.26, etc., among them Crispus, the president of the synagogue, 1 Cor. 1.14); for the preaching of the cross did not suit their intellectual pretensions and their moral laxity. Some time after the failure of the Jewish accusation against St. Paul before Galio (Ac. 18.12-17), he left Corinth with Aquila and Priscilla (who stopped at Ephesus), and travelled to Jerusalem, and thence through Galatia and Asia Minor (18.18-22). Meantime Apollos, an eloquent and fervid disciple of St. John Baptist from Alexandria, had been brought to Christianity by Aquila and Priscilla at Ephesus (18.24, etc.), and went to Corinth (19.1), where he preached Pauline Christianity, but in somewhat different phraseology, probably introducing terms from Philo. There was no divergence of doctrine (1 Cor. 3.5.6.16.12), but some preferred the manner of the former teacher, some that of the new; and thus partisanship crystallized. Then there came to Corinth Judaizing teachers, with leanings to St. Peter, having letters of recommendation (2 Cor. 3.1), and trying to lower the authority of St. Paul (9.2), and exalt that of St. Peter (11.5), and at the same time boastfully asserting their national privileges (5.12.11.22.12.11). The remainder, repudiating these three parties, formed a fourth, by dissociating themselves from the Pauline, Apollonian, and Petrine sections, and (with something of pharisaical pedantry) professing special allegiance to Christ (1.12).—Occasion. The epistle was addressed to the whole church at Corinth, including all sections, and the Christians of Achaia. Before the present First Epistle, there had been a letter (not now extant, an alleged epistle in Armenian being a wretched apocryphal imitation) from the Corinthians (1 Cor. 5.9): but when he wrote he had not known of the divisions. It was from the household of Chloe that he received information about them (1.11); and on this account he commissioned St. Timothy to visit Corinth (4.17), going first with Erastus through Macedonia (v. 19), where they warn of uncleanness in the church, of which he had already spoken in the last epistle, and which had now developed into a case of incest (1 Cor. 5.1. etc.). In addition, there were the questions brought in a letter from the church by Stephanas, Fortunatus, and Achaicus, about such matters as celibacy (7.1, etc.), the eating of flesh offered in sacrifice, etc. (8.1). These messengers carried back his own letter in reply (16.12.17).—Aim. (1) To counteract the party divisions, and uphold his own authority as founder; (2) to remove the unchastity which had gained ground; (3) to give instruction on the points mentioned in the letter from Corinth, and on other instructions, suitable to the state of the church at Corinth, such as (a) disorders in the public assemblies; (b) the gifts of the Spirit; (c) the Resurrection; (d) the coming collection.—Contents. Salutation and exordium (1.1-9): 1st main section: the party divisions, with detailed justification of the apostle's own method of teaching when compared with that of Apollos (1.10-4.21). (2) The unchastity (ch. 5). (3) The bad habit of going before heathen tribunals, with a repeated warning against impurity (ch. 6). (4) The question about marriage (ch. 7). (5) That about meats used in sacrifice, with an illustration of the fleshliness he aimed at in his discharge of the apostolic office (8-11). (6) Directions as to irregularities in meetings for worship, the head-covering of women, the love-feasts and the Lord's Supper (ch. 11). (7) Discussion on spiritual gifts (ch. 12 and 14). (8) The magnificence of the theatre (ch. 13). (9) The teaching of the Resurrection of the Dead, in reference to a local mistake (ch. 15). (10) Injunctions about
CORINTHIANS, SECOND EP. TO

there was nothing to worry about (2.12-7.5). St. Paul was not at Ephesus, but had travelled by way of Troas to Macedonia; and besides Timothy, Titus had brought intelligence of these effects (2.12, 7.15). He had been delegated to Corinth after the first epistle, and after Timothy had again arrived in Ephesus from the journey mentioned in 4.17. Titus was now to convey the second epistle. Some new occasion arose from the accounts first brought by Timothy, but afterwards chiefly by Titus, of the effects of the previous letter, and of the attitude of the Church of Corinth.—Aim. Stated by St. Paul himself (2Cor. 13:10) to put the Church before his arrival in person into that frame of mind which it was necessary that he should find, in order that he might thereupon set to work among them, not with stern corrective authority, but for their enlightenment. But in order to attain this aim, he had to make it his chief task to elucidate, confirm, and vindicate his apostolic authority, which, in consequence of his former letter, had been assailed still more vehemently, openly, and influentially by opponents. For, if that were regained, his whole influence would be regained; if the church were again confirmed on this point, and the opposition defeated, every hindrance to the popular personal authority which he had would be removed. With the establishment of his apostolic character and reputation he is chiefly occupied in the whole epistle; everything else is only subordinate, including a detailed appeal respecting the collection (Meyer).—Contents. (1) Troubles and sufferings before the return of Titus (1.1-14). (2) First plan of coming; defence against fickleness (1.15-2.1). (3) Satisfaction at having changed plan; time for repentance of iniquitous offender (1Cor. 5.1); need now for sympathy and pardon (2Cor. 2.2-11). (4) Mention of meeting with Titus brings back the triumphant joy of that moment, filling him with a sense of issues of life and death hanging on his words (2.12-17). (5) Has he a right to say this? True credentials of effective preaching: new covenant, of which he is the preacher; contrast between the new and the old, for the benefit of the Judaisers (3.1-18). (6) Tremendous responsibility of his commission; his fitness and unfitness, for the latter, infirmity and disease; for the former, the life of Christ working in his life (4.1-18), and the hope of life after death, in which the spiritual shall be free from the flesh, and clothed with new spiritual organism (5.1-9). (7) This hope does not exclude the fear of judgment, through which all must pass. At the risk of seeming beside himself, he must urge that fear. Only so can men be brought to estimate the reality of the message of reconciliation (5.10-21). (8) Will the Church receive his message in vain? By all he has done and suffered for them, he pleads for a place in their affections, above all, to give Christ the supreme place in their hearts. Only so can they be indeed God's children, and he can truly say that those after him have no part in common (6.1-18). (9) After his urgent appeal to the inconsistent, he turns to those who had been zealous against impurity, and describes more in detail the delight he had received from the report of Titus (7.1-10). (10) He gives them an opportunity of proving their repentance and goodwill, by joining heartily in the great collection for the poor Christians in Jerusalem and Judaea, who owed their poverty to their experience in socialism; explaining arrangements, and citing the example of Macedonia (8.1-9.15). (11) He then finally vindicates his authority as an apostle, on the one hand, from the envy of his opponents, and on the other, from the taunting of those whom he and his fellow labourers had rightly understood, a ground of confidence and strength (11.30-12.18). (12) Now for his projected visit. He looks forward, not without anxiety, to the possibility of having to exercise his apostolic authority to punish both the party of licence and the Judaisers. His wish and prayer are that they may be restored to completeness without it. His own spirit is calm, and he ends with words of peace and blessing (12.10-13.14) (Dean Plumptre).—Results. Within a few months he paid his promised visit, and was received with great regard and affection by the Church (20.16). St. Titus and the unnamed brethren of 2Cor. 8.8.22 (probably St. Luke and Tychicus) had done their work effectively, and he could tell the Romans that the collection had been made in Achaia as well as in Macedonia (Ro.15.26). The Jews, however, endeavored his life by a plot as he was about to embark at Cenchreae, and he had to change his plans and return through Macedonia (Ac. 20.3). After his first imprisonment at Rome, and his return to his former labours, Erastus, who was probably travelling with him, and was chamberlain of the city of Corinth, stopped there (Ro.16.23; 2Tim. 4.20). About 95 A.D., some 35 years after this second epistle, Clement of Rome wrote an epistle to the Corinthians, which shows that, after a time of peace, the old evils had reappeared. A few rash and selfish persons, placing themselves at the head of a fanatical party, had disgraced the Church. Clement reminds them of the self-denying labours of St. Peter and St. Paul, and the faith and humility of Christ and the O.T. saints. The doubts of the Resurrection had reappeared, and were once more confuted by Clement. The authority of the bishops and
deaconas (cf. Ph. 1.1) was disputed, and he urges submission, quoting the first epistle, esp. 1Cor.13. Later on, c. 135 A.D., the church of Corinth was visited by Hegesippus, the historian of the Jewish Church (who gives us the account of the death of James, bishop of Jerusalem). He touched at Corinth on his voyage to Rome, and stayed there several days, finding the church faithful to the truth under its bishop Primus (Euseb. Hist. Eccl. iv. 22). Dionysius, succeeding Primus as bishop, brought out all that was good in the church, and extended his activity to the people of Macedonia, Athens, Nicomedia, Creté, and Pontus. He bears testimony to the liberality of the church of Corinth to the poverty of other churches, and to the traditional liberality it had received from the Roman churches. He records the fact that the epistle of Clement was read from time to time on the Lord's day. One Chrysophora, like Dorcas and Priscilla, was conspicuous both for good works and theology (Euseb. Hist. Eccl. iv. 23) (Dean Plumptre).—Place. St. Paul was no longer at Ephesus, but had already arrived in Macedonia by way of Troas (2Cor.2.13, 7, 5.8, 1.9, 2; Ac.20.1), where Titus, whom he had already been expected in (43) (Christos Kymn, returns to—Deut. Probably 58, the same year as that of the first epistle. That was shortly before Easter; he left Ephesus after Pente- cost. He intended to come to Corinth, as he did soon after the second epistle (Ac.20.2).—Genuineness. This is as internally certain and as soundly grounded as any undoubted epistle of that of the first. Cf. Iren. Hac. ii. 7, 1; iv. 28. 33; Athenagoras, De Resurrect. p. 61; Clement, Strom. iv. p. 514; Tertullian, De Pudicitia, 13. [W.M.S.]

Cormorant, the translation in A.V. of the Heb. qī'ath and shālāk. For qī'ath, see Pelican. shālāk occurs only as the name of an unclean bird in Lev.11.17, Deut.14.17, and has been variously rendered. The etymology points to some diving bird. The common cormorant (Phalacrocorax carbo), which some have identified with shālāk, ranges from Europe to India, while an allied species (P. desmarestii) inhabits the Mediterranean, Black Sea, and Caspian Sea. Other suggestions for shālāk are gannet and tern. [R.L.]

Corn. The Heb. words so rendered in A.V. are dāḥān, "produce" (Gen.27.28), or "bread" (Lam.2.12): "abhūr, "produce" (Jos.5.11); bār, "clean, winnowed corn (Gen.41.35), or the Arab. hur, "wheat"; and shebbher (Gen.49.4), probably "ground" corn or "meal." Corn of Minnith in Moab, and of Pannag (Ezk.27.17), sometimes supposed to mean "Phoenicia" but otherwise "a sweet cake," was especially valued. Corn included wheat, barley, and spelt. [Agriculture.]—Seven ears on one stalk (Gen.41.22) are not unknown in Egypt and are still harvested and eaten in some parts of Palestine. Corn was exported in payment for labour in Solomon's time (2Ch.2.10,15), with wine and oil; meal (shebbher) was sold in the market (Am.8.5). [Barley; Rie; Wheat.]

Corinthus (Ac.10), a centurion of the Italian cohort, which probably consisted of Italians resident in Palestine. Judaea was garrisoned not by Roman legions, but by cohorts of auxiliary forces raised from the non-Jewish population. Cornelius was uncircumcised (11. 3), and therefore not a full proselyte, but he belonged to the numerous class of those who feared or worshipped God, frequently mentioned in Acts, from whom the Christian Church was largely recruited. His personal character was marked by devoutness (vv. 2, 22), zeal for the welfare of others (ver. 24), humility (ver. 25), teachableness (ver. 33). St. Luke dwells on the story of his conversion as affording the first or one of the first instances of the baptism of uncircumcised persons, and their admission to Christian fellowship. If there had been previous instances, as perhaps in 8.38, they could not compare in importance to the public action of St. Peter, the acknowledged chief of the apostles, acting under the guidance of a divine vision, and sanctioned by a great manifestation of the Holy Spirit (Ac.10.44-46; cf. Gal.3.2). [E.R.B.]

Cornet.—1. "The corner of a bed" (Am.3.12) means the corner seat on a diván, and is the seat of most honour in a room.—2. The "corner" of the field was not allowed (Lev.19.9) to be wholly reaped. It was the right of the poor to take corn from the two corners. In the later period of the prophets their constant complaints concerning the defrauding the poor (Is.10.2; Am.5.11,8.6) show that such laws were neglected. The later rabbis (Mishna, Peah) fixed one-sixtieth as the portion of a field to be left for the legal "corner." The two corners should not be so joined as to leave one corner only where two should fairly be reckoned. It is still a pious custom, which the Palestinian peasantry derive from "the law of Abraham," to leave the corner of the cornfield unreaped for the poor to take. [C.R.C.]

Corner-stone. (1) A stone, usually massive, so shaped and placed as to bind together two walls of a building; hence both a cornerstone and, as helping to support the structure, also a foundation-stone. The word has both meanings in Is.28.16, but foundation- and corner-stones are distinguished in Je.51.26 (cf. Job 38.6). The exact meaning of the building (Zech.4.7; Ps.118.22). The word in both meanings is applied to our Lord (Mt.21.42; Eph.2.20; 1Pe.2.6,7). Cf. Is.19.13 marg., where rulers are spoken of as the corner or support of the tribe. [H.H.]

Cornet (Heb. shōphdr), a loud-sounding instrument, made of the horn of a ram, an ibex or (sometimes) an ox, and used by the ancient Hebrews for signals, for announcing the "Jubile" (Lev.25.9), for proclaiming the new year, for the purposes of war (Je.4.5,19; cf. Job 39.24,25), as well as by the sentinels at the watch-towers in giving notice of the approach of an enemy (Ezk.33.4-6). shōphdr is gener- ally rendered "trumpet," e.g. in all the passages already cited, but "cornet" (the more correct translation) is used in 1Ch.15. 28, 2Ch.15.14, Ps.98.6, and Ho.5.8. "Cornet" is also employed in Dan.3.5, 7.10,15, for the Aрам. gãrn (lit. "a horn"). Oriental scholars for the most part render "qārēn" as the same instrument; but some critics regard shōphdr and ḥăqōrdr as
belonging to the species of *goren*, the usual term for a horn. The generally received opinion is that *goren* was the curved horn, and *shophar* the long and straight one (Mishna, *Rosh-hassanah* iii. 2-5). The silver trumpets (*hímacet*) which Moses was charged to furnish for the Israelites were to be used for calling together the assembly, for the journeying of the camps, for sounding the alarm of war, and for celebrating the sacrifices on festivals and new moons (Num.10.1-10). In the age of Solomon 120 trumpets were used in the temple worship (2Chr.5.12). *Yôbhel* is used sometimes for the "year of Jubilee" (cf. Lev.25.13,15 with 25.28,30), because of its having been introduced by the blowing of a *yôbhel*, or ram's horn. The sounding of the cornet was the distinguishing ritual feature of the festival apportioned by Moses to be held on the first day of the seventh month as "a day of blowing of trumpets" (Num.29.1), or "a memorial of blowing of trumpets" (Lev.23.24); and that rite is still observed by the Jews in their celebration of the same festival, and is called "the day of memorial," and also "New Year." The intention of the appointment of the festival appears to be set forth in Jl.2.15: "Blow the trumpet in Zion, sanctify a fast, call a solemn assembly." Agreeably to this sequence, the festival seems to be the prelude and preparation for the Day of Atonement. The word "solemn assembly" applies to that on the eighth day (Lev.23.30), the closing rite of the festive cycle of *Tishri*. The cornet is also sounded in the synagogue at the close of the service for the Day of Atonement, and, amongst Jews who adopt the ritual of the *Sephardim*, on the seventh day of the feast of *Tabernacles*, known by the post-Biblical denomination of "the Great Hosannah." A.V. also renders by "cornets" the Heb. *mánâ'otim* (2Sam.6.5), but here the R.V. marg. *sistra* seems the best rendering. In Ezk.7.14 "trumpet" represents the Heb. *lîdô̄a*'; properly "blast" (cf. Ps.150.4). [Note: Shawe.

**Cos** or **Coos** (now *Scandinio* or *Stanko*). This small island of the Grecian Archipelago has several interesting points of connexion with the Jews. It was one of the places which contained Jewish residents (1Mac.15.23). Josephus, quoting Strabo, mentions that the Jews had a great amount of treasure stored there during the Mithridatic war, and also that Julius Caesar issued an edict in favour of the Jews of Cos. Herod the Great conferred many favours on the island. St. Paul, on the return from his third missionary journey, passed the night here, after sailing from Miletus. It was celebrated for its light woven fabrics and for its wines; also for a temple of Aesculapius, which was virtually a museum of anatomy and pathology. The emperor Claudius bestowed upon Cos the privilege of a free state. The chief town (of the same name) was on the N.E. near a promontory called Scandarum; and perhaps it is to the town that reference is made in Ac.21.1. **Co’sam** (L.u.3.28), an ancestor of Joseph, between David and Jerubbabel. [G.R.D.B.]

**Cosmogony.** The Biblical conception of the origin and nature of the material universe must be inferred from a variety of poetical and rhetorical passages primarily designed to convey spiritual truth. The principal of these are Gen.1.1-21; 1K.8.27; Job 9.5-13,26.7-14.28, 9.11.38; Ps.8.3,33.6-9,65.6-13,74.13-17,89.9-10,90.2,104; Pr.8.23-29; Is.51.5; Je.5.23,31.35; Jl.1.14; Ac.14.15-17,17.23-29; Ro.1.20; Heb.11.6. The Hebrew names *qôên* and *qôrôn* (Lev.1.2,10-14,3.4,11.3) are cognate with *qôren* or *qôren* (Lev.1.2,13-14). They render "the year," or "the year's portion," as in [Creation]. While it would be unfair to impose upon these the strict literal interpretation appropriate to a scientific treatise, it is not difficult to see that there is a restraint upon the sacred writers in their representation of God's relation to the universe which did not rest upon those who were concerned in the economy of the ancient nations, or even upon the commentators and poets and scientific men of later times. The Babylonian cosmology, with which it would be most naturally compared, is but imperfectly presented in the cuneiform tablets by reason of their fragmentary character, only a small portion having been preserved. [See Plate xxxv.] But from what remains it would seem that matter was regarded as eternal. The opening passage reads:

Long since, when of the gods not one had arisen . . .
Then were made the gods.

Upon the creation of light, Tiamat rebelled, and drew a number of the gods after her; whereupon Marduk volunteered to conquer her. After accomplishing this, he cut her body in two halves, and out of them made the heaven and the earth. The further account is too fragmentary to be of any service. From Berosus, however, we learn that *Ôôrê* was cut asunder by Bel, and her blood mixed with clay, from which man was formed. All other non-Biblical cosmologies are equally fantastic and absurd. According to the Egyptian conception, the latent germ of Being slept in the bosom of the dark flood "Nut," until a demi-urge moulded one of them into an egg, from which the world was evolved. This conception of a world-egg was very general. The Indian mythology represents the "self-existent," the "wonderful," as evolving from a sleeping universe which was pre-existent. This self-existent Being, having created the waters, placed them in a seed, which became a golden egg, in which Brahma, the progenitor of the world, strove for a year, when he split it in two, and from the upper part made the heavens, and from the under part the earth. According to the Polygenist myths, it was a bird which laid the world-egg. Nor are the
COSMOGONY

COTTON

Gk. myths, with their hundred-handed giants and Titans, less fantastic. Even Plato taught that the earth was the centre of the universe, and that its motions were produced by what he called the "soul of the world"; while the scientific astronomer, Ptolemy, distinctly taught the geo-centric theory of the universe. If Milton's Paradise Lost were taken as prose, and interpreted as some would interpret Gen. i, its cosmogony would appear extremely fanciful. How contrary to modern science and to the restrained statements of Scripture is the whole seventh book, of which the following is a fair specimen:

The grassy clods now calved; now half appeared
The tawny lion, pacing to get free
His hinder parts, then springs as broke from bonds,
And rampant shakes his brindled mane.

Yet popular ideas of Biblical cosmogony are often derived from Milton, rather than from the Bible. There are two words in Genesis to represent the process of creation, namely, בּאוּד (ba'od) and גָּדָּשׁ (gādāsh), of which בּאוּד (to create) is used only when speaking of the first creation of the heavens and the earth (Gen-1,1), of the creation of Adam (1,27); and גָּדָּשׁ (to make) is used, or even more ambiguous forms of expression like "Let the waters bring forth the" (1,20), which positively favours some form of evolution. There is great force, therefore, in the remark of Gunkel, that absolute creation is affirmed in Gen. 1 only, and precisely at the three stages of the creative process where all theories of thorough-going evolution completely and hopelessly break down in their evidence. That "the question of evolution within each of these great systems—of matter into various forms of matter, of life into the various forms of life, and of mankind in all its various varieties—remains still open." Moreover, when properly interpreted, the scriptural statements readily adjust themselves to the best conceptions of the universe formed by modern men of science. The Copernican (rather than the Ptolemaic) system is implied in the rhetoric of Job 26,7, "He stretcheth out the north over the empty place, and describeth his Word without end." The "firmament" which divides the waters above from those below is natural enough in Job's interpretation (26,8), "He bindeth up the waters in his thick clouds, and the cloud is not rent under them." The only apparent interruption to the progressive development of Gen. i is in connection with the appearance of the sun, moon, and stars, upon the fourth day of creation. But even there the way is left open for adjustment with the natural order, if we lay proper emphasis upon the purpose for which these bodies are said to be set in the heavens, etc: "to divide the day from the night," and to "be for signs and for seasons," which they could be only when the primeval clouds, with their dazzling glow of molecular light, had given place to conditions like those of the present. It is not, necessarily, the absolute creation of the heavenly bodies which is referred to in Gen.1.14-18, but the accomplishment of the specific work where "firmament" is in the firmament." [Light.] It is certainly to the believer no less gratifying than it is surprising to find the following appreciative words in the agnostic Haeckel's History of Creation (vol. i. pp. 37, 38, Eng. trans.): "Its extraordinary success is explained not only by its close connexion with Jewish and Christian doctrine, but also by the simple and natural chain of ideas which runs through it [i.e. the Biblical account], and which contrasts favourably with the confused mythology of creation current among most of the ancient nations. ... Two great and fundamental ideas, common also to the non-miraculous theory of development, meet us in the Mosaic hypothesis of creation with surprising clearness and simplicity—the idea of separation or differentiation, and the idea of progressive development or perfecting. ... In his [Moses'] theory there lies hidden the ruling idea of a progressive development and a differentiation of the originally simple matter. We can therefore believe just and sincere admiration on the Jewish lawyer's grand insight into nature, and his simple and natural hypothesis of creation, without discovering in it a so-called Divine Revelation." Jensen, Kosmologie der Babylonier; esp. Gunkel's Schöpfung. Eng. trans. by W. Guyot. Longman, Hurst, Rees, Orme, and Co.; Pinches, O. P. in the Light of the History Rec. of Ancient Egypt, The Tablets, Brit. Museum, pt. xiii. plates 1-23, 35-38; Arnold Guyot's Creation, or the Biblical Cosmogony in the Light of Modern Science; J. D. Dana, art. on "Creation" in Bibliotheca Sacra, April 1885; S. K. Driver, in Expositor, Jan. 1886; G. F. Wright, Scientific Confirmations of Genesis, at Oxford, 1890. [G.K.W.] Cotton, Heb. כַּרְפָּס (karpas). Esth. i.6, where the Vulg. has carbasinis coloris, as if a colour, not a material (so in A.V. green), were intended. There is a doubt whether under שְׁשֶּׁש (shesh), in the earlier, and биле, in the later books of O.T., rendered in A.V. by white linen, "fine linen," etc., cotton may have been included. The dress of the Egyptian priests, at any rate in their ministrations, was without doubt of linen (Herod. ii. 37), though Pliny (in 1st cent. A.D.) says (xix. 1, 2) they preferred cotton. Cotton garments for the worship of the temples are said to be mentioned in the Bible. There is, however, no word for the cotton plant in Heb., nor reason to suppose any early knowledge of the fabric. The Egyptian mummy swathings are linen. Cotton is made from the woolly covering of the seeds of Gossypium herbaceum, a plant of the mallow family. Speaking of "the trees of the Island Tylos, within the Persian sea," Pliny says (xii. 10, Holland's trans.): "In the highest part and knap of the same Island there be trees bearing wooll ... they beare a fruit at the last, like Gourds in fashion, and as big as Quinces; which when they be full ripe, doe open and shew certaine balls within of downe: whereof they make most fine and costly linnen clothes." Varro knew of tree-wool on the authority of Ctesias, contemporaneous with Herodotus. The Greeks, through the commercial consequences of Alexander's conquests, must have known of cotton cloth, and more or less of the plant. Cotton was manufactured extensively in Egypt later, but the monuments do not show the stage of its growth, as in the case of flax, in that
COUCH

Couched. [BED.]

Council. (1) The Great Sanhedrin (Mt. 5.22, 26, 59; Jn.11.47; Ac.4.15, 5.21, etc.). (2) The Lesser Sanhedrin (Mt.10.17; Mk.13.9); probably also "the judgment" (Mt.5.21, 22). [Suet. 13) - the Sanhedrin of the Apostles. (Ac.25:11) - a Sanhedrin in which the Apostles were tried. Such were usual in the Roman provinces (Suet. Tib. 33; Galba 19). [H.H.]

Court. The rendering of two Heb. words, both meaning an "enclosure." (1) 'azârâ, the outer court of Solomon's temple (2Ch.4.9, 6.13). (2) hâbîr, court of house, containing the well, Ark (8:18); court of 'palace, the "other court," that immediately surrounding the palace (1K.7.8); court of guard, i.e. place of confinement in king's house (Ne.3.25; Je.32.2); court of the tabernacle (Ex.26.9); of Solomon's temple - two courts (1K.21.5), the inner (1K.6.36) priests' (2Ch.4.9), or upper court (1Je.36.10); the new (2Ch.20.9) outer (1Zk.10.5) or great court (2Ch.4.6). It was used of the courts of Ezekiel's temple (Ezk.40.14, etc.). [JUDGE.][H.H.]

Coutha. Sons of Coutha were among the servants of the temple who returned with Zerubbabel (1Esdr.5.32).

Couch. (1) A bed or a litter, a resting-place (cf. "dividing of the sacrifice"). (2) A court, a council. (3) To lie on the bed of a house, to have a sickbed, a sickbed, a sitting-place. (4) "The court of the temple, the court of the outer court, the court of the house, the court of palace, the court of guard, the place of confinement in the king's house, the court of the tabernacle, the inner court, the upper court[.]."

Covenant. The Heb. word for covenant is the verb "cove't," 'hamâdh, L.X.X. κοινωνίαν, Vulg. concordia, the Latin word for friendship or partnership. The congregation of the ten tribes with Israel, a special form of covenant, is also known as 'hamâdt. The verb 'hamâh and the noun 'hamâdm are both used to denote the act or the state of being a close friend, a partner, or a fellow worker. The noun 'hamâmd denotes a community of interests, a body of people who share a common goal or purpose.

Covenant of the old covenant, the new covenant, the sacrificial covenant, and the moral covenant are all based on the concept of 'hamâd or 'hamâh. For example, the covenant of the old covenant is based on 'hamâd, and therefore, it is a covenant of friendship or partnership. The new covenant, on the other hand, is based on 'hamâh, and therefore, it is a covenant of bringing to fulfillment all the promises of the old covenant.

COVETOUSNESS. The verb "covet," 'hamâdh, L.X.X. κοινωνίαν, Vulg. concordia, occurs first in order of time in the Decalogue, with the sense of setting the mind on a forbidden thing with intent to procure it. Like its L.X.X. equivalent, 'hamâdh is used of lustful desire (Phil.6.25), and occurs in Dent.5.21 of desiring a neighbour's

necessitate personal renewal of covenant-relation by sacrifice, but the covenant consecration retained its validity, and was never renewed (cf. Kurtz, ib, p. 144). The value of this sacrificial covenant, even though the sacrifice was enacted by the initiate himself, was ascribed to the Psalmist's emphatic insistence on the necessity of inward personal religion in the worshipper (Ps.51). He did not undervalue the outward expression, but laid all stress on inward reality. And necessarily, the moral and religious development of Israel caused in the serious mind increasing exasperation of the harshness and inadequacy of this entire covenant. This consciousness finds its chief expression in Je.31.31-33, where a more complete covenant is anticipated in the future, the limitation of the existing one being indicated as consisting in its externality (ver. 33) and its incomplete absorbing power (43). (2) The New Covenant. On the night of the institution of the Eucharist, our Lord said, "This is My blood of the covenant, which is shed for many" (Mk.14.24, R.V.). St. Paul's still earlier account reports, "This cup is the new covenant in My blood" (1Cor.11.23, R.V.). The expression is in either case an indisputable use of the term 'covenant.' As it was, the covenant-sacri
cifice, which did not ratify but create it, so is the new. A covenant between God and man demands, from the Jewish traditional standpoint, propitiation, the reconciliation of God with man. (Cf. Lev.17.11.) Thus the death of Christ, by which the new covenant was created, is objectively a propitiation, subjec
tively a communication of his sacrificially-offered life for the sanctification of mankind. (Cf. Schmid, Bibl. Theol. N.T. 212.) See further Tc.1.2, "obedience and sprinkling of the blood of Jesus Christ," and Tc.1.18. As the old was a covenant with a people, rather than with individuals, so the new is a covenant in relation with a community (Eph.5.25; Tit.2.14). The individual, being admitted within the coven
tant-body, has thereby right of direct access to God, in virtue of the covenant-relationship once for all enacted. The social side of religion is as emphatic in Christianity as in the Jewish faith. Thus the new covenant is associated with a new social rite—the Eucharist, which (what

Covetousness. The verb "covet," 'hamâdh, L.X.X. κοινωνίαν, Vulg. concordia, occurs first in order of time in the Decalogue, with the sense of setting the mind on a forbidden thing with intent to procure it. Like its L.X.X. equivalent, 'hamâdh is used of lustful desire (Phil.6.25), and occurs in Dent.5.21 of desiring a neighbour's
wife, while a separate verb is used in the latter half of the verse for "coveting" his other possessions. The N.T. appears to connect the ideas of coveting and impurity; e.g., "unclean person nor covetous man" (Eph.5.5), "adulteries, covetings" (Mk.7.22). Similarly, as "fornication" is often used for indecency to Jehovah, so "covetousness" is linked with the worship of other deities: "covetousness which is idolatry" (Col.3.5; cf. Is.1.19). The noun is ἑγαρ' in O.T., and πενεκεια in N.T. Both nouns have a more restricted sense than the corresponding verbs, and connotes the desire to possess more than one's share of property. Since, however, the mind may well be set on gaining more, and not on restricting, the use of the noun is not restricted to the idea of hoarding.

14.3 declared the winter to be a "season" of growth. Cpates, Creation.

11.20. Let it be light, and there was light. Cpates, Creation.

The numbers of the ante-diluvian years are easily connote the idea of something speckled. This might easily apply to the word as used here; in the former passage the spots would refer to decayed matter, in the latter to some simple ornamentation, such as is still customary in the East upon cakes. [w.o.e.o.]

Crane. In Hezekiah's prayer (Is.38.14) we have this sentence, "If a crane [but more literally a swallow] or a swallow [ dignir] so did I twitter," and in Jb.3.7, "The crane and the swallow observe the time of their coming." Migratory species are clearly indicated, but the A.V. translators have unfortunately transposed the two English words, crane being the equivalent for 'elohim, which is not a place name, but a proper noun indicating by 'ısıs or 'ısıs, which refers to the well-known twittering of these birds. The crane (Grus cinereus or Grus grus) passes through Palestine in enormous companies during the spring migration; while numbers spend the winter in the uncultivated tracts in the neighbourhood of Beer-sheba. [Swallow.] [R.L.]

Cra tales, governor of the Cyprians in the reign of Antiochus Epiphanes (2Mac.4.29).

Creation. (1) The world is said in Gen.1 to have been created in six days, and God is then declared to have "rested" on the seventh. These days of creation were long regarded by most people as literal days of 24 hours. But in later times the opinion has gained ground that by "day" a long period of growth—a period of growth from the non-existent ("evening") through the dawn ("morning") of a new state of things until it was definitely established. Very recently some German critics have attempted to revive the idea that literal days are meant. But as this theory is simply adopted to disparage the authority of the Mosaic account of creation, it need receive little attention here. It will be sufficient to point out that in Gen.2.4 the whole work of creation is said to have been accomplished in a single "day." It is true that the latter part of this verse is attributed by recent critics to another author. But as they suppose that author to have been an earlier author, and as they have also supposed that the middle of Gen.2.4 commences a different account of creation, whereas it simply describes the adaptation of the world already created to the needs of man, it is not safe to assume that the passage is a separate author. If the theory that the word "day" must be taken literally may be safely dismissed. (2) Another question is whether these "days" must necessarily be regarded as consecutive. Even so, the history of creation in Gen.1 approaches with marvellous closeness to the discoveries of modern science, as was first distinctly established in the separable controversy between Mr. Gladstone and Prof. Huxley. But as the definite article is not prefixed to each number used with the word "day" ("first, second, third, and so on), it is not necessary to contend for the chronological order of the narrative. It is sufficient to interpret it in various manners, in order that the phenomena occurred to the narrator, and to suppose that the allusions to "evening" and "morning" refer to the gradual evolution (by the fiat of the Creator) of the things or creatures mentioned. According to certain laws prescribed by Him, into the condition in which we are now find themselves. The seventh day indicates that since the "sixth day" there has been no creative act but that He Who brought all the universe into being has been content thenceforth simply to guide and regulate His creation. (3) It has been contended that the word Elohim ("elohim") when used in the narrative indicates a separate document. [Elohim; Gen.1:1.] The term is first used in the rapid transition of the "Jehovistic" and "Elohist" documents the critics themselves are not consistent, and the use of the word Elohim indicates a great scientific truth. Its meaning is Power or Force, and it is significant that at the early period when Genesis was written, God was described in terms already reserved in a scientific sense, as the Great Primal Force to which, or rather to Whom, all phenomena owe their existence. (4) We next come to the stages of the process of creation, which, as already stated, correspond very closely indeed with the succession of events as laid down by modern scientific research, though one or two of the processes attributed to different "days" may possibly have been contemporaneous. "In the beginning" (that is to say, at some period in a far-distant past) God called the visible universe into being. At first the earth was "formless and empty"—that is, it was as yet one of those gaseous vortices which research has declared to have preceded the formation of those globular masses which we now term "suns" and "planets." But the gaseous matter of which the nebulae consisted eventually developed into solid and liquid matter, because the Spirit of God—the Primal Force mentioned above—"brooded," or "fluttered," i.e., communicated a vibratory motion to the gaseous matter, until liquid and non-liquid matter were finally separated from each other. Mr. Capron, in his able and learned work (Conflict of Truth), explains the process as follows in strictly scientific language: "In the beginning the
CRIMES AND PUNISHMENTS

Almighty Being created Matter. And Matter was then in a gaseous condition, for it was form-less, homogeneous, and invisible. And the Spirit of the Almighty agitated with molecular vibrations the fluid mass." On the first day God decreed the existence of light. This statement that "there was light" before the sun was created has long been derided by those who desire to deny the authority of Scripture. But recent investigation of astronomical phe-nomena has led experts independently to the conclusion that the facts of solar and planetary evolution require the existence of light before the sun existed. [LIGHT.] A second stage in the history of creation was the aggregation of the nebulae into more definite forms, each with its fluid atmosphere (Heb. *expanses*) around it, and its gathering of waters on its surface. A third stage was the conversion of the less definitely coherent masses into something more closely resembling our earth—the separation of sea from land and the preparation of the appearance of organic life on the earth in its less highly developed forms, including provisions for its permanent continuance. A fourth stage (which may either have preceded, followed, or been contemporary with the last) was the evolution of the sea and their fishes, and we see them around us. The writer next turns to the development of our own planet. The fifth head under which the divine process is regarded is the creation of the inhabitants of the sea and air. And lastly we are told of His bringing into existence the inhabitants of the earth, insects, reptiles, and the diaspone closing full in man," the highest and noblest of all His creatures, to whom is given the power to rule all other beings which have been created. The vegetable productions of the earth are to be His food, and the animal creation is to be subject to his will. Then the great principle is laid down on which all revealed religion is built—that all things which were made came perfect from the hand of the All-wise Creator. "God saw everything that He had made, and beheld it was very good." It is not to Him, as some have believed, nor to matter, which is His work, that the ruin and marred found in His hand are ascribed, but to the misuse of the faculty of free will, with which man was endowed at His creation. [FALL.] Gen. 2, 14ff. (not the work of another hand) tells us how Jehovah Elohim, the Eternal Power ("Persistent Force," as Mr. Herbert Spencer calls Him, as distinguished from Creative Force), continues the process commenced at creation, of adapting the world for man's habitation. The Conflict of Truth, by F. Hugh Capron; and three works by Sir J. W. Dawson, The Story of the Earth and Man, The Origin of the World, Modern Science in Bible Lands; "Heb. and Bab. Cosmologies," by W. St. Clair Tisdall in Nineteenth Cent., Aug., 1905, pp. 259-266; and see further a valuable art. Cosmogony in this Dict. [J. J. L.]

Creditor, [Loan.]

Crescens, a companion of St. Paul, who had left him to go to Galatia (2 Tim.4, 10). St. Paul's usage makes it probable that Galatia in Acts 16, 10 is meant for Gaul instead of Galatia, and the testimony of Eusebius, has led to the belief that the other Galatia, viz. Gaul, is meant, and the foundation of the churches of Vienne and Mayence has been ascribed to Crescens. [E.R.B.]

Cretes, a large island S. of Greece, in the Mediterranean at the mouth of the Aegean Sea. It is about 140 miles E. and W., and 30 miles N. and S. Mount Ida rises 8,000 ft. from its shores. It is first noticed in Gen. 14, 5 (Mac.10, 67); and St. Paul's voyage along its S. shores is described (Ac. 27, 7-21) till, driven by the N. E. wind, the ship sheltered leeward of the island Clauoa. [Fair Havens; Gortyna; Lasae; Phenice; Salamine.] In the 1st. Ep. to Titus the establishment of elders and bishops in Crete is noticed (Tit. 1, 5); and the evil reputation of the Cretans (ver. 12). Josephus mentions Jews in Crete as early as the time of our Lord (2 Wars vii. 1). The old population was Greek; and the discoveries of Mr. A. J. Evans (since 1893) show that the island was civilized as early as 1500 B.C. [W.]

Crotos (Crotus), was a member of the Thera, whose name was inscribed on the plates of the CHERETHITES (2 Sam. 8, 18; Ezk. 25, 16) were Cretans. They were probably inhabitants of Keratyah in Philistia. [C.R.C.]

Cub ( Heb. tob : Job 39, 9 : Ps. 14, 13). A "standing-place" or "stall". The ancient rock stables in the Hebron hills and elsewhere have stone mangers with holes perforated beside them for the halter ropes (Scur. W. Pal. i. p. 310; iii. pp. 345, 69). [C.R.C.]

Crimes, Wrongs, and Punishments. A. Natural laws. In nature legislations distinctions exist between crimes and civil wrongs (English tort, Roman delict), but in archaic law these are not applicable without considerable modifications. The subject must therefore be studied in the light of ancient conditions and ideas. In all early communities certain factors are found. The following con-tain: (1) When the society is weak, many injuries lead to vengeance expressed in blood-feud (see especially Gen. 34) and retribution, seen in talon ("eye for eye," etc.). This is often disadvantageous to the community which is weakened by private wars and the land becomes cropped of fighting. In measure of compensation a system of compen-sation to prevent this. Thus the owner of property is offered manifold restitution from the thief to prevent his taking the law into his own hands and fighting (Ex. 22, 21, 37, etc.; Post, Grundries, ii. 430-432); and in most cases both the blood-feud and talon are regularly succeeded by composition. Gen. 20, 16, where a thousand pieces of silver are given as "a covering of the eyes," is particularly instructive. (2) Similar to talon is the notion that an offender "shall be deprived of the limb with which he offends" (Gen. xxvii, 11; cf. V. with. v. 10, etc.). See Post, Grundries, ii. 230. One instance in Pentateuch, Deut. 25, 12; etc. (3) In other cases the offence is such as to demand the maintenance of the severest punishments for the protection of society. Here the motive is that operate in (1) to do away with the death penalty, in the primitive community of the Hebrews (Ex. 21, 16; see Post, Grundries, ii. 355). (1) Laws closely implicated with religion in all early societies,
and this affects the subject in several ways. (a) The existence of a whole class of offences is due to religious ideas—e.g. apostasy, prophesying falsely, incest, etc. (b)惩罚 does not require a particular act, but any act which is contrary to the will of God.

Another ancient theory is that offenders against gods should be offered or devoted to the offended deity (Post, Grundris, ii. 244 f.; so to God, see Heb. and R.V. marg. of Ex. 22.20[19]; Deut. 7.26, 13.15). [Anathema.] (c) It is possible to regard many offences in any one of four ways: (i) as a sin against man; (ii) as a sin against God; (iii) as an offence against the community; (iv) as defining the community or the land in God's sight (Judg. 20.13 and often in Deut.). (ii) and (iv) obviously require expiation. Hence, if an act is regarded primarily from either of these points of view, the picual notion will predominate—e.g. Deut. 21.1-9, but without necessarily preventing the other aspects of the case from being present to the lawgiver's mind. (d) Probably an extension of this idea is explained by Vishniu, xxxiv. 2: "Such criminals in the highest degree should proceed into the flames; for they do not distinguish between a good and a bad crime." Cf. Gen. 38.24; Lev. 20.14, 21.9. (e) Divine punishments and rewards are often promised, and the actions so treated are properly not within the sphere of law-courts at all. It should be noticed that the idea of talion is often prominent here (e.g. Ex. 25.24[23]), as also it is a kind of spiritual principle; the wrong-doers being punished in that wherein they have offended (e.g. childless death is a punishment for certain cases of incest). (f) Certain actions outraged the moral sense of the community—"wrought folly in Israel" (Gen. 34.7; Deut. 22.21, etc.). In Israel they appear to have been offences falling under (4). (g) The idea of punishment as a deterrent from crime also appears soon (Deut. 19.20, etc.). (h) On the idea of collective responsibility, see LAW in O.T. [B. (7) (iv)]. (i) Certain offences are usually treated as merely giving rise to claims for compensation—e.g. damage done to crops by stray animals, putting him falsely in debt, and the greatest similarity to modern law.—B. Pre-Mosaic. In most cases our information is fragmentary, and no certainty is attainable. (a) See HOMICIDE. (b) Adultery is treated as a sin against God in Gen. 12.10-20, 20.26 and 39, and the (alleged) attempt is treated by Joseph's master as a crime punishable by imprisonment. [ADULTERY.] The attempt gives rise to compensation in Gen. 20 [supra, A. (1)]. (c) Reuben committed incest, and was punished for it by the loss of his birthright and blessing (Gen. 49.3 f.; 1Chr. 5.1 ff.). (d) The sin of Sodom was clearly very grave according to Hebrew ideas. Probably it would have been treated as a crime if committed by a Hebrew. (e) Rape committed by a foreigner gave rise to blood-feud in Gen. 34. There were, however, differences of opinion as to the action of Dinah's brothers (34.30 f.), which, in fact, belongs to an earlier stage than criminal law. (f) Uncleanness in a widow was, at any rate in some cases, an offence punishable by killing (38.5). (g) Kidnapping occurs in Joseph's case. It was an offence against men (42.21 f.). It would have given rise to vengeance (with unspecified results) (50.15-17). (h) Theft of movables was punishable by death or bondage (31.32, 44.9, etc.). (i) Spying was clearly a crime, at any rate in Egypt (42). (j) Non-circumcision was punishable by cutting off the foreskin (no mention of Mosiac. I. In some cases, two of the ideas explained in A (supra) are mentioned in connexion with the same offence—e.g. Deut. 21.21. Unexpressed reasons must often have played a part in forming a rule even when others are expessed, and in many cases no reason at all is given for the rule laid down. This makes the scientific classification difficult, and the difficulty is increased by the fact that emphasis is sometimes laid on one aspect of a rule, sometimes on another. Again, what is historically one thing, e.g. vengeance, is often made to sub serve entirely different ideas of justice. Sub ject to these remarks, the following arrangement, based on the legal consequences of each action, and generally omitting HOMICIDE (which is separately treated), appears least open to objection. In each case C. stands for the legal consequences. (a) Offences against living individuals. (a) Vengeance subjected to legal restrictions: Deut. 19.21, 22, 25, injury to person fighting her husband; C. loss of hand. [HOMICIDE.] (b) Vengeance subjected to legal process, and tempered by money payments, or else damages on a scale calculated to prevent the party wronged from taking the law into his own hands: (i) Injuries to person: Deut. 22.6 f, 25, injury to person cf. infra (d) (ii). On composition for talion see Wiener, Studies in Biblical Law, 117-122. (ii) Injuries to property: Ex. 22.1, 4, (21.37-22.3), theft of animal, C. 5-fold restitution. (3) sheep: C. four-fold restitution [CATTLE]. (7) sale of thing if thief is penniless: 2. if animal found alive in thief's hands; C. double restitution. 22.7-9, 8-5, theft of the deposit; C. two-fold restitution by thief: other cases: C. two-fold restitution by depositary or owner accused of theft: Deut. 22.22, 23, depositary delivering same lost. Injury to property: C. simple damages. 21. 33, injury to animal by opened pit. 21.36, injury to animal by vicious ox. Lev. 24.8, 21, killing an animal. Ex. 22.5, 6, damage to crops, etc., by animal or fire. 22.11, depositary losing animal through theft. 24.14, damage to borrowed animal or object (see also infra, 4 and HOMICIDE). (ii) Wrong to women: 21.7-11, Hebrew concubine bought from her father not married by purchaser or given to his son: C. to go free. 22.15 f., seduction: C. seducer to pay father bride-price, also to marry the girl if her father consents [SLAVE]. Deut. 21.14, captive slave woman taken as wife by master who tires of her; C. freedom. 22.28 f., rape of virgin: C. indissoluble marriage, and payment of 50 shekels to father. (iii) Wrong to slave by master: Ex. 21.26 f., knocking out eye or tooth: C. freedom for slave: cf. supra (ii). (iv) Injury to (free) person: 21.15 f., to a combatant in a fight: C. damages for time lost and cost of healing: 21.22, in fight to pregnant female bystander, causing miscarriage only: C. damages. (v) 21.35: closely analogous, is the case where two oxen (not known to be vicious) fight, and one is killed; C. share dead ox
CRIMES AND PUNISHMENTS

and live ox equally. (d) Cases where reparation would be inadequate, because of sore outrage to the moral or religious sentiments of the community, or owing to the heinousness of the offence: (i) Reparation and punishment: Deut. 22.13-19, husband slandering innocent wife; C. reparation to wife through indissoluble marriage, to her father by fine of 100 shekels (which may be partly penal) + punishment in chastisement of husband. (ii) Punishment only: Ex.21.15, striking parent. 21.17; Lev.20.9, cursing parent. Ex.21.16; Deut.24.7, kidnapping and enslaving or selling, Deut.22.20, misconduct of virgin detected after marriage; C. death [FAMILY]. 19.16-21, giving false evidence; C. talion; cf. supra (b) (i). 21.18-21, rebellious son; C. death. Lev.20.10f. 22.22, adultery; C. death to both. Lying with betrothed woman, Deut.22.23 ff. If free, C. death to both; Lev.19.20, if bondmaid, (unspecified) punishment for both. Deut.22.25, rape of betrothed (free?) woman; C. death. Any of these offences might perhaps be put under 3. infra; but probably adultery, etc., were regarded, partly at any rate, from the point of view of the injured husband. (c) Cases where reparation impossible: Ex.21.20, master beating slave and causing immediate death; C. unspecified punishment (compounded impossible, because he is dead; to owner impossible, because he is the offender). [Homocide.] (N.B. In cases where a specified sum is to be paid, it is impossible to be certain that the damages are simple damages, and not larger than the pecuniary value of the injury.) (2) Offences against the dead: Deut.25.5-10, resident brother of childless deceased refusing to perform levirate marriage; C. public loss of his shoe, and spitting in face by widow. (d) Other offences. (a) Against God or the community only: Ex.22.18[17]; Lev.20.27, practising witchcraft; C. death. Ex.22.19[18]; Lev.20.15; cf. Lev.18-23, certain unnatural offences. Lev.20.6, consulting wizards, etc.; C. cutting off by God (infra, II.). Ex.22.20[19], sacrifice to a false god; C. devotion, i.e. death [ANATHEMA]. Ritual offences: C. death, cutting off (infra, II.) or destruction. Ex.31.12-17, 35.1-3, cf. Num.15.32-30, Sabbath-breaking. Ex.30.20, using unclean carpet in the temple; C. death. Ex.30.38, making holy incense for scent. Lev. 7.18, 20, 21, 25, 27, 17-31, 10-12, 13f. 19.8, eating flesh of Peace-offerings improperly or fat or blood. 17.8, offering Burnt-offering or sacrifice without bringing it to door of tabernacle. 23.9f., non-affliction of soul or working on Day of Atonement, Num.15.13; 19.38, stranger coming near dwelling, etc. Ex.12.15, 24.6, eating leavened bread during Passover. Num. 9.13-20, not keeping Passover, and non-purification if Unclean. Lev.22.3, Priest approaching holy things in state of uncleanness [TABERNACLE, SACRIFICE]. Other ritual offences: 22.4, entering holy places uninvited; C. destroys its value + t. 17.15, not washing clothes to remove impurity; C. he shall bear his iniquity.” Other offences: 20.21f.; cf. 18.21, giving seed to Molech; C. death, otherwise cutting off. Lev.18, certain sexual offences; C. cutting off. Deut.19, misconduct of priest’s daughter; C. burning [supra. A. (4) (d)]. 21.10ff., blasphemy; C. death. Num.15.30, sinning with high hand; C. cutting off. Deut.13.1-5, prophet or dreamer preaching apostasy; C. death. 13.6-11, relation or friend urging apostasy; C. death. 13.18-18, apostasy of city; C. devotional by edge of sword [supra. A. (4) (b)]. 17.2-7, apostasy of individual; C. death, cf. Job 3.26-28. Deut.18.20, prophesying falsely; C. death [PROPHECY]. 17.12f., disobedience to direction of judge or priest in supreme court; C. death [JUDGE]. 22.20f., wife guilty before her marriage; C. death. On specific priestly offences see Priest and Levites. (b) In certain cases, the person who would otherwise have been injured is a consenting party. Under this head fall various cases of incest specified in Lev.20: C. death, burning, cutting off, dying childless—according to the case. (4) In certain cases of injury to property, the action of a wrong-doer who repents is treated primarily from the point of view of expiating sin (lev.6.1-7[5.20-26]; 14.16-17, etc.). It is usually possible by restoring the article, with the addition of, but the emphasis of the law is on the Guilt-offering to be brought [DEPOSIT]. In other cases, matters are dealt with purely from the point of view of Sin, and fall outside the scope of this article. (i. Additional items. (a) Cursing verse 3). The method is found, but never defined. It has been variously held to mean death or some form of excommunication or banishment. Often (e.g. Lev.20.3) it is said that God will cut off and probably some form of death by His hand is meant. (2) Stoning was the most frequent form of capital punishment, and is probably usually meant where the method is not specified. It had the advantage of not exposing any individual to blood-feud or the odium of being a public executioner. The witnesses were to cast the first stone in certain cases [WITNESS], perhaps always. (3) Hanging is mentioned Deut.21.22, where the exposure of the corpse during the night is forbidden; but it is not clear whether the hanging is the means of execution or subsequent thereto. See also Num.25.4; 2Sam.21.6. (4) Stripes were not to exceed forty in number (Deut.25.1-3), and appear to have been in judicial discretion. They were probably similar to whipping by the hand. Deut.21.22f. 19.20; Deut.22.18, and probably also in a number of cases not mentioned in the law.—D. Post-Mosaic. The references are too scanty to be of much value — e.g. from Jos.3:20 it appears that desertion of a husband by his wife was wrong, but we cannot draw any inferences as to the state of the law on the subject. The following facts may be gathered: Cursing the king became an offence punishable with death (1Sam.16.15: K.21). In Ezekiel’s time adulation may have been punished in the way suggested by Ezk.15.17, but this is not the only possible interpretation of the passage. From Jos.20.21, 29.6 it appears that prophesying in the temple was an offence punishable with beating, stocks, and collar (2) (see commentaries ad loc.), if disapproved by the priests. Treason was punished by beating and imprisonment (1.Josh.7.13f.). In at least one O.T. case prophesying against Jerusalem and not adhering to the service with the sword, followed by casting the corpse into the graves of the common people (26.
CRIMES AND PUNISHMENTS

20-23). Slaying with the sword or spear often occurs elsewhere (e.g. 1 K.2.25, 34); but it is not always clear whether the cases should be regarded as instances of legal punishment. The Philistines burnt Samson's wife and father-in-law (Judg.15.6; cf. 14.15). Imprisonment appears to have been common under the monarchy (1 K.22.27; 2 Chr.16.10; Je.37.15, etc.), as also stripes (37.15, etc.). Some form of stocks or block on the feet is mentioned in Job 13.27, 33.11 (not the Heb. word translated "stocks", in Je.20.2, etc.). Scourging with thorns and briers occurs in Judg.8.7,16, but not as a legal punishment. Heaps of stones were sometimes raised over offenders who had been put to death (Jos.7.25). Banishment and confiscation also occur (Ex.7.26). On 2 Sam.12.31 see H. P. Smith ad loc. Theft of movables was perhaps punishable by sevenfold (? manifold) restitution (Pr.6.31). [LAW IN O.T.; HOMICIDE; JUDGE.] For literature, see LAW IN O.T. [H.W.]

—In N.T., Punishments, etc. (1) Stoning. (a) For blasphemy. Two attempts were made to stone Jesus on this charge: In 50, for taking to Himself the divine name, and 10.31, for claiming unity of substance with the Father. St. Stephen was charged with speaking blasphemous words against the temple and the law (Ac.6.11,13; but cf. 7.56 and Mt.28.64,65). [WITNESS.] (b) For adultery (Jn.8.5,7). (c) It was the usual form of punishment inflicted by the people (Lu.20.6; Ac.5.26,14,5.19; Mt.21.35. See also 2 Cor.11.25; Heb.11.37). (2) Scourging with thongs, the culprit being bound to a pillar by the hands, in a stooping attitude. (a) This was part of the punishment of Crucifixion, and was inflicted after sentence of death; but in our Lord's case it seems to have been a lesser punishment, administered in the hope that it would satisfy His accusers (Mt.27.26 and parallels). [PIGATE.] (b) Followers of Christ so punished (Mt.10.17,23-34; 2 Cor.11.23-4). A stronger term, ἐπισκυρία, "to flay," N.T. "to beat or smite," is used Mk.13.9; Lu.22.63; Jn.18.23; Ac.5.40,22.19; see also 16.37. Pa.56iω, "to beat with a rod," is used Ac.16.22; 2 Cor.11.25. St. Paul was "put to the question" by scourging (Ac.22.24). According to Porcian Law (Cic. Ferr. v. 62-66) it was "a high crime to beat" a Roman citizen. (3) ἐπισκυρεῖτο, "beating to death," is breaking on the wheel. Mt.11.35. "Others were tortured," R.V. marg. "To death," refers to 2 Mac.6.19,28,30. Josephus, de Macc. v. 9, calls the same instrument ἐπισκυρία, "a wheel." (4) Imprisonment. For debt, Mt.5.26; for murder and murder, Lu.23.19. Believers in Christ, Lu.21.12; Ac.5.18; 8.32,4,26.10, etc. There was a public ward, some kings. Strokes were in use in "the inner prison," 16.24; prisoners were sometimes bound to soldiers by chains, 12.6. (5) Expulsion from the synagogue for confessing Christ, Jn.9.22,12.42,16.2. (6) Deprivation. John the Baptist, Mt.14.5,8,12. See also Ac.12.2; Rev.20.4. (7) Precipitation, Lu.4.29. According to 2 Mac.6.10, two women were precipitated from the roof of their house for circumcising their children. (8) Drowning, Mt.18.6. This was a Gk. and Roman punishment: cf. Josephus, 14 Ant. xv. 10. (9) Sawing asunder, Heb.11.37. Mt.24.51, "the lord of that servant... shall cut him asunder," R.V. marg. "severely scourge him." (10) Exposure to wild beasts, 1 Cor.15.32; 2 Tim.4.17. The meaning of these passages is, however, uncertain. (11) Banishment, Rev.1.9. (12) Crucifixion. [CROSS.] (13) Handing over to Satan, 1 Cor.5.5; 2 Tim.1.20. This was probably a temporal punishment, intended to be remedial; cf. Lu.13.16; 2 Cor.12.7. [EXECRATORY; SATAN; HYMNAEAUS.] [H.W.]

Crimson. [COLOURS.]

Crisping-pins (Is.3.22). [BAG.]

Crissus, a ruler of the synagogue (ἀρχηγός) at Corinth. His conversion (Ac.18.8), coincident with St. Paul's removal from the synagogue to the house of a Gentile, was apparently the turning-point in the history of a mission which, until then, had only met with resistance. The importance of such a convert, or services rendered by him, would account for the distinction granted him of baptism by the apostle himself (1 Cor.1.14). See Lightfoot, Hor. Heb. in loc. [E.R.B.]

Cross. The word represents the Gk. σταυρός, which is strictly equivalent to Lat. patris (stake), though it was afterwards used (as in N.T.) for the Lat. crux. Death by impaling on a stake had been practised by the Romans on their slaves as well as death by crucifixion proper. Of the three forms of the cross (decussata X, commissa T, immissa †), tradition is almost certainly right in assigning the last to our Lord's case. The upright limb was usually left standing at the Dispose place of execution outside the city, and only the cross-piece was borne thither by the criminal himself or another from the place where he had been condemned or scourged. This was often made of two parallel timbers joined at the ends

ROMAN SORCER (From Kinn's Grave in the Rock.)
CROWN

between which the victim's head was inserted: Lat. patibulum. On arrival, the hands and feet were either bound or (as in our Lord's case) nailed to the cross-piece, when it had been duly fixed to the upright. A stout wooden peg, projecting from the latter, helped to support the body at the centre; but it is doubtful whether there was any similar support below the feet. A board, whitened with gypsum, on which the nature of the offence was written in black letters, was usually carried before the criminal to his execution, and then affixed to the cross over his head. This was done in our Lord's case. Pilate drew up the inscription, and it was made out in Heb., Lat., and Gr.—the national, official, and "common" dialects of Judea. The versions of the inscription in SS. Mark, Luke, and John may possibly each represent one of these original languages (Jn. 19:20) and St. Matthew's a combination of the three. See Farrar's St. Luke, p. 293. For further interesting considerations on the Title on the Cross, see Sweet's notes on Mk. 15:26, Westcott's on Jn. 19:14ff., and Ebersheim, Jesus the Messiah (3rd ed.), ii. 590f. For our Lord's Words from the Cross, see Seven Words, The. Death was often long delayed, and sometimes in rough mercy hastened by the breaking of the legs (Jn. 19:33ff.). There is some ground for thinking that (in deference to Jewish feeling) our Lord was not (as was usual) stripped of His clothing, until His body was prepared for burial. Even so the disgrace of the cross was fully as great as N.T. (especially St. Paul's epistles) depicts it. [Cf. C.I.F.]

Crown occurs in O.T. as the translation of various Heb. words. (1) The simplest (ør) has merely the idea of "encircling," and is used of the decorative golden wreath which and has the root that appears in "Nazarite." Hence this word denotes consecration, and is used of the crown which the high-priest wore upon his mitre (Ex. 25:16), and sometimes also of the brass diadem (2Sam.1.16). It might be supposed, therefore, that it indicates a sacred office. [KING.] (3) The ordinary Heb. word (ụd'ārā) for the royal crown, from which our word "tiara" is derived, has, however, no such special meaning. (4) In Esth. 1.17, 2.17, 6.8 only, kēther is used for the royal crown. In N.T. the Gr. words στέφανος and Βασιλεία are both translated A.V. (1) στέφανος is the festal wreath which rewarded the victor or was used as a token of joy. (2) διαδήμα is the symbol of sovereignty. The crown that rewards the Christian in N.T. is always the victor's wreath and never the royal diadem (1Cor. 9:25; Rev. 3:11). This latter is ascribed to the ascended Christ (Rev. 19:12), who perhaps is also represented as wearing the garland of victory (Rev. 6:2, 14, R.V. marg.). [DIadem.] [I.C.V.D.]

CROWN OF THORNS (Mt. 27:29). Our Lord was crowned with thorns in mockery by the Roman soldiers. The object seems to have been insult, rather than the infliction of pain. The Heb. words for "thorn," Heb. qāriz, Gr. spina, although abundant near Jerusalem, cannot be the plant intended, because its thorns are too strong and large for it to have been woven into a wreath. Had the acacia been intended, as some suppose, the phrase would have been different. Obviously some small, flexible, thorny shrub is meant: perhaps on the ground of Ex. 15:31, Maimonides says the thorn used was the Arabian Nāby, or Xubī (Zizyphus). [THORNS.]

CRUCIFIXION. [JESUS CHRIST; CROSS.]

CRUSADERS were employed in A.V., apparently in a general sense, to translate three distinct Heb. words. (1) caphākāth, carried by Saul when on his night expedition after David (1Sam. 26:11, 12, 16), and by Elijah (1K. 19:6). In the present day the vessel thus used would be a globular one of blue porous clay about 9 in. diameter, with a neck about 3 in. long, a small handle below the neck, and opposite the handle a straight flat spine; that of Eliezer was of glass, carved. It is probable that the water is drunk or sucked. (2) The noise which these vessels make when emptied through the neck is suggestive of the second term, bāqūq. This is found but twice: a "cruse of honey" (1K. 14:3), and an "earthen bottle." (1Ch. 11. 4) Apparently very different from both these is the zākāh, a larger vessel: probably a flat metal saucer of the form still common in the East. It occurs in 2Chr. 35:13, "pans"; and other words from the same root are found in 2K. 20.20, "cruse," and 2K. 21.13, "dish." (cf. Pr. 19.24, 26, 15.)

CRYSTAL represents in A.V. two Heb. words. (1) zikhkhāk (1Obs. 28:17 only). Notwithstanding the different interpretations, "rock crystal," "adamant," etc., that have been suggested, there can be little doubt that "glass" is intended. The Aramaic form of the word occurs in the Talmud in this sense. (2) qēṣīrī often occurs in O.T., to denote "ice," "frost," etc.; but once only (Ezk. 4:12), as is generally understood, to signify "crystal." The ancient supposed rock-crystal to be ice congealed by intense cold.
CUBIT

The similarity of appearance between ice and crystal doubtless caused the same term to be used for these substances. The Gr. word occurs in Rev. 4:6, 22:1. It may mean either "ice" or "crystal.

Cubit. [Weights and Measures.]

Cuckoo (Heb. shaqaph). There does not appear to be any authority for this translation in A.V. of the Heb. word, which occurs twice only (Lev. 11:16; Deut. 14:15), as the name of some unclean bird. Bochart has attempted to show that shaqaph denotes the storm-petrel. Tristram, on the other hand, has suggested that some of the larger petrels or shearwaters, such as Puffinus griseus and P. angulum, which abound in the E. of the Mediterranean, and are very similar in habits to the storm-petrel, may be denoted by the Heb.; but nothing definite can be stated as to the real meaning of the latter. [R.L.]

cucumber, which they eat rind and all." The "lodge in a garden of cucumbers" (Is. 1:8) is a rude temporary shelter, erected in the open grounds where vines, cucumbers, gourds, etc., are grown, in which some lonely man or boy guards the plants from robbers and scares away the foxes and jackals from the vines.

Cummin, a cultivated plant of Palestine (Is. 28:25, 27; Mt. 23:23). It is an umbelliferous plant, something like fennel. The seeds have a bitterish warm taste, with an aromatic flavour. The Maltese of to-day are said to grow it, and to thresh it as described by Isaiah.

Cup. There are two words in Heb. for "cup": kōs (Gen. 40:10, etc.), the ordinary drinking-vessel; and qibha' (Gen. 44:2; Jer. 55:5), a larger vessel, corresponding to "tankard." Both were made of clay, probably also of horn and wood; golden cups at the king's table were also known (1 K. 10:11). [Goblet.] [W.O.E.O.]

Cucumbers. The Heb. qishshu'îm occurs once only, in Num. 11:5, among the good things of Egypt for which the Israelites longed. Egypt produces excellent cucumbers, melons, etc. [Melons], the Cucumis chaté being, according to Hasselquist (Trav. p. 258), the best of its tribe yet known. This plant grows around Cairo, and not elsewhere in Egypt. The C. chaté is a variety only of the common melon (C. melo). It was introduced into England, and called "the round-leaved Egyptian melon"; but is rather an insipid sort. Besides the Cucumis chaté, the common cucumber (C. sativus), of which the Arabs distinguish a number of varieties, is common in Egypt. Both Cucumis chaté and C. sativus," says Dr. Tristram, "are now grown in great quantities in Palestine. On visiting the Arab school in Jerusalem (1858) I observed that the dinner which the children brought with them to school consisted, without exception, of a piece of barley cake and a raw cucumber, which they eat rind and all." The "lodge in a garden of cucumbers" (Is. 1:8) is a rude temporary shelter, erected in the open grounds where vines, cucumbers, gourds, etc., are grown, in which some lonely man or boy guards the plants from robbers and scares away the foxes and jackals from the vines.

Cupbearer (Heb. mashqé, rendered "butler" in Gen. 40:5), an official who held an important position at the Persian court as at those of Egypt, Palestine, and Babylonia. He figures in the mural drawings of Egypt (where his title is dúb); and in Babylon there was a special kind of wine which alone the cupbearer offered to his royal master. Nehemiah held this post (Ne. 1:11, 2:1) at the court of Artaxerxes. The title "Rab-shakeh" does not (as has been fancied) denote "chief cupbearer," but is the Assyrian Rab-shαqē, and denotes an officer holding rank next to the Tāriān (Assyr. turtannu) or generalissimo. Rawlinson, W. A. Inscriptions, vol. ii. 67, l. 66; Ebers, Eine Aegyptische Königsschöster, etc. [W.S.T.C.T.]

Curse. Usually either an invocation to a divine power to inflict evil on somebody, or else a resolution of God to send such an evil. The word is, however, also applied to the actual evil sent, to blasphemous language used of
God, and to one who is reduced to such a piteous plight that it is a maladiction to wish that another may become like him. A curse was sometimes regarded as having objective power (Jos.6.26; K.16.34; Num.22.6), and language is even using implied that it had some definite separate existence (Is.24.6; Zech.5.3). Hence the twelve curses, Deut.27.15-26, were aimed at offenses which could only be dealt with by the ordinary law with difficulty, if at all. Hence, too, Micah's confession, Judg.17.2. Apparently the uttering of a curse concerning some offense placed those who knew the circumstances under a duty to confess; otherwise they were liable to the effects of the curse (Lev.5.1; Pr.29.24); but the guilt could be purged by confession, sacrifice, and atonement by the priest (Lev.5.17).

It was held that a causeless curse did not light (Pr.26.2); perhaps also that in some cases a curse could be diverted (Gen.27.13). Apparently a curse could counteract (or be counteracted by) a blessing (Judg.17.2; Mal.2.2; cf. Deut.29.16[18]; Ecclus.3.6). Most oaths contain some aspect of confession, protest, or repentance which allows the oath to be struck out of effect were the promise to be violated, and in the case of declaratory oaths if the secession be untrue. Hence every covenant contains a curse (though sometimes only implied in such a phrase as, 'the judge—or be witness—between these two parties—'). Thus, the curse forms a part of the covenant of Deut., and is one of the sanctions of the law it contains. The formula of curses varied greatly—e.g. Deut.28.16ff.; Judg.9.7-20; cf. 9.57; Je.29.22; 2Sam.16.7; Ne.5.13. Curses were sometimes accompanied by symbolic actions or ceremonies (Ne.5.13; Am.15.6; Deut.27, etc.) and by sacrifice (Judg.9.27; Num.23.1ff.). As to legal provisions, cursing a father or mother was punishable with death (Ex.21.17; Lev.20.9). So was cursing God (Lev.24.11-23). The law also prohibits cursing judges and princes (Ex.22.28[27]) and the dea (Lev.19.14). Later, cursing the king was regarded as a capital offence (2Sam.19.21[22]; K.21).—Terminology. The Heb. qâbî (and verb) are never used of self-imprecation (on 1Sam.3.13 see H. P. Smith's critical note): nor is ōar. [Blessing; Vow.] Leist, Graeco-Hellenische Rechtsgeschichte, 755-758; Kedencyklopädie für Protestantische Theologie und Kirche, xviii, 148-154; Westermann in Sociological Papers, 145ff. [n.m.w.]

In N.T. An instance of a curse with objective power is Mk.11.14, where Jesus dooms a fig-tree to perpetual sterility: ver. 21, "the fig-tree which Thou cursedst is withered away." Cf. Heb.6.8, the land "sink unto a curse," and Gen.3.17. Used of persons devoted to destruction, Mt.25.44, "Depart from Me, ye cursed," R.V. marg. "Depart from Me—under a curse." Also of those under a curse, 21e.2. 14, R.V. "children of cursing." Christ by the manner of His death—crucifixion—was made a curse, i.e., atoningly, "accursed." (Gal.3.13[14]), with reference to Deut.21.23. [Oaths: Anathema.]

Curtains. The rendering of three Heb. words: (1) vērî, the 10 inner curtains of the tabernacle, constituting the "dwelling." These were of costly material and fine workmanship (Ex.26.1,36.8). The 11 curtains of goat-hair, the "tent" over the Tabernacle (26.7,36. 21). Synonymous with Tabernacle (2Sam.7, rCh.17.1) and with Tent (Je.4.20,10.20,49, 20; Hab.3.7; Can.1.5; cf. Ps.104.2). Figuratively of Jerusalem's prosperity (Is.54.2). (2) masâkî, prop. pōrtîères (Num.3.26). [Hanging.] (3) dōg (Is.40.22), a thin veil, R.V. marg. garze. [n.h.]

Cushi (2:2).—1. Son of Han (Gen.10.17; rCh.1.10), perhaps called after a country allotted to him.—2. Cushi, a country (Gen.2.13) encompassed by Gihon, the second river of Paradise, would seem to have been somewhere N.W. of Assyria. —3. Ethiopia above Egypt is termed in the ancient Egyptian inscriptions Kesh, and probably corresponds to Cushi elsewhere than in Gen.2.13. The Cushites, however, had clearly a wider extension, and spread along tracts extending from the higher Nile to the Euphrates and Tigris. A Cushite runner was employed by Job to take David the news of Absalom's death (2Sam.18.21). Zerah the Cushite (A.V. Ethiopiaan, 2Ch.14.9), who was defeated by Asa, was probably the leader of an Egyptian army, but may have come from central Arabia. Zipporah, Moses' wife, is called a Cushite (Num.12.1). [RACES. [C.R.D.B.]

Cush (12:5), a Benjamite mentioned only in Ps.7 (title). A.V. marg. suggests an identification with Sinu. See 2Sam.15.5,11.

Cushan (Hop.8.7). It is doubtful whether this is the same as Cushan-rishathaim (A.V. Chushan), king of Mesopotamia (Judg.3.8,10), but the order of events alluded to by the prophet seems to favour this supposition. The LXX. has "Ethiopians"; but it is unlikely that Cushan here stands for the Asiatic Cushi.

Cushi, properly "the Cushiite," "the
Ethiopian," a man apparently attached to Joab's person, who bore the tidings of the defeat and death of Absalom to David. That Cushi was a foreigner—as we should infer from his name—is possibly corroborated by his ignorance of the ground in the Jordan valley, by knowing which Ahimaaz was enabled to outrun him (2Sam.18.24-22.23.31-32).

Cuth or Cuthah was the name of the places whence Shalmaneser introduced colonists into Samaria (2K.17.24.30). The statement that the men of Cuth (= Cuthah) made (images of) Nergal at once indicates the locality as being the Babylonian Kitû (non-Semitic Gudua), now Tel-Ibrahim, about 15 miles N.E. of Babylon. It was always of the idea that the worship of Nergal, so that the identification seems certain. (See Hormuzd Rassam, Asshur and the Land of Nimrod, p. 369, etc.).

Cutting off from the people. [Exocommunciation.]

Cuttings in the flesh. Disfigurements of this kind (see Lev.19.25.21-27; Deut.14.1) are still frequent amongst Eastern nations. The reason they were so strictly forbidden under the Mosaic law is not at first obvious. Aaron and his sons were indeed forbidden to show any signs of grief for Nadab and Abihu, but this was on special grounds (see Lev.10.3), for the priests of God might not appear in the judgments of God. The real cause why cutting and shaving of the body were so strictly forbidden was twofold. First, it has always been a custom in the East, as with many fakirs of to-day, to put the special marks of some false deity upon the body where they cannot be obliterated; and secondly, there was the idea that of self-mutilation the names of the dead might be propitiated, the living delivered from their molestations, and their future welfare assured. The Mosaic law, being always jealously strict with regard to anything like superstition or idolatry, naturally forbids customs which would give colour to such representations.

Cyammon (Jth.7.3 only), a place lying in the plain (A.V. valley) over against Esdraelon. The earlier Jongneam (Tell Qeimim). [C.R.C.]

Cymbal, Cymbals, a percussion musical instrument. Two kinds of cymbals are mentioned in Ps.150.5, "loud cymbals," or perhaps castanets (cf. R.V. 2Sam.6.5) and "high sounding cymbals." The former consisted of two small plates of brass or some hard metal, two plates were attached to each hand of the performer, and were struck together; the latter of two larger plates, one held in each hand, and struck together as an accompaniment to other instruments. Cymbals were not used in the temple worship and on sacred occasions: they were employed for military purposes, and also by the Heb. women as an accompaniment to their national dances. Both kinds are still common in the East in military music, and Nebuhr often refers to them. The "bells" of Zech.14.20 were probably concave disks or plates of brass, which in Palestine and Syria were attached to horses as ornaments.

Cypress. The Heb. tárz found only in Is.44.14. It points to some tree with a hard grain, but neither the etymology nor the context decides its identity. Besides the cypress, the "beech," the "holm-oak," and the "fir" have been proposed. There are two mentions of cypress (κυπάρισσος) in Ecclus.24.13.50.10. "I was exalted like a cedar in Libanus, and as a cypress tree upon the mountains of Hermon," and "as a cypress tree which growth up to the clouds." Here the Cypriuss sempervirens is undoubtedly referred to. In the Greek version the Isaiah reading is oke (oek, Wycliff), so that the holm-tree, or holm-oak, of R.V. has ancient authority. [Holm-tree.] [N.C.H.]

Cyprus, named apparently from its "copper," by Canaanites or Phoenicians, an island in the Mediterranean, about 100 miles W. of Laodicea. It is about 4,000 square and 30 miles across, with the Cyprius Olympus covered with snow, it is conspicuous in the view from Lebanon. In general character it is very like Palestine. The Cyprians are noticed (2Mac.4.29) in 2nd b.c., but the island only in N.T. (Ac.4.36.11.19.20.13.4.15.39.21.3.16.27.4) with its chief cities Paphos and Salamis. It is supposed that the Chittim of O.T. (perhaps the Akkadian Kiti-im, or "west region"), or Kilim (Gen.10.4), a land of ships (Num.24.24) separated by sea from Tyre (Is.33.1; Je.2.10; Ezk.27.6; Dan.11.30), though the "isles of Chittim" may include others in the W. Ramses III. about 1200 b.c. publicly declared war on Kition, Soli, Idalion, and Cerynia, in Cyprus (Brugsch. Hist. Egl. i. p. 152). Sargon set up a monument at Idalion, and Esar-haddon (about 670 B.C.) received tribute from Itu-dagon the Phoenician king of Paphos, and from the Gk. kings Aegisthus of Idalion, Pythagoras of Kition, Euryalus of Soli, and Damasus of Cerynia. This mixed Gk. and Phoenician population still divided the island as late as 254 B.C. A bilingual text in Phoenician and in Gk.—the latter in the peculiar Cypriote characters—dates from 375 B.C. The Phoenician kings of Kition and Idalion (450-372 B.C.) were named Ba'el-melek, Ba'el-ram, and Ba'el-salim, and in the 3d Ptolemaic, P. F.J.46, the king, Philip, was called Pun-iathon. Numerous rude semi-Phoenician statues, with Greek inscriptions on them in Cypriote characters, have been found. Cyprus was conquered by Amasis of Egypt in 6th cent. B.C., and by Persia in 525 B.C. In 387 B.C., after the Ionian revolt, Evagoras, king of Salamis, became independent, and the Cypriots declared for Alexander the Great in 333 B.C. Ptolemy reconquered Cyprus for Egypt in 295 B.C., and Rome annexed it in 58 B.C. It was thus (after the battle of Actium) ruled by a proconsul (see Ac.13.6.7.12). [C.R.C.]

Cyrene, the principal city of that portion of N. Africa which was anciently called Cyrenaica and also (from its five chief cities) Pentapolis. This district was that wide projecting portion of the coast (corresponding to the modern Tripoli) which was separated from the territory of Carthage on the one hand, and of Egypt on the other. Its surface is a table-land descending by terraces to the sea: and it was celebrated for its climate and fertility. The N.T. references to Cyrene agree with the facts—that, though on the African coast, it was a Gk. city; that the Jews were settled there in large numbers; and that under the Romans it was politically connected with
CYPRIUS

Crete. The Gk. colonization of this part of Africa under Battus began as early as 631 B.C. After the death of Alexander the Great it became a dependency of Egypt. In this period we find the Jews established there with great privileges, having been introduced by Ptolemy the Great (see Haggai). Soon after the Jewish war, they rose against the Roman power. In the year 75 B.C. the territory of Cyrene was made a province. On the conquest of Crete (67 B.C.) the two were united in one province, frequently called Creta-Cyrene. The numbers and position of the Jews here accord with the frequent mention of Cyrene in N.T. Simon, who bore our Saviour’s cross (Mt. 27: 32; Mk. 15: 21; Lu. 23: 26) was a native of Cyrene. Jewish dwellers in Cyrenaica were in Jerusalem at Pentecost (Ac. 2: 10). They even gave their name to a synagogue in Jerusalem (6: 9). Christian converts from Cyrene were among those who helped to found the first Gentile church at Antioch (11: 22). Simon of Cyrene (15: 1) is traditionally said to have been the first bishop of his native district.

This is a P. Sulpicius Quirinus, described by Tacitus (Annales iii. 48). After the deposition of Archelaus in 6 A.D., Quirinus, then proconsul of Syria, took over Judaea, and carried out a census or assessment for taxation, which met with some resistance (Ac. 5: 37). St. Luke, who records this revolt in the speech of Gamaliel, refers (Lu. 2: 2) to a previous census as occurring during Quirinus’ governorship of Syria, and dates the birth of Christ by it. He clearly distinguishes between the census in 6 A.D. by Quirinus and that the “first,” thus implying that he knew of another. Serious difficulties arise in respect of this statement. Allowing on sufficient grounds the probability that Quirinus was twice proconsul of Syria, his earlier tenure cannot have begun till after the death of Herod the Great, 4 B.C., and therefore would not remove the difficulty, as Christ was born in Herod’s lifetime (Mt. 2: 1). Varus was proconsul of Syria till after Herod’s death. It is, however, probable that Quirinus was in the province, during the government of Varus, with a military command, which was, we know, given him in order to reduce remonstrant Jews (cf. C.R., ii. 17). And the vague word translated “was governor” (Lu. 2: 2) might well describe such a command as distinct from the civil governorship held at that time by Varus.

Taxing. Other objections to the accuracy of the statement are as follows: (1) Herod was king of Judaea, and a census could not have been imposed on him by the emperor. But this is to misunderstand the dependent position of the subject kingdoms. (2) A Roman would not have required enrolment at the city of origin (i.e. Bethlehem). But parallels for a tribal and family system of enrolment by Roman authority in Egypt have been discovered in the papyri. Even if Ramsay’s explanation be rejected, and a mistake on St. Luke’s part be admitted, the historical character of the census which brought Joseph and Mary to Bethlehem is not necessarily impaired, and the utmost result of criticism is that the knowledge of “Quirinus’ census” in 6 A.D. has wrongly attributed to him also the census at the time of the nativity. Augustus, as we know from other sources, did organize periodical assessments for various parts of the (Roman) world.

Cyprus, the founder of the Persian empire (see Dan. 6: 28, 10: 13; 2 Chr. 36: 22, 23), was son of Cambyses, king of Anshan, a descendant of Teispes. There are several contradictory accounts of his birth and rise to power, but they are all regarded as unhistorical, including the tragic story told by Herodotus (i. 95), which makes him to have been the son of a Persian nobleman named Cambyses and Mandane, daughter of Astyages, the last king of Media. According to the Babylonian Chronicle, Astyages marched against Cyrus (519 B.C.) to capture him, but his army revolted, and delivered him to Cyrus, who then took Ecbatana, and carried off its spoil to Anshan. He subsequently defeated Croesus, and annexed Lydia. In 538 B.C. a revolt took place in Babylonia, and this gave Cyrus an opportunity of invading the country. On defeating the Babylonian forces, he entered and captured Babylon, while the cities of Asia Minor were incorporated as dependencies of the empire. The date of the reduction of the Gk. cities in Asia Minor is doubtful. Cyrus is said to have fallen in battle against the Massagetae in 529 B.C., but Xenophon makes him to have died peacefully, and to have been buried at Pasargade. Before his time the great kings with whom the Jews had come into contact had been either open oppressors or seductive allies, but Cyrus was a generous liberator. The prophetic Isaiah (44: 28) recognized in him “a shepherd” of the Lord, an “anointed” king (45: 1), but his favouring of the Jews is now regarded as being rather due to policy than to sympathy with them as a monotheist—he was equally sympathetic to the Babylonian priesthood. The edict of Cyrus for the building of the temple (2 Chr. 36: 22, 23; Est. 1: 1-4, 3-7, 4: 5-3, 17, 6-3) gave new life to Judaism, and enabled that Jewish nation which had been subjugated, once more, to develop its history. It is significant of the real outlook of the whole of the Persian Empire that the reputed tomb of Cyrus at Murgab is probably not that of the great conqueror. See Saxe in Hastings, D. B. (3 vols. 1898).

DABASHETH

Dabarath (Jos. 21: 28). Dabersath, as R.V. Dabasheth, a place important as defining the boundary of the tribe of Zebulon (Jos. 19: 11), which is reached to Dabasheth, and reached to the river (Kishon) facing JOKNEAM. This defines the extent of N. and S. Dabasheth is apparently the present ruin Dabsheh, where alone in Palestine the name has been found. It is on a hill 13 miles N.E. of Aricho, on S.W. side of the great valley of Jidda el Quen, which is probably the valley (gë) of Jiphthah-el (the mighty opening), so called because of its breadth; for near Dabsheh it expands into a broad vale called el
Buge'lah (Heb. big'â) a term applied only to wide, deep valleys. This line agrees with the position of Hannathon (Kejî 'Anâd), and the two latter names (Jos.19.13-14) sufficiently define the N. border as far as Dabbasheth, where the line turned S. "towards the west" (ver. 11, A.V. sea). Zebulon thus embraced the hills and plains from near Tabor to Hannathon on E, and from Jokneam to Dabbasheth on W., not reaching the sea of Galilee (in Naphtali), nor the shores of the bay of Acco (in Asher). Nazareth was thus in Zebulon, and Capernaum in Naphtali (Mt.4.13). [C.R.C.]

Daberath (with the articles in Jos.), a town on the boundary of Zebulon (Jos.19.12), named as next to Chisloth-tabor. In 1Chr.6.72 and Jos.21.28 (R.V.) it is said to belong to Issachar. Now the village Debûrîck at the W. foot of Tabor [C.R.C.]

Da'bria, one of the five swift scribes who recorded the visions of Ezra (2Esd.14.24).

Daco'bî (1Esd.5.28). [AKKUB.]

Dadd'eus, or Sadde'us (R.V. Lod'de'us; 1Esd.8.45,46), a corruption of Iddo, 6.

Dagon, a Philistine god (1Sam.5.2) whose most famous temples were at Gaza (Judg.1.11) and Ekron (1Sam.6.10). The latter was destroyed by Jonathan in the Maccabaean wars (1Mac.10.83,84,11-14). Traces of the worship of Dagon likewise appear in the names Caphar-dagon (near Jannia) and Beth-dagon in Judah (Jos.15.41) and Asher (Jos.19.27). Dagon was originally a Babylonian god (1Sam.6.10; Ezra.2.35) whose name and cult had been introduced into Palestine in early days. The old belief that he was a fish-god is more than doubtful [Askelexon], since the Babylonian fish-god was Ea, the god of wisdom, and not Dagon. According to Philo Byblus, Dagon was a god of agriculture whose name was derived from a Phoenician word signifying "corn." [A.H.S.]

Dai'san (1Esd.5.31) = Re'zin, 2 (Ezr. 2.48), by the common confusion of R and D.

Dalaiah', the sixth son of Elioenai and of the royal family of Judah (1Chr. 3.4).

Dalmunutha (Mk.8.10), an Aramaic equivalent for the Heb. mishgôl. [Magdala.]

Dalmâtia, a mountainous district on the E. coast of the Adriatic Sea, extending from the river Naro in the S. to the Savus in the N. St. Paul sent Titus there (2Tim.4.10), and he himself had preached near it (Ro.15.19).

Dalphon', the second son of Haman (Esth.9.7).

Dam'ars, an Athenian woman converted by St. Paul's preaching (Ac.17.34).

Damascus. The name of this famous capital of Aram, or Syria, does not seem to be Semitic. The city is still called Dimesq esh Shâm, or "Damascus of Syria." (Shâmî in Syr. Arabic being usually the word for "north," otherwise Shenîd). As an Akkadian word Dim-esk would mean "chief town," and Dim-esk port, city." This place is mentioned in the time of Abraham (Gen.14.15), who said, "The holder [mesheq] of my house, that is Dam-meseq [as now pointed in Heb.], is Eliezer" (15.2). There appears to be a play on the name of the city; but the word is perhaps a later note creeping into the text, referring to the "house," as it cannot refer grammatically to Eliezer. Hence arose an early Jewish tradition that Abraham had a house at Damascus, of which Eliezer was tenant, or steward. In the time of David Damascus was the capital of Hadadezer, king of Zobah, whom he defeated, taking from him shields of gold, chariots, and chariot horses (2Sam.8.5-6; 1Chr.18.3-7; Cant.7.4). About 950 B.C. Rezon became independent in Damascus, after the death of Solomon (1K.11.23-25), and was succeeded by Tab-rimmon, son of Hezion. The kings who followed—according to O.T. and Assyrian accounts—were Ben-hadad I. son of Tab-rimmon, Hazael I., Hadadezer II., Hazael II., Benhadad II. (who became subject to Jeroboam II. of Israel for some years), Mari. Benhadad III. (Am.1.4), and Rezin, who was put to death by the Assyrians on the capture of Damascus in 732 B.C. This represents about 20 years for the average reign of each king. These kings were generally at war with Israel or with Judah, with intervals of alliance after defeat, or taking the side of one against the other, in the shifting policy of the age. In spite of alliance with the princes of N. Syria, Damascus fell before Tiglath-pileser III. in 732 B.C. (2K.16.9; Is. 7.5; m.15). The O.T. mentions the league of Benhadad I. with Judah (1K.15.19; 2Chr.16.3), and his attack on Alab (1K.20.1-34), whom he slew at Ramoth-gilead (22.1-36); also his murder—after a reign of about 60 years—by Hazael I. (2K.8.15). His second siege of Samaria (2K.6.24-7.20) occurred in

NORTHERN SIDE ARCH, EAST GATE, DAMASCUS.

(From Five Years in Damascus, by T. L. Porter.)
the reign of Jehoram son of Ahab. In the reign of Jehoshaphat I, Jeroboam II of Israel "recovered Damascus" (2K.14.28). Rezin, with Pekah of Israel, about 742 B.C., attacked Jerusalem in vain, but Rezin appears to have conquered E. Palestine to Elath, before his defeat by the Assyrians (2K.16.5-11), which Isaiah foresaw (Is.7.1-7). He speaks of the wealth of Damascus (8.4), and of its fall (10.9-17.1), which Amos predicts as a punishment for the slaughter in Gilead (1:3; see 5.25). Jeremiah speaks of the weakness of Damascus about 600 B.C. (49.24-27), perhaps under a Benhadad IV. tributary to Nebuchadnezzar (ver. 30). Ezekiel, rather later, mentions the trade of Damascus in wine of Helbon, and white wool, sent to Tyre (Ezk.27.18). Its border marched with that of Hamath, and included Hermon and Antilibanon (47.16,17). Damascus is also noticed as attacked by Jonathan, brother of Judas Maccabaens (1Mac.11.62,12.32), about 147 B.C. It then fell into the hands of Areitas (Ephraimus, 13 Ant. xv. 2; 14 Ant. ii. 3), from about 82 to 69 B.C.; and it was conquered for Pompey by Scouras in 65 B.C. In the time of St. Paul another Areitas was "king" of Damascus (Ac.9.2-25,22.5-11,26.12-20; 2Cor.11.32; Gal.1.17; see 18 Ant. v. 1).—The Monumental History of Damascus begins with its conquest by Thothmes III. in 16th cent. B.C. A very archaic figure in relief, found in 1865 near the city, may be as old as Abraham's age. It represents (see illustration above) a bearded man with a short tunic; unfortunately it is not inscribed. The city Thamasku (No. 13) in the list of Thothmes III. precedes Abila (15) and Hamath (16), on his route to Kadesh and Arvad. In the Amarna letters (Brit. Mus. 37 and 43) the name is spelt Timasgi and Dimaska. The city was then attacked by Aidadguna, the Hittite king of Kadesh; and

Hobah (Gen.14.15) is here noticed as a country near it. The Amorites were apparently in alliance with the Hittites, and this event led to their conquest of Bashan and Gilead shortly before the Heb. conquest (see Berlin 171 and 172), for the advance lay toward the city N.W. of Damascus which they then took, and Ashtaroth fell in turn (Brit. Mus. 64). In 853 B.C. Shalmaneser II. defeated Hadadezer II. and the Syrians, K. of Riblah; and in 842 he shut up Hazael II. in Damascus, and then invaded Bashan. In 797 Mari of Damascus submitted to Rimmon-nirari III. of Assyria, presenting 2,300 talents of silver, 20 talents of gold, 3,000 of copper, and 5,000 of iron, with robes and utensils. The final siege by Tiglath-pileser III. lasted for two years (734-732 B.C.), during which N. and E. Palestine, and the plains down to Philistia, were overrun by the Assyrians. Damascus is now a beautiful city of some 250,000 inhabitants, in the plain E. of Hermon. Two rivers (Barada and Taura) join on its W. and flow through it; it lies amid gardens and poplars, surrounded by tillcd lands. The street "called Straight" (Ac.9.11) was probably the main street which runs E. and W. straight through the city. The most famous of the buildings of Damascus is the Great Mosque, built in 7th cent. A.D. by the Khalifs, who included the ancient cathedral of St. John, which had replaced a Roman temple, on the site—no doubt—of the temple of Rimmon (2K.5.18). A Gk. text (Waddington, No. 2.541) replaces the name "Metropolitanos" by "high-priest of the temple"; and on the Byzantine façade of the cathedral which stood in the great temple court, Dr. Porter found another also in Gk. (Waddington, No. 2.551). "Thy kingdom, O Christ, is an everlasting kingdom, and thy dominion throughout all generations." (18.14.-15.)

**Dan (judge).** Jacob's fifth son, and the first son of Bilhah, Rachel's slave, named from Rachel's exclamation, "God hath judged me [or, decided the case in my favour], and hath also heard my voice" (Gen.30.6). In the blessing of Jacob this is likened to a snake, but is to "judge his people" (49.16.17). In the blessing of Moses (Deut.33.22) he is a lion's cub "pouncine from" (or, "on") "the Bashan" (or, "soft soil") of his plains held by the Canaanites. In the wilderness the tribe, under Ahierez (Num.1.12), is the second largest (1.30.28,42), and it included a skilled artisan (Ex.35.34), as in the time of Solomon also (2Chr.2.14), when a woman of the tribe married a Tyrian. In the song of Deborah (Judg.5.17) the reference appears to be to Danites on the coast, whose fleet watched the struggle against Sisera. But, somewhat earlier, it appears that they had been unable to conquer the inhabitants of the shore plain (Judg.1.34), and were crowded in the mountains (18.2). Hence they sought new lands in the far N., under Hermon (18-19) at Laish, which they renamed Dan in the time of Jonathan the grandson of Moses (not of Manasseh), and where they worshipped a graven image (Judg.18), and the altar "the cult altar" (Heb. MS. 916 a.d.) and the full of Shiloh (18.30,31). [MAHANATH-DAN.—] The Tribal Lot (Jos.19.10-18) included about 400 sq. m. of hill and plain. Its E. border was the W. border.
of Benjamin, and its S. border the N. border of Judah. On the W. the tribe extended to the sea, and on N. apparently to the brook of Kanah and the Meflaron and Rakkon. It included some of the best corn lands of Sharon.—The Town, called Laish, and afterwards Dan (Judg. 18:29), is noticed in Gen. 14:14 and Deut. 34:1 before it was so named. But it is dangerous, as Ewald saw, to base criticism on such incidental notes, unless we could know for certain that they are not later glosses. In the second passage this appears very probable [Nebo], because Dan is not actually visible from mount Nebo. This town is said to have been "far from Zidon (Judg. 18:28), and is noticed (as captured by Benhadad I.) with places in the extreme N.E. of the land of Israel W. of Jordan (1 K. 15:20; 2 Chr. 16:4). From the time of its conquest the term "Dan to Beer-sheba" (Judg. 20:1, etc.) signified the whole length of Palestine. Jeroboam, erecting two shrines with calf idols on the borders of his kingdom, placed one of them at Dan (1 K. 12:29, 30; 2 K. 10:29); and to this idolatrous centre Amos (8:14) refers, coupling it with another at Beer-sheba. Dan also represents the far N. in Jeremiah (4:15, 8:16). It is remarkable that no list of Danite genealogies occurs in Chronicles, and that the tribe is also not among those sealed in Rev. 7:5, 8, perhaps on account of idolatry. Josephus says that the calf temple was near Daphne (now the ruin Dafneh), which points to the great mound a mile to N.E. now called Tell el Qadi, or "mound of the judge"—perhaps a translation of the name Dan. From this mound, and its great spring, 'An Liddan, flows the stream of "Little Jordan" (Josephus, Ant. Wars 1:1). It is interesting to note that, in 1881, the present writer discovered a group of dolmens on the slope to W. (at a place called Nukhelleth, or "little palm," a mile from Tell el Qadi), showing that the vicinity was a sacred centre [Moab].

Dancing before the ark (2 Sam. 6:14), especially in connexion with the words "he was girded with a linen ephod," i.e. a holy garment worn while waiting on the Lord. Many representations of dances, both of men and women, are found in the Egyptian paintings. The "feast unto the Lord," which Moses proposed to Pharaoh to hold was really a dance. Among Arabs, dances of men are an extremely ancient custom. In the period of the Judges the dances of the virgins in Shiloh (Judg. 21:19-23) were certainly part of a religious festivity. Dancing also had its voice among the earliest rituals apart from any religious character (Je. 31:4, 13; Lam. 5:15; Mk. 6:22; L. u. 15:25).

Daniel.—1. A son of David, called his 2nd son, by Abigail the Carmelites (1 Chr. 3:2), and apparently identical with Chileab (2 Sam. 5:3).

—2. The head of the house of Ithamar, who in very early times. The Dan mentioned with Javan (Ezk. 27:19) as trading with Tyre about 600 B.C. has no connexion with the town above described. The reference is probably to the Danai, who appear (as early as the 14th and 13th cents. B.C.) among the fair Aryan tribes of the north "who attacked Egypt. Probably like Javan (Ionia), the Danai were Greeks, and as such the name is familiar. [C.R.C.]

Dance (heil, "to whirl round"); hagpi, "to keep the feast"; kdrar, "to whirl"; raphad, "to jump"). The dance is spoken of in Holy Scripture universally as symbolic of rejoicing, and is often coupled for the sake of contrast with mourning, e.g. Ec. 3:4 (cf. Ps. 30:1; Mt. 11:17). In the earlier period it is found combined with some song or refrain (Ex. 15:20, 32:18, 19; 1 Sam. 21:11); and with the tambourine (A. V. timbrel), more especially in those impulsive outbursts of popular feeling which cannot find sufficient vent merely in voice or in gesture. Dancing is a part of the religious ceremonies of every primitive race. Cf. David

Egyttian dances. (Wilkinson.)
DANIEL, BOOK OF

returned from the Exile with Ezra (Ezr.8.2).—3. One of those who joined in scaling the covenant (Ne.10.6).—4. One of the prophets of the Exile carried away into the land of Shinar in the reign of Jehoiakim. On his arrival at the court of Nebuchadnezzar, he had to undergo (with his three companions, Hananiah, Mishael, and Azariah) a special training for three years, before they could stand before the king. This included a special dieting, iron which they obtained exemption, which improved their appearance above all their companions. They received fresh names, being called respectively Belteshazzar, Sidrach, Meshach, Abednego. They were all young men of high birth (Dan.1.3); Daniel was noted above them all for skill in the interpretation of dreams. On the first occasion on which he explained a dream of Nebuchadnezzar, he was made "ruler over the whole province of Babylon, and chief governor (or"the Babylon," and obtained from the king offices for his three companions. He interpreted Nebuchadnezzar's dream foretelling his temporary mental aberration, and also the writing on the wall at Belshazzar's feast, by which time he seems to have lost his office as governor of the wise men. In the reign of Cyrus the Median, the Medes were cast into the den of lions, for his faithfulness in praying to his own God, though he was then one of the three presidents of the whole kingdom (Dan.6.2). Coming out unscathed, he prospered throughout the reign of Darius and in that of Cyrus. His visions are dated, that of the last year of Belshazzar the Babylonian (Dan.10.2). He was begotten by the banks of Hiddekel, i.e. the Tigris. In Belshazzar's reign his house seems to have been in the royal palace at Susa. Ezekiel twice mentions Daniel: in 14.12-20 he is joined with Noah and Job as an example of righteousness; in 28.3, as a pattern of wisdom—exactly the qualities which the Daniel of the book which bears his name displayed. Some have thought that Ezekiel could scarcely have referred this to so young a man as Daniel must have then been, and have made this Daniel another person, but there seems no real conflict that they were one. It is curious that Daniel's name is given to almost the whole of the visions in the book of Daniel. His other name, the son of Seraiah (Eccs.49). Our Lord refers to "Daniel the prophet" in His discourse upon the approaching Fall of Jerusalem, when "the abomination of desolation was to stand in the holy place." (Mt.24.15; Mk.13.14,15.) [A.V.]

DANIEL, BOOK OF, is one of the most difficult books of the Bible to deal with. To begin with, whilst our English Bible classed the book with those of Isaiah, Jeremiah, and Ezekiel, in the Heb. canon it is counted among the Hagiographa, or third class of writings into which the O.T. is divided. Then again, the language of it is not all the same. 1-2, 4,8,12-13 are written in Heb.; 2:28 are in Aramaic. Further still, there are Gk. additions to the book which almost certainly were originally written in Gk. and not in a Semitic language. It is the first extant specimen of apocalyptic literature, though a precursor may be found in some of the prophecies of Ezekiel—the style of literature which finds its highest development in the apocalyptic discourses of our Lord and the book of Revelation. Yet with all this the book claims to give us also historical details connected with the Babylonian and Persian empires; and, according to some commentators, some of its prophecies enter into such detail that they must necessarily have been composed after and not before the events they describe. It is because of this that some have denied it any connexion with Daniel, and refused to accept its authenticity or historicity. Some of these points are dealt with later.— *Analysis of Contents.* Roughly speaking, the first six chapters profess to be history, the last six prophecy; but this division takes no account of the variation in language, or the form of the book. We may better divide it as follows: Ch.1 introduces Daniel to us and accounts for his position. 2-7.15 gives a history of Daniel and his first vision in the third person. Then with the interpretation of that vision we begin what we may call his "life history" (from the use of the first person) the "1" section of Daniel (7.15-12.13). The first person is suddenly introduced, although the first portion of ch.7 gives us what profess to be Daniel's actual words. A similar variation is found in Nebemiah, the greater part of which is in the first person, a smaller portion in the second person. This is repeated after the coming of Cyrus. In the former the question of miracles as well as of revelation by dreams enters, both being difficulties not confined to the book of Daniel, or even to O.T. This is not the place to discuss these in detail, but, granted that miracles are possible, and that the Almighty may choose to make His purposes known through the instrumentality of dreams (cf. Job 33.15,40), there is nothing inherently improbable in what is told us in this book. We have only to compare these with the apocryphal stories of Bel and the Dragon to see on what a different plane they stand: the one is dignified and real in feeling, the other fantastic and superstitious. The argument against the minute details of the prophecies runs parallel with the former. If the Almighty chooses to reveal the future to man, He may do it in broad outline or in detail, as seemeth best to His omniscience. The very exceptional character of these prophecies may go to prove the rule of His generally leaving His servants the prophets to deal only in generalities. With regard to this history, if indeed it could be shown that the historical details of the book contradicted the history of the times as derived from other sources, then the question might have to be reopened. But there is nothing of that kind to be found. Difficulties that seemed insuperable have been cleared up, especially with regard to Darius the Mede and his rule over Babylon. It appears that he may reasonably be identified with one Golgogas, who acted as underlie to Nebuchadnezzar; that the taking of Babylon by Cyrus was the fulfillment of an prophecy of that portion of his empire. A comparatively less important difficulty has been raised from the fact that the names of some
of the musical instruments in ch. 3 are said to be of Gk. origin. But we have only to examine some map in which are marked the old trade-routes of the East (see, e.g., that in the Encyc. Bibl.) to see how possible it was in very early times for Gk. musical instruments to have been carried to Babylon and naturalized there, or vice versa. [Dulcimer.] If the book had been a composition of an orthodox Jew of the Maccabean period, he would scarcely, with the feeling against Hellenism then prevalent in orthodox circles, have ventured to insert words drawn from such a source. [See also Semitic Languages.] The final shape which the book assumed may indeed be later than Daniel, but we have nothing in later reason for ruling the latter part of the book to be of later invention or for discrediting the history of the prophet's life and that of his companions. The author of the epistle to the Hebrews seems to refer to this record when, in his account of the heroes of older times, he speaks of those "who through faith subdued kingdoms," etc. (Heb. 11:33,34). Some portions of the apocryphal book of Baruch shew an inter-relation between the two (see the marg. references in the R.V. of Baruch), and doubtless the writer of Baruch made use of this book. The first book of the Maccabees recognises such a deliverance of the Three Children of Daniel, and also (1:54; cf. 6:7) "an abomination of desolation" in Jerusalem. Josephus held the book to be valuable and authentic, and informs us (Ant. viii. 4) that Daniel's prophecies were won for the Jews the goodwill of Alexander the Great. The only early writer who attacks the book is Porphyry, early in the 4th cent. Nothing very definite can be ascertained as to the historian who composed the first chapters of the book. Jewish authorities hold to a tradition that this book, together with the twelve minor prophets, Ezekiel, and Esther, was, to use a modern expression, "edited" by the men of the great synagogues. It seems clear from this that it was the LXX that it was held that greater liberty might be used in translating this book into Gk. than in the case of any other book of the Bible, except perhaps the Proverbs. The result is that the LXX translation is paraphrastic rather than literal, and has somewhat of the nature of a Jewish midrash upon the text. In later times this seems to have been felt so much that Theodotion's more literal version supplanted the elder one, of which only one copy in Gk. survives. It remains to indicate briefly the most probable interpretations of the prophecies in the book. (1) In Dan. 2 the four kingdoms are Nebuchadnezzar, the Median, the Persian, and the Macedonian; the last is divided between the Seleucidae and the Ptolemies, who are to give place to the kingdom of God. (2) In Dan. 7 the four beasts represent the same four kingdoms; the ten horns are Alexander the Great's successors; the little horn is Antiochus Epiphanes; a figure whose time is to come the kingdom of God. (3) In Dan. 8 the ram with two horns is Media and Persia; the rough goat is Greece under Alexander the Great; the four kingdoms after him are those into which his kingdom came to be divided, one of them being that of Antiochus Epiphanes, represented by the little horn. (4) In Dan. 10-12 we have a more detailed account of the Seleucidae and the Ptolemies, as well as of the kingdom of Antiochus, followed once again by the kingdom of God. The varying opinions about these prophecies, and also about the interpretation of Dan. 9, are fairly stated in Driver's edition in the Cambridge Bible. [H.A.R.]

DANIEL, BOOK OF

DANIEL, BOOK OF

of the musical instruments in ch. 3 are said to be of Gk. origin. But we have only to examine some map in which are marked the old trade-routes of the East (see, e.g., that in the Encyc. Bibl.) to see how possible it was in very early times for Gk. musical instruments to have been carried to Babylon and naturalized there, or vice versa. [Dulcimer.] If the book had been a composition of an orthodox Jew of the Maccabean period, he would scarcely, with the feeling against Hellenism then prevalent in orthodox circles, have ventured to insert words drawn from such a source. [See also Semitic Languages.] The final shape which the book assumed may indeed be later than Daniel, but we have nothing in later reason for ruling the latter part of the book to be of later invention or for discrediting the history of the prophet's life and that of his companions. The author of the epistle to the Hebrews seems to refer to this record when, in his account of the heroes of older times, he speaks of those "who through faith subdued kingdoms," etc. (Heb. 11:33,34). Some portions of the apocryphal book of Baruch shew an inter-relation between the two (see the marg. references in the R.V. of Baruch), and doubtless the writer of Baruch made use of this book. The first book of the Maccabees recognises such a deliverance of the Three Children of Daniel, and also (1:54; cf. 6:7) "an abomination of desolation" in Jerusalem. Josephus held the book to be valuable and authentic, and informs us (Ant. viii. 4) that Daniel's prophecies were won for the Jews the goodwill of Alexander the Great. The only early writer who attacks the book is Porphyry, early in the 4th cent. Nothing very definite can be ascertained as to the historian who composed the first chapters of the book. Jewish authorities hold to a tradition that this book, together with the twelve minor prophets, Ezekiel, and Esther, was, to use a modern expression, "edited" by the men of the great synagogues. It seems clear from this that it was the LXX that it was held that greater liberty might be used in translating this book into Gk. than in the case of any other book of the Bible, except perhaps the Proverbs. The result is that the LXX translation is paraphrastic rather than literal, and has somewhat of the nature of a Jewish midrash upon the text. In later times this seems to have been felt so much that Theodotion's more literal version supplanted the elder one, of which only one copy in Gk. survives. It remains to indicate briefly the most probable interpretations of the prophecies in the book. (1) In Dan. 2 the four kingdoms are Nebuchadnezzar, the Median, the Persian, and the Macedonian; the last is divided between the Seleucidae and the Ptolemies, who are to give place to the kingdom of God. (2) In Dan. 7 the four beasts represent the same four kingdoms; the ten horns are Alexander the Great's successors; the little horn is Antiochus Epiphanes; a figure whose time is to come the kingdom of God. (3) In Dan. 8 the ram with two horns is Media and Persia; the rough goat is Greece under Alexander the Great; the four kingdoms after him are those into which his kingdom came to be divided, one of them being that of Antiochus Epiphanes, represented by the little horn. (4) In Dan. 10-12 we have a more detailed account of the Seleucidae and the Ptolemies, as well as of the kingdom of Antiochus, followed once again by the kingdom of God. The varying opinions about these prophecies, and also about the interpretation of Dan. 9, are fairly stated in Driver's edition in the Cambridge Bible. [H.A.R.]

The Apocrypha contains three additions to the book of Daniel, which are to be found in the Gk. (1) The Song of the Three Holy Children, of which part is to be found in the Book of Common Prayer and goes by the name "Benedicte, omnia opera." It begins with a prayer of Deliverance uttered by Azarias (vv. 3-22), followed by an account of the fiery furnace, and a reason for the protection from the fire. (2) The History of Susanna, which generally occurs at the beginning of the book, though occasionally at the end. This is a story told to illustrate the wisdom and discernment of Daniel. (3) Bel and the Dragon, a story introduced by the prophet Habakkuk is introduced. Its historical authority can be claimed for any of these.

DANITES, members of the tribe of Dan (Judg. 13:2, 18, 1:11; 1 Chr. 12:35).

DAN-JAAN (2 Sam. 24:6), a place on the N.W. border of David's kingdom, noticed in Judg. 1:29, and Tyre. It is thought to be the ruin Damiân, 4 miles N. of Ascalon (Ez-Zib). The Phoenician coast cities were independent at this time.

[GB.C.]

DANNAH (low), a city in the mountains of Judah (Jos. 15:49). Now the village Idhna, 8 miles W. of Hebron, on the lower hills.

DAPHNE (2 Mac. 3:33), a celebrated grove and sanctuary of Apollo, about 5 miles from Antioch in Syria, with which it is intimately associated in history. Its establishment, like that of the city, was due to Seleucus Nicator. Its situation was very beautiful, with perennial fountains and abundant wood. Succeeding Seleucid monarchs, especially Antiochus Epiphanes, embellished the place still further. When Syria became Roman, it continued to be famous as a place of pilgrimage ever after. The site has been well identified by Pococke and others at Beit-el-Md, "the House of the Water," on the left bank of the Orontes, to the S.W. of Antioch.

DARA (1 Chr. 2:6). [DARDA.]

DARDJA, a son of Mahol, one of the four wise men surpassed in wisdom by Solomon (1 K. 4:31). In 1 Chr. 2:6 his name appears as Dara, son (i.e. perhaps descendant) of Zerah.

DARIE (A.V. drachm; 1 Chr. 29:7; Ezr. 2:69, 8:27; Ne. 7:70, 71, 72), a gold coin current in Palestine after the return from Babylon. There was no large issue of gold money except by the Persian kings. The Daric which have been discovered are thick pieces of pure gold, of archaic style, bearing on the obverse the figure of a king kneeling on one knee, with bow and spear, and on the reverse an irregular incuse square or oblong. Their weight has varied from 12 to 13 troy, or a little less than that of an Attic stater, and is still probably that of an early drachm of the Phoenician talent. The Daric was the chief gold coin of Persia. [Weights, Coins.]

DARIUS, the name of several kings of Media

DARIUS, the name of several kings of Media
and Persia, three of whom are mentioned in O.T.

I. Darius the Mede (Dan. 5:31,6:1), "son of Ahasuerus, of the seed of the Medes" (9:1), who received the Babylonian kingdom on the death of Belshazzar, being then 62 years old (5:31,9:1). Only one year of his reign is mentioned (9:1,11), but that was of importance for the Jews. Daniel was advanced by him to the highest dignity (6:1ff.), probably in consequence of former services (cf. 5:17); and after his miraculous deliverance, Darius issued a decree enjoining "reverence for the God of Daniel" (6:25ff.). Three identifications of Darius the Mede have been proposed. The first makes him a contemporary with Daniel, it is unsupported by history, may be dismissed. The second, adopted by Josephus and supported by many critics, regards him as Cyxaraes II., "the son and successor of Astyages," who is looked upon as the last king of Media. The third identifies him with Gobryas, governor of Gutium (Media), who, entering Babylon with the army of Cyrus on Tamuz 16, thus received the kingdom for him, and appointed governors, or satraps, like Darius the Mede. He possibly led the attack which resulted in Belshazzar's death. [BELSHAZZAR.]

The insertion of Darius instead of Gobryas in the sacred text is probably a copyist's error.

II. Darius, son of Hystaspis, the founder of the Perso-Aryan dynasty. Upon the usurpation of the Magian Smerdis, he, with six other Persian chiefs, overthrew the impostor, and was placed on the throne 521 B.C. His designs of foreign conquest were interrupted by a revolt in Babylon, which spread to the provinces. Vespasianes, son of Jeshua, could say that "the land was his." Crossing the Danube, he penetrated Europe, but had to return. He next attempted to annex Greece, and his defeat at Marathon, 490 B.C., only caused him to prepare for that struggle with the Persians which had become inevitable. His plans were again thwarted by rebellion, this time in Egypt. He then decided to reduce both Greece and Egypt together, but died before effecting anything in the way of conquest, after a reign of 36 years. Like Cyrus, Darius Hystaspis treated the Jews favourably, and restored to them the privileges they had lost (Est.5:1, etc.; 6:1, etc.).—3. Darius the Persian (Ne.12:22). If the whole passage was written by Nehemiah, this is possibly Darius II., Nothus (Ochus), king of Persia 123-104 B.C. If, however, the register was continued until later, the occurrence of the name Jaddua points to Darius III., Codomannus, the antagonist of Alexander, and last king of Persia, 336-330 B.C. (1Mac.1:1).—4. Areus, king of the Idaeodemonians (1Mac.12:7). [T.G.P.]

Darkon. Children of Darkon were among the "children of Solomon's servants" (cf. 2K.9:21) who returned from Babylon with Zerubbabel (Ezr.2:56; Ne.7:68).

Dathan, a Reubenite chieftain, son of Eliab, who joined the conspiracy of Korah the Levite (Num.16:1ff.; 26:9; Deut.11:6; Ps.106:17).

Dathema (1Mac.5:9), a fortress to which, in 164 B.C., the Jews fled from the heathen of Gilead. The site is not known. [G.R.C.]

Daughter. The Heb. and E.V. use this term not only in its ordinary sense but also of the women of the Hebrews or of Zion, Levi, Canaan, of young women (Gen.30:13, etc.), and in personifications of places (e.g. daughter of Zion = Zion). [FAMILY. [H.M.W.]

In N.T. used also of a female descendant (Luke 1:5,15,16); as a tender form of direct address (Mt.9:22); collectively, for inhabitants of Jerusalem (16:12). When the body-and-tribes names of places as the form of address to the female inhabitants (Lk.23:28). The dimin. θυάτρων, "a little daughter," occurs Mk.5:23,7:25. [H.H.]

David, perhaps shortened from Dodavahu (beloved of Jehovah). We may divide his life into three portions, premising, however, that, owing to the composite character of the narrative and occasional duplications of incidents, it contains inconsistencies not now capable of certain explanation.—I. THE EARLY LIFE OF DAVID, before his introduction to the court of Saul. He was the youngest of eight sons, and (according to R.L.4:21f.) great-grandson of Ruth (cf. 1Sam.22:3). His mother's name is unknown. His father Jesse, was of a great age when David was still young (1Sam.17:12). His connexion with Bethlehem as his birthplace he brought it in after times universal fame (2Lu.2:4). Zeruiah (mother of Joab, Abishai, and Asahel) and Abigail (mother of Amasa) were probably his half-sisters (see 2Sam.17:25). His known predecessors as chieftains were probably of about the same age as himself, and accordingly were to him throughout life in the relation usually occupied by brothers and cousins. David's first appearance in history was at an annual sacrifice at Bethlehem, at which Jesse would preside (1Sam.20:6). Samuel is present, sent to anoint him. Before the choice of the boy is restrained by divine intimation as son after son passes by, until the youngest was at last sent for while pursuing the occupation of a shepherd, usually allotted in Eastern countries to the males, the females, or the despised of the family. He was "handsome and goodly to look upon." (16:12). When the body-and-tribes name of Saul were discussing with their master where the best minstrel could be found to chase away his madness by music, one of the young men in the guard suggested David. Saul instantly sent for him, and in the course of David's harp we have the first glimpse into that genius for music and poetry which was consecrated in the Psalms. One incident alone of his solitary shepherd life has come down to us—his conflict with the lion and the bear in defence of his father's flocks (1Sam.17:3-58). But it did not stand alone. He was already known to Saul's guards for his martial exploits, probably against the Philistines (16:18), and, when he suddenly appeared in the camp, his elder brother immediately guessed that he had left the sheep in his armour to see the battle (17:28). There is no perfectly satisfactory means of reconciling the apparently contradictory accounts in 1Sam.16:14-23 and 17:12-31,15-58. The latter may be accepted as an independent
statement of David's first appearance. The scene of the battle is at Ephes-dammim [Pas- dammim], near the frontier-hills of Judah. Saul's army met a battle on one side and the Philistines on the other, the watercourse of Elah or "the Terebinth" runs between. The incidents which led to the conflict with Goliath are familiar, as is its result. David's victory is rendered more conspicuous by his youth and by the simple weapons used. The sling, and the five polished pebbles which he picked up as he went from the watercourse of the valley and put in his shepherd's wallet. Two trophies long remained of the battle—one, the huge sword of the Philistine, which was hung up behind the ephod in the tabernacle at Nob (1Sam.21:9); the other, a heifer which he bore away himself, and which was either laid up at Nob, or subsequently at Jerusalem.—II. RELATIONS WITH SAUL. The victory over Goliath had been a turning-point of his career. Saul inquired his parentage, and took him finally to his court, and was charmed by the soothing influence which he brought with him. The latter part of Saul's life was inspired the romantic friendship which bound the two youths together to the end. The triumphant songs of the Israelitish women announced that in him Israel had now found a deliverer mightier even than Saul. And by those songs and the fame thus acquired was laid the foundation of the jealousy of Saul towards David which, together with the king's constitutional malady, poisoned their whole future relations. David, however, displays a magnanimous forbearance, which he exhibited (with a few painful exceptions) throughout the rest of his life. He is the first example of the virtue of chivalry. This part of his life must be sub-divided into four portions—
1. His life at the court of Saul till his final escape (1Sam.18.2–19.18), where, besides being minister, he held successively posts of increasing responsibility (16.21.18.22.14, R.V.) He was now chiefly known for his successful exploits in border warfare, and the valuable service which he won his wife, Michal, Saul's second daughter, and struck a blow at the Philistine power from which it only rallied at the disastrous close of Saul's reign. But the successive snares laid by Saul to entrap him, and the open violence into which the king's madness twice broke out, at last convinced David that his life was no longer safe. Warned by his friend Jonathan and assisted by his wife Michal, he escaped by night, and was thenceforward a fugitive. Jonathan he never saw again except by stealth. Michal was given in marriage to another (Phaltiel), and he saw her no more till long after her father's death—2. His exile and wanderings (2Sam.1.1–15). For the rest of Saul's reign David was an outlaw. He first fled to Naioth (the pastoral dwellings) of Ramah to Samuel. Up to this time both the king and himself had thought a reunion possible (see 20.5.26). But the madness of Saul now became more settled and ferocious, and the risk of such an enterprise proportionately greater. His secret interview with Jonathan confirmed the alarm already excited by Saul's endeavour to seize him at Ramah, and he now determined to leave his country and take refuge in the court of Saul's enemy. Before this he visited Nob, the seat of the tabernacle, for a part of the interview with the high-priest (1Sam.22.9,15), partly to obtain food and weapons. On the pretext of a secret mission from Saul, he gained an answer from the oracle, some of the consecrated loaves, and the consecrated sword of Goliath. His stay at the court of Achish was short. Disguised as a countryman by "the sword of Goliath," his presence revived the national enmity of the Philistines against their former conqueror, and he only escaped by feigning madness (1Sam.21.13).—3. His life as fugitive (22.1–26.25). (a) His first retreat was the cave of Adullam, in the low-lying country (ophel). (b) At En-gedi occurred the chivalrous exploit of the three heroes who procured water from the well of Bethlehem, and David's chivalrous answer, like that of Alexander in the desert of Gedrosia (1Chr.11.16–19; 2Sam.23.14–17). (c) Advised by Ahithophel, Saul first of Hareth (1Sam.22.5), and then we find him making a descent on the foraging parties of the Philistines, and relieving Keilah, in which he took up his abode. Whilst there, now for the first time in a fortified town (23.7), he was joined by a new and most important ally—Abiathar, the high-priest of the house of Ithamar and son of Ahimelech of Nob who with his brother-priests had been slain by Saul on suspicion of conspiracy against him (22.9ff.). By this time the 400 who had joined him at Adullam (22.2) had swelled to 600 (23.13). The situation was now changed by the appearance of Saul himself. Apparently the danger was too great for the little army to keep together. They escaped from Keilah, and dispersed, "whithersoever they could go," amongst the fastnesses of Judah. Henceforth it becomes difficult to follow his movements with exactness. Saul hunts him "like a partridge" in the wilderness of Ziph and of Adamith (23.13–17), sparing Saul's life, when in his power, on at least one occasion (1Sam.24.28). Whilst he was in the latter place occurred David's adventure with Nabal, instructive as showing his mode of carrying on the freebooter's life, and his marriage with Abigail.—4. His service under Achish (1Sam.27.29.11). Weared with his wandering life, he at last crosses the Philistine frontier, not, as before, as a fugitive, but as the chief of a powerful band—his 600 men now grown into an organized force, with their wives and families around them (27.2.3). After the manner of Eastern potentates, Achish gave him, for his support a city—Ziklag on the frontier of Philistia (27.6). He was settled there for a year and four months (27.7)—the first note of time in David's life. He received Achish into confidence by attacking the old nomadic inhabitants of the desert frontier, and representing the plunder to be of portions of the southern cities of the Pharaohs of Israel. But this confidence was not shared by the Philistine nobles, and accordingly David was sent back by Achish from the last victorious campaign against Saul. During his absence a raid of Amalekites, whom he
DAVID

had plundered during the previous year, had burnt Ziklag, and carried off the inhabitants. Assisted by an Egyptian slave, David overtook the invaders in the desert, and recovered the spoil (2Sam.30). Two days after this victory an Amalekite arrived from the N., with the fatal news of the defeat of Gilboa. The reception of the tidings of the death of his rival and of his friend, the solemn mourning, the vent of his indignation against the bearer of the message, the pathetic lamentation that followed, well close the second period of David's life (2Sam.1.1-27).—III. His Reign,—I. As king of Judah at Hebron (2Sam.2.1-5). 7½ years (2.Sam.2.1). Gradually, and doubtless, as the ancient sacred city of the tribe of Judah, the burial-place of the patriarchs and the inheritance of Caleb. Here David was formally anointed king (2Sam.2.1). His dominion was nominally confined to Judah. Gradually his power increased, and during the 2 years that elapsed after his declaration at Ishboseth a series of skirmishes took place between the two kingdoms. Then rapidly followed, though without David's consent, the successive murders of Absner and of Ishboseth (2Sam.3.30-4.5,6). The throne, so long waiting for him, was now vacant, and the united voice of the whole people at once called him to occupy it. For the third time David was anointed king. The command of the army he devolved on his nephew Joab (2Sam.2.28).—II. Reign over all Israel 33 years (2Sam.5.5-1K.2.11). (1) The acquisition of Jerusalem. This city, hitherto unconquered, was captured under the leadership of Joab, henceforward captain of the host (1Chr.11.6). Philistine attacks were repulsed (2Sam.5.17-20; 1Chr.14.11), and the capture and conflagration of their own idols was a retribution for their former victories (14.12). Tyre, under Hiram, now for the first time appearing in sacred message was summoned to furnish for the capital (2Sam.5.11), especially for the palace of David himself (7.2). Unhallowed and profane as the city had been, it was at once elevated to a sanctity, which it has never lost, above all the ancient sanctuaries of the land. The ark, after a temporary halt (owing to the death of Uzza) at Obed-edom's house, was brought with great state to Jerusalem. David's act of severity towards Michal on this occasion was an additional mark of the stress which he himself laid on its solemnity (2Sam.6.20-23; 1Chr.15.29). A message through the prophet Nathan postponed to the subsequent reign the erection of a permanent temple. (2) Foundation of the court and empire of Israel (2Sam.8 12). On the erection of the new capital at Jerusalem David became a king on the scale of the great rulers of Egypt and Persia, with a regular administration and organization of court and camp, and founded an imperial dominion which for the first time realized the prophetic description of the bounds of the chosen people (Gen.15.18-21). The internal organization lasted till the final overthrow of the monarchy. The empire was of much shorter duration, continuing only through the reign of David and his successor Solomon. But, for the period of its existence, it lent a peculiar character to the sacred history. (a) In the internal organization of the kingdom the first new element to be considered is the royal family, the dynasty, of which David was the founder, a position which entitled him to the name of "patriarch" (Ps.2.7), and (ultimately) to be the ancestor of the Messiah. Of this family, Absalom and Adonijah both inherited their father's beauty (2Sam.14.25; 1K.1.6); but Solomon alone possessed any of his higher qualities. It was from a union of the children of Solomon and Absalom that the royal line was carried on (1K.15.2). (b) The military organization, inherited from Saul, but greatly developed by David, was as follows: (i) "The host," consisting of all males capable of bearing arms, and summoned only for war. There were two monthly divisions of 24,000 each; and over each presided an officer, selected from the other military bodies formed by David (1Ch.27.14-15). This rendered a very limited number of chariots (2Sam.8.4) and of mules instead of asses for the princes and officers (13.29,18,9). (ii) The body-guard. This also had existed in the court of Saul, and David himself had probably been its commanding officer. But it now assumed a peculiar organization. The men were at least in name foreigners, as having been probably drawn from the Philistines during David's residence in the court of Gath. They are usually called from this circumstance Cherethites and Pelethites. The captain of the force, however, was not only not a foreigner, but an Israelite of the highest distinction and purest descent, who first appears in this capacity, but who outlived David and became the chief support of the throne of his son, namely Benaiah, son of the chief priest Jehoiada, representative of the eldest branch of Aaron's house (2Sam.8.18,15-18,20,23; 1K.8.1-7). This military institution in David's army arose out of the circumstances of his early life. The nucleus of what afterwards became the only standing army in David's forces was the band of 600 men who had gathered round him in his wanderings. The number of 600 was not preserved; but David increased to large bands of 200 each, and small bands of 20 each. The small bands were commanded by 30 officers, one for each band, who together formed "the thirty," and the 3 large bands by 3 officers, who together formed "the three," and the whole by one chief, "the captain of the mighty men" (2Sam.23.8-19; 1Chr.11.47). This commander of the whole force was Abishai, David's nephew (1Chr.11.20; and 2Sam.16.9). (c) Side by side with this military organization were established social and moral institutions. Some were entirely for pastoral, agricultural, and financial purposes (1Ch.27.25-31); others were judicial (26.29-32). A few men are named as constituting what would now be called the court, or council of the king: the counsellors, Ahithophel of Giloh, and Jonathan the king's nephew (27.32,33); the companion of the king, "Hushai" (1Chr.27.33; 2Sam.15.37,16.19); the scribe, the "scribe, who carried at one time Jonathan (2Sam.20.25; 1Chr.27.32); Jobo-
shaphat, the recorder or historian (2Sam.20.24), and Adoram the tax-collector, both of whom survived him (1K.4.3-6,12.18). Two preachers appear as representatives of the prophetic schools. Nathan, who appears for the first time after the establishment of the kingdom at Jerusalem (2Sam.7.2), is distinguished both by his title of "prophet" and by the nature of the prophecies which he utters (7.5-17,12.1-14) as of the purest type of the prophetic dispensation, and as the hope of the new generation, which he supports in the person of Solomon (1K.1). Two high-priests also appear—representatives of the two rival houses of Aaron (1Chr.24.5): Abiathar, companion of David's exile, and Zadok, who made the head of the Aaronic family (27.17). Besides these four great religious functionaries there were two classes of subordinates—prophets, specially instructed in singing and music, under Asaph, Heman the grandson of Samuel, and Jeduthun (1Chr.25.1-31), and Levites, whose duty it was to chant the Psalms (28). (d) The external relations of David's kingdom will be found under the various countries concerned. It will here be only necessary briefly to indicate the enlargement of his dominions. Within 10 years from the capture of Jerusalem he had reduced to a state of subjection or submission 10 of his neighbors, and one after another of the W. (2Sam.8.1): the Moabites on the E. (8.2) by the exploits of Beniah (23.20): the Syrians on the N.E. as far as the Euphrates (8.3); the Edomites (8.14) on the S.; and finally the Ammonites, who had broken their ancient alliance, and made one grand resistance to the advance of his empire (10.1-19,12.26-31). These three last wars overlapped each other. The crowning point was the siege of Rabbah. (3) Three great calamities marked the beginning, middle, and close of David's otherwise prosperous reign. (a) A three years' famine (21.1ff.) was the punishment imposed on the land in connection with Saul's slaughter of the Gibeonites. At the close of this time David in consequence surrendered all his predecessor's sons, except Mephiboseth, to be slain, thus acting in accordance with the religious beliefs of his time. (b) The second group of incidents contains the tragedy of David's life, which grew in all its parts out of the polygamy, with its evil consequences, into which he had plunged on becoming king—the double crime of adultery with Bathsheba and of the virtual murder of Uriah. The crimes are undoubtedly those of a common Oriental despot. But the rebuke of Nathan, the sudden revival of the king's conscience, his grief for the sin, his deeply felt gathering of his uncles and elder brothers around him, his return of hope and peace, are characteristic of David, and of David only. But the clouds from this time gathered over David's fortunes, and henceforward "the sword never departed from his house" (12.8). The outrage on his daughter Tamar by the murder of her elder brother Amnon, and then the revolt of his best beloved Absalom, brought on the crisis which once more sent him forth a wanderer, as in the days when he fled from Saul; and this, the heaviest trial of his life, was aggravated by the impetuousity of Joab, now, perhaps from his complicity in David's crime, more unmanageable than ever before. The rebellion was finally put down apparently by the growing jealousy of the tribe of Judah at seeing their king absorbed by the whole nation. For its general course, see Aanthophel. The final battle was fought in the "forest of Ephraim," which terminated in the accident leading to the death of Absalom (18.6-9). Joab, the survivor, and David himself again reigned in undisturbed peace at Jerusalem (20.1-22). (c) The closing period of David's life, with the exception of one great calamity, may be considered as a gradual preparation for the reign of his successor. David's census, carried out against Joab's warning, brought upon him and the state an inexorable calamity, and of a vision of a destroying angel over the threshing-floor of Araunah (Ornan), a wealthy Jebusite, marked out the spot as site for the future temple on mount Zion, the centre of the national worship, with but slight interruption, for more than 1,000 years. A formidable conspiracy to put Adonijah on the throne overlapped the last days of David's reign, which detached from his person two of his court, who, from personal offence or adherence to the ancient family had been alienated from him—Joab and Abiathar. But Zadok, Nathan, Benaiath, Shimeai, and Rei remaining firm, the revolt was stifled, and Solomon's inauguration took place under his father's auspicia (1K.1.1-53). By this time David's infirmities had grown upon him. The incident of the young Shunammite, Abishag (1.1ff.), is apparently mentioned for the sake of the later incident of Adonijah (2.17). His last song is preserved—a striking union of the ideal of a just ruler which he had placed before him, and of the difficulties which he had felt in realizing it (2Sam.22.1-7). His last words, as recorded, to his successor, are general exhortations to his duty, combined with warnings against Joab and Shimeai, and charges to remember the children of Barzillai (1K.2.1-9). He died, according to the ancient narrative, "he was buried in the city of David." After the return from the Captivity, "the sepulchres of David" and "the house of the mighty men" were still pointed out, apparently near Siloam (Ne.3.16). The above sketch shows us David in the capacity both of man and ruler as illustrative of the transfigural character belonging to his time. The blemishes in his conduct, at any rate to some extent, are attributable to the cruel, hasty, and arbitrary element in human nature in which those who were possessed of any species of power did not hesitate to indulge. Even his great sin in the matter of Bathsheba and Uriah, standing out single, and thus the more conspicuous, in his life, as for parallels numberless acts, at least equal in violence, in and after his day, just as his failure to control his children is a characteristic of the Eastern parent even at the present time. On the other hand, his general unselfishness, ruling with personal charm, his family affection, diplomatic skill, courage, generosity, and power of inspiring devotion in his followers at once indicate and help forward the advance towards a higher
The Jews considered 15 miles a long distance, and spoke of a day's journey as only about 5 Roman miles. [Modern.] [C.R.C.]

Daysman, an old Eng. term common in 16th cent. (Spenser's Faerie Queene, ii. c. 8; 1551 ed. Bible in 1Sam.2.25; Holland's Livy, p. 137, etc.), meaning umpire or arbitrator (Job 9.33), and derived from day, in the specific sense of a day fixed for a trial.

Deacon. The word "deacon" (διάκονος) as a title does not appear to have been derived from any Jewish or pagan source. In the LXX. διάκονος occurs in a general sense in Esth.1.10, 2.6.1.3.5; Ps.10.4; 4Mac.9.17; and διακονία in Esth.6.3.5; 1Mac.11.58, with some complications of readings as to διάκονος and διάκονια.

In N.T. διάκονος and διάκονια and διακονεῖσθαι are used frequently in a general sense. As a title διάκονος occurs in Phl.1.1; 1Tim.3.8-13; and possibly Ro.16.1. [Deaconess.] On the nature of the office and the method of appointment and the identification with the "seven men of good report" of Ac.6.2-6, see Church; Laying on of Hands; Plumptre and Gibson in Smith, D.B. and ed. i. 738-741; Armitage Robinson in Encycl. Brit. ii. 1010; Gwatkin in Hastings, D.B. i. 574, 575; Hort, The Christian Ecclesia, pp. 198-210; Stone, The Christian Church, pp. 266-269, 273, 274, 280. [D.S.]

Deaconess. It is possible that the word διάκονος is used in a technical sense to denote a deaconess in Ro.16.1.2, i.e. a servant of whom you Phoebe our sister, who is a servant (διάκονος) of the church that is at Cenchrea, that ye may receive her in the Lord, worthily of the saints, and that ye assist her in whatsoever matter she may have need of you; for she herself also hath been a succourer (ποιμενίδιας) of many, and of mine own self." In view of the facts that διάκονος is used constantly in N.T. in a technical sense, and that there is nothing in this passage as a whole or in the word "succourer " which necessarily requires an official, it cannot certainly be determined that Phoebe filled the office of deaconess at Cenchrea.

It is, however, likely that an office of deaconess, corresponding to that found in later history, existed in N.T. times, and that it is referred to in 1Tim.3.11. The A.V. translation "their wives" is there obviously incorrect; and the alternatives are to take "women" (γυναῖκας) in a quite general sense for women of the Christian community, which appears to be the meaning intended by R.V., or to understand it to denote an official order of women. The latter interpretation is strongly indicated by the position of the verse in the midst of instructions about the deacons. If deaconesses are here referred to, it is laid down in regard to them that they are to be "holy, temperate, faithful in all things." It is possible that Mary, Tryphena, and Tryphosa (Ro.16.6.12) were deaconesses. The widows of 1Tim.5.3-16 are not members of an official order such as that of deaconesses, but women on the roll of the church for the reception of relief. [Plummer in Smith, D.B. (2nd ed.), i. 740, 741; Armitage Robinson in

DAVID, CITY OF

level of cultivation than had previously existed in Palestine. [A.W.S.]

David, City of. [Jerusalem.]

David, Tower of. [Tower of David.]

Day. The Heb. yom denotes both the daily time and the period of 24 hours from sunset to sunset. The ancient Israelites reckoned the day from evening to evening (Lev.23.12).

Some think the earlier mode of reckoning was from morning to morning, and base their opinion on Gen.1-5, quoting as traces of this arrangement passages in which day is mentioned before night (e.g. Lev.8.35; 1K.8.59; Ps.1.32-45.3,8(4,9),55.10-11; Is.58.11; Je.9.18,23,16.13,39-35; Lam.2.15). For sacrifices the evening was reckoned with the preceding day (Lev.7.15,22,30). The day was not divided into periods of defined length, but its progress was marked by the use of descriptive terms. These were: (1) shahar, with 'day' (as 'ascending' or 'rising over,' the morning, dawn) (Gen.1:15,19). bigar, from a root meaning "to split or penetrate," as the dawn does the darkness; time of sunrise (cf. Gen.19.23,32,31). (3) "The heat of the day," about ten o'clock (Gen.18.1). (4) yohoram, 'the double light,' or noon (43.16). (5) neheš, 'the twilight, breaking of day' (Sam.30.38). (6) the "breath of the day" (Gen.3.8) before sunset. (6) 'ereth, the setting (of the sun), evening (Ex.12.18). "Between the evenings" denotes the whole period of the decline of the sun. [Passover.]

Sunrise, noon, and evening are mentioned as times of prayer (Ps.55.17,18). The Babylonians were familiar with various other systems in astronomical knowledge, and the invention of the sun-dial and division of the day into twelve periods is attributed to them (Herod. ii. 109). The Hebrews probably borrowed from this source both the division of the day into hours, and the dial (2K.20.11; Is.58.5). The dial of Ahaz was probably a circular gnomon, or gnomon, surmounted by an obelisk which threw its shadow on to them. Since the shadow could either ascend or descend ten degrees (2K.20.9), there must have been more than twenty steps, each marking some fixed portion of time. In N.T. times the division of the night into four watch periods, i.e. the day into twelve hours, from 6 a.m. to 6 p.m., was fully established: "Are there not twelve hours in the day?" (Jn.11.9). The following hours are mentioned: 3rd, Mt.20.3; 11th, 27.45. Is.4.19.11; 7th, 4.32; 9th, Mt.27.15-16; 10th, Is.1.39; 11th, Mt.20.6,9. The Jewish hour is divided into two parts of fixed quantity, 90 minutes, used in calculating the time of New Moon. The Pirke R. El. vii. speaks of 'large hours,' equal to two common ones, corresponding to the Assyrian kasaḫu six of which went to a day and six to a night when day and night were of equal length (Smith, Assy. Epon. Can. 16). [Creation: Dial.]

Day's journey (Ex.5.3, etc.). The average length of a journey among Arabs, when changing camp with women, children, and flocks, does not exceed 10 or 12 miles; but merchants, with pack animals, will traverse 15 to 20, and sometimes 30 miles a day. The Sabaean Day's journey was the day and night equal, or 24 steps set about half a mile. [Weights and Measures.]
DEAD, BAPTISM FOR THE

Dead, Baptism for the. [BAPTISM.]

Dead Sea. This name is not found in the Bible, and does not appear to have been used until the 2nd cent. A.D., when it is found in the works of Pausanias, Galen, and Justin. It appears to have been used to indicate the absence of animal life in these waters. Josephus (4 Wars viii.) mentions it as bitter and unfruitful: and both ancient historians and modern writers speak of an unnatural gloom, not upon the sea only, but also over the whole plain below Jericho. In O.T. it is called the "SALT SEA," q.e.f., or the "Sea of the Plain (Arabah)." [c.w.

Death. [FAMINE.]

Death may be considered as it presents itself physically to our eyes, the act of dying, the circumstances of that final agony in which visible conscious relations with the things of this world come to an end. As such it is much the same to all men of all times—to the Hebrew of old as to ourselves. What varies in the conception of the act of dying is the relation of the idea to the act of dying; and this significance depends upon the ideas men have of what happens after death. To the Hebrew, death meant not only the end of communion with this world, but also the end of communion with God. It is true there is existence in Sheol for the material body, but it is a life of half-life, a shadow of the former life (Job 3.13-19; Ps. 88:12; Ec. 9.5), and in this half-life the dead had no longer the joy of believing and praising God which is the highest happiness of this earthly life (Ps. 6.5, 30:9; Is. 38:18). In death the body returns to that from which it was made, and the spirit returns to God who gave it (Ec. 12.7; cf. Gen. 2.7, 3.19). When the Lord told that through sin death came (Ro. 5.12; cf. Gen. 2.17, 3.19), it is essential for understanding of what it means that we should realize the significance of death to the Jew not only in its physical but also in its theological aspect. The natural punishment of sin is that separation from the love and favour of God, which was to the Jew the chief element in his idea of death, that which gave to physical death its greatest terror—what St. Paul calls the "sting of death" (1Cor. 15.56). With the Christian revelation of the things which God hath prepared for them that love Him, the view of death is changed. To die is "to be with Christ, which is very far better" than earthly life (Ph. 1.23); "blessed are the dead which die in the Lord" (Rev. 14.13). The Christian shrinks, indeed, with a natural fear from dying, "not that we would be unclothed," but longs for the blessed life to which he will go on. (2Cor. 5.6). Death with the associations which it had to the Jew, death with that separation from God which attached to it as the consequence of sin, was overcome by the dying and resurrection of Jesus Christ (2Tim. 1.10; Heb. 2.14). Art. "Eschatology," by A. B. Davidson, R. H. Charles, J. S. Hensley, Hastings, D.B. (5 vols. 1904); books on the subject of the Future Life, e.g. Salmon, Christian Doctrine of Immortality. [s.c.g.]

Debir, king of Eglon; one of the five kings hanged by Joshua (Jos. 10.3).

Debir (back).—1. A city of Judah in the Hebron district (Jos. 10.38), with an Anakim population (11.27) conquered again by Othniel, and having near it "upper and lower springs" (gulloth), though the region generally was negeb or "dry" (15.17-19; Judg. 1.13-15). It is noticed with Socoh (Shuweikeh), Dinannah (Idina), and Abab ('Anab), and was called Kirjath-sannah (Jos. 15.18-20) and Kirjath-sheer (Judg. 11.12). It was given to the Levites (Jos. 21.13; 1 Chr. 6.58). It is identified by Ewald with the present village edh Dhäheriyeh (of the ridge), about 12 miles S.W. of Hebron and 2 miles N.E. of 'Anab. There are ancient tombs near the village, which stands on a high ridge. The country has two springs, both the upper and lower springs, "dry springs," (gulloth), 7 miles N.E. of the town, at the Sell ed Dilbeh, or "brook of the plane tree."—2. A place on N. border of Judah (Jos. 15.7). S. of Gilgal; perhaps only a "ridge," but noticed with Addummim, close to which (on S.W.) the name Thoeg and Deb (pass of the beard) still survives. —3. The border of Judah (Jos. 15.26; R.V. marg. Lidebir as though for Lodebar) was apparently W. of Mahanaim: perhaps meaning only "the limit of the ridge" or W. slope of Gilgal. [C.R.C.]

Debora, a woman of Naphtali, the grandmother of Tobit (Tob. 1.1).

Deborah.—1. Rebeckah's nurse, who accompanied her from the house of Bethuel (Gen. 24.50). She died at Bethel, and was buried beneath the terebinth, Allon-bachuth (Gen. 35.8). The second reference may be out of place, as it is hard to account for Deborah's being with Jacob.—2. (Judg. 4, 5.) The prophetess, with whom Gideon at first did not communicate (Judg. 1.6). The name Lapidoth (flashes) is another name for Barak (lightning). Deborah lived under the palm-tree (not "terebinth") between Ramah and Bethel, but from 5.15 some think she belonged to Issachar. If so, the facts need not conflict, but the critical inference is doubtful. [Note Gen. 35.11, 12.] Debora, the daughter of Ephraim, and Megiddo (a city, or the pass of the beard) was another name for Deborah. She judged—was a mother in Israel—presumably, therefore, she did not live in the neighbourhood of Sisera. She sent an embassy to Barak, and at his request promised support. He summoned Naphtali and Zebulun to Kedesh and led 10,000 of them to Tabor. There, Deborah joined him with Benjamin, Zebulun, and Ephraim, and Machir. Other tribes were summoned. The princes of Issachar responded. —The Battle of Megiddo. Sisera summoned his allies (5.19), and with 900 chariots marched from Harosheth up Esdraelon. A storm broke from the N., and beat in the faces of Sisera's army. Kishon suddenly flooded the marshy land. The chariots were useless. The light-armed highlanders of Barak cut the enemy's line, and pursued the main rout to Harosheth. The van fled northward, and apparently escaped annihilation through the cowardice of Meroz, which was put to the ban. Sisera, probably in the van, cut off from Harosheth, tried to escape to Hazor, and was slain in Jael's tent. [JAEL.]
—Importance of Victory. The unity of Israel was at stake. The plain of Esdraelon might well have become the frontier. From the ode we see how faith in a common God made the less selfish tribes true to the ideal of one fatherland. —Critical Theories. Moshe, Driver, etc., think that in ch. 4 two distinct narratives are interwoven, (1) concerning the defeat of Jabin by Zebulun and Naphtali in the N., and (2) concerning the defeat of Sisera. But there is no reason why two such narratives should be mixed. It has been suggested that there were two Barakos; but why is it not easier to believe than two Jabins? The critics have failed to distinguish the narratives. Ch. 4 is consistent, and 5 is more in harmony with it than with the critics' theory. —Song of Deborah. Ch. 5 is undoubtedly contemporary. The most advanced critics admit its antiquity. The language is archaic. There are kapax legomena. The corruption of the text is perhaps due to oral transmission. Sayce maintains it was first written in the Phoenician alphabet. The monotheism is that of the Pentateuch. Orr writes: "How sublime is the picturing of the majesty and omnipotence of God in the opening theophany; how irreconcilable with the idea of a local deity, the respecting presence of Jehovah in Sear, at Sinai, in Canaan; how manifest the supremacy of this God in nature and providence, where even the stars in their courses fight against his enemies; how distinct the assertion of Jehovah's righteousness; how lofty and spiritual the closing strain suggestive of the Second Commandment and Deut. —' Let them that love him be as the sun that goeth forth in his strength.'" As Davidson says, if there were more of these songs and less of rude soldiers we should have a higher conception of religion under the Judges. Cooke, Hist. and Song of Deb.; Moyle, Ruling Ideas; G. A. Smith, Hist. Geog.; Sayce, Early Hist. of Heb.; Orr, Problem of O.T.; Maurice, Prophets and Kings; Liddon, O.T. Sermons; Davidson, Expositor, 3rd series, vol. v.; and see also Judges, Book of. [H.M.S.]

Debtor. (Loan.)

Decadog. [Ten Commandments.]

Decapolis. Gk. for "a ten-city" district (Mt.4:25; Mk.5:29; 7:31), a region in Bashan where ten cities, in a league, appear to have received privileges from Rome after 63 B.C. The group, however, included Scythopolis (Heisam) in the valley W. of Jordan, and this is said to have been the largest of these towns (Josephus, 3 Wars ix. 7). Perhaps other cities joined the league later, but the accounts differ, and Pliny (Hist. Nat. v. 18) even includes Damascus, which was much larger than Scythopolis (see Reland, Pat. Illustr. p. 203, ii. p. 525). Ptolemy (v. 17) mentions Capitolas in addition to places named by Pliny; and a Gk. text at Palmyra speaks of "Abila of Decapolis." If we leave out Damascus and Philadelphia [Rabbath-Amon], which is very far S. of the rest and much larger than Scythopolis, there remain 9 cities E. of Jordan, besides the last named: (1) Capitola, halfway from Gabaa to Einan, at an unknown site; (2) Abila (Tell Abil), near the preceding on N.E.; (3) Scythopolis, near the sea of Galilee on E.; (4) Gadara (Melkez);

DEDICATION, FEAST OF THE

(5) Pella (Fāhil) in the Jordan Valley E. of the river, nearly opposite Scythopolis; (6) Gerasa (Jarash) in N. Gilead; (7) Dion (ed Dānn), 9 miles N.W. of Abila; (8) Kenath (Qanawat); and (9) Raphon (Rāfik), 17 miles N.E. of Edrei; the 10th city is Scythopolis. Decapolis thus covered some 1,000 square miles of S. Bashan, and it was inhabited by a mixed Greek and Arab population, as shown by inscriptions, some of them as old as the time of our Lord. It was also densely populated (see Mt.4:25); and the herding of swine, which all Semitic peoples held unclean, is thus explained, as the Greeks were swine-herds from Homer's time onwards (Mt.8:28, 30; Mk.5:11). [C.E.C.]

Decision, Valley of. [Jehoshaphat, Valley of.]

Dedan. —1. A son of Raamah, son of Cush (Gen.10:7; 1 Chr.1:9).—2. A son of Jokshan, son of Keturah (Gen.25:3; 1 Chr.1:22). In each case the brother of Dedan is named Sheba. Dedan is also mentioned in Is.21:13; [Je.25:23]; 49.8; Ezk.25.13, 27, 15, 20, 38, 13. [Arabia.] The name perhaps survives in that of Didan, an isle in the Persian Gulf. The Dedanites were travelling traders, but some of the passages cited point to a second Dedan (probably that of Jokshan) near Edom. [Ge.C.]

Dedanim (Is.21:13). [Dedan, 2.]

Dedication, Feast of the. The feast of the Hasmonaevus, known as Hanukka among the Jews, was instituted to commemorate the
altar replaced the pagan altar erected 3 years earlier on the same day by Antiochus for his idol Zeus Olympus. The festival commenced on Kislev 25 (December), and lasted eight days. It was called Hánukkah (The Feast of Tabernacles, with the carrying of palm branches and with singing of Hallel, but it did not require a visit to Jerusalem, as the three great Mosaic festivals did. Its institution is recorded 1Mac. 4.52-59; 2Mac.1.18. Josephus calls it ḡowra = festival of “light” (12 Ant. vii. 7). It is built but once in the Canonical Scriptures, Jn.10.22, mentioning that it was in winter. The Hánukkah festival is still observed by orthodox Jews with the lighting of lamps in their households at night, beginning with one light on the 1st day and increasing daily to eight on the 8th day. The idea of dedication was not new: Moses had dedicated the altar (Num. 7.62). It is celebrated with the Feast of Dedication of the House” (1Ps.30. title), which probably refers to the removal of the ark to the city of David (2Sam.6.12-15); Solomon dedicated the temple (1K.8.63). Jewish Encycl. iv. 23, s.v. Hánukkah.

Deep, The (lu.8.31; Ro.10.7). [PIT]

Deer, [FALLO] DEER, ROE.

Degrees, Songs of. [PSALMS, TITLES OF.]

Dehavites (Exr.4.9) only were among the colonists planted in Samaria after the completion of the Captivity of Israel. From their name, and from the fact that they are mentioned with the Sussanites (Sam.2.21) and the Elamites (Elam.2.1, natives of the same country), it is fairly concluded that they are the Da’ir or Dahi, mentioned by Herodotus (i. 125) among the nomadic tribes of Persia.

Dekar’. The son of Dekar (Ben Dekar) was the ruler of Solomon’s 2nd district (1K.4.9), including Dan. [PALM. OF].

Delaijah’.—1. A priest in the time of David, leader of the 23rd course of priests (1 Chr.24.18).—2. “Children of Delaijah” were among the people of uncertain pedigree who returned from Babylon with Zerubbabel (Exr. 2.60; Ne.7.62).—3. Son of Mehetabeel and father of his brother, Shemaiah (1Chr.5.2).—4. Son of Shemaiah, one of the “princes” about the court of Jehoiakim (Je.36.12.23). The name also occurs in A.V. as Dalaijah (1Chr.3.24).

Delilah’ (Judg.16.4-18), a woman of the valley of Sorek, loved by Samson. St. Chrysostom calls her “wife” but this is improbable. She teased him until he told her the secret of his strength, and then betrayed him. Her nerve and forethought were remarkable. She thrice failed without Samson’s guessing her intent. She extorted an enormous sum from the Philistine lords (5,500 shekels of silver). Her treachery was revoltig, for it was she “who began to afflict him” when his seven locks were shorn. Some commentators suppose that she was an Israelite; but Sorek was in Philistine territory, and an Israelite would at once have connected Samson’s powers with his Nazirate vow. [SAMSON.]

Deluge, [NOAH.]

Deuteronomes (Lu.15.23) is the smallest of the islands called Cyclades in the Aegean Sea. It was one of the chief seats of the worship of Apollo, and was celebrated as the birthplace of this god and of his sister Artemis (Diana).

Demas, a companion of St. Paul during his first imprisonment at Rome (Ph.24; Col. 4.14). In the second imprisonment he forsook him, but it is not fair to conclude with Bunyan that apostasy from the faith is implied. [E.R.B.]

Demetrius I. (Soter, = Saviour), king of Syria (162-150 B.C.), son of Seleucus IV. (Philo- pator), became king after defeating Avri- tus V. (Babylon). He succeeded to the throne in 162 B.c. He then obtained from the Romans recognition of his position, though they had refused him assistance. At the instigation of the Hellenizing party in Judaea, Demetrius made their leader Alcimus high-priest, and sent four expeditions against the Hasmonaean party, who were true to their country and to their God. Bacchides, at the head of a Syrian army (161), succeeded in establishing Alcimus in Jerusalem, but, shortly after the Syrian withdrawal, was obliged to flee to Antioch. Demetrius sent Nicander against Judas Mac- cabaeus, but the latter defeated him at Caphar- salama in 153 B.C. After this, the Syrians were utterly routed at Adasa, near Beth-horon, and their leader slain. Dreading another attack, Judas sent an embassy to Rome, and the Senate made an alliance with him, promising to forbid Demetrius to prose- cut the war further. Meanwhile, however, Bacchides again invaded Palestine. Judas, with only 800 men, met him in battle at Eleasa, but was defeated and slain. His youngest brother, Jonathan, was then chosen as leader of the patriots, and still held out across the Jordan. Soon after Alcimus died, and Bacchides withdrew. In 158 he returned, but failed to put down the Hasmonaean party, and was compelled to conclude a treaty with Jonathan.

Thus the sword ceased from Israel. Demetrius had aroused much popular odium by his tyranny, and in the insurrection of Alexander Balas, who was aided by Jonathan, he was defeated and slain in 150 B.C., after accomplishing prodigies of valour. [W.S.T.C.T.]

Demetrius II., surnamed Nicator and Ni- cator (the Victorious), king of Syria (140-135 B.C. and again 128), was the elder of Demetrius Soter’s two sons. At the time when Alexander Balas rose in rebellion, his father had sent him to Cnidus, along with his younger son Antio- chus, to await the issue of the war, and to avenge his father should the rebellion for a time succeed. On attaining manhood, Demetrius gathered a force of Crete and Asia Minor against Syria to claim the kingdom. Alexander, sunk in debauchery, and not expecting an attack,
was deserted by the people of Antioch and by many of his own soldiers, and was slain. [ALEXANDER BALAS.] Ptolemy Philometor helped to seat Demetrius, giving him his daughter Cleopatra in marriage. Soon after his arrival in Syria, Demetrius renewed the war against Jonathan, whom Balas had made high-priest, and had invested with a purple robe. Apollonius, governor of Coelo-syria, advanced to Azotus with a large army (147 B.C.), but was there routed by Jonathan, losing nearly 8,000 men. An interview then took place at Ptolemisai between Demetrius and Jonathan, in which Jonathan was confirmed in his position. In 145, Tryphon, who had been an officer of Alexander Balas, brought Antiochus, the young son of the latter, from Arabia, where he had taken refuge, and rebelled against Demetrius. The people of Antioch rose in revolt, and Jonathan, disappointed in the hope that Demetrius would keep his promise to withdraw the Syrian garrison from the citadel of Jerusalem, joined Antiochus. With the assistance of his own brother, he took possession of all Palestine as far as Damascus, and held it for Antiochus. The latter confirmed Jonathan in his high office, and made Simon governor of the whole district between Tyre and the borders of Egypt (144 B.C.). In the same year Jonathan defeated Demetrius's troops near Kadesh in Galilee. Tryphon killed the high-priest by treachery, and murdered him. Simon was chosen, in his brother's stead, head of the Jewish state and high-priest. Tryphon then murdered Antiochus, and claimed the throne for himself. Simon joined Demetrius, who for a time got the better in the contest with Tryphon. In 138 Demetrius made war with Mithridates (Arsaces VI.) of Parthia, and, aided by Elamites, Persians, and Bactrians, was for a time successful. At last, however, Mithridates captured him by treachery (141 B.C.), and sent him as an honourably treated prisoner to Hyrcania. Meanwhile Demetrius brandished Alexander's sceptre, over which Tryphon had become king of Syria (137 B.C.). He engaged in a war with the Parthians, and this led Phraates II., who was then king, into alliance with Demetrius, who had married his sister Khodoguna. Demetrius was sent into Syria, with a Parthian army, to force Antiochus to retreat, and he thus regained the throne (128 B.C.). But a rival claimant, Zabias (who took the name of Alexander), aided by Ptolemy Physcon of Egypt, soon after defeated him in battle near Damascus, and compelled him to flee to Tyre, where he was murdered on landing. Enschius, Chron. Arm.; Winer, Bibl. Rer. Ant. recenti. [WST.C.T.]

Demetrius.—1. An Ephesian silversmith who made miniature "shrines of Artemis" [DIANA], which probably represented the goddess sitting in a niche (Ramsay, Church in the Roman Empire, vii.). Such statuettes were made in metal, marble, and terra-cotta for worshippers to offer in her temple. The spirit of Christianity would banish the trade, hence the opposition raised by Demetrius (Acts 19.23-27).—2. (1 Jn. 12.) Probably one of the evangelists to whom Diotrephes had refused hospitality. [E.R.B.]

Demon (LXX. and N.T. δαίμων, rarely δαίμων). Rabbincal theology distinguishes two classes of demons, (1) Fallen angels, under the sovereignty of Satan; these are incorporeal, and immortal. (2) Bondage demons, under the authority of Ashmedai [ASMODEUS]. These are semi-corporeal, they eat and drink, multiply by sexual propagation (cf. Tob.6.14), and, though long-lived, finally die. It is possible that some such distinction as this is scriptural. The hairy, goat-like demons of Lev.17.17 and Isa.6.1. These are "angels," 2 Cor.12.7 (E.V. messenger); 2 Pec.2.4; 1 Jn.6; Rev.17.9; perhaps also Rev.6.3. Other names are "unclean spirit," "spirit of an unclean demon," "evil spirit," "spirit," "spirit of sickness (infirmity)" (Luke 13.11), "dumb and deaf spirit" (Mark 9.25), "spirit of divination" (Acts 19.18). St. Paul calls them "the principalities, the powers, the world-rulers of this darkness, the spiritual hosts of wickedness in the heavenly places" (Eph.6.12), and also "the rulers [A.V. princes] of this world" (Rom.1.20). They dwell in those higher spheres of existence called "heavens," some, perhaps, even in the highest heaven (οὐρανός οὐρανῶν, Eph.6.12; cf. Mt.18.35); but, like Satan, they "go to and fro in the earth," deceiving, judging, possessing men. They are especially powerful among the heathen, with whose divinities they are sometimes identified (Deut.32.17; Ps.106.37; Ba.4.7; Rev.17.10). Our Lord's allusions to them as haun ting with spirit in all places (Mt.12.24), is partly metaphorical. A special class of demons is mentioned (21v.24; Jn.6), who are already chained in hell, "reserved unto judgment," both writers call them "angels," and seem to follow the book of Enoch in identifying them with "the sons of God" of Gen.6.2. [SATAN; DEMONICAL POSSESSION.]

Demoniacal possession is at once one of the most difficult and most interesting of the minor problems furnished by Holy Scripture. To deal effectively with the questions raised, we must first note the various cases in which a definite possession of a human body by a spirit, good or evil, is apparently alleged in the text. The first case historically is that of Saul (1 Sam.16.11), who, when he turned from the right pathway, was troubled by "an evil spirit from the Lord." In this case the disease was intermittent; the playing of David's psalms caused it to depart. The other cases may also note that the evil spirit is said to have been "from the Lord," but this may possibly be taken to imply that God had abandoned him to evil, rather than that there
was any direct sending of evil upon him (cf. Ac. 7.42; Ro. 1.28). When we come to N.T. we find a very different conception. No less than seven cases of diabolical spirit are alleged in the four gospels. These roughly divide into two classes. (1) We may take Mt. 15.22 as representative of those (probably the greater number) in which there is a direct statement that a person is possessed of a devil, but no indication of the symptoms. These we may dismiss immediately, as it is more than probable that the evangelist is simply using the phraseology of his time, and attributing a violent evil, the causes of which were unknown in his day, to diabolical possession. The controversy with regard to the story of the Gadarene swine has received more notice than it deserves. Archbishop Trench says it "is one of the chief stumbling-blocks in evangelical history," Dean Farrar that "we can gain nothing by speculating upon it"; and the combat between Mr. Gladstone and Prof. Huxley is in the memory of most. It is important to note what the Lord Jesus did for those who were possessed by evil, was immediate and definite, was markable. We may take Mk. 9.17 as a specimen case. Here the symptoms are entirely those of ordinary epilepsy [Madness], were it not for the remarkable phrase in ver. 25, "He rebuked the evil spirit, saying unto him, Thou dumb and deaf spirit." Hence the question arises, was our blessed Lord capable of speaking as though the youth were possessed by a devil, when as a matter of fact he was suffering from an ordinary disease? To say how far this question can be answered by the documentary evidence is, the "kenosis" is not within the province of this article; but the considerations that follow may partly remove the necessity. It is evident that it was customary to attribute anything incomprehensible to a possession of the devil from the fact that the Jews, whenever our Lord himself did anything which they regarded as inexplicable, were exceedingly ready to accuse him of such possession (see Mt. 11.18; Lu. 7.33, etc.). It is curious that beyond the gospels there is hardly a mention in N.T. of diabolical possession. The only definite cases are in Ac. 16.16, 19.12, 19.13. In the first we have a definite case of an evil spirit who is at once capable of knowledge and of special opposition to our Lord. Various explanations of the whole matter have been offered by different theologians. Of these the least feasible appears to be the commonplace theory that while evil spirits had their parables in gospels of times, these have since entirely ceased. Under what possible circumstances the laws of the spiritual world should be entirely re-modelled for a brief space it is hard to understand. The two arguments generally adduced in favour of this popular belief are, first, that the N.T. age was an age of miracle, and secondly, that it was aware of the symbolic activity. That a specially spiritual age is always a specially evil age is obvious from history and from reason alike, for it is reasonable to suppose that the powers of evil will be specially active when they are being most opposed. But to maintain, as some have done, that an age of miracle may be expected to be concurrent with an age of unaccustomed diabolical possession is as unreasonable as can be, for it presupposes that when this spirit of good is most active, then the powers of evil are given special facilities. It is surely much more reasonable to suppose that the common belief that the N.T. time was one of special manifestation of spiritual power (both good and evil) is incorrect, as affects kind though not degree. Naturally during the Incarnation of our blessed Lord, and the period that immediately followed that Incarnation, the power of God was more manifest in the world. But the Lord Jesus disclaims that He was doing anything more in the way of miracle than should be done by His followers (see Jn. 14.12). And tradition and history alike show that the age both of miracle and of diabolical activity by no means passed away with the Ascension or even with the death of the Lord Jesus. Mediaeval and mediaeval records, however much we may discount them as supposititious, cannot be altogether explained without some theory of extra-natural interposition, and, indeed, even now there are so many things undreamt of in our philosophy which yet occasionally happen that we would be bold who would dogmatize on the subject. To sum up: It is impossible to deny that there are cases of definite possession of a human body by a devil recorded in N.T. It is unreasonable to suppose that such possession is restricted to N.T. times. It is impossible to state when such possession ceased, but indeed that it has ceased at all. And finally, Science, while she offers no explanation of these occurrences, on the other hand, offers no definite contradiction of them, and we must wait for further elucidation till she has attained further knowledge. [R.J.]

Demonic Possession

Deposit

Deposit. The contract whereby one leaves with another movable property for
safe custody. (1) Of inanimate objects: in case of theft the thief was to make double restitution to the owner. (2) Of animals: in case of death, the innocent bystander is to make up the deposit: if the owner and the innocent bystander together were worth double the value of the deposit paid to the owner (Ex. 22.6-12[7-13]). (3) Of inanimate objects and animals: in case of dispute as to an injury, the judges tried the issue between the owner and the innocent bystander, and the unsuccessful party paid twice the value of the object to the other (Ps. 110.4, [5, 20]). (4) A repentant depositor who had acted wrongly might voluntarily purge himself by restoring the deposit plus one-fifth and bringing a guilt offering (Lev. 6.1-7[5, 20-26]). [Cf. Ex. 16.21-27]. For the position of the cistern see Ps. 110.4, [5, 20]. (5) A cistern is also a place for keeping a copy of the Pentateuch (Deut. 31.26). (6) A cistern is a place for keeping a copy of the Pentateuch (Deut. 31.26). [Cf. Ex. 16.21-27].

Derbe (Ac. 14.20, 21, 16.1, 20). The exact position of this town has not yet been ascertained, but it was in the E. of the great undulating plain of Lycaonia, which stretches from Iconium eastwards along the N. of the chain of Taurus, and near the place where the course of the river Lycoming changed to become the right bank of the Oligos (9). This change of course from the plain of Cicilia to the table-land of the interior; and probably it was a stage upon the great road which passed that way. Three sites have been suggested. (1) Col. Leake supposed it to be Bin-bir-Kilisseh, at the foot of the Qara Dejik, a remarkable volcanic mountain in the Lycean plain; but this is almost certainly the site of Lystra. (2) In Kiepert's Map, Derbe is marked farther to the E., at a spot where there are ruins, and in the line of a Roman road. (3) Hamilton and Tixier are disposed to place it at Divile, a little to the S.W. of (2) and nearer the roots of Taurus. The name is probably employed in Acts 14.6 to translate four Heb. terms. (1) גזרה [Arabah] (Ezk. 47.8), and without the Heb. article, Is. 35.1, 6, 40, 34.19, 51.3, Je. 2.6, 5, 6, mar. 17, 50.12. (2) midhāb. The usual translation is "wasteland," but "desert in Ex. 3.15, 19.2, Num. 33.15, 16, Deut. 32.20; Job 24.5; Is. 2.11; Je. 25.24. The midhāb often designates a plateau with grass in springtime, bare in summer. (3) ḥorāh (dry) is rendered "desert" in Ps. 102.6; Is. 48.21: Ezek. 13.4, but usually in A.V. "waste places" or "desolation." (4) ידיבון [Idiban], with the definite article. Without the article it occurs in a few passages of poetry rendered "desert" (Ps. 78.10, 106.14, Is. 43.19, 20). [C.R.C.]

Dessau (2 Mac. 14.16), a village (not "town"), where a battle appears to have been lost by Simon, brother of Judas Maccabeus. Excavations have been made by A. D. Sellin. [C.R.C.]

Dëuel, father of Eliasaph, the "captain" of the tribe of Gad at the numbering of the people at Sinai (Num. 1.11, 17, 42.17, 10.20). In 2.11 the name appears as Reuel, an interchange of two very similar Heb. letters. The LXX. has Kagenel in all cases.

Deuteronomy, the closing book of the law, or Pentateuch. It bears in Heb. the name d'borah ("words"), from the opening sentence. The Greek translator named it Deuteronomy ("second law"), a designation not entirely appropriate, as the laws which the books contain are, for the most part, not new, but a repetition or recapitulation (with enforcement) of "statutes and judgments" already given. The book, in its main part, consists of three hortatory discourses, purporting to have been delivered by Moses in the Arabah of Moab ("that is," the R.V. explains, "the deep valley recurring north and south of the Dead Sea"), in the eleventh month of the fortieth year of the wanderings of Israel (1.3), shortly before his own death. The discourses, couched in a strain of eloquent and affectionate admonition and appeal, recall the great deeds of God in the history of the nation, and the longest of them embraces a rehearsal (12-26) of the principal laws given by God to Moses at Horeb, as these were to be observed by the people in their settlement in Canaan. The three addresses are interlocked with a brief introductory discursive narrative, some connecting notes, and appended to them are Moses' Song and Blessing, and a narrative of his death on mount Nebo.—Contents. The general introduction states the time and place of the delivery of the discourses (1.1-5). Then (1) 1.6-4.40 contain the first discourse of Moses. The earlier parts of this discourse, which contain the historical circumstances up to the time when the address was given, and 4.1-40 is an earnest, practical appeal. Subjoined to this address is a short account of the appointment of three cities of refuge E. of the Jordan (4.41-43). (2) After an introduction (4.44-49), 5-26 record the second and longest discourse of Moses. This consists of (a) a recital of the Decalogue, and exhortations based thereupon, relating to the fundamental theological principles by which the nation was to be guided (5-11); and (b) a summary of the principal laws. The laws dealt with are those mainly concerning those with whom they were made in the Book of the Covenant (Ex. 20-23). They are reproduced, not literally, but in the form of popular address, with occasional expansion, abbreviation, or modification, as the occasion required (Deut. 12-26). A brief historical notice is interpolated in 10.6-7. (3) 27-29.1 may be a conclusion to the preceding discourse, or may, perhaps better, be regarded as introductory to, and prefacing the third discourse, which properly begins in 29.2, Ch. 27 gives directions for the inscribing of the law on great stones on mount Ebal, and for blessings and cursings on mountains Gerizim and Ebal respectively; and 28 solemnly explains the meaning of the blessing, and, with terrible emphasis, of the curse. A concluding discourse follows (29.2-30), embracing a promise of restoration on repentance (30.1-10). The people are exhorted to choose between life and death (30.11-20). (4) Ch. 31 narrates certain transactions of Moses consequent on these addresses—his farewell to the people and commission of Joshua, and specially his writing out of the law and delivery of it to the priests (31.1-5, 21-27); then his writing of his Song by divine direction (31.16-23, 28-40). Ch. 32 gives
the Song, and ch. 33 the Blessing of Moses. Ch. 34 recounts the circumstances of Moses' death, and ends with a eulogium upon him.—Deuteronomy has a unity of purpose and uniformity of character and style which place it by itself among the books of the Pentateuch, with which, nevertheless, it is both in history and laws, it is closely connected. The style has the elevated, rhetorical, expansive character appropriate to hortatory address, and is marked by many peculiar expressions (e.g. "observe to do," "that it may be well with thee," "as it is this day," "a peculiar people," "love" of God, etc. The long lists usually given as requiring careful sifting. Critics distinguish it, in contrast with the styles of the so-called P and JE, by the symbol D. It has nearest affinity to the Jehovistic (J) style (cf. Gen. 26:5; Ex. 13:3-16, 15:26, 19:3-6, parts of 20:23, 20:23, 34:10-26); but even the priestly (P) style sometimes takes on a Deuteronomistic character (e.g. Deut. 29:20). Other places are the P and JE writers thought to be discerned in Deuteronomy. Ch. 32:8-52, 34:1-9, are ascribed to P; and 27:5-7 (groundlessly), 31:14-22, 34:10 are presumed to be extracts from J. (On this nomenclature, see PENTATEUCH.) So well marked is the style of Deuteronomy, that till recent times the unity of the book was regarded as one of the settled results of criticism. Dr. Driver points out how "particular words and phrases, consisting sometimes of entire clauses, recur with extraordinary frequency, giving a distinctive colouring to every part of the work" (Deut. p. lxxvii). Criticism has therefore long been go ing on without much agreement in results. Some think the original law-book (attributed to the age of Josiah) consisted only of 12-26 (Wellhausen, etc.). Some enlarge its contents to 5-26 (e.g. Kuenen, who also gives ch. 28 to D); while others reduce the kernel to 12-19, and explain the present extent of the book as the result of the labours of a "school" extending down beyond the Babylonian captivity (Oxford Hexateuch). Latterly a new theory has been propounded, which, discounting the division into "hortatory" and "legislative" parts, proposes to divide into sections marked by the use of "theo-moral" (GH) and "legal" language, the use of the plural personal (Pl.). (Thus Steuernagel, etc.) To this arbitrary theorizing and disintegration the unmistakable unity of style and phraseology of the book furnish an all-sufficient reply. Taken as a whole, no book bears upon itself more clearly the marks of unity of authorship than Deuteronomy. With the unity of the book goes the quest of its age and authorship stands in close connexion. That the book itself claims Mosaic authorship can hardly be disputed. The discourses are declared, apparently in good faith, to have been delivered by Moses, in the plains of Moab, to assembled Israel a short time before his death. It is further expressly attested that "the Mosaic law was not written by the sons of Levi. . . . When Moses had made an end of writing the words of this law in a book until they were finished, Moses commanded the Levites, saying, Take this book of the law, and put it by the side of the ark" (31:9, 24-26. Cf. 17:18; Jos. 1:7, 8, 24:26; 2 K. 14:5, 6). Moses is said also to have written his Song (31:19, 22), and presumably it is intended that the Blessing (33) was written by him also. It is granted at once that the expression "this law" cannot be pressed beyond Deuteronomy; but there is no reason for supposing that it does not include the hortatory as well as the legislative parts of Deuteronomy (cf. 1.5, where the expression plainly applies to all that follows). There is still the question, which is in itself a fair one, whether our present book of Deuteronomy corresponds precisely to the "law" which Moses wrote, or may not be regarded as an inspired reproduction of it, requiring briefer notes of the lawgiver (thus Delitzsch, etc.). The possibility cannot be denied: but there seems no reason why Moses should not have given the requisite literary form to his own addresses. The intensely earnest personal note in the discourses speaks to their first-hand origin. Nevertheless, the hypothetical writer, who came to the discovery of "the book of the law" in the reign of Josiah (2 K. 22), we find reason to conclude that the book then found in the temple was, or at least included, the book of Deuteronomy; and there can be no doubt at all that the book then recovered was already old, and was taken for the "Deuteronomy" when the prophet Josiah (Hilkiah, Shaphan, the king, Huldah the prophetess, the people) to be a genuine book of the law of Moses (2 K. 22, 8, 23, 2, 24, 25). The provisions of the book conflicted with a multitude of interests. It was unsparing in its condemnation of idolatries and other practices of the time (2 K. 22, 13, 16, 17); yet no one then, or after, concerned with its publication, in someLatitude elaborated form of claim to be a true Mosaic work. The alternative supposition, adopted by leading critics, that the work was a "pious fraud"—a deliberate deception practised by Hilkiah and his circle on the king—can only be indignantly repelled. But if the book, in accordance with its claim, was universally accepted as a true Mosaic work, then, to what period, short of the age of Moses, can its origin be attributed? When the contents of the book are examined, they are found, in a multitude of respects, to corroborate its claim to an early and Mosaic origin. Not to speak of linguistic peculiarities in this, as in other books of the Old Testament, the most significant of such is the use of "archaism"); it has often been pointed out that many of the laws in Deut. are quite unsuitable to the times of Josiah, and that many more had no possible bearing on the assumed aim of the book—the centralization of worship and putting down of high places in Josiah's reign. Such are the universality for the destruction of the Canaanites (Deut. 7:1-6, 20:10-18) and of the Amalekites (25:17-19), laws for the camp (23:2-9), the warnings against choosing a foreigner for a king, and causing to return to Egypt (17. 15, 16), etc. In the same direction point the impression constantly given of the succinctness of the deliverance from Pharaoh, and the numerous references to Egypt (except the diseases, wheat, agriculture, threatening of Egypt as a punishment, 26.27, 60, 68, etc.), and even the command to write the law on stones on mount Ebal, and the blessings and cursings on Gerizim and Ebal. There is no mention in Deuteronomy of the "high places" of Josiah's age, and the assumption that the "Levites" for whom provision is
made in 18.6-8 are the "disestablished priests" of these high places is without a shadow of evidence. The book pronounced a very different sentence on leaders in idolatry (15). This pronouncement of the author of the book of Deuteronomy can only be over- turned by the adducing of the strongest proofs to the contrary. Among such proofs cannot be reckoned the objection that the book represents too advanced a stage of literary composition for the age of Moses, for this begs the very question which the literary capabilities of a leader like Moses. Writing was familiar to one trained in Egypt. [PENTATEUCH.] Nor is it a cogent argument that the last chapter of the book narrates the death of Moses. No one now holds that Moses wrote the narrative of his own death in ch. 34; but this only shows, what on other grounds it is reasonable to assume, that the book underwent editing and completion by other hands. Probably the framework and certain annotations in the body of the work are due to such editing. Nor, again, is it decisive of non-Mosaic authorship that Moses is said (1.45) to have delivered his addresses "from Mount Paran" (RV "beyond Jordan"). Besides the local usage, determined by the position of the speaker, generally with some defining phrase to show which side was meant (4.41, 46, 49, 11.30), "the other side Jordan" was a geographical expression for the Moabite side of the river; hence could have been used by Moses himself, while speaking on that side (3.8). If the framework is due to later editing, the objection disappears altogether. The critics are very confident that Deuteronomy can be shown to be of earlier date than the Levitical law. Neither in the historical references nor in the laws, it is argued, is the priestly code recognized. The older critical writers, with more reason, were convinced of the very opposite of this, that Deut. did presuppose the priestly history and laws. As points of contact with the P history may be mentioned, the allusion to the creation narrative in 4.32 (cf. Gen.1.27), to "seventy" as the number to be brought to Egypt (18.6), to "twelve" as the number of the spies (1.23), to Moses and Aaron being debarred from Canaan as a punishment (1.37, 3.26, 4.21), etc.—all only in P; with many special words and phrases, as "horses and chariots," "hard bondage," "stretched-out arm," etc. (4.31, 11.4, 26.6). On laws, see PENTATEUCH. A special case of alleged difference is the occurrence in Deuteronomy of the phrase "the priests the Levites," and the non-recognition of the distinction in the other books between the "priests," the sons of Aaron, and the "Levites" as ministers to the priests. It may be sufficient here to point out that while, in Deuteronomy, an Aaronic priesthood and distinctions within the tribe of Levi are implied (10.6, 18.1-8), it was natural, after the separation of the tribe, that, in popular address, the whole tribe should be spoken of, in distinction from the people, as, collectively, a priestly tribe. The language used in Deuteronomy supplies the day, in period when the earlier designation, "sons of Aaron," was being gradually dropped for another identifying the priests more directly with their tribe. In truth, however, the phrase "priests and Levites" is as little found in the other books as in Deuteronomy; and in Leviticus itself the "Levites" are practically ignored. [LEVITICUS.] Occasionally, the term "Levites" is used as a mark of distinction, as of priests and Levites (Num.35.2, 6, 8). A principal argument for the late date of the book is that the law of the unity of the sanctuary in Deut. 12 is apparently unknown in the earlier history, and is opposed to the older JE law of Ex. 20.24, which permits sacrifices to be offered without rest, return to the place. There is, however, misapprehension here of both the law in Exodus and the law in Deuteronomy. The ideal of one sanctuary is present from the first (Ex. 23.14-19), and the law in Deuteronomy was not intended to take full effect till the Lord had given the people rest from their enemies (12.10). Many of the sacrifices instanced as breaches of this law were sanctioned by theophanies, and others (as in the case of Samuel) belong to a period of religious disorganization. How far Deuteronomy is from contradicting Ex. 20.24 is seen from its own command to erect an altar in the precise terms of that law (Deut. 12.5-7). On dates, the slightest discrepancies between the historical notices in Deut. and those of the earlier books, and from like discrepancies between the laws in the different codes. Most of the historical contradictions are far-fetched and unreal, and the discrepancies of laws, though sometimes occurring, may be explained away. The tithe-laws in Deuteronomy, in particular, present a different aspect from those in the Levitical Code. The Jews themselves resolved the difficulty by the supposition of a "second" tithe for purposes of charity; while the Levitical provision seems clearly presupposed in 18.2 (cf. Num.18.20-24). The very freedom used by the author in his handling of the laws points to the original law-giver, as alone entitled to use this liberty. [Law 18 O.T.] With Delitzsch we may hold that "nothing necessitates us to deny the Song [Deut. 32] to Moses"; and, if the spirit of prophecy be admitted, the whole Deut. is ascribed to Moses (33). The general argument for the early date of Deut. is strengthened by a study of the prophetic writings, which appear in many ways to show acquaintance with the ideas and phraseology of the book. This is true of both Amos and Hosea. Cf., etc., Am.4.6-16, 5.11 with Deut. 28.15f.; Am.6.12 with Deut.29.18; Am.9.14, 15 with Deut.30.3f.; Ho.5.10 with Deut.19.14, 27.17; Ho.8.1 with Deut.28.68; Ho.12.13 with Deut.18.18, 34.10, etc. Driver, Deut.; Alexander, Deut., in Pulpit Comm.; Möller, Are the Critics Right? Deut., in Speaker's Comm.; and see PENTATEUCH. [SANTAN; DEMON; DEMONICAL POSSESSION.]

**Dew.** [SANTAN; DEMON; DEMONICAL POSSESSION.]

This is so copious in summer in Palestine that it supplies to some extent the absence of rain (Ezech.18.10, 43.22), and becomes important to the agriculturist. An instance of this copiousness is the well-known sign of Gideon (Judg.10.7ff.). Thus as a prime source of fertility it is regarded as a divine blessing (Gen.27.28; Deut.33.13; Zech.8.12), and its withdrawal as a curse (2Sam.1.21; 1K.17.1; Hag.1.10). It is a frequent poetical image for
DIADEM

that which is gentle, penetrating, and refreshing (Deut.32:2; Job 29:19; Ps.133:3; Prov.19:12; Is.26:19; Ho.14:5; Mi.5:7), or is a sign of night-exposure (Can.5:2; Dan.4.15ff.5:21); while the speedy evanescence of the early dew typifies the transient goodness of the hypocrite (Ho.6,4.13).

Diadem. The Gk. διαδέρμα signifies properly a badge of royalty, and was used originally to describe the silken fillet, which was fastened around the turban of the Persian kings (Xen. 8 Cyr. iii. 13). Thus LXX. uses the word to describe the crown of Vashti (Esth.1.11) and of Esther (2.17), and also the distinctive decoration of the head, which was worn by the successors of Alexander as a token of their assumption of sovereignty (1Mac.1.9,13.32). This strict use of the word is, however, not always observed by LXX., which describes Mordecai's robe of honour by the same term (Esth.8.15). In N.T. the Gk. accurately distinguishes between διαδέρμα, the symbol of sovereignty, and στέφανος, the festal wreath. [CROWN.] The former occurs in N.T. in Rev. only, where it is used for the royal dominions of the exalted Christ on the one hand (Rev.19.12) and of "the dragon" (12.3) and "the beast" (13.1) on the other. This distinction, which A.V. failed to mark, has been brought out by R.V. (cf. Trench. N.T. Syn. xxiii.). [J.C.V.D.]

Dial (Heb. ma'âlah, "steps"); 2K.20.11; Is.38.8; see marg. A.V. "degrees," R.V. "steps"). The word is also rendered in the same passages by "degrees" (2K.20.9,10; Is.38.8). Cyril of Alexandria and Jerome supposed the length of the shadow on a flight of steps to be intended. A Kassite boundary stone of 11th cent. B.C. (De Morgan, Fouilles à Suse, 1897-1899, ii. p. 110) represents (apparently as an emblem of the spring equinox) the segment of a circle divided into degrees; and sun-dials were thus probably in use as early as the 8th cent. B.C. [C.R.C.]

Diamond (Heb. yakhalom), a precious stone, the third in the second row on the breast-plate of the high-priest (Ex.28.18.39.11), and one of the precious stones of the king of Tyre (Ezk.28.13). Our translation, "diamond," is derived from Eben Ezra, and defended by R.C.H. Kalisch says, "perhaps emerald." It is practically certain that Pliny described the diamond as one kind of adamant, but very improbable that the gem should have been known in the countries bordering the Mediterranean before the days of Alexander the Great. At any rate, it is not likely to have been available for the high-priest's breast-plate at the time that was made. That it should have been engraved may be pronounced impossible. The art of diamond cutting is hardly older than the 15th cent. in Europe, though it may be of more ancient date and independent discovery in India. For šâdmûr, translated "diamond" in Je.17.1, see ADAMANT.

Diana, a Roman goddess, regarded as identical with Artemis. In Asia there was an early indigenous deity to whom the Gk. settlers ascribed some of the characteristics of their own Artemis. She was, however, in the cult which had its highest development at Ephesus (where she was her famous temple, the Artemision), scarcely, if at all, a lunar deity, but a goddess who presided over generation and the procreative energy of mother earth. The traditional form of the image referred to in Ac.19 is preserved on Ephesian coins.

DIABLA'IM, father (or mother) of Hosea's wife Gomer (Ho.1.3). Dibalh (R.V. Dibalh; Ezk.6.14 only). "From the wilderness towards Dibalh" may refer to Beth-dibalhaim, but four MSS. read Kibalh, a town which has a wilderness to its E. Dibl in Upper Galilee is in a rugged region, but not in or near the wilderness. [C.R.C.]

Dibon, Dibon-gad—l. A chief city of Moab immediately N. of the Arnon gorge. Now the ruined town Dibban, where the "Moabite Stone" was found by Rev. F. Klein on August 19, 1868. The city is first noticed in the Amorite song of triumph (Num.21.29), but though it was rebuilt by men of Gad (32.34). As Dibon, it is the next stage N. of 1M (33.45) in the region given to Reuben (Jos.13.9,17), but held by Moabites after about 890 B.C. (Is.15.2; Je.48.15.22). The Moabite Stone, erected by king Mesha (see 2K.1.1.3.4-27) about the
same date, records the beginning of the retreat of Israel from Medeba even in Ahab's reign, and the final Moabitite triumph over all the plateau to Jumaz—as to which Mesha says, "I took it, that I might add it to Dibon."—2 Chr.11.25.

Dibnah, a Daniel, father of Stelomith, I Lev.24.11.

Didrachm. [Money; Shekel.]

Didymus (the twin), the Gk. translation of Aram. tēma = Thomas (Jn.11.10, 20.21, 21.2).

Dilkah (Gen.10.27; 1 Chr.1.21), a son of Joktan, whose settlements, as those of the other sons of Joktan, must be looked for in Arabia. The Heb. signifies "a palm-tree," hence perhaps Dilkah is a part of Arabia containing many palm-trees.

Dilean, one of the cities in the lowlands of Judah (Jos.15.38). An unknown site. [c.r.c.]

Dimnah (Jos.21.35). Apparently for the Dimnah of Num.32.34, a city in the S. of Judah (Jos.15.22). Not Dimnah the city (2 Chr.34.1), where Manasseh the son of Josiah was buried. It is probably the Dinna of Dan 11.25.

Dinar, the daughter of Jacob by Leah (Gen.30.21). She accompanied her father from Mesopotamia to Canaan, and, going "to see the daughters of the land," was violated by Shechem, son of Hamor the chieftain of the territory (Gen.31.3). Her age at this time, perhaps demand of a condition of the proposed union, may have been from 13 to 15, the ordinary period of marriage in Eastern countries. Shechem proposed to make the usual separation by paying a sum to the father and marrying her (Gen.31.12). But the crown of the offence consisted in its having been brought by an alien against a favoured people of God: he had "wronged folly in Israel" (31.7). Hamor, who acted as his deputy, proposed the fusion of the two peoples by intermarriage and commerce. The sons of Jacob availed themselves of the eagerness of Shechem to effect their revenge; they demanded, as a condition of the proposed union, the circumcision of the Shechemites. The latter assented: and on the third day, when the pain and fever resulting from the operation were at the highest, Simeon and Levi, own brothers to Dinah as Josephus observes, attacked them unexpectedly, slew all the males and plundered their city. Jacob expressed abhorrence of this act both at the time and on his death-bed (Gen.31.30, 49.5-7).

Dinaites, mentioned in the letter of Rehmon, the chancellor (Ezr.4.9), among the inhabitants settled in the cities of Samaria by "the great and noble Asnapper." Cheyne, however, thinks that it is not properly an ethnic name, but that the LXX. rightly renders it "judges," from the root ḫāb. He considers the word to be a transliteration of the Persian title dābahar. The Dinaites have been identified with various peoples bearing somewhat similar names. [R.C.C.]

Dinhabah (Gen.36.32; 1 Chr.1.41), perhaps Dibnah in N. Edom. [Euseb.] [C.R.C.]

DISCIPLES

Dionysia (in Latin, Bathchanaia), the feast of Dionysus or Bacchus. In 2 Mac.14.33 Nicanor threatened to destroy the temple in Jerusalem and erect "a temple unto Dionysus for all to see;" and in an earlier chapter (6.7) Antiochus enjoined that, when the Dionysia came, the Jews were "to go in procession in honour of Dionysus, wearing wreaths of ivy." Dionysus was the god of wine, and his worship, which had many Eastern features, was a blend of orgies and mysticism. In the Hellenic cult there were four Dionysia—the rural, the Lenaean, the Anthesterian, the urban festivals. The first and second are associated with the origin respectively of Gk. comedy and Gk. tragedy. The festival, especially in later times, was celebrated with wild extravagance and licentious enthusiasm. Macedonians—male and female worshippers—crowned with ivy and bearing the thyrsus, went in procession. In 186 B.C. they burned senate for the Bacchanalia; but, notwithstanding, Antiochus (see above), in 168 B.C., enjoined its observance on the Jews. [A.R.]

Dionysius, a member of the council of Areopagus, converted by St. Paul (Acts 17.34). There is early evidence for his having been mistaken for the master of the Cretan Dionysia, held at Athens (Euseb. H.E. iii. 4). He is not identical with Dionysius of Paris (St. Denis), who lived in the 3rd cent. nor was he the author of the celebrated theological treatises current under his name, which are first mentioned in 6th cent. [E.R.E.]

Dionysius (Dionysia).

Diotrephes. His refusal of hospitality to certain traveling evangelists (3 John.10) led to the writing of that epistle to Gaius. [E.R.B.]

Disciples. Only once in O.T. (Is.8.16, ἐὰν διδάσκωται μνή, I.X.X.). Very frequent in N.T. (μαθητής, μαθητῆς, μαθητήρ, of Tabitha, Ac.9.36), in Gospels and Acts only. As in classical Greek, a disciple is a learner or follower and not a pupil (e.g. in the New Testament). It is used (1) of the followers or pupils of Christ other than Christ. e.g. Moses (Jn.9.28), John the Baptist (Mt.9.11,11.2), Pharisees (Mk. 2.18). When used of the personal followers of our Lord, it is often (2) equivalent to "apostles"—thus the Twelve are often called the disciples (Mt.28.18) or the twelve (or eleven) disciples (Mt.28.16; Lk.9.1). [Apostle.] Often (3) it includes a wider circle of personal adherents (Jn.6.60,66, e.g. Joseph of Arimathaea (19.38); not seldom it is difficult or impossible to decide precisely between (2) and (3). After the Ascension the word is used constantly in Acts as (4) equivalent to Christian, where the disciple was not a personal follower of Jesus in His lifetime, e.g. Timothy (Ac.16.1), Mnaon (21.10). Once it is even used of men "baptized into John's baptism" (Ac.19.1-3), unless there where the word is used periphrastically, in N.T. times the word seems to be disused except historically. [C.C.T.]
**DISPERSION, THE JEWS OF THE**

The Jews asked whether our Lord spoke of going "unto the Dispersion among the Greeks" (Jn.7:35), and St. Peter writes to the "sojourners of the Dispersion" (1Pe.1:1, R.V.). At the beginning of the Christian era the Diaspora was divided into three main groups—Babylonia, Egypt, and Asia Minor. (1) **Babylonia.** This ranked highest in the esteem of the Jews. It was the oldest, since it represented the large community of wealthy Jews who declined to return with Ezra to the desolated city of their fathers. It was nearest to Jerusalem, and was the first to receive official communications from the Sanhedrin. There was also the bond of a common language, Aramaic. Alexander the Great confirmed all their former privileges (11 Ant. viii. 5). It was through them that Zoroastrian influences passed into the religion of the Jews. After the destruction of Jerusalem, Babylonia was the spiritual centre of Judaism for several centuries. Its academies were famous, and it was the seat of the prince of the Diaspora. (2) **Egypt.** In many respects the most important group of the Diaspora was that in Alexandria, reaching out along the African shore of the Mediterranean, and as far S. as Ethiopia. There were Jewish settlers in Egypt at an early date (Je.41.17, 43-7), but it was under Alexander that the colony was permanently founded. He placed 8,000 Jewish soldiers in the Theban garrison. Its first four wards of the new city Alexandria to the Jews. His successor continued the same policy of placing Jews in Egypt, and Philo estimated their number at not less than one million. About 160 B.C. Onias, a priest of Aramaic descent, built a temple at Leontopolis in imitation of the one in Jerusalem. They were citizens possessing full rights, and ecclesiastical affairs were controlled by a Gerousia of 70 members and an ethnarch, subject only to the Great Sanhedrin in Jerusalem. This community is due the Gk. translation of the O.T., a number of apocryphal writings, the Greek Jewish philosophy. (3) **Asia Minor, etc.** Large communities of Jews existed in all the countries of the Orient (Philo, Legatio ad Caesar, § 36), fresh evidence of which is being constantly brought to light. During the 3rd and 2nd cents. B.C. great numbers of Jews were sold into slavery and were subsequently redeemed by their co-religionists. When freed, they usually settled in the places where they were living at the time, and so formed new communities. So long as the temple stood, the Jews of the Diaspora looked to Jerusalem as the centre of religious life. They made pilgrimages to the holy city (Ac.2:5-11), and sent large contributions for the temple service. The Dispersion prepared the way for the spread of Christianity, not because the Jews were indifferent to the claims of their religion and more disposed to new teaching—the experiences of the Apostles on their missionary journeys and the spread of proselytism as the result of their proselytizing efforts. There were proselytes in large numbers in every country of the Dispersion—St. Paul found them in Antioch, Thyatira, Thessa-
DIVINATION

Divination may be said to run through all the history recorded in the Bible, until and including the casting of lots, for a successor Judas Iscariot (Ac.1.24), as a method, permitted and encouraged, of "inquiring of the Lord." Within the covenant, no less than without it, the worshipper sought (in the crises of his life) guidance from the Deity, and this guidance was vouchsafed in various ways. The three most important methods, of the wizards, out of the land, "There with every teraphim которого the nation casting lots on behalf of its civil head; and the prophet's function was to supplant the ordinary channels of divine government by extraumen interpositions—when the priesthood failed in the sons of Eli, Samuel is raised up to be prophet; when David falls into sin he is reproved by the prophets Nathan (2Sam.12.1-14) and Gad (2Sam.24.13), who indicate punishments impending. All other forms of divination were alien to the spirit of the covenant (Deut.18.10, 11; cf. "Saul had put away those that had familiar spirits, and the wizards, out of the land," [1Sam.28.3; Is.8.19], and indicated, when used by the covenant people, sympathy with idolatry. Such forms are divination by a cup (Gen.44.5), rods (No.4.12), arrows, the liver, and teraphim (Ezk.21.21; 1Sam.15.23; Zech.10.2). There were also oracles (2K.1.2-6), possibly at every prophet (Ism.8.18). Divination by means of birds had itself been designated the "oracle" (1K.6.16; Ps.28.2). There was a professional class of diviners, varieties within which were those whose interiority was manifested when compared with Joseph (Gen.41.8,39), Moses (Ex.7.11,12), Daniel (5.11). Their methods included converse with the dead (Lev.20.6; Is.19.3) and serpent charming (Job.8.17), as well as the muttering of formulae (2K.22.2; Mi.5.12, etc.). Balaam, in his resistance to God, had recourse to "enchantments" (Num.24.1), and there are frequent references in the Acts to the conflict between the apostles and various persons professing to draw influence (Lev.8.9). Bar-Jesus (13.6,8), the slave-girl at Philippi (16.16), the vagabond Jew exorcists and other dealers in magic at Ephesus (19.13,19; 2Tim.3.8,13; [Magic; [C.R.D.B.]].

Divinity of Christ. [Incarnation; John, Gospel of].

Divorce. Our Lord indicates that divorce was not admissible in the original institution of marriage as given by God in the time of man's innocence. "From the beginning it was not so" (Mt.19.8). After the Fall, it appears, from the earliest laws and records of peoples, that divorce must have become very general. It was conceded by the regulation of Deut.24.1-4 to the Israelites. It was then no doubt the permission of an existing practice, not easily of removal: "Moses, because of the hardness of your hearts, suffered you to put away your wives" (Mt.19.8). The groundwork of divorce assigned was "eruth ὀδηγών (A.V.; "some unseemly thing," R.V.) some unseemly thing." LXX. ἀρχωμ ἀργατως). The later schools of Jewish doctors were at variance as to the meaning of the expression. The school of Hillel extended it to include trifling causes—e.g. if the wife burnt the food she was cooking for her husband. The question addressed to our Lord by the Pharisees (Mt.19.3) may refer to this difference. The husband, by the law of Deut., was to write the wife "a bill [or, book] of divorcement, and give it in her hand, and send her out of his house." (Deut.24.1). She might then marry again. After such a marriage, her remarriage, after the former death or divorce, the former husband might not take her back. The law of Deuteronomy thus (a) required a ground of divorce, (b) prescribed a formal bill of divorcement, and (c) practically made the act irrevocable. In all this the legislation was doubtless in the direction of resisting the most acute crises, and the marriage law might be strengthened or modified in the future. Thus in the Apocrypha, e.g. Tobit 3.18, Tobit's brother may not remarry his wife: "Thou mayest not take her again in marriage, for she is divorced, and she isArduino's wife and cannot be put away: the reason is she was unfaithful in the marriage, and that thou hast not found another woman." In this passage our Lord permits a man to put away his wife, let him give her a writing of divorcement. But I say unto you, That whosoever shall put away his wife, and marry another, causeth him to commit adultery; if she marry another, causeth her to commit adultery; and whosoever shall marry her that is divorced commit adultery" (Mt.5.31). In this passage our Lord permits a man to put away his wife for the one cause of fornication (πορνεία). There is, however, no expressed sanction of the remarriage of the man, even in this case; but while this is permitted, the woman is not permitted to marry again. One passage (Mt.19.9) is very commonly quoted as giving sanction to the remarriage of the man in the one allowed case of putting away: "Whosoever shall put away his wife, except it be for fornication, and shall marry another, commitadultery; and whosoever marrieth her which is put away after she is married, both commit adultery." This is the reading of the Textus Receptus; but the extant MSS., as also the Versions and Fathers, show here great variations. omits and shall marry another, and reads "whosoever shall put away his wife, saving for the cause of fornication, causeth him to commit adultery; supposing the Textus Receptus to give the true reading, various explanations have been given of it. (1) Keble supposed the verse intended for Christ's Jewish hearers, and not for His own followers. (2) Von Dissing regarded the specified exception πορνεία as meaning not adultery, but pre-marital uncleanness. (3) Others regard the specified exception as to be read only with shall put away, and not with shall marry another. (4) Others understand the remarriage of the man in this case to be allowed. Those who adopt this view have to meet the difficulty arising from the second half of the verse, "he that marrieth
a woman put away committed adultery." The marriage bond, if it exist at all, exists for both husband and wife; and if the woman be not free, it seems to follow that the man also must be bound. The passage in Mt. 19 is the only passage in the gospels in which any support for remarriage after divorce can be thought to be found. Other passages bearing on divorce are Mk.10.2–12; Lu.16.18; Ro.7.1–4; 1Cor.7.; 1Tim.5.10. The New Testament history claimed that Christ taught the entire indissolubility of marriage; while the Eastern Church has in practice admitted divorce for a variety of causes. For Bibliography, see MARRIAGE. [C.R.C.]

Dizahab, a place in the desert, mentioned (Dent.1:1) as one limit of the 40 years' wanderings in the desert. Robinson indentified it with Dhabah, a cape on the W. shore of the gulf of 'Agaba. The Heb. may mean "place of gold"—in Arabic Dhabah, vulgarly pronounced Dhabah. Gold has been found in this region. [C.R.C.]

Doctrines. [RABB.] Doctrine is used in N.T. to translate both δόασχα and δωσάσκαλα, though in Tit.1.9 Hort translates "holding fast by the word which is faithful according to the teaching (δοασχα—δωσάσκαλα) that he may be able both to exhort in the doctrine (δωσάσκαλα) that is healthful and to convict the gainsayers" (The Christian Eccles., p. 191). Thus the "teaching" would be that of Christian principles of morality and religion, and the "doctrine" would include exhortation which is sound, not (like Rabbinical teaching) concerned with trifles, and uttered in a spirit of narrow exclusiveness. We may contrast with it dogma, which is used in N.T. of a decree issued by those in authority (Lu.2.1; Ac.17.7; of Moses, Heb.11.23; Eph.2.15; Col.2.14; of apostles, Ac.16.4). It represents an authoritative exposition of a doctrine when reflection has drawn out all that can be discerned in it. We must always remember, however, that Christianity did not come into the world as a system of doctrine but as a Life. That system of doctrine, exhortation and imposed by authority, is in exact proportion to its moral motive power. It was the men who had lived with Christ who taught other men to worship Him. It was their experience of His goodness which led them to set such store by His words. So it came to pass that reflection followed experience, and characteristic doctrines of Christians about God and man, and the true relations between God and man, grew into shape as a system of thought in N.T., but based on that common agreement of mind among all the saints to which N.T. bears satisfactorily testimony—the more precious very often because it is incidental. Precisely in the same way as the apostles' teaching was commended to the consciences of men by the beauty of holiness in their fellowship, so their earnestness in exhortation gave moral influence to their decisions on questions of truth (1Tim.4.1; 2Tim.1.15; 6.17) on which the apostles were agreed, though it was not yet summarized in any fixed form of words, included the true doctrine of God, the life and work of Christ, and the revelation of the Holy Spirit. Preaching to Gentiles, they began with the doctrine of the true God, in opposition to the multitude of goddesses. Preaching to Jews, they found a common basis of faith in the God of their fathers, and proceeded at once, as indeed when preaching to Gentiles, to speak of Jesus as the Messiah—crucified, risen, exalted; of the gift of the Spirit; of baptism for the remission of sins. The New Testament form of the creed in N.T. is the confession of Jesus as the Lord, as the Son of God (Ro.10.9; 1Cor.12.3; 1Jn.4.15). This is supported by the confession put on the lips of the eunuch in Ac.8.37: "I believe that Jesus is the Son of God." This is found only in the Western text, and has been a teaching of the form of this reading was known to Irenaeus, and probably the form of Baptismal Creed in the Church of Asia Minor, from which Irenaeus drew his tradition. Attempts to find a longer form in St. Paul's epistles, e.g. 1Tim.6.13, break down. The reference to a beautiful confession to which Christ Jesus is the witness before Pilate, is probably to the Lord's command that he should say he was a king (Jn.18.36). This would imply that Pilate was mentioned in St. Paul's teaching, but not necessarily in his creed. There is a reference to the Holy Ghost in the context of 2Tim.1.14; but the majority of creed-like passages have nothing which in any way corresponds to the third division of the Apostles' Creed. At the same time, St. Paul's belief both in the Personality and the Divinity of the Holy Ghost was as definite as his belief in Christ as Risen. We find the seed-thoughts which ripen into the later creed-forms, and should be therewith content. There are other set types of teaching—in the form of a Chronicle (Mk.16.16, with proofs (1Cor.15.37); almost recte conflict, typet catechetical answers to questions (1Pep.3.18ff.); fragments of primitive hymns (1Tim.3.16). But these show the freedom of utterance consistent with precise agreement on fundamental facts of spiritual experience, "the grace of God that bringeth salvation, and the faith of God, and the fellowship of the Holy Ghost" (2Cor.13.14). Again be it said, it was the moral motive power of such experience which attracted men, so that the words of the apostles were with power, and their decisions obtained the binding force which the consciences of many generations have been glad to acknowledge. J. F. Bethune Baker, Introd. to Early Hist. of Christian Doctrine (1903); A. E. Burn, The Apostles' Creed (1907). [A. E. B.]

Do'cus, a "little hold" near Jericho (1Mac.16.15, cf. ver. 13) built by Pilomeny the son of Abubus. The name still remains attached to the copious and excellent springs of 'Ein-Dukh, which bursts forth at the foot of the mountain of Quaranitania (Quir'ntal), N. of Jericho. [C.R.C.]

Dodal. [Dodo, 2.]

Dodanim (plur. form), a people belonging to the family of Japheth, the sons of Javan (Gen.10.4; rChr.1.7; Heb. rodan'm in rChr.1.7, and Sam. Pent. in both places). The Gk. is derived from δωδανιμ (Dodanim), the short poll of the Rhodians, i.e. the inhabitants of that island and its dependencies, may well be meant, in view of its importance. The city, however,
was only founded in 408 B.C. Assuming the Massoretic reading in Gen. to be correct, it has been inferred that dodanim is a form of Durdanan. The name Durdan, as inscriptions of Ramses II (218 B.C.) show, comes from early times, and designates a people of Asia Minor not far from the Lyceans. [f.j.f.-f.j.]

Dodavah', a man of Mareshah, father of Elizer, 6 (2Chr.20.37). Jewish tradition makes him the son of Jehoshaphat.

Dodo — 1. A man of Bethelhem, father of Eliezer, who was one of David's 30 captains (2Sam.23.24; 1Chr.11.26). He is distinct from —2. Dodo the Ahohite, father of Eleazar; 3, the second of the three mighty men who were over the Thirty (2Sam.23.9; 1Chr.11.12). He, or his son—in which case we must suppose the words 'Eleazar son of' to have escaped from the text—probably had the command of the second monthly course (see 1Chr.27.4), where the name is Dodai.—3. A man of Issachar, forefather of Tola the judge (Judg.10.1).

Doge', an Iudecan, chief of Saul's herdmen. He was at Nob when Ahimelech gave David the sword of Goliah, and gave information about the king (1Sam.21.7,8) which actually enabled the king to set the office, himself executed the king's order to destroy the priests of Nob, with their families, to the number of 85 persons, together with all their property (1Sam.21.7-22,18,22; Ps.52).

Dog (Heb. kalah). Dogs are frequently mentioned in Scripture, and were used by the Hebrews both for guarding flocks (Job 30.1) and for hunting wild animals (Judg.8.13). At that time, dogs were kept as pets, and were used as guards over flocks (Job 30.1). They were often kept as hunting dogs, and were used to hunt down prey such as wild animals (Judg.8.13). Dogs were also used for guarding property and livestock (Gen.31.54).

Dophkah', a place mentioned (Num.33.12) as a station in the desert where the Israelites encamped.

Dor. A western town in Galilee (Jos.11.2), in a region described as naphoth-Dor (12.23), apparently either the open plains or the "high grounds" of Dor. It was in Asher (17.11) and was the royal city of Canaan, not taken by the tribe of Manasseh (Judg.1.27). The naphoth-Dor are mentioned as the fourth of Solomon's twelve provinces, and apparently answer to Manasseh W. of Jordan (1K.4.11), as stated in 1Chr.7.29. It is usually supposed to be the later Dor, now Tantura, on the shore W. of Carmel (Josephus, 8 Ant. ii. 3; Ast. Aphon, ii. 10), "by the sea-side" (1Mac.15.11-25; 13 Ant. vii. 2), placed in the Onomasticon as miles (actually 8) N. of Cesarea. H. however, Asher was wholly by Carmel on S. (Jos.19.29). Dor would be N. of that mountain, near the coast and the opening by which the Kishon enters the sea-plain. Usur-baddon (about 670 B.C.) gave Dor to Tyre. [c.r.c.]

Do ra (1Mac.15.11.11,25). [Dor.]

Dorcas. [Tabitha.]

Dorymenes, father of Ptolemy, surnamed Macron (1Mac.3.35; 2Mac.4.45). Probably the same, who fought against Antiochus the Great.

Dossippus. [N. of Antiochus the Great, to whom the concluding verse of the LXX. Esther (Est. Apoc.11.1) states he have brought the book to Egypt.—2. One of the captains of Judas Maccabeus in the battle against Timotheus (2Mac.12.19,24).—3. A soldier of Baccus's company, who was cut down while attempting to escape from his adversaries. Gorgias (12.35).—4. An apostate Jew, who, after his conversion to Christianity, plotted against Ptolemy Philopator (3Mac.1.3). [c.d.]

Dothan' (Gen.37.17). Dotha'im (the two wells), a place not far from Shechem (ver. 13) on the trade route from Gilead to Egypt (ver. 25), where Joseph was put in the pit, or well (bor; ver. 24). It lay in a pastoral region, and was visible far off (vv. 15,16,18), but was near a mountain (2K.6.17). Dothaim (1Th.4.6,7,13,8,3) was in open country near Bethulia, on N. not far from hills. The Onomasticon places it 12 Roman miles from Shechem (2Mac.5.5,6). It appears to be the Thubhina of the lists of Thothmes III. (No. 9, noticed with Rabâ 10). Vandeveld it found it at Tell Dothan, in the plain S.W. of Jeän. There is a large mound, a good well, and a second one which is called "well of the pit." These are S. of the mound. A few tent-sheds grow near (Surv. 1890, pp. 169, 215). [c.r.c.]

Dove (Heb. yôôên). The first mention of the dove occurs in Gen.8: the rapidity of its flight being alluded to in Ps.55.6: the beauty of its plumage in Ps.68.13: its dwelling in the rocks and valleys in Jb.48.28 and Ezk.7.16: its mournful voice in Ls.38.14,59.ii: its harmless ness in Mt.10.16: its simplicity in Ho.7.11: and its amativeness in Can.1.15,2.14. Doves, or rather pigeons, as we commonly call them, are kept in a domesticated state in many parts of the East, the pigeon-cote being a universal feature in the houses of Upper Egypt. The wild dove (Columba livia) of the above passages is the rock-dove, or rock-pigeon (Columba livia), the parent stock of all the numerous domesticated breeds, which abound in suitable situations in Palestine throughout the year. [Turtle-dove.] [r.l.]

Dove's dung (hirvônîm). Various explanations have been given of 2K.6.25, which describes the famine of Samaria as so great that "an ass's head was sold for fourscore pieces of silver, and the fourth part of a cab of dove's dung for five pieces of silver." Bochart argues that hirvônîm denotes a species of cicer, "chick-pea," which he says the Arabs call assîn, and sometimes improperly "dove's or sparrow's dung": but Celsius, who advocates the literal interpretation, has shown that this identification is erroneous. Dove's dung was of great value in the E. as a manure for quickening the growth of esculent plants, particularly melons. Harris quotes to this effect from "A Taverner's Dictionary Thoresby, 1629," p. 202. It was also used in early times in the tanners' art. Pline refers to the former of these uses: "The dung of foals there kept, was sufficient to helpe their hard and hungry grounds."
In the second degree of goodness, Columella raungseth Pigeons dung gathered out of dove cotes. . . Others prefer the dung of Pigeons before any other” (xvii. 9). Robert Greene, in A Quippe for an Upstart Courtier, says to a tanner: “You have your Dookes dung, your Marle, your Ashenbarke and a thousand things more to bring on your Leather pace” (ante 1592). There is a marginal note in an early Bible (Oxford, 1679): “The Ebreeves write that they burned it in the siege for lack of wood.” This seems to be unnoticed by Harris and other reference-books. The identification still needs decision. [h.c.b.r.]

Dowry. [Marriage; Family; In)fertility]
7. 10. 12. 13; Is. 15. 8. 9. a Gk. silver coin, varying in weight on account of the use of different talents. The Jews must have been acquainted with 3 talents, the Tolemaic, the Phoenician, and the Attic. The drachmae of these talents weighed respectively, during the period of the Macca- bee, 588; in Egypt, 585; and, 660. [Dowry; Piece of Silver; Weights; Wages.]

Drag. A.V., apparently following Vulg., renders as “dragon” two Heb. words tan and tannin, which appear distinct in meaning. The former is used, always in the plur., in Job 30.29; Ps. 44.19; Is. 13.22, 34.13, 35.7, 43.20; Jer. 10.14, 19.3, 31.37; Ezk. 32.2 (marg.); and Mi. 1.8. It is applied to creatures inhabiting desert places, and frequently coupled with ostriches and wild beasts. It seems probably to have been a mammal, and may not improbably have been the jackal. [Fox.] tannin (cf. tannim in Ezk. 29.3) seems to refer in most cases to a large aquatic animal, and in some instances denotes the crocodile. [Leviathan.] In Gen.1.21 the word is used of the great sea-monsters. On the other hand, in Ex.7.9,10,12, Dent.32.33, Ps.91.13, it refers to land-serpents of a deadly kind. “Dragon” is rendered metaphorically in Rev.12.3f. to the old serpent called the Devil, and Satan, “the old serpent called the Devil and Satan, who deceives the whole world.” It is used also in a more direct sense, as dictated by the symbolical meaning of the image rather than by reference to any existing creature. The reason of this scriptural symbol is to be sought not only in the union of power with craft and malignity, of which the serpent is the emblem, but in the record of the serpent’s agency in the Temptation (Gen.3, [F.I.-]).

Dragnet Well (Ne.2.13). The LXX. renders the Heb. ‘en hat-tannin, “spring of figs.” It lay outside Jerusalem on W., where also Josephus places the Serpent’s Pool (5 Wars iii. 2). No spring known is now on this side of the city. The Mamilla Pool may be meant. [C.R.C.]

Dram. [Drachm.]

Dreams, the more or less coherent actions of the mind when the body is asleep, have always formed a fascinating study and problem. To the untutored savage all dreams are real, and all equally real. They are regarded as direct visions—omens—of a realm above and another sphere. Naturally these are classified under two headings—first, those dreams that come unsought, the ordinary dreams of the ordinary man; and secondly, what may be called “professional” dreams, the product of the skilled soothsayer or prophet who laid himself out to obtain an insight into futurity by this as well as by other means. That the divine will is sometimes made manifest to men by means of dreams is beyond question. Jacob’s dream at Bethel (Gen.28.12), the revelation to Abimelech about Sarah (20.3), the appearances to St. Joseph (Mt.1.20, etc.), the noted absence of any special dream when Saul was abandoned of God (1Sam.28.8-16), the coupling of dreams and visions as marks of the Advent of the Messiah (Jn.12.28; Ac.2.17), are fairly conclusive testimony to any one who values the testimony of Holy Writ. Nor would it be reasonable to question the matter. If “our waking thoughts are our own,” it is none the less true that at times they are consciously influenced both for good and evil by unseen powers outside of ourselves, and it is a priori probable that in a similar fashion our sleeping thoughts may be similarly influenced. Naturally, it is also probable that as a people becomes more civilized and therefore more independent, those dreams that are a channel of revelation will become less frequent; for as men learn to find out the will of God through His laws, there is less need of an extraordinary manifestation of that will. The difference between the religious and the superstitious aspects of this subject is very marked. To the man of faith dreams and vision are a channel of divine intervention, but always chary of claiming that intervention in any specific case without the simplest proof. Superstition, on the other hand, always wildly crying out, not for the revelation of God, but for omens and portents, sees in every strange occurrence that which it wishes to see, and finds in every dream an omen sent by it knows not Whom, to declare it knows not what. “Its object is not to know the will of God but to forecast the future, and as so is not religious nor scientific—not religious, for it makes no attempt humbly to approach the Throne of Grace; and not scientific, because for the patient study of the laws by which God governs the universe it substitutes a system of jumping at conclusions” (Hastings, D.B., 5 vols. 1904). Like superstitions people to-day, the heathen of old had regular codes for the interpretation of dreams. But every time the manner of interpretation is alluded to in Holy Scripture there is a distinct disavowal of any method except divine guidance (see Gen.40.8,41.16; Dan.2.28, etc.). [F.J.]

Dress, 1. Materials. The simplest and most frequent robe was made out of the leaves of the fig-tree, sewn together so as to form an apron (hagghör; Gen.3.7). Later on skins of animals (kuthnōth) supplied a more durable material (3.21). Skins were not wholly disposed at later periods; the mantle worn by Elijah appears to have been the skin of a sheep or some other animal with the wool left on. It was characteristic of a prophet’s office from its mean appearance (Zech.13.4; cf. Mt.7.15). Pelisses of sheep-skin still form an ordinary winter dress in the East. The art of weaving hair was known to the Hebrews at an early period (Ex.25.7,35.6); the sackcloth
used by mourners was of this material. John the Baptist’s robe was of camel’s hair (Mt.3.4). Wool (γέμερ) was introduced at a very early period, the flocks of the pastoral families being kept partly for their wool (Gen.38.12); it was at all times largely employed, particularly for the outer garments (Lev.13.17; Deut.22.11; 2K.5.4; Ezk.27.7, 34.3, etc.). Probably the acquaintance of the Hebrews with linen dates from the period of the Captivity in Egypt, when they were instructed in the manufacture (1Chr.4.21). After their return to Palestine we have frequent notices of linen. Silk was not introduced until a later period (Ezk.16.10,13; Rev.18.12). The use of mixed material, such as wool and flax, was forbidden (Lev.19.19; Deut.22.11).—11. Colour and Decoration. The prevailing colour was the natural white of the materials, sometimes brought to a high state of brilliancy by the art of the fuller (Mk.9.3). It is uncertain when the art of dyeing became known to the Hebrews; the dress worn by Joseph (Gen.37.3,23) is variously taken to be either a “coat of divers colours,” or with bright-coloured patches, as still worn. The notice of scarlet thread (38.28) implies early acquaintance with dyeing. Not only the Egyptians but also the Babylonians had carried the art of weaving and embroidery to a high state of perfection, and the Hebrews knew of various methods of producing decorated stuffs. The elements of ornamentation were: (1) weaving with threads previously dyed (Ex.35.25); (2) the introduction of gold thread or wire (Ex.28.6ff.); (3) the addition of figures. [HANDICRAFTS, 6.] Robes decorated with gold (Ps.45.13) and, at a later period, with silver thread (cf. Ac.12.21) were worn by royal personages; other kinds of embroidered robes were worn by the wealthy both of Tyre (Ezk.16.15) and Palestine (Judg.5.30; Ps.45.14). The art does not appear to have been maintained among the Hebrews; the Babylonians and other Eastern nations (Jos.7.21; Ezk.27.24), as well as the Egyptians (Ezk.27.7), excelled in it. Dyed robes were imported from foreign countries (Ezph.1.9), particularly from Phoenicia, and were not much used on account of their expensiveness; purple (Pr.31.22; Lu.16.19) and scarlet (2Sam.1.24) were occasionally worn by the wealthy. The surrounding nations were more lavish in their use of them; the wealthy Tyrians (Ezk.27.7), the Midianitish kings (Judg.8.26), the Assyrian nobles (Ezk.23.6), and Persian officers (Esth.8.15) are all represented in purple.—111. The Names, Forms, and Mode of wearing the Robes. The general characteristics of Oriental dress have preserved a remarkable uniformity in all ages. The modern Arab dresses much as the ancient Hebrew did; there are the same flowing robes, the same distinction between the outer and inner garments (the former heavy and warm, the latter light, adapted to the rapid and excessive changes of temperature in those countries), and the same distinction between the costume of the rich and the poor, consisting in the number of layers of clothing and in more ample dimensions. The costume of the men and women was very similar; there was sufficient difference, however, to mark the

sex, and it was strictly forbidden to a woman to wear the appendages, such as the staff, signet-ring, and other ornaments (or, according to Josephus, the weapons) of a man, or for a man to wear the outer robe of a woman (Deut.22.5).

We shall first describe the robes common to the two sexes, and then those peculiar to women. (1) The kuttoneth was the most essential article of dress. It was a long, loose gown, of linen or wool, with long sleeves, unfortunately translated “coat” in A.V. It was girt by a girdle, and the fold formed by the overlapping of the garment served as an inner pocket. The annexed drawing (fig. 1) represents the simplest style of Oriental dress, a kuttoneth without a girdle, usually reaching to the ankle. (2) The sādkin appears to have been a wrapper of fine linen (Judg.14.12; Pr.31.24; Is.3.22; cf. Mk.14.51). (3) The wā’il was an upper or second garment, shorter than the first. As an article of ordinary dress it was worn by kings (1Sam.24.1), prophets (1Sam.28.14), nobles (Job 1.20), and youths (1Sam.2.19). The term may, however, be used in these passages for any robe worn over the kuttoneth. [MANTEL.] Where two garments are mentioned (Lu.3.31) as being worn at the same time, the second might be a wā’il; the prosperous wore two (trawai), but the practice was forbidden to the disciples (Mt.10.10; Lu.9.3). The dress of the middle and upper classes in modern Palestine illustrates the customs of the Hebrews. (4) The ordinary outer garment (‘ābāıyāh in Arab.) is a square cloak with arm-holes. The size and texture

FIG. 1.—EGYPTIAN MAN.
The dress of women differed from that of men only as to the outer garment, the kuttôneth, being worn equally by both sexes (Can. 5.3).

The names of the distinctive robes of women were: (1) mîtpâphâth (veil, wimple, A.V.), a kind of cloak (Ru. 3.15; Is. 3.22); (2) ma‘âlîthphâth (mantle, E.V.), another kind of cloak (Is. 3.22); (3) ṣînîph (hood, A.V.), apparently the head Veil hanging down behind the heals. [HEAD-DRESS.] (4) râdhiđh (veil, A.V.), the face veil (Is. 3.23; Can. 5.7), otherwise called ñîphū (Gen. 24.65, 38.14.19) or râmînâd (so R.V.; A.V. locks; Can. 4.16.7; Is. 47.2); (5) p’tîghîhl (stomacher, E.V.), a term of doubtful origin, but probably a waist-shawl (Is. 3.24). The garments of females were terminated by an ample train (so R.V.; skirts, A.V.), which concealed the feet (Is. 47.2; Je. 13.22). Figs. 2 and 3 illustrate some of the peculiarities of female dress; the former is an Egyptian woman (in her walking dress); the latter represents a dress, probably of great antiquity, still worn by the peasants in Palestine. We add a few remarks as to equivalent terms in English. Kuttôneth answers in many respects to “shirt.” In sacerdotal dress “alb” exactly meets it. mîlîm may perhaps be best rendered “gown.” In the sacerdotal dress a more technical term might be used: “vestment,” in its specific sense (= the chasuble, or casula), would represent it very aptly. ūddên = “linen wrapper.” Simlâ we would render “garment,” and in the plural, “clothes,” as the broadest term of the kind; beghđh “vest- ment,” as being of superior quality; ñîkūth “robe,” as still superior; mîdâ “cloak,” as being long; and malîbdh “dress,” in the specific sense of fine dress. In female costume mîtpâphâth might be rendered “cloak,” ma‘âlîthphâth “mantle,” p’tîghîhl “cummerbund.”

The dress of foreign nations are occasionally referred to in the Bible; that of the

DRESS

Fig. 2.—EGYPTIAN WOMAN.

Fig. 3.—PALESTINE FELLAH.
Persians is described in Dan.3:21 in terms which have been variously understood, but which may be identified as follows: (1) the sarbâlîn (A.V. coats) = drawers, which were the distinctive feature in the Persian as compared with the Heb. dress; (2) the paltish (A.V. hose) = inner tunic; (3) the karbâ (A.V. hat) = upper tunic, corresponding to the mor'îl of the Hebrews; (4) the PÔhâk (A.V. garment) = cloak, perhaps worn, like the beghêdîk, over all, though the modern Arab, lîbîs is a very common word, signifying "dress" generally. In addition to these, a robe of state of fine linen, lâkhrîkh, is so called from its ample dimensions (Esth.8:15). References to Gk. or Rom. dress are few: the σαλών (2 Mac.12:35; Mt.27:28) was either the paludamentum, the military scarf of the Roman soldiery, or the Gk. chlamys itself, which was introduced under the Emperors: it was especially worn by officers. The travelling-dobak referred to by St. Paul (2 Tim.4:13) is generally identified with the Rom. pannula, of which it may be a corruption. [CLOKE.] It is, however, otherwise explained as a travelling-case for carrying clothes or books.—IV. Special Usages relating to Dress.

The length of the dress rendered it inconvenient for active exercise; hence the outer garments were either left in the coach, or working close by (Mt.24:18) or thrown off when the occasion arose (Mk.10:50; Jn.13:1; Ac.7:58); in the case of a person travelling, the under garment was girded up (1K.18:46; 2K.4:29,9:1; 1Pe.1:13) by passing it between the legs and through the girdle in front (see illustration to our art. (Cost). On entering a house the upper garment was probably laid aside and resumed on going out (Ac.12:8). In a sitting posture the garments concealed the feet; this was held to be an act of reverence (Is.6:2). The number of suits possessed by Hebrews was considerable; a single suit consisting of an under and upper garment. The presentation of a robe in many instances amounted to installation or investiture (Gen.41:42; Esth.8:15; Is.22:21); on the other hand, taking it away amounted to dismissal from office (2 Mac.4:38). The production of the best robe was a mark of special honour (Lu.15:22). The number of robes which a person kept in store for presents was very large, and formed one of the main elements of wealth in the East (Job 27:16; Mt.6:19; Jas.5:2), so that to have clothing = to be wealthy and powerful (Is.3:6,7). On grand occasions the entertainer provided covering robes for his guests. The lavishness of dressing clothes was usual among women (Pr.31:22; Av.9:39); little art was required in what we may term the tailoring department: the garments came forth for the most part ready made from the loom, so that the tailor supplanted the tailor. [SANDAL.]

Drink, Strong. The Heb. šêkhâr, in its etymological sense, applies to any intoxicating beverage. We may infer from Can.8:2 that the Hebrews were in the habit of expressing the juice of other fruits besides the grape to make wine; the pomegranate, then noticed, being probably one out of many fruits so used. From Jerome and other sources of information we find that the following beverages were known in later times to the Jews. (1) Red wine, largely consumed in Egypt under the name of zythus, and thence introduced into Palestine. It was made of barley: certain herbs, such as lupin and skirrett, were used as substitutes for hops. (2) Cider, noticed in the Mishna as apple-wine. (3) Honey-wine, of which there were two sorts—one consisting of a mixture of wine, honey, and pepper; the other a decoction of the juice of the grape, termed ḫâkhâ (honey) by the Hebrews and dibâ by the modern Syrians. (4) Date-wine, which was also manufactured in Egypt, was made by mashing the fruit in water in certain proportions (cf. Mishna, Tract. xi. 2; Sabbath xx. 2). (5) Various other fruits and vegetables are enumerated by Pliny as supplying materials for fæctious or home-made wine, such as figs, mullet, the carob fruit, etc. It is not improbable that the Hebrews applied ramos to this purpose in the simple manner of the Ar habians—viz. by putting them in jars of water and burying them in the ground until fermentation takes place. The use of strong drink was forbidden to the priests (Lev.11:9) and to those under the Nazirite vow (Num.6:3; cf. Lu.1:15), and even to the mother who was bearing a child destined to be a Nazirite.
DROMEDARY

(Drug.13.4; cf. 1Sam.1.15), and its evil effects are especially set forth in Pr.20.1,31.4,5, and Is.5.11,22-24,28-7.

Dromedary is the translation in A.V. of the Heb. word *bekhêr or bikhêr, rekhes* and rômâkh. As to the two former terms, see Camel. *rekhes* is interpreted in our version by "dromedaries" (I.K.4.28), "mules" (Esth.8.10,14), and "swift beasts" (Mi.1.13); but there seems no doubt that it denotes a superior kind of horse. *rômâkh* is interpreted (Esth.8.10) for an exceedingly rare name, *Hromasek.* [R.I.L.]

Drusilla, youngest daughter of Herod Agrippa I., and wife of Aziz, king of Emesa. Like both her sisters Bernice and Mariamme, she left her first husband; seduced to do so by Felix, who married her. Her career gives point to the mention of her presence when St. John reasoned before her of righteousness, self-control, and judgment to come (Ac.24.24,25). [E.R.B.]

Duke. The Heb. word so translated in A.V. means simply "chieftain," and is applied to the tribal leaders of Edom (Gen.36.15ff.) and of Judah (Zech.12.51; A.V. governors, R.V. chieftains). [E.B.D.]

Dulcimer (Heb. *sumpônyâd*), a musical instrument mentioned in Dan.3.5,15. Rabbi Saadia Gaon describes the *sumpônyâd* as the bag-pipe, an opinion adopted by the majority of Biblical critics. The same instrument is still in use amongst peasants in the N.W. of Asia and in S. Europe, where it is known by the similar name, sampogna or sampogna. With regard to three of the musical terms used in Dan.3 and represented by "harp," "psaltery," "dulcimer," it has been contended that they are Gk. in origin and that the last of them is at the most only as old as Polybius. But it is extremely difficult to argue simply from the non-occurrence of a word in earlier surviving Gk. literature; and it may be more certain that there was an interchange of musical instruments and their names, as of other things, between E. and W. More than one Gk. musical instrument, at any rate, has an Eastern designation for its name. See also Semitic Languages. [H.A.R.]

Dumah.—1. A son of Ishmael (Gen.25.14; 1Chr.1.30).—2. The town in the N.W. part of Arabia called Dûmat-el-Fendel is no doubt the Dumah of Isaiah (21.11), and signifies the "stony stile."—3. A city in the mountains near Hebron (Jos.15.52). Now Ed Dômeh, a ruin 10 miles S.W. of Hebron. [C.R.C.]

Dung was, and is, used in the East not only as manure, but also as fuel. The manure was mixed with straw (Is.25.10), or was the sweepings (Is.5.25 marg.; cf. K.V.) of roads, which were collected in heaps outside the walls of towns at fixed spots (hence the Dung Gate at Jerusalem, Ne.2.13) in readiness for use on the fields. The manure was applied to trees by digging about their roots and inserting it (Lu.13.8). In the case of sacrifices the dung was burnt outside the camp (Ex.29.14; Lev.4.11,13,17; Num.19.5) because of the use made of the thyrsus in Mal.2.3. Particular care was taken in the law to enforce cleanliness with regard to human ordure (Deut.23.12ff.): the worst threat that could be used against a house was that it should become a "draught house" (2K.10.27) or a "dung-hill" (Esth.6.11; Dan.2.5,3.29). Public establishments of that nature are still found in the large towns of the East. The difficulty of procuring fuel in Syria, Arabia, and Egypt has made dried cow's and camel's dung a valuable substitute; it produces an equitable heat, and is used for heating ovens and for baking cakes (Ezk.4.12,15). In P.S.3.5, ovâyâāâ is refuse of any kind; cf. Eclus.27.4.

Dung. [Duke.]

Dura', the plain where Nebuchadnezzar set up the golden image (Dan.3.1), has been sometimes identified with a tract a little below Tekrit, on the left bank of the Tigris, where the name *Dur* is still found. Prof. Oppert placed Dura to the S.E. of Babylon, in the vicinity of the mound Dowar or Duair. Possibly it is connected with the Semitic-Babylonian *dāru*, "fortification," i.e. one of the great walls defending the city. The position of the town called *Dùrur* is unknown. [T.G.P.]

Dust. [Mourning.]

Dyeing. [Handicrafts, (8)].

E

Eagle (Heb. *neshar*). The Heb. *neshar* (lit. to tear or rip open with the beak) = Arab. *nîr*, which is the designation of both the eagle and the griffon-vulture (*Gyps falcus*); but there is little doubt that in most of the numerous passages where "eagle" occurs in A.V. the vulture is intended. Confirmation of this is afforded by Mi.1.16, where "enlarge thy baldness as the eagle [nesher]" can scarcely refer to aught else than the bare head and neck of the griffon-vulture. There is, however, a possibility that in some cases the word may be used in a wider sense to denote eagles also; although the fact of the existence of several distinct Heb. words for diurnal birds of prey is somewhat against this view. [Gier-eagle; Ospray; Ossifrage.] Griffon-vultures, of which several species, or perhaps races, are recognized, have a wide range in the warmer parts of the Old World, and are abundant in Palestine, where their large size and soaring flight make them conspicuous objects. They would accordingly be sure to attract the attention of even primitive peoples. *Nîroch* of the Assy. sculptures, alluded to in 2K.19.37 and Is.37.38, is the designation of *nisar*. [Semitic Languages.] In Mt.24.28 and Lu.17.37 the "vultures" would be a better rendering of *aerôl* than is "eagles": for although some of the smaller eagles found in Palestine, such as the short-toed eagle (*Circaetus cinereus*), feed largely on carrion, these would certainly form but a small minority of any assemblage of birds of prey gathered round a carcass. [R.L.]

Banes (1Esdr.9.21), a name which stands in the place of the sons of Harim, Malchijah, and Elijah, in the parallel list of Ezr.10.21.

Earing (Gen.45.6; Ex.34.27; Deut.21.1; 1Sam.8.12; Is.30.24; cf. Ezk.36.34). The Heb. words signify to "work" ("âbbâdîh) and "plough"
East. In Heb. represented by two words. (1) qedem, "in front," the usual Oriental description of that direction: W. being "behind," N. "to left," and S. "to right" (see Job 23.8,9). [KEDEM; BENE-KEDEM.]
(2) mizraḥ, "the rising of the sun" (Jos.11.3, etc.), especially as contrasted with the W. or "sea." This word is used 73 times, while qedem occurs 25 times in O.T. [c.r.c.]

Easter (Ac.12.4). This rendering of ṭopharath means is retained only here in A.V. from other versions; R.V. renders it correctly "the Pass-over." [PASSOVER. [H.H.]

Eastern Sea. [SALT SEA; SEA.]

Ebbal.—1. One of the sons of Shishai the son of Seba (Gen.36.23; 1Ch.1.44).—2. Obal the son of Joktan (1Ch.1.22; cf. Gen.10.28).

Ebbal, Mount. The "bare" mountain, N. of Shechem (Deut.11.29,27,4,13). On it were placed stones covered with plaster, on which the law was written. The Samaritans read Gerizim for Ebbal, and believe that it was this mountain which the centuries of the captives and the scribes of the Captivity regarded as the place of the Law. [c.r.c.]

Ebed.—1. (Many MSS., and the Syr. and Arab. versions, have Eber), father of Gaal (Judg.5.26,28,30,31,13).—2. Son of Jonathan: one of the Bene-Adam who returned from Babylon with Ezra (Ezr.8.6).

Ebed-melech (ebedhenelekh), an Ethiopian eunuch of king Zedekiah, who secured Jeremiah's release from prison (Je.38.7,39.16). The name, which means "king's servant," may have been derived from his official position, or from the "servant of God." Gray (Heb. Names, 147) thinks that at this time the heathen deity Moloch would have been so familiar to the Hebrews that they would have ceased to use the similar title melek (king) of the God of Israel. He suggests that as the eunuch was an Ethiopian, he may have been called "servant of the god Moloch" by heathen parents. [B.R.S.]

Ebenezer (stone of help), a monument of victory set up by Samuel (1Sam.14.5,15.7,17.12) on the same site where Israel had been defeated in Elin's time. It stood "between Mizpeh and Ha-Shen" (Sam.4., or between Tull-Nabheh and Ha-Shen (Joshua 18.14). (Art. X.) It is an Edomite name, and connects with the sacrifice and consequent punishment of that monarch (2Ch.26.6ff.). The phenomenon, as described by Josephus, bears a strong resemblance to that foretold by Zecharias, and possibly the earlier event may have suggested the imagery of the prophet. An earthquake occurred at the time of our Saviour's death (Mt.27.51-54) which had the effect of opening the graves and constituted one of the most terrifying accompaniments of that sublime event. Earthquakes are not unfrequently accompanied by fissures of the earth's surface, and such an occurrence may have rent the rocks and opened the sepulchres in the valley of the Kidron. The destruction of Korah and his company (Num.16.32) would seem to be due to the same cause, and may be paralleled by a similar occurrence in Italy, 1783 A.D., when the surface of Calabria was devastated, and chasms, opening in the ground, swallowed up many people. [A.R.E.]

Eblishaph. [Elishaph].

Ebony (Heb. kobnim) occurs only in Ezk. 27.15, as one of the valuable commodities im-
ported into Tyre by the men of Dedan. The best kind of ebony is yielded by the Diospyros ebenum, a tree which grows in Ceylon and S. India; but many trees of the natural order Ebenaceae produce it. It is not known what tree yielded the Ethiopian ebony. Pliny says (xii. 4): "Herodotus [iii. 97, 114] assigneth it rather to Ethiopia; and saith, That every three years the Ethiopians were wont to pay by way of tribute unto the kings of Persia, 200 billets of the timber of that tree, together with gold and yewro. . . . Ebene was a rich tribute, and deserved the third place, after Gold and Ivory." Vergil (Georg. ii. 116) says that India alone yields black ebony ("it will not grow elsewhere," Pliny). [ii-iii.]

Ebronah (R.V. Abronah), a halting-place of the Israelites in the desert, immediately preceding Ezion-geber (Num. 33.34,35).

Eca'naus (R.V. Ethanus), one of the five swift scribes of Ezra (2Esd.14.24).

Ecbat'ana (Aram. "acabitha"). Though many early commentators understand this word, in Ezr.6.2, as meaning "in a coffer," there is little doubt that it is a place-name, and that one of the two Ecbatanas is intended. In the Apoc. Ecbatana is frequently mentioned (Tob.3.7,14,12,14; Jth.1.1-2; 2Mac.9.3, etc.). Two cities so named seem to have existed in ancient times—one the capital of Northern Media, the Media Atropaténe of Strabo; the other the metropolis of the larger and more important province known as Media Magna. The site of the former appears to be marked by the very curious ruins at Takhti-Sulayman (lat. 36° 28', long. 47° 5'); while that of the latter is occupied by Hamadan, one of the most important cities of modern Persia. There is generally some difficulty in determining, when Ecbatana is mentioned, whether the northern or the southern metropolis is intended, as they lie sufficiently near to one another for geographical notices usually to suit either site. The northern city was the "seven-walled town" of Herodotus, who describes it as the capital of Cyrus (Herod. i. 98,99,153); and it was thus most probably there that the roll was found which proved to Darius that Cyrus had really made a decree allowing the Jews to rebuild their temple. The peculiar feature of the site of Takhti-Sulayman is a conical hill rising to about 350 ft. above the plain, and covered on its top and sides with massive ruins of the most antique and primitive shape. The perfect encinte, formed of large blocks of squared stone, may be traced round the entire hill along its brow; within there is an oval enclosure varying from 800 yds. to 400 in diameter, strewn with ruins, which cluster round a remarkable lake. On three sides—S., W., and N.—the saliency is succeeded by the ridge; and the plain uniform, but on E. it abuts upon a hilly tract of ground, and is here but slightly elevated above the adjacent country. The northern Ecbatana continued to be important down to the 13th cent. after Christ. By the Greeks and Romans it appears to have been known as Gaza, Gazaca, the "principal treasure city," on account of the wealth laid up in it; and by the Orientalists as Shiz. Its decay is referable to the Mogul conquests, c. 1200 A.D.; and its final ruin is supposed to date from c. 15th or 16th cent. In 2 Mac. (9.3, etc.) the Ecbatana mentioned is undoubtedly the southern city, now represented both in name and site by Hamadan. Situated on the northern flank of the great mountain called formerly Orontes, and now Ewênd, it was perhaps as ancient as the other, and is far better known in history. It was the Median capital of Cyrus, and from the time of Darius Hystaspis remained the chief city of the Persian satrapy of Media, and the residence of the Persian kings. The Ecbatana of Tobit is thought by Sir H. Rawlinson to be the northern city, Takhti-Sulayman.

Ecclesiastes, The Book of, called in Heb. qôheleth, translated by LXX. ἡκκλησιαστής, or the Preacher, a translation adopted by Vg. and very generally approved of by the best critics, although the exact sense of the Heb. is still disputed. The Heb. form is probably an intensive, and hence is fem. Several names of the same formation occur in the later books—e.g. Ezr.2-57; Ne.7-57; 59. Fem. proper names of the same formation are likewise found—e.g. 1Chr.4.8,7,18. The word qôheleth is used as a fem. in Ec.7-27, but the reading there is probably erroneous. The book is much later than the period of Solomon, as is proved both by the language of the original, and by the contents of the work. The name is assumed simply as a literary device, and not as a pious fraud or forgery, and traditional Solomonic utterances may form some of the
bases of the work. But Solomon is spoken of in it in a manner which shows that when the book was written that monarch had long passed away. The name of such a man—marked out in the sacred writings as most renowned for wisdom—was most suitable to be employed as setting forth the principles of wisdom not only to his own age, but to the ages after him. The writer of the book of Wisdom followed the example set to him by his great predecessor. The latter work, which in its opening chapters might be described almost as an Anti-Ecclesiastes (see especially Wis.2), opposes the false and superficial interpretation placed upon the statements of Koheleth by the materialist free-thinkers among the Jewish students of Alexandria, and puts in the mouth of Solomon, whose history is ably sketched by the later writer after the analogy of the earlier, sentiments of a very different character. [Purposely Examined.]

Although therefore, the book has been regarded in ancient times as the production of Solomon—and it has been suggested that it was written in the days of his penitence—it is impossible to uphold any such theory in the light of modern criticism. Even in ancient times there are not a few indications that the writer, who was a man of no mean intelligence, was not altogether understanding on that subject. Many passages in the work contain what may be regarded as actual disavowals of Solomonic authorship, and the facts which the writer describes as the circumstances of the time in which he himself lived, point to a much later period. Many of his thoughts of more enduring nature therefore placed its authorship in the last century of the Persian period (440-336 B.C.). The portion which is written under the form of a Solomonic autobiography extends only to the end of ch. 2. It describes the vanity of all earthly things, and points out that there is no actual progress in the affairs of men—nothing really new—everything in human life being merely a repetition of that which has taken place already. Solomon is introduced as one who, though a king, had in his own lifetime discovered by personal experience the vanity of wisdom, pleasure, and riches; such being described as an evil and vexatious burden to the sons given to men (1.13), and but vanity and a striving after wind. The writer argues that, although there was, no doubt, an advantage in wisdom, yet the wise man must at last die like the fool; and a wise king may have a successor who will turn his wisdom into foolishness. Cheerful enjoyment of life, with God as his guide, is the only thing left to be striven for (2.2-4; 5.12; 3.14, 15); yet even that is vanity, as man cannot ensure it. We maintain, despite all that has been written to the contrary, that the word "eternity" (the rendering of the word in all other passages of O.T.) in 3.17 affords a far better sense of "the world," which is given in the text of A.V. and R.V., contrary to the judgment of the American revisers. Man, viewed as belonging only to this world, is shortsighted and powerless in the sight of Him Who is the arranger and disposer of all things and of all events that happen to men. Left to himself, he is like the brute that perisheth; and God shall judge him at last, after He has duly tested him—for "there is a time for every work there" (3.17). For man, bind as he is with regard to that which shall be after him, there is nothing better than that he "should rejoice in his works." Koheleth turns in ch. 4 to review that which hinders his cheerful enjoyment, such as man's oppression by his fellow man (4.1-3). Rivalry and useless toil prevent that enjoyment; and yet, in spite of all, this companionship is preferable to the life of a solitary worker (7-12). The striving after the wind is strikingly exemplified in the enthusiasm of the people for a new king (13-16), while "vanity" is seen in their worship of God, and in their delight in making vows which are not performed (5.2-7; 9.17-6.6). The vanity of striving after riches is seen by what is done under despot rule (5.8, 9, 7, 8) by rulers who know not that the cultivation of the land is of the highest importance. But after all, riches are in themselves of little real advantage, and are collected together only to be scattered by others (5.10-20; 19-20). The writer, therefore, turns to the consideration of a cheerful and contented life as the gift of God. In the next section the writer shows that man may have riches, and have no power of enjoying them; the desire after such is insatiable, and man has also in this life to deal with God, Who is stronger than he. God knows the future, and it is by no means certain that he does not know what is good for him in life, or what shall happen after him (6.10-12). In 7.1-6 are set forth divers proverbs, which speak of things which man ought to prefer above others; and teach that patience and wisdom are the best preservatives in oppression and adversity. In 8 and 9 the writer appears to be ordained of God for His own purposes. Man would do well therefore to rejoice in the day of his prosperity, and in the day of adversity to consider why God has permitted even that. The section is closed by insisting upon the importance of "the middle mean," and the practical uselessness of wisdom (7.1-24), and in speaking briefly but emphatically of "the wicked woman" by whose snares men are caught (7.25-29), the writer does not indulge in any tirade against the female sex, but describes in the strongest colours the ruin wrought in all ages by immorality. (The true wife, who is man's best helper, is described in the son's song); but he then turns to his general theme, and urges again the benefit of wisdom in days of oppression, such as those in which he lived. This is the thought pervading ch. 8, in which he again refers to the fact that there is a God that judgeth the earth, and that it will ultimately be well for those that fear God. God's works man cannot comprehend, and He apparently often permits the same fate to happen to all (8.9-2). In close connexion with this subject Koheleth glances at the state of the dead, as far as then revealed; again returning to the great practical conclusion of the importance of a continued and happy life, notwithstanding the fact that man knows not the time allotted to him, and that death falls upon him suddenly. The story of the poor wise man, and the wisdom by which he was able to save his little city from ruin—a parable based upon the historical fact recorded in 2 Sam. 20.15-22—is here set forth as a proof of the power of wisdom, and of the ingratitude often displayed to benefactors (Ec. 9.13-15). A few proverbs, loosely connected, are strung together
The benefit to be derived from the talk of the wise is there pithily described, and the detriment that comes from the foolish talk of foolish men (10.12-15). But worse than all these is the moly caused to a land by a foolish king. Even, however, under such circumstances, prudence is urged; and the people ought not to provoke a foolish king by curses (10.16-20). In general, it is noted that there is real wisdom in beneficence. And, though the future belongs to God, man—while he can—ought to labour, and to enjoy himself in the sight of his Maker (11.1-8). Koheleth then breaks into a song briefly describing the days of life, which ought to be spent by man as ever mindful of the great judgment of God, and of his Creator, especially in the days of youth.

We do not agree with those who interpret ch. 12 of the approach of old age. It compares rather the days of evil (or of death) to a sudden storm, which darkens the whole face, fills the eye with tears, and makes the grinding-maids (see R.V. marg.) cease their work, and spreads dismay among the ladies at the lattices; singing women cannot enliven in such a case; fears above and fears beneath set the path to the grave. After a mere earthly storm, nature reawakens, the almond-tree blossoms, and the locust comes forth; but man there is no such awakening. In the storm he disappears; for the dust returns to the earth as it was, and the spirit to the God Who gave it (12). The epilogue (12.3-14) has been variously interpreted. Some regard it as an addition to the work by a later writer, others as an integral part of the Ecclus. By the latter opinion the writer seems in it to throw off the mask of Solomon, and describes himself as "a wise man" who lived and thought for the people's good. Collections of the words of the wise are like goads, driving on those who attend them; and the words of men fully versed in such matters receive our approval. For the "collections" are really given by the One Shepherd, Who leadeth His people like a flock. The end of the whole matter is, "Fear God, and keep His commandments." There is a day of God's judgment, though foolish man may not bear it in mind, and, because there is such, there is the judgment of the former day. The sun that will ultimately dispel the darkness which later revelation shows to have been in great measure removed by the coming of the Life and the Light of men. The literature on Ecclesiastes is very extensive. Jerome's commentary is still worthy of study. The days of the Reformation produced many commentators. Luther wrote on it (in 1532) a work of considerable size and of practical merit. See also Mercer (1573), Drusius (1653), M. Geier (1668), Schmidt (1691), Zirkel (1792). More critical were the works of Knobel (1836), Herzfeld (1838), Heiligenstadt (1845) in Maurer's Comm., Vaihinger (1858), Henningberg (1859), Delitzsch (1875, grossly misrepresented in the English transl.). H. Graetz' (1871) very fanciful work was the basis of E. Renan's brilliant but utterly mistaken exposition (1882). Other works are those of Kleinert (1883), Seifried (1898), F. Buhl (1890), and Menzel (Der grieschische Einfluss auf Prediger, 1890), who denies such influence. Among English comm. of interest are: Th. Preston (1845), C. D. Ginsburg (1861), which contains the fullest description of the literature up to that date; Thos. Tyler (1874, much enlarged in 1899), E. H. Plumptre (1881), C. H. H. Wright (1883), Bradley (1887), and T. K. Cheyne (1887). Among the critical form and its monographs on Ecclesiastes of special importance may be noted Leimkörfer, Die Prediger Sal. in hist. Beleuchtung, 1892; Euringer, Der Massorahtext der Kohelit-krit. untersucht, 1890; Dr. E. Klostermann, Delphi Coelehtes Vers. Alex., 1892; A. Dillmann, Über die griech. Uebersetzung der Qohe[, the two last-named—especially against Graetz' theory —that the present text of the LXX. is that of Aquila—a theory which has been defended by Renan. [C.H.H.W.]

Ecclesiasticus is the title in the Latin versions of the book called in the LXX., "The Wisdom of Jesus the son of Sirach." An entirely new code, it has passed into the wisdom and interest of this remarkable book since the discovery of the fragments of the Heb. text by Mrs. Lewis in 1856 in St. Catherine's monastery at Sinai. At present, some 35 chapters out of 51 have been recovered from 4 different Heb. MSS., and many years must elapse before the fresh light thus thrown on the book can be explored and its results classified. Apart from this discovery, Ecclesiasticus is, perhaps, the most important book in the Apocrypha. "It exhibits Jewish thought and religion at a period otherwise almost unknown." It is important as illustrating Judaism in its transition state between O.T. and N.T. It is also of great interest to the student of the religious life of both Jews and Christians. At least two of the best-known hymns of the Church are derived from its pages, the Jubilee rhythm of St. Bernard (partially translated in the well-known "Jesu, the very thought of Thee"")—Ecclus.24.20.1—and the German "Nun danket" in all our collects (Eng. b. 4.21) whilst the Greek and the Roman Churches place it in the canon. Whilst it was never received among the 24 books of the Heb. Bible, it had a prominent place in the Greek and Latin, in the former of which it is commonly grouped with the other poetical books (e.g. in Cod. Vatican.). The order is that of the Heb. text, the order of the Eng. Apoc. is due to the German translation of 1529 (Zurich). The name, Ecclesiasticus, the ordinary title since Cyprian, is doubtless derived, as Kufinus points out, from its frequent use by the early Church, especially in the instruction of catechumens, the way for the Jews of Alexandria first, and then for the Christians, the favourite book of ecclesiastical edification, "the summary of all the virtues," as Eusebius first calls it. In Cod. B the title is "The Wisdom of Sirach"; in Cod. ACS: "The Wisdom of Jesus the Son of Sirach." In the Heb. text we read at the end, "We have received the words of Simeon ben Jeshua who is called ben Sira. The Wisdom of Simeon ben Jeshua, ben Eleazar, ben Sira." The question of the original title, therefore, is unsettled, and the newly discovered texts only add fresh difficulty as to the author's name. According to Jerome, its original title is in a Trilingual verse: "The texture of the book..."
presents a deeply interesting problem, as may be seen from a cursory glance at R.V., where some 80 marginal notes are to be found; and there is evidence that some dislocation has taken place (probably a misplacement of leaves) in the copy from which all the Gk. MSS. hitherto known have been derived, though this does not account for the extraordinary divergences in the Gk. texts, which are carried still further in the ancient versions and patristic quotations. When the fragmentary Heb. text was discovered, it was naturally hoped that more definite light would be thrown upon the strange variations of the existing versions, but Margoliouth (followed by Bickell) declared, after careful examination of all the fragments that had come to light, that the Heb. was not the original, but a retranslation of the Gk. Later opinion, however, seems to modify this assertion, and leans rather to the theory that the Heb. preserves, to a larger degree than was thought at first, fragments of the original. Little is known of the author beyond what is told us in the preface of the book, which states that the Gk. translation was made by his grandson in Egypt "in the reign of Ptolemy Philuson," who was the high-priest of Simon the high-priest (50.1-21), would then be drawing from his own recollection of Simon II., whose high-priesthood ended c. 199 B.C. Some scholars, however, prefer to identify the Euergetes mentioned with Ptolemy III. Euergetes (247-222), and the high-priest, in that case, with Simon I., the Jub. (310-296).—Contents. The book is a fine example of Jewish "wisdom literature," and consists of a collection of gnomic sayings, modelled, in all probability, upon the canonical book of Proverbs. It has been considered the chief exemplar of primitive Sadduceism, and, because of its more elaborate form than the Heb. text, in which, after 50.12, there is an addition in the form of a hymn, praising the sons of Zadok, "O give thanks unto him that chose the sons of Zadok to be priests, for His mercy endureth for ever." The author speaks with respect of the religious literature of the past, and acknowledges himself to be but "a gleaner after the grape-gatherers." None the less, he thinks he has something to give to his readers of that wisdom which comes from God. In spite of his heterogeneous mixture of subjects, there lies at the back of them all the central thought of that which is true wisdom, viz., the placing of human conduct in its right relationship to God. The book may be roughly divided into two unequal halves: first, 1-13. 14—the Sayings of the Wise, introduced in ch. 1 by an eulogy on Wisdom, and closing with the praises of Nature (13.15-43.33); second (44-50.2), the praises of the Mighty Men, to which the whole book, from the beginning (50.1) to the end (50.22) and a final Song of Praise (51). In the course of his writing the author discusses most varied questions in the realm of practical morality—e.g. friend-

ship, women, anger, servants, children. The Song of Nature is a very powerful composition, whilst the poem dealing with the roll of Israel's heroes is obviously imitated in Heb.11. The author's ethical and social teachings have remained popular in some of the Talmuds, and approaches very near those of the Gospel. The epistle of St. James also shows acquaintance with Ecclesiasticus, and there are other possible allusions in N.T. The early Christian writers made a very extensive use of the book. Eder- Bickell (in the Speaker's Commentary; Scheel-
courage, and justice, the main stream being the
generic virtue, goodness, which goes forth from
Eden, the wisdom of God. One of the Heb.
traditions enumerated by Jerome makes Para-
dise to have been created before the world, and
therefore beyond its limits. To all appearance,
however, the writer of the account in
Genesis intended to describe a place which
existed, or which he believed to exist. Jose-
phus thought that the ocean-stream believed
to surround the earth was the source from
which the four rivers flowed; whilst according
to others it was the Shaṭṭ al-'Arab, which, how-
ever, is of too late formation to be taken into
consideration. Those who place Eden in the
highlands of Armenia see in the river from
which the four streams diverge a "collection of
springs," or a well-watered district. Others
explain it as the Caspian Sea. Josephus, Eusebius,
and many others identified the Pison
with the Ganges, and the Gihon with the Nile.
This was the opinion held long before that iden-
tification was revived by Ewald and adopted by Kalisch; Rashi sug-
gested the Nile, and Philostorgius the Hy-
daspe; the advocates of the Armenian posi-
tion of Eden identify it with the Phasis. Col.
Chesney identified the Halys and the Araxes
with the Pison and Gihon; and he identified the
country within the former was the Havilah, "that
which borders on the latter being the still more
remarkable country of Cush." According to
Golius, Jihûn is the name given to the Oxus,
which has therefore been assumed to be the
Gihon by Rosenmüller, Hartmann, and
Michaelis. But the Araxes, Aras, and Aras, by
the ancients, Persians, Jîhûn ar-Râs, and has therefore
likewise been identified with it by Reland,
Calmet, and Col. Chesney. Probably, however,
the latest theory of Assyriologists is the
most satisfactory. The river which became
four heads is the Persian Gulf, which is called
sôaw-stone, the Gihon, and this is nowhere
mentioned in the inscriptions. As the Shaṭṭ al-'Arab did not
anciently exist, the Tigris and the Euphrates
flowed immediately into it. Eden was therefore
the land of Babylonia itself, the plain of which
was called edîna, Semitic ìîdînä, by the ancient
inhabitants. Indeed, one of the names of the
country Jôsharabud, with which, however, the
Armenian Gihon, or, according to Sayce, the
Sa'în or Pardisu, streams (or canals)
tioned by Tiglath-pileser III. in con-
nexion with the Tigris and the Euphrates in S.
Babylonia. Later, however, he identified the
Pison with the Araštû, and the Gihon with the
modern Jîhkâ, which runs from the Euphrates
W. towards Abu-Shahrein. Fried. Delitzsch
also identified the Gihon with the Araštû (Gu-
handê), but he thought the Pison to be the
Pallukatu, the Pallacopas of classical geo-
graphy. The Araštû, however, is now iden-
tified with a canal in the city of Babylon.
These two rivers must therefore be regarded
as still uncertain. As to the position of the
garden, though uncertain likewise, something
may nevertheless be said. The Babylonians
apparently regarded it as identical with Eraštû, "the good city," now Abu-Shahrein,
originally near the mouth of the Euphrates.
In this city a sacred plant was supposed to
grow, probably a kind of vine, in appearance
like the sacred lapis-lazuli. In the sacred
house, which was like a forest, its shadow
extended, and no man entered within it—it
was the sun-god Tammuz who dwelt there,
between the mouths of the rivers (the Tigris
and the Euphrates are apparently intended)
which are on both sides. The ideograph for
this city, when turned the right way, shows a
central stem with branches, suggesting a tree
or vine. Whether it is this tree which is
represented on the Babylonian cylinder-seals
and the bas-reliefs of Assyria is uncertain, but
not unlikely—indeed, one of the cylinder-
subjects shows the tree (a date-palm), with
figures apparently about to pluck the fruit,
and a serpent behind one of them (see our
illustration under FALL). The Babylonian
"Garden of Eden," therefore, if not "east-
ward," was at least south-eastward in Eden.
For the rest, the land of Havilah which the
Pison of Eden enters, was the "sandy" portion of N. Arabia, extending
towards the Egyptian frontier (cf. Gen.10.29.
25.18 ; Sam.15.7). The "bidellium" (bîdôlîm) produced there is probably the budûlûh of
the Assyro-Babylonian lists of edible plants,
and the shôham-stone seems to be the Assyrian
sâmtû, which sâmtû also seems to be the
desert E of Egypt. Prof. Sayce suggests
that the Gihon may be the Kerkhâ, which
rises E. of the Tigris in the mountains of
Luristan, the home of the Kossaeans (Assyr.
Kâshî), whose name may be connected with that
of Cush. Both the Kerkhâ and the Kurun
are present in the ancient Babylonian exercise-table, Papêdu or Para-
dise appears as the name of a country. This
word was possibly borrowed from the Persian,
and is preceded by Magânu, probably Magân
or E. Arabia (Havilah), and followed by Bit-
Napsûnu. See Delitzsch, Wo lag das Para-
1898). [T.G.P.]

Eden.—1. One of the marts which supplied
Tyre with richly embroidered stuffs (Ezk.
27.23). It is associated with Haran, Sheba,
Asshur, etc. In 2K.19.12 and Is.37.12 "the
sons of Eden who were in Telassar are men-
tioned with Sheba, Haran, and Reseph as
victims of Assyrian greed of conquest." Tel-
assar is possibly the Til-Asûri mentioned
by Esar-haddon, which is regarded as having been
situated in Upper Mesopotamia. This would
support the identification of Eden with the
Assyrian Bit-Adini, an Aramean state about
200 miles N.N.E. of Damascus. Michaelis
suggested this modern Assuri as the Eden of
Ezekiel; an identification lately revived by
Margoliouth.—2. Beth-eden, "house of
Eden" (Am.1.5), was probably a country
residence of the kings of Damascus. Ewald
identified it with the Paradise of Strabo.
Michaelis suggested Eden, 20 miles N.W. of
Ma'albeke; and Driver favours this site above
the Bit-Adini, quoted above. Others,
including Farrar, have suggested Beîl al-Janna,
"the house of Paradise," S.W. of Damascus,
on the E. slope of Hermon, not far from
Meîdel. [T.G.P.]

E'der.—1. (Jos.15.21.) A city of Judah
probably on the border of Edom. Henderson
suggests the ruin 'Adir, 5 miles S. of Gaza, but this is near the sea, not near Edom.—2. A Merarite Levite in the time of David (1 Chr. 23.23, 24.30). [C.R.C.]

Edes (rādāh. 35) = JADAT.

Ed na, the wife of Raguel (Tob. 7.2, etc.).

Edom (red). Edomites, Idumea. Esau asked Jacob to give him "the red, the red" (Gen. 35.30), and received first the red pottage, and afterwards the red land of Edom, so called probably from the red sandstone mountains of mount Seir ("rough" mountain); thus he became "father of the Edomites" (Gen. 36.9, 43), and he is himself called Edom (vv. 8, 19). Edom is the mountain plateau of the Moab and E. of the broad Arabah valley, stretching from the Zered stream (Wādy el Hev) near the Dead Sea to the gulf of 'Aqaba at Elath (1 K.9.26). 100 miles N. and S., and about 20 miles from mount Hor (Num.20.23) eastwards to the desert. The plateau is called the "field" or "pasture" (sāde) of Edom (Gen.22.3; Judg.5.4). It rises to 5,300 ft. above sea-level E. of Petra, and slopes gently E. to the desert (middābār), while on W. steep ridges, with crooked gorges, fall towards the Arabah valley and the Red Sea. It is known to S. the Dead Sea, from a watershed (S. of Petra) where the level is about 600 ft. above the Red Sea. The rugged mountains, including Hor (4,580 ft.) and the granite peaks in the S. (4,200 ft.), originate the later name (Gebalitis, 2 Ant. i. 2; 3 Ant. ii. 1), still given to the entire mountain range. On this is the underlying granite and porphyry rise cliffs of red and yellow sandstone surrounded by hard limestone, while soft yellowish limestone forms the plateau above. The rain sinks through this to pour down the gorges of hard stone in such brooks as Zered. The plateau is bare, with scattered bushes of broom and hibiscus, and grass in spring; but remains of an oak forest occur on it near Petra; and in places where there is water—as at Tophel, Ma'on, and Petra—the olive, fig, pomegranate, and vine are still grown. The mountains are covered with snow in winter (see Job 6.16, Uz being in the northwest); and the Red Sea extends half-way N. and S. on the W. border. [Sela—It is identified by Josephus (4 Ant. iv. 7, vii. 1) with Kadesbarnea, which was on the border (Num.20.16), and with Reqem (many coloured), a name taken from the remarkable colouring of the sandstone. The Targum of Onkelos agrees, and Rece'm de-gaza (of the ravine) is the present el Ji. Other places in Edom include Ilim (Aimach), Tophel (Tāṭilāch), Bozram (Būsirech) towards the N., and Ma'en (Mān) S.E. of Petra, with Elath (Ailāḥ) on the Red Sea shore. In the 4th cent. B.C. the increased power of the Edomites caused the name Edom to be extended over the desert to the W.; and about 168 B.C. Idumea reached W. as far as Adoram and Mazarah (13 Ant. ix. 1) and N. to Helbon, Beth-zur being the border fortress of the Jews (1 Mac. 15.29, 61.5, 345, 6.31; 2 Mac. 12.32; Mk. 3.8.—Inhabitants. The first inhabitants were Horites, who called themselves "children of Seir" (Gen. 36.20; Deut.2.12), who were conquered by the sons of Esau. The Ben Hasan picture in Egypt (12th dynasty, i.e. earlier than Abraham) represents nomads from Aduma with a gazelle and an ibex as presents, driving asses, armed with spears and bows, and playing on a ten-stringed harp. They appear to be Semitic, and the later Edomites were akin to the Hebrews. In the Captivity Petra became the capital of Ishmaelite Arabs from S.E. called Nabatheans [Nebiatoth], trading as a free people with Egypt and Assyria, and powerful in the Sinaic desert. The Edomites worshipped many gods of the 'children of Seir' (2 Chr. 25.14, 15, 20), and Arab deities such as 'And (Uz), the chief one apparently being Qaus, or Qushi, "the bow god"—probably the sun—whom Josephus calls Koze (15 Ant. vii. 9), and whose name perhaps appears in those of the Edomite rulers Qaus-malka, Qaus-gabri, and Costobarus. The Edomite language appears to have been Aramaic even before the spread of the Nabatheans.—History. The original inhabitants obeyed "dukes" or "leaders" (allāphēm; Gen.36.15; 1 Chr.1.54), and these, among the children of Esau in the time of Moses, were organized under a king (Ex.15.15; Num.20.14); one of these "dukes" found himself an hotspur in the battle of the Red Sea, (Gen.14.24). Israel respected the Edomite independence and, passing S. from Kadesh-barnea, struck E. to the main N. trade-route on the plateau, which led from Elath (Deut.2.8) to Ijeabarim (Aimach) on the border of Moab (Num.33.44), near the source of the border stream Zered (Num.21.13). The names of the Edomite kings ruling before Saul are given (Gen.36.31-39; 1 Chr.1.43-51), their native places being Dinhabah (perhaps Dâneh), Bozrah (Būseirech), Avith (Aimach), Remonith on the Ephrathites, and Pal (Pal). Hadad, the last of these kings (1 Chr.150; 1 K.11.14-22), or a son so named, fled from David to Egypt, and returned with a royal bride after David's death. Edom was then restricted to mount Seir (Jos.15.1; Judg.5.4). It was attacked by Saul (1 Sam.14.47), and conquered for David by Joab (2 Sam.8.13, 14; 1 Chr.18.12, 13) after a great battle in the "valley of salt" (see below) near Petra. Edom had a trading fleet in Elath of Edom (1 K.9.26; 2 Chr.8.17), and the king of Edom aided Jehoram and Jehoshaphat early in the 9th cent. B.C. in their attack on the S. border of Moab (2 K.3.8, 20), where an unexpected stream flowed down the valley—probably the brook Zered. A few years later Joram of Judah was defeated in an attempt to quell a revolt in Edom (2 K.8.20; 2 Chr.21.8-10); but Amaziah, late in the same century, took Sela (Petra) after another battle in the "valley of salt" (2 K.14.7; 2 Chr.25.16). In 734 B.C. Tiglath-pileser III. of Assyria conquered Qaus-malka, king of Edom; and in 715 B.C. Sargon advanced thence against Thamud Arabs to the S. Semacherib, in 702 B.C., claimed Airamnu of Edom as a tributary, and Esar-haddon received tribute about 650 B.C. from Qaus-gabri of Edom. The S. Arabs invaded Edom about 550 B.C. and the Edomite power was weakened by his brother's rebellion in Babyl. on, but the Nabatheans took the side of the Assyrian monarch, so that Edom escaped
his subsequent revenge when Babylon fell. After 600 B.C. Edom appears to have regained freedom, though impoverished (Mal.1.4) by the wars; and the Nabateans contended with the Gk. kings of Asia (see Dan.11.41), though the Idumeans were defeated by Judas Maccabaeus at Akrabim (1Mac.5.3; 72 Ant. viii. 1), and finally compelled to become circumcised (13 Ant. ix. 1) about 139 B.C., under Simon the brother of Judas. Idumean power increased greatly in 47 B.C., when Antipater became ruler of Palestine, and his son Herod—regarded only as half a Jew (14 Ant. xv. 2)—established his own brother-in-law, the Idumean Costobarus, priest of Koze, as ruler of Idumea and Gaza (15 Ant. vii. 9; 20 Ant. ix. 4). The Romans held Petra after 105 A.D., and Edom then became a Roman province; but the Nabateans retained considerable independence, and were enriched by trade. Their capital was Petra, and though inscriptions in the Sinaitic peninsula continue as late even as the 4th cent. A.D. Coins of kings bearing the names Malik, Hareth, Dabel, Gamalith, and Sukamitan have been found (Taylor, Alphabet, i. pp. 328-332) belonging to the later ages of Idumean freedom. The Idumeans were not a conquered people. The account (4 Wars iv. 1) proved an element of weakness to the Jews. Edom was indeed always regarded as an enemy by Hebrews from the time of Moses, and Edomites probably aided the Babylonians to reduce Jerusalem c. 600 B.C. See Num.24.18; Ps.80.8,83.6,137.7; Is.11.4,13.4.5 (Isaiah, a w. in Jos., 89.1; Joel iii. 1); Jer.4.7,27; Ezek.25.12,29 (kings of Edom c. 600 B.C.). 40.11 (Jews in Edom c. 588 B.C.), 49.7,13,18,20,22; Lam.4.21; Ezek.25.12,29 (kings of Edom c. 568 B.C.), 36.5 (Idumea, R.V. Edom); 1Jl.3.10 (Edomite violence against Israel c. 700 B.C.); Am.1.6.2.1 (the bones of a king of Edom buried for lime c. 760 B.C.), 3.12; Ob.1.9 (mount Esan); Mal.1.4. These notices agree, as the history, and with the Assyrian statements. [NEBAIOTH] [C.R.C.]

Edrei.—1. One of the two capital cities of Bashan (Num.21.33; Deut.4.3.10; Jos.12.4), where a victory was gained by the Israelites over the Amorites under Og the king. The ruins of this city still bear the name ed Der'ahh at a town of 4,000 inhabitants 25 miles E. of Gadara (Schumacher, Across the Jordan, pp. 121-148).—2. A town allotted to the tribe of Naphtali, and situated near Kedesh (Jos.19.37). Probably the village Ynte, 11 miles W. of Kedesh. [C.R.C.]

Education.—There is no separate account of Hebrew education till c. 200 A.D., nor ought we to expect one of a subject that would not suggest itself for description; but we can gather from inference much clearer information than might be expected. It is evident that the education of children was commanded by God (Ex.13.8,14; Deut.4.9,10,6.2.7,20.11.19; Sus.5; Josephus, Contra Apion, 17); also that till after the Captivity the parents, both father and mother, were the teachers. [FAMILY.] It is probable that the boast of Jesus the son of Sirach (prolog.) is correct, that the Hebrews "ought to be commanded for learning and wisdom"; though their education was confined in grammar, as the subject of teaching was always the law. According to a very late description (Pirke Aboth v. 21), boys at 5 years old began to learn the Scriptures, at 10 the Mishna, at 13 they became subject to the whole law, at 15 they entered the Gemara. There is no certain evidence that boys were taught reading and writing before the Captivity (Judg.5.14 does not help us; see R.V.), but it is highly probable; the alphabetical psalms and also the fact that the Hebrew language before the invention of the vowel points was extremely difficult to read seem some evidence for this. Schools there were none in this period (Schools or Prophets); but that the people generally were educated is evidenced by, e.g., the commercial and intellectual activity of the reign of Solomon. With the return from the Captivity a new era in the history of education begins, due chiefly to Ezra the scribe. Synagogues are built and increase rapidly, and were similarly settled, and the scribes were teachers who did their work well, though not at first as elementary teachers; but elementary education soon became general, and it was considered unpatriotic and irreligious not to be able to read. The education of girls was not neglected; see Ps.31.8. The Bible gives no special regulations for the education or the training of women, but notice is given of the education of the children of Edom by mothers; and the fruits of girls' education were not neglected, for the canticle of Songs and the book of Proverbs are a compendium of wisdom. The w. of the time was not for the reading or writing of poetry, but rather for the instruction of the subject of the law, that is, the study of the Talmud, or the study of the law, and the Children of Israel were taught to recite the w. of the law in the temple, and were taught, though not at first as elementary teachers, to read and write. There is no separate account of the children, but the education of the Hebrews in this period should be regarded as a part of the education of the Hebrews, and as such must be considered in the light of the education of the Hebrews. The education of the children was not confined to the schools, but was exercised in the home, and the mother was the first teacher of the children. [FAMILY.] The education of the children was not confined to the schools, but was exercised in the home, and the mother was the first teacher of the children. [FAMILY.] The education of the children was not confined to the schools, but was exercised in the home, and the mother was the first teacher of the children. [FAMILY.]
ELEPHANTINE AND EGYPT.

5:12; 1Sa.3:1; cf. also Ro.12:7. From these we gather that there was no fixed nor definite place for the διδακτής, but that the work of teaching was looked upon as one of the most important in the Church. There are three prominent features with regard to education in the Bible: (1) It is by the command and sanction of God the Father. (2) It was the practice of God the Son. (3) It is now to be considered as the work of the Holy Spirit. Who is guiding into all truth. The subsequent history and development of education are outside our present range. The following books may be referred to: Didaché, 15, and Dr. Bigg’s Commentary, p. 271.; Dict. of Christian Antiq., “Catechumen”, Bishop Wordsworth, Ministry of Grace; Church Work, 93 ff. (Oxford Lib. of Practical Theology); Harnack’s ed. of the Didaché; Weizsäcker, Das Apostolische Zeitalter, Ed. E. Long, Life and Times of Jesus the Messiah. [B.R.]

Egypt, one of David’s wives, and mother of his son Ithream (2Sa.13:3; 1Cr.3:3). According to Heb. tradition, she was Michal. [Eglogim, a place named only in Is.15.8, apparently as one of the most remote points on the borders of Moab. Probably the same as EN-EGLAIM.

Eglon (circle), king of Moab. He oppressed Israel, and was assassinated by Ehud (Jude.3:12 ff.). [EHUD.] [H.M.S.]

Eglog, a town of Judah in the low country (Jos.15.39). Eglon was one of a collection of cities which were to be possessed by Benjamin and Jerusalem by the Hebrews which, if attacked by its ally Gibeon (Jos.10.8). The name survives in the modern Jilán, a mass of ruins in the plain 16 miles N.E. of Gaza. [C.R.C.]

Egypt (micravim or erev micravim; Ἑλευθερία; Αἰγύπτιος), a country occupying the N.E. angle of Africa between lat. 31° 30' and 22° 30'. Its limits appear to have been very nearly the same under the Pharaohs; the most southern province was the district around the city of Elephantine, which was built opposite the present city of Aswan.—Names and Divisions. The common name in the Bible is micravim (Gen.10.6; 9.10.13; Ex.7.10, etc.) in a dual form. There has been much discussion about this name, which is not Egyptian, and has been interpreted as meaning the two enclosures, the two districts, or the two basins. The dual form is in accordance with the Egyptian custom of considering Egypt as divided into two regions—the S. which is always named first, and the N. The usual emblem of royalty is double—the reed for the S. and the wasp for the N. [MIZRAIM]. Another name met with in Scripture is the “Land of Ham” (Ps.105.23, 106.22), which refers to Ham, one of the sons of Noah, and has a great likeness with the Egyptian name of Kem or Kemi, the hieroglyphic for which is the tail of the crocodile, and means “the black one” from the colour of the black soil. It is doubtful whether the name Rahab (Ps.78.39, 89.10; Is.51.6) always means Egypt. [RAHAB]. The name Αἰγύπτιος of the kind of names previously given seems to be a transcription of the word Akeh or Akeb, one of the names of the Nile. The superfluities of the land is at present over 11,000 sq. miles, equal to 7,300,000 acres, of which 4,625,000 are cultivated. The area of cultivated land is probably a good deal smaller than in ancient times, especially in the Delta, where Lake Menzalah covers a considerable space, part of which was called “the lake of Egypt,” and where the Wady Tumilat, which is now nearly barren, was a flourishing land with important cities. The extent of the cultivated area is not exactly the same every year, since it depends entirely for its irrigation upon the inundation of the Nile. From a very remote period the land was divided into administrative districts, called by the Egyptians ήσεβ or lesh, and by the Greeks nomes. The capital was the abode of the divinity peculiar to the province. The number of the nomes has varied, chiefly in the Delta. The later hieroglyphical lists give 42 or 44. Upper Egypt and Lower Egypt having each 21 or 22.

—General Appearance; Plants and Animals. Egypt, as Herodotus says, is a gift of the Nile. It is a long valley, extremely fertile, owing to the inundation. A little below the present city of Cairo the valley expands into the Delta, a vast flat tableland watered by the branches of the Nile, and numerous canals. In former times the river had seven branches. Rain is not frequent on the northern coast; while in Upper Egypt there are only one or two showers in a year, though they have occurred more frequently of late years. Rocky and barren deserts were familiar to the ancients. Some geological changes have occurred even in historical times. N. of Suez the ground has risen, causing the Red Sea, or the Arabian Gulf, which extended as far as the middle of the isthmus, to retreat to its present limits; while near the Mediterranean coast it has sunk. Several ancient cities lie beneath the waters of Lake Menzalah. The wealth of the land has always been agricultural. In all times Egypt produced great quantities of corn. It often happened that, like Jacob and his children, the neighbouring nations had to draw corn from Egypt. There are in the tombs detailed pictures of breaking up the earth, ploughing, sowing, harvesting, burning the straw (which was cut by oxen or cows unmuzzled), and storing the corn in granaries. The Egyptians grew vines more than at present, and had various sorts of wine, each having its special name. These came from the Delta and from the oases in the Libyan desert. The olive-tree and date-palm were also cultivated. The Egyptians had quantities of live-stock—oxen, sheep, goats, and asses; also various kinds of domesticated antelopes, besides many birds, geese, ducks, pigeons, cranes, but not the common fowl. Our information as to the tenure of land is derived chiefly from documents of the Ptolemaic epoch. But the Gk. kings seem to have made very few innovations. It appears that a great quantity of land was owned by the king, who made grants to the temples and to his officers; private property existed, but probably most of the agricultural population were tenants. The land-tax and the land-surveys were very advanced; it was absolutely necessary in a country where the landmarks were often carried away by the inundation. An important income was also derived from
the fisheries, especially those of lake Moeris, a basin outside the valley occupying part of the present province of the Fayûm. Trees were very few—the date-palm, the acacia (one of which, now called sunu, has a useful wood), and the sycamore are nearly all that are seen. The cereals mostly cultivated are the wheat and the dûra. Its fruits and vegetables have been famous since ancient times, especially its melons and onions; we see presented as offerings grapes, figs, pomegranates, cucumbers, and lentils. The papyrus provided a flourishing industry. It probably came from the Upper Nile, and was used for making paper; it was also boiled and eaten as food; light boats for navigating the canals were made of its stalks. It has now disappeared entirely from Egypt. Several plants have been discovered in the wreaths of mummies which do not belong to the flora of Egypt; among them the so-called persea (Mimosaops Schimperi), the entire which was an emblem of the sea, and its red berries. Cattle were probably more abundant than at present. The Egyptians had several breeds of oxen, both hornless and horned; and they seem to have domesticated animals which are no longer so used—the sculptures show large herds of several kinds of antelopes, e.g. the leucoryx of which they ate the flesh, and which were sacrificed with the oxen. Goats and sheep were very abundant; swine are found as early as the 4th dynasty, but disappear afterwards. The camel is never seen in the pictures; while the horse appears only after the invasion of the Hyksos, who probably brought it with them from the horse throve so much in Egypt that it was exported to the neighbouring countries. We hear of Solomon obtaining horses for his chariots from Egypt (2Chr.1.16,9,28). The horse was used also for ploughing. Asses were very numerous, as they are now. We can trace a strong individual, e.g. the leucoryx of which they were such as hounds for hunting the gazelle, mastiffs, and spits. Wild animals abounded in the desert—hyenas, jackals, foxes, and wolves. The lion was found farther N. than now. The cat was a sacred animal, but was not domesticated; the kings and the rich liked to have strong specimens of it. They were on the top of a kind of leopard used for hunting, and elephants. The chase of the hippopotamus is often seen in the pictures. It is quite possible that in old times this huge animal came down as far as the Delta. Among the birds the falcon, the vulture, the ibis, the plover, were sacred, as being the emblems of divinities. The chase of water-fowl was a favourite sport of the rich. The crocodile is usually called in the Bible a dragon; it was found in large numbers, but has now retreated above the second cataract. It played a most important part in religion; like the hippopotamus, it was in some places the emblem of Typhon or Set (the evil principle), and therefore regarded as impure. In other places it was an object of great reverence, fed by the priests and worshipped as a god. [NILE.] The serpent also was considered as an emblem of eternity and of royal power; there are several kinds in the country, some of them, like the horned asp or cerasites, very dangerous. Frogs are very numerous; one goddess had a frog's head. The tadpole is the hieroglyphic sign for 100,000. The scorpion also was sacred. It is common among the ruins. Its sting is dangerous, chiefly in summer. Clouds of locusts are rare; they are more frequent in Nubia than in Egypt. Flies and mosquitoes are among the permanent plagues of the country—Inhabitants. The old inhabitants certainly belonged to the Caucasian race, and to the branch of the Noachian family called Hamite, or sometimes Cushite. The great number of skulls which have been found in the graves of various epochs show that they were not Negroes, although some anthropologists pretend to have recognized a negro influence in the type. The question of the cradle of the Egyptians is much discussed. For a long time they were considered as invaders coming from Asia through the isthmus of Suez. But since the prehistoric civilization, the Stone Age, has been discovered along the whole course of the Nile, it is impossible not to consider the bulk of the population as being autochthonous, of African origin. An foreign element may have mixed with them and contributed to develop their civilization, as the Aryans have done in some parts of Europe. These foreign conquerors, whom some consider to have been Semites, others Hamites, must have come from Asia or Arabia, either through the harbour now called Kosseir and the valley of Hamamat, or more S. through Abyssinia or Somaliland. After having reached the Upper Nile, they came down the river and arrived in Egypt, where, as we see, the traditions point to conquerors coming from the S. For them the W. is the right side—that is, they turn towards the S., which is always mentioned before the N. They seem to have been closely connected with the land of Punt, the African coast of the Red Sea. They had a strong individual, e.g. the wall, with which they could not reduce to slavery. They speak of the "vile" Cush and the "vile Kheta" (Hittites). Language. Their language is known to us from its earliest time. We have inscriptions of the first three dynasties; but not until the fourth have we texts of any length, and these have lasted until Roman times, during a period of more than 4,000 years; and considering that long duration it may be said that there has been little change in the language. It belongs to the Hamitic branch, as do the Berber and some languages spoken in the Soudan and Abyssinia, e.g. the Galla, Bedja, and Somali. It has some affinities with the Semitic languages, but must not be called Semitic. The writing is hieroglyphical. It is a transition from the picture-writing to the phonetic. A sentence is generally a mixture of three kinds of signs—the ideographic, the syllabic, and the alphabetical; hence there is no orthography in our sense of the word, and a word can be spelt in various ways in the same text. Hieroglyphics have also an ornamental purpose, they are the accompaniment of sculpture, they are used on the monuments and in sacred books; but such writing being difficult and slow, the Egyptians adopted for common use a shorthand which is called by the quite inade-
EGYPT

The Egyptian name of "hieratic," and in which there is an equivalent for each hieroglyphic sign. Under the 22nd dynasty there appeared a new simplification, the "demotic," parallel with a modification in the language. These signs are difficult to recognize, but there are still the three kinds. The Egyptians never adopted a purely alphabetical system, until they rejected entirely their own script, and adopted the Gk. alphabet with four additional signs, which constitutes the Coptic alphabet. Then the language was much altered under the influence of Greek, Coptic, which was spoken and written by the Christians, is still the sacred language of the Copts, who read their prayers without understanding the meaning. It seems to have only ceased to be a spoken language at the end of the 15th cent.—Religion.

The religion has often been viewed in a false light, owing to the Greeks having translated into their own language the names of Egyptian gods, thus giving an utterly false idea of their nature and attributes. It is not a well-coordinated system, even if we consider only the doctrine of the priests. It is pre-eminently a worship of nature and of its leading manifestations. To a greater or less extent, all the attributes of the deity are given, has a different name according to the localities—he is called Amen at Thebes, Tum at Helipolis, Phtah at Memphis, Horus at Edfu, Hathor at Denderah. But if we study the character and attributes of each, we find that, with slight differences, they are very much alike. They differ in their names and in their residences and must have been originally the local gods of the several tribes which settled in the country and whose union constituted the empire. They were identified with the most beneficial elements—the sun, earth, water.

All manifestations of nature, all natural forces, were gods, but they are not separated from the creator; they are his limbs: hence the pantheistic character of the religion is evident. The cosmogonic doctrine is that of Helipolis, which seems to have been adopted more or less throughout the land. In the Pythagorean schools about 100-200 B.C., the name of all these nature-gods, is found in one of these—viz. Osiris, the judge of the dead. His worship seems to have originated at Abydos. It is before him that the judgment scene described in the Book of the Dead has to take place. The heart of the deceased is weighed in his presence, while the deceased declares that he has not committed one of 12 great sins, thus certainly pointing to a high moral law. The fate of the soul after death is something very vague. It is described in the Book of the Dead (a copy of which, written on papyrus, was often put with the mummy); sometimes it is painted on the walls of the tomb. The deceased may go through many transformations, he may enjoy great felicity, encounter great dangers, from which he will be delivered by magic words; but there is no definite future, nothing to which every one is subjected. The human personality consists of three things: of the body, the soul or image (which follows man even during his lifetime), and the soul. None of these three elements must perish, or the person himself would be annihilated; especially must the body be preserved from corruption. This is the reason for mummification. The Egyptians adopted as emblems of the gods the figures of animals. The falcon was the representative of Horus, the ibis of Thoth. The this or sacred bulls were worshipped: Apis at Memphis and Mnevis at Heliopolis. The Egyptian religion had a very complicated ritual, a considerable number of festivals and ceremonies, and a powerful body of priests. Under the Romans it degenerated into gross superstition and magic, and therefore fell into disrepute—government. The government was inef- fective. The king, whose power was limited by law and custom, succeeded to the throne by inheritance; he was at the same time the chief priest and the head of all that was connected with religion. On the sculptures he is always represented as fulfilling the duties of a priest. Queens occasionally occupied the throne. We have only scanty information as to the laws of Egypt during the Old and Middle Empire. Under the Theban dynasties we have records of trials where capital punishment was frequent. Our knowledge of the civil law of Egypt is derived from the records of Amun. Under the Ptolemies it was apparently most precise and definite; it probably had a much older origin, as the Macedonian kings imitated what had been done by their native predecessors.—Army.

The Egyptians were not a warlike people; during the first dynasties we see them beyond the Nile, fighting against foreign invaders, especially the Saimatic Bedouin. They had then no regular army; the troops consisted of levies mostly untrained and undisciplined, among which were negroes from the Soudan. But after the country had been freed from the foreign raiders, called the Hyksos, the kings became conquerors, especially under the 18th dynasty, the most powerful of all. The kings had to fight the Ethiopians, their neighbours on the S. who were subjects of Egypt, but who generally revolted at each change of reign, and in the E. the nations of Palestine and Mesopotamia. At this time the Khos-Hor, that is, the chariots armed with lances and a kind of falchion, and had large shields; the light infantry were the archers, who had also hatchets. During the 19th dynasty the Pharaohs began to enlist foreign mercenaries: the Shartani (who were a metal helmet and who were a Mediterranean nation), and the Mashonash or Maxyes from Africa (who became a guard like the pretorians of the Janissaries). During the 26th dynasty Greek and Carian mercenaries continually increased in number in the Egyptian armies, which in the wars against the Persians were almost entirely composed of these foreigners, who could make their own conditions and could greatly influence the succession to the throne.—Domestic Life.

As to the domestic life of the Egyptians, we derive much information from the papyrus, charts, and mummies. The heads of the families were the men; the women were usually secondary, though the high position occupied by women; we often see them represented with their husbands, and styled "a palm of loveliness." Polygamy was certainly the rule, but not for the kings, with whom

polygamy seems to have been frequent for political motives. A marriage between two royal families was generally the token of an alliance between the two states. The manner of life was that of a highly civilized people; they seem to have been of a merry and cheerful nature. They liked social amusements, banquets where the guests were amused by instrumental music, songs, and dancing girls. They practised sports, in which the women took part. They had several games, one of which was draughts. Their funeral ceremonies varied according to the rank of the deceased. There was a procession, and the mummy, lying under a canopy on a boat, was carried across the Nile. On the shore it was put on a sledge drawn by cows, which brought the coffin to the mountain. It was accompanied by waiting-women, by attendants, and by a priest reading the Book of the Dead. The Embalming of the body lasted many days; this was the occupation of embalmers who dwelt at Thebes, on the West side, among the tombs.—Literature and Art. There is an Egyptian literature of a very varied character. We know of several libraries built in the temples, which contained the so-called hermetic books, the sacred books attributed to Thoth, of which Clement of Alexandria says there were 42; they were songs in honour of the gods, descriptions of the royal life and its attributes, astronomical works and horoscopes. The books of the hierogrammatist referred to the art of writing, the geography and course of the Nile. The books of the Stolistes were devoted to all the ordinances concerning religious worship. The sacred books par excellence were those which contained the laws and everything concerning the gods and the education of the priests. Medical science was also the subject of six hermetic books. The Book of the Dead is a collection of hymns and prayers supposed to be pronounced by the deceased when he reaches the other world; they describe all that may happen to the soul after it has been separated from the body. This book dates from the beginning of the empire, and was still placed with the deceased in Roman times. Religious and funeral books are by far the largest part of the literature, but we have besides papyri on mathematics, on moral teaching, descriptions of travels, many tales (of which the old Egyptians seem to have been very fond), magical books, correspondence between a teacher and his pupil, and what we call poems, i.e. narratives written in a poetical style, though we have not yet reached an actual verse. Unfortunately, we have no historical books, except merely a papyrus giving a list of kings with the number of years of their reigns. This precious document, called the Annals of Turin, is in a very fragmentary state. Egyptian art is perhaps the oldest we know. It has certainly a native origin; we cannot trace in it any foreign influence. It reached a high point of development when many of the neighbouring nations were still barbarians; but after that did not progress, probably because the Egyptians never cultivated art for its own sake and never strove to reach ideal beauty. Art was always subservient to the beauty of the constructions they raised, but by their colossal and gigantic proportions. In sculpture they showed remarkable skill in working very hard stones; they made very good portraits in stone or wood, but they never got rid of what are called conventions—remains of the childhood of art which they thought it unnecessary to shake off. These conventions are still seen in pictures and also in reliefs. Both of these are intended as a kind of language for the eye, therefore are always accompanied by their explanation in hieroglyphics. Decorative art takes an important place among their industries. Jewellery was carried to a point of perfection which is even yet unsurpassed in some respects; and the furniture lately found in royal tombs is truly remarkable both for its good taste and excellence of workmanship. Egyptian linen had a great repute; we have many specimens of the art of the weaver in the mummy cloths, of which there are various qualities, but they are not generally coloured. The early Copts seem to have preserved the tradition of the
tissues in brilliant colours, which they used for their religious garments.—Magicians. The Bible often speaks of the magicians of Egypt (Gen. 41.24; Ex. 7.11, 8.18). Magic certainly played an important part in the religion of the country, and the magicians who belonged to a college of high standing were much considered. We see them occasionally in the processions which took place on the great festivals; they rank with the highest class of priests. [Magic.]

—Chronology. There are few subjects upon which the views of Egyptologists vary more than upon chronology. It is based on astronomy; and although we have a few astronomical representations, they are so intermingled with mythology that it is hardly possible to make any use of them. According to the idea first advocated by Lepsius, the Egyptian had 2 different years, a vague year consisting of 12 months and 5 intercalary days, and a fixed year of 364 days. These years were based on the same cycle, the month Thoth (July 20, Greg.), with the heliacal rising of Sothis; but as after 4 years there was a difference of one day between the 2 years, it is admitted that they made use of the Sothiac cycle, 1,460 fixed years corresponding to 1,661 vague years. After that lapse of time the 2 years began again on the same day. It has been denied that the Egyptians knew that cycle; however, Brugsch maintains it, and states "that the correspondence of the vague year with the fixed year is indicated through the phases of the moon, the stations of the sun, the beginning of the seasons, and the rising of certain stars." Mahler bases his new system of chronology on dates fixed by the phases of the moon. It is extraordinary how little importance the Egyptians seem to have attached to astronomy, except as connected with religion; no eclipse is recorded, we do not even know their word for "celestial," whereas we are much more fortunate with historical chronology. Our best document is the before-mentioned Annals of Turin, which is broken into 164 pieces. We have three sculptured lists of kings, two of which come from the temple of Abydos; they give the names of the kings of the first 30 dynasties, beginning with a king of the length of his reign; but as his lists have come to us only third-hand, through the Christian chronographers, the numbers he gives are hardly reliable, and but seldom agree with those found on the monuments. However, his division into 30 dynasties has been preserved, the 30th being that of the last native Pharaohs, when Egypt was finally conquered by the Persians. Several authors have accepted the numbers of Manetho, others have shortened considerably the time assigned by him to various dynasties. The first historical king is dated by the following authors: Manetho, 5436 B.C.; Mariette, 5604; Brugsch, 4400; Petrie, 4777; Ed. Meyer, 4135. —History. We now give a very brief sketch of the history, insisting chiefly on the general features and on the facts connected with Scripture. During the last ten years a great deal has been discovered concerning the prehistoric state of Egypt, when the race which occupied the land was not advanced beyond the Stone Age. We cannot but suppose that there was an invasion coming from Arabia, which may not have been very numerous, but which conquered the native race, after which civilization began to grow. The first historical king is Menes or Menefer. His name has been found in hieroglyphs, but our only information as to his life is from Greek writers. He is said to have succeeded the Egyptians of the Past or of the Memphite dynasty, and to have founded Memphis, called after his name Mennefer. The very few monuments which we have of the first three dynasties are found mostly in tombs at Abydos. With the 4th dynasty we see a sudden development of every art and of literature. Then the pyramids were built and the graves adorned with magnificent sculptures, such as have not been surpassed at any time in Egyptian history. This brilliant period lasted through the 4th, 5th, and 6th dynasties, and is one of those of which we have the greatest amount of information. Afterwards there is a gap. We know hardly anything of the succeeding dynasties until the 10th, when a few monuments show that the empire was divided and that the central power was probably Heracleopolis. The 11th dynasty took Thebes as its capital and founded this city's influence. The 12th dynasty extended its rule far into Nubia; but we only see the peaceful invasion of foreigners, evidently from the E., who later on came in increasing numbers, conquered the country, and established rulers of their race. These invaders have been called Hyksos; they evidently came from Mesopotamia. The Mesopotamian civilization of their subjects, in everything except religion, and this exception is the reason for their always remaining an object of hatred to the native Egyptians. As the kings were Mesopotamians, they received with favour their kindred the Hebrews. The Hyksos rulers form the 15th and 16th dynasties. It was during their rule that Abraham came into the country, and afterwards Joseph and his family, who were settled in the land of Goshen. The Christian chronographers say that it was under Apephes, one of the last of these kings, that Joseph was raised to his high position. Very soon afterwards the Egyptians shook off the foreign power, and native Pharaohs came back to the throne. The 18th and 19th dynasties were those of the great conquerors. The oppressor of the Jews, the king "which knew not Joseph" (Ex. 1.8), was probably Ramess H., and it seems probable that the Exod., when Israel was in bondage under Pharaoh, was during his reign. Several times afterwards the Israeleites came in contact with the Egyptians. The head of
the 22nd dynasty, Sheshonk, called in Scripture Shishak, invaded Palestine under Rehoobam, and carried away the treasures of the temple (1 K.14.25; 2 Chr.12.2-9,11). A record of his campaign is engraved on a pylon at Thebes. The first king of the 25th dynasty, Shabaka, called in Scripture So, received messengers from Hoshah, king of Samaria (2 K.17.4); but after Samaria had been taken by Sargon, Shabaka was routed at Raphia by the Assyrians. His son Shabatak also was beaten by the Assyrians, and was driven from the throne of Egypt by Tirhakah, the Ethiopian who was the persevering, though finally unsuccessful, foe of the Assyrians. There was some revival of the Egyptian power under the 26th dynasty, the Saite kings who came to the throne with the help of Greek and Carian mercenaries. The second king, Necho, wishing to invade Assyria, asked Josiah to let him pass through his territory. Josiah tried to oppose him, but was defeated and killed at Megiddo (2 K.25.20): the conqueror made Jerusalem tributary and put Jehoiakim in the room of Josiah his father (2 K.23.29-35); Necho himself was routed by Nebuchadnezzar.

After the 26th dynasty came the struggles of Egypt against the Persians, with alternations of successes which freed Egypt for a time, and of defeats which made her subject to the great king, until, at the end of the 30th dynasty, Nectanebo was compelled to fly to Ethiopia before Artaxerxes Ochus. He was the last Pharaoh; after him Egypt became a Persian satrapy and was conquered by Alexander. Since Nectanebo no native ruler has ever reigned over Egypt, and the prophecy of Ezekiel has been literally fulfilled, "There shall be no more a prince out of the land of Egypt" (Ezk.30.13). When Joseph "took the young child and his mother by night and departed into Egypt" (Mt.2.14; cf. Luk.1.58), the country remained free for seven years until the flight of Herod, king of the Jews, from Judaea to Egypt. The 27th dynasty (in the Greek record) had in its line Sheshonk, ruler of the 26th dynasty, who was called Zedekiah by the Jews (2 K.25.26), but was a different person. He was the last native king of Egypt, and was succeeded by Nectanebo II, a native of the 30th dynasty who claimed descent from Nebuchadnezzar (2 K.24.25).

E'ker, a descendant of Judah (1 Chr.2.27).

E'krev, a name of a notable town in the Transjordan (Jos.13.31).

E'kron, one of the five cities of the Philistine lords, not conquered by Joshua (13.3). It lay on the borders of Judah and Dan (15.11, 45.46): it was given to Dan (19.43), but not conquered (LXX, Judg.1.18), and it was held by Philistines in the time of Samuel (1 Sam.5.10, 6.17, 7.4, 17.52). It had a shrine of Baal-zebul (lord of Asshur, or Baal-zebul) in Canaanite times (Gen.14.13). It was the most important city of the Philistines, and was the capital of the Philistines (2 Sam.5.20), and was as large as Gaza (2 Sam.5.24). It was called the "bright star of the Philistines" (Isa.23.8). It was a place of great importance, and was captured by the Israelites in the time of Joshua (Josh.13.31), and was taken by the Philistines again in the time of David (2 Sam.5.20).

E'levim (strong).—1. Son of Bilhan, a Benjamite (1 Chr.7.10, 8.6); see below.—2. (Judg.3.12ff.) It was probably after the inter-tribal war, when Benjamin was weak, that Egton king of Moab, allied with Ammon and Amalek, seized Jericho and oppressed the Israelites (or some districts) for 18 years. Then Ehud the son of Gera, a left-handed Benjamite, was sent with a present (tribute). On returning Ehud left his followers at Gilgal by the quarries (terminal columns, perhaps those mentioned Jos.4.20). He stole back to Eglon, professing to have a secret. When the attendants had withdrawn from the summer-palour (roof-chamber), Ehud said his message was from God. The king rose in reverence from his chair; and Ehud drew the double-edged dagger, concealed by his clothes on the right thigh, and using his left hand stabbed the fat king with such violence that he could not withdraw the blade. He then went out, locking the doors, and escaped unnoticed, probably by the external staircase. It was some time before Eglon's servants dared to fetch the key. [Key.] Meantime, Ehud had gone through to Gilgal to call on the king of the Sidonians, Ephraim. There he raised the people to seize the fords. Ten thousand Moabites were slaughtered, and the land had rest. That the act was not avenged is natural. The power of Oriental kings is personal. Their deaths often lead to a disputed succession. Doubts have been cast on this narrative on the grounds that Gera (Gen.46.21 and 1 Chr.8.3) and Ehud (1 Chr.7.10) are the names of Benjamite clans; but even Budde allows that Ehud may have been a hero who gave his name to a clan. Josephus has embellished the story more suo. He fixes the assassination at Jericho. Sayce (Early History of the Jews, p. 223) believes that this is consistent with the text. Moore suggests the other side of Jordan. His suggestion is not inconsistent with the text, and would account for the fact that Ehud was in time to intercept the Moabite garrison at Jericho. It is noteworthy that Ehud is styled deliverer, not judge, and no approval of his action is expressed.

E'khron, one of the cities of the tribe of Benjamin (Josh.19.35).
to N. As Accaron (1 Mac.10.89) it is noticed as given by the king of Antioch to Jonathan the Hasmonean c. 147 B.C. [c.r.c.]

**Ekronites** (Jos.13.3; 1 Sam.5.10), inhabitants of Ekron; in 1 Sam.5-10 to the LXX, and Josephus read Isrealon.

**El, Eloah, Elohim, Elyon.** El (‘el), the most primitive Semitic word for God (or a god) in the O.T. It appears in Mehujael, Methusael, Mahalalel, before the Flood, in Bethel and Israel in the latter part of Genesis, in Eliseba, Elezer, and several names of leaders of the Exodus in Num.1, and comes down to the N.T. in Immanuel, the name of our Saviour in connexion with His Virgin Birth. It is found in O.T. with the definite article, the El, where the Supreme God, or the God of Israel, is meant.

In a few places it is applied in Isaiah to an idol, but is very rare in the plur., and does not seem to be used of gods in a wider sense. It is joined with titles of deity, e.g. with Elyon (Most High), and specially with Shaddai (Almighty), and with attributes of Jhvh, as jealous, merciful, compassionate, faithful. But it is never used as Elohim is in O.T. narrative, but in discourse or personal relation, or in direct personal connexion. The latter use of El suggests the idea of strong or strength. Eloah (eloah), properly the sing. of Elohim, but very seldom joined with Elohim, as though they were sing. and plur. Is.44.6,8 shows both words: "There is no Elohim beside Me. . . . Is there an Eloah beside Me?" There is no Room: I know not an El, and Elohim are held to be derivatives of El, but the precise sense is not known. Eloah occurs 41 times in the dialogue of Job, where every speaker except Bildad uses it, and appears in parallel with Shaddai to times. It is never found in Genesis or in the narrative of any book in O.T. Its Aramaic equivalent is El, or Elaha, in O.T. Elyon (elyon), unlike the preceding words, is not a word for God, but a name or title of the Deity. Grammatically it is an adjective, signifying higher or highest, and used, like Shaddai the Almighty, for the Most High (God). It first appears in Gen.14, in the name of the Melchizedek who met Abraham, and is the first word of the Elyon, i.e. of God Most High. In this connexion Abraham joins it with Jhvh. It reappears as a patriarchal word in Balaam’s prophecy, between El and Shaddai. Moses also uses it with Shaddai in Ps.91.1. In the historical portions of O.T. it is applied to common objects—the higher gate, the upper pool or chamber, etc. In Deuteronomy it is applied prophetically to Israel, in the Psalter to David, apparently as a type of the Messiah (Ps.89.27), but otherwise only to the Most High. See Shaddai for further illustration of the patriarchal use of the three preceding words. Elohim (elohim) by derivation and meaning belongs to El and Eloah, yet by usage holds a place in O.T. which is absolutely unique: it is the only narrative word for God in O.T. Side by side with this stands another no less surprising but equally certain fact, that the only narrative Name of Elohim (God) is the Hebrew patriarchal designation of Genesis (1-11 inclusive) no word for God occurs except Elohim, and no name of God except Jhvh. Only in the names Mahalalel, Mehujael, Methusael, do we see traces of El, the root word of Elohim. The last O.T. historical writer to whom any large influence in its composition is assigned is also the greatest purist. Ezra, in Chronicles and in the book which bears his name, does not even employ Adonai as the title of the Supreme Being. Elohim in his Hebrew, Elaha in his Aramaic, and Jehovah for the name of God, are all that he admits. Even in Ps.119, which can hardly be assigned to any one else, he uses Jhvh 24 times, and Elohim but once (ver. 115). Elohim as a plur. is used of gods in general, or persons who are God’s ministers of justice and rule to men (‘I said, Ye are gods,” explains this), but far more frequently (quite 12 times as often as any other term) for god in O.T. Elohim stands as a plur. of distinction (pluralis excellentiae) with sing. verbs, adjectives, and pronouns. The narrative name of Elohim is most easily observed in Job and the Abrahamic portion of Genesis. In the narrative of Job, the word for deity is Elohim, and the name of the Deity is Jhvh. In the dialogue Elohim and Jehovah occur often enough to show that the speakers were acquainted with them. But the term Elohim appears rarely, and is generally used for his friends, including Elihu, are El, Eloah, and Shaddai. Even Jhvh, answering Job out of the whirlwind, conforms to this use. And in Genesis the same facts are apparent. The narrator keeps to Elohim and Jhvh. The speakers throughout the story make use of El, Eloah (not Elyon which occurs but seldom in the Pentateuch; in Deut.32), and are acquainted with Elohim, Adonai, Jhvh, and of course with El-Shaddai, but come by slow degrees to the use of Elohim, and never become familiar with Jhvh. The only determined Elohist in Genesis is Joseph, who—though his own name (spelt Joseph in Ps.82) is suggestive of Jhvh (see Gen.30.24)—never names Jhvh, but only Elohim. In the face of these facts, is it possible to divide the sacred narrative between writers who are either Jehovahists or Elohist, but not both? The O.T., as it stands, has one word for God, Elohim, in the name of the God of Methuselah; and the narrative of this Elohim has one name, Jhvh; excepting that in 1 K.3.10, 2 K.7.6, and Dan.1.2. He is called Adonai, which He always is by the Jews in reading the O.T., unless the word Adonai precedes, and then they say Elohim. No such writer as an Adonait having yet been suggested, these three passages do not affect the question. The O.T. narrative, as we have it, is Jhvh-Elohist from first to last. [c.h.w.]

**El la** (1 Esd.9.27) = Elam, 4.

**Eladah,** a descendant of Ephraim (1 Chr.7.20).

**Elah.**—1. The fifth duke of Edom (Gen.38.11; 1 Chr.1.52).—2. The father of Shimeai, 4 (1 K.4.18).—3. Son and successor of Baasha, king of Israel (1 K.16.20-10): his reign lasted for little more than a year (cf. ver. 8 with 10). He was killed, while drunk, by Zimri, in the house of his steward Arza, who was probably a confidant in the plot.—4. Father of Gilo, the last king of Israel (2 K.15.30).—5. The second son of Caleb (1 Chr.4.15).—6. A Benjamite, son of Uzzi, dwelling in Jerusalem in the time of Nehemiah (1 Chr.9.8).

**Elah, Valley of** (valley of the terebinth;
ELAM

1 Sam. 17:2,19,21-9), near Shochoh (Skwezech), where David slew Goliath. It is now called Wady es Säm (valley of the acacia), but still has in it a few terebinths near Adullam. It rises S. of Keilah, and was the great highway from Gath to Hebron, running first N. and turning W. near Shochoh. The place where it enters the Philistine plain was guarded by Gath, 8 miles W. of the scene of David’s exploit. The valley reaches the sea N. of Ashdod. [c.r.c.]

Elam.—1. The name of one of the sons of Shem (Gen. 10:22; 1 Chr.1:17), and also of the country (Gen. 14:1-9; Is. 11:11; Jer. 25:25,49; 34-39; Ezk. 32:24; Dan. 8:2). In Mac. 8:1 it is called Elymais, and in Herodotus iii. 91; v. 49, etc., Kissia. Its position was N.E. of the Persian Gulf and E. of Babylonia—a mountainous tract including a fertile region between the highlands and the Tigris. Apparently it was made up of two provinces, the name of the other being Anzah (i.e. its capital. The capital of Elam was Susa (Shushan). The Elamites spoke a non-Semitic dialect, but the presence of numerous Semitic Babylonian inscriptions implies that their country was an early Semitic possession, hence, perhaps, the statement that Elam was the first son of Shem. Long before the time of Susa (i.e. about 2035 B.C.) it became an important power, and nearly a hundred Elamite kings are known, from Humbaba (killed by the semi-mythical Babylonian hero Gilgames) to Humant-haldâs III. (who, about 635 B.C., was one of the princes who drew Assur-bani-apili’s chariot to the temple Masmâ). Kudur-Nahhunte is mentioned as king and as one of the kings of Elam. Kudur-nahhunte became a chief in the land of the Amorites; Kudur-ku(k)manal (7? read Kudur-lahguanal) is probably the Chedorlaomer of Gen. 14:16. He who waivered in the same district. About 1580 B.C. Hurbatia challenged Kurgalzu of Babylonia to battle, but was defeated. Hurbatia abandoned these unfortunate in the time of Addu-sum-iddina (c. 1180 B.C.), and Shutruk-nahhunte (c. 1115 B.C.) was also successful against the Babylonians, and some of the spoils which they carried off are now preserved in the Louvre. In 721 B.C. Sargon of Assyria overthrew the Elamites, and all the towns of Merodach-baladan. Hulusa, king of Elam, captured Assur-nadin-Sum, Sennacherib’s son, who was king of Babylonia, and his father, in revenge, ravaged the country in the reign of Kudur-nahhunte. Sennacherib also fought with Unman-mânu, his successor, at Halulé in Babylonia. To give all the dramatic incidents concerning Elam, Babylonia, and Assyria is impossible. Elam apparently constantly interfered in the affairs of Babylonia in order to harass the Assyrians, and this policy was continued by Humant-haldus II. in the time of Esar-haddûn; but in the end the Assyrians probably remained in possession of the country, which seems to have formed part of the dominions of Nebuchadnezzar. [Assyria.] Teispe, Cyrus, Cambyses, and Cyrus the Great, though Aryans, were all kings of Anzan, which seems to have been used interchangeably with Elam. With the other provinces, it seems possible that Cyrus and his successors were queens. Great was after he ascended the throne, but having been reduced to submission, became one of the more important satrapies of his empire, with Susa as the royal residence (Dan. 8:2) and metropolis. [Cyrus.] See Smith, D. B. (4 vols. 1893), s.v.; and, for the latest researches, cf. de Morgan, Délégation en Perse et Histoire et Travaux de la Délégation en Perse (Paris, 1905). Sayce, in Hastings, D. B. (vol. i. 1898).—2. A Korhite Levite, fifth son of Meshelemiah; one of the Bene-Asaph, in the time of David (1 Chr. 26:3).—3. A Benjaminite chief of the sons of Shashak (8:24).—4. “Children of Elam,” numbering 1,254, returned with Zerubbabel from Babylon (Ezr. 2:7; Ne. 7:12; 1 Esd. 5:12), and 71 more with Ezra later (Ezr. 8:7; 1 Esd. 8:33). Members of this family put away their foreign wives (Ezr. 10:26), and one of them signed the covenant (Ne. 10:14).—5. In the same lists a second family (carefully distinguished as that of the other Elam”) also returned with Zerubbabel (Ezr. 2:21; Ne. 7:13; 1 Esd. 5:13). One of the priests who accompanied Nehemiah at the dedication of the Wall (Ne. 12:42). [T.G.P.]

Elamites. This word occurs only in Ezr. 4:9, but is there omitted in the LXX., probably because partly included in “Susanchites,” in the same verse. In Jth. 1:6 the Gk. Semitic Babylonian and another language (Elamite proper), the relationship of which, though it can be read, is still undetermined. They were far advanced at an exceedingly early date in art and science, and had a well-developed mythological system, among the most important of which is the story of the revenge of Elam, the country of the Elamites, on Babylon. The name of Elam is the Babylonian Elam.” Amul, and is also called Elam, which is the Babylonian Elam, but more correctly called Elam. See also “El, Eloch.” [Elam.] [T.G.P.]

Elasah.—1. A priest, who had married a Gentile wife (Ezr. 10:22).—2. Son of Shaphan; an ambassador, sent by King Zedekiah to Nebuchadnezzar at Babylon, who bore Jeremiah’s letter to the captives there (Je. 29:3). 

Elath’, Elcloth, a town of Edom, commonly mentioned with Ezion-geber, and situated at the head of the Arabian Gulf, thence called the Elamitic Gulf. It first occurs in the account of the wanderings of the Israelites (Ex. 15:22), and was the place of Solomon’s navy (1 K. 9:26; cf. 2 Chr. 8:17). It was rebuilt by Azariah (2 K. 14:22; 2 Chr. 26:2). After this, however, “Rezin king of Syria recovered Elath, and drave out the Jews from Elath, and the Syrians came to Elath and dwelt there to this day” (2 K. 16:6). Now Athah, close to ‘Agabah, Edom.] [C. R. C.]

El-beth-el, Jacob’s shrine (A.V. place) at Bethel (Gen. 55:6,7). [C. R. C.]

El’inia, a forefather of Judith, and therefore a Simeonite (Jth. 8:1; cf. 9:2). 

El’dahah, a son of Midian (Gen. 25:4; 1 Chr. 1:33). The word perhaps means “God hath called.” [K. R. C.]

El’dad’ and Medad’, two of the 70 elders to whom was communicated the prophetic power of Moses (Num. 11:16,26-29). Although their names were upon the list which Moses had drawn up, they did not repair with the rest to the tabernacle, but continued to prophesy in the camp. Moses being requested by Joses to forbid this, he exhorted him to believe that all the Lord’s people were prophets. The
mode of prophecy of Eldad and Medad was probably the extemporaneous production of hymns, chanted forth to the people (Hammond); cf. the case of Saul (1 Sam. 10:11).

Elders. In primitive times the elders of the clan or tribe were invested with official authority, being fitted by age and experience to administer justice and exercise authority within their own circle. The Egyptians (Gen. 50:7), Moabites, and Midianites (Num. 22:27) had their elders, and they existed as an official class among the Hebrews from the time prior to the Exodus till the destruction of the second temple. Moses had his commission first to the elders, who as representatives of the people went with him to Pharaoh (Ex. 3:16, 18). In their representative capacity they were frequently identified with the people (Ex. 19:7, 8; Jos. 24:1, 2). Moses appointed to go “down” (i.e., official) positions, to assist him in the administration of affairs (Num. 11:10). For judicial functions exercised in the cities, etc., see Deut. 19:12, 21, 22:15, 25:7; Jos. 20:4; Ru. 4:2. They took part in certain sacrificial rites (Lev. 4:15). (2) Under the Monarchy. They approached Solomon as agents of a council of government (1 Sam. 8:4; cf. 2 Sam. 3:17) supported Absalom in his rebellion (17:4); Rehoboam sought their advice (1 K. 12:6). (3) Post-Exilic Notices (Ezr. 5:5, 9, 6, 14, 10, 8; Jb. 7:23; Sus. 50 ff.; 1 Mac. 12:6, 35, 13:30). The yepoewa, or Council of Elders, of the Hasmonaean period may have had its origin in the ancient courts of elders (1 K. 8:1). (4) Before the Establishment of the Church. For the N.T. use, see Church; Presbyter; Bishop. [H.I.]

Eledah, a descendant of Ephraim slain by men of Gath when cattle-raiding (1 Chr. 7:21). It is sometimes assumed that the words “whom Eledah and Eldad, the sons of Gath, bought the land, slew as they came down to take their possessions [or, cattle]” refers to a raid on Gath by Eledah, Zabad, Zhuthelah, and Ezzer, from mount Ephraim. But the Heb. is as indefinite in its pronouns as is E.V. The raid occurred in the lifetime of their father Ephraim (ver. 22), who was living in Egypt in his own land before his descendants entered Palestine, where he himself never was. The passage seems clearly to refer to a raid on Goshen by men of Gath, who slew the four sons of Ephraim; and it cannot, therefore, be used as an argument against "all" Israel (Ex. 12:41) leaving Egypt at the Exodus. The expression "to go down" to Egypt (Gen. 37:25, etc.) occurs often. [C.R.C.]

Elealeh, a town E. of Jordan, in the pastoral country, taken possession of and rebuilt by the tribe of Reuben (Num. 32:3, 37). By Isaiah and Jeremiah it is mentioned as a Moabite town (Is. 15:4, 16:9; Jer. 48:34). The ruins still bear very nearly their ancient name, at El-Ail, a little more than a mile N. of Heshbon ( Surv. E. Pal. p. 6): they are those of a late Roman town. [C.R.C.]

Eleasa, a place at which Judas Maccabaeus encamped before the battle with Baccidhel, in which he lost his life (1 Mac. 9:5). Now probably Yassa, near Beth-horon (2 Sam. 15:29; W. Pal. loc. cit. p. 307). [C.R.C.]

Eleazar.—1. Son of Helez, a descendant of Judah in the female line (1 Chr. 2:39). —2. Son of Rapha, or Rephaiah; a descendant of Saul through Jonathan (1 Chr. 8:37, 9:43).

Elezar.—1. Third son of Aaron, by Elisheba, daughter of Amminadab. Nadab and Abihu leaving no children (Lev. 10:1; Num. 3:4). Eleazar was appointed chief over the principal Levites (Num. 3:32). With his brother Ithamar he ministered as a priest during their father’s lifetime, and immediately before Aaron’s death was invested on mount Hor with the sacred garments, as his successor in the office of high-priest (Num. 20:28). One of his first duties was to superintend, in conjunction with Moses, the census of the people (Num. 26:3, 4). After the conquest of Canaan he took part in the distribution of the land (Jos. 14:1, 17, 4, 19, 51, 21:1). His burial is recorded in Jos. 24:33. The office of high-priest was held by descendants of Eleazar till the time of the Hasmonaean, except during the period between Eli and Solomon, when the office was held by members of the family of Ithamar. [Abiathar; Zadok. —2. Son of Abinadab, of the hill of Kirjath-jearim (1 Sam. 7:1).—3. The son of Dodo the Ahohite, i.e., possibly a descendant of Aiah of the tribe of Judah (1 Sam. 23:16).—4. A priest of the Levites, who built the burnt-offering altar to the Lord, and had to put her away (Ezra 10:25; 1 Esd. 9:26).—7. Son of Phinehas a Levite (Ezr. 8:33; 1 Esd. 8:63).—8. The 4th son of Mattathias, surnamed Avaran (1 Mac. 2:5), who fell by a noble act of self-devotion in an engagement with Antiochus Eupator, 164 B.C. (1 Mac. 8:43ff.). In a former battle with Nicanor, Eleazar was appointed by Judas to read "the holy book" before the attack, and the watch-word in the fight—"the help of God"—was his own name (2 Mac. 8:23).—9. A distinguished scribe (2 Mac. 6:18) of great age, who suffered martyrdom during the persecution of Antiochus Epiphanes (1 Mac. 4:10).—10. The son of Dodo of Roman, ambassador from Judas Maccabaeus to Rome (1 Mac. 8:17).—11. The son of Eliud, in the genealogy of Jesus Christ (Matt. 1:13).

Eleazarus (1 Esd. 9:24) = Eleazar, 4. Election. [Predestination.]

El-Elohe-Israel (God, the God of Israel), the name bestowed by Jacob on the altar which he erected on land in Canaan bought of the sons of Hamor (Gen. 33:20).

Elements (2 Pe. 3:10; R.V. marg. heavenly bodies), here undoubtedly means the physical elements of which the world is composed. The Greek στροφή means that which stands in a row or series, στροφὴ: (1) the alphabet; the elements from which words are formed, (2) the elements of the universe, (3) the first principles (rudiments) of any kind of knowledge (Heb. 5:12, etc.). Gal. 4:3, 9 apparently refers to the worship of heavenly bodies (called στροφή) as elements of the universe, and regulating the calendar, though R.V. gives "the heavenly bodies," (N. T. 8:1, 4; 9:8; 1 Pet. 1:17; 3:21).

Eleph, a town of Benjamin, named next
before Jerusalem (Jos. 18.28). Now the village Liita, 2 miles W. of the city. [c.r.c.]

ELEPHANT. The word does not occur in the text of the canonical Scriptures of A.V., but is found as the marginal reading to Behemoth, in Job 40.15. "Elephants' teeth" (sheen-habhim) is the marginal reading for "ivory" in 1K. 10.22; 2Chr. 9.21. Elephants, however, are mentioned in the 1st and 2nd books of Maccabees as being used in warfare. These belonged to the Indian species (Elephas maximus), which was first brought to Palestine by Antiochus Epiphanes, king of Syria, who employed these animals in his wars against Egypt, as Eupator (163 B.C.) did against the Jews (1Mac. 6.34). [APES; IVORY; PALESTINE.] [R.L.]

Eleutherus, a river of Syria (1Mac. 11.7, 12.30). In early ages it was a noted border stream. According to Strabo, it separated Syria from Phoenicia, and formed the N. limit of Coelosyria. The identity of the Eleutherus with the modern Nahr-el-Kebir (Great River) is not doubted. Its highest source is in the open valley between the Lebanon (S.) and the Barylus (N.) ranges: it flows through the entrance called in Num. 34.8 the entrance of Heshbon into the wilderness, and is said to run NE. about 18 miles N. of Tripolis. [C.R.C.]

Elhanan'.—1. A warrior in the time of King David, who performed a memorable exploit against the Philistines, about which a difficulty arises: (a) 2Sam. 21.19 says that he was the "son of Jaare-oregim the Bethlehemite", and he was "distressed of Goliath the Gittite, the staff of whose spear was like a weaver's beam." Here in A.V. the words in italics are inserted to bring the passage into agreement with (b) 1Chr. 20.5, which states that "Elhanan son of Jair slew Lahmi the brother of Goliath the Gittite, the staff," &c. The latter is probably the more correct statement, the difference being much smaller in the original than in English. The "oregim" (weavers) has probably crept into the text of 2Sam. 21.19 from the following line.—2. The son of Dodo of Bethlehem, one of the Thirty of David's guard, and named first on the list (2Sam. 23.24). [L.T.'s Comm.]

Ell, the high-priest before whom Samuel ministered to the Lord, was descended from Aaron through Ithamar, the youngest of his two surviving sons (Lev. 10.1-2, 12; 1K. 2.27, cf. 2Sam. 8.17; 1Chr. 24.3). As the history mentions no high-priest of the line of Ithamar before Ell, he is generally supposed to have been the first of that line to hold the office. From him, his sons having died before him, it appears to have passed to his grandson Ahitub (1Sam. 14.3), and it certainly remained in his family till Abiathar, the grandson of Ahitub, was "thrust out from being priest unto the Lord" (1K. 2.27). The "grandsons of the house of Ahitub" or "descendants of Heli" (of the Men of the House of Heli) rebellion (1K. 1.7, 26, 26, 27), and the high-priesthood returned to the family of Eleazar in the person of Zadok (2.35). It returned to the elder branch was one part of the punishment pronounced against Eli during his lifetime, for his lack of control over his sons, who by their licentiousness and slothful indulgence profaned the priesthood, and brought the rites of religion into abhorrence among the people (1Sam. 2.22-36; 1K. 2.27). Notwithstanding this failure of his old age, the character of Eli is marked by eminent piety, as shown by his meek submission to the divine judgment (1Sam. 3.18), and his supreme regard for the ark of God (4.8)."He "judged Israel forty years" (ib. marg.), and died at the age of 98 years (ver. 15), stricken down by the disastrous news that the ark of God had been taken in battle by the Philistines, who had also slain his sons Hophni and Phinehas.

Eliab'.—1. Son of Helon and leader of the tribe of Zebulun at the time of the census in the wilderness (Num. 1.9, 27, 7.24, 29, 10.16).—2. A Reubenite, son of Pallu or Phallu, father of Dathan and Abiram (16.1, 12, 26.8, 9; Deut. 11.6).—3. The eldest brother of David (1Sam. 16.6, 17.13, 23, 1Chr. 2.13). Elihu in 1Chr. 27.18 is probably his valet. A Levite in the time of David, who was both a "porter" and a musician on the "psaltery" (15.18, 20, 16.5).—5. One of the warlike Gadite leaders who came to David in the wilderness (12.9).—6. An ancestor of Samuel the prophet; a Kohathite Levi, son of Nahath (27).—7. Ancestor of Nathanael; an ancestor of Judith (Jth. 8.1).

Elia'da.—1. One of David's sons; according to the lists, the youngest but one of those born to him after his establishment in Jerusalem (2Sam. 5.16; 1Chr. 3.8). He is called Beeliada in 1Chr. 14.7.—2. A mighty man of war, a Benjamite, who led 200,000 of his tribe to the army of Jehoshaphat (2Chr. 17.17).

Elia'dah', father of Rozon (1K. 11.23).

Elia'das (1Esdr. 9.28) = Elioenai, 7.

Elia'dun (R.V. Iliadun; 1Esdr. 5.58), possibly identical with Henadad.

Elia'h.—1. A Benjamite chief; one of the sons of Jeroham (1Chr. 8.27).—2. One of the Bene-Elam; an Israelite (I.e. a Jewman) who married a foreign wife (Ezra 10.26).

Elia'hba', a Shalaeonite, one of the Thirty of David's guard (2Sam. 23.32; 1Chr. 11.33).

Elia'kim' (whom God sets up).—1. Son of Hilikiah; master of Hezekiah's household over the house of his father (2K. 18.17). He succeeded Sheon in this office, with the warm approval of Isaiah (Is. 22.4-25). Its important character is indicated through its tenure by Jotham, when heir-apparent (2K. 15.5), cf. major dominus under the Merovingian dynasty. Eliakim was a good man, as is shown by his conduct on the occasion of Sennacherib's invasion (18.7, 19.1-5), and in the discharge of the duties of his high position (Is. 22.21). But it is certain from the description of the office in Is. 22, and especially from ver. 22, that it was the king's house, and not (as the LXX. and Jerome) the House of God, of which Eliakim was prefect.—2. The original name of Jehoiakim king of Judah (2K. 23.34; 2Chr. 36.4).—3. A priest in the days of Nehemiah, who assisted at the dedication of the new wall of Jerusalem (Ne. 12.41).—4, 5. Ancestors of Christ (Mt. 1.13; Lk. 3.30). [A.W.S.]

Ell'ah (1Esdr. 9.44) = Binnu, 3.

Ell'am.—1. A Levite, the father of the wife of David (2Sam. 11.3). In 1Chr. 3.5 the names of father and daughter appear as Ammiel and Bathshua. Probably the same as—
2. Son of Ahipteb the Gilonite; one of David's heroes (2Sam.23.34).

Eliaoniass (1Esd.8.31).—Eliehoenai. The father of the name of Elijah in A.V. of N.T. and in Eclesius 48.1ff., 1Mac.2.58. In Ro.11.12 the reference is not to the prophet, but to the portion of Scripture referring to him, the words being "in Elias," not as in A.V. "of Elias."

Eliasaph.—1. Son of Deuel, and the David that sang the song of the wilderness of Sinai (Num.1.14,12,4,17,47,10.20).—2. Son of Lael; a Levite, and "chief of the house of the father of the Gershonites" at the same time (Num.3.24).

Ellassib.—1. A priest in the time of David, the eldest of the "governors of the house" (1Chr.25.12).—A son of Eliaonias; one of the latest named descendants of the royal family of Judah (3.24).—3. High-priest at Jerusalem at the time of the rebuilding of the walls (Ne.3.1, etc.). His genealogy is given in 12.10ff. He was "allied" (Heb. near) to Tobiah the Ammonite, and is doubtless the same as the Eliaiah of Ezr.10.24.4. He had married his first wife (Ezr.10.24), as had also—5. A "son of" Zattu (10.27), and—6. A "son of" Bani (10.36).

Ellias (1Esd.9.34), perhaps identical with Eliaishib (Ezr.10.36).

Eliahah, son of Hemam; a musician in the temple in the time of King David, who with his sons and brethren had the 20th division of the temple service (1Chr.25.1-27).

Ellid, son of Chislon, and prince of Benjamin, chosen to assist in the division of the land of Canaan (Num.34.21).

Eliel.—1. A chief of the half-tribee of Manasseh on the E. of Jordan (1Chr.5.24).—2. Son of Toah; a forefather of Hemam the singer (6.34); possibly the same as Eliab in ver. 27 and as Elihu (1Sam.1.1).—3. One of the Bene-Shimhi; a Benjamite chief (1Chr.8.20).—4. Also a Benjamite, but of the sons of Shashak (8.22).—5. The Mahavite! and another; heroes of David's guard in the exporture of Zion; slain by one Belkadi (11.14-17).—6. A Gadite hero who came across Jordan to David when he was hiding from Saul in the wilderness of Judah (12.11).—8. A Kohathite Levite who assisted in bringing the ark from the house of Obed-edom to Jerusalem (15.9,11).—9. A Levite in the time of Hezekiah; one of those in charge of the temple offerings (2Chr.31.13).

Elena. Of the Bene-Shimhi; a descendant of Benjamin (1Chr.8.20).

Eliezer (God is help).—1. Abraham's chief servant, called by him "Eliezer of Dananass" (Gen.15.2; A.V.; see R.V.). The phrase in ver. 3 should be "son of my house," which merely imports that he was one of Abraham's household. For ver. 2, where R.V. shirks the difficulty, see Dananass.

It is probably Eliezer who is described in Gen.24.2-—2. Second son of Moses and Zipporah, so called by his father. "because, saith he, the God of my father was my help, that delivered me from the sword of Pharaoh" (Ex.18.11; 1 Chr.23.15,17). He remained with his mother and brother Gershon, in the care of Jethro his grandfather, when Moses returned to Egypt (Ex.4.18), she having been sent back to her father by Moses (18.2), though she had gone part of the way with him.—3. One of the sons of Becher, son of Benjamin (1Chr.7.8).—4. A priest of the house of Iddo (15.24).—5. Son of Zichri, ruler of the Reubenites in the reign of David (27.16).—6. Son of Dodavah, of Maresha in Judah (2Chr.20.37), a prophet, who denounced Je-hoshaphat's alliance with Ahaziah.—7. A chief Israelite of "a man of understanding"—whom Ezra sent with others from Jerusalem, to induce some Levites and Nethinim to accompany him to Jerusalem (Ezr.8.16).—8. 9. 10. A priest, a Levite, and an Israelite of the sons of Harim, who had married foreign wives (10.18,23,31).—11. Son of Jorim, in the genealogy of Christ (Luke 3.29).

Elif, son of Zerahiah, who with 200 men returned from the Captivity with Ezra (Ezr.8.4).

Eliehoenai, son of Shisha, and one of Solomon's scribes (1K.4.3).

Elilu.—1. One of the interlocutors of Job; described as the "son of Barachel the Bashite, of the books of the kings of Judah" (Job 17.1).—2. An ancestor of Samuel called Eliab in 1Chr.6.27 and Eliel in 6.34.—3. "One of the brethren of David" mentioned as the ruler of Judah (27.18); called Eliab in 1Sam.16.6.—4. One of the captains of the thousands of Manasseh who joined David at Ziklag (1Chr.12.20).—5. An Attite Levite in the time of David; one of the doorkeepers of the house of Jehovah. He was a son of Shamiah, and of the family of Obed-edom (26.7).—[H.C.N.]

Eliljah.—1. The Tishbite; "one of the sojourners of Gilead (1K.17.1), makes an abrupt appearance in Israelitish history in the reign of Ahaz, Nothing is told of his ancestry or previous history, though he may have been one of the refugees from the persecutions of Jezebel (18.1). He was "a man subject to like passions as we are" (Jam.5.17), the chief feature of his personal appearance being his hair, which flowed, like a Nazirite's, "down upon his back; and his garments," "doubled," great personal strength. He was capable of long fasts (1K.19.8), of living on the most scanty food (17.6,10), of sleeping on the hard ground (19.5), was fond of the mountains (18.10; 19.8; 2K.2.16), and could run a distance of ten miles in front of the royal chariot (1K.18.12-13). There is pathetic sense of loneliness in his earlier life (18.22; 19.10,14); though later he has the devoted companionship of Elisha (19.21; 2K.3.11,2.4,6), and is a familiar figure in the schools of the prophets at Bethel and Jericho (2.15,15). He wore the ordinary articles of dress—viz. girded under-the-roof, and overall or mantle (2K.1.8, 2.11; 1K.19.13,14), which has supplied one of our most familiar figures of speech. But the characteristic which most impressed his countrymen what that he was "a man of God" (1K.17.18; 2K.1.10-13) whom the Spirit of God diddirect from harm (1K.18.12; 2K.2.16), and who was able to prevail in prayer with "the Lord" (1K.17.22,18.37), in whose presence he claimed to stand (17.18.18.15). Indeed, devotion to the Lord was the master-passion of his life (18.36; 19.10,
it brought the opportunity of drawing upon the rich corulands of Esdraelon (1K.5.9,11; Ezk.27.17; Ezr.3.7; Ac.12.20). To Ahab it meant the gradual subversion of the old system of land tenure and administration (1K.20.15,21.3,8.22-26), which was connected with the belief that Jehovah, the God of Israel, had given His people their land; and though Ahab's children all had names compounded with Jehovah (Joash, 1K.22.26; Ahaziah, 22.40; Jehoram, 2K.3.1; Athaliah, 8.26), Ahab allowed Jezebel great liberty in the worship of her Phoenician deities and aided her in promoting it (1K.16.31-33.18.19; 2K.3.2,10.21). A spirit of tyranny (1K.21.7) and persecution (18.4,19.10,14) was abroad, and as a result "the children of Israel had forsaken the covenant of Jehovah" (19.10) and were "halting between two opinions" (18.21). Drastic measures were necessary. "Then stood up Elias as a fire and his word burned as a lamp."
Obadiah, who had been deputed by Ahab to search in one direction through the land for water, was put to death, and had told him to summon his master. The king came, and arrangements were at once made for a general meeting of the Baal prophets with Elijah at Mount Carmel. Possibly Elijah had divine authority for suggesting the ordeal; possibly Ahab felt he would like the question settled; at any rate, the scheme seems to have been long planned. Carmel had been a "high place" with an altar of Jehovah such as Jezebel had caused to be thrown down (1K.18.30, 19.10, 14). This altar Elijah repairs with an action symbolical of his purpose to demonstrate the unity of the covenant people: he "took twelve stones, according to the number of the tribes of the sons of Jacob, unto whom the word of Jehovah came, saying, Israel shall be thy name" (18.31), and from the perennial spring under the mountain was able, in spite of the drought, to get twelve barrels of water with which the altar and sacrifice were thoroughly drenched. Thus crowned with a third demonstration of the unity of the two realms, he prayed to Jehovah "at the time of the offering of the evening oblation," i.e. in the temple at Jerusalem (18.36), and the fire of the Lord fell, consuming sacrifice, wood, stones, and all the water. The people accepted the result of the oracles and the Baal of Carmel became a genuine mourner of the priests of Baal at Kishon (18.40). The honour of Jehovah thus vindicated, signs of approaching rain were vouchsafed to Elijah's messenger, and the prophet, having announced it to Ahab, runs before the king's chariot the 16 miles to Jezreel. Reaction was inevitable after this physical and spiritual strain, and when word came to him of Jezebel's determination to get rid of him, he fled to Beer-sheba with his servant; and leaving him there, went on alone a day's journey into the wilderness, and resting under a desert broom requests to be allowed to die (19.4). He was first tempted with food and drink, having his physiological needs satisfied with meals provided miraculously (19.5-8); then, having made his way to Horeb and lodged there in the pilgrim's cave, his stormy mind was calmed by the spectacle of nature's power and beauty, and he was brought to a sense of his responsibility for life, by being made to do that which he had so often claimed to do, viz. "stand before the Lord" (19.11) and account for his presence there (19.13). He states his case, and then is hidden to return, with the assurance that Ahab's dynasty shall soon come to an end, and that his work will be taken up and continued by one whose birth pledged him to maintain the divine system of land tenure, and who had been named, perhaps through the consciousness of idolatrous oppression. "God is salvation"—Elisha. Elijah therefore returned N. and found Elisha at Abel-meholah. He had only to cast his mantle on Elisha's shoulder, and the young man followed him, never to leave him again. From Abel-meholah Elijah went to Jezreel with a fresh denunciation of Ahab for a fresh sin. The king had wished to acquire some property from Naboth, but was refused, and, apparently while Elijah had been in the S., Jezebel determined to maintain her position in the kingdom by compassing a judicial murder. On a false charge of blasphemy Naboth and his sons were put to death, and the property transferred to the crown (1K.21.16). Ahab went down to visit the newly acquired estate, accompanied by Jehu and Bidkar (2K.9.25), but was met there by Elijah, whose terrible denunciation sank into the king's heart: his repentance was so sincere that he put on sackcloth and fasted, and went bare-foot, keeping every anniversary of Naboth's death with signs of mourning (1K.21.27, cf. LXX.). Three other incidents only are recorded in the life of Elijah. (1) His letter to the son-in-law of Ahab, who sat on the throne as king for some years during the life of his father Jehoshaphat (2 Chr.21.12). (2) His warning to Ahab's son of his certain death of the disease about which he consulted Baal-zebub, god of Ekron (2K.1.4), and the consequent destruction of two successive captains of 50, with their men, who had been sent to apprehend him; at the arrival of the third company he was directed to go to speak with a king and a prophet, and then went down from Carmel to Samaria (vv. 9,15). It was this incident which inspired the emulation of the "sons of thunder," and elicited a rebuke from our Lord (Lk.9.51-56). (3) His translation. Starting from Gilgal, where was a school of the prophets (2K.4.38), he came out of it with three other prophets to a place begging Elijah to come no farther, his impending removal from earth being a matter of general knowledge (2K.2.3,5), but Elijah refused; and when asked by Elijah what he should do for him before he was taken away, simply requested the elder son's portion of his spirit, and to be able to reproduce in his day what Elijah had been to his generation. Elijah's answer was that it would all depend on the training Elisha had given to his spiritual vision, and as that condition had been complied with, Elisha saw the chariot and horses of fire which were the manifestation of the presence of Jehovah, and "touched Elijah's clothe" before Elijah "went up," not in the chariot, but by a whirlwind, into heaven (2K.2.11; cf. Judg.20.40). The word "went up" carries the thought forward to the Ascension of our Lord, where the word "taken up" is used by one of the two men (Ac.1.10,11) who dismissed the apostles, and who probably were Moses and Elijah, as they on the mount of Transfiguration had spoken of the exodus which was to be accomplished at Jerusalem (Lk.9.31). The announcement of our Lord's future return is an office assigned to Elijah in the O.T. (Mal.4.5), and by the Jewish tradition, which enacts a pause in the celebration of the Passover for the appearance of Elijah (cf. Mt.27.17; Mk.15.35) to announce the coming of Messiah. The fulfilment of the type of Elijah by the forerunner John Baptist was only partial, as was indicated by our Lord Himself after the Transfiguration in the words, "Elias truly shall come and restore all things" (Mt.17.11). No prophet is mentioned so often in N.T. as he (Mt.1.25; cf. Mt.17.13; Mk.9.4; Lk.9.30). He has been canonized both in the Greek and Latin Churches, his festival being July 20, and he is revered in the Latin Church as founder of the "Order of Barefooted
ELISHA

**ELIKA**, a Harodite, one of the Thirty of David's guard (2Sam.23.25).

**Elim** (Ex.15.27; Num.33.9), the second station where the Israelites encamped after crossing the Red Sea. It is distinguished as having "twelve wells[springs] of water, and threescore and ten palm-trees." Supposing Israel to have camped at 'Ayin Māṣa after crossing the Red Sea (Robinson, *Bib. Res.* i. p. 67), and taking 10 miles as the average daily march (which fits the distances between all the known sites on their road), Marah would be at the Holophthen of the way in *Jēdūa Ghrāndel* where there is still a brook with stunted palms. [Exodus, THE.] [C.R.C.]

**Elimelech**, a man of the tribe of Judah, and of the family of the Hezronites, who dwelt in Bethlehem-ephrathah in the days of the Judges. In consequence of a great dearth in the land he removed with his wife and his two sons, Mahlon and Chillon, to dwell in Moab, where he and his sons died without posterity (Ru.1.2.3, etc.).

**Elionia**—1. Eldest son of Neriah, the son of Shemaijah (1Chr.3.23.24).—2. Head of a family of the Simeonites (4.36).—3. Head of one of the families of the priests of Benjamin (7.8).—4. Seventh son of Mesheleah, son of Kere of the sons of Asaph, a Korahite Levite, and one of the doorkeepers of the "house of Jehovah" (26.3).—5. A priest of the sons of Pashur who had married a foreign wife (Ezr.10.22). Possibly the same as—6. One of the priests who accompanied Nehemiah with whom he reestablished the worship in Jerusalem (Ne.12.17).—7. An Israelite, of the sons of Zattu, who had married a foreign wife (Ezr.10.27).

**Eliphael**, son of Ur (1Chr.11.35) = Elyah, 3.

**Eliphalet** (1Esdr.9.33) = Eliphelet, 6.

**Eliphelet**.—1. (1Esdr.8.39) = Eliphelet, 5.

**Elipheleh**.—1. The eldest son of Esau and Adah, and father of Teman (Gen.36.13.; 1 Chr.1.35.36).—2. The chief of the "three friends" of Job. he is called "the Temanite"; hence *Elylah* probably he was an inhabitant of Teman. On him falls the main burden of the argument, that God's retribution in this world is perfect and certain, and that consequently suffering must be a proof of previous sin (Job 4.5.15.22). The great truth brought out by him is the unapproachable majesty and purity of God (4.12.21, 15.12-16). [Teman: JOB.]

**Elipheleth**, a Merarite Levite: one of the gatekeepers appointed by David to play on the harp "on the Sheminith" when the ark was brought to Jerusalem (1 Chr.15.18.21).

**Eliphelet**.—1. One of the sons of David, born after his establishment in Jerusalem (1 Chr.3.6), but omitted in the longer list of 2Sam.5.15.16, and in 1Chr.14.5 given as Elpalet.—2. Another son of David, the last of the Jerusalem family (1 Chr.3.8; cf. 2Sam.5.16, 1 Chr.14.7, where the vowel is lengthened and the name given as Elpalet).—3. Son of Ahasbai, son of the Maachathite. One of the Thirty of David's guard (2Sam.23.34).—4. Son of Eshek, a descendant of king Saul through Jonathan (1 Chr.8.39).—5. A leader of the Bene-Adoniam, who returned from Babylon with Ezra (Ezr.8.13).—6. One of the Bene-Hashum who had married a foreign wife (Ezr.10.33).

**Elisabeth**, wife of Zacharias, the father of the Baptist. The name is the same as *Elisheba* (Ex.6.23; cf. Jehosheba), and, as borne by the wife of Aaron, would be traditional in priestly families. Lu.1.73 may allude to its meaning, "God is an oath," i.e. "One to swear by" (Gesenius). [E.R.B.]

**Eliseus**, the form of the name *Elisha* in A.V. = Eliezer, 16.12, and Lu.4.27.

**Elisha**, the son of Shaphat of Abel-meholah, designated to Elijah at Horeb as his successor. The meeting between them was that of a hero-worshipper with his hero. The news of Elijah's ordeal and victory on Mount Carmel must have run through the northern kingdom and stimulated the young man to follow in the footsteps of Shaphat and his son, who "had not bowed the knee to Baal" (19.18). At any rate, Elijah had only to cast his mantle on Elisha's shoulder and the younger man was ready to follow him. He just made a farewell to the people of his village, using for the feast the oxen with which he had been instrumental in getting a start for his father, and left his house, to cast in his lot with his hero. No duty that he could perform for Elijah was undone; years after he was known to the court as the man who had thrown away chances of advancement elsewhere to be the mental attendant on a dervish ("Elisha, which poured water on the hands of Elijah," 2K.3.11), and a fierce hatred of the house of Omri blazed in him (3.14,6.32). So, when the time for Elijah's translation came, though his master begged him to remain behind, he would not: he had counted the cost, he knew he had to take his master's place, and he would remain to the last with him, only asking that he might, in his day, be so like in the sight of his master as to show his spiritual lineage by his inheritance (2.10). His cry as Elijah went up in the whirlwind shows what the prophet had been to him—a constant sacrament of the divine presence and protection: "My father, my father, the chariot of Israel and the horsemen thereof." (2K.2.12; cf. Deut.17.16, Ps.147.16, 11). He could not but show the ordinary signs of mourning; then "he took up Elijah's mantle that fell from him," assured himself that he had powers similar to his master's (2K.2.14) and received the recognition of them from others (2.15), and then made his way back to the place where his master had made his down fire from heaven, to build himself up there in communion with God amid consecrated memories (2.25). There, in the modern legend of the cave still shown at Haifa as "Elisha's school" be true (see *Surr. W. Pal.* i. p. 283), he taught others to walk in his master's footsteps: there he made his rod (Elisha's successor) into fire (cf. 19). It is very difficult to form any exact chronology of the events in Elisha's life, because the chapters which are concerned with it are confused in arrangement by the operation of that rule of the Heb. historians to round off one incident before proceeding
with another, which is so vividly illustrated in Lu.1.80,2.6. In 2K.13 the incidents in vv.14-
21 must come between vv. 12 and 13, and 8.1-7 should probably come in between 4.37-38. Yet
from the mention of Benhadad (6.24) and Hazael (8.29,9.14) we gather that all the public
ministry of Elisha recorded for us falls within the 12 years of Jehoram, "who wrought evil,
but not like his father or mother" (3.1.2). Though Jezebel's influence went against him (9.22), Jehoram called Elisha "father" (6.
21; cf. 5.13), and was tolerated until in his
despair at the extremity of famine in Samaria
through the war with Syria he planned Elisha's
assassination (6.31) and until his sister's
influence in Judah was seen to be baneful
(2Chr.22.1). Then the doom of the house of
Omri fell. Three incidents after Elijah's
ascension manifest Elisha's powers before he
went into retreat on Mount Carmel (1.1). A
sensitive man might have yielded the point about sending to look for Elijah's remains, but
he gave up his own will (2K.2.17). (2) He
not only tarried at Jericho, but brought to its
inhabitants blessings: by casting salt into the
spring, he showed how sin must be arrested at
its source (2.22). (3) He showed that the
common prayer of his sister and his brother, and
that God would support him in his severity when
"a set of boys" from the ill-famed city of
Bethel made God's exaltation of the long-haired
prophet a cause of mockery to him with his close-cropped locks (2.24). His
fame spread to the southern kingdom of Judah, and some
through a hint that the monarch of Jeroham
than that monarch owns "the word of the Lord is with him" (3.12); and his disciple-
ship has its due reward when the three kings go
down to consult Elijah's servant. He
shows what he had learnt from his master in
using external influence to calm his perturbed
spirit (3.15; cf. 1K.19.11) and in making
arrangements for the divine intervention to
synchronize with the offering of the covenant
worship in the covenant centre at Jerusalem
(2K.3.20). After this, apparently he made
his home in Samaria trying to influence
Jehoram for good (5.3; cf. 6.1,6,21,30),
three years after royal Jeroham had died.
Famine was not hard to get. Poverty meets him, and is relieved with
tact and sufficiency (4.7): at the next turn he
enjoys the generous hospitality of the wealthy
farmer (4.8). His very bearing causes him to
be known as—like Elijah—a "man of God" (4.9), the phrase being used of him 20
times: and he not only promises his hostess
a son, but restores the child to life when dead.
It is in this story that we first meet Gehazi,
whose qualification for being with Elisha is
shown by his insight (4.14), but who seems
to have been spoilt by such early success.
Treated with confidence, he shows himself able to
obey a strict command (4.29,316), yet with
apparent expectation of powers not yet com-
mittied to him (4.31b). He might have learned
to trust Elisha when he raised the child to life
and when later at Gilgal he healed the potage
(4.38-41), but his question about the food shows
that he did not yet accept the prophet's powers
(4.43) and that he was indulging the spirit
which destroys religion (1Th.2.14). For 7 years,
while there was famine in the land, Elisha bore
with him and tried to help him, and he was proud
of his association with the prophet (2K.8.4); but his character developed in insensitivity to
divine things, and his conduct to Naaman (5.
20) shows him as avaricious and deceitful.
The mystery which concealed him with all the
manifold manifestation of his spiritual corruption within
(5.27). All the remaining stories of Elisha illus-
trate his insight. Naaman gets sternness or
sympathy as each is needed (5.11,19); Geh-
azi could not deceive him ("went not mine
heart with thee"? 5.26); Jehoram is warned
of Benhadad's secret counsels (6.12). Taught
perhaps by his failure with Gehazi, he
prays for the gift of spiritual illumination for
his new servant, and it is granted (6.17).
His tactful treatment of the Syrian captives
secures peace for Israel (6.22,23), and he
foretells plenty as he had previously foretold
famine (6.31). Then comes the duty of
shutting the door on the king (6.32), and
the end of his public ministry. He went himself
to Damascus and told Hazael he was to be
king (8.13), and sent one of the sons of the
prophets to anoint Jehu (9.1). Then he is
not mentioned for more than 40 years, during
which he is in the kingdom of Jehu. He then
took up where Hazael left off and entered
in, which made the Israelites "like dust by threshing"
(15.7), and then proceeded S. to capture Gath
and attack Jerusalem, but retired on receiv-
ing tribute (12.17,18). Meanwhile the Assyrian
power was rising, and in it the Lord gave
Israel a saviour (13.5), because while the
Assyrians attacked Hazael's dynasty from the
N., from the S. of Syria the house of Jehu
was able to recover its dominions (13.25). It is
when this gleam of hope is rising on the
northern kingdom that we hear for the last
time of Elisha. As he lies on his deathbed, king
Jasho visits him, and owns that he had been
his attendant in his youth. Elisha tells him
("chariot and horsemen"; 13.13; cf. 2.12). Elisha tries to teach the king the lesson of
depending on God while independent of man,
but Jasho, whenidden to shoot, has not the
imagination to see his foes at his feet and to
shoot at them till the voice that bade him strike
called him to stay. Self-consciousness, a weak
dependence on others, an eye askance to see how
far he may go, a feebleness within the mind, are
the king's, and no power of living by the
strength of individual heroism and individual
devo"tion. His life was tested, and the drama
of it fore-written from that scene of rehearsal.
So Elisha passed away. But even after his
death spiritual vigour was in his poor remain-
s, and a dead man dropped in hasty burial into
his tomb received life back from his contact
with Elisha's bones—as to-day some victim
of impure self-indulgence (the special sin of
Moab) may be converted by reaching strad-
ges of saint's life (2K.13.21). There is only
one reference in N.T. to Elisha (Lk.4.27),
and that not to his typical anticipation of the
living work of the Son of Man "Who went
ELOI, ELOI, LAMA SABACHTHANI 247

about doing good" (Ac.10.38) which later ages have loved to trace. Alexander in Oxford Lent Sermons, 1869; Maurice, Prophets and Kings; Newman, Sermons on Subjects of the Day: "Elisha, a Type of Christ". Is. 32.2, O.T. Characters. [C.R.B.E.]

Elishah ('son of Javan'); Gen.10.4; Ezk. 27.27, mentioned as an Ionian country, with Tarshish (Tarso), Kittim (see Cyprus), and Dodanim (perhaps Rhodes). About 600 b.c. the "isles [or, shores] of Elishah" provided blue and purple for Tyre. Josephus understands that the Elyseans were Aeolians (1Ant. vi. 1), on the Ionian shore E of the Aegean Sea. The Talmud of Jerusalem (Megilla, 1.77) and the Midrash and Targums read Elis or Eulis. The Anarn letters include 10 from Alasia—probably Elishah—which, in 15th cent. b.c., had a Semitic population ruled by a king, who sent copper to Egypt in ships, and possessed gold, chariots, and art objects. This king states (Brit. Mus. 5) that he was not familiar with the kings or of Shinar; and he was also an enemy of the Lukki (Berlin 11) who were either Lycians or Ligyes, but most probably the former, which would place Elishah on W. shores of Asia Minor. [C.R.C.]

Elisha ma.—1. Son of Ammihud, the leader of Ephraim in the wilderness of Sinai (Num. 1.5.29; 10.18, 43), and a grand-son to Joshua (rChr.7.26).—2. A son of King David, born after his establishing in Jerusalem (2Sam.5.16; rChr.3.8.14.7).—3. Another son of David (rChr.3.6), called in the other lists Elishua—4. Son of Jekamiah; a descendant of Judah (2.1-11), possibly the same as 5. Father of Nathaniel and grandfather of the traitor Ishmael (2K.25.25; Je.41.1).—6. Scribe to King Jehoiakim (Je.36.12ff.).—7. A priest sent by Jehoshaphat to teach the law to the people of Judah (2Chr.17.8).

Elishah phat, son of Zichri; one of the conspirators with Jehoiada (2Chr.25.1).

Elisha son of Asaiah (Ex.6.23), daughter of Amminadab, and sister of Nahson.

Elishua (2Sam.5.15; rChr.14.5) = Elisha, 3.

El'is'imus (rEsd.9.28) = Elishiah, 5.

El'iu, a forefather of Judith (Jth.8.1).

El'ud, son of Achim in the genealogy of Christ (Mt.1.15).

El'izaphan.—1. A Kohathite Levite chief, son of Uzziel, at the census in the wilderness of Sinai (Num.3.30); his family is mentioned later in rChr.15.8; 2Chr.29.13.—2. Son of Parnach; prince of Zebulun at the division of the land (Num.1.52.10, 7.30,35,10.18).

El'izur, son of Shedeur; leader of Reuben at the census in the wilderness (Num.1.5.2.10).

Elkanah.—1. One of the three sons (Ex.6.24) or, according to rEsd.6.22,23, a grandson) of Korah.—2. Another Kohathite Levite, the son of Jeroam, and father of Samuel. All that is known of him is contained in rEsd.6.27,33,34 and rSam.1.1-23,32.20.—3. The father of Zuph or Zophai (rEsd.6.35).—4. A Levite (9.16).—5. A Korhite who joined David at Ziklag (12.1,6). Possibly the same as 6. A doorkeeper for the ark (15.23).—7. A curiour in the reign of Ahaz "that was next to the king": slain by Zichri the Ephraimitc, when Pekah invaded Judah (2Chr.28.6.7). [B.C.R.]

Elkosh, the birthplace of the prophet Nahum, "the Elkoshite" (Na.1.1). Two widely differing Jewish traditions assign as widely different localities to this place. In the time of Jerome it was identified with a small village of Galilee. But mediaeval tradition attached the prophet's burial-place to Alkush, a village on E. bank of the Tigris about 2 miles N. of Mosul. The prophecy mentions Bashan, Carmel, Lebanon (1.4), and Thebes in Egypt (3.8: A.V. No), but is mainly concerned with Assyria. [C.aperanum.] [C.R.C.]

Eillsar, the city of Arioch (Gen.14.1), seems to be the old Babylonian town called Larsa in Semitic Babylonian and Arama in Sumerian. Larsa was situated in Lower Babylonia or Chaldea, about midway between Ur (Mugair) and Erech (Warka), on the left bank of the Euphrates. It is now Nusayriyah. Among its rulers may be mentioned Rim-Anu, Sin-idunna, Eri-Aku (Arioch), and Rim-Sin, who was described by the prophet Nebuchadnezzar (Am.4.1,19) and Samsu-iluna, his son.

Eim (Ho.4.13; R.V. terebinth). [O.A.K.]

El'mo dam, son of Er in the genealogy of Joseph (Lu.3.28).

Elna, am, father of Jeribai and Josphia, 2 of David's squad, according to Chr.11.46.

Elnathan.—1. The maternal grandfather of Jehovah, distinguished as "Elnathan of Jerusalem" (2K.24.8), possibly identical with Elnathan, son of Achbor (Je.26.22,36.12,25).—2. The name of three "learned [or, chief] men" (Ezr.8.16); in rEsd.8.44 they are represented by two names only, Anathan and Eunatan.

Eloah, Elohim. [El; Jehovah.]

Elo, Eloi, lama sabachthani, Hamei (elai) 'hele lama sabachthani' [1. Linguistic. These words are given (Mt.27.46; Mk.15.34) as the actual sentence spoken by Christ on the cross. They are a quotation from Ps.22, which commences in Heb. 'eli 'ali lama 'azabtani. There are a number of variant readings: Hamei (Mt.) may be a correction to the Heb. from the H'ale of St. Mark (which is nearer to the Aram. alodi), or may possibly be a provincial pronunciation of the Heb. The Gospel of St. Peter has the curious variant. "My power," lama is Hebrew: lema, read by some edd., Arab. Sabachthani is the Aram. word shebaqtani, found in the Peshita. It is difficult to account for this combination of dialects. Probably it is due to the evangelists or to transcribers. But we may have the sentence, just as it came from one who, accustomed to speak in Aram., was quoting from the sacred tongue. It might even be that Christ used the words "Eli, Eloi" (much as St. Paul says "Abba, Father"), and both words have been handed down separately. (2) Doctrinal. The fact that the Son of God should speak of Himself as forsaken by God, as One whom He abandoned from calling "Father," has given rise to some difficulty. Taken literally, it only proves the extent of the kenosis, and the reality of our Lord's human nature, in that He was able to share even the experience of isolation from God. But the words are not to be narrowly pressed. Forsaken by all, in the agony of death, He uses a quotation to
express His utter loneliness, and makes His own the words of a Psalmist who was passing through an experience in some points similar. We are, however, justified in seeing in the words (a) the sense of separation from the Father entailed by the sins of the world, which Christ was bearing, (b) willingness to sound human misery to its very depth, even to the loss of the sense of the divine presence.

Elon. 1. A Hittite, whose daughter was one of Esau's wives (Gen. 26.34, 36.2). [Bash-Emath.] — 2. Second of the three sons of Zebulun (Gen. 46.14; Num. 26.26), and founder of the family of the Elonites. — 3. A Zebulunite, who joined Israel for ten years, and was buried in Aijalon in Zebulun (Judg. 12.11, 12).

Elon, one of the towns in the border of the tribe of Dan (Jos. 19.43). Perhaps Beit Ello, a village 8 miles N.W. of Bethel. [c.r.c.]

Elon-beth-hanan' is named with two Dane towns as forming one of Solomon's diplomatic fiefs (1 K. 4.9). Now the village Elon, 8 miles N.W. of Jerusalem, close to E. border of Dan.

Elonites. [Elon, 2.]

Eloth. [Elath.]

Elpaal, a Benjamite, son of Hushim and brother of Abishur (1 Chr. 8.11).

Elpenor (Gen. 41.13).

El Paran (Gen. 14.6). [Paran.]

Eltekeh' (Jos. 19.44, 21.23), a town of Dan given to the Levites. Perhaps Be'it Liqia, 2 miles S. of the lower Beth-horon. [c.r.c.]

Eltekon' (Jos. 15.50), a town of Judah in the Hebron mountains, possibly the older form of Tekoa. The town (K. 1 Chr. 26.11) distinguished from Theko (v. 25), mentioned in the added verse, immediately after, with Bethlehem. This verse appears, however, to be a very late gloss, and gives to Judah towns which in Benjamin, such as Kulon (Qalunata — a Latin name), Tzatam (Am et Tid), Thobes (Sobha), Karen (Am Qarain), Galem (Beit Jala), the town of the city of Bethel (Hillah), and Elna (Milka), besides Altan (Am Altan) and Phagor (Fashor), just inside the border of Judah. These eleven added cities all lie close together W. and S.W. of Jerusalem. [c.r.c.]

Eltolad, one of the cities in the S. of Judah (Jos. 15.30) allotted to Simeon (Jos. 19.41); and in possession of that tribe until the time of David (1 Chr. 4.29).

Elul (Num. 6.15; 1 Mac. 14.27). [Month.]

Eluzai, one of the warriors of Benjamin, who joined David at Ziklag (1 Chr. 12.5).

Elymains ('Elymais), Gk. form of Elam ('Elam), Assyr. 'Eunu, 'Eunu, "the highland," tradgion of an Akkadian name: Nengma-ki. Later, the province of Elymains on the Persian Gulf was separated from Susiana (in the narrower sense) by the Hulai (Ilaius); in a wider sense Susiana included Elymains (the Elam of Ezek. 4.9). The city Elymains (1 Mac. 6.1) never existed: the incident recorded in this verse is doubtless that mentioned in 2 Mac. 9.2, and Persepolis bears nearly the same name as the province of Persis in which it stood, which accounts for the blunder. Polybius, however, places the attempted temple-plundering in the province of Elymains. [W. & T. C. T.]

Elymas, the magician (A.V. sorcerer), or "wise man" (cf. Mt. 2.1), further described as "a false prophet, a Jew," who withstood St. Paul (Ac. 13.8), and, as a punishment, was stricken with temporary Blindness. Bar- jesus being merely a patronymic, he had assumed the title Elymas also, which St. Luke seems to translate as "the magian," but the derivation of Elymas remains uncertain. [E.R.B.]

Elymaeans (R.V. Elymaeans). [Elamites.]

Elyon. [El.]

Elizabad. — 1. One of the Gadite heroes who crossed Jordan to join David at Ziklag (1 Chr. 12.12). — 2. A Korhite Levite who was a doorkeeper of the sanctuary (1 Chr. 26.7).

Elizaphan (Ex. 6.22) = Elizaphan, 1.

Embalming. Only mentioned twice (Gen. 50.2-3 and 26) in Holy Writ. Apparently embalming was practised by the ancient Egyptians in many different ways. Probably, underlying the practice, there was a belief that the soul, in spite of its transmigration, had some connexion with the body so long as the latter remained. The Egyptians, like most of great people thus preserved, but they were sealed up in vastly heavy sarcophagi and hidden in tombs (e.g. the Pyramids) so cunningly as to be only discovered by cutting away the solid walls of the passage. According to Herodotus, there were three methods of embalming. In the first the head was cleansed of brain, etc., through the nostrils, the skull afterwards being rinsed with drugs. The abdomen and thorax were opened by means of a cutting in the side, and the viscera removed; the cavities being filled with myrrh, acacia, and other spices (cf. Jn. 19.38), and the opening sewn up. The body was then placed in natron or sodium carbonate for 70 days. At the end of this time it was washed to avoid crystallization on the surface, and bandaged with fine linen cloth, which had been previously soaked in gum. It was then placed in a wooden case, the outside of which was carved to resemble the features of the deceased, and the sarcophagus or coffin stood upright against the side of the sepulchre chamber. This method cost about a talent of silver, i.e. roughly, £200 to £300. In the second method there were no incisions made in the body, but the cavities were filled with cedar-wood oil, and the body laid in natron as before. At the end of 70 days the oil was allowed to escape by the natural vent, and brought with it at least the greater part of the viscera, which it destroyed. This process cost from £80 to £100. In the third process, which was very cheap, the body was merely emptied with a powerful clyster or enema, and soaked in natron. Although embalming does not appear...
EMBROIDERER

to have been practised by the Jews, they evidently buried those whom they desired to honour wrapped with ointment and spices (1Sam.18.19). Moreover, the Epiphanius (Eccles.32.6) says that the Babylonians embalmed in honey, and the Talmud (Tal. Bab. Baba Bathra 3b) says that Herod embalmed Marianne in honey. [F.J.]

Embroiderer. [Handicrafts, (g).]

Emerald, a precious stone, first in the second row on the breastplate of the highpriest (Ex.28.18,19,39,41), imported to Tyre from Syria (Ezk.27.16), used as a seal or signet (Eccles.32.6), as an ornament of clothing and bedding (Ezk.28.13; Jth.10.21), and spoken of as one of the foundations of the new Jerusalem (Rev.21.19; Tob.13.16). The rainbow round the throne is compared to emerald in Rev.11.8, as it was known in Babylonia in the days of Pliny, and is probably intended here [Carbuncle], though we must remember that in the rainbow the red and violet tints are also conspicuous. The stone called urruq (= green) by Babylonians was perhaps the emerald. As emeralds are obtained in Upper Egypt, and as the emerald is an attractive object, it may have been used for an ornament at an early date. [T.g.n.]

Emerods (see Deut.28.27 and 1Sam.5.6ff.), possibly haemorrhoids (or piles), but more probably bubonic plague. The occurrence of piles is very common in all Eastern countries. [Plague.]

Emims', a tribe of gigantic stature which originally inhabited the region E. of the Dead Sea. They were like the Anakim; but the Moabites termed them Emim—that is, "terrible men" (Deut.2.10,11)—most probably on account of their fierce aspect. [F.J.]

Emom (or, Nicopolis (1Mac.3.40), a town at the foot of the mountains of Judah, 22 Roman miles from Jerusalem, and to from Lydda. It was fortified by Bacchides, the general of Demetrius, when at war with Jona
than (1Mac.9.50). In the plain beside this city Judas Maccabaeus signally defeated the Syrians (1Mac.5.4,5; 8.3). A small village called 'Amwâd still occupies the site, with remains of an early church (Surv. W. Pal. iii. p.63).

Emusa, the village to which the two disciples were on their way when our Lord appeared to them on the day of His resurrection (Lk.24.13): 60 stadia, or about 37 miles from Jerusalem. Josephus (7 Wars vi.6) mentions "a village called Emusa" at the same distance. The Sinitic MS. reads 160 stadia (which seems too far to be probable), and in the 4th cent. A.D. Emusa Nicopolis was understood. The name is the Heb. Hammam (hot" springs). A possible site is a village called Khanaasa 8 miles S.W. of Jerusalem. In 12th cent. the site was shown at Qubeibeh, 9 miles N.W. of Jerusalem—a village with a mediaeval church. [C.R.C.]

Emm'er (1Esdr.9.21) = Immer.

ENCAMPMENT

Em'mor (Ac.7.16), "the father of Sy
cem," A.V.; correctly, "Hamor in Suce
cem." A.V. The question is whether there is a confusion between the two transactions of Abraham (Gen.23) and Jacob (35.19); though the difficul
ty disappears if, with some commentators (see Speaker's Comm. ad loc.), we regard "Abra
am" as an interpolation in the Gk. text.

Enam (Jos.15.34), a city of Judah in the Shephelah. It was first occupied by the Amaleckites (Num.13.29), and was probably also inhabited by the Philistines. The name occurs also in Genesis (38.14) as on the road to Timnath (Tibneh): see R.V., "in the gate [or, opening] of Enaim." There is a ruin called Kefr 'Ana, 6 miles N.W. of Tibneh, in the place where the valley of Sorek enters the Philistine Plain. It seems to be the Beth Anata of Judges 11.15 and the En-ganno
tim of Judah (tr.) If the flocks of Judah were pastured in this valley, the site would fit that of the place where he met Tamar, and also of Enam, noticed with En-gannim and other towns near the valley of Sorek. [C.R.C.]

Enan, father or ancestor of Ahira (Num.1.15).

Enasibus (1Esdr.9.34) = Eliashib, 6.

Encampment (Heb. mahána). In all places except 2K.6.8, where taḫáníš is used. The word primarily denoted the resting-place of an army or company of travellers at night (Gen.32.21; Ex.16.13), and was hence applied to the army or garrison when on its march (Gen.32.7,8; Ex.14.19; Josh.10.5,11,14). The description of the camp of the Israelites, on their march from Egypt (Num.2.3), supplies the greatest amount of information on the subject. The sanitary regulations of the camp of the Israelites were for the twofold purpose of preserving the health of the vast multitudes of people and the purity of the camp as the dwelling-place of God (Num.5.3; Deut.23.14). The execution of criminals took place without the camp (Lev.24.14; Num.15.35,36; Josh.7.24), as did the burning of the young bullock for the sin-offering (Lev.4.12), both of which circumstances are referred to in Heb.13.12. High ground was selected to be the most convenient for the position of a camp, whether on a hill, a mountain side, or in an inaccessible pass (Judg.7.12). Another important consider
tion in fixing upon a position for a camp was the propinquity of water; hence in most instances camps were pitched near a spring or well (Judg.7.11; 1Mac.9.33). The camp was surrounded by the ma'gâlā (fench; 1Sam.17.20), or ma'gîl (1Sam.26.5,7), which some explain as an earthwork thrown up round the encampment, others as the barrier formed by the baggage-waggon. There was the less need of a formal entrenchment, as few instances occur of engagements in the camps themselves, and these were night attacks only. To guard against these, sentinels were posted (Judg.7.19; 1Mac.12.27) round the camp. The valley which separated the hostile camps was generally selected as the fighting ground (1Sam.4.14,15; 2Sam.18.6), and hence the valleys of Palestine are so conspicuously a part in its history (Jos.8.13; Judg.6.33; 2Sam.5.22,8.13, etc.). When the fighting men went forth to the place of marshalling (1Sam. 17.20), a detachment was left to protect the camp and baggage (1Sam.17.22,30,24).
Enchanted. [Divination; Magic.]

En-dor, a place in the territory of Issachar, yet possessed by Manasseh (Jos. 17.11). Eusebius (Onomasticon) describes it as a large village 4 miles S. of Tabor. Near it Sisera was defeated (Ps. 83.10), and here Saul consulted the witch (1Sam. 28.7). Now Andir, a small village S. of Tabor and 6 miles E. of Nazareth. [c.r.c.]

En-eglaim, a place named only by Ezekiel (47.10), apparently opposite En-gedi. Probably Eglaim in Moab (Is. 15.8). [c.r.c.]

Enmessar is the name of Shmaleser in the book of Tobit (1.2, etc.).

En-nius, a name which takes the place in Esd. 5.8 of Nahamani (Ne. 7.7).

En-gaddi (Eccles. 24.14). [En-gedel.]

En-gannim (spring of gardens).—1. (Jos. 15.34.) A town of Judah in the Shephelah near Zanoah. Now the ruin Umm Jina (Clermont-Ganneau), 3 miles N.W. of Zanua. It is noticed in 16th cent. n.e., in the list of Thothmes III. (No. 113), as An Kenaamu near Enam (111).—2. A city of Issachar given to the Levites (Jos. 19.21, 21, 29). Now the town Jenin, on S. border of the plain of Esdraelon. Josephus calls it Ginea on the border of Samaria and Galilee (3 Wars i. 3, etc.). [c.r.c.]

En-gedi (spring of the kid), a town in the desert of Judah (Jos. 15.62) amid the "rocks of the wild goats" (Isam. 18.21, 24.1, 2), now 'Ain Fidi, a spring on the W. of the Dead Sea, about the middle of its length. It had vineyards and palms (Gen. 4.11; Eccles. 4.14), and was close to the lake (Ezk. 41.16). The ibex, or wild goat, is still found here in large herds. The older name was Hazezon-tamar, or "clefs of the palm" (Gen. 14.7; 2Chr. 20.5), a name still extant in that of Hashekh, a valley 7 miles N. of the spring. Here also was the "ascent of hadda," or rock-cut road from the shores to the plateau (2Chr. 20.16). [Ziz.] The balsam of Engedi was famous (Josephus, Ant. i. 2: Talm. Bab. Sabbith 26a); and Pliny speaks of its palms (Hist. Nat. v. 17). The perennial spring (with a temperature 85° Fahr.) issues from under a huge boulder, 610 ft. above the Dead Sea, and 1,340 ft. below the desert plateau. The rock-cut road leads down to the coast. The steam flows into the lake below, down a steep slope, and was once used for irrigation. It is fringed with canes, acacia, tamarisk, and "other trees (Calotropis procera) or "apples of Sodom." N. of the spring is a platform of large undressed stones, with traces of old garden terraces (gates), and below is a ruined mill. Vines were cultivated here even in 12th cent. A.D. (See Surv. W. Pal. iii. pp. 384-387.) [C.R.C.]

Engine. [Arms.]

Engraver. [Handicrafts (2).]

Engraving. [Writing.]

En-haddah (Jos. 19.21), the "bourn" only used elsewhere of Noah (Gen. 9.18). It is probably Kef A'adin, a village with a well to the W., on the edge of the plain of Esdraelon, 3 miles N.W. of Jenin. In the Mishna (Gitten vii. 7) it is called Caphar-Outheni, on the border of Samaria. [c.r.c.]

En-hakore (Judg. 15.19; spring of the crier). [Ramath-Lehli.]

En-hazor (Jos. 19.37; spring of enclosure), a fenced city of Naphtali. Now the ruin Hazor, with a spring called 'Atin Hazar, 10 miles W. of Keedesh, with which it is noticed. [c.r.c.]

En-mishpat (Gen. 14.7). [Kadesh.]

Enoch (Hebrew, t.c. "great cow." Cf. Turkish cuch, "cow").—1. The eldest son of Cain, who called the city which he built after his own name (Gen. 4.17, 18).—2. Son of Jared and father of Methuselah (5.21ff.; Lu. 3.38), seventh in descent from Adam in the line of Seth (Gen. 5.21ff.; Lu. 3.28; Ju. 14.). In Gen. 5.22 it is said that Enoch "walked with God," an expression used elsewhere of Noah (6.9; cf. 17.1). After living 365 years "he was not; for God took him," an assertion which is thus expanded in Heb. 11.5: "By faith Enoch was translated that he should not see death; and he was not found, because God translated him." Both the Latin and Gk. fathers cite Enoch as an example of the possibility of a resurrection of the body, and of a true human existence in glory; and the voice of early ecclesiastical tradition is almost unanimous in regarding them as "the two witnesses" (Rev. 11.36f.) who should fall before the beast." For legends connected with Enoch, see Jew., Enoch., and Ryle, Early Narratives of Gen. III. In 2Esd. 6.9-11 Enoch stands in the Latin and A.V. for Behemoth in the Apocrypha and in R.V. [H.C.R.]

Enoch, The Book of. This book—quoted by Jude (4.14, 15), cited as Scripture in the Epistles of Peter (1.11), and referred to by Clements Alexandrinus, Origen, and other Fathers—was lost sight of for nearly a millennium. Extracts from it had been made by Georgius Syncellus in 8th cent.; but after that there is no record of acquaintance with it. In 1773 Bruce, the Abyssinian traveller, brought to Europe three copies of an Ethiopic translation. Nearly 50 years later Archbishop Lawrence, in 1821, published an English translation of this, and 17 years later an edition of the text. About the same time Hoffmann issued the first German translation. In 1834 Dillmann published his edition of the Ethiopic text. Schodde's Eng. translation followed in 1882; that of Charles
in 1893. This last had the advantage of the use of a large number of MSS. of the Ethiopic Enoch brought to Britain in 1868, after the capture of Magdala. Portions of Enoch may be divided into four portions: (1) The book of the Angels (ch. 1-36) is an account of the sin of the angels referred to in Gen. 6:2, and their punishment. There is an epidocical account of the sources of physical phenomena, followed by an account of the places of woe and of bliss. (2) The book of Similitudes (ch. 37-71). There are three similitudes: the first is of the dwellings of the righteous; the second of the place of punishment; the third is confused, and interpolated from another apocalyptic book, the book of Noah. (3) The book of the Courses of the Luminaries of Heaven (ch. 72-91) contains a calendar arrangement with the names of the successive days of the week. In order to make the year a multiple of 7, and have exactly 52 weeks, the writer declares it to have only 364 days, despite the fact that the neighbouring peoples had a year more nearly agreeable to astronomical truth. After the astronomical section he gives an account of the history of the nation of Israel, extending from the age of the Maccabees. (4) The appendix (ch. 92-104) consists of exhortations, which Enoch addresses to his assembled descendants. After this some fragments have been added. These divisions do not represent the real structure of the book. The theories as to the history of its evolution are many: None regard it as a unity—not to speak of the Noahian fragments, in which, not Enoch, but Noah is the speaker—differences in the names given to the angels, different ideas as to the constitution of the heavens, mark off certain portions from the rest. Mr. Charles regards the book of the Angels as the earliest portion: it is, in his view, a prayer of a later member of the same school. The probable date of the nucleus may be proved to be earlier than the book of the Angels by the comparative simplicity of its physical speculations. The note of time indicates that it was written during the reign of Antiochus the Great, approximately 210 b.c. The Noahian fragments at some intermediate date. The title "Son of Man," which our Lord uses of Himself, appears to be taken from this book, as in the "Son of Man" is a title ascribed to the Messiah. What is called the Scalvonic book of Enoch is a later product, perhaps originating in Egypt, and may be dated approximately 60 B.C. [E.R.B.]

Enon. [AENON.]

Enos, properly Enoch (1 Chr. 1:1), son of Seth (Gen. 4:26, 5:6ff.; Lu. 3:38).

En-ro'gel (spring of the water channel), a spring immediately E. of Jerusalem (Jos. 15:7, 18:16), by the stone Zeeleth (1 K. 1:9) and outside the city (2 Sam. 17:17). The only spring in this situation is now 'Ain Umm ed Derraj (mother of steps), otherwise Gihon, and perhaps Bethesda. Before its waters were carried by Hezekiah to Siloam by the rock aqueduct, it had no doubt a "channel" in the Kidron Valley, which he stopped up. [C.R.C.]

En-she'mesh, a spring which formed one of the landmarks on the N. boundary of Judah (Jos. 15:7) and the S. boundary of Benjamin (18:17). The position is that of 'Ain Hôd, a mile E. of Bethany. [C.R.C.]

Ensign (nēs; in A.V. generally "ensign," sometimes "standard"; daghel, "standard"), the old "signal," "sign," probably for a large division of an army, and "6th for a small one. Neither, however, expresses the idea of a flag: the standards in use among the Hebrews probably resembled those of the Egyptians and Assyrians—a figure or device of some kind elevated on a pole. [E.R.B.]

En-tappu'ah (Jos. 17:7). [TAPPUAH.]

Epa'netus, one of the first converts made in the province of Asia (Ro. 16:5; A.V. Achara, but see R.V.). [E.R.B.]

Epaphras, a Colossian, not identical with Epaphroditus of Philippi who bore the same name in its full, unabridged form. He had on St. Paul's behalf (Col. 1:7, 2:1) evangelized Colossae. Anxiety for the faith of his converts (cf. Col. 1:2, 12) was probably the cause of his journey to Rome, to see St. Paul (cf. Ph. 23); and the result of his report was the writing of the epistle. Lightfoot, Colossians, pp. 31 ff. [E.R.B.]
Epaphroditus came to St. Paul at Rome as bearer of gifts from the Philippians (Ph. 4.18), and remaining there for personal service to the apostle and for the work of Christ, incurred a dangerous illness (2.27), but recovered and was sent home. Lightfoot, *Philippians*, F. E. R. B.[1]

Epaph—1. The first, in order, of the sons of Midian (Gen. 25.4; 1Chr. 1.33), afterwards mentioned in Is. 60.6.7. No satisfactory identification of this tribe has been discovered.—2. Concubine of Caleb (1Chr. 2.46).—3. Son of Judah in the line of Judah (2.45).

Ephah. [Weights and Measures].—Ephah, a Netophathite, whose sons were among the "captains of the forces" left in Judah after the deportation to Babylon (Ez. 40.8).

Ephra.—1. The second, in order, of the sons of Joseph (Gen. 25; 1Chr. 1.33). His settlements have not been identified with any probability.—2. A descendant of Judah (1Chr. 4.17).—3. One of the heads of Manasseh on the E. of the Jordan (1Chr. 5.24).

Ephes-dammim. [Pas-Dammim].—Ephesians, Epistle to the, written by St. Paul from Rome in the winter of 55 and carried with Colossians and Philemon into Asia by Tychicus. It was almost certainly not addressed exclusively to Christians in Ephesus, but was an encyclical or "circular" letter, sent by rotation or in several copies to many, or all, of the churches of Asia. So only can we account for (a) the insertion, in the nest MS, of the words "

..." from the opening sentence, and (b) the absence of personal greetings. The epistle falls into two parts, one (1-3) doctrinal, the other (4-6) mainly practical. After the salutation (1.1f) comes a hymn of praise (1.3-14) for the redemption of Christ, to God, the raiser and exalting of Christ, had done for men, once reconciled, Gentile and Jew, "both in one body," to God "in Christ," and the declaration of the church "in Christ"—these "members of the one body and partakers of the promise in Christ Jesus through the gospel"; then another prayer, ending in a doxology, to God the Father. The second part, after dwelling (4.1-6) on the ideal unity of the church—"one body," "members of one body," the "fullness of Christ" (2.20), then and (7-12) on the diversity, within it, of individual gifts and functions, goes on to show what the Christian life and character should be. From general exhortation the epistle passes to specific prohibitions and precepts (4-25 5-21), and then (5.22-6.9) to particular reciprocal duties of the family. Lastly (6.10-20) he describes the armour of the Christian warriors in warfare against the powers of evil. About one-third of the epistle finds a parallel in Colossians. It is presupposed both by Philippians and by 1 Peter. Reminiscent of it may be traced in Clem. Rom., Ignatius, Polycarp, Hermas, and in early gnostic works. It is explicitly quoted as Pauline first by Irenaeus, then by Tertullian and Clem. Alex. The authenticity of the epistle has, however, been questioned, and needs therefore to be established, principally on internal evidence. The chief arguments urged against Pauline authorship are the number of words peculiar to this epistle; (2) doctrinal divergence from the four undisputed letters (Cor., 2Cor., Gal., Rom.) of St. Paul; (3) the advanced stage of church-organization which it is said to imply. They are met by observing (1) that most of the "peculiar" words are due to the subject-matter; (2) that in doctrine, differences notwithstanding, it has profound essential connexion with the four standard epistles, especially with Romans—to which, indeed, it is complementary; (3) that no hierarchy is implied, but only a distribution of gifts and abilities, such as are already disinterestedly given in the second blessings of the unity of the Church appears. Rightly understood, the epistle is the crown and consummation of St. Paul's creative theology. The Pastors form an epitome to the great drama of the nine Pauline epistles to churches, of which Ephesians is the last and the most catholic.

Ephesus, an illustrious city in the district of Ionia, nearly opposite the island of Samos, and about the middle of the W. coast of the peninsula commonly called Asia Minor. It was the capital of the Roman province of Asia.—I. Geographical Relations. All the cities of Ionia were renowned for the growth and commercial prosperity, and none more so than Ephesus. In the time of Augustus it was the great emporium of all the regions of Asia within the Taurus; its harbour (named Panormus), at the mouth of the Cayster, was elaborately constructed. St. Paul's life alone furnishes illustrations of its mercantile relations; with Athens on the W., Macedonia on the N., and Syria on the E. The relations of Ephesus to the inland regions of the continent also are prominently brought before us in the apostle's travels. The upper coasts (Ac. 19.1) through which he passed, when about to take up his residence in the city, were the Phoenician tablelands of the interior. Two great roads at least, in the Roman times, led eastward from Ephesus—one through the passes of Tmolus to Sardis (Rev. 3.1) and thence to Galatia and the N.E., the other the extreme of the coast, leading to Magnesia, and up the valley of the Maeander to Ionia, whence the communication was direct to the Ephrates and to the Syrian Antioch. There seem to have been Sardian and Magnesian gates on the E. side of Ephesus corresponding to these roads respectively. There were also coast-roads leading N. to Smyrna and S. to Miletus. By the latter of these it is probable that the Ephesian elders travelled when summoned to meet Paul at the latter city (Ac. 20.17,18).—II. Temple and Worship of Diana. Conspicuous at the head of the harbour of Ephesus was the great temple of Diana or Artemis, the tutelary deity of this favourite city. It stood on immense substructures, in consequence of the swampy nature of the ground. The earlier temple, which had been begun before the
VIEW OF EPHESUS.
(Reproduced by permission of Mr. H. T. Ashby.)
Persian war, was burnt down in the night when Alexander the Great was born; and another structure, raised by the enthusiastic co-operation of all the inhabitants of "Asia," took its place. The magnificence of this sanctuary was a proverb throughout the civilized world. In consequence of this devotion the city of Ephesus was called the 

war, was burnt down in the night when Alexander the Great was born; and another structure, raised by the enthusiastic co-operation of all the inhabitants of "Asia," took its place. The magnificence of this sanctuary was a proverb throughout the civilized world. In consequence of this devotion the city of Ephesus was called the πάντα ἄνδρας (Ac. 19.25), or "warden," of Diana. On account of the celebrity of Diana's worship a large manufactory grew up there of portable shrines, which strangers purchased, and devotees carried with them on journeys or set up in their houses. Of the manufacturers engaged in this business, perhaps Alexander the "coppersmith" (2 Tim. 4.14) was one.

The case of Demetrius the "silversmith" is explicit.—III. STUDY AND PRACTICE OF MAGIC. Not unconnected with the preceding subject was the remarkable prevalence of magical arts at Ephesus. In illustration of the magical books which were publicly burnt (Ac. 19.19) under the influence of St. Paul's preaching, it is enough here to refer to the Ἐρείπια γραμμάτων (mentioned by Plutarch and others), which were regarded as a charm when pronounced, and when written down were worn as amulets.—IV. PROVINCIAL AND MUNICIPAL GOVERNMENT. It is well known that Asia was a proconsular province; and in harmony with this fact we find proconsuls (A.V. "deputies") specially mentioned (ver. 38). Again, we learn from Pliny (v. 32) that Ephesus was an assize-town, and in Ac. 19.38 we find the court-days alluded to as actually being held (A.V. "the law is open") during the uproar. Ephesus itself was a "free city," and had its own assemblies, and its own counsellors. The senate is mentioned by Josephus; and
St. Luke, in the narrative before us, speaks of the ἐφόδος (ver. 30, 33, A.V. "the people") and of its customary assemblies (ver. 39, A.V.). When we speak of more precise mention is made of one of the most important municipal officers of Ephesus, the "town clerk" or keeper of the records, whom we know from other sources to have been a person of great influence and responsibility. It is remarkable how all these political and religious characteristics of Ephesus, which appear in the sacred narrative, are illustrated by inscriptions and coins. Many coins of Ephesus bear allusions to the worship of Diana in her various aspects. That Jews were established there in considerable numbers is known from Josephus (14 Ant. x. 25), and might be inferred from its mercantile eminence, but is also evident from Ac. 21, 6, 9. It is here, and here only, that we find disciples of St. John the Baptist explicitly mentioned after the ascension of Christ (Ac. 18, 25, 19, 3). The case of Apollos (18, 24) is a further instance of the intercourse between this place and Alexandria. The first seeds of Christian truth were sown at Ephesus, and immediately after the Great Pentecost (Ac. 2). In St. Paul's stay of more than two years (19, 8, 10, 20, 31), which formed the most important passage of his third circuit, and during which he laboured, first in the synagogue (19, 8), and then in the school of Tyrannus (ver. 9), and also in private houses (20, 21), during which he wrote 1 Cor., we have the period of the chief evangelization of this shore of the Aegean. The address at Miletus shows that the church at Ephesus was thoroughly organized under its presidents. At a later period Timothy was set over them, as we learn from the two epistles addressed to him. Among St. Paul's other companions, two, Trophimus and Tychicus, were natives of Asia (Ac. 20, 4); the latter probably (2 Tim. 4, 12), the former certainly (Ac. 21, 29), of Ephesus. In the same connexion we ought to mention Onesiphorus (2 Tim. 1, 16-18) and his household (4, 16), and also in particular of Ephesus, the antagonists of the apostle, the sons of Sceva and his party (Ac. 19, 14), Hymenaeus and Alexander (1 Tim. 1, 20; 2 Tim. 4, 14), and Phygelus and Hermogenes (2 Tim. 1, 15). The site of ancient Ephesus has been examined by many travellers during the last 200 years. The whole place is now utterly desolate, with the exception of the small Turkish village at Ayasulk. The ruins are of vast extent, both on Coressus and on the plain; but there is great doubt as to many topographical details. It is satisfactory, however, that the position of the theatre on mount Pion is absolutely certain. Ephial, a descendant of Judah (1 Chr. 2, 57).

Ephod (Num. 34, 23), father of HANNIEL.

Ephod (Num. 34, 23), father of Hanniel.

Ephod. The simplest form of ephod of which we read was the linen ephod (ἐφόδιον ἅθα), the distinguishing dress of the ministrant priest (1 Sam. 21, 18; 22, 18; 2 Sam. 6, 14), which seems to have been a vest or tunic bound to the body by an elaborate design, i.e., a tunic having shoulder-straps, and held round the body by a band of the same material. On each of the shoulder-straps was an onyx stone, on which were engraved the names of the tribes of Israel. Attached to the front of the ephod, and filling the space between the shoulder-straps, was the breast-plate, with 12 precious stones in four rows, each stone also engraved with the name of one of the tribes. In this breast-plate was a kind of pocket, containing the Urim and Thummim, or sacred lots, by the use of which oracles were delivered. As we read several times of the ephod being "carried" and "brought near" when the people wished to "inquire of the Lord," we may suppose that the sacred lots were considered an indispensable part of it; and so also there was a priest who took charge of it. This may throw some light on those passages in which the ephod is spoken of in such a way that many consider that it was an idolatrous image. An ephod and teraphim were part of the furniture of Micah's shrine (Judg. 17, 18), and Gideon made an ephod of the gold ornaments of the Urm of Midian and of "the house of Ophrah," where it became a snare to Gideon and to his house. The prophet Isaiah uses a derivative word (ἐφόδιον) to denote the "plating" of molten images (Is. 30, 22); and it may be that the original coat became a rich coating, superimposed upon a figure or stand, which was introduced when an oracle was sought by the sacred lots. It does not seem that the ephod itself was worshipped, but rather that it was made the accompaniment and instrument of superstitious worship.

[1,6]

Ephraim, the younger son of Joseph (Gen. 41, 52; 45, 20). The strong tribes of Joseph and Judah occupied the mountains of south and central Palestine before Joshua allotted parts of the conquered land to Benjamin, Dan, and Simeon. Thus Ephraim marched with Judah to Gezer (Jos. 16, 3) before Dan received its territory. The N. border of Benjamin was the S. border of Ephraim (16, 1, 18, 11, 14).
mountains, with springs and orchards; but the brother-tribe of Manasseh was more powerful (Jos.17.17), and Ephraim's lot was only 300 sq. miles (partly conquered) for Manasseh W. of Jordan. The N.W. border was formed by the brook Kanah, dividing Ephraim and Manasseh, and ran by Michmethah, E. of Shechem, and by Taanath-shiloh and Janoah, above the Jordan Valley, going down to Naaran (some further west). It is remarkable that few towns within the lot of either Ephraim or Manasseh are enumerated in the book of Joshua; the region coincided closely with Samaria in extent. The term mount Ephraim seems used with a wider significance than that of the tribal lot in later times (1Sam.1:1; 2Chr.13.4,19,15.8), since it apparently included Bethel, Ramah, and Ephraim, which once belonged to Benjamin. [c.r.c.]

Ephraim, near Baal-hazor (2Sam.13.23), or Ephraim near Bethel and Jeshanah (2 Chr.13.19), and near the "wilderness" (Jn.11.54)—the "city called Ephraim," to which our Lord retired—are all names of Ephraim (Jos.18.1). The E of Ephraim places it 5 Roman miles E of Bethel, where is now the village Tiyibeh, with a ruined church and a fine view of the wilderness and a part of the Jordan Valley beyond. It lies within the border of Benjamin. [Apherema.] [c.r.c.]

Ephraim, Gate of (2K.14.13; 2Chr.25.20,22). Neh.12.39), a gate on W side of Jerusalem.

Ephraim, Wood of, a forest E. of Jordan, in which the fatal battle was fought between the armies of David and Absalom (2Sam.18.6). The site is unknown. [c.r.c.]

Ephrathite.—1. Of the tribe of Ephraim (Judg.12.5; see R.V.). —2. An Ephrathite (1Chron.4.20), a dweller in Mt. Ephraim. [c.r.c.]

Ephraim. [Ephraim.]

Ephratah, or Ephrath. —1. Second wife of Caleb, the son of Hezron, mother of Hur, and grandmother of Caleb the spy, according to tChr.2.19.50, but see 2.24 and 4.4. —2. The ancient name of Bethlehem-Judah (Gen.33.19). The word signifies "fruitful.

Ephrathite.—1. An inhabitant of Bethlehem-judah (Rut.4.10; Is.1.4). The phrase is used of the district. [c.r.c.]

Ephron, the son of Zohar, a Hittite, from whom Abraham bought the field and cave of Machpelah (Gen.23.8.17; 25.9.49.29.30.50.13).

Ephron, a strong city between Canaan (Asheroth-Karnaim) and Beth-shean, attacked and demolished by Judas Maccabaeus (1Mac.5.46-52; 2Mac.12.27). The site is unknown. [c.r.c.]

Ephron, Mount. The "cities of mount Ephron" formed landmarks on the northern boundary of Judah (Jos.15.9). Apparently places near Ephrathah (Bethlehem). [c.r.c.]

Epicureans. [Stoics.]

Epiph'anes (1Mac.1.10,10.1). [Antiochus IV.]

Epiphany. [Jesus Christ; Magi.]

Ep’iph’i (Ἐπίφα, 3Mac.6.38), the name of the 11th month of the Egyptian Vague year, and the Alexandrian or Egyptian Julian year.

As the Egyptian month had 30 days, from Pachon 25 to Epiphi 4 would be an interval of 40 days, as in T. 5.

Epistle. It is well to distinguish between letter and epistle, the latter being more formal and artificial in character. Intercommunication by letter was one of the earliest results of the invention of writing, but in a primitive society it would be the privilege of the more powerful and wealthy. In T. both formally and technically all the letters mentioned are of the nature of epistles, i.e. formal communications, mostly from superiors to inferiors. The Amarna tablets imply that such communications must have been common in Palestine some centuries before the earliest letter mentioned in O.T.; and the private letters found among the Oxyrhynchus Papyri (ed. Grenfell and Hunt, 1898-1899) make it remarkable that there is so little reference to private letters among the Jews in later O.T. times. The following O.T. epistles may be noted as specimens: David to Joab (2Sam.11.14.15); Jezebel about Naboth (1K.21.8.9); John to Samaria (2K.10.1-6); Beuhadad about Naaman (5.5-7); Sennacherib (19.14) and Bero- dach-baladan (20.12) to Hezekiah. Elijah (2Chr.21.12) and Jeremiah (Je.29.1) both sent written communications, and there are numerous references to the practice in Ezra, Nehemiah, and Esther. The terms used include ἐπιστολή (= writing), and, later, ΠΩΜ; Bab. igira, "tile," "tablet" (2Chr.30.1.6; Ne.2.7-9,6.15,17,19; Esth.9.26.29), or ΠΩΜ (Ezr.4.8,11.5-6). (2) In N.T. the official letter is also common, ἐπιστολή being the usual term: e.g. to synagogues (Ac.9.2.225); the apostles and elders to Gentile Christians (15.27-29); ἐπιστολαί, or letters introductory (2Cor.3.1). But the most striking feature is the collection of 21 "Epistles," of which 13 are ascribed to St. Paul and the rest are divided among SS. James, Peter, John, Jude, and the unknown writer of Hebrews. On the classification of these as private letters, letters not private in personal, or formal conventional epistles, see Deissmann, B.S. (1895-1897, Eng. tr. 1901). The idea that St. Paul "invented" the N.T. epistle must be modified in the light of letters recently discovered in Egypt and elsewhere (cf. J. Armitage Robinson, Eph. pp. 275 ff.), which illustrate the form and phrases of N.T. epistles. All that is new in the latter is the result of the spiritual force contained in their message. [E.H.P.]

Er.—1. First-born of Judah. Er "was wicked in the sight of the Lord; and the Lord slew him." The nature of his sin is not stated, but it was possibly connected with the abominable idolatry of Canaan, his mother's land (Gen.26.3-5). Er was Num.26.35; whereas Shelah the son of Judah (1Chron.4.21). —3. Son of Jose, and father of Elmodan (Lu.3.28).

Eran, ancestor of the Eranites and son of Shuthelah, eldest son of Ephraim (Num.26.36).

Erastus.—1. One of the attendants, or deacons, of St. Paul at Ephesus, who (with Timothy) was sent forward into Macedonia while the apostle himself remained in Asia (Ac.19.22). He is probably the Erastus mentioned in the salutations in 2Tim.4.20.
Erech (Gen. 10:10), the second city of Nimrod, and capital of Ninvar (Babylonia); the Urak of the inscriptions. In Sumerian, Urug; now Warka, on the left bank of the Euphrates, W. of the Nile Canal. In the biblical Creation-story its origin is attributed to Merodach. The deities worshipped there were Istar, and Nanaa, and Ann, god of the heavens. *Egparimina,* "the house of the seven enclosures" its temple-tower, probably originated its name of *Urak saburi,* "Erech of the enclosures," in the time of Gilgames. [Archaevites.] [T.G.P.]

Erl, son of Gad (Gen. 46:16), and ancestor of the Erites (Num. 26:16).

Esau, N.T. form of ISAIAH.

Esphahdon (Assyr. purash-idadina; Assur has given a brother), son to Semacherrh (2 K. 19:37; Is. 37:38), succeeding him on his murder (681 b.c.), and procuring the desertion to his side of the rebel forces on the W. frontier of Ararat, whether the conspirators had fled. By a judicious policy within the empire he put an end to the heretical faction of his father. He avoided internal dissensions such as had troubled his father's reign, and was uniformly successful in war. The fierce swarms of the Gimirra (Cimmerians, Gomer; Gen. 10:21, etc.), invading Assyria from the N., were defeated by him in a decisive battle (677 b.c.) and forced him to withdraw his whole line of defense. In the same year he took and levelled Sidon in consequence of a revolt, planting a colony from Elam and Babylonia in the new city which he built on the site. After other successful campaigns he carried out (from 674-670 B.C.) three invasions of Egypt, inflicting finally a signal defeat at Memphis, and annexing the whole country to his empire. Two years later, when on his way to punish an Egyptian rebel, he fell sick and died. Early in his reign he had rebuilt Babylon (destroyed by his father 689 B.C.), making it second only to Nineveh in importance. He appears to have planted colonists in the cities of Sumerian (Ezr. 4:2), in addition to those which his predecessor had established in the room of the captive Jews. [A.W.S.]

Esau, the eldest son of Isaac, and twin-brother of Jacob. The appearance of the child at birth is said in Gen. 25:25 to have suggested his name (hairy), but the real meaning of "Esau" is doubtful. His surname Edom (red), chiefly applied to his ancestry, owed its origin to the incident related in 25:30. [Edom.] The strife between the brothers began prior to birth, and led to the prophecy "the elder shall serve the younger" (25:22,23). Esau grew up to be a "cunning hunter, a man of the field," in fact, a thorough Bedawi, a "son of the desert," impatient of the restraints of civilized or settled life. One day, returning from hunting, faint and hungry, Esau asked his brother to feed him with the red potage he was preparing. Taking advantage of his distress, and mindful probably of the prophecy, Isaac fainted at the sight of his brother's birthright as the price. Esau married at the age of 40, and contrary to the wish of his parents. His wives were both Hittites; and they "were bitterness of spirit unto Isaac and to Rebekah" (Gen. 26,34,35). The next episode in the history of the brothers is still more painful. Jacob, through the craft of his mother, is again successful, and immediately secures the favorably the blessing. Esau vows vengeance. But he knew that a mother's watchful care. By a characteristic piece of domestic policy Rebekah succeeded both in exciting Isaac's anger against Esau, and obtaining his consent to Jacob's departure. When Esau heard that his father had commanded his younger son to go and marry a wife of the daughters of his kinsman Laban, he also resolved to try whether by a new alliance he could propitiate his parents. He accordingly married his cousin Mahalath, the daughter of Ishmael (28,5,9). This marriage appears to have brought him into connexion with the Ishmaelitic tribes beyond the valley of Arabah. He soon afterwards established himself in mount Seir; still retaining, however, some interest in his father's property in Southern Palestine. He was residing in mount Seir when Jacob returned from Padan-aram, and had then become so rich and powerful that the inhabitants of the whole Seir range feared him. Though they seem to have been almost completely effaced. It does not appear that the brothers again met until the death of their father about twenty years afterwards. They united in laying Isaac's body in the cave of Machpelah. Of Esau's subsequent history nothing is known; but that his descendants, as EDOM and Edomites.

Esau (I Esd. 5:29) = ZIHA.

Esay (2 Esd. 2:18; Eccl. 48,20,22) = ISAIAH.

Eschatology, the doctrine of the Last Things, the things that shall be at the end of the world, is bound up with the idea that the world, this present order of things, will one day pass away and be succeeded by another, the age to come. In O.T. the doctrine was first brought into prominence in order to answer, from the national point of view, the problem of the (so-conceived) undeserved oppression of Israel by God's people by their Godless neighbor. The plot of God, it was thought, was waiting His time to reveal Himself, to vindicate His honour and deliver His people. All this would happen in the Day of the Lord (see further under COMING or CURST). Gradually the expectation of this day was put in the more distant future, until at length it was generally supposed that it would herald the end of this age by a great and final judgment of the nations, and that the good time for Israel would be in a new and golden age to come. Then the glory of Zion's world-wide rule would be realized in a new earth delivered from sin and suffering. So eschatology passes out of the region of prophecy (which is always practically concerned with the near future) into that of apocalyptic, which leaps over from the present to the end of time (often in O.T., and in N.T. generally, conceived as quite near). Christianity thus inherited from Judaism these ideas: a great Day of the Lord, the day of God's judgment from which there is no further appeal, to be followed by a state of blessedness for some, secure from all future danger or fear, and for others a state of woe from which
there is no hope of recovery. Our Lord sanctioned these ideas, but made them moral and spiritual: not the Israel of the flesh, but the "Israel of God," the redeemed of His Church gathered together out of every nation, will be the blessed; not the Gentiles of the flesh, but the unincoruncated in heart (including many Jews), will be the doomed. The glorious reign of Israel will be not an earthly but a heavenly kingdom, a rule of love and goodness. Further, the blessedness and the woe were expanded by Him into the Christian doctrines of the Resurrection, Heaven and Hell. See further, Death, Future Life, Heaven, Hell, and Eternity.

\[s.n.s.\]

**ESDRAELON.** This is merely the Gk. form of the Heb. Jezerel (I Th. 3:9, 4:6). In I Th. 1:8 Esdrelon, with the addition of "the great plain," this plain is W. of Jezerel [Palestine] the Jerusalem of the northern kingdom. Now called Merj Ibn 'Awnr. [c.r.c.]

**Esdras** for Ezra the scribe in 1 and 2 Esd.

**Es'dras, First Book of,** the first in order of the books of the Apocrypha in the English Bible. In LXX, this book is entitled Esdras A; Esdras B including the canonical books Esdras A and the Vulg. (tolowed in Eng. P. B., art. vi.), Esdras I and II, stand for the canonical books, Esdras A becoming Esdras III., and Esdras IV. being the book known to us as "the second book of Esdras." The classification in the English Bible, vols. Ezra, Nehemiah, I and II Esdras is adopted from the Genevan Bible (1560), the first so to enumerate. The book contains a repetition of the history of the rebuilding of the temple, and is made up almost entirely of materials from the canonical books of 2Chronicles, Ezra, and Nehemiah. There is one original section (3:1-5:6). The transcript is more or less exact, except that the history is reversed—Ahasuerus, Artaxerxes, Darius and Artaxerxes; and, though it adds nothing to our historical knowledge, the book is interesting as exemplifying the freedom with which Jewish writers dealt with their Scriptures. Josephus uses it largely in Ant. I. i. v., and follows its order rather than that of the canonical books; and it is quoted considerably by the early Christian Fathers, e.g. Clem. Alex., Athan., Tertull., Cyprian.

Few people recognize the frequently misquoted proverb, "Magna est veritas et praevalebit" (4:41) as coming from this book, though it is quoted by many Fathers. The book appears to be an attempt to tell in narrative the Return and restoration of the temple in an elegant style, agreeable to Gk. readers unacquainted with Heb. Whether it be (a) a compilation from the Gk. of the LXX. or (b) the editing of a Gk. translation of Chronicles, Ezra, and Nehemiah earlier than the LXX., or (c) a direct translation of the Heb., made quite independently, is uncertain. Its object was to exhibit to Gk.-speaking Jews the favour once shown to their nation by heathen monarchs, under God's providence, to stimulate more earnest observance of the law, and possibly to win for them the favour of some foreign ruler, perhaps one of the Ptolemies. Its date may probably be 170-100 B.C., some time before the Hasmonaean wars; it being unlikely that any translator would venture to tamper with the order or materials of Ezra and Nehemiah after that date, at which they had become canonical. Lupton's ingenious theory that the book was edited when Onias—fleeing from the persecution of Antiochus Epiphan. in Palestine—petitioned Philometer for leave to build a temple at Helipolis is, though only conjectural, of great interest, and the character of the translation, together with certain phrases and peculiarities (e.g. 4:23), point to its being written for the important colony of Jews in Egypt, rather than for those of suitable, thought origin, is no more certain clue. The section 3-5, the story of the three pages, may be a tradition of Persian history, and is described by some commentators as the nucleus around which the rest of the book was grouped. The author was well acquainted with the books of Esther and Daniel; the agreement of the version of these books being most striking, and there are also references to other O.T. books, Hastings, D.B. (5 vols. 1904); Speaker's Comm.; Ewald, Hist. of Israel, etc.

**ESDRAS, SECOND BOOK OF.** This, the title in the English Bible, is derived from the author's own words (1:2). In the Vulg. it is called the Fourth Book. (See above.) It is suggested that the original title was either (1) "Ezra the Prophet" (Hilgenfeld, based on quotations of Clem. Alex. and Ambrose), or (2) the "Apocalypse of Esdras" (Westcott, based on catalogue of the 60 canonical and apocryphal books found in Asia). This latter is the most evident and obvious; and a language of 2Esdras is Gk., but for a long time the book was only known through the Latin version. No Gk. MS. of the book exists, though two quotations from the Gk. are found in Clem. Alex. and Apost. Constit. The Latin version contains two important additions (1:2; 15), but not found in the Gk. of 2Esdras; it is obvious that a large section is missing between vv. 35 and 36 of ch. 7. The missing verses (now restored in our R.V.) are found in the Syriac, Ethiopic, Arabic, and Armenian versions (of these the Syriac is the best), and the missing Latin fragment was found in a MS. of the 9th cent., by Bensly in 1874. In 1865, moreover, Gildemeister proved that the missing verses had actually been contained in the Latin Cod. S, but the page had been cut out in early times. Hence the conclusion was drawn that all the Latin MSS. which do not contain the section are derived from Cod. S. The reason for the omission of 35-109 is possibly a dogmatic one. It contains a description of the intermediate state, and an emphatic denial of the efficacy of prayers for the dead, a matter of curious interest when it is remembered that the words of 2:24-35 are employed in the ancient Missa pro Defunctis, whence the origin of the use of the word Requiem, and that this passage (formerly used by the English Church as the Introit for Whit-Tuesday), is the only one from this book made use of by the Church. Leaving for the moment ch. 1, 2, 15, 16, the real 2Esdras consists of an account of three revelations and four visions granted to Ezra.
during the Captivity, by which he is instructed in some of the great mysteries of the moral world, and God's dealings with His people. The first revelation (4-5:14) shows the unsearchable depths of divine providence and the signs of the last age. The second revelation (5:20-6:34) carries the teaching still further, and prophesies the time when "evil shall be put out and deceit shall be quenched." Third revelation (6:35-9:25): Ezra, renewing his questions, asks why, if other nations were outwardly compared with Israel, the chosen race should be dispossessed of their inheritance. In reply he is told that the narrow way must be passed first, but there shall be in the future a wider and more glorious scene. Then comes a striking passage, giving a picture of the Messianic Age, the appearance of "The Son of Jesus." (there are marks of interpolation here). His death (with that of all living) after a reign of 400 years, and then the resurrection (7:26-55). The missing fragment describes the pit of torment, and the paradise of delight over against it; and Ezra is warned that intercession for the wicked is impossible—"many are created but few are chosen." The third "vision" (9:10, 35) is a woman (Sinah) lamenting the death of her only son (Jerusalem), born to her after 30 years of sterility (the 3,000 years before Solomon built the city). She vanishes, and her place is taken by the city in building—the heavenly Jerusalem which is to replace the earthly. And whereas the first "vision" described Jerusalem, the "Messiah" refers the 30 years to the period following the fall of Jerusalem, and from this it is argued that the book is thus dated 70 + 30 = 100 A.D. The second vision (ch. 11, 12) describes an eagle (Rom) with twelve wings, and eight little wings, and three heads, which bear rule, until a lion (the Messiah) pronounces sentence upon it and it is consumed. Third vision (ch. 13): The Messiah, "flying with the clouds of heaven," destroys the nations of the earth gathered against Him, and gathering the lost tribes of Israel, "a peaceable multitude," offers them Sinai prosperity (like No. 2, ch. 4). Ezra is told that he is to be taken from men, and is hidden to make a record of what he has seen. In 40 days he writes 94 books (24 being the O.T., and published openly, the remaining 70 to be divulged only to the wise). This last section probably owes its origin to the tradition which regarded Ezra as the representative of the men of "the Great Synagogue." The additions to 2 Esdras (ch. 1, 2, 15, 16), confessedly of later and Christian origin (cf. for reminiscences of N.T., 1:30, 33; with Mt. 33,37, 38, and 16,42; with John 7, 24, etc.), contain a reply of Israel for their abandonment of God, and a denunciation of war upon the other nations of the world. The latter section begins almost in direct continuation of the former.

Character and Date. A deep melancholy pervades the original book, the key to which is obvious, it would conduce with most modern critics that the book was written a.d. 70, when the outlook for the Jews was rendered hopeless. If this is correct, the book should probably be dated in the reign of Domitian, 81-96 A.D. The question turns upon the interpretation of the eagle vision, and the reigns of the several kings. The book bears a remarkably affinity to the "Apocalypse of Baruch," also a product of the age of the destruction of Jerusalem. The author, it is admitted, must have been a non-Christian, living either in Rome, or more probably in Alexandria—which will account more readily for the quotation of his work by Clem. Alex. The author of the additions (1, 2, etc.) was undoubtedly a Christian, probably also of Alexandria. Hastings, D. B. (5 vols. 1901); Speaker's Compendium (Lupton); Clem. Rom. and Studies, vol. iii. ii (1895), etc. See also Apoc. of Baruch, Charles (1800). [s.n.s.]

Esdrelon. [ESDRELOON.]
Esebon (1 Th. 5.15) = Heshbon.
Esebitias (1 Esd.8.34) = Sarekibah.
Esek (continuation), a well, dug by the herdsman of Isaac in the valley of Gerar (Gen. 26.29).

Esh-ba'al, the fourth son of Saul, according to the genealogies of 1 Chr. 8.33 and 9.39. He is doubtless the same person as Ishboseth.

Eshban, a Horite: one of the four sons of Dishon (Gen. 36.26: i Chr. 1.14).

Eshcol, Valley, or Brook, of, explored by the spies who were sent by Moses from the desert. From the terms of two of the notices (Num. 32.6: Deut. 1.24) it might be gathered that Eschol was the farthest point to which the spies penetrated. In this case Rehob (Num. 13.21) would be at Rehoboth, and the words "as men come to Hamath" must be regarded as a later gloss. The name Eschol is connected with Hebron (Gen. 14.13, 24), and Hebron was a great vine country (see Num. 13.23). A spring called "Ein Keshekath at Hebron has been supposed to be the "brook Eschol," but the word does not represent the Hebrew. [c.r.c.]

Eshcan, a city of Judah (Jos. 15.52).
Eshik, a Benjamite descended from Saul and brother of Azel (1 Chr. 8.30).

Esh郁, the, [ESKELON.]
Esh talel, probably the "hollow": a town of Judah in the Shephelah near Zorah (Jos. 15.33), on the border of Dan, to which it was given up (19.14). It was close to the Mahanaim-dan, and to Sansom's home (Sirah): see Judg. 13.25, 16.31, 18.38, 11. Esebanus (Omphamianus) places it 10 miles N. of Beit Jibrin, and near Jarmuth. It is now the village Esh'kha, on a hill, by a recess on N. side of the valley of Serek, 11 miles E. of Sirah, 15 miles N.N.E. of Beit Jibrin, and 5 miles N. of et Yarmuk. [c.r.c.]

Esh tautiles, The, one of the families of Kirjath-jearim (2 Chr. 2.5). [ESHTAOL.]

Esh'temoa, Esh'temoh, a town of Judah, in the mountains of Judah (15.50). With its suburbs Eshtemoa was allotted to the priests (21.4: 1 Chr. 6.57). It was one of the places frequented by David and his followers during their wanderings (1 Sam. 30.28), cf. Jerusalem. It was discovered by Robinson at es Sem'e'a, a village 9 miles S. of Hebron. Eshtemoa appears to have been founded by Ishbah, a descendant of Caleb (1 Chr. 4.17).
Eshton, a descendant of Judah (1 Chr. 4:11:12).

Espar, son of Nagge, or Naggai, in the genealogy of Joseph (Lk. 3:25).

Esora, a place fortified by the Jews on the approach of the Assyrian army under Holofernes (Judg. 4:4). Noticed with Salem (Sālim) and Choba. Apparently 'Ashir, near Shechem on N. [C.R.C.]

Esri. [Azaeel, 4.]

Essene, a Jewish party, or school of thought, described by Philo (Q. O. P. L. 12) and Josephus (2 Wars viii. 2). The latter mentions several individual Essenes. The name seems to be derived from Aram. 'āsiyāt, 'a physician'; and was probably given to them from without, not assumed by themselves. They eschewed marriage, kept the Sabbath with great strictness, practised frequent ablutions, and had all things in common; they avoided oaths, shunned all employments connected with war, and lived a simple life. A characteristic mentioned by both Josephus and Philo is that they abjured the sacrifices. This peculiarity would seem to cut them off from Judaism. Many of the characteristics assigned to the party by the two authors from whom we learn most about them are falsified by what is said of individual Essenes. Although they are said to slum the towns, Josephus says, that there are no provisions being made, etc. When Antigonus is murdered. Although they abjured arms, yet John the Essene is one of the commanders of the Jews at the beginning of their war with the Romans. These differences may be explained by supposing that there were various divisions of the party, of which very different statements might be made. It is difficult to harmonize the statement that they numbered only 4,000 with the fact that there were many of them in "every city," and that there were "many myriads" of them, unless the statements refer to different sorts of Essenes. While in the main the disciples of John the Essene, an indigeneous Jewish origin, there are features that suggest Pseudoism and possibly neo-Phytagoreanism. One of the enigmatic features in the history of the party is the absence of any mention of them in NT. They were numerous all over the country, but though our Lord meets Pharisees, Sadducees, Herodians, followers of John the Baptist, etc., He is not even once recorded to have met an Essene. If, as suggested above, the name was given them from without, they may be present in the gospels under another designation. There are certain persons who are associated with our Lord's birth and burial, "waiters for the redemption of Israel," to which Anna the prophetess and Joseph of Arimathaea belonged—these may be the Essenes. If our Lord Himself belonged in some sense to the party, it would explain how He never encountered them. Many of His teachings resemble those of the Essenes—those differences may be explained by differences in the subdivision of the Essenes. This would also explain the disappearance of the Essenes in the Christian Church. Some of the heretical movements in the 2nd cent. are explicable on the supposition of Essene influence. Josephus (2 Wars viii. 7) mentions that they had many secret books; these have been thought to have been the Jewish apocalypses. Confirmation of this is in the hope that between the bliss that Josephus tells us was the hope of the Essenes and the paradise described by Enoch. Original sources: Philo, Q. O. P. L.; Josephus, 2 Wars viii. 2. Epiphanius is valueless. Recent literature: Gisbch, The Essenes, their Doctrines and their History; Lightfoot, Comm. on Colossians; Lucius, Der Essentismus; Thomson, Books which influenced Our Lord and His Apostles. Besides arts. in various encyclopaedias and Bible dictionaries, histories of the Jews embracing the period may be consulted with advantage. [J.E.H.T.]

Esther, from Persian sīrāh (a star), otherwise called Hadassah, Heb. 'havrat, daughter of Abihail, and brought up by her cousin Mordecai. She was chosen for her exceeding beauty by Ahasuerus (Xerxes), king of Persia, out of the maidens brought from many lands, to succeed the deposed queen Vashti. The plan for the extermination of the Jews through the King's cousin Mordecai's withholding of homage, had obtained the king's irrevocable consent, became known to Esther through her cousin. At his instigation she risked death by entering the king's presence uninvited, and through her tactful action obtained the downfall of Haman. The Jews, after the first threat, were permitted to defend themselves on the day appointed for their slaughter, which they did to good purpose. Outside the Bible we know of but one wife of Xerxes, Amestrus. With her neither Vashti nor Esther can be satisfactorily identified. [Vashti.] Amestrus, in fact, was married to Xerxes so long before the time with which the book of Esther deals, that two of her sons accompanied his expedition against Greece. Probably Esther has been idealized, and was nothing more than a secondary wife or favourite member of the king's seraglio. [A.M.W.]

Esther, Book of, although the later canonical books of the O.T. is of considerable interest and value, vividly picturing Persian court life, and furnishing an example of self-sacrificing intercession, patriotism, and courage. As against the view which would place its composition in the 2nd cent. B.C. on the ground of a supposed Maccabean colouring, we may point to its accurate and lifelike portrayal of Persian manners. Although the reign of Ahasuerus is spoken of as already past, the narrative, as it stands, would have been impossible for one writing when the substitution of Gk. for Persian supremacy had blotted out the details of the earlier administration. The authorship has been ascribed to Mordecai (St. Clem. Alex.), Ezra (St. Augustine), the "Men of the Great Synagogue" (so Jewish tradition), and others. These, however, are but conjectures. The book is plainly the work of one hand, excepting possibly 9:20-32. The style is easy and simple. The Heb. resembles that of 2 and 3 Macc. Notwithstanding these divergencies it is generally pure, but contains some later forms and a few Persian words. Josephus (Cont. Ap. i. 8) included the book in the Jewish Scriptures, and the Jewish Councils of Jerusa-
Esther, as Ps. 121:4

These writers of apocryphal Canon of read, forms chief considered sections. Both Jews and Christians, however, for a while showed some hesitation on the subject. But from later Jews its intensely patriotic spirit evoked enthusiastic admiration. Esther forms the last of the five "Megilloth" [Ortho-Testament], and is read by them on the Feast of Purim. [Purim.] We must remember that most of the early Fathers, being ignorant of Hebrew, were dependent upon the Gk. Canon of Scripture, including therefore the apocryphal additions to Esther (see below). These may well have presented a difficulty to some; as did the absence of the divine Name in striking contrast with the explicit handling of the relation between God and His people to be found elsewhere on the part of Biblical writers who set forth His attitude towards men and theirs towards Him without reserve. Here, on the contrary, all such treatment of the matters handled is held rigidly in check. One reason suggested for this reticence is that as the Feast of Purim was probably the chief occasion on which the book was to be read, there may have been a desire to avoid the risk that the Name of God might be lightly used amid such surroundings. The book, nevertheless, is far from lacking the religious element; Ps. 121:4 ("He that keepeth," etc.) might well be its motto, and the words of 4:14 show an infailing trust in the ever-ruled Hand. One main purpose of the book was to encourage the observance of Purim, and perhaps also to bring about its more intelligent and reverent celebration. We may also safely assume that a foremost object with the author was to enforce upon the Dispersion lessons as to the divine Providence. The Gk. version and those derived from it contain a number of additional sections. One reason for their introduction was doubtless to counteract what was considered to be the unduly secular tone of the original. They were introduced at various points of the story, proceeding in a perfectly smooth and consecutive narrative. But, appearing as one book in the English Apocrypha, they are thus severed from their proper contexts, while the section which in the English stands first (10, 4–11, 1) ought properly to be placed last. Their confused and unintelligible appearance is due to the fact that St. Jerome, in producing the Latin Vulg., perceived that these sections had no counterpart in the original Hebrew, and so grouped them at the end of the canonical book. His marks, showing the respective points at which they should be inserted in the original text, disappeared after a while, with the above result. Apart from their non-existence in the Hebrew, they contain discrepancies as compared with the canonical book. [A. W. S.]

**Etam.** — 1. A city of Simeon (1 Chr. 4:32), perhaps the ruin "Adon 8 miles N.E. of Rim-"
ETERNITY

village there is a rock passage (called Bir el Hasūlah, or the well of refuge) which may be the "e LEFT" where Sanson hid high above the ravine (Surv. W. Pal. iii. pp. 22, 137). [c.r.c.]

Eternity. In O.T. this word and its cognates are represented by nē'ah, lāne'ah, l'ūdah, and l'ōlām. The first has the meaning of pre-eminence in place, or the aspect of eternity of any man or thing, and is often used to denote an uninterrupted continuance; but hardly in the modern sense of an indefinite duration of time. Either some consumption is to be reached ("tried unto the end," Job 34:36), or the time is regarded vaguely as unlimited within the epoch in which the event occurs—e.g. the human life ("perpetual pain," J.e.15.18). Its nearest approach to "endlessness" is in negative clauses, "shall not . . . for ever" (passim). l'ōlām has a more defined sense of time. It is an age past, present, or to come (hā'ōlām habbā). From their very indefiniteness, the past and future epochs would tend to lose their limits, and thus justify the English translation "from ever" and "for ever." Doubtless the positive idea of "endless duration" was gradually developed from the fact that the Hebrews were unable to think of Jehov-ah as ceasing to exist. (Cf. Ps.9.7 and 102.27, and Chr. passim.) In N.T. ālōw is heir to the various senses of l'ōlām, and ēs rā ālōwā takes the place of the prepositional form l'ōlām. While ālōw perhaps approaches nearer to our "everlasting" (ālōwān), we must be careful not to introduce this meaning entirely and solely into the constantly repeated phrase "eternal life." A careful study of all the places in which this term occurs will probably show that its antithesis is not so much to terminated life, as to physical and secular life on the earth (ēbē ālōwān; e.g. 2 Sam.20:16; L.L. 18.39). It is a type of life which, according to St. John, starts here. Cf. too the phrase āširān lēvōtānu in Heb.9.12. For a somewhat different view, see FUTURE LIFE. [n.f.s.]

Eatham. [Exodus, The; Red Sea, Passage of.]

Etham. —1. "The Ezrahite," one of the four sons of Mahel, whose wisdom was excelled by Solomon (1 K.4.31; 1 Chr.2.6; cf. Ps.88 and 89, titles). —2. Son of Kishi, or Kushaiah; a Merarite Levite, head of that family in the time of David (1 Chr.6.44), and spoken of as a "singer." With Heman and Asaph, the heads of the other two families of Levites, Ethan was appointed to sound with cymbals (15.17, 19). It is probable that Ethan is the same as Jeduthun; but there is no decisive evidence. —3. A Gershonite Levite, one of the ancestors of Asaph the singer (1 Chr.6.42).

Ethanim. [Months.]

Ethba'al, king of Sidon and father of Jezebel (1 K.22.26; 2 Chr.18.1). Josephus represents him as king of the Tyrians as well as of the Sidonians. We may thus identify him with Ethibalbus, noticed by Menander, a priest of Astarte, who, after having assassinated Phœbes, usurped the throne of Tyre for 32 years. [Tyre.]

Eth'an, a town of Judah given to Simeon (Jos.15.7, 12, 19). Eusebius places it at Attur (Attur), but the site is doubtful. [c.r.c.]

Eth'opia. The country, described by Greeks and Romans as "Aethiopia," and by Hebrews as "Cush," lay to the S. of Egypt, and embraced, in its most extended sense, the modern Nubia, Sennear, Kordofan, and northern Abyssinia, and in its more definite sense the kingdom of Meroé. The only certain boundary is in the N., where Syene marked the demarcation between Ethiopia and Nubia (Ec.29:10); in other directions the boundaries can be only generally described as the Red Sea on the E., the Libyan desert on the W., and the Abyssinian highlands on the S. "Ethiopia" thus roughly corresponds to the modern Sudan. The Hebrews do not appear to have had much practical acquaintance with Ethiopia itself, though the Ethiopians were well known to them through their intercourse with Egypt. They were, however, perfectly aware of its position (Ec.29:10) and its tropical characteristics, and they had commercial intercourse with it. The country is for the most part mountainous, the races largely negroes, living in altitude towards the S., until they attain an elevation of about 8,000 ft. in Abyssinia. The inhabitants of Ethiopia were a Hamitic race (Gen.10.6). Of their various tribes the Sabaeans were the most powerful. The history of Ethiopia is closely interwoven with that of Egypt. At the time of the conquest of Egypt, Cambyses advanced against Meroé and subdued it; but the Persian rule did not take any root there, nor did the influence of the Ptolemies generally extend beyond northern Ethiopia. Shortly before our Saviour's birth a queen, Candace (Phn. vi. 35), held sway in Ethiopia, and even resisted the advance of the Roman armies. Another queen was of the same name, noticed in Ac.8.27. Both queens probably ruled at Meroé (now Naga), which had succeeded the old kingdom of Napata (the modern Mæri), and where king Ergamenes was reigning 270 B.C. Meroé was supplanted by the Abyssinian kingdom of Axum in the 1st cent. of the Christian era. [Races.]

Ethiopian. properly, "Cushite." (J.e.13.23; used of Zerah (2 Chr.14.9), and Ebed-melech (J.e.38.7, 10, 12.19, 36).

Ethiopian eunuch (Ac.8.27-39), treasurer of Candace, queen of Meroé. As he was returning from Jerusalem in his chariot and reading the books of the prophet Isaiah, the Evangelist overtook him and preached unto him Jesus. The profession of faith (ver. 37) is probably an interpolation dating back to the 2nd cent. Ethiopian tradition gives him the name of Indieh, and he is said to have propagated the Gospel in Arabia Felix and Ethiopia.

Ethiopian woman. The wife of Moses is so described in Num.12.1. It seems necessary to distinguish her from Zipporah, who was a Midianitess. [A-H.S.]

Ethiopians. Literally "Cush" or "Ethio-" in two passages (Is.20.4; J.e.46.9). Elsewhere "Cushites" or inhabitants of Ethiopia (2 Chr.12.3, 14.12[11, 13, 14, 15], 16.8, 21; Dan.11.43; Am.9.7; Zeph.2.12).

Eth'ma (1 Esd.9.35; R.V. No'oma), apparently a corruption of Nebgo, 3 (cf. Ezr.10.43).

Eth'nan, a descendant of Judah; son of Ashur by his wife Helah (1 Chr.4.7).

Eth'nah, a governor.

Ethni, a Gershonite Levite, ancestor of Asaph the singer (1 Chr.6.41[26]).
Eubulus, a Christian at Rome (2Tim.4.21).

Eucharist, the Sacrament of the Body and Blood of Christ. For this no specific name used in N.T., and the earliest known example of διδομένη in this definite sense is in Ignatius, Smyrn. vii. 1. The name is derived from the common or domestic feast of thanksgiving, which the earliest liturgical indications show to have accompanied the blessing of the Bread and the Wine to be the Body and Blood of Christ. The word may be so used in 1Cor.11.24.16.—I. The earliest extant account of this holy mystery is in ch.10 and 11. St. Paul there speaks of a Lord’s supper,” in connexion with which there were certain abuses to be corrected. “When you assemble together,” he says, “it is not to eat a Lord’s supper”—that is to say, their conduct was not befitting such an occasion”—for each one in eating hurried to get his own supper, and one is hungry, while another is drunk. It is evident, then, that the Agape, or the Lord’s solemn repast, which ought to be most orderly, and not regarded as a satisfaction of appetite (11.21,34). But there is a special reason for solemnity: “For I received from the Lord what I also delivered to you, that the Lord Jesus, in the night when He was betrayed, took a loaf, and after giving thanks broke it, and said, This is My Body, which is for you: do this for My memorial. Likewise also the cup after supper, saving, This cup is the new covenant in My Blood: do this, as often as you drink it, for My memorial. For as often as you eat this loaf and drink this cup, you proclaim the Lord’s death until He come. So that if any man eat the loaf or drink the cup of the Lord unworthily, he will be guilty of the Body and of the Blood of the Lord.” With this must be read the words of the preceding chapter: “The cup of the blessing, which we bless, is it not a participation of Christ’s Blood? The loaf which we break, is it not a partaking of Christ’s Body?” There is no ground for supposing this feature of the Agape to have been instituted by St. Paul. He refers the institution to Jesus Christ, and the observance to a current tradition. But this institution was preserved in the Syoptic Gospels, which should be closely compared with St. Paul’s account. They agree with him in placing it on the night of the betrayal, and they appear to connect it with the Paschal Supper. But this connexion is inconsistent with the note in Mt.26.5 that the Sanhedrin gave not to arrest Jesus on the feast-day, which agrees with the clear indications of the Fourth Gospel that all was hurriedly done before the killing of the Passover. The suggestion that our Lord kept the Passover one day earlier than the Jewish authorities, based on an ingenious calculation of the calendar, seems to be inconsistent with His general attitude towards the Law. Moreover, the notion that the Passover was in any sense eaten on this occasion appears to be excluded by Lu.22.15 (see R.V.): “Eagerly I desired to eat this Passover with you before My passion: for I say to you, I will not eat it till it be fulfilled in the kingdom of God.” It has been suggested, therefore, that after making all preparations for the Passover, the Lord and His disciples assembled, not to eat the Paschal Supper, but to observe the qiddush of the Passover. The qiddush is a domestic ceremony performed on the eve of each sabbath or high festival, immediately before supper; it is included in the order of the Agape. On Mt.26.26-30 and Mk.14.22-25 make the breaking of the loaf precede the blessing of the cup. On the other hand, in Lu.22.14-19 (the confusing addition of ver. 20 being omitted, as in R.V. marg.) we find the order of the qiddush exactly followed. This striking divergence from Mark is very significant, and not less so from the order in Lu. 22.14-19. On Mt.26.26-29, Mk.14.12, Lu.22.7, see Box, op. cit. infra.) Equally important is it that in Didaché, the blessing of the cup precedes the breaking of the loaf. This indicates the survival of such a practice in some Syrian churches at the beginning of the 2nd cent. It may be the original order, altered elsewhere at a very early date to that which St. Paul describes. Such a change would illustrate the power of the Church to vary anything that is not essential to the institution. The current practice would account for the order in Mk.—Mt. also. It may be doubted whether any of the narratives were intended to be sufficiently precise in detail to afford materials for argument, but that of Luke seems to be the most consecutive.—II. If the institution of the Eucharist took place at the qiddush, the Agape would probably be ordered after the same fashion, the solemn blessing of the cup and breaking of the loaf being followed by the communal repast. St. Chrysostom (Hom. 54) expressly declares this to have been the case; but he may have been misled by the practice of his own day. St. Augustine (Ep. 118), on the contrary, seems to assume that in the first place there was the blessing of the cup and breaking of the loaf, as was the case according to the indications afforded by N.T. are but slight. 1Cor.11.20-34 is indecisive. The words “after supper” in vs. 25 are puzzling. They imply a considerable interval, occupied by the supper, between the breaking of the loaf and the blessing of the cup; but this agrees ill with Mark, Matthew, and uninterpolated Luke. On the other hand, it agrees with the supposed derivation of the Christian rite from the Paschal Supper, the cup in this case being the fourth cup of the Paschal ritual. But the difficulty of this derivation has been shown. It is possible that the delivery of the cup, previously blessed, was postponed. Apart from this, the whole passage agrees best with the hypothesis that the blessing of the loaf and of the cup came first, and that the fault of the Corinthians was to let indecent haste for the supper break in upon this solemnity. The only other reference to the celebration of the Eucharist until now is the uncontroverted passages—unquestionable—are in Ac.2.12, 16, 20, 7, 11, and possibly 27, 35. In Ac.2.16 it would be
extravagant to build on the order of the words. In 20.11 the order is perhaps more significant. The disciples assembled "for the breaking of a loaf," and St. Paul began the proceedings with Eucharistic discourse; after the mishap at Eutychus, "when he was gone up, and had broken the loaf, and had eaten, and had talked with them a long while, even till dawn, so he departed." The word ἐστραγμένος, used thus absolutely, can only mean "taking food"; and the use of the aorist participles, together with the precision of the whole narrative, which is essentially that of an eyewitness, leaves no room for doubt that the order of proceeding is distinctly marked. Here then, the repast follows the "breaking of the loaf." In Ac. 27.35 the circumstances are too exceptional to supply any argument. Hence, the one clear indication in N.T. points to the Eucharist preceding the Agape. In Didache, 9, 10, we find the same order, nor is there any indication elsewhere of its inversion. [Passover.]—III. We find in N.T. only slight indications of the ritual of the Eucharist: viz. the blessing of the cup, the breaking of the bread, the eating and drinking; possibly the responsive Amen, which accompanied the blessing (1 Cor. 14.16). Mk. 14.24, followed by Mt., also notes the blessing of the loaf. The same elements are mentioned in Didache, 9, 10, 14, and in Ignatius, Eph. 20; Phil. 4; Smyrn. vii. 8, the latter also insisting on the presence of thanksgiving. A thing more precise is found recorded until the time of Justin Martyr. Of the doctrine of the Eucharist there are fuller indications. In 1 Cor. 10.16 St. Paul writes: "The cup which we bless, is it not a communion of the Blood of Christ? The loaf which we break, is it not a communion of the Body of Christ?" The word κοινωνία (communion) needs attention. It contains the idea of common participation, as is shown by what follows immediately. But the use of "communion of the altar" in ver. 18, supported by similar uses in 2 Cor. 1.7 and 1 Pe.5.1, brings in the further idea of individual participation in a common good. Thus the cup and the bread are вместе and the means by which the Body and the Blood of Christ are imparted to individual believers and shared in common by all believers. The participants eat Christ's Body and drink His Blood. Therefore St. Paul says, "Whosoever eats the loaf or drinks the cup of the Lord unworthily will be guilty of an offence against the Body and Blood of the Lord" (1 Cor. 11.7). This eating and drinking are regarded in the two aspects of sacrificial communion and of spiritual sustenance. (1) The idea of sacrificial communion is most in evidence. It is conspicuous in St. Paul's comparison of the Eucharist with the sacrifices of O.T. and of the Gentile religions. The "table of the Lord" is set over against the "table of demons," as exactly parallel. The communion of the Body and Blood of Christ is set over against the communion of the altar in O.T. With the latter parallel should be connected 2 Cor. 13.14: "We have an altar, whereof they have no right to eat which serve the tabernacle." The reference is to those sin-offerings of which, in O.T., offerers were not allowed to partake. [Sacrifice.] The sacrifice of Christ, His immersion upon the cross, corresponds to these sacrifices of the law, as well as to others; but the difference implied, in that we can partake of the Victim. The more obvious correspondence with the Passover is pressed by St. Paul in 1 Cor. 5.7, where the words "let us keep festival... with the unleavened bread of sincerity and truth," though much wider in their application, seem to point to the direct connection to the Eucharist. The predominantly sacrificial character of the Eucharist is further illustrated by the records of the institution. The wording of Lu. 22.15, the sense of which seems to underlie 1 Cor. 5.7, while excluding the direct commemoration of the institution with the Passover, introduces a close ideal commemoration of the Lord's own words. But the actual words of institution are more important, and must be compared as they stand in the records. 1 Cor. 11.24, 25: "This is My Body, which is [being broken] for you. ... This cup is the new covenant in My Blood: this do, as oft as ye drink, in remembrance of Me." Mk. 14.22, 24: "Take ye, this is My Body, ... This is My Blood, the [new] covenant which is being poured out for many." Mt. 26.26-8: "Take, eat, this is My Body, ... This is My Blood of the [new] covenant which is being poured out for many,"—N.B. The words in brackets are doubtful readings. The words "This is My Body" are evidently recorded as used by the Lord Himself. The addition in 1 Cor. 11.24 may equally well be a kind of liturgical exposition, or a record of the Lord's own words. The doubtful addition to ἱκανον is probably a textual transfer from 1 Cor. with the substitution of ἀ δικαίωμα (given) for κλέσιμον (broken). In regard to the cup we have two forms, verbally different, but the same in substance, speaking of the Blood of the Covenant: the phrase recalls Lu. 22.19, 20: "This is My Body ... This cup is the new covenant in My Blood, that which is being poured out for you."—N.B. The words in brackets are doubtful readings. The words "This is My Body" are evidently recorded as used by the Lord Himself. The addition in 1 Cor. 11.24 may equally well be a kind of liturgical exposition, or a record of the Lord's own words. This cup is the new covenant in My Blood, that which is being poured out for you."—N.B.
actual words thus added may be a gloss; but there is no reasonable ground for doubting that such a direction was really given by Jesus Christ. Apart from the doubtful addition following the Pauline text, St. Luke does not give the descriptive words about the cup, recording only the direction "Take this, and divide it among yourselves." The sacrificial meaning of the Eucharist, thus clearly resulting from the records of the institution, is further emphasized by St. Paul's words, "As often as ye eat this loaf and drink the cup ye proclaim the Lord's death until He come." The celebration of this holy mystery is the means, alike for the Christian Church and for the individual believer, of achieving so intimate an association with the death of Christ that a real representation of the one sacrifice may be continually made. The main purpose of sacrifice, communion with God and the removal of the guilt of sin which hinders that communion, is fulfilled for us in this "Sacrament of our Redemption." See further Sacrifice (B); Jesus Christ, X. (1).

(2) The idea of spiritual sustenance is usually connected in N.T. with teaching, or the communion of the Word of life. In one sense it is frequent; but in two places it appears in connexion with the Eucharist. The words of 1Cor.10.4 about the spiritual meat and drink given to Israel in the wilderness stand in evident relation to the subject of the communion of the Body and Blood of Christ. The writer of the Apocalypse discourse in 1Jo.1.6-7 has no direct relation to the Eucharist, but the connexion of thought is unquestionable, and the allusion to the manna and the dependence of the whole on the miracle of the feeding of the 5,000 show that spiritual sustenance is intended. These two passages, therefore, support that conception of the Eucharist which is most common in the devotions of the present day: sustenance is here afforded for the spiritual life of the individual believer. We may pursue St. Paul's comparison with the sacrifices of O.T. and of Gentile religions. In their case, the list of the sacrifices is accompanied by the words "as a means of communion with God, was also a taking of ordinary nutriment;" so the Body and Blood of Christ in the Eucharist, though given primarily for sacrificial communion with God, are given also for the strengthening and refreshing of the souls of the faithful.—Keating, Agape and Eucharist; Box in Jl. Euergetes (benefactor). In the prologue of Ecles., Jesus the son of Sirach mentions this as the surname of the king of the throne of Egypt when he himself came thither. This was probably Ptolemy III. (247-222 B.C.), as the book was perhaps composed c. 180 B.C. Ptolemy VII. (145-117 B.C.) is sometimes given this title, though he is better known as Physcon. Antiochus VII. of Syria (137-128 B.C.) also bore this appellation, and it was occasionally used of officials in Gk. states at an earlier date. Probably our Lord refers to the Ptolemaics and Antiochus when He uses the word (Lu.22.25, R.V. [W.T.S.T.-C.]).

Eunomius II. (tMac.8.8), king of Persians (197-199 B.C.), was son and successor of Attalus I. He sent a fleet to convey the Roman troops from Thrace to Troas during their war with Antiochus the Great, and his forces shared in the conclusive victory of Magnesia (160 B.C.). [Antiochus III.] The flight of Hannibal from Antiochus to the court of Prusias, king of Bithynia, led Eunomius into a war with the latter. Eunomius visited Rome (189 B.C.), and the Senate rewarded his services with the provinces of Mysia, Lydia, Phrygia, Lycceania, part of Ionia, and the Thracian Chersonese.

Eunatan (tEsd.8.44). [ELIAPHTHAN, 2.]

Eunice, mother of Timothy (2Tim.1.5); a Christian and a Jewess (Ac.16.1). [E.R.B.]

Eunuch. The Heb. word clearly implies the incapacity which mutilation involves, and perhaps includes all the classes mentioned in Matt.15.29. Eunuchs were probably treated as a class by the law (Deut.23.1; cf. Lev.22.24) is repugnant to thus treating any Israelite; and Samuel, when describing the arbitrary power of the future king (1Sam.8.15, marg.), mentions "his eunuchs," but does not say that he would make "their sons" such. This, if we compare 2K.20.18, Is.39.7, possibly implies that these persons would be foreigners. It was a barbarous custom of the East thus to treat captives (Herod. iii. 49, vi. 32), not only of tender age, but, it would seem, when past puberty. The word is used, however, in a wider sense of certain officials, e.g. the "officer" Potiphar (Gen.39.1); in the sense of that of the eunuch who was married, and was the "captain of the guard"; and in the Assyrian monuments a eunuch often appears, sometimes armed, and in a warlike capacity, or as a scribe, noting the number of heads and amount of spoil, as receiving the prisoners, and even as officiating in religious ceremonies. The origin of the practice is ascribed to Semiramis, and is no doubt as early, or nearly so, as Eastern despotism itself. In Israel, and latterly in Judah, eunuchs were prominent (2K.8.6, 9.32, 23.11, 25.19; Is.56.3, 4: 2K.29.13, 14: 38.16-16, 52.24). They mostly appear either as "set over the men of war," or associated with the surveillance of the harems of Oriental monarchs. We find the Assyrian Kabsaris, or "chief eunuch" (2K.18.17), employed together with other high officials as ambassador. It is probable that Daniel and his companions were thus treated, in fulfilment of 2K.20.18, Is.39.7; cf. Dan.1.3, 7. The court of Herod had its eunuchs, as had also that of Queen Candace (Ac.8.27). [ETHIOPIAN EUNUCH.]

Eudosia (R.V. correctly Eudodia), a
Euphrates

Christian woman of Philippi between whom and Syntyche differences had arisen (Ph. 4:2).

Euphrates is a Gk. corruption of the Persian name itself derived from the Kolyonian Purattin, which is formed by means of the Semitic feminine suffix from the Sumerian pura (water). In the pre-Semitic Sumerian of Babylonia the river was ordinarily known as the Pura-nun, or “Great Water.” It is most frequently denoted in the Bible by the term “the river.” The Euphrates is the largest, longest, and by far the most important of the rivers of W. Asia. It has two chief sources in the Armenian mountains, one at Domil, 25 miles N.E. of Erzeroum, and little more than a degree from the Black Sea; the other on the N. slope of the range called Aladagh, near the village of Diyadin, and not far from mount Ararat. Both branches, first towards the W. or S.W., passing through the wildest mountain districts of Armenia; they meet at Kebban-Maden, nearly in long. 39° E. from Greenwich, having run respectively 400 and 270 miles. Here the combined stream is 120 yds. wide, rapid, and very deep; it then flows in a straight, uninterrupted course, forcing its way through the ranges of Taurus and Anti-Taurus; seeming as if it would empty itself into the Mediterranean, but prevented from so doing by the longitudinal ranges of Amanus and Lebanon, which here run parallel to the Syrian coast, and at no great distance from each other. At this point turns S.E., and proceeds in this direction for above 1,000 miles to its embouchure in the Persian Gulf. The entire course of the river is calculated at 1,780 miles, and of this distance 1,200 miles is navigable for boats. Its width is greatest 700 or 800 miles from its mouth—i.e. from its junction with the Khabur to the village of Warat. It there averages 400 yards. The accumulation of the Euphrates is caused by the melting of the snows in the Armenian highlands, and occurs in the month of May. The great hydraulic works ascribed to Nebuchadnezzar were chiefly intended to control the inundation. The Euphrates has at all times been one of the longest and most difficult frontier lines between the E. and W. It is first mentioned in Scripture as one of the four rivers of Eden (Gen. 2:14). Its celebrity is therefore sufficiently indicated by the absence of any explanatory phrase, such as accompanies the names of the other streams. We next hear of it in the covenant made with Abraham (Gen. 15:18), where it is given as the whole country from ”the great river, the river Euphrates,” to the river of Egypt is promised to the chosen race. During the reigns of David and Solomon the dominion of Israel actually attained to the full extent of the original promise. This widespread territory was lost upon the disruption of the kingdom under Rehoboam; and no more is heard in Scripture of the Euphrates until the expedition of Nebuchadnezzar to the Babylonians in the reign of Josiah. The river still brings down as much water as of old, but the various water-courses along which it was in former times conveyed are dry; the marshy channel has shrunk; and the water stagnates in unhandsome marshes. Originally the Euphrates fell into the sea without joining the Tigris. The accumulation of silt, however, has caused what was once the head of the Persian Gulf to become land. Loftus estimates that the growth of the delta at the head of the Tigris and Euphrates since the Christian era has been at the rate of a mile in about 70 years. [A.H.S.]

Eupol’emus, “son of John, the son of Accos,” one of the envoys sent to Rome by Judas Maccabaeus, c. 161 B.C. (1Mac.8:17; 2Mac.4:11), and probably identical with the historian Eupolemus, who was almost certainly of Jewish descent.

Eur’oclydon (the reading Eraquilo, adopted in R.V., is to be preferred), the name (Ac.27:14) of the wind which (off the S. coast of Crete) seized the ship in which St. Paul ultimately was wrecked on the coast of Malta. [MELIT.] St. Luke describes it as “typhonic” (τρυφωνέσθαι), indicating that its nature was that of a sudden, violent squall. [WINDS.]

Eutyches, restored to life by St. Paul at Troas (Ac.20:9,10); but the apparent contradiction between vv. 9 and 10 leaves it uncertain whether it was a miracle of healing or of raising from the dead. [E.R.B.]

Evangelist. The word “evangelist” (εὐαγγελιστής) occurs three times in N.T.: in Ac.21:8, without explanation, to describe Philip, who was one of the “seven men of good report” of 6:5; in Eph.4:11 (“He gave some, to be apostles; and some, prophets; and some, evangelists; and some, pastors and teachers”), where it probably refers, like the other two, to one who engages in preaching ministry; and in 2Tim.4:5, where St. Paul bids St. Timothy “do the work of an evangelist.” In each of these passages the word appears to be used as descriptive of work done. The nature of the work may be inferred from the derivation of the word. Evangelist is connected with the verb to “evangelize” (εὐαγγελίσεως), constantly used in N.T. of the first preaching of the Gospel (cf. Ac. 5.42, 8.4, 12, 25, 35, 40, 10.36, 11.20, 13.32, 14.7, 15.1, 21, 15.35, 16.10, 17.18). Reference to these passages suggests that the noun “evangelist” means one who preaches the Gospel where it was hitherto unknown. The word does not occur in N.T. in the sense of a writer of one of the four gospels. Plumptre and Gibson in Smith, D.B. (2nd ed.), i. 1012; Armitage Robinson in Encycl. Bibl. ii. 1430; Massie in Hastings, D.B. ii. 795-797. [B.S.]

Eve (Heb. ‘avvāh; i.e. living) is said to have been formed by God from the rib of Adam while he slept. Some have assigned a figurative meaning to this, and regarded it as intended to point out the infinitely higher and closer relation that exists between man and wife than between any other of God’s creatures. The wife’s nature, originally derived from the man, corresponds to (Heb. is set over-against) his nature, and by her marriage becomes “flesh.” Eve is represented as having incited her husband to violate the laws of his being (Fall), and the pains of childbirth were therefore imposed on her in addition to the labour, sorrow, and death which became the common lot of all. Eve’s death is not recorded. [J.T.L.]

Evi, one of the 5 kings or princes of Midian, slain by the Israelites (Num.31:8; Jos.13:21).
Evidence (Je.32.10-14). [Writing; Witness.]

Evil-mero dach (2K.25.27), the Bab. Axel-Mincaduk, was son and successor of Nebuchadnezzar. In his predecessors' reign (560-550 B.C.), in the opinion of Berosus, he governed "lawlessly and extravagantly." His consideration for Jehoiachin, however, is noteworthy. The Babylonian historian states that he was slain by his sister's husband, Neriglissoor, for whom see Nergal-sharezer. [T.G.P.]

Excommunication. 1. Among the Jews. The principle of excommunication is found in O.T. In the penalty of being cut off from the people denounced against anyone who should be uncircumcised (Gen.17.14); eat unleavened bread when forbidden (Ex.12.15,19); imitate or put to a strange use the holy anointing oil (30.33); or incense (30.38); do any work on the sabbath (in this case associated with death, 31.14); eat of the peace-offerings when unclean (Lev.7.20), or of the fat of an offering (7.23), or of blood (7.27.17.10,14); fail to bring an offering to the tabernacle (17.4,9); commit various moral abominations (18.29); eat any peace-offering on the third day (19.17); give any of his seed to Moloch (20.3,5); commit incest (20.17); have sexual intercourse with a woman at forbidden times (20.18); approach the holy things when unclean (22.3); fail to afflictive on the Day of Atonement (23.29); forbear to keep the Passover (Num.9.10); act unreasonable on atonement day (18.30); perform ceremonial purifications when unclean (19.13,20); and is found also in the exclusion of the lepers from the camp (Lev.13.46; Num.12.14), and in the threat of separation from the congregation of the captivity of those who did not come to Jerusalem in obedience to the proclamation of Ezra (Ezra.10.8). From this principle the Rabbis developed an elaborate system of excommunication, much of which may have existed in the time of our Lord. Exclusion from the synagogue as an exercise of Jewish discipline is mentioned in Jn.9.22,12.46,16.2 (cf. 9.34,35, which seem to refer to excommunication or exclusion from the meeting where the man then was). The Jewish excommunication appears to be referred to in Lk.6.22, "Blessed are ye, when men shall hate you, and when they shall separate you from their company, and reproach you, and cast out your name as evil, for the Son of Man's sake"; and it is possible, though perhaps hardly likely, that three distinct stages in it are alluded to in the words, "separate" (αφορέσασθαι), "reproach" (φανερωθῆναι), and "cast out your name as evil" (ἐξέδοθον τὸ ἐπωννυμίον σου παραδοθῆναι).—11. In the Teaching of Christ. The principle is sanctioned by our Lord in Mt.18.17. "If he be so, receive him not, saying to thee as the Gentile and the publican": and is involved in the gift of the power of binding and loosing to St. Peter in Mt.16.18-19, and to the apostles in general (18.18).—III. In the Apostolic Period. St. Paul frequently alludes to his right to exercise discipline over Christians, as Gal.1.11,12; 2Cor.13.2. Instances of his cutting off offenders from the Church, and describing himself as delivering them to Satan, are in tCor.5.1-5, tTim.1.19,20, the action of the Corinthian church being associated with his own action in tCor.5.1-5. St. Paul orders the infliction of some kind of excommunication of those who cause divisions and occasions of stumbling (Ro.16.17); or rebuke in love (2Th.3.14); or teach a different doctrine (1Tim.6.3); and of a heretic (Tit.3.10). The degree of separation ordered in these cases would probably include exclusion from the Holy Communion, as would St. John's instruction not to receive into a house those who brought not the teaching of Christ (2Jn.10). St. John mentions that the power of excommunication had been wrongly exercised by Diotrephys (3Jn.10). St. Paul's denunciations, "Let him be anathema" (tCor.16.22; Gal.1.6,9), probably do not directly refer to excommunication, but there can be little doubt that excommunication would be involved in the attitude taken by him. There appears to be an instance of restoration after excommunication in 2Cor.2.6-10. It has been suggested that St. Paul may have regarded some actual bodily infliction as following the disciplinary exclusion from Communion, and that this was intended to teach that the flesh should be "Deliver unto Satan for the destruction of the flesh" (tCor.5.5), "Delivered unto Satan, that they may learn not to blaspheme" (tTim.1.20); and that this is parallel to the physical consequences of unworthy Communion referred to in tCor.11.23-30, as explained by some interpreters (e.g., D.B. Meyrick, ed.), i. 1033-1036; Cheyne in Encycl. Bibl. ii. 1431, 1432; Brown in Hastings, D.B. ii. 800, 801; Edersheim, Life and Times of Jesus the Messiah, ii. 183, 184; Greenstone in The Jewish Encyclopedia, v. 285-287; Weissacker, Apostolic Age, ii. 379, 380. [SATAN; HUMANITY; CRIMES IN N.T., 14].

Executioner. Heb. tabbah (gen.37.36 marg.; Dan.2.1), rendered Guard in 30 passages (took in tSam.9.23,24; Arab. tabbakh). Probably Akkad. tab-dhi, or "arranging a host"—a marshal. The Gk. στατουλαρσ (Mk.6.27), c. Lat. spectaculor, meant originally a military spy or scout, but under the emperors a body of soldiers in camp. [C. E. C.]

Exile. [CAPTIVITIES; DISPERSION.]

Exodus, the second of the books of the law, called by the Jews sh'moth ("names"), from the words in ver. 1, and named by the Gk. translators Exodos, from its principal theme—the going-out of the children of Israel from Egypt. After a brief recapitulatory section (1.1-6), it narrates the oppression of Israel: the birth and call of Moses; the conflict with Pharaoh, plagues, and events which led up to the Exodus; the pursuit and deliverance at the Red Sea; the march to Sinai and trials in the wilderness; the forgiving covenant, and long encampment at the mountain; the making and taking of the tabernacle; the breach of the covenant in the making of the golden calf while Moses was in the mount; the restoration, the making, and, finally, the setting up and consecration, of the tabernacle. The book is instinct with dramatic power, and throbs with a consciousness of the living presence and action of God which witnesses to its composition while yet the memory and deep impress of the events it
records were fresh upon the mind. The book may naturally be divided into four parts: (1) The oppression and conflicts with Pharaoh (2.7-11); (2) The Exodus and journey to Sinai (12-18); (3) The lawgiving and covenant (19-24); (4) The tabernacle (25-40), with (in 32-34) the episode of the golden calf, and the renewal of the tabernacle. In 28.29 are directions about the priesthood, which connect with Lev.8.9. The heart of the history is the solemn transaction at Sinai, by which the people formally accepted Jehovah as their God, pledging themselves to obey His laws, and Jehovah took Israel to be His people: but the story of the deliverance which precedes, displaying as it does the attributes of Jehovah in their grandest exercise, is hardly inferior in interest and power. The narrative of the lawgiving is especially important, as embodying one of the great codes of law in Israel's history—the Decalogue, followed by 14.2-18.12, and 15.1-21.28, the first section of the Book of the Covenant (Ex.20-23). The modern critical analysis of the book of Exodus follows, in a documentary respect, the main lines indicated in the article on Genesis. [See also Pentateuch.] The documents J and E, now all but indistinguishably fused together, are ascribed to certain source sections, which were not a part of the tabernacle, and the long series of directions and details of execution relating to the tabernacle (25-31.34-40). Two things are, however, to be observed, distinguishing (on the theory) the use of these documents: (a) as against 31.17-19, 18. (b) In Genesis the P element supplies the framework of the JE narrative; confession (1-11 of the work) and the parts are co-ordinate, and P can no longer be spoken of as "framework." This is a remarkable feature, pointing to distinct circumstances of origin, and favouring the idea that Genesis was an earlier definitely-planned work. The P sections in Exodus, as elsewhere, are generally easily distinguished, and are marked by a certain style and peculiar vocabulary (such a phrase, e.g., as "the selfsame day," 12.17,41). Examples in the earlier part of the book are ch. 6, giving the call and genealogy of Moses, and certain of the narratives of the plagues, as 7.1-13,8.5-7,16-19.9.8-12, with a few other passages. For a full account of the rest of the rest of the narrative belongs to J. The remarks made on this modern critical theory in the articles above noted (Pentateuch; Genesis) apply with undiminished force to Exodus. Distinction between J and E in this book is admittedly all but impossible when the criterion of the disjunctives fails; and it is incredible that the P sections could ever have subsisted as an independent document in separation from the other elements in the history. The attempt to carry through such separation leads to destruction of the narrative. E.g., Pis made to pass abruptly from the increase and prosperity of the Hebrews (1-7) to the bitter bondage in vv. 13,14. Plainly the intervening verses (E) are needed to give the explanation. Again, the language of P in 2.23-25 has its verbal counterpart in 3.7 (J). Yet P is supposed to be later than J. In 6.2 (P) we have the revelation beginning with the words, "And God spake unto Moses," but nothing has yet been said in P of either Moses or Aaron. In the plagues, P records the threatening of frogs (8.1-4), but P narrates the execution of the threat (vv. 5-7). In P Aaron is appointed to be a prophet to Moses, to speak for him (7.1-2), but in none of the P sections does Moses or Aaron ever utter a word. J alone narrates the destruction of the firstborn (12.29,30), which is announced in the Passover law of P (ver. 12). These examples suffice to show that, while different hands (at least styles) may be recognized in different portions, the connexion of the elements throughout is so close that the attempt to part them, and make of each a separate document, must be abandoned. The analysis of the text of Exodus, therefore, cannot be based on this assumption. It is necessary to suppose that the narrative of P is preserved in its original form (e.g., in the document) of which the tabernacle, divided (4) 11); may have been a record of the JE, renewed (2) again in 6.2-8, (P). This is one of the alleged "duplicates" in the narrative of Exodus. The incidents, however, are distinct, and if there is some difficulty in the narrative of the JE, in Egypt—and the P narrative, as noted above, presupposes (in its abrupt mention of Moses and Aaron) what has gone before. A weightier question is as to the meaning of this revelation. Does it imply that "Jehovah" was an absolutely new name of God to Israel? Or does it mean that a change had taken place in the character of Yahweh before to his fathers by His name "El Shaddai," was now to reveal Himself by the greater attributes implied in the name "Jehovah" ("I am that I am")? In view of the context in the earlier passage ("Jehovah, the God of your fathers," 3.15,16), this would seem to be the more reasonable view. There is now a tendency of the critics to recognize that Jehovah was an older name of God. It became, however, from this point, the peculiar name of God in His covenant relation to Israel. This brings us to the disputed question of the connexion of Moses with the composition of the work. If the foregoing reasoning is correct, and the JE and Pentateuch are sound, the presence of priestly laws of the Passover, and of extended descriptions of the tabernacle (attributed by the critics to post-Exilian times), need not militate against our acceptance of an origin of the book in the Mosaic age. Grounds have been brought forward for supposing (1) that theJE, or any legislation and the history connected with it (P) did not, and could not, have their origin in the age after the Exile; (2) that P never could have existed as an independent document; and (3) that the elements of P stand in inseparable relation with those of JE, and must be practically contemporaneous with the latter. The attempt (in particular) to ascribe a post-Exilian date to the laws of the Passover in Exodus must be pronounced a failure. These contemplate a domestic observance of the festival (12.3.40-51; cf. JE. 12.25-28) which would have been quite unsuitable after the law in Deut.16.1-5 came into force. The question of age and authorship must be left, therefore,
on independent grounds. That Moses had a certain connection with the composition of the Pentateuch is attested by the book itself. It is expressly declared in the introduction that "the whole of the Lord" in "the book of the covenant" (Ex. 24:1, 7). This covers 20–23. A second summary of laws is said to have been written by him (31:27). The regulations for the making of the tabernacle and the account of its construction are in the style of, but by (whichever hand set down) Moses is declared to be their author (25:2,9,35:1,4, etc.). In 17:14, Moses is directed to write God's threat against Amalek "for a memorial in a book," or, according to the Heb. pointing, "in the book" (cf. Amer. R.V.). The natural meaning is that there was some existing "book" in which Moses made entries or records (cf. Jos.1:7,8,24:26). It is wholly unlikely that a threat against Amalek would be solemnly recorded in a single sentence, and no account of the hostile action of Amalek which evoked the threat be preserved. The Song of Moses at the Red Sea (Ex.15:1–20) is evidently intended to be regarded as the compilation of Moses' followers. Moses appears to notice other passages of the familiarity of Moses with the art of writing and with books (Num.33:2 ; Deut.31,9,24) and of his composition of songs and blessings (Deut.31,22,30,33:1). It is a misreading of these particular notices to regard them as excluding other writings; they rather indicate the perception that such writing was customary. A final editing of the Mosaic and other material of this (Mosaic) period need not be assumed till after Moses' death—a supposition which fully accounts for any dislocations, hiatuses, or explanatory notes or allusions to later events which may be thought to be observed. There is, however, little in the book which really points to times later than Moses. Ex.16:35, on the cessation of the manna, may be such a passage, though it actually does not carry us farther than "the borders of the land of Canaan." No weight need be attached to the fact that Moses is spoken of in the third person in the encomium on Moses as in 11:3 (cf. Num.12:3), which may be thought unsuitable from Moses' own pen, is readily explicable if indirect authorship and later editing are allowed (cf. Deut. 34:10–12). The historicity of the book of Exodus has been assailed by Celenso and others on the grounds of its internal incredibilities and contradictions. Objection is taken to the rapid increase of the children of Israel in Egypt, the impossibility of the Exodus of so vast a multitude of people (about 2,000,000) out of Egypt on such short notice, the miracle of the Red Sea, the difficulty of the support of such numbers in the wilderness, the construction of so elaborate a tabernacle, etc. The wonder of the facts is not denied, and it is granted that, without mighty divine interpositions at the Exodus, the Red Sea, and in the wilderness, the narrative is not intelligible. But these very facts are among the best-attested in Israel's history, the most deeply engrained in Israel's consciousness, and lie at the very foundations of its national existence. The increase of Israel is remarkable, but not incredible in a period of 130 years (Ex.12:60,61). If it be remembered that the patriarchal families at the time of the descent were really considerable households (cf. Gen.14,14,28,13,14,32,4,5,10, etc.). On the other hand, the objectors ignore the immense body of evidence in favor of the historicity of the book derivable from its conformity to Egyptian conditions, habits, and customs, and its exact knowledge of the Sinoitic peninsula. The writer, whoever he was, shows a notable acquaintance with the customs, climate, and productions of Egypt; an acquaintance such as to imply long residence in the country, and the sort of familiarity which it takes years to acquire, with the natural phenomena, the method of cultivation, the religious ideas, and other habits and usages of the people" (G. Rawlinson). "The chapters of Exodus which belong either to the early sojourn of Moses or the wanderings of the Israelites, are pervaded by a peculiar tone, a local colouring, an atmosphere (so to speak) of the desert, which has made itself felt by all those who have explored the country, to whatever school of religious thought they may have belonged" (Canon Cook). The departure of the Israelites from Egypt is of historical importance that we might expect to find some allusion to it in profane history, or in contemporary Egyptian records; but, beyond the late, confused statements of the priest Manetho on the expulsion of the lepers, nothing of this kind has as yet been discovered. The Exodus is undoubtedly connected with the conquest of the Israelites, the names of the store-cities, Ex.1:11) to have taken place in the reign of one of the immediate successors of Ramses II, of the 18th dynasty (c. 1250 B.C.) but the discovery of a stela of Nenophath, the son of Ramses, in which "Israel" (for the first time mentioned) is apparently spoken of as already in or about Palestine, has inclined many to carry back its date to the 18th dynasty. The point awaits further determination. [Exodus, The; Red Sea, Passage Of.] See Pentateuch; art. "Exodus" in Hastings D.B. (vol. i. 1868); Exodus in Speaker's and Pulpit Com. ; Hengstenberg, Egypt, History and Literature; Allen, Egypt and Palestine; Naville, Store-city of Pithom and Route of the Exodus; Orr, art. on the Exodus in Expositor, April 1867. [10.] Exodus, The. 1. Date. There is considerable divergence of opinion as to the date, and even as to the dynasty during which the Exodus took place: and, as there is no monumental chronology in Egypt, the only guides are the O.T. and the extracts from the writings of Manetho given by Josephus. If we may accept 2017 B.C. as the date of Abraham's expedition against Amraphel, and deduct 422 years for the time intervening, we shall have 1595 B.C. as the date of the Exodus. Cf. Chronology for a different suggestion.—History. The history of the Exodus itself commences with the close of the ten plagues, in the night on which the firstborn were slain. Pharaoh then urged the departure of the Israelites, and they at once set off from Rameses towards the south on the 15th day of the 1st month. They made three journeys, and arrived at Etham, in the edge of the wilderness, not very far from the head of the Red Sea, which in those days appears to have stretched up N. of Suez as far as the Bitter
Lakes. Here Pharaoh overtook them, and the miracle occurred by which they were enabled to escape from their pursuer, whilst all the host of Pharaoh were destroyed in the Sea of Reeds. The Israelites were dwelling at the time of their departure from Egypt, and started from the town or district of Rameses; Pithom and Raameses being two store cities which the Israelites had built under Pharaoh the Oppressor. The land of Goshen must have been on the eastern confines of the Egyptian frontier, on the line of defence which probably ran from the Mediterranean to the Red Sea, nearly on the line of the present Suez Canal. It may be supposed that Goshen, to the N. of the Bitter Lakes, extended some miles beyond the frontier to the edge of the desert, as there are indications that hereabouts many square miles of fertile plain have been swallowed up, during the last 3,000 years, by the billows of shifting sands, blown southwardly from the Nile deposits on the shore of the bay of Pelusium. From whatever point the Children of Israel may have started, their line of advance must have been nearly due E., throughout the deserts which, down to the Red Sea, is the old sweet-water canal to about the position where Ismailla now stands: here, no doubt was Etham, on the edge of the wilderness. The preceding station, Succoth, which Prof. Navile identifies with Prenom, has been found by him at Tell el-Maskhuta, in the Wady Tumilat, on the line of communication between Etham and Goshen, along the sea-shore by Ali-Arish and Gaza; and (2) the way of Shur, leading due E. from Goshen, and thence into the S. country towards Beer-sheba. In either of these cases the distance across the desert, as the crow flies, would not at that time have been more than 30 miles and the distance or preparations and depots of water and provisions at intervals along the route, the distance could have been accomplished in ten journeys of 6 miles each in time of peace. But if the Philistines and other inhabitants of S. Palestine were hostile, it would entail the necessity of the fighting force going first, and proving their superiority, whilst women and children and cattle were left behind on the confines of Egypt. It is evident that the desert route into Palestine, if the inhabitants were not friendly, would only be practicable when covered by an army of warlike men, experienced warriors, and a description of the desert will show that the thorough的理解 by the Israelites, under the guidance of the Almighty, was the only practicable one, if the people were to have time to organize themselves for warlike operations. The desert of Arabia Petraea at the present day extends about 150 miles from E. to W., and from the Suez Canal to the limits of modern Palestine, and, for the sake of description, may be divided into four sections, whose aspects are very dissimilar. (1) The neghebb, or S. Country, in Koman times called Idumea, extending some 60 miles S.W. of Gerar and Beer-sheba, to the river of Egypt, whose going out is at Al 'Arish. This is the desert of modern times, and in recent times owing to a feeble government and the lawlessness of the Bedawin. At the time of the Exodus it possessed towns and villages, and a settled population; even to the present day are to be seen the remains of the vineyards and wine-presses, watch-towers and reservoirs and cisterns, and the country is fairly supplied with water, through which the Israelites could have journeyed without diffi-
EXODUS, THE

EXODUS, THE

culty if the inhabitants had been friendly. At the eastern end of the S. Country was Kadesh, and it was inhabited by Amorites, Canaanites, etc. (2) The region of shifting sands, stretching along the coast from the river Nile to the Red Sea, and through the Egyptian Delta, and ever moving southward year by year, only checked in its southward course by the mountain ranges some fifty miles inland, the northern features of which, at the present day, are filled up with sand. These sand-drifts are due to deposits from the river Nile on the shores of the Fay of Pelusium, and they are ever moving backwards and forwards, according to the lie of the wind. These drifts have accumulated in waves and billows from 40 to 50 ft. in height, and at Galiteh, N.E. of Ismailia, there are thousands of palm-trees in the desert which, rooted in good soil, are sometimes engulfed in sand-drifts and again exposed to view. In this ever-moving desert there are wells, as that at Mahadah, 30 miles from Ismailia, where the Bedawin keep a clear space down to the water by ever moving the sand across from the windward to the leeward side of the well. These sand-drifts appear to increase year by year, and it is probable that 3,500 years ago much of the ground, now encroached upon about Ismailia, was then part of the land of Goshen. Yet in these days it is probable that these sand-drifts were in existence to the N. and E. of the Bitter Lakes, and would have presented an almost insurmountable obstacle to the journey of women and children, in haste, without due preparation, and without a sufficient number of beasts of burden and wagons to carry them. (3) The desert of the Tih ("Wanderings") which stretches from the frontier of Egypt to 'Aqaba, and contains the wilderness of Paran. It is a plateau gradually shelving up from the southern shore of the Mediterranean, and extending some 150 miles to the S., where it reaches a height of 4,000 ft. above the level of the sea, and ends abruptly in a great wall of rock, Jebel el-Tih, jutting into the peninsula of Sinai. The slopes are covered by the S. many hundreds of feet in height. At its northern end for about 50 miles it is covered by the shifting drift-sands above mentioned. It is formed of nearly horizontal layers of limestone, with here and there a fault, when sandstone is visible; and in the centre it is broken up by mountain-ranges. It is for the most part a desert, where soil and vegetation are very sparse. In parts the ground is hard and white, without traces of vegetation for stretches of 8 to 10 miles, with here and there a sel, or water-course, with scanty vegetation, and for two months in the year a little water. After heavy rains, which sometimes occur in Jan. and Feb., the soils are full of water for a few hours, and then the pasture springs up in and about the water-courses. During Nov., Dec., and March there are mists and heavy dews, which give sufficient moisture to the flax of the Bedawin, but in summer-time the animals suffer great privations, having to be fed in one locality and taken to water at another spot, sometimes 15 miles distant, twice a week. The goats at times are fed on the stones of dates boiled soft. There are corn-lands in some parts of the desert bordering on the Red Sea, on the flat tops of the mountains where the mists from the sea-breezes deposit sufficient moisture to loosen the soil, and it is probable that the wanderings of the Israelites took place in any part of this desert, except on the western edge, when they first escaped from Egypt, and on the S.E. side when they went through Paran to Kadesh. (4) The Peninsula of Sinai. This is the portion of the desert which appears to have been appropriated to the use of the Israelites during their wanderings, and though a wilderness, it was not so essentially a desert as the other portions of Arabia Petraea just described. It forms the southern portion of that triangular tract of land lying between the northern horns of the Red Sea, the gulls of 'Aqaba and Suez. The northern portion of this tract is occupied by the table-land of the Tih just described, standing up as a great wall 1,500 ft. in height above the sandy plain which separates it from the Sinai Peninsula. The great rocks which form the fragments of the peninsula have been subjected to a height of above 3,000 ft. above the sea, and are almost denuded of the marl and limestone which used to cover them, and the rugged heights and steep cliffs thus exposed are formed of granite, porphyry, and schist. In many of the deep valleys intersecting the peninsula there have been deposits of copper, but none of these, it is said, have been wholly cleared out, and where this is the case the rainfall can penetrate no farther, and is carried down along the valleys into the sea on the surface of the marl, causing a succession of verdant glades. In those parts where the denudation has been completed, the valleys are arid and wanting in fertility. As instances of fertile valleys may be mentioned Ghurindel, Hebrân, Feirân, and Taiybeh. The rainfall in the Sinai Peninsula has, of late years, been less than in the Tih, due probably to the destruction of timber, owing to a tribute of charcoal having been imposed on the Bedawin (cf. Deut. vii. 25, 26), and the year 1823. There is abundant evidence that the Sinai Peninsula was once comparatively well-watered and fertile, and there are still the remains in the valleys of cultivated lands, corn-granaries, and water-houses. The principal trees were the palm and the acacia (Shittim wood, Ex 25 5 to 28 15, 27 1); and there are still many kinds of bushes, such as wild thorn, willow, fennel, tamarisk, retum, myrrh, and caper. At the present day every Bedawi family has its portion of date-trees and corn-lands, situated sometimes in the desert itself and sometimes in some spot adjacent. There are at present no cattle, but flocks of sheep and goats, many camels, and a few horses, the latter belonging to a tribe called the So'wârîkh.—From The Crossing of the Red Sea to Sinai. The Israelites, on escaping from Pharaoh's host, turned to the S., into the wilderness of Shur (Ethan) and travelled for three days without finding water to drink, and when they came to Marah the waters were bitter, and the people murmured against Moses. These waters have not yet been identified, although
EXODUS, THE

suggestions have been made that Moses' Wells, near Suez, or 'Ain Hawâra, on the Red Sea, represent Marah: these springs, however, are respectively about 40 and 50 miles from the scene of the crossing of the Red Sea, and the nearest of them is much farther than the Israelites can have travelled in three days. We know that the Israelites arrived at Sinai in the third month (i.e. in about two months), and they arrived at the desert of Sin (which is generally allowed to be the plain of el-Markhâ) in one month, and from these data we can assume that the Israelites travelled 140 miles in the first month and 70 miles in the second month, so that at the utmost they did not average more than 5 miles a day. At this rate of progress the bitter waters of Marah would be in the desert somewhat E. of the Little Bitter Lake, and the next halting-place, Elim, would be at Moses' Wells. We can imagine that E. of Suez, here were twelve wells of water and 70 palm-trees. At the present day there are, at Moses' Wells, about seven wells, and several palm-trees and some irrigated ground; in the vicinity of these wells there is much water, as is evident by the hundreds of camel-loads of water which are continually brought by the wells from Suez for the use of the town from the well of Nâba el-Ghûrûqdeh. From Elim (Moses' Wells) they journeyed under Jebel Râbah across wâdies Südr, 'Amâréh, and Ghûrûndel, where there is water, and halted by the Red Sea, opposite to a point where the plateau of the Sinai Plateau and the plain of Sinai commences. Here they turned into the wilderness of Sin (el-Markhâ), where the Israelites again murmured against Moses and Aaron, longing for the flesh-pots of Egypt. It was here that the daily issue of manna commenced. They now turned inland towards Sinai, halting at Dophkah and Alush, and arrived at Rephidim, probably in the Wâdy Feirân (Paran), and there was no water for the people to drink. It has been suggested that Amalek stood between the Israelites and the waters of Feirân, which they wished to preserve for their own use. Here it was that Moses smote the rock, and the Israelites, after the defeat of the Amalekites, built an altar to the Lord. The next halt was in the wilderness of Sinai before the mount, in the third month after they had gone forth out of Egypt, about two lunar months after their departure. During this journey Jethro, priest of Midian, presented himself to his son-in-law Moses, and gave him the advice which led to his organizing the children of Israel into companies, with rulers over tens and fifties and hundreds and thousands. The people now commenced their training in the "simple life" which was eventually to fit them, as a nation under arms, to issue from the desert as the conquerors of the Promised Land.—Horeb and Sinai. These names appear to be used interchangeably in the Bible, but most authorities now consider that Horeb was the name of the district of Sinai, and that Sinai was the name of the mountain itself (Ex. 33.6—34.2). It has been pointed out by Sir W. M. Flinders Petrie (p. 29), that the difference depends rather upon a distinction of usage than of place. In Ex.,

Lev., Num., and Judg., Sinai is always and exclusively used for the scene of the giving of the Law, Horeb being only used twice for the scene of the burning bush, and of the striking of the rock. In Deut. Horeb is substituted for Sinai for that scene. Most of the Psalms and Historical Books the two names are used indifferently for the mountain of the Law.—Position of Mount Sinai. Some travelers, without success, have sought for the mountain of the Law in the land of Midian, E. of the gulf of 'Aqaba, whilst others have proposed Jebel Serbâl, S. of the Wâdî Feirân. The Ordinance Survey of the Sinai Peninsula, with its careful observations, has set this question at rest by showing that Jebel Serbâl possesses none of the requirements of the Bible narrative, whilst, on the other hand, the traditional site, Musâ-Sufsafeh, answers all the requirements. Musâ-Sufsafeh, situated in the centre of the peninsula, is a rock of granite some 2 miles from N.W. to S.E., and about 1 mile wide, its elevation being about 6,000 to 7,000 ft. above the sea. On the S. Jebel Musâ rises to over 7,300 ft., and on the N. Râs Sufsafeh rises to 6,900 feet, the intervening space being filled with steep cliffs and deep indentations. N. of the Râs Sufsafeh, and sloping uniformly down to the very foot of the steep cliff, which forms its base, is a plain occupying about a square mile of standing ground, directly facing the front of the mountain, and this plain extends to N.E. and N.W. through the wâdies esh-Sheikh and Jirâb, which cut deeply through the mountain. The Râs Sufsafeh thus overlooks a plain where the Israelites could assemble in their multitudes, and fulfill the conditions required by the narrative. They could stand at the "nether part of the mountain" and yet "remove and stand afar off," and at the same time hear the voice of the Lord when He spake "out of the midst of the fire" and answered Moses "by a voice." They could draw near and "touch" the precipitous cliffs, and, standing under them, could see the summit. The peak is so well defined that it could be easily distinguished as the "top of the mountain" by the Israelites in their camp below. Moreover, this mass of granite is so far isolated that it could be set apart by prescribing bounds beyond which no man or animal was to pass, and it was a mountain out of which a brook descends, and in the vicinity of which there was a good supply of water and pasture. Within a radius of 6 miles there is sufficient space for the encampment of the Israelites and a better supply of water and pasture than in any other portion of the peninsula.—From Sinai to Kadesh-barnea. On the 20th day of the 2nd month of the 2nd year, the Israelites left the wilderness of Sinai on their way to the Promised Land, passing through the wilderness of Paran. They encamped upon Kadesh-barnea, "through all that great and terrible wilderness" by way of the mountain of the Amorites (Deut. 1.19); through Taberah (Num. 11.3; Deut. 9.22), Kibroth-hattaavah (Num. 11.34, 33.16) and Hazereth (Num. 11.35, 33.17). From Kadesh-barnea the spies were sent out to Canaan, to ascertain the warlike powers of the
people and the condition of the land. After forty days they returned, with a good report of the land, but with an alarming account of the strength of the inhabitants, so that the whole congregation of the Israelites murmured against Aaron and Moses, and even proposed to elect another captain and return under his guidance to servitude in Egypt. In consequence of this they were sentenced "to wander in the wilderness forty years," and were commanded to get into the wilderness at once by way of the Red Sea. But now another spirit of rebellion seized the Israelites, and they determined to go up and fight the Amorites, in spite of all the warnings of Moses; and they were driven back and chased as far as Hormah, by the Amalekites, Canaanites, and Amorites; and after that they "abode in Kadesh many days" (Deut. 1.46).—The Years of Penal Servitude in the Wilderness. 44. There is an account blank in the history of the Israelites during the next 37 years until they are stated to have arrived in Kadesh, in the wilderness of Zin, where Miriam died (Num. 20). Even the position of Kadesh is unknown, but we have the following indications. It was in the wilderness of Zin, on the boundary of Canaan between Judah, to the W. of Edom, and eleven days' march from Horeb by way of mount Hor. It was on the route followed by Chedorlaomer from El-paraen to En-gedi (Gen. 14.7; Num. 20. 14, 22, 34.4; Deut. 1.2, 32.51; Jos. 10.41, 14.6). From this we may gather that it was not many miles N. of the S. boundary of the gulf of 'Aqaba, and not many miles W. of the Arabah (the depression connecting the gulf of 'Aqaba with the Dead Sea). It seems probable that Kadesh or Kedesh was a district as well as a town, but the accounts in Num. and Deut. are so difficult to synchronize, with our imperfect knowledge of the country, that it is impossible to arrive at any approximate idea of the locality of the wanderings during the 37 blank pages of history. (See Kadesh, and Kedesh, 1, for the two views.)—From Kadesh-burnea to the Plains of Moab. In considering this route we are again hindered by the imperfect knowledge of the incidents of the journey. It will be seen in the two accounts given in Num. 33. 30, 31 and Deut. 10. 6, 7 that there are certain stations mentioned which have a similarity of name: (1) Mosebroth, Mosera, (2) Bene-jaakan, Beeroth of the children of Jaakan, (3) Horhagidgad, Gudelah, (4) Jbathath, Jothath. Attempts have been made to locate these places at various points in the Sinai Peninsula, but, without any satisfactory results. The information at the present time is wholly insufficient to enable us to attempt any localization of the places mentioned in the itinerary, with a few exceptions. Mount Hor is by general agreement assumed to be Jebel Nebi Harun, near Petra, agreeing with the tradition handed down by Josephus from early times (4 Ant. iv. 7). From mount Hor the Israelites travelled to Elath and Ezion-geber (Deut. 2.8) near the head of the gulf of 'Aqaba, and then they must have turned up Wady Ithin, by the 'Aqaba or ascent, to the plateau, following the old caravan route and present Haj route from Cairo to Mecca. This they followed until they struck the old caravan and modern Haj route from Mecca to Damascus, and, skirting the eastern border of Edom, they arrived in Moab. The brook Zered is probably the Wady el-Alsi (Sei Garāhī) running into the southern end of the Dead Sea. From this point to the Plains of Moab the only stations which can be fixed with certainty are Dibon Gad (Dibbân), mount Abarim (near Zerqa Māʿāin), Ysghah (Rās Sāghāh) W. of Jebel Nebāh, and the plains of Moab (Ghor es-Seisbān).—Exorcist. The belief in a power possessed by some to drive out devils is naturally co-existent with a belief in Demonical Possession. For if one accepts the theory that the Powers of Evil may inhabit the human body, it naturally follows (since God is stronger than evil) that there must be a counteracting Power. Hence in N.T. we find exorcism in constant use. Our blessed Lord constantly "cast out spirits" (see, e.g., Mk. 5.22ff.), and this He naturally did by virtue of His own authority, simply saying, "Come out of him," or, "I charge thee come out and enter no more into him." This authority He delegated to the Twelve (Lk. 10.17) and to the Seventy (Lk. 10.17), and (if we accept the last verses of St. Mark as genuine) it was to remain with the Church as a more or less permanent mark of her divine commission (Mk. 16.17). St. Paul exercised the same power (Ac. 16.18), and there is no doubt that in later centuries, nor (according to many) has it ever been lost to the Church. It must be borne in mind that exorcism was no new thing when practised by our Lord. Mt. 12.27 seems to suggest a regular practice of the art amongst the Jews, while Ac. 19.13 shows that some at least pretended to it. Josephus (Ant.) gives some wonderful fables on the subject. Origen, Justin Martyr, and Tertullian all speak of Jews who claimed the power of exorcizing devils in the name of God. [E.J.]

Expectation, Messiahian, of Jews. [Messianic Expectation.]

Exposition. [Sacrifice; Atone ment.]

Ezer (1 Chr. 1.38), properly Ezra, i. e. R.V. Ezebi, father of Naarai (1 Chr. 11.37).

Ezron — 1. Son of Gad, and founder of one of the Gadite families (Gen. 46.19; = Ozni, Num. 26.16).—2. Son of Caleb, the son of Benjamin, according to 1 Chr. 7.7. — Ezekias.—1. (1 Esd. 9.14) = Jahaziah. — 2. (2 Esd. 7.40) = king Hezekiah. — Ezechi (1 Esd. 9.14) = Hilkiah. — Zeekias (Eccles. 48.12, 22, 49.4; = 2 Mac. 15. 22; Mt. 1:9, 10) = king Hezekiah. — Ezekiel. Ezekiel, the third, according to another reckoning the second, of the great prophets, and, like Jeremiah and Zechariah, of priestly descent, dates his several prophecies almost without exception from the year of his deportation (586-571 B.C.). He prophesied amongst the exiles at Tel Abib (3.15), by the river Chebar in Babylon (1.3-17), possessed a house of his own (3.24, 8.1), and till 580 had a wife (2.4, 15 ff.). Though those of his nation only valued him for his artistic power and are often called "a house
of rebelliousness,” they freely resort to it (33.30f., 37.1), especially the elders (8.1, 14.1, 20.1). On account of 3.14f., 26.4f., 27.24f., 33.22, Klostermann held him to be catalectic; yet this condition was imposed upon him (3.24f., 34.25f.) on account of Israel’s rebelliousness (3.26). The “thirtieth year” of 1:1 can scarcely be understood of an era of Nabopolassar, and must be reckoned as that of the prophet’s age. If so, he was carried away young, and before he had exercised his priestly office in Jerusalem (so Josephus). If he were old enough to have had instruction in the law and in priestly service, the particulars exhibited in 40–48 are sufficiently explained. Legend makes him the teacher of Pythagoras and the servant, or son, of Jeremiah of whose prophecies his are often closely related (cf. Ezk 34 with Je.23 f. f.; Ezk 23 with Je.3.6 f.); Ezk. 18.2 with Je.31.29, and the similar connexion between Amos and Hosea, Isaiah and Micah, Haggai and Zechariah, Elijah and Elisha), and finally a martyr and gives him burial in the grave of Sham and Arphaxad. His book contains two principal parts, corresponding to his double mission to terrify the careless sinner and to convey to his hearers a consolation (Micah). Possibly this is what Josephus means when he says that “he left in writing two books.” The fall of Jerusalem (Ezk 33.21) forms the turning-point. The first part embraces prophecies against Israel (1–24) and in chronological order (1.1, 3.16.8, 20.1, 24.1), and against seven nations—Moab, Ammon, Edom, Philistia, Tyre, Sidon, Egypt (in geographical order, the supplement (29.17ff.) being joined to Egypt. Upon his calling to the prophetical office (1–3) there follows threatening of punishment for idolatry and unrighteousness, and for failures in ceremonial and religious duties, in three subordinate divisions (3ff., 8ff., 20ff.), culminating in ch. 24. Part 2, which has as its subject Israel’s future, sets forth the principle, conditions, and historical course of Israel’s restoration and subsequent developments (34ff.), and the outward characteristics of this future—temple, people, laws (40ff.); the great as well as the small events of the prophetic career of Ezekiel; that is, the details, are plain and homogeneous, the thoughts of the earlier prophecies pervading the later, that it stands out as a unity and its authenticity is generally admitted. Its relegation to the Persian or Greek era by Zunz and Seinecke respectively has not met with any acceptance. Since Ezekiel could only reach a small part of his people, the scope of his genius was even more cramped than that of his predecessors. It is the custom nowadays to belittle the literary significance of the book and to characterize the author as a fantastic dreamer without real intuition. But no prophet has so felicitously a command of allegory, symbol, comparison, parables, proverb, and lyric, and Schiller pays a warm and unprejudiced tribute to the poetic genius of Ezekiel. Herder called this prophet “the Aeschylus and Shakespeare of the Hebrews.” Ezekiel’s frequent symbolic actions were not wholly carried out, but were ideal. His glowing appeals as regards mere literary embellishment, are as magnificent as his conception of God, and of this the opening vision gives us a good example. Above all, his subject-matter is many-sided and imposing. According to Wellhausen, he initiated the tendency towards the priestly codification of the laws, and by not a few he is held to be the creator or editor of the law of holiness (Lev. 17–26). We believe this to be quite impossible. He presupposes both, understood these laws in their deep symbolism, and brought their historical evolution, as far as possible, to its culmination and final result (40ff.). The fountain of waters rising in the temple (Ezk.47 ff.) shows the concluding chapters (40ff.), on the one hand, to be no literal programme of reconstruction, while, on the other, the very detailed measurements forbid our treating it as mere allegory. An actual change in the state of affairs has been brought about by Jehovah. Similarly, the greater size and stricter measure of the temple, as compared with the one destroyed, is intended to symbolize God’s holiness. Sound exegesis keeps the middle path between the extremes of a false spiritualism and of an imaginative realism. As was natural to a priest, he makes use of the imagery of Law and Temple which lay to his hand, but as a prophet he bends it freely to his own purposes (see his treatment of Amos). Are the Critics Right? pp. 114–141.) His priestly descent also shows itself in his idea of the Messiah, who is for him not only king (34.11ff., 37.22, 24ff.) but high-priest, as in Jeremiah and Zechariah (see 21.25f., where both the high-priestly diadem and the kingly crown are for the Messiah). Ezekiel’s high priestly idea acts as the high-priestly intercessor for “all the people”; and see further the present writer’s ‘Messianische Erwartung der vorexilischen Propheten’, pp. 334 ff.). Ezekiel, though not first in this field, is important also for his extension of eschatological ideas (38.17, 39.8; cf. Rev. 20.8). But avoiding mere apocalyptic fantasy on the one hand, and the dry bones of ceremonialism on the other, he enforces his conceptions with the deepest thoughts of practical religion—e.g. the religious value he sets upon the individual, which, in accordance with his anxious mission to the exiles, he emphasizes in the highest degree in ch. 33, his universalism, which includes the nations not only in judgment (25–32), but also in salvation (5.3, 16.46ff.; 17.23, 34.26); and his conception of God, which unites the greatest love with the greatest holiness and the loftiest sublimity. For the love, especially cf. 11.19f., 35.26ff., 39.29; for the majesty, consider the opening vision, the frequent opposition of “the Lord Jehovah” to “the Son of Man,” and the fact that over fifty times it is given as the design of the whole divine plan and operation that the nations as well as Israel should recognize both in judgment and in promise that He is Jehovah. The text is frequently corrupt or obscure. Because some of his opinions were considered inconsistent with the Law, the Jews debated whether Ezekiel should be read in the public services of the synagogue; it was, however, finally decided in favour of such reading. But on account of the abstruseness of his ideas and the final value of his study of these (as of the first chapters of Genesis) was prohibited to any one of less than 30 years of age. Express quotation before N.T. times
EZEL, THE STONE

is found only in Eclesius 49:16, which refers to Ezk.1,13.11,38.9,16.22. The concluding vision has had a special influence upon the Apocalypse of St. John. Zinz, Gottesdienstliche Forträge, Seimecke, Geschichte Israels; Commentaries of Keil, Hävernick, Hengstenberg, Von Orelli, Smend, Alfr, Kraetzschmar; Klostermann in Studien und Kritiken (1877); Redpath, Ezk in Westminster Comm. (1907). For a discussion of the style of Ezkel, see Spencer in Lex Mosaicarum, s. v. [W. M.]

EZEL, The stone (1Sam.20.19). “The stone of departure,” perhaps the Levitical boundary stone at Gibeah. The LXX. reads “this Ergab” (or “stone-heap”). [C. R. C.]

EZEM (1Chron.4:29). [Azem.]

EZERIAS (1Esd.8:1) = Azariah, 7.

EZIAS. [Azel.]

Ezion-ga-ber, or Ezion-geber (Num.33.35; Deut.2.8; 1Kings.9.26,22.43: 2Chron.8.39, 29,30), the last station named for the encampment of the Israelites before the wilderness of Zin. It was “beside” Elath, apparently on the shore. The name has been supposed to be preserved at ‘Ain Ghudin, 10 miles up the Arabah Valley, but this is doubtful. [C. R. C.]

EZNEITE. The. According to 2Sam.23.8, “Adineth the Eznite was the Hachmonite, that sat in the seat.” In 1Chron.11.11 we read instead “Jashobeam an Hachmonite.” The R. V. in the first passage reads “Josheb-basshebeth a Tachmonite.” [C.R.C.]

Ezra (a shortened form of Azariah).—1. The head of one of the 22 courses of priests from Babylon to Jerusalem took just four months. They brought with them a large free-will offering of gold and silver, and silver vessels. Ezra’s design was to effect a religious reformation among the Palestine Jews, and to restore the observation of the law of Moses, from which they had grievously declined, and to which he was sincerely devoted. His first step was to enforce separation from their wives upon all who had made heathen marriages, as many priests and Levites (as well as other Israelites) had done. This was effected in little more than six months after his arrival at Jerusalem. With the detailed account of this important transaction Ezra’s autobiography ends abruptly. Perhaps his plans had expired; at any rate, we hear nothing more of him till 33 years afterwards, in the 20th of Artaxerxes, we find him again at Jerusalem with Nehemiah “the Tirshatha.” The functions he executed under Nehemiah were mainly of a priestly character. As he is not mentioned after
Nehemiah's departure for Babylon in the 32nd year of Artaxerxes, and as everything fell into confusion during Nehemiah's absence (Ne.13), Ezra may have died or returned to Babylon before the presence of Cyrus. (2 Eza.1:2). Josiah's death, known to him, was held by the Jews: (1) The institution of the Great Synagogue. (2) The settling the canon of Scripture, and restoring, correcting, and editing the whole sacred volume. (3) The introduction of the Aramaic character instead of the old Hebrew. (4) The authorship of the books of Chronicles, Ezra, Nehemiah, and (some add) Esther; and even Ezekiel, Daniel, and the twelve prophets. (5) The establishment of synagogues.

Ezra, Book of. The book of Ezra is manifestly a continuation of the books of Chronicles, which it overlaps. Like them, it contains much of other books, which were afterwards strung together, and either abridged or added to (as the case required) by a later hand. That later hand, in the book of Ezra, was possibly Ezra's own, for the four last chapters are his. The first part of the book (ch. 1-6) gives us the decree of Cyrus the Great (longimannus) from the head of the people, the re-laying of the foundation of the temple, the opposition which caused a nine-years' delay, the subsequent removal of the difficulties, the completion of the work under the encouragement of the prophets Haggai and Zechariah, and the inauguration of the temple services. The second part of the book (ch. 7-10) brings Ezra on the scene, 57 years later, armed with a firman from Artaxerxes, which authorized him to administer justice and to further the religious interests of the people. He found many shameful abuses, but he faced them in a spirit of prayer (ch. 9) and courage (ch. 10). His dealings with them are of the highest importance, and the per. of it is in Aramaic, i.e. from 4.8 to 6.18, and also the decree of Artaxerxes (7.12-26). Cf. the case of Daniel. The Heb. language was evidently dying out, and a neo-Heb., such as we read of in N.T., was beginning to take its place. The chief portion of the last chapter of 2 Chr., and Ezr.1 may have been written by Daniel. Daniel records none of the great events of the first year of Cyrus (to which allusion is made in Dan.1.21). But Ezr.1, if placed between Dan.9 and 10, exactly fills up the gap, and records the decree in which Daniel was so deeply interested. Moreover, the manner of the record is exactly Daniel's. The giving the text of the decree, Ezr.1.2-4 (cf. Dan.4.1-3), the mention of the name of "Mithredath the treasurer," ver. 8 (cf. Dan.1.3.11), the allusion to the sacred vessels placed by Nebuchadnezzar in the house of his god, ver. 7 (cf. Dan.1.2), the giving the Aramaic name of Zerubbabel, Ezr.1 (cf. Dan.1.7), and the whole locus standi of the book, points to Daniel as the writer of Ezr.1. Ezr.2-3.1 is found in duplicate in Ne.7, though the copies do not wholly agree. Except one explanatory addition (4.6-23), by a later hand in the reign of Artaxerxes Longimannus, 3.10 is an addition of a writer contemporary with Zerubbabel and Jeshua, and an eye-witness of the rebuilding of the temple in the beginning of the reign of Darius Hystaspis. It has been suggested that Haggai was the writer. At any rate, it was much earlier than Ezra's time. The last four chapters are Ezra's own, and continue the history after a gap of 58 years—from the 6th of Darius to the 7th of Artaxerxes, in the midst of which gap the book of Esther might have been inserted. The text of the book is not in a good condition. There are palpable corruptions both in names and numerals, and perhaps in some other points. There has hardly been any doubt about the canonicality of the book, although it is not quoted in N.T. Of late years it has been thought that this book ought to be regarded as apocryphal, and that 1 Esdras ought to take its place. A comparison of the two books, however, suggests that difficulties would be increased rather than diminished by such a course. Josephus appears to side with 1 Esdras; but he writes rather vaguely on the subject. The dates of the kings of the period covered by the book of Ezra are as follows: Cyrus, 538 B.C.; Cambyses, 529; two impostors, Gomates and Smerdis, followed by Darius Hystaspis, 522; Artaxerxes, 465. The list given in the book of Ezra includes Cyrus, [Xerxes, Artaxerxes,] Darius, Artaxerxes. The reference to Xerxes (i.e. Ahasuerus) is in one verse only (4.6), and may be dismissed as an illustrative note—perhaps by Ezra himself. The Artaxerxes in the passage which follows can hardly be the Artaxerxes (Longimannus) of Ezra's and Nehemiah's time; otherwise the whole passage (4.7-23) must be dealt with as a later insertion—a view which is held by many. The only alternative is to regard the name as a substitute for Cambyses. This alone will make the whole passage harmonious. The changing of names has not unduly complicated the historical record into Sheshbazzar (1.8), while his official title was Tirshatha. Josephus calls him Sana-bassar. The impostor Smerdis was called Spendadates by Ctesias and Oropastes by Justin; Xerxes was also called Cyrus; and so with others. Cambyses is called both Kambathet and also Mesruta? [Kaneaute] by Mesopotamian, by his Egyptian subjects (Petrus, Egypt, iii. 350; Pierrot, Vocab. pp. 234, 642); and his Palestinian subjects may have had some reason, unknown to us, for introducing him under the name Artaxerxes. It may be added that Josephus says that the delay caused by the adversaries was one of 11 years. This delay is taken up from the beginning of the reign of Cambyses to the 2nd year of Darius Hystaspis. The difficulty may have some other solution. In 1 Esdras and Josephus it is affirmed that Zerubbabel headed a second expedition at the beginning of Darius's reign, and that this list (ch. 2 belongs to this and not to the first; but the text is of it in Ne.7.5—translated "at the first") is opposed to this view.

[R.B.G.]
F

Fable. [ALLEGORY.]
Fair Havens (Καλός Αμφιθέα), a harbour in the island of Crete (Ac. 27.8). Though not mentioned by classical writers, it is still known by its Gk. name. It appears to have been the harbour of Lasfa, E. of Cape Matata, which is the most conspicuous headland on the S. coast of Crete, and immediately W. of which the coast trends suddenly N.

Fair, a word occurring only in A.V. of Ezk. 27, and there no less than seven times (vv. 12, 14,16,19,22,27,33): in v. 33 it is rendered "wares," which K.V. rightly uses throughout.

Faith, Cf. Salvation: Repentance; Conversion. Faith is the second step along the way of salvation. Repentance is the casting off of the old servitude, faith the submission to the new. Hence faith is the moral opposite of sin, even more than is repentance. It is also closely connected with sacrifice as its inward and spiritual reality. The place of faith in the spiritual life has been confused by the theory of substitution and vicarious punishment. It is taught that Christ's sacrifice was penal, and that He suffered the wrath of God in our stead, all that is left for faith is trustfully to accept His sacrifice, and to consent to be involved in His merits. This is the view of Bp. Moule (cf. Christian Doctrine and Epistle to the Romans). One primary objection is that such a view of faith is inappropriate to O.T., and that the faith of the O.T. saints meant something higher, viz. their entire devotion to the cause and Church of God. It can hardly be supposed that faith should have lost, and not rather gained in intensity in consequence of the teachings concerning resurrection. So far from this, faith in N.T. includes the utmost of sacrifice. It is vain to seek its meaning by grammar and dictionary, for the relation defines the word, and not the word the relation. Faith is one thing in a friend, another as between husband and wife: but the highest, most intimate, and most vital relation of all is between the soul and God. Faith is the demand of Christ, unique, exceptional, imperative. It is not satisfied by intellectual acceptance, or passive acquiescence in a work done for us, but is personal self-surrender. This high meaning will explain its Pauline preference to works. By these are meant works done in substitution for submission. Such works are of the nature of sin, because not done according to the will of God. God may of His mercy take the will for the deed, and overlook imperfect obedience; but He cannot take the deed instead of and in the place of the will. We cannot please God except as we desire to please Him. This desire to please Him is called faith. [PAUL.]

The standard teaching on faith is contained in Bp. Jeremy Taylor's well-known sermon Fides Formata. "Faith destroys our sin, unites us to God: by it we are partakers of Christ's death and imitators of His life." [M.S.]

Falling, The. The narrative of the Fall has all the marks of the most hoar antiquity. Whether divinely revealed to Abraham before his flight from Mesopotamia, or preserved under divine supervision in the family of the patriarch, after it had become overlaid by false traditions among other dwellers in that region, it is clearly more archaic in style and method than any other portion of O.T. It has been interpreted both literally and spiritually. That it is to some extent figurative in form is demonstrated by the allusion to the "tree of knowledge of good and evil." Literally, of course, there is no such "tree"; and Holy Scripture is not responsible for injudicious literalists, who have ventured to amend the Bible, and substitute an apple (!) for the "fruit" mentioned. But whether taught literally or figuratively, the spiritual lessons of the narrative are necessary foundation truths of our religion, and the starting-point for the whole scheme of redemption. That man has fallen since his creation, by violating the laws prescribed for him by the Almighty, is a fact proved by the history of the world. The first act committed by man in violation of those laws constituted the Fall. Whatever was the exact character of man's first offence, it is clear that it involved an abuse of the tree-will granted him by his Maker. He fell at the moment when he first resolved to acquire experience of physical or moral good. This experiment was suggested by the Tempter, traces of whose malign influence are not wanting in the world before man was introduced into it. The temptation consisted in making our first parents believe that they would elevate themselves vastly in the intellectual and moral scale by disobedience to God's commands. "Ye shall be as God [R.V.], knowing good and evil." The immediate results of their sin were (1) the loss of the life of happiness they had hitherto led: (2) the conversion of joyous industry into toil, distress, and conflict with obstacles; and (3), to the woman, the agony of childbirth. The ultimate results were (1) jealousy, murder, remorse, despair, among their immediate descendants; (2) the universal spread of violence and disorder in the earth; (3) the destruction of mankind, with the exception of a single family; (4) death. Some have thought that spiritual death is meant. Certainly one result of the Fall was the arrest of man's spiritual development until the coming of Christ (Gen.6.3). Some subsidiary results may also be mentioned. The
sentence pronounced on the serpent indicates the moral degradation which sin invariably brings with it. The sense of shame which led to the use of clothing seems to point to the violation of the proper relations of the sexes as an early result of the first transgression. Yet the story of the Fall is not allowed to teach man hopelessly. Throughout the ages, the Church has ever been taught to expect the coming of Christ the Restorer; and the form of the prophecy (Gen.3.15) indicates that man shall not, in the end be the loser by the results, however dire, of transgression, but that those to whom God giveth the victory, through our Lord Jesus Christ, "shall rise to a higher fellowship with God, and a higher communion with their fellows, through conquest of self and victory over temptation. [SATAN.] [J.T.L.]"

FALLOW-DEER (Heb. yahmâr). The Heb. word is mentioned only in Deut.14:5 and 1K.4:23. Although the fallow-deer (Cervus dama) occurs in many parts of the world, it is not to be found as sparsely on Tabor and in the Lebanon, while the Mesopotamian fallow-deer (C. mesopotamicus) inhabits the mountains of Luristan, in Persia, the translation of yahmâr as "fallow-deer" is generally regarded as incorrect. The identification of the species of wild ruminants mentioned in the Bible is a matter of extreme difficulty, and yahmâr has been generally considered to indicate the buba¡ hartbeest (Bu-balis boselaphus) of the semi-desert districts of Africa, which has been supposed to occur in Syria, but on wholly insufficient evidence; therefore it is much more probable that some special species of antelope is meant.

Family and Inheritance. The Hebrew words for family, etc., have varying meanings, and it is often impossible to be sure which meaning was intended in a particular context. Hence the words in A and B are treated in their more usual senses. A. The largest term extended to all clansmen (Lev.20:5) [LAW is O.T., B (iv)], but possibly the Heb. word is here used in a narrower sense. (2) There were clan sacrifices (1Sam.20:6,29), at which all the (7 male) members were present. (3) The rights of inheritance to, and pre-emption and redemption of (Lev.25; Je 32), immovables devolved on the nearest clansmen in default of near relations (infra. E. III.). (4) Probably the restitution of Num.5:7, was made to the nearest clansman, if the injured person and his immediate family were dead, but the meaning of go'el here (R.V. kinsman) seems doubtful. (5) The right (and, probably, duty) of redeeming properties of the nearest relative through insolvent devolved similarly (Lev.25:49). (6) From Ru.3 it would appear that the duty of contracting a LEVIRATE marriage also dovetailed similarly. In other ways, too, the sense of connexion appears, e.g. 2Sam.16:5; Judg.9:1-3 (even where through the mother); Gen.24:40. Occasionally a group of clans constituting a sub-tribe is spoken of, and then "father's house" (Num.3:35, etc.) or "tribe" (4:18) is used; but no special term exists. [BROTHER.] B. The next subdivision is the bêt*bâb, "father's house," within which every individual desired his name as the ancestor of a family to be preserved (1Sam.24:21; cf. 2Sam.14:7; Num.27:4; and contrast Deut.25:10, "His name shall be called in Israel the name of him that hath his shoe loosed," partly as a sanction working on men's feelings, partly as severing the family bond; cf. Post, Grundriss, i. 163-165). That the phrase does not mean merely of the father appears from 1Sam.22:11,22, where Ahimelech's "father's house" is a very loose expression, and yet, e.g. in Judg.9:1-3, Nob = Abiathar's "father's house" (Ahimelech being Abiathar's father). See also Num.1.14, etc., esp. 18.1 (of Aaron's family, i.e. descendants). The collective idea is seen clearly in 1Sam.17:25, "Will give him his daughter and make his father's house free in Israel;" 2Sam.16, "Thou shalt... die, thou and all thy father's house." (cf. 2Sam.3.29,14.9; 1K.2.31). So probably in Judg.9.1 we should understand Abimelech as appealing to the clan of his mother's "father's house" (Moore, Judges, 243), and this use is frequent elsewhere. In Chronicles the father's houses of the priests are two technical divisions, and those for all—Ezra's house and Ithamar's (1Ch.24.6)—which in turn were subdivided (2Ch.25). The Chronicler also uses the term of technical divisions of the Levites (1Ch.23.11,26.13), and perhaps of the people (2Ch.25.5,35.12) as well as in other senses. The meaning of the expression is very various; often it would mean household, sometimes family (including descendants and collaterals), sometimes, perhaps, almost "clan" (Ex.6.14). [TRIBE.] Probably in some cases it is a technical division of the clan, in others it denotes a family connexion not necessarily by blood, but by alliance, generation to generation. Presumably, any member of this would perform the last offices in default of nearer relations (Am.6.10; uncle? or kinsman?), except in the case of priests. Probably the head of the senior "father's house" (i.e. the senior representative of the ancestor of the tribe through males having the blessing [BIRTHRIGHT]) was the prince of the tribe. In Num.17 "father's house" is used for tribe, probably because both the Heb. words for "tribe" mean "rod." C. Next comes the smaller group of close relations, for whom a priest might defile himself (Lev.21.1-3; Ezk.44.25), based not on blood-relationship merely, but partly also on subjection (past or present) to a common ancestor. Thus the sister is included, if unmarried, otherwise she will be "under her husband," not "in her father's house" (cf. Num.5.29, Heb.). Yet the principle of blood-relationship excludes the wife from the lists. Relations separated by more than one generation (grandchildren, grand-

FAMILY 277
parents, etc.) are omitted. This group, therefore, coincides with no other connexion, but expresses partly the sense of blood-relationship, partly the idea of family subjection, partly perhaps the conception of the necessities of the case. D. The Household. 1. The head of the house as father and husband. In early times the father enjoyed unlimited powers over the members of his household, including the power of life and death (Gen. 31, 32, 38, 2, 42, 37; cf. Koman, patria potestas, and Post, Grundriss, i. 170-173, ii. 135). Later these dwindled, and the various powers must be treated separately. (1) The father's jurisdiction for offences involving death appears to have passed to the courts of elders, who certainly acted on a joint statement of father and mother (Ex. 21, 15, 17; Lev. 20, 9; Deut. 21, 18-21), but his powers of chastisement remained. (2) The power to sacrifice children appears to have remained substantially intact (i.e. the courts of elders) and to have been exercised (Acts 7, 31, 18-20; Ex. 16, 20, 20: 2 K. 16, 3, etc.), although all such sacrifice is expressly or implicitly condemned in the Pentateuch (Gen. 22; Le. 18, 21, 20: 15; Deut. 12, 18, 18, 10). Lev. 27, 28, recognizes a power to "devote" human beings from all that is his, but the circumstances in which such an exercise could be exercised are not stated. The analogy of other passages suggests that it would apply to idolatrous slaves (cf. Ex. 22, 20: 1; Deut. 13, 15, etc.). (3) He could marry his sons and daughters (Gen. 38, 6; Judg. 12, 9; Ezr. 9, 2, etc.). In the case of sons this power appears to have been exercised only with his death. He had no jurisdiction over widowed daughters, except, perhaps, to prevent a marriage to any man except a relative (Gen. 24, 4). (4) Tamar, who in her father's house as in her youth "(cf. Lev. 22, 11), to whom no levirate claims attached (contrast Tamar, who in her father's house remained under Judah's protection). (1) He could sell or pledge his children (2 K. 4, 1; 1 S. 50, 1, etc.). (2) The prostitution of his daughters, as practised in early societies (Post, Grundriss, i. 176f.) was forbidden (Lev. 19, 20). (6) He could disallow the oaths and vows of his virgin daughter or wife "in the day that he heareth" (Num. 30, [Oaths]). (7) He could vary the respective rights of his children among themselves [Burrows], distribute his movable property among them (subject to some limitation, see infra, E), and adopt their children as his own (Gen. 48, 5). (8) He could divorce a wife at pleasure, or expel from his household a concubine or child (Gen. 21). (9) The idea that he rules over his wife, as at Rome, the familia, not the family, II. His wives. (10) See infra IV, on the deference due to him from his children. (11) Slaves also fall within the household [Str. 1], the unit of society being, as at Rome, the familia, not the family. II. His wives. (11) Slaves also fall within the household [Str. 1], the unit of society being, as at Rome, the familia, not the family. II. His wives. (12) The usual form of marriage was purchase (cf. Post, Grundriss, i. 1280ff.) by payment of a bride-price (Heb. mṓbar) to the father; and accordingly the law of seduction and rape provides for compensation to the father, whose property right in his daughter has been infringed. [CRIMES.] Other gifts by the bridegroom or father were (7 times) given (Gen. 24, 12, ["mṓbar and gift", but "gift" omitted by LXX, cf. gloss, 29, 24, etc.), but our information is here inadequate. (2) Wheresoever marriage by purchase exists, the custom of commuting the whole or part of the bride-price for service arises in the case of poor suitors. This is found in Gen. 29; post, Familienrecht, 217-218, Grundriss, i. 319 ff. (3) Marriage by capture is another universal form which finds illustration in the story of the Benjamites (Judg. 21, cf. Gen. 34, 29, Num. 31, 18, etc.). Such women were protected by Deut. 21, 10-15, and were probably (at any rate in some cases) wives, not concubines, infra (b). (4) Caleb promised his daughter to him who should slay the Amaun, i.e., the first of the five cities he took (Jos. 15, 16; Judg. 1, 12; cf. 1 Sam. 17, 25). Marriages of this kind are sometimes treated as forms of (i) or (2), but they must always have been abnormal. (5) Orphan heiresses (Num. 36, 6; perhaps all orphaned free virgins) and widows (1 Sam. 25, 39ff.; other than those included in the Levirate law and permitted by widows) bestowed their own hands, presumably without bride-price; but in the case of heiresses of immovables, they were compelled to marry within their tribe (Num. 36). In Tobit the right of the next-of-kin to marry a daughter who is an only child, even in her father's lifetime, is seen firmly established (e.g., Tob. 6, 11), but this is a later extension of Num. 36. (6) There has been much discussion about matriarchy, but among the Hebrews this can only be assumed in historical times by ignoring (amongst others) all the facts set out in A, B, and H, I, and H, (1-5) supra, and I, II, (b), V, and E, (a) infra, and all the Biblical genealogies. Samson, however, appears to have contracted a form of marriage with a Philistine, in which the wife remains in her family and receives visits from her husband (Judg. 14f.). Matriarchal ideas have been used to explain the conduct of Layman (2 Sam. 3, 14), in which the husband's brother) disposes of the hands of his daughters; (ii) Jacob contracts unions with two wives and two concubines in direct contrast to some forms of matriarchy; (iii) Jacob clearly has the full patriarchal power over his household; (iv) the wives (them)wives are counted by Layman, as strangers, etc. (Gen. 31, 14-16), which can only mean that they had passed from his family into Jacob's; (v) the succession of the sons depends on patriarchal notions [infra III, (b) (iv) and E, (a)]. (7) On racial bar, see infra III, (c); for priests, infra III, (d); and on forbidden degrees, Marrying. (b) Legal position, conjugal duties, etc., see I, supra and IV, infra. From Jos. 15, 16-19, Judg. 1, 14f. (cf. Gen. 29, 23, etc.), it appears that a father sometimes gave his daughter on or after her marriage a blessing, consisting of property, but how far this gave her any power over the property, or if she could divorce her husband, does not appear (cf. R. K. 9, 16). It is not safe to press Pr. 31, 16. In Ezek. 16, 33.
nadhān (אֲרָאָשׁ שִׁפְעָהוֹ) said to be identical with Assyrian nuδmu, "dowry," perhaps has a technical meaning. If so, she could possibly dispose of such property. In historical narratives the wife is seen acting as mistress of the house, e.g. Abigail, the Shunammite, etc., and appears to have held that position in the estimation of the household. Especially in relation to the female slaves her position was similar to that occupied by the master to the males (Ps.132.2). She was "mistress" (2K.5.3; Gen.16.4, etc.). As against her husband she was entitled to sustenance, raiment, and (probably) marriage rights (cf. Ezk.16.27), and Deut.22.13ff. protects her good name. Sometimes a limit was put by agreement on the husband's right to take additional wives (Gen.31.50). For an ideal picture of a wife's activities, see Pr.31.10-31. The metaphor in Ezk.16 (e.g. 10-13) gives a vivid impression of some of a wife's privileges, etc., and Is.3.16ff., etc., which shows that at some period of Israel's history the word b'ulá ("thing owned"), as showing that the wife was the absolute property of her husband, but laws and literature alike forbid this. The kindred verb is used with peculiar tenderness of the husband's treatment of his wife (see esp. Jel.31.32), and b'ulá and b'uláí are always used in an honorific sense. Adultery with a b'uláí spells death, just because she is free (Gen.20.3; Deut.22.22; contrast Lev.19.20). A b'ulá can only be divorced by writing (Deut.24.1), and her rights were probably secured by law (cf. 21.13f.). Indeed, even the verb b'ulá is never used of servile concubines. It is applied to the woman who possibly have been concubine and not wife. She was certainly treated with great favour by the law, and in no other case can it even be suggested that the word is used of a concubine of any sort. See also W. R. Smith, Religion of the Semites, 2nd ed., 1089. footnote, and cf. III. (b) of the list of concubines (Gen.31.41). The ordinary terms of affinity were used in reference to the members of her family, her owner being her father's son-in-law, etc. (Judg.19). Kinship with the children of such was fully recognized (9.1ff.). They sometimes lived separated from other wives (8.31). (2) Of servile origin (e.g. Bilhah and Zilpah). These had no rights (conjural or other) secured by law in virtue of their concubinage, though of course enjoying the same legal protection as other bondwomen. Crimes; Slave. Sexual offences committed with them are expressly put on a different level from those committed with free women (Lev.19.20). They were (? sometimes) subject to the wives, who could maltreat them. If given by a wife to the husband, the children were sometimes named after her (Gen.16, etc.), perhaps as the result of adoption by her. (3) On captives, see supra II. (a) (3) and (h) and infra (c). (b) Difference from wife. The following differences suggest themselves, but owing to the scantiness of our information the concubines referred to are, in some cases perhaps, only servile concubines, so that the distinctions do not all apply to free concubines. (i) In the case of wives, a marriage feast and perhaps other ceremonies were usual (Gen.29.22; 2Esdr.9.17; Tob.8.19, etc.), but not in connexion with concubines. (ii) Covenant relations subsisted between husband and wife, and the wife was the husband's consort (Ezk.16.8; Mal.2.14). This can scarcely have been so with concubines. (iii) Similarly, the wife of a king was a queen, not so his concubines (Can.6.8f., etc.). (iv) The Chronicler draws a clear distinction between the sons of David's wives and those of his concubines (1Chr.3.9). Similarly with Abrahah (Gen.25.6) and (in matters of inheritance) Sarah (21.10). In the case of Isaac and Jacob concubines were given no connexion with the husband. They were, perhaps, adopted by the wives, but, as Ishmael was in a precisely similar position as regards Sarah, the criterion cannot be found there, and it would seem that the father had power to give concubines' sons inheritance with his other sons. The right of inheritance was not accorded to any son of a concubine. Some foreign b'uláí were occasionally adopted by the king, as is shown by 2Sam.17.22, Abishag, who was perhaps concubine, not wife, but whose union with David had, in any case, never been consummated (1K.1.1). Widows (possibly excepting royal widows), on the other hand, were free women, except that so far as the intercommunal law prevented this (Gen.38.11; Ru.1.8; 1Sam.25.18f.; cf. cf. OAT..). (vi) The relation was differently terminated. A wife was divorced (priel of shāli'ah is used technically), whereas a concubine was redeemed or emancipated (Lev.19.20; Ex.21.8). So, too, shāli'ah is not used of unlawful unions; contrast Ezk.10.3, etc., Heb. (g'rushā; Lev.21.7, etc., would presumably cover all sexual connexions terminating during the joint lives of the parties, cf. Gen.21.10). (c) Racial bars (to marriage and concubinage alike). The Law forbids unions with women of the tribes that were to be extirpated (Ex.34.16; Deut.7.3, 20.17; cf. Judg.3.6). It expressly permits unions with other captives (Deut.20.14f., 21.10-14), e.g. with virgin (but not married) Midianitish women, Num.31.18 (not of course with religious prostitutes, Num.25.31.15f. [HARLOT]; and the contrast between Lev.21.7 and 21.14 shows that even priests were allowed to contract unions with foreign women (contrast Ezk.44.22). [On the law of levirate. Later feeling varied e.g. Ruth was a Moabitess; but Solomon's wives are condemned (1K.11.1ff., a wide interpretation being apparently given to Ex.34.5), and Ezra and Nehemiah waged a vigorous campaign against foreign wives (Ezr.9f.; Ne.13.25ff.), including, e.g., Egyptians, with whom intermarriage was
Certainly not prohibited. Doubtless historical experience rendered this extension of the law necessary. (d) Priests (also only by contract with virgins or widows, Lev.21.7 (Ezek.44:22 limits to Israelitish virgins and widows of priests), while the high-priest was further limited to an Israelitish virgin (Lev.21.14). [Priests.] (e) On forbidden degrees, see Marriage. IV. Children, especially sons, were ardently desired (Gen.30.1, etc.). (a) Legal position. They owed deference to both parents alike (Ex.20.12, etc.). Cursing or smiting a parent was punishable by death. [CRIMES.] See further I. supra. Engert instructively points to the difference between the reception of Bathsheba by her husband (1K.1.15ff.) and by her son (2.19ff.). On the age at which a son was emancipated from his father’s control we have no certain information, possibly 20 years in the Mosaic period (cf. Ex.30.11-16). [FIRSTBORN.] (b) Birth and Education. Childbirth was generally easy (Ex.1.19, etc.; contrast Gen.3.16). Midwives usually attended (35.18, 39.6, 1 Sam.1.11). The father was not generally present at the birth (Je.20.15; cf. LXX. rendering of Gen.21.7). Language is used implying that Joseph attended the birth of some of his descendants (Gen.50.23), but the text is doubtful (Kittel, ad loc.). After the navel-string had been cut the child was washed, salted and swaddled (Ezek.16.4). Rubbing with salt is still usual in Syria, and is thought to strengthen the child. Males were to be circumcised on the eighth day. [CIRCUMCISION.] The name was usually given by father or mother (Gen.5.29, 29.32f., etc., but see 25.25 [Heb. and E.V.]).30.6; Ru.4.17, etc.). Later this occurred at the time of circumcision (Lk.1.59, 2.21). According to the law the mother was unclean after childbirth for 7 + 33 days for a male, 14 + 66 for a female, after which certain sacrifices were offered (Lev.12.1-8). Nurses were sometimes employed (Gen.24.59, 35.5; 2 Sam.8.15). The child was nursed for 3 years (2Mac.7.27). The weaning was an occasion for rejoicing (Gen.21.8). If the mother were servile, the child belonged to her owner (Ex.21.4, 23.12, etc.). The child of free parents followed the father’s nationality (Lev.24.10-23). The mother appears generally to have taught the children of both sexes at first (Pr.6.20f., 31.1), but “nursing fathers” or tutors are mentioned (Num.11.12; 2K.10.1-5; cf. Is.49.23). Moses commanded religious instruction (Deut.6.7, etc.). [EDUCATION.] Num.12.14 gives a vivid picture of the treatment of troublesome daughters. Later, daughters were secluded (2Mac.3.19). (Cf. Hastings, D.B. s.vols. 1904, s.v. “Birth.”) V. Daughter-in-law passed into their husband’s family and were under the jurisdiction of his father (Gen.38; Ex.21.4). The relation of daughter-in-law to mother-in-law is coupled by Micah with that of son to father and mother (7.6). The only other O.T. evidence of the position of the mother-in-law is the case of Naomi, but in Tob.10.12 we read “Honour thy father and thy mother in law, which are now thy parents.” VI. Adoption. The only instances of formal Adoption are those of Ephraim and Manasseh by Jacob (Gen.48.5) and Esther by Mordecai (Esth.2.7). There are cases of children being brought up by persons other than their parents, Moses (Ex.2.10), Gubath (1K.11.20), Tobit (1K.1.18). Change of family by a man on marriage occurs once (Ezr.2.61; Ne.7.63), and may conceivably be a form of adoption [cf., however, Num.27.4]. —E. Inheritance. I. Morables. (a) Patriarchal age. The father had some power of distributing his property, among his son, during his lifetime in different proportions at his pleasure, and this was analogous to a testamentary power (Gen.25.6, 48.22; Deut.21.16), but we do not know how far it was limited. The eldest son by a full wife appears to have had a Brahminic custom in the absence of special circumstances. Sons of concubines could be dismissed without being admitted to a share or brought in to share equally. In default of children a slave could inherit (Gen.15.2-4). Perhaps where there were no sons, a slave married to a daughter often became heir (cf. rChr.23.4ff.). (b) Deut.21.15-17 enacts that a childless son who had passed over in favour of a younger son by a favourite wife, but shall receive a double portion. [Contrast Gen.48.22, where, however, there was good reason; cf. Gen.35.22, 49.3f.; rChr.5.1.] (c) Athithopel had a testamentary disposition (2Sam.17.25; 1 Chr.29.3). Ezekiel was recommended to the care of the widow (Is.50.4; Is.38.1). Job shared his property equally between all his sons and daughters (Job 42.15). Judith among all the next-of-kin of her husband and herself (1Th.16.24). From 8.7 it appears that a widow could inherit under her husband’s disposition, and from Pr.17.2, 30.23 that slaves sometimes inherited, probably under a testamentary disposition. The practice of making such dispositions is enjoined (Eccles.33.23). II. Concubines and widows, see supra I. III. (b) (v). III. Immoveables. The order of succession laid down by the Law here is (1) sons, (2) daughters (subject to the rule that he must marry within his own tribe), (3) brothers, (4) father’s brothers, (5) nearest kinsmen (through males; Num.27.11-11, 36; cf. Ru.4: Je.32). But in the days of Ruth widows had acquired some rights of succession to their husband’s property. Naomi had some right (Ru.4.7, etc.), and when her two sons had survived their father, i.e. the widow took some interest (we do not know what) in her deceased husband’s land even when he had direct heirs. Ruth also had some right in virtue of her widowhood (4.5). In 1K. 17.17 we find a widow owning a house, and cf. the instance of Judith (8.7), to whom her husband’s lands were left as well as his moveables. Job (not a Hebrew) appears to have shared his lands among all his children (Job 42.15). IV. The succession to the throne apparently depended on the will of the king, who could cause any one of his sons by a queen to inherit (1K.1.11ff.; 2Chr.21.1ff.). Similarly, however, there was a strong sentiment in favour of primogeniture (1K.2.22; 2Chr.21.3). Th. Engert, Ehe- und Familienrecht der Hebräer (valuable if used cautiously). Cf. generally Post, Grundriss, i. 165-195, and the sections relating to the separate subjects. [JUDE; LEVITATE LAW; NAMES.] [H.W.W.]
Famine. Though Palestine is frequently described as a very fertile land, yet famine threatened to be inconstant during the whole of the time that the Jews dwelt in Canaan. Throughout Syria and Arabia generally, Egypt, also—to which resort was often had when Palestine was afflicted, and which was even more famous for its fertility—did not escape, when the waters of the Nile (almost its only source of supply) were defective or insuffici¬ently conveyed to the soil. Palestine is chiefly dependent for escape from scarcity upon the heavy winter rains; but the Jordan and other smaller streams were utilized so far as they went. Occasional causes of famine in Bible lands were violent hailstorms (e.g. Ex.9.23ff.; Hag.2.17), the inroads of locusts and other pests (e.g. Ex.10.15; Jl.1.4; Am.4.1), and the devastations of enemies (e.g. Judg.6.1ff.; 2K.6.25ff.). Some of the principal references to famine in the Bible are (1) in the times of Abraham and Isaac (Gen.12.10; 26.1ff.); (2) the great famine that spread through Syria and Egypt in the days of Jacob (Gen.41.53ff.); (3) the famine that befell the land of Canaan under Elisha (1K.17.18; 18.5; 2K.8.1ff.; referred to by our Lord in Lu.4.25ff.); (4) our Lord predicts “famines in divers places” in His eschatological discourses, as one of the signs of the coming end (Mt.24.7; Mk.13.8; Lu.21.11); and these are thought to have been at least in part fulfilled in the horrors of the siege of Jerusalem described by Josephus (5, 6 B.J., etc.); (5) the prophet Agabus (Ac.11.28) likewise predicted “great famine over all the world, which came, which passeth in the days of Claudius” (emperor, 41-54 A.D.). [C.C.F.]

Fan (Heb. Ṿyṣrəḏ, Is.30.24; Je.15.7; Gr. βαμίδας, Mt.3.12), a winnowing instrument, distinguished in the first instance from the qanās or wooden shovel used to toss the grain, which is thus winnowed by the wind. The Heb. Ṿyṣrəḏ means something to “scatter” the grain, and the Gk. word something to “agitante.” The grain was tossed, in baskets like the vannus or winnowing basket, which was an important Diameter for the Jewish people. Baskets of seed food, seem to have been so tossed and winnowed (Ps.109.23), as they still are by the natives of Bechuanaland. [C.R.C.]
formal asceticism (Ro.14:26.; Col.2:16,21ff., etc.), recognizes the principle implicitly in 1Cor.7:8, and explicitly, by example, in Ac.15:23: cf. 2Cor.6:15,11,27). Passages where the word is found include Josephus and the original text (Mt.17:21; Ac.10:30; 1Cor.7:5) still testify to very early practice; and we know from early writers that the primitive Christians transposed the Jewish Monday and Thursday fasts to Wednesday and Friday, in commemoration of their Lord's betrayal and crucifixion. (Evpshermion Synagogal Prayers.) The Ministry and Services: Jerome, in Zeh. viii; Mishna, Taanith and Yoma. [L.R.]

Feasts. [Festivals.]

Felix, brother of Pallas, one of the great freedmen who administered the empire under Claudius. He was imperial procurator of Judaea, 52 to 59 or 60 A.D. A conflict of state and church is implied. Josephus seems to point to his having previously held some subordinate position in Samaria, which would account for the "many years" judgment and more exact knowledge attributed to him (Ac.24:10,22). He obtained his procuratorship on the recommendation of the high-priest Jonathan, whom he afterwards caused to be murdered. His administration is described by Tacitus (Hist. v. 9; Ann. xii. 54) in the blackest colours. The narrative of Acts, though far less condemnatory, is not inconsistent with Tacitus, for the compliments of Tertullus (Ac.24:2) are empty words. He was recalled, and accused before Nero by a Jewish embassy, but escaped punishment by the influence of Pallas. On his administration as a turning-point in the history of Judaea, see Schürer, Hist. Jev. People, div. i, vol. ii, p. 174. [E.R.B.]

Fenced cities. [Cities.]

Ferret (Heb. "אַנַּגָּה"). The A.V. translation of one of the Nordic creeping animals mentioned in Lev.11:39. The old Gk. rendering of "anaga" is "shrew-mouse," while the Rabbbinical writers translate it as "hedgehog." There is, however, little doubt that the Heb. term (which literally signifies "that which sighs or groans") indicates some kind of reptile; and Tristram considers that it probably refers to the lizard known as the fan-tailedger (Hypodactylus lobatus), a species commonly seen on the walls and ceilings of houses in Syria and Egypt. Like its relatives, it utters a peculiar chicking cry. [s.i.]

Festivals. The religious days for rest, joy, and observance fixed in the Bible fall under three heads: (1) by the division of time; (2) in commemoration of historical events; (3) in remembrance of man's duty toward his Maker. The first class includes: (a) the sabbath as a day of rest in every week (Ex.20:10; Deut.5:12ff.); (b) the first day of every month (Ex.14:1; 2K.8:27; Ex.5:5; Ho.2:11); (c) the Feast of Trumpets, or New Year's Day, which falls on Tishri 1. The second class includes the three pilgrimage festivals, namely: (a) the Passover, on Nisan 15-22, to commemorate the release from Egyptian bondage. (b) The Feast of Weeks, or Pentecost, counting 7 weeks (49 days) from the second day of Passover, and commemorating the original and the new creation (Ex.23:16). According to rabbinical tradition, Pentecost was celebrated also in commemoration of the giving of the law on Sinai, which occurred on the same day and is still observed by the Jews as such, in modern times. (c) The Feast of Tabernacles, or "Booths," on Tishri 15-22. The eighth day of Tabernacles was a separate holiday, a day of holy convocation. These festivals required pilgrimage to Jerusalem and special sacrifices during the temple period. Later they were observed by special prayers in the synagogue and all manual work prohibited, except the lighting of fire and cooking of meals (12:16). The intervening days of Passover and Tabernacles are observed as semi-holy days. The third class includes the Day of Atonement, which falls on Tishri 10, and which, though a day of fasting, is considered also a day of atonement and in some measure a sabbath day. The Festival of the Basket is applied by Philo to the individual offering of the first fruits before the Lord at the sanctuary, as described in Deut.26:2 ("the first of the wood contributed to the temple, and celebrated on Ab 15 (2 Wars xvii. 6; cf. Ne.10.35, 13:31; Mishna, Taanith iv. 5). Other feasts instituted to commemorate a religious victory or an escape from danger are recorded in Megillath (Scroll), Taanith, in rotation of the days of the months, most of which had an origin that soon became obsolete. The observance of the festivals was a most important factor in the economic life and culture of the Jews. It helped to maintain their national unity and religious ties. See special articles on Atonement, Day of; Dedication, Feast of; Jubilee, Year of; New Moon; Passover; Pentecost; Purim; Sabbath; Sabbatical Year; Tabernacles, Feast of; Trumpets, Feast of.

[J. D. E.]

Festus, Porcius, succeeded Felix as procurator of Judaea. Shortly after reaching his province he heard, in the presence of Herod Agrippa II., and Herince his sister, the cause of St. Paul, who had been left a prisoner by Felix (Av. 24:27-26:32). Judaea was in a disturbed state throughout the rule of Festus, as it had been in the days of his predecessor. He died in 62 A.D., within two years of his arrival. [C.D.P.]

Fetters. Three words are used in the LXX: ἐθρησκία, which occurs almost exclusively in the dual, showing that they were made in pairs. The word implies that the fetters were made of bronze or copper (Judg.16:21; 2Sam.

FIRMAMENT

Fever. The word only occurs once in A.V. of O.T.—viz. Deut.28.22—and three times in N.T., three cases of "fever" are mentioned (Mt.8.14, etc.), the nobleman's son (Jn.4.52), and the father of Publius (Ac.28.8). But fevers of one sort and another are so common in the East that it is impossible to identify exactly from what diseases these people were suffering, except in the last case given, where the case was a simple one.

Field. The Heb. sādhē is applied to any cultivated or productive ground, and in some instances in marked opposition to the neighbouring wilderness. On the other hand, the sādhē is frequently contrasted with what is enclosed, whether a vineyard, a garden, or a walled town. It applies to the pastoral region (Gen.4.12; 24:63; 25:27; Deut.25:3). The "landmark" in a field was probably—as in Babylonia—a stone inscribed with an account of the boundaries, and a statement of the grant by which the field was held (Deut.19.14; 27.17; cf. Job 24:2; Pr.22.28; 23.10). Cornfields in Palestine are still unfenced, rendering them liable to damage by stray beasts. They belong to the "landmark" category (2Sam.14.30). It should be observed that the expressions "fruitful field" (Is.10.18; 29.17; 32.15,16) and "plentiful field" (Is.16.10; Je.48.33), are not connected with sādhē, but with karmel, meaning a park or wood, as distinct from a wilderness. Another word, sād'hēdāth, is translated "crop" in various versions. "Cornfield" or "corn" may be added to the above list (Gen.13.10; 32.4; Is.16.8; Je.31.40; Hab.3.17). It appears to refer to "enclosures" walled like vineyards (see Num.22.24). [G.R.C.]

Fig. Fig-tree (Heb. b'ēnd). Occurs many times in O.T., and signifies the Ficus carica of Linnaeus, and also its fruit. The fig-tree is very common in Palestine (Deut.8.8). Mount Olivet was famous for its fig-trees in ancient times, and they are still found there. "To sit under one's own vine and one's own fig-tree" became a proverb among the Jews to denote peace and prosperity (2K.4.25; Mi.4.4; Zech.3.10). For figs as distinct from the tree, the plur. b'ēnim is used (see Je.9.19). We find bīk'kārā (Ho.9.10), the first-ripe fruit of the fig-tree; (b) pāgh (Can.2.13), the unripe fig, which hangs through the winter; (c) dāb'hēlā, a cake of figs pressed together to keep them (2K.20.7). In 2Sam.30.12 cakes of figs are given to the captured Egyptians as a restorative; and in 2K.20.7, etc., figs are laid on Hezekiah's boil, and he recovers. Both these uses receive corroboration from Pliny, who says (xxiii.7): "Figs be restorative, and the best thing they then can eat who are brought low by some long and languishing sickness, and now upon the mending hand and in recoverie. In like manner they are singular for the falling evil and the dropsey. Figs applied as a cataplasm are excellent, either to discourse or else bring to maturify any impostumes or swellings." [SYCAMORE.] In the passage "the time of figs was not yet" (Mk.11.13, etc.), the barren fig-tree is used emblematically of the Jewish nation. The efforts to deal with this literally have led to many dissertations, which are well summarized and referenced by Harris (Nat. Hist. of the Bible). [H.C.H.]

Finger-breadth. [Weights and Measures.]

Fire (Heb. brōš, brōth). Despite the opinion of Celsius that brōsh exclusively means "fire," there are instances of its plural use (Gen.15.17; Ex.3.2.19.18; Deut.4.36) to signify a kind of "extinguisher." The root, however, is perhaps suggested by "fire." In Ezk.27.5 the "fig-trees of Senir" (Lebanon) are expressly referred to as amongst Tyrian merchandise, for shipbuilding. [H.C.H.]

Fire in addition to domestic uses: (1) leprous garments burned (Lev.13.52, 57), and idols (Deut.7.25). (2) Supernatural fire: acompaniment of theophanies (Gen.15.17; Ex.3.2.19.18; Deut.4.36) destructive fire from God (Num.11.1-3). (3) Altar-fire: divine origin (Lev.9.24); perpetual on the altar of burnt-offerings (6.13); Esd.6.24; reinkindled (2Chr.7.1-3); tradition about the hidden fire (2Mac.1.19-22,31-33); strange fire, as from a censers (Lev.10). Incense offered presumptuously (Lev.10.1) child-sacrifice by fire forbidden (Lev.18.21; Deut.18.10), but practised (2K.16.3,17.17). (4) Death by fire as penalty (Lev.20.14,21.9); cremation (Jos.7.25). Sabbath law: no fire to be kindled (Ex.35.3). [H.H.]

Fire-pan. Fig-tree. The word thebes is rendered in A.V. is used in reference to three different articles. In Ex.25.38,37.23, Num.4.9, it means "a snuff-holder." It was of gold, and belonged to the tabernacle furniture. It was used for putting out the lights on the golden candlesticks. A more appropriate word for it would be "extinguisher." It was of the same kind as a "fire-pan" in A.V. represents one sort of wood. Pinus halepensis is the only true pine native in Palestine proper; P. pinaster (maritima) is probably introduced. P. pinea and P. pyreneica are found high up on the Lebanon, and P. carica on E. of Jordan (Tristram). To these may be added other fig-trees, cedars of Lebanon, cypress, etc. [D.G.P.]
all the references to the ṛāḥīṯ. In Ex.24.10 it is represented as a solid floor, and in Ex.13:22-26 the "firmament" is the floor on which the throne of the Most High is placed. Further, the office of the ṛāḥīṯ in the economy of the world demanded strength and substance. It was to serve as a division between the waters above and the waters below (Gen.1.7). In keeping with this view the ṛāḥīṯ was provided with "windows" (Gen.7:11; Is.6:8; Mal.3:10) and "doors" (Ps.78:23), through which the rain and the snow might descend. A secondary purpose which the ṛāḥīṯ served was to support the heavey bodies, sun, moon, and stars (Gen.1.14), in which they were fixed, and from which, consequently, they might be said to drop off (Is.14:12,34,14; Mt.24:29). In all these particulars we recognize the same view as was entertained by the Greeks and, to a certain extent, by the Latins. If it be objected to the Mosiac account that the view embodied in the word ṛāḥīṯ does not harmonize with strict scientific truth, the answer is that the writer describes things in popular language.

**Firstborn.** (1) In commemoration of the deliverance from Egypt, all firstborn human males were consecrated to the Lord (Ex.13:2). In ancient Egypt the firstborn son of a poor man was often the savings of his family, comprising the income of his father's life. The question of his redemption was commanded at 5 shekels for every child that lived one month (Ex.13:2,12 ff., 22:29[28],34.20; Num.18:15f.). In lieu of the living firstborn God took the Levites for his service, 5 shekels being paid for the redemption of every firstborn male in excess of the third son of every Levite (Ex.23:13,18.16), (2) The sacrifice of firstborn appears to have been common in heathen cults (1K.16.34; 2K.3.27, etc.). For Israel, see FAMILY, D.1 (2). (3) On Deut.25.6, see LEVITATE LAW. (4) Laban said that in his home it was usual to marry a firstborn daughter before her younger sister (Gen.29.26). [BIRTHRIGHT; FAMILY.] [IHM.W.]

In N.T. (1) Christ is the παρθένος (Mt.1.25 [omitted in R.V., N. B]; 1M.2.7; see also en. 22.23). [BIRTHRIGHT.] Exodus Rabba, xxix. near the end, God is represented as saying that as He had made Jacob to be firstborn, so would He make the King Messiah the firstborn, with riches and honours, and is the firstborn of all creation (Col.1.15); of the dead (ver. 18; Rev.1.5); of many brethren (Rev.8.29). (2) The Church of the Firstborn (Heb.12.23), perhaps with reference to the saints of O. and N.T., the patriarchs, prophets, apostles, and martyrs. [IHM.]

**First-fruits.** Two Heb. words, ṛēshith (R.V. first-fruits) and bīqīrīm (R.V. first-fruits, first-ripe fruits), must be distinguished. (1) ṛēshith denotes "first," connotes "best" (Num.18.12; 1Sam.15.21). Ex.22:29[28] enacts that thy fulness and thy treasure thou shalt not delay." (R.V. "thou shalt not delay" to offer of the abundance of the fruits of thy liquor). This is very wide, and we meet with ṛēshith of oil, wine, corn, wool, fruits of ground (Num.18.12; Deut.18.1,26,25,27; honey, and leaves (not meal offerings) (Lev.2.11,12; cf. 2Chr.31.5) all individual offerings. Each peasant presented a basket of the firstfruits "at the firstfruits" (Deut.26.1-10). An offering (apparently national) of ṛēshith of dough (? meal) is also commanded (Num.15:17-21). A sheaf (7omer of ṛēshith of corn was waved on "the morrow after the sabbath," probably Nisan 16 (national offering). Bread, parched corn, and fresh ears might not be eaten till then (Lev.23.14,17). ṛēshith fell to the priest (Num. 18.12; Deut.18.14 ff.); Deuteronomy says the bīqīrīm is apparently limited to things sown, especially wheat (Ex.23.16,19,34.22,26; Lev.2.14,23.20). Individual offerings, consisting of meal-offerings of bīqīrīm in the ear parched with fire and bruised, were brought to God's house the Feast of Weeks (Ex.23.16,19,34.22,26; Lev.21.14-20 weeks after the national offering of ṛēshith of corn. They fell to the priest, except a "memorial," which was burnt (Lev.2; Num.18.13). Two loaves of bīqīrīm were also waved then (Lev.23.16-20) as a national offering. In non-legal passages the word is used of grapes, figs, etc. (3) Nehemiah arranged that both bīqīrīm and ṛēshith should be brought, and bīqīrīm is plainly applied to the fruit of every tree as well as to the fruit of the ground (Ne.10.35[36],37[38]). The offering of ṛēshith of dough (? meal) was interpreted by him as individual (Ne.10.37 [38]). Bibliotheca Sacra. Jan. 1908, pp. 122, 123; Bough (2ind ed.), ii. 525 ft., 450 ft.; other views in Gray, Numbers, 225 ff. [IHM.W.]

In N.T. the term is applied to persons, the first in order of time to accept the Gospel, who were thus the earnest of a harvest to follow. This idea of "firstfruits" of Israel, probably interpreted by Jesus as consisting in a kind of "firstfruit" of the entire nation (Ro.11.16ff., perhaps alluding to Num.15.20,21); Epaphroditus (Ro.16.5), the house of Stephanas (1Cor.16.15), the brethren (Jas.1.18), the 144,000 redeemed (Rev.14.4). It also applied to Christ (1Cor.15.20,21), as the "firstfruits" of the Resurrection, and the Holy Spirit (Ro.8.23), to possess whom is an earnest of the future inheritance. [I.M.W.]

**Firstlings.** In commemoration of the deliverance from Egypt through the slaughtering of the firstborn, all firstlings were holy—i.e. were to be withdrawn from ordinary use for sacred purposes, usually Sacrifice (Num.3.3). Un-blemished firstlings were brought to the temple on the Passover and sacrificed. The flesh was eaten by the Israelite and his dependents, after giving the priest a tāmāi (Heave-offering, contribution), consisting probably of 1 or more of the animals (Ex.13.2,11,16,34.19; Deut.14.23,15.19-22; Num. 5.1,10,18.15-18). The sacrifice could only be performed after the seventh day from birth (Ex.22.29[28], where translate "thou mayest give," R.V., "thou shalt give"). Blemished clean animals were to be eaten locally without sacrifice (Deut.15.21-23). The Israelite was to reded to the firstborn of an ass with a kid or lamb, or to break his neck (Ex.13.13,34.20). For rules as to the redemption of other unclean animals, see Lev.27.27; Num.18.15,16 (with Gray ed. loc.). Nehemiah apparently arranged that all firstlings of clean animals should be brought to the priests (Ne.10.17). They were slain on the first day of the month (July) 1000, 426,430, Sept. 1006, 554,555. Van Hoonacker, Liedt du Culf, to. Other views in Driver, Deut. 185-187; Van Hoonacker, Sacerdote Ebitique, 401-406. [IHM.W.]
FISH, FISHING

Fish, Fishing. The ancient Hebrews recognized fishes as forming one of the great divisions of the animal kingdom, and, as such, gave them a place in the account of the creation (Gen. 1:21, 25), as well as in other passages where a description of living creatures is intended (Gen. 9:2; Ex. 20:4; Deut. 4:18; K.K. 33); and, what is very noteworthy, distinguished them from whales. The Mosaic law (Lev. 11:9, 10) pronounced unclean such fish as are devoid of fins of the ordinary type and visible scales: these are still regarded as unwholesome in Egypt. Of the various kinds found in the sea of Galilee, the catfishes (Siluridae), typified by the great Silurus glanis of the rivers of Europe, were classed among the unclean; as were also skates, sharks, lampreys, and, subsequently, eels. The Hebrews were well aware of the fecundity of fishes. The abundance of fishes in the Nile and the lakes and canals rendered them one of the staple commodities of food (Num. 11:5); and the destruction of fish was thus a serious visitation to the Egyptians (Ex. 7:21; Is. 19:8). In Palestine the sea of Galilee abounds with fish, and the value attached to the fishery by the Jews is shown by the traditional belief that one of the 50 laws of Joshua enacted that it should be open to all comers. Jerusalem derived its supply chiefly from the Mediterranean (cf. Ezek. 47:10). The existence of a regular fish-market is implied in the notice of the fish Gate, which was probably contiguous (2 Chr. 35:1; Ne. 3:12-13). Ezek. 27:4 mentions of the various occur in the Bible. The usual method of catching fish was by the use of the net, either the casting net (Ezek. 26:514, 47:10; Hab. 1:15), probably resembling the one used in Egypt, an illustration of which is shown in Wilkinson (iii. 55), or the draw or drag net (Is. 19:8; Hab. 1:15), which was larger and required the use of a boat. The latter type of net was probably most used on the sea of Galilee, where a large number of boats were kept. Angling was a favourite pursuit in Egypt. Another method was with the trident or spear, as practised in Egypt in taking the crocodile (Job 41:7). Any general account of the fishes of Palestine and the Nile is impossible within the limitations of our space. Nothing definite can be affirmed with regard to Tobit's fish, although Tristram suggests that it may have been one of the cat-fishes (Siluridae), which are common in the Tigris. A fish is used as the Christian symbol from the circumstance that the letters forming the Gr. name iχθῦς make the initials of Ἰησοῦς Χριστός, Θεοῦ εὐλογήματι (Jesus Christ, Son of God, Saviour).

FLAX

Flag, Flagon, thus two distinct Heb. terms are rendered in A. V. (1) ἀδίλευχον (2 Sam. 6:10; 1 Chr. 16:3; Can. 2:5; Ho. 3:1). The real meaning of this word is a cake of pressed raisins. (2) nebbel (Is. 22:24; Lam. 4:2) is commonly used for a bottle or vessel; originally used for a skin, but later a piece of pottery (Is. 30:14).

Flax (Heb. pisētā or pisē¬ē; Egypt. piskhet). Apart from references in the New Testament, the fibre, either the thread, the piece, or the garment, we find two possible references to the plant: Ex. 9:31, certain, and Jos. 2:6, disputed. In the former the flax of the Egyptians is recorded to have been damaged by the plague of hail. It seems probable that the cultivation of flax among the Edomites and the Moabites was not confined to Egypt; but was in early times very widespread in Asia. That it was grown in Palestine even before the conquest of that country by the Israelites appears from Jos. 2:6. The various processes employed in preparing the flax for manufacture into cloth are indicated: (1) The drying process, after the steeping has taken place (Is. 42:3, 43:17). (2) The peeling of the stalks, and separation of the fibres (Jos. 2:6). (3) The hacking (Is. 19:9). In Is. 19:5-10 there may be an intended connexion between the drying up of rivers and
brooks and the loss of means to prepare the flax in the dams. That flax was anciently one of the most important crops in Palestine appears from Ho.2.3,5—6 a fact that, in the opinion of Mr. H. Kantor, points to desiccation in this region. Dr. Tristram states that flax had again been cultivated in the Jordan Valley in the last century for the Sultan.

**Flea, an insect twice only mentioned in Scripture (tSam.24.14,26.20). Fleas are abundant in the E., and provide the subject of many popular expressions.**

**Flesh. [Food; Meat.**

**Flint.** The Heb. *hâllâmish* is rendered *fînt* in Deut.8.13,32.13, Ps.114.8, and Is.50.7. In Job 28.9 rock in the text, and *fînt* in marg. In Ezk.3.9 “fînt” occurs in the same sense, but there represents the Heb. *fîr*; cf. Ex.4.25, with the *Zîd* of flint, and a flint in the margin. Flint, or chert, which is almost the same thing, is common in the limestones of Palestine. The Heb. *hâllâmish* has been compared with the *Elnîsh* (rarely *Elnîshu*) of the monuments and with the “stone of fire” of the Bab. sign-lists.

**Flour. [Bread.**

**Flowers. [Palestine.**

**Flutes.** One of the musical instruments used at the worship of Nebuchadnezzar’s golden image (Dan.3.5ff.). Cf. also 1K.1.40 marg. [Flutes, especially the **Lute.**]

**Fly, Flies.** Two words are thus translated in A.V., *zîhîbîth* and *zîrîth*. The former occurs in Is.7.18, and is identical with the Arab. *dhîbihînî* (Arab. *dhâbâb*; Arab. *dh* = Heb. *z*). The Heb. word was used in a general sense. The 2nd term, *zîrîth* (“swarms of flies,” “divers sorts of flies,” “A.V.), is employed for the insect or insects sent to punish Pharaoh (Ex.8.21-31; Ps.78.45.105.31). As these were repelled by the Israelitische temples of the Egyptians, it seems probable that the common house-fly, which is a terrible pest in Egypt, is specially intended, the identification with the cockroach being gratuitous. [Cf. Plague.]

That the *zîhîbînî* were also most pernicious is testified by the cult of the Phoenician *Baalzub* (the lord of the house), who was probably invoked for protection against these insects. [Lit.]

**Food.** The diet of Eastern nations has been in all ages light and simple. The chief points of contrast with Western habits are the small amount of animal food consumed, the variety of articles eaten with bread, and the substitution of vegetable for animal forms for our liquors. The chief point of agreement is the large consumption of bread, the importance of the wine in the eyes of the Heb., is testified by the use of the term *lehem* (originally food of any kind) specifically for bread, as well as by the expression “staff of bread” (Lev.26.26; Ps.105.16; Ezk.4.16.14.13). Simpler preparations of corn were, however, common; sometimes the fresh green ears were eaten in a natural state, the husks being rubbed off by the hand (Lev.23.14; Deut.22.25; 2K.4.42; Mt.12.1; Lu.6.1); more frequently, however, the grains, after being carefully picked, were roasted in a pan over a fire (Lev.2.14), and eaten as “ parched corn,” in which form they were an ordinary article of diet, particularly among labourers, or others who had not the means of dressing food (Lev.23.14; Ru.2.14; tSam.17.17.25.18; 2Sam.17.28): this practice is still very usual in the East. Sometimes the grain was bruised (A.V. beaten, Lev.2.14; 16), and then dried in the sun, in which form it was eaten either mixed with oil (2.15), or made into a soft cake (A.V. *dough*; Num.15.20; Ne.10.37; Ezk.44.30). Salt was often used with bread (Job.6.6). Sometimes the bread was dipped into the sour wine (A.V. *winegar*) which the labourers drank (Ru.2.14); or, where meat was eaten, into the gravy, which was either served up separately for the purpose, as by Gideon (Judg.6.19), or placed in the middle of the meat-dish, as is done by the Arabs. Milk and its preparations hold a conspicuous place in Eastern diet. Fruit was another source of subsistence: figs stand first in point of importance; they were generally dried and pressed into cakes. Grapes were also eaten in a dried state as raisins. Of vegetables we have most frequent notice of lentils (Gen.25.34; 2Sam.17.28.23.11; Ezk.4.0), which are still largely used by the Bedouin; beans (2Sam.17.25; Ezk.4.9), leeks, onions, garlic, which were generally dried and pressed into cakes. Vegetables of a superior quality in Egypt (Num.11.5). Of vegetables, radishes and leeks are most in use, and are eaten raw with bread. [Agriculture.] The spices or condiments known to the Hebrews were numerous. Another important article of food is honey, whether the natural product of the bee (tSam.14.25; Mt.3.4), which is found in Syria, or the other natural and artificial productions included under that head especially the *dibs* of the Syrians and Arabians, i.e. grape-juice boiled down, which is still extensively used in the East. Oil was also much used. Eggs are not often noticed, though they have been evidently considered as a kind of food (Job 6.6; 1s.10.14.59.5; Lu.11.12). The Orientals have been at all times sparing in the use of animal food: not only does the excessive heat of the climate render it both unwholesome to eat much meat, and expensive from the necessity of immediately consuming a whole animal, but beyond this the ritual regulations of the Mosaic law in ancient, as of the Koran in modern times, have tended to the same result. All beasts and birds classed as unclean (Lev.11.1ff.; Deut.14.11ff.) were prohibited. With these exceptions, the Hebrews were permitted the free use of animal food: but, generally speaking, only availed themselves of it in the exercise of hospitality (Gen.18.8), or at festivals of a religious (Ex.12.8), public (1K.19; Chr.12.10), or private character (Gen.27.4; Lu.15.23): only in royal households was there a daily consumption of meat (1K.4.23; Nt.5.18). The quantities of *meat* and *bread* consumed (Gen.18.7; 2Sam.24; Am.6.4); lambs (2Sam.12.4; Am.6.4); oxen, not above three years of age (1K.1.9; Pr.15.17; Is.22.13; Mt.22.14); kids (Gen.27.9; Judg.6.19; tSam.16.20; gazelles,
Footman, a word employed in A.V. in two senses. (1) Heb. ragh‘îh, to distinguish the people or the fighting-men who went on foot from those who went on horseback (Lev. 11.49). It is in the LXX. used of a body of swift runners (Postis) in attendance on the king, such as had been foretold by Samuel (1 Sam. 3.11). This body appears to have been afterwards kept up, and to have been distinct from the body-guard—the six hundred and seventy who followed Jehoshaphat (2 Chr. 19.11) by his name. See 1 K. 14.27, 28; 2 Chr. 12.10, 11, 2 K. 11.14, 6, 11, 13, 19. A.V. guard: in two instances runners (in the margin (1 K. 14.27; 2 K. 11.13). (Cherethites; Guard.)

Forehead. An especial force is given to the term "hard of forehead" as descriptive of such a man as David (2 Sam. 15.13). It is a customary among many Oriental nations both to colour the hair and forehead, and to impress on the body marks indicative of devotion to some special deity or religious sect. The "jewels for the forehead," mentioned by Ezekiel (16.12), and in margin of A.V. (Gen. 24.22), is to be understood as the forehead discus.

Foreigner. The word meaning "stranger" in the Bible is the Heb. gêr, denoting the alien who accepts the hospitality of a Hebrew family. An equivalent in the LXX. is πορφυρός, though the gêr was not a proselyte in the usually accepted sense of the word, i.e., a Gentile who from conviction embraced Judaism. (Stranger; Proselyte.)

The present article will deal with the Heb. words ben-nêkîr or nôkhîr and zâr, the real equivalents of our word "foreigner," though usually translated "stranger." The main difference between the stranger (gêr) and the foreigner (nêkîr) is that the former had legal rights in the land, whereas the latter were not permitted to have any. In all ancient nations the attitude towards the foreigner was one of hostility; and the Israelite was always encouraged to regard himself as separated from other nations. Nevertheless, he was necessarily brought into friendly relations with foreigners under the following circumstances: (1) Incorporation. The family of Abraham contained honoured members who were not akin to him (Gen. 15: 2); the Israelites at the Exodus were accompanied by a "mixed multitude" (Ex. 12.38); the race of Hobab were allowed to share in the future benefits of God’s people (Num. 10:29; Judg. 1:16); Rahab became a dweller in Israel (Josh. 6:25), and many non-Israelite clans, like the Calebites (15:13) and the Jerahmeelites (1 Sam. 27:10) (Caleb), entered the commonwealth of Israel. (2) Hospitality was always highly prized as a virtue in the East, and the Israelite felt bound to extend this, not merely to his own people and to the gêr (or foreigner) who joined his family, but also to the stranger who chanced to enter his city (Gen. 19:2). Israelites accepted the hospitality of strangers (Ruth 1:1; 1 Sam. 27:1). (3) Matrimonial Alliance with foreigners was discouraged, and even in patriarchal times great importance was laid on purity of blood (Gen. 24:3; 28:34, 35). Nevertheless, marriage with foreigners was not the usual, nor does it seem to have been severely reprobated, even if illegal, at any rate till after the Exile (Ezra 10. passim; Neh. 13:23). (4) Mixed Marriages. (5) Warlike Alliances. The Israelites entered into frequent alliances offensive and defensive, and these seem to have been regarded at the time with little consciousness of the rebukes and even of the foreigner or foe, though not always with the rigor of a later period. Examples of such alliances are Abraham and the Hebronites (Gen. 14), David and Nahash of Ammon (2 Sam. 10.2), and Asa and Benhadad (1 K. 15.18, 19, but see 2 Chr. 15.1-6). The foreign policy of Hezekiah, and his alliances with Egypt and Ethiopia (2 Chr. 31, 39), were condemned by the prophets of the 7th cent. (Alliances.) (6) Trade and Commerce. The matrimonial alliance with Shechem (Gen. 34.21) was recommended as advantageous from a commercial standpoint, and David, Solomon, and Ahab all made alliances with the Phoenicians (1 K. 5:1-15.31). The close friendships between the Hebrews and the foreigner (rîm) were not the distant city of Hamath may have had a commercial basis (2 Sam. 8:10; 2 K. 14.28). (Commerce.) (7) Royal Policy. The kings of the house of David seem to have adhered to his policy of employing foreign mercenaries. In addition to the Cherethites and Pelethites, (David had Hethites, Canaanites, and Egyptians in his service. Shebna, the minister of Hezekiah, has been supposed to bear a foreign name (Is. 22.15, 37.2). (8) Misfortune. Israelites had to take refuge among foreigners under various distressing circumstances. In days of famine (Gen. 12:1; Ru. 1), as exiles (1 Sam. 27), under stress of invasion (Je. 40.11, 43). The alienation of Israel from foreigners was encouraged as their religious sense of separation developed: (a) In the Deuteronomistic legislation, in which the command to massacre the Canaanites on the entrance into the land is emphasized, though the latter of war and conquest for the time are distinguished for a certain humanity (Deut. 20.10 ff.), the belief that the Israelites ought to have annihilated all the idolatrous inhabitants of their country undoubtedly helped to increase their prejudices against all foreigners. (b) In the Exile and post-Exilic period the necessity of preserving their nationality, religion, and language (No. 13.24) made the Jews more exclusive than ever, though they still kept up friendly relations with aliens (No. 13.5, 28). Under Gk. influences the priests especially showed a desire to conform to Hellenic customs (2 Mac. 4.14), and the intense horror of
Hellenism was only engendered after the persecution by Antiochus Epiphanes. [Hellenist.] The strict Palestinian Jews of our Lord's time refused to have any social intercourse with the heathen (Ac.10), and the destruction of Jerusalem (70 A.D.) and the war in the days of Hadrian (117-138 A.D.) completed the severance between the Jew and the rest of mankind, which was aggravated by the mutual antagonism of Jews and Christians in later times. [F.J.F.J.]

Forest. The A.V. so renders 3 Heb. words, (1) yāḏār, the "tangled" copses (Arab. yāḏār) which covers the W. ridges in Palestine. It is used for "forest," or "wood," in 52 passages in O.T., including the woods of HARETH, CARMEL, ÉPHRAIM, and LEBANON (1 K.7.2,10;17.21;2 Chr.9.16,20); but in 1 Sam.14:25,26 the right rendering is clearly to have come "honeycomb" (ser)-veto natural "waste," and the fourth to a "wood" word is doubtful. It appears to refer to a shady wood (Ezk.31.3) like the Lebanon cedar forest; but the fores of Ziph (1 Sam.23.15-19) may be the present ruin Khoreisah near Ziph, and it is doubtful if forts would have been built in woods (2 Chr.17.4). The word is only found in Job (K.V. wood), (3) pālātis, a "Paradise" (A.V. Ne.2.8, "forest"), otherwise "orchard" (A.V. Ec.2.5; Can.4.13). The word only occurs in these passages. The Greeks took it from the Persians (pairidaeza; Arab. jerdās), who used it for a "park." It has, however, no Persian etymology, and may be a borrowed word in Persian also. [C.r.c.]

Fortifications. [Cities; Encampment; Jerusalem; War.]

Fortunatus, one of three Corinthians at Ephesus, when St. Paul wrote 1Cor. (16.17). See Lightfoot, Clem. of Rome, ii. p.187. [E.R.B.]

Fountain. The A.V. so renders (in some passages) four Heb. words, three of which refer to natural waters, and the fourth to a well or cistern. In the sense of a supply by a water-pipe it never occurs, since even the Romans did not understand that water in a pipe rises almost to the level of its source. (1) yāṭīn (Heb. and Arab.), a "spring," (Well), is rendered "fountain" in Gen.16.7; Num.33.9; 34.5. (2) ġā válā, "large," is rendered "cistern" in Gen.16.7; Num.33.9; 34.5 (probably "cistern") in 1 Sam.29.21; 2 Chr.33.3; 29.26. It should be noted that Rehobet met Abraham's servant at a "spring" with steps. Springs are sometimes in caves, or have steps to the water, in the East. (2) māṣīyān, a group of springs, is rendered "fountain" in Gen.7.11,18; Lev.11.30; Jos.15.9 (Numbers, rendered "well") of the same springs in 18.15; 1 K.18.5 (2 K.3.19-25, "wells"); 2 Chr.32.1; Ps.74.15,144.8 ("well" in 84.6, "springs" in 87.7,104.10); Pr.5.16,8.24,25.26; Can.4.12.15; Is.41.18 ("wells" in 12.3); Ho.13.15; Jl.3.18. In Can.4.12 it is equivalent to gāl, "spring." (3) major, a "source" (see Lev.20.18), occurs 13 times, and is rendered "fountain," except in Lev.12.7 " issue," Pr.10.11 " well," 16.22 "well spring," 25.26 "spring," Pr.5.16,8.24,25.26; Can.4.12.15; Is.41.18 ("wells" in 12.3); Ho.13.15; Jl.3.18. In Can.4.12 it is equivalent to gāl, "spring." (4) ḫārīrāt, "pit" (Cistern), is rendered "fountain" in 1 K.6.7 (kithlib, ḫōr). [C.r.e.c.]

Fowl. Several distinct Heb. and Gr. words in the A.V. of which the most common is 6āph, usually a collective term for birds in general. In 1 K.4.23, among the daily provisions for Solomon's table, "fatted fowl" are included. In N.T. the word translated "fowls" is most frequently the one which comprehends all kinds of birds (including ravens, Lu.12.24). [Sparkow.]

Fox. (Heb. šāhāl). In most of the passages in O.T. where šāhāl occurs there is little doubt from the context that it indicates the jackal, although in other instances it may refer to the fox. The word šāhāl is, in fact, clearly identical with the Hindustani shal and the Persian shah, both of which have a resemblance to the jackal. Despite the fact that there is the Heb. ḫayim specially denoting jackals, it seems probable that the ancient Jews, like the modern Syrians, frequently used one term for both jackals and foxes, although well aware of the distinction between the two. The šāhāl occurs in Judg.15.4; foxes are not gregarious; and probably the same holds good in Can.2.15. On the other hand, the ḫayim of N.T. (Mt.8.20) is rightly rendered "fox." In some instances "dragon" (tannin) apparently also denotes the jackal. [Dragons.] Jackals are taller and shorter-tailed animals than foxes, and dwell, often in holes, among ruins and deserted buildings, and hunt in packs at night. The Indian jackal (Canis aureus) is the species occurring in Palestine and Syria; but in Egypt it is replaced by the larger and more wolf-like Egyptian jackal (C. f. Infantus), and in Algeria and Morocco by the N. African jackal (C. anthus). The fox is represented by the family of true caninae, or Egyptian fox (Vulpes alopex nubialis). [K.E.L.]

Frankincense (Heb. ḫbḥōni, Gr. ἅφανες), a vegetable resin, brittle, glittering, and of a bitter taste, used for the purpose of sacrificial fumigation (Ex.30.34-36). It is obtained by successive incisions in the bark of a tree called the arbor thuris, the fruit of which foxes are not gregarious; and although foxes eat the resin, the Indians and Persians use it for the purposes of divination. The resin is obtained from several species of frankincense imported into Turkey comes through Arabia from the Indian Archipelago. There can be little doubt that the tree which produces the Indian frankincense is the Boswellia serrata of Roxburgh, or Boswellia thurifera of Colebrooke. It is still uncertain what tree produces the Arabian Olibanum. The Boswellias are natives of India, Arabia, and the Somali country. Several of them produce Olibanum or frankincense, but especially B. thurifera, a tall tree native in W. India. They belong to the Myrrh family. [Amaraudaceae.] [R.C.M.]

Freedwill offering. [Sacrifice, iii. c.]

Fringes. [Dress; l'Em de Garment.]

Frog. The mention of this lacrational in O.T. is confined to Ex.8.2-7, etc., in which the plague of frogs is described, and to Ps.78.45, 105.10. In N.T. the word occurs once only (Rev.16.13). Of the true frogs inhabiting Egypt is the edible frog (Rana esculenta), widely distributed in Europe, Asia, and N. Africa. [R.E.]

**Fuller.** [HANDICRAFTS, (10).]

**Fuller's field** (E.K.18.17; Is.7.3,36.2), near the wall of Jerusalem on W. (see 2K.18:26), and by a high road (ver. 17). [CONDUIT-]

**Funerals.** [BURIAL.]

**Furlong.** [WEIGHTS AND MEASURES.]

**Furnace.** Various kinds of furnaces are noticed in the Bible. (1) *tannūr* is so translated in AV. in Gen.15.17; Ne.3.11.12.38; Is.31.9. Generally the word applies to the baker's oven; it was made of clay, judging from those made by the Fellahin of Palestine. [BREAD.] (2) *kibkhān,* a smelting or calcining furnace (Gen.19.28; Ex.9.8,10,19.18), especially a lime-kiln (Is.33.12; Am.2.1.

(3) *kūr,* a refining furnace (Pr.17.3,27.21; Ezk.22.18f). (4) *attān,* a large furnace built like a brick-kiln (Dan.3.22,23). The Persians used the furnace as a means of inflicting capital punishment (Dan. 3c; Je.29.22; 2Mac.7.5:

**FUTURE LIFE, THE.**

---

**Ho.7.7.** (5) The potter's furnace (Ecclus.27.5,38.30). (6) The blacksmith's furnace (38.8).

---

**Future life, The.** (1) *In O.T.* From the earliest times we find amongst the people of Israel the belief in an existence after death. But this existence was regarded as so shadowy and wretched, in comparison with earthly life, that they never gave to it the name of "life," which meant to them "happiness." The home of the dead was *šekōl,* a land of dust (symbol of barren, dreary chaos) and darkness, in the centre of the earth (often called "the pit," or "the dust"). There the *r'phā'ām* (weak ones, ghoasts), as the dead were called, dragged out a weary existence unremembered of God (Ps.88.5), and without remembrance of Him (6.5); without any care for their family left behind on earth, or for any of their past interests (Ec.9.5,6). This is the fate of all men alike: there is no judgment to discriminate between men after death. It was seven strait no direct revelation was made by God to His prophets to put in place of this gloomy doctrine some
more comforting knowledge. But God had His purpose. The darkness as to the judgment beyond the grave, and the 'glory that shall be revealed' for the good, was a very sore trial indeed to the saints; but in the Book of Job and a Jeremiah it was the means of creating some of the most glorious fruits of faith that have ever enriched mankind. Once or twice Job (e.g. 14.13-15, 19.25-27: study these in a comm.-Deltisch, or Davidson, or Gibson) stumbles on the threshold of the truth; in two or three passages the prophets (esp. Ps. 16.8-11, 17.15, 49.14, 15, 73.23-26; see Kirkpatrick, Psalms) actually declare (though perhaps without realizing the full meaning of their words) their conviction that the relation between the saint and God will go on for ever. But these are not revelations: they are the fruit of lofty spiritual intuition. Many other truths, however, which were revealed through the prophets, led the Jews at last to perceive that the doctrine of Sheol could not be altogether true. Thus, e.g., Am.9.2 (cf. Job 25.6; Ps.139.8) declares God's presence and power in Sheol. The prophets taught also the resurrection from corruption, as clearly under the figure of a resurrection of dead Israelites (Ezk. 37), and so familiarized men with the idea of a personal resurrection. This truth is also hinted at in Is.26.19; and openly stated in Dan.12.2, where two classes are said to rise again—the very good to glory and the very evil to shame and contempt. This marks the climax of O.T. ideas. [Soul.] (2) In N.T. Practically nothing is told us about the state of the departed between their death and the last judgment. They are 'absent from the body' (2Cor.5.8), and the good are 'with Christ' (ib.; also Ph.2.13) 'in paradise' (1Cor.2.31), 'at rest' (Rev.6.11, 14.1; the wicked are: 'kept under punishment' (2Pe.2.9; cf. 2.4, 3, 7; Ju.6). Dies in the parable is 'in torments' (Lu.16.23), but the reference to the intermediate state is uncertain. The word 'sleep,' therefore, as used of death, does not signify unconscious-ness. 1Pe.3.19, 4, 6 may possibly mean that there is a temporary separation of the dead and the living. 1Cor.13.13-15 may refer to a purification by suffering; but the meaning of both these passages is highly uncertain. There is no trace in the Bible of the idea that those who are condemned because of their earthly life will have a second probation after death: the only possible exception is (according to one line of interpretation) 1Pe.3.19, 20. In 2Tim.1.18 we have almost certainly an instance of prayer for the departed. Rev.6.11 and Heb.12.1 probably suggest that the dead have some knowledge of what is happening on earth. The events of the last day are (i) the resurrection; (ii) the judgment; (iii) the end of time and the revelation of the eternal life, with heaven for the saved and hell (ge-henna) for the damned. The resurrection of the last day is the rising again of the body (contrasted with the spiritual resurrection which takes place with a man's conversion from spiritual death to life, John 5.25), Rom.6.14, Eph.2.6, Col.2.12 refer to the present spiritual, 1Cor.15.23, Ph.3.11, 1Th.4.15, 16 to the future bodily, resurrection). This bodily resurrection awaits all men—good and bad (Jn.5.28; Ac.24.15; Rev.20.13). In the resurrection of the just, the body will be changed from its earthly state of humiliation to a glorious body, like that of the risen Lord (1Cor.15.35-49; Ph.3.21). For the last judgment, see Christ; for the state of the saved, see Heaven; and for the punishment of the lost, see Gehenna: Hell. This punishment is described as eternal (aiwths, Mt.25.46), a word used of time which has a beginning, but never of time which has an ending; it might be translated "endless." The idea of a temporary hell, and the ultimate salvation of all men (Universalism) is not found in the Bible. It is God's will that all men should be saved (1Tim.2.4); but it does not follow that all men will accept the offer of salvation: there is 'sin which hath never forgiveness.' The idea that the damned will ultimately cease to exist (Annihilationism) rests upon a misunderstanding of the association connected with the words death, destruction, etc., as used in the Bible of the punishment of the wicked. These words imply utter ruin—the loss of all that makes life worth living; but they do not involve the idea of a cessation of suffering; (indeed, the N.T.柏the Bible never seems to contemplate the death of the soul in this latter sense. Salmond, Immortality: Agar Beet, Last Things: Hastings, D.B. (5 vols. 1904), art. "Eschatology." [s.c.g.]

G

Gaal (Judg.9.26-41), son of Ebed (a slave), a freebooter, who attempted to supplant Abimelech at Shechem. His appeal to Canaanite tradition indicates that he was not an Israelite. A braggart over his wine, he was disconcerted by Abimelech's sudden appearance, but forced to fight by Zebul's taunts. After his defeat, Zebul drove him out of Shechem. Ver. 33 (cf. 36) is illustrated by the remark of Stanley (Stanley P., pp.234-40) that in the valley of Shechem "the exhalations remain hovering among the branches and leaves of the olive trees, and hence that lovely blush haze." [U.M.S.]

Gaash, a "hill" (properly "mountain")—hâr, S. of Timnah-heres (Jos.24.30). The name has not been recovered. [G.R.C.]

Gaba (A.V. [Jos.18.24; Ezr.2.26; Ne.7.30]; R.V. Geba). [Gbeah.]

Gabael.—1. An ancestor of Tobit (Tab. 1.1).—2. A poor Jew (Tab.1.17, Vulg.) of "Rages in Media," to whom Tobias lent 10 talents of silver (Tab.1.14, 4.1, 20.5, 6.5, 1.15, 10.2).

Gabatha (Est.Apol.12.1) = Pachan.

Gabbaal, the head of an important family of Benjamin resident at Jerusalem (Ne.11.8).

Gabatha is given as the Heb. or Aramaic name (raised up) of the "Pavement," where the judgment-seat or bema was planted, from which Pilate delivered Our Lord to die (John 19.13). The place was outside the praetorium, for Pilate brought Jesus forth from thence to it. Apparently a public place just outside the tower Antonia, and raised above the street, is intended. [G.R.C.]

Gabdes (1Esd.5.20) = Gaba (Ezr.2.26).
GABRIAS

Gabrias, the "brother" (Tob.1.14) of Gabacl, Tobit's creditor, though E.V. in 4.20 makes Gabacl the "son" of Gabrias; but the Gk. allows of either (cf. Ac.1.13 with J.t.1). Gabriel, "man of El," or "hero of God." In O.T., Dan.8.16,19.21 only, not in Apocrypha, but in Pseudepigrapha. Often in Eth. Enoch, e.g., "he is in Paradise and the serpents [seraphim] and the cherubim" (xx. 7): intercedes for those who dwell on earth (xl. 6), and probably in As. Is. iii. 16, xi. 4. He is still invoked in the evening prayer of the Jews. In N.T., Lu.1.19,26 only (to Zachariah and to Mary). He represents angelic ministry to man, as Michael represents angelic protection to Satan. For Jewish and Arabian legends, see Jew. Encycl. s.v.; cf. Lueken, Michael, pp. 32 ff., 55 ff., 111 ff. [A.L.W.]

Gad (LXX. δαμων, δαμων; Vulg. fortuna), properly "the God"; i.e. "the [god of] good luck." In V.O. of Is.65.11 the clause "that prepare a table for that troop" has in the margin instead of "troop" the proper name "Gad" (cf. Gen.30.11), evidently some idol worshipped by the Jews in Babylon. That Gad was the deity Fortune (LXX., R.V. which likewise personifies "Destiny," A.V. "that number") is supported by the etymology (Syr. gada, Arab. jada), and is commonly accepted. Gad was probably identical with God the planet Jupiter which was regarded by Eastern astrologers as the star of greater good fortune. Movers favour the planet Venus. Illustrations of the ancient custom (lectisternia; cf. Je.7.18) of placing a banqueting table in honour of idols will be found in the table spread for the sun among the Babylonians (Her. ii. 17,18), and in the feast made by the Babylonians for their god Bel (Bel 3ff.; cf. Her. i. 181, etc.). Evidences of the worship of Gad, as the god of fortune, in Canaan may perhaps be found in the proper names Baal-gad (Jos.11.17,12.7,13.5) and Migdal-gad (Jos.15.37), the tower of Gad. G. A. Smith on 1.Sam.5.11; Delitzsch on 1.Sam.30.15; Lenormant, Chaldæan Magic, p. 120. [N.C.B.]

Gad (fortune). The ethnic name Gadites occurs in 17 instances.---1. Jacob's seventh son, and the first child of Zilpah, adopted by Leah and named (see R.V.) from her exclamation (b’rgkadh), "in luck." A.V., however, follows the Masorah in rendering it "a troop [i.e. of children] cometh," agreeing with the play on the name in Jacob's blessing (Gen.30.11,49.19), "a troop shall press upon him" (R.V., cf. margin). Gad had seven sons at the time of the descent into Egypt (46.16). In the desert, under Elizur and Eliassaph, the numbers of the tribe [Palex. increased (Num.1.25, 26.18), and included seven clans (26.15) who marched on S. flank (2.14), the spy selected from Gad being Guezel (13.15). On the conquest of Gilead the tribe chose that region, because fit for the cattle taken as spoil (32.1-31); but the fighting men went over Jordan, to assist in the conquest of the Calebites. They stood on Ebal to repeat the curses (Deut.27.13); and the blessing of Moses (33.20) compares Gad to a lion, and refers to the meaning of his name —"blessed is he who increases fortune"— as also to the early settlement of his "portion" by the lawyer, to which the Gadites returned (Jos.22.9-34; 1Sam.13.7; 2Sam.24.5).

Some Gadites, such as Bani (2Sam.23.36), joined David early, and are said to have been famous for skill in war and for swiftness (1Chr. 5.18,12.8), being trained in fighting the

Hagarites (5.19) E. of Gilead. These heroes were found especially at Jazer in Gilead (26.31,32). The tribe was, however, smitten by Hazael of Damascus (2K.10.32,33), and finally taken captive by Tiglath-pileser in 734 B.C. (1Chr.5.22,26), when the Ammonites overran their territory (Je.49.1). The tribe is last noticed in Ezk.48.27,34; Rev.7.5. The Tribal Lot coincided with the western slopes of Gilead, including nearly all the Jordan Valley E. of the river, from Zaphon to Jazer and Beth-aram. But as Manasseh extended its conquests northwards, Gad appears to have pushed its border N. on the edge of Bashan, besides holding "halt," or "part of," Gilead (Deut.3.12,16; Jos.13.24-28; 1Chr.5.11), including all the cities of that region, and bounded on E. by the Manasaim district (Jos.13.25,26). The Gadites had also rebuilt three towns in the territory of Reuben (Num.32.34), and their presence at Ataroth "from of old" is noticed on the Moabite Stone. Probably Jair of Gilead (Judg.10.3) was a judge of the tribe of Gad.—2. A prophet, or seer, in the time of David (2Sam.22.5; 2Sam.24.19), sent to warn
the king of imposing punishment (1 Chr. 21:9-19). He regulated the music of the temple (2 Chr. 29:25), and was one of the three commanders of David’s reign (1 Chr. 29:29). [C.R.C.]

Gad, River of. [ZAIZER]

Gadara, Gadarenés. Gadara was the capital of Peraea (see Josephus, 13 Ant. xiii. 3, 4 Wars vii. 3). It was taken by Antiochus III. in 218 B.C., and by Alexander Janneaus c. 100 B.C. It submitted to Vespasian in 68 A.D. It was famous for hot springs. It is now the ruined town Meket, about 7 miles S.E. of the S. end of the sea of Galilee, and 6 miles E. of Jordan, on the low hills. [DECAPOLIS.] The ruins within the walls include two theatres and a basilica, with Roman sarcophagi. (See Schumacher, Northern Arabia, pp. 46-80.) For X.T. notices, see Gergesenes. [C.R.C.]

Gaddi, son of Susi; the Manasseh spy sent by Moses to explore Canaan (Num. 13:11).

Gadid, son of Sodi; a Zebulunite, one of the twelve spies (Num. 13:16).

Gadi, father of Menahem (2 K. 15:4, 17).

Gald, son of Dathan (1 K. 2:18).

Gaham, son of Nahor, Abraham’s brother by his concubine Reumah (Gen. 22:24).

Gahar. The Bene-Gahar were Nethinim who returned from captivity with Zerubbabel (Ezr. 2:27; Neh. 7:49).

Gaius (Caesus), one of the more common Roman names. Gaius of Macedonia is mentioned Acts 19:29; (2) Gaius of Derbe Acts 20:4; (3) Gaius of Corinth Ro. 16:23; 1 Cor. 1:14. These are all in connexion with St. Paul. (1) To a disciple of this name St. John addressed his third epistle, where he four times calls him “beloved,” and speaks of his satisfactory conduct and excellent report as a Christian, and in particular of his courageous and generous reception and entertainment of strangers, which had apparently met with undue criticism and blame among his fellow-churchmen. It is possible that these “strangers” may have been these Itinerant evangelists (cf. Acts 18:23 and 20:4), and the second letter of St. John (cf. 1 Jn. 5:13) was intended for identifying any of the above with one another, nor with him whom St. John made Bp. of Perge (Acts 15:4).—[C. L. F.]

Galahad (1 Th. 1:8, 15, 5; 1 Mac. 5:31; 13:22), the Gk. form of Gilead.

Galal, three Levites; descendants of (1) Asaph, (1 Chr. 9:15), (2) Elkaniah (9:16), and (3) Jeduthun (Ne. 11:17).

Galatia, in its earlier and stricter sense, denoted a part of the dreary table-land of Asia Minor, S. of Bithynia, about 100 m. broad, and 200 m. long from S.W. to N.E.; but shortly before the Christian era it acquired a much wider significance as the official designation of a new Roman province of far larger dimensions. The name was derived from the Gallic or Keltic invaders, who forced their way into the country c. 280 B.C.; and for a similar reason it was called Gallo-Gracia by the Romans, who found a considerable Gk. population there before them. Although the Keltic immigrants were few in number, compared with the native Phrygians, they retained their characteristics, and held a predominant position for several centuries. Leading at first a predatory life, or fighting in the service of the rival kings of Asia Minor, they gradually settled down as a ruling caste among a mixed population of Phrygians, Lydians, Ionians, and Jews; and, quickening their settlements, or fortified villages, they resorted to cities, of which Ancylus, Tavium, and Pessinus were the chief. Espousing the cause of the Romans in the war against Mithridates, their chiefs were rewarded with grants of additional territory—one of them (Deiotarus) being ultimately recognized as king of Galatia. On the death of Amyntas, the last of his successors (25 A.D.), the country passed into the hands of the Romans, and was constituted as a regular province, which was enlarged in various directions. The name is employed by St. Paul in 1 Cor. 16:13; Gal. 1:2 (cf. 3:1); 2 Tim. 4:10. A comparison of 1 Cor. 16:1 with Ac. 20:4 (where “Gaius of Derbe and Timothy” [of Lystra] accompany St. Paul on his way to Jerusalem, with the offerings from Galatia and elsewhere) favours the wider sense, which includes Pisidian Antioch, Icinnion, Lystra, and Derbe—as in 1 Pe. 1:1. The name also occurs twice in Acts, 16:6, 10. The Keltic-Gallic-Galatian province denotes the part of Phrygia in the province of Galatia. In 18:23 “the region of Galatia and Phrygia” would not have been a suitable designation for Galatia proper and Phrygia, but refers to St. Paul’s journey in the Galatic part of Lycaonia (in which Derbe and Lystra lay) and Phrygia “through the upper country” to Ephesus (19:1).—[GALATIANS, Ep. TO.]

Galatians, Epistle to, one of the Pauline letters whose genuineness is scarcely disputed. The main question is whether it was addressed to Keltic Christians in N.W. Galatia, or to the churches in Pisidia and Lycaonia which received the Gospel from St. Paul in his first missionary journey (Ac. 13:15). Though the latter had no connexion with the Keltic race, the title Galatians was the only acceptable name by which they could be addressed in common; and it was a mode of speech quite in harmony with the Keltic origin of the Galatians and their habit of grouping churches according to the province in which they were situated (e.g. “Syria,” “Asia,” “Macdonia,” “Achaia”). Moreover, in this wider sense the expression “O foolish Galatians” (Gal. 3:1) would be much less offensive than if applied to a proud community like the inhabitants of Asia proper. Confirmation of this view, sufficient to outweigh the supposed allusions in the epistles to the traits of the Keltic character, will be found on a comparison of the following passages: Gal. 1:1, 3, 4; 14:18f.; 2 Gal. 1:9, 13; 13:2, 16, 51, 14:12; Gal. 3:28; 15:4f.; Gal. 4:14. 11; 15:4, 11, 16:3, 32; Gal. 6:17, 14:10, cf. 2 Tim. 3:11. As St. Paul had a deep interest in his S. Galatian converts, revisiting them at least once, for the purpose of confirming and organizing them (Ac. 16:1-6, cf. 18:23), it would have been surprising if no letter had been addressed to them. On the other hand, the very existence of a Pauline church in N. Galatia is doubtful, its planting not being recorded in Acts. It is also difficult to see why the apostle should have undertaken a toilsome journey from the neighbourhood of Antioch or Iconium to such a remote district, when (as is implied in Gal. 4:13) he had maintained...
tion of preaching there, especially if already suffering from his 'infirmity' there referred to; or how he should have subsequently found himself "over against Myria," when proceeding to Bithynia (Ac16.7). [PAUL] The object of this visit is unknown, but the Galatian leaders' tendency to Jewish ritualism. St. Paul, therefore, seeks first to vindicate his apostolic authority, which had been impugned by Judaizing teachers on the ground that he had never seen the Lord and owed his Gospel to the apostles at Jerusalem. He then deals with the doctrinal question, showing that the Law and the Epistles (Gal.1:1) superseded by the Gospel, as the full development of that principle of faith which had been all along the secret of acceptance with God (3f.). Finally, he reminds his converts of the blessings they had derived from the Gospel he preached, and warns them against the abuse of their liberty, exhorting them to live after the Spirit. The chief topics referred to in the Episcop indications are found in 1:6 ("so quickly removing," R.V.) and 4:13 ("the first time," R.V.); cf. 1:18, 2:10, 2:11, regarding visits to Jerusalem. On the South-Galatian theory, St. Paul's first visit to Galatia is recorded in Ac13:1, and was previous to the Council of Jerusalem (49-50 A.D.), his second visit (presupposed in Gal.4:13) being soon after that event (Ac16:1-6); so that, possibly, the epistle may have been written 51-53 A.D., perhaps from Corinth (Rendall) or Antioch (Ramsay), being due to a fresh outbreak of the Judaizing forces which had been checked by the council. It is addressed to Christians in N. Galatia, and Larissa (Larissa), as Galatia the Roman province, is known to have been part of Macedonia and Asia. In his opening words to the Galatians, St. Paul uses the title of "father," which is not used by him of any other church, and besides the one in Asia Minor. See also V. 15; Phil. 1:1. The Galatians, therefore, were a free and independent people, not subject to any one power before the Roman occupation. It is also possible that St. Paul's visit to N. Galatia was made on his second missionary journey (Acts 13:14-16, 15:36). The Galatians were known for their hospitality and love of freedom.

**Galbanum**

One of the perfumes employed in the preparation of the sacred incense (Ex.30. 34). The galbanum of commerce is brought chiefly from India and the Levant. It is a gum-resin obtained from several Persian umbellifers of the genus *Ferula*. The odor is strongly pungent and medicinal. Whether this be the substance intended in Exodus (hebbona) has been doubted. Pliny, however, is explicit (xii. 25): "Moreover, we have from Syria, out of the same mountain Anamus, another kind of gum called Galbanum, issuing out of an earlike Ferula-geant, which some call by the name of the said Rosin, others, Stagonitis. . . . The right Galbanum, if you break off a twig, has a strong perfume thereof. It is sold for five deniers the pound: and is used only in Phisicine for medicines." Galbanum is also mentioned in Eccles. 24.15, as yielding a pleasant odour, in company with onyx (onycha, an odoriferous shell) and storax. [H.C.H.]

**Galed** (the heap of witnesses; Gen.31:47). [GILEAD; see GESHALIM=

**Galgala** (1Mac.9.2). The situation is not clear, but apparently the Upper Gilgal is meant. [GILGAL, 2.]

**Galilee** (probably "rolling" hills, plur. GELILOTH), the N. province of W. Palestine, including Upper Galilee, where the mountains rise to 4,000 ft. above the sea, and (to its S.) Lower Galilee, where the hills generally are less than 1,000 ft. (1,500 near Nazareth), with small plains and broad valleys. The first is noticed in Joshua (20.7, 21.32) as "mount Naphtali," near KeDesh. Lower Galilee (1K. 9.11), including 20 cities near Capul—or on the N.W. of the province, near Tiberias—was partly surrendered to the Faram of Tyre by Solomon. Upper Galilee as far S. as Hazor—was attacked by Tiglath-pileser III. in 734 or 732 B.C. (2K.15.29). To this Isaias refers (9.1); for the Assyrian advance from Damascus led"by the way sea-ward, over Jordan, to Galilee of the nations"; but the future glory of Galilee is here predicted (see R.V.). The population was then transferred to Assyria, and the "Gentiles" (goyim) probably replaced them. The Jews were withdrawn thence in 164 B.C. to Judea (1Mac.5.15-23), and about 150 B.C. the province of Galilee is noticed with Samaria and Judea (10.30), including Cades (11.63), but Antiochus IV. transferred it to Ptolemais. See also Tob. 1.2; Jth. 1.6.15.5. In the Mishna, Galilee includes three regions (Shehithix. 2), the Upper and Lower divided at Caphar Hananiah (Hanathon), where the mountains rise rapidly, with "the valley"—i.e., the Upper Jordan valley. The W. and N. boundaries of Galilee are defined, between the Tiberias and Caesarea Philippi, in the Talmudic literature (Neubauer, Géog. du Tal. p. 11); and the low W. hills and plain, were outside Upper Galilee. The line ran from the "wall of Accho," and from Achzib, passing such known sites as Gath (Jatham), Kebartha (Kabra), She-kerith (Sezer), and Darda (Darda), to Gelil (Jelli), Kania of 'Aiya (Qina) and 'Ivya. Beri (Beriis), Migdol Kherub (el Khurbeh), Aulem ('Amön), Aiun ('Ayin plain), etc., Josephus, though fixing the N. border of Samaria at Ginea (3 Wars iii. 4) or Gemon (2 Wars xii. 3), now Jenin [ENGANNIM], does not include the great plain of Samaria." [ESDRAELOIN] In Galilee he makes Lower Galilee extend N. from Xaloth [CHISLOT-TABOR] to Bersabe (2 Wars xx. 6, 3 Wars iii. 1), probably at the ruin Abu Sheba', close to Hannathon, while its E. and W. limits were Tiberias and a city called Zabulon, near Accho (2 Wars xvii. 9). Accho, Ptolemais, were outside Lower Galilee, but Saab (Sh'lab), 10 miles to its E., was within the border (3 Wars xvii. 21). Upper Galilee ran N. from Bersabe to Baka, near Tyre, and the boundaries on E. and W. were Thella (et Tel, near Bethsaida) and Melloth, or Ma'alah, close to Alloth. This agrees with the Talmudic statements. In the N.T. Galilee is mentioned in 35 chapters of the Gospels and
Acts, the reference being in each case to Lower Galilee, including Nazareth (Mt.2:22), Capernaum (Lk.4:31), and Cana (Jn.2:11). It was in the valley of Sepphoris that Galilee is mentioned (Lk.4:31) and was the third province of W. Palestine (Ac.9:31). The dialect of Galilee differed from that of Jerusalem (Mk.14:70; Lk.22:59). The capital of Galilee was at Tiberias in our Lord's time, its other chief towns being Sepphoris (Sefturiah), N. of Nazareth, and Korazim in the N. of Lower Galilee had a large population; and many villages noticed by Josephus are still called by their old names. After 135 a.d. the Sanhedrin sat at various centres in Lower Galilee, and finally at Tiberias. [C.R.C.]

**Galilee, Sea of** (Mt.4:18,15,29; Mk.1:16,7,31; Jn.6:1). [Gennesaret, Galilea.]

Galilee represents in A.V. two Heb. words. (1) מָרְדָּהּ, or מָרְדָּהָי, denotes etymologically, "that which is bitter" (cf. Job 13:26). Hence the term is applied to the "bile" or "gall" (Job 16:13,20:23); it is also used of the "poison" of serpents (Job 20:14), which the ancients confused and used as a representation of bright writers who have searched most curiously into the secrets of Nature, doe hold "(says Pliny) "that the venenum of Serpents is nought else but their gall." (2) רָדְבָּה, generally translated "gall" by A.V. is in Ho.10:4 and Am.6:10 rendered "hemlock." In Deut.32:33 and Job 20:16 it denotes "bitter" or "venom" of serpents. From Deut.29:18, and Lam.5:19, compared with Ho.10:4, it is evident that the Heb. term connotes some bitter and perhaps poisonous plant. Other writers have supposed, and with some reason (from Deut.32:33), that some berry-bearing plant must be intended. Gesenius understands "poppies." The capsules of the *Papaveraceae* may well give the name of it (head) to the plant in question, just as we speak of poppy heads. The various species of this family spring up quickly in cornfields, and the juice is extremely bitter. A steeped solution of poppy seeds may be "the water of gall" if its properties are properly understood. Its application as the drink of a serpent, cited in the quotation of "gall" with poppy ("Papaver somniferum") is an unwarrantable assumption. The confusion of the sense of bitterness and venom in the doubled use of "gall" runs through many passages. The Roman soldiers offered our Lord, just before His crucifixion, "viper mingled with myrrh" (Mt.27:34), or "wine mingled with myrrh" (Mt.15:23). "Gall" is to be understood as merely expressing the bitter nature of the draught. Notwithstanding the opinion of many ancient and modern commentators, that the "wine mingled with myrrh" was offered to our Lord as an anodyne, it was probably a mere ordinary beverage of the Romans. Had the soldiers intended a mitigation of suffering, they would have offered a draught drugged with some narcotic. [U.C.C.N.]

**Gallery.** The A.V. so renders four Heb. words. (1) עַלְיָה (Ezr.41:15) and (2) עַלְיָה (41:16,42:3-5); these words meaning a "covering", are translated "ceiling," "velum," Vulg. pothous. (3) רָדְבָּה (marg. Can.1:17), supposed to mean a ceiling adorned with fretwork (I.X.X. παραφόρα), as a clerical error for רָדְבָּה (gr), corrected by the Massora. (4) רָדְבָּת (Can.7:5, where the hair of Solomon's bride is described. The proper rendering seems to be "the king is caught in the tangles of the net" (cf. Ex.2:16) "water-troughs," as meaning a network of channels. Others suppose it to refer to the "flowing" of locks and water. [C.R.C.]

**Galley.** [Ship.]

**Gallin** (springs; 1Sam.25:44; Is.10:30), a place mentioned, with others N. of Jerusalem, as alarmed by the Assyrian advance. It may, however, be the Golem of LXX., now Beit Jala, 4 miles S.W. of Jerusalem. [Eltekon.] There are good springs in the valley 2 miles N. [Laisiu.] [C.R.C.]

**Galilio, procuras of Achaia, when St. Paul was at Corinth (50-51 a.d.). He was brother of Seneca, the Stoic writer, Nero's tutor. Seneca bears testimony to his brother's charm of manner and beauty of character. Galilio was spared when Seneca fell, but perished afterwards among the many victims of Nero's reign. His conduct at the trial of St. Paul (Ac.18:12-17) is one of the many instances given to illustrate the strong influence of the character of the emperor Claudius in determining the outcome of the trial. See Ramsay, St. P. the Trav. pp. 255 ff. M. E. G. Bourget, Paul and the Burgundians has found a text of the emperor Claudius mentioning a rescript sent to L. Junius Galilio as procuras of Achaia in 52 a.d. [E.R.B.]

**Gallows.** [Crimes.]

Gamael (Hayes 5:29) = Daniel, 2.

Gamaelil. Rabban Gamaliel I., grandfather of R. Gamaliel II. (and sometimes confused with him), was at the height of his fame at the time of the trial related in the 15:27-40. Notices of him in rabbinic literature corroborate the view that of the great influence and tolerant attitude of Gamaliel. He was the teacher of St. Paul (22:3), and the apostle of the Gentiles may have been prepared for the lessons of his later life by the precepts of charity to Gentiles which tradition in the Mishna ascribes to Gamaliel (giltn, quoted by Hamburger). [Serene.]

**Games.** The notices of juvenile games are very few. It must not, however, be inferred from this that the Heb. children were without the amusements adapted to their age. In Egypt, inside the nursery cases of children, there have been found their toys; among such are dolls, some with movable arms and legs; (See Wilkinson, ii. pp. 426 ff. The only recorded sports, however, are keeping tame birds (Job 41:5) and imitating the proceedings of marriages or funerals (Mt.11:10); though that there were more manly sports is unquestionable, as may be inferred from the following passages: 2Sam.2:12ff. This very bloodthirsty sport, which perhaps occurred during a truce, can be paralleled by similar things among other peoples. Running is referred to in 1Sam.2:12; archery in 1Sam.20:20; rolling the disc in
Zech.12.3; playing ball, popular among many peoples of antiquity, in Is.22.18. Much bodily exercise was an absolute necessity to people who were constantly fighting, in spite of the fact that the natural209.148; Heb.1.5.17; Pr.26.19; also in asking riddles (Rabbath); and, above all, story-telling, which is the characteristic pastime of Orientals. In Jerome's day the usual sport consisted in lifting weights as a trial of strength, as practised also in Egypt. Dice are mentioned by the Talmudists, probably introduced from Egypt. Assyrian dice of bronze have also been discovered. Public games were altogether foreign to the spirit of Heb. institutions; the great religious festivals supplied the pleasurable excitement and feelings of national union which rendered the games of Greece so popular, and at the same time inspired the persuasion that such gatherings should be exclusively connected with religious duties. Accordingly the erection of a gymnasium by Jason was a mark of his acceptance by his heathen subjects (1Mac.1.14; 2Mac.4.12-14). The entire absence of verbal or historical reference to sports in the gospels shows how little they entered into the life of the Jews. Among the Greeks every city of any size possessed its theatre and stadium. At Ephesus an annual contest was held for honour of the city, and it has been recorded that St. Paul was present when these games were proceeding. A direct reference to such exhibitions is made in rCor.15.32, and his epistles abound with allusions to the Gk. contests, borrowed probably from the Isthmian games, at which he may well have been present during his first visit to Corinth. These contests (1Tim.6.12; 2Tim.4.7) were divided into two classes, the {p.295}pancratiun, consisting of boxing and wrestling, and the pentathlon, consisting of leaping, running, quoiting, hurling the spear, and wrestling. The competitors (1Cor.9.25; 2Tim.2.5) required a long and systematic course of training. The Olympic games, with a particular diet (1Cor.9.25,27). In the Olympic contests these preparatory exercises extended over a period of ten months, during the last of which they were conducted under the supervision of appointed officers. The contests took place in the presence of a vast multitude of spectators (Heb.12.1), the competitors being the spectacle (1Cor.4.6; Heb.10.33). The games were opened by the proclamation of a herald, whose office it was also to announce the name of the victor before the assembled multitude. The judge was selected for his spotless integrity (2Tim.4.8); his office was to decide any disputes and to give the prize (1Cor.9.24; Ph.3.14), consisting of a crown (2Tim.2.5,4.8) of leaves of wild olive at the Olympic games, and of pine, or at one period, ivy, at the Isthmian games. St. Paul alludes to two only out of the five contests, boxing and running, most frequently and with the latter. In boxing (cf. 1Cor.9.26) the hands are covered with leather gloves, {cestus}, a band of leather studded with nails or knobs. The foot-race (2Tim.4.7) was run in the stadium (1Cor.9.24), an oblong area, open at one end and rounded in a semicircular form at the other, along the sides of which were the raised tiers of seats on which the spectators sat. The judge was stationed by the goal (Ph.3.14), which was often visible from one end of the stadium to the other.

Gammarid's (Ezk.27.11), the defenders of the towers of Tyre. The word probably means "fierce" warriors, like the Arab. jamrud.

[G.R.C.] Gamul, a priest; the leader of the 22nd course in the sanctuary-service (2Chr.24.17).

Gar, "Sons of Gar" were among the "sons of the servants of Solomon" (1Ed.5.34 only).

Garden. Gardens in the East are, as the Heb. word indicates, inclosures, on the outskirts of towns, planted with various trees and shrubs. We learn that they were surrounded by hedges of thorn (Is.5.5), or walls of stone (Pr.24.11). For further protection lodges (Is.1.8; Lam.2.6) or watchtowers (Mk.12.1) were built in them, in which sat the keeper (Job.27.18), to drive away the wild beasts and robbers, as is the case to this day. The gardens of the Hebrews were planted with flowers and aromatic shrubs (Can.9.27; 16.6,2), but the most remarkable were olives, walnuts (6.11), pomegranates, and other fruits for domestic use (Ex.23.11; Jc.29.5; Am.9.14). Gardens of herbs, or kitchen-gardens, are mentioned in Deut.11.10 and 1K.21.2. Cucumbers were grown in them (Is.1.8; Ba.6.70), and probably also melons, leeks, onions, and garlic, which are spoken of as the products of a neighbouring country. The rose-garden in Jerusalem (Tal. Bab. Baba Kama 82.6) was remarkable as having been the only one which, from the time of the prophets, existed within the city walls. But of all the gardens of Palestine none is possessed of associations more sacred and imperishable than the garden of Gethsemane, beside the oil-presses on the slopes of Olivet. Is.17.10 seems to imply that in some gardens exotics were reared. In a climate like that of Palestine, the neighbourhood of water was important in selecting the site of a garden. To the old Hebrews Ahasuerus was a "a tree planted by the waters," was an emblem of luxuriant fertility and material prosperity (Is.58.11; Jc.17.8,31.12). From a neighbouring stream or cistern were supplied the channels or conduits intersecting the gardens, and conveying water to all parts (Ps.1.3; Ecc.8.6; Eccles.24.30). The expression "to water with the foot" in Deut.11.10 probably means to direct the stream by pressing the mud banks of the channels with the naked foot, as may still be seen done in the East. The orange, lemon, and mulberry groves around and behind Jaffa supply, perhaps, the most striking peculiarities of Oriental gardens, which Maundrell describes as "a confus'd miscellany of trees jumbled together, without either posts, walls, arbours, or anything of art or design, so that they seem like thickets rather than gardens." The kings and nobles had their country-houses surrounded by gardens (1K.21.1; 2K.14.27), and these were often built on terraced sides. (1K.15.20) The garden of Ahasuerus was in a court of the palace (Esth.1.5) adjoining the banqueting-hall.
(7.7). In Babylon the gardens and orchards were inclosed by the city walls. In large gardens the orchard was probably, as in Egypt, the inclusion set apart for the cultivation of date and sycomore trees, and fruit trees of various kinds (Can. 4.13; Ec. 2.5). The ancient Hebrews made use of gardens as places of burial (1 N. 19.41). Manasseh and his son Amon were buried in the garden of their palace, the garden of Uzzah (2 K. 21.18, 26). The retirement of gardens rendered them favourite places for devotion (Mt. 25.36; Jn. 18.1; cf. Gen. 24.63). In the degenerate times of the monarchy they were the scenes of idolatrous worship (1 S. 1.29, 65.3, 66.17), and idols were probably erected in them. Gardeners are alluded to in Job 27.18 and Jn. 20.15. But how far the art of gardening was carried among the Hebrews we have few means of ascertaining. That they were acquainted with the process of grafting is evident from Ro. 11.17, 24, as well as from the minute prohibitions of the Mishna. The traditional gardens and pools of Solomon [ETAM], supposed to be alluded to in Ez. 2.3, 6, are shown in the old drawings (i.e. Hortus), a little S. of Bethlehem (cf. Josephus, 8. Ant. vii. 3). The "king’s garden," mentioned in 2 K. 25.4, Ne. 3. 15, J. 39.1, 52.7, was near the pool of Siloam and the mouth of the Tyropoeon.

Gareb, "the nithrite," one of the heroes of David’s army (2 Sam. 23.38).

Gareb, Hill. — 1. (J. 31.10). A hill, perhaps marking N. limit of Jerusalem, probably of "gardens" (Arab. jarbabh, "plantation").

— 2. As the proper name of one of David’s captains (2 Sam. 23.38; 1 Chr. 11.40), it probably meant "expert." [C. R. C.]

Garlizim (2 Mac. 5.23.6.2) = Gerizim.

Garlick (Num. 11.5) is the Ilium satrum of Linnaeus, which abounds in Egypt, where it was always held in reverential estimation. Pliny says, "I cannot overpass the foolish superstition of the Egyptians, who use to swear by Garlicke and Onions, calling them to witness in taking their oaths, as if they were no less sacred than some gods." [H. C. T.]

Garmite, The. Keilah the Garmite—i.e. descendant of Gerem, in the genealogical lists of the families of Judah (1 Chr. 4.14).

Garrison. The Heb. words so rendered in A.V. are derivatives from the root mārāb, to "place erect" [PILLAR], which may be applied to a variety of objects. (1) mārābh and mārābbāh undoubtedly mean a "garrison," or fortified post (1 Sam. 13.24, 14.1, 12, 15; 2 Sam. 23.14). (2) nēbh is used for a "garrison" (1 Chr. 11.16), but also for a "column" erected in an enemy’s country as a token of conquest (1 Sam. 13.5), and elsewhere it means "officers," placed over a vanquished people (2 Sam. 8.6, 14; 1 Chr. 18.13; 2 Chr. 17.2).

Gashmu. [GASHM.] 

Gatam, an Edomite "duke"; son of Eliphaz son of Esau (Gen. 36.11, 16; 1 Chr. 1.36).

Gate. The word is used sometimes to mean a walled town (Gen. 22.14, 12.60; Deut. 12.12; Judg. 6.8; Ru. 4.10; Ps. 87.2, 122.2). Gates were of wood (Judg. 9.52), but plated with metal, locked and barred (Deut. 3.5; Ps. 107.16; Is. 45.1, 2), with bronze and iron. Babylonian gates had votive texts on the lintels, and Hebrew gates were inscribed with passages from the law (Deut. 6.9). Solomon’s temple had gates of fir wood and of olive wood, adorned with gold (1 K. 6. 31-35; 2 K. 18.16). Gate-keepers are noticed (2 K. 12.9, 518, etc.; J. 35.1), and chambers in gate-towers (2 Sam. 18. 24). [LITIFS.] [C. R. C.]

Gate, Beautiful. [TEMPLE.]

Gate, Prophesies of the. [PROSELYTES.]

Gath, one of the five cities of the Philistine lords. The O.T. notices do not fix its site; and, unless it be noticed as Gitti Rimmon [see GATH-RIMMON] in the Amarna letters (Berlin 154), there are no certain monumental allusions. Onomasticon places it 5 miles N. of Beith Jibrin, on the Lydda road. This is usually supposed to refer to Tell es Sā‘ī, a village on a high hill with a white cliff, 7½ miles N. of Beith Jibrin. Under the ruins of the mediaeval castle of Blanche Garde, built in 1144 A.D., recent excavations have here laid bare the remains of an early Canaanite town, including a line of monumental stones, probably once sacred. [GEEFER.] The site, 100 ft. above the plain, where the valley of Elah enters it, was very strong; and to Gath the Philistines fled down this valley (see 1 Sam. 17.52). It was a city of Anakim, not conquered by Joshua (Josh. 11.22, 15.3), but taken possibly in Samuel’s time (1 Sam. 5. 8, 6, 17, 7, 11). David fled to Achish, the Philistine king of Gath (21.10), as did Shimhi (1 K. 2.39-41); and Ziklag belonged to Gath (1 Sam. 27, 26). See also 2 Sam. 1.20, 15.18, 21.20, 22. It was attacked by Hazael II. of Syria (2 K. 12.17); and Uzziah destroyed its walls about 750 B.C. (2 Chr. 26.6). Amos (6.2) still notices it as a Philistine city. See also 1 Chr. 7.21 (an early raid from Gath to Goshen), 8.13 (Benjamin attack), 18.1 (David’s
conquest), 20:6,8 (the giants in Gath), 2Chr.11.7,8, where it occurs with Adullam and Marethah; cf. Moresheh-gath. [C.R.C.]

Gath-hepher, Gittah-hephä', a town on E. border of Zebulun, the home of Jonah (Jo.19.13; 2.K.14). Gath places it 2 Roman miles E. of Sephoris, the tomb of Jonah being shown. Now el Mesh-hed (the memorial), with a tomb of Jonah noticed by pilgrims since 4th cent. A.D. [C.R.C.]

Gath-rimmon.—1. A city of Dan given to the Levites (Jos.21.24; 1Chr.6.69), not far from Joppa (Jos.19.15). Eusebius (Onom.) places it 12 Roman miles S. of Lydda. In the Amarna tablets (Berlin 154) it is called Giti Rinuma. It was a town of Manasseh W. of the Jordan, assigned to the Levites (Jos.21.25).

Perhaps the village felt, 12 miles N.W. of Samaria. [C.R.C.]

Gaza (Arab. Ghazzeh), more fully Azazah (strong), as in Deut.2.23, 1K.4.2, 1e.25.20, the most southern city on the shore trade-route from Palestine to Egypt. In 1 Chr.7.28 Gaza is an error, probably for Ai. It was on the S. border of Canaan (Gen.10.19), and was the limit of Joshua's attacks on the Anakim (Jos.10.11,11.22). It was claimed by Egypt (Ez.26.1-2), but according to LXX. rendering, was not taken (Judg.1.18). The Midianites and their allies, in 13th cent. B.C., overran Palestine to Gaza (6.4), perhaps in alliance with the Egyptians. Samson (16.1,21) was here imprisoned by the Philistines. It was one of the five cities of the Philistine lords (15.10,16,17). According to Eusebius' Herodias' conquests (2K.18.8). Its conquest by Pharaoh Necho, c. 609 B.C., is mentioned by Jeremiah (47.1,5), and the city was denounced earlier (Am.1.6,7; Zeph.2.4), but it still had a king after the Captivity (Zech.9.5). Jonathan and Simon, brothers of Judas Maccabaeus, attacked it c. 150 and 143 B.C. (1Mac.11.61,62.13-43). The road from Jerusalem passed through a desert near this city (Ac.8.26).

In the 15th cent. B.C. Gaza was subject to Egypt, and was a refuge for the Canaanites fleeing from the 'Abiri or Hebrews (Amarna Letters, Berlin 57, 105, 199). About 1330 B.C. it is mentioned as belonging to Egypt (Tell Aryan), Palestine, by the Egyptian Mohar traveller. In 732 B.C. Tiglath-pileser attacked Gaza, and its king Hanun fled to Egypt, but at length submitted. Sennacherib, in 702 B.C., restored Silli-bel (Bal is my shade), whom Hezekiah had overthrown, as king of Gaza; and Esar-haddon (c. 680 B.C.) mentions him as a tributary. After the fall of Tyre, Alexander the Great, in 332 B.C., met with resistance only at Gaza on his way to Egypt. Gaza appears to have been always a trading centre. It was still a pagan city in 400 A.D., with a famous temple of Marna (our lord), which was then destroyed with other shrines (see Reland, Pal. Illustr. ii. p. 793). Its prosperity continued throughout the Middle Ages, and it is still an important trade depot.

It had no natural harbour, but the Maumia (or "water-place") called Minois (el Mineh) was a landing-place 2 miles W. of the city, where ships lay at anchor from far and wide. 2Sam.19.10, 1W. Pal. iii. pp. 236, 25. The city itself (Sama, W. Pal. iii. pp. 248-251) stands on a hill, 100 feet high, in the plain, and is surrounded by mounds covering the mediaeval walls. The town has a population of 18,000 persons.

The great mosque is a Templar church of 12th cent. A.D. The surrounding gardens contain 50 wells and many palms. They extend for over 2 miles round the town, and a fine olive grove stretches 4 miles N. There are some 200 Gk. Christians, and a Gk. church.

An early Egyptian text has been found here, with several Gk. inscriptions, one as late as 640 A.D. The houses are mostly of mud, but the mosques, etc., of stone.

Gaza (1Mac.9.52.13.53.17.34.15.28.16.1; 2Mac.10.32-36). [Gezer.]

Gazathites, The (Jos.13.3), inhabitants of Gaza; rendered Gazites in Judg.16.2.

Gezer (2Sam.5.25; 1Chr.14.16) = Gezer.

Gaza-ra.—1. (1Mac.4.15.7.45) = Gezer.

Gazez, a name occurring twice in 1Chr.2.46; (1) as son, (2) as grandfather, of Caleb by Ephah his concubine. The name has perhaps been repeated by a clerical error.

Gazites, The. [Gazitites.]

Gazzam. The Bene-Gazzam were Nethinim who returned from the Captivity with Zerubbabel (Ezr.2.48; Ne.5.71.5).

Ge'ba (hill; in Jos.18.24; Ezr.2.26; and Ne.7.30; A.V. Gaba).—1. A city of Benjamin, otherwise Gibeah, now the village Jeba,'a, S.W. of Michmash. It was given to the priests (Jos.21.17) and occupied by Philistines in the time of Saul (1Sam.13.19). It was taken by Asa (1K.15.22), and was rebuilt by him, and in Josiah's reign, the N. limit of the kingdom of Judah (2K.23.8). See 1Chr.6.60.8.6; 2Chr.16.6; Ne.11.31.17.29; Is.10.29; Zech.14.1-2. A place mentioned (Isth.3.10) to define the point reached by the Babylonian army ('between Geba and Sicytophithos') in attacking Bethulia; or from Azar, Beth-shean = Sicytophithos to Jebra, a village on the S. edge of the plain of Dothan, and 6 miles S.W. of Bethulia. It is noticed by Eusebius (Onomasticon) as Gabe, E. of Caesarea. [C.R.C.]

Gebal, a Phoenician seaport, now Jibail, a town with mediaeval walls and a Roman Roman street of colonnade, famous for ship-building. It was about 1730 miles E. of the Jezreel River, and about 20 miles N. of Beirut. Its ruins were explored by Renan. The "land of the Giblites" (R.V. Gebalites) was in Lebanon, but within the N. boundary of Israel. It was not conquered by Joshua (Jos.13.5). Stone-cutters thence (see R.V.) aided in building Solomon's temple (1K.5.18); and about 600 B.C. Gebal was famous for ship-building (Ezk.27.9). It may be intended in Ps.33.7, where a general confederacy with Asyria, including Tyre and Philistia, with the Ammonites, Moabites, and Edomites (perhaps in 732 B.C.), is described. The Amarna letters include 50 from Ribadda, king of Gebal in 15th cent. B.C. He was attacked by confederated Amorites and Hittites, and his city taken. He speaks of silver and gold in its temple, and of the papyrus trampled by the Hittites. This was famous in the Greek age, when Gebal was called Bablos, or Byblos, from this plant. (Hence our "Bible" and "Book".) About 1730 B.C. an Egyptian traveller (the Mohar) notices the temple of a goddess at Gebal. Tlgath-
pilseer III. in 738 B.C. received tribute from its king Shbitti-bel; Semachterib from another king of Gebal, Urimelekh, in 703 B.C.; and Esar-haddon from another, Milki-asapa, about 680 B.C. The famous stela of Yehu-melek of Gebal (1 Corpus Semi. Inscrip. i. 10), about 500 B.C. or later, describes his piety as a "just king," and the bronze altar he erected (with a gold image) as "Isaak, Gebal," but, like represents him pouring a libation, standing before the seated Isis-like goddess, under the wings of the sun-god. A coin of Gebal, with Gk. text, Περ Βρεθνε, shows the temple, with its court, and cove emblem. In the vicinity are found rock-cut tombs of various ages and Roman sarcophagi. A fine Greek Phoenician entablature from Gebal (in the Louvre) represents the winged sun with two uраei snakes. The death of Tammezu was mourned annually (till 4th cent. A.D.) at the Adonis River hard by, and the stream sprang from the fountain of Affhek, 3, at the shrine of the "mourners of Venus." [C.R.C.]

**Geb** on the son of Gebert resided in the fortress of Ramoth-gilead, and had charge of the E. part of the tribe of Manasseh (1 K. 4.13).

- 2. Gebert the son of Uri had a district S. of the former—in the "land of Gilead," but mainly in Reuben (1 K. 4.16). [Palestine.]

**Gebim** (pits; Is. 10.31). The LXX., reads Gebim. It is near Jerusalem, and the site of the Temple, is, therefore, called Gebal (Beit Jala), in the same passage, may have been S. of the city. There is a ruin Jebb or Rim (pit of the Greeks) about 2 miles S.E. of the city. [C.R.C.]

**Gedaliah**.—1. Son of Akhim (Jeremiah's protector. J. 26.24), and grandson of Shaphan the secretary of king Josiah. After the destruction of the Temple, 588 B.C., Nebuchadnezzar departed from Judaea, leaving Gedaliah with a Chaldean guard (40.5) at Mizpah, to govern the vine-dressers and husbandmen (52.16) exempted from captivity. Jeremiah joined Gedaliah; and Mizpah became the resort of Jew and Gentile, in this region (Jer. 40.11-13). He was murdered by Ishmael two months after his appointment (J. 41.10; cf. Josephus, 10 Ant. iv. 4).—2. A Levite musician, son of Jeduthun (1 Chr. 25.3, 4).—3. A priest who put away his foreign wife (Ex. 10.18).—4. Son of Pashar (J. 38.1), one of those who caused Jeremiah to be imprisoned.—5. Grandfather of Zephaniah (Zeph. 1.14).

**Gedur** (Esd. 5.30) = Gahar.

**Gedeon**.—1. An ancestor of Judith (Ith. 8.1).—2. The Gk. form of Gideon (Heb. 11.32).

**Gedor** (hedge, or wall), a royal city of the Canaanites (Jos. 12.13), apparently in far S. [Gedor. 2].

**Gedorah** (Jos. 15.50), a town in the Shephelah region of Judah. The site is doubtful. The Gedor of Jerome (Onomasticum), now the ruin Jedireh, 9 miles S. of Lydda, is in Dan. The Gedorite (1 Chr. 27.28), who ruled in the Shephelah for Solomon, may have belonged to this town. [C.R.C.]

**Gedorathite, The.** [Gedor. 3].

**Gedorite, The.** [Gedorah].

**Gedoroth**.—1. (Jos. 15.11.) A city of Judah, apparently on N.W. border near Beth-dagon. Probably the modern village Qatrah (Warren), 5 miles E. of Yehinah, and called Cedorah later (Mac. 15.30.11.16.9).—2. A town noticed with others in the Shephelah (2 Chr. 28.18), apparently Gedorah. [C.R.C.]

**Gederothaim** (Jos. 15.36). Apparently a note has crept in, as there are 14 cities of the Shephelah without this one. The name in LXX. becomes "folds" or "walls" (παλαιομονε), belonging to Gedorah, which it follows in the list. [Ibid. 3].

**Gedorah** (2 Chr. 31.9-37), an ancestor of Saul. It is also the name of three towns.—1. A town of Judah in the Hebron mountains (Jos. 15.58; 1 Chr. 4.4), now Jedur, a ruin 4 miles N. of Halhalt, with which it is noticed.—2. A place in the plains of Simeon, towards Edom (1 Chr. 4.39, with a valley) (g). It is probably Geder, but the site is unknown.—3. A town of Benjamin (1 Chr. 12.7), where the Gederathite (ver. 4) probably dwelt. Now the village Jedireh, 6 miles N. of Jerusalem. [C.R.C.]

**Gehazi**, the servant (lit. boy) of Elisha, sent as the prophet's messenger on two occasions to the good Shunammite (2 K. 4); obtained land in the valley of Hinnom from Naaman; was miraculously smitten with incurable leprosy; and dismissed from the prophet's service (2 K. 5). Later, he is mentioned as relating to king Joram all the great things which Elisha had done (2 K. 8).

**Gehenna**, a later name derived from the earlier name El-hinnom, or valley of Hinnom, or valley of the son, or of the sons of Hinnom. This place, so called perhaps originally after some ancient hero, is generally identified with the valley to the W. and S. of Jerusalem, beginning from near the Jaffa Gate on the W., running first southwards, then bending eastwards, and finally on the S.E. of the city joining with the Tyropoeon and Kidron Valleys leading off to the Dead Sea. (Sawce and W. Robertson Smith identify it with the central valley or Tyropoeon, which runs through the middle of the city itself; but see JUDA. The boundary between the tribes of Judah and Simeon was evidently not far distant (Jos. 15.8, 18.16). Afterwards the name became of ill omen, from the use to which the valley was put. Solomon introduced into Jerusalem the worship of Molech, and built a high place for that purpose in the "mount that is before Jerusalem" (1 K. 11.7).—see OLIVES, Mt. Sacrifices in which human beings were "passed through the fire"—i.e., possibly purged by fire, more probably burned alive—formed a part of this worship. One particular spot in the valley, called Totheth (Warren says in the lower part of the valley, and near its junction with the other valleys), was especially used for these sacrifices in the reigns of Ahaz and Manasseh (2 K. 16.3; 21.6; 2 Chr. 28.3; 33.6; 21.6; J. 7.31, 32.35), and Josiah, in order to prevent its being used in this way again, "defiled it" (2 K. 23.16). Jeremiah, shortly afterwards, cursed the spot, and predicted that it should be called the "valley of slaughter," and become a burial-place, defiled with dead men's bones (J. 7.31, 19.2-13; probably uttered in the early years of Jehoiakim, in whose reign the human sacrifices were revived; cf. Ezk. 20.31). Mediaeval Jewish scholars assert that the valley was used after this time for depositing the refuse of the city, including the bodies of the friendless or...
GELILOTH

criminal dead, and that to get rid of their fires were constantly burning. If this is the fact (it has some probability, though little evidence), it appears that the altars were set up not only on the ground, but also to the spot; and whether from this, or from the old association with human sacrifices by fire, Gehenna next appears (not in O.T. or Apoc., though Is.50.17 and 66.24 and Jth.16.17 are probably allusions; cf. 2 Esdr.7.36) as the name of the final place of punishment for the wicked in the next world, in the image of fire (Gen.15.19; and the fire and the fire being eternal (Book of Enoch, xxvii. 2, 3). It was distinguished (generally, though not always) from Sheol, the place of the departed both good and bad. This is the sense in which it is invariably used in N.T. by our Lord and the apostles (see also HELL, by which Gehenna is translated in A.V.). See, for literature, under HELL. [S.C.G.]

Geliloth, "over against," the ascent of Adummim (Jos.18.17), answers to Gilgal (15.7). It probably means "rolling" downs, and applies to the hummocks of the Jordan plain (Jos.22.10,11. A.V. borders; and in Heb. as a form of exact meaning). It also applies to the downs of the Philistine plain (Jos.13.2. A.V. borders; J.13.4. A.V. coasts). [Galilee.]

Gemall, father of Ammiel, 1 (Num.13.12). Gemariah, 1. Son of Shaphan the scribe, and father of Michaiah, 6. He was a noble of Judah, from whose chamber in the house of the Lord Baruch read Jeremiah's alarming prophecy to the people, 606 B.C. He, in vain, begged Jehoiakim not to burn the roll (Je.36).—2. Son of Hilkiah; one of the bearers of Jeremiah's letter to the captive Jews (Je.29.3).

Gems, Precious Stones. The key to the interest of the O.T. genealogies is their witness to earnestness in the preservation of "the holy seed" (Is.66.13; Ezr.9.2). Patriotism and religion combined to make the covenant people careful to trace out their descent from Abraham, and Abraham's from Adam. This differentiates the genealogical system of the O.T. from that of the N.T., in other branches of history, although in both we see the same principle of expressing history through tables of descent. No other nation had the Messianic hope (Gen.3.15); no other nation had its system of land tenure and its dignities of priesthood and kingship so solely bound up with family succession (1K.21.3; Num.36.7; Ex.39). Accordingly, the care for genealogies is shown right down to the appearance of Messiah (Lu.2.4,15.2.36), from the very first book of the Bible—which indeed bears the name of Genesis, and is built up on a framework or scheme marked by the recurring formula, "These are the generations of the" (Gen.2.5, 4.5,16.9.10.14.15.2.25.12.19.36.1), and some of the more active rulers and kings marked their reigns by attention to genealogies; e.g. David (1Chr.24). Hezekiah (1Chr.39. r; 2Chr.31.16-19. Zerubbabel (1Chr.9.7; Ne.12.22, 23). Hence for a right interpretation of the genealogies is important to have just notions of the nature of the tables of genealogies, and it is specially important to remember: (1) that they refer to political and territorial divisions as much as to strictly genealogical descent, so that all who are called "sons" of a patriarch were not necessarily his children (cf. Gen.10.15. Canaan begat Zidon his firstborn, and the regions of the sea, and the Amorite, &c.; 1Chr.2.51, "Saddar the father of Bethlehem"); (2) that the sequence of generations may represent the succession to inheritance or headship in a tribe or family rather than the relationship of father and son. Further, the genealogies were often abbreviated, merely specifying such links as would indicate from where chief houses the person descended, and great caution is therefore necessary in using them as measures of time. They are also peculiarly liable to corruptions of the text: Jerome found those in the LXX. version so confused that the names seemed barbareous, rather than Hebraic, and in Josephus the lists of high-priests are so corrupt as to be hardly recognizable. It is, however, a particular indication of trustworthiness that in the same family the same names should so often recur, though sometimes disguised, because in Heb. the same name may have various forms—e.g. [s.c.g.]. The genealogies are sometimes descending, as in Ch.6.3; 53; 6.33; Ezek.48.11, and in other times ascending, as in Ru.4.18-22. (1Ch.3). Females are named in them when there is something remarkable about them, or when any right or property is transmitted through them (Gen.11.20, 22.35.23-26; Ex.6.23; Num.26.33; 1Chr.2.16). The genealogical system naturally came to an end with what chief houses the person descended, and great caution is therefore necessary in using them as measures of time. Thus, for example, the descendant of Jesus is traced through His mother Mary; but in contemporary circles, Jewish and Gentile, birthrights could not be claimed through the mother: and as the purpose of the genealogy is to vindicate the claim of Jesus to be the "Son of David" and heir of the promises to Abraham, the genealogy is that of His fosterfather Joseph. Difficulties, however, arise from the genealogy being given in two forms. St. Luke alone traces the descent from Adam to Abraham, and then St. Matthew and St. Luke agree in the generations from Abraham to David. Thenceforward they differ except in the names of Salathiel and Zerubbabel, and we come to Mattath the grandfather of Joseph. (1) The explanation given by Africanus in the 2nd cent. proceeded from the descendants of our Lord's kindred, and was based on the Levirate law of the Jews. It was that St. Matthew gives the natural, St. Luke the legal, pedigree. Matthew traced his genealogy from Abraham through David and Melch to the house of Nathan married the same woman. Heli the son of Melehi having childless, his uterine brother Jacob,
Matthan's son, took his wife and raised up seed to him, so that the offspring, Joseph, was legally Hele's son as stated by St. Luke, but naturally Jacob's, and the legal pedigrees contain both names. (2) But this theory, which quickly gained general acceptance in the Church, and for 12 centuries retained undisputed supremacy, breaks down when we compare the two lists more closely. The genealogy in St. Matthew exhibits the successive heirs of the kingdom, ending with Christ, David's reputed son. It is, therefore, the legal pedigree, exhibiting Joseph as legal successor to the throne. The genealogy in St. Luke is the actual line of descent, exhibiting Joseph's real birth as David's son through Nathan, and thus showing why, on the failure of the direct line, He became heir to Solomon's throne. Had the steps of ancestry coincided with those of the succession, one pedigree only could in the nature of things be proper; and the 2nd pedigree, tracing Joseph's ancestry through private persons, by the side of one tracing it through kings, is in itself a proof that the latter is not the true stem of birth. (3) Indeed, the difference between these shows that St. Matthew's cannot be the actual genealogy, for he died childless (J.e.22.30), and an heir was found for him in Salathiel or Shealtiel, the son of Neri, who was of the house of Nathan. Salathiel with his heirs became reckoned among the sons of Jesus (1 Chr:3.18), self-styled by his father's nephew Zerubbabel, the son of Pedahiah (1 Chr:3.18.19), appears next to him in the line of throne succession. (4) On comparing the lists from this point it seems probable that Kerha (Lu.3.27) is not the son, but the title, of Zerubbabel, which has slipped in from the margin, an indication that the pedigree was worked backwards from a simple list of names—Neri, Shealtiel, Zerubbabel, Kerha, Joanan, etc. This correction brings St. Luke into harmony both with St. Matthew and rChr. For the name Joanan is the Gk. equivalent of Heb. Hananiah (1 Chr.3.19), and St. Luke's Juda (3.26) is the same as St. Matthew's Abia (1.13). The modification of the title Pedahiah (1 Chr.3.9) to Pedahiah (2.4, R.A.V.). (5) As noted above, the two genealogies coincide in the name of Matthew or Math, to whom are assigned two different sons, Jacob and Hele, but the same grandson or heir, Joseph. The explanation is that as Jacob had no son, Joseph, his brother Hele's child, became his heir, and the claimant to the throne of David, a position into which Math himself had stepped on the failure of the line of Abiud's eldest son in Eleazar (Mt.1.15), Math being descended from Joseph, a younger son of Abiud (Mt.1.13) or Juda (Lu.3.26). (6) It will be noted, however, that St. Matthew has omitted Joanan, and probably others also in the descent, perhaps in order that between Jeconiah and Joseph there should only be the 14 generations to which, as a help to memory, he restricted himself. St. Luke for the same period gives 23 generations. Between David and Jeconiah St. Matthew omits 3 generations—Amaziah, Josed, Amaziah—the same reason. But both genealogies agree in only giving 3 names between Salmon and David—viz. Boaz, Obed, and Jesse—whereas the period between the entry into Canaan and the birth of David was, according to the received chronology, between 3 and 5 centuries. For the period of almost equal length between Solomon and Jehoachin, St. Luke's genealogy contains only 27 names. This is met by accepting the genealogy as correct, and shortening the chronology by reckoning the heroes of the book of Judges to have been much more contemporary than used to be thought. [CHRONOLOGY.] This expedient brings Israelitish history into harmony with the Egyptian, with the traditional Jewish date of the Exodus, with the fragment of Edomithitish history preserved in Gen.36.31-39, and with the internal evidence of the Israelitish history itself. The genealogy in St. Luke is not without traces of mystical arrangement, for from Adam to Christ there are, including Caan and Khesa, 76 generations, to which St. Augustine added, "which was the son of God" (ver. 38), thus making from God to Christ 77, the number typical of forgiveness of all sins in baptism; and it is placed appropriately after the baptism in which Jesus was manifested as Messiah, the heir to David's throne. The genealogy of St. Luke's pedigree is as that of the actual lineage of Joseph seems proved by the naturalness of the frequent recurrence of the same names (cf. Lu.1.61); for if we begin with Nathan, his son Mattath and 4 others, of whom the last was grandfather to Joseph, we had not 76 generations of descent; of Nathan (Matthan twice, Mattathias twice); or if we begin with Joseph, there are no less than 3 of his name between him and Nathan. For the generations between Adam and Abraham the LXX. text is followed, which gives the 2nd Cainan (3.36), not found in the Heb. In St. Matthew's genealogy the most remarkable feature is the reference to the 4 women—Tamar, Rahab, Ruth, and Bathsheba—who, either as of heathen origin or by personal guilt, would be excluded from fellowship with the Pharisees, as if the evangelist meant to teach that as these were allowed to be in the line of Messiah's genealogy, all of them would be admitted to His kingdom. [C.R.D.B.] Generation, Generations. Two entirely different words in Heb. are represented by these terms in the Eng. O.T. (1) dör. This infers a body of contemporaries (Gk. συναγωγή, Gal.1.14), who grew up together, see the same events, and look at things upon the whole from the same point of view. This tends to produce a moral resemblance. "Whereunto shall I liken the men of this generation ?" gives the N.T. equivalent of dör in O.T. (2) tóthōth (only plur in O.T.) is specially noticeable as a title of 11 out of 12 original sections of Genesis. The first section records the creation of the "heavens and earth," in the sense in which those terms are used in ch. 1 and 2.1-3, incl. The following sections give the story of the progeny or "generations" of "the heavens and earth," of Adam, Noah, Noah's sons, Shem, Terah, Ishmael, Isaac, Esau (2), and Jacob. The antiquity of these sections justify their titles in every case. The same word for "generations" is used of Levi (Ex.6.16,16), Aaron (Num.3.1), Pharex (Rn.4.18), and of the tribes of Israel in Num.1 and in Chronicles. In all cases it has the sense of offspring. [C.N.W.]
Genesis, the first of the five books of the law, or Pentateuch. The Jews designate it *b'rëshith,* "In the beginning," from its opening words. The Gk. translators gave it the appropriate name "Genesis" (origin), because it recounts the origin of the world and man, and the beginning of the human race, generally. In character, it is not only furnishes the necessary introduction to the history of the Exodus and law-giving, and of the events of the wilderness, contained in the books that follow, but forms the introduction to the whole history of revelation. In sublimity and interest, in the depth of its ideas, and in the grandeur and magnificence of its purpose and principles, no book of antiquity can compare with it. —I. The book opens with the sublime epos of creation (1:1-3). This is followed by the special narrative of the creation of the first human pair, of Eden, of the temptation and fall, and of the earliest promise (2:4-3). The story of the eight and half hundred generations of the account of the beginnings of civilization among the Canians, and of the descent of mankind along the lines of impiety and piety respectively, till the growing corruption of the world brings on the catastrophe of the flood (4-6.5). The narrative of this catastrophe leads up to the covenant with Abraham and the new distribution of the earth (6.9-10). Mankind, having again become impious and God-defying (11:1-26), the extermination of true religion is averted by the call of Abraham, and the making of a covenant with him and his posterity (11:27, 12, 15, 17). The line of blessing traced through Seth and Noah, then narrowed to the two sons of Abraham, and fixed definitively in the line of Abraham, and is further limited in the succeeding history to the descendants of Isaac and of Jacob. Thereafter, the book, with brief notices of collateral branches, confines itself to the lives of Abraham, Isaac, and Jacob. It narrates God's revelations and providences, as well as those of the patriarchs, and the singular train of events which led, under Joseph, to Jacob and his household being taken down to Egypt, there to increase, and await the further development of the divine purposes. No book in the Bible presents a greater aspect of well-ordered relations between the different parts. Its materials, diversified in themselves, are presented in the framework of a scheme of ten "generations." The order is as follows: The story of creation (1:1-2.3) stands first, as the proem of the whole. Then succeed—1. "The generations of the heavens and the earth" (2:4-3). This heading might well have stood at the beginning of ch. 1 (in the opinion of some it originally did so), but is actually used to combine closely the stately creation narrative with the narrative of man's formation and trial that follows. 2. "The book of the generations of Adam" (5:1-33). 3. "The generations of Noah" (5:9-32). 4. "The generations and providences of Noah" (10:1-9). 5. "The generations of Shem" (11:10-26). 6. "The generations of Terah" (11:27-25:11); this long section includes the life of Abraham. 7. "The generations of Ishmael" (25:12-19). 8. The generations of Isaac" (25:19-35); another long section. 9. "The generations of Esau" (36:1-8), and "The generations of Esau in mount Seir" (36:9-37:1); two parts. 10. "The generations of Jacob" (37:2-50); this includes the history of Joseph. These different sections usually begin with a short recapitulatory statement (cf. 5:1-2, 6:9, 10, etc.); —I. In the modern critical theory of the origin of the book, Genesis is conceived of as compiled by successive redactors from three main documents: (a) A picturesquely-written narrative, marked by the predominant use of the name "Jehovah" (hence called J), embodying the traditions of patriarchal times current in Israel in the later days of the monarchy. This is thought to have originated about 850 B.C. The characteristics of the J narrative may be studied in such passages as 2:4-4 (in 2, 4, 3 the divine names are designated combined), 11:1-9, 12:18-24, etc. (b) A narrative largely parallel to the above, and closely resembling it in style, but marked of the divine name, or "God" (hence called E). It may have originated about 750 n.C. (Certain critics reverse these dates and relations.) It is preserved only in fragments, and in parts (as in the life of Joseph) is closely interwoven with the other. Examples of it may be seen in ch. 20 (where it is supposed to enter into the text of ch. 21), ch. 24, and ch. 31. These two narratives are supposed to have been combined into one (JE) a century or two after their appearance. (c) A priestly narrative (P), originally composed, it is assumed, during or after the Exile in Babylon, as introductory to the Levitical legislation, and now furnishing the framework in which the JE narratives in Genesis are set. It is also marked by the use of the name "Elohim," as far as Ex. 6. Its style, in contrast with that of JE, is described as dry, legal, enumerative, statistical, etc. Style and vocabulary can be studied in such sections as 1.2:1-5, 17, 23, 46, and in the flood-story, in 6:2-4, 5-8, 22-23. The materials referred to the more ancient corruption which, in the days of the Exile, may have been otherwise explained, no one would have thought of distinguishing them, or can even yet distinguish them, without complete disintegration of the narratives. The stories of the sacrifice of Isaac (22) and of Jacob at Bethel (28:10-22), e.g., are so split up by the critics between J and E as completely to destroy their unity. Regarding J, the older advocates of the "Supplementary theory (e.g. Bammel) were assuredly right in arguing that the Jehovahistic portions (often
single verses or mere clauses) could never have formed an independent history; while the broken and unequal character of the so-called priestly narrative is a protest against the idea of its ever having separately existed (Graf, the originator of the new theory, held it did not). 

Ex. 37.2 (P) reads, "These are the generations of Jacob," but there is not a word more from P till we reach 41.46: "Joseph was thirty years old when he stood before Pharaoh." The two elements, J and P, are throughout inseparably confused. P alone, e.g., records the ages and deaths of the patriarchs. Since the discovery of the Babylonian narrative of the Deluge, the matter can be brought to a yet nearer test. The stronghold of the disintegrationists has been the composite character of the narrative of the Flood (6-8). But it is now ascertained beyond dispute that it needs the narratives of both J and P to yield the complete parallel to the cuneiform version. E.g. P gives the measurements of the ark, but lacks the sending out of the birds; J has the birds, and also the sacrifice of Noah, which P wants. The baselessness of the theory of the post-Exilian origin of P is elsewhere shown (P) but there has been no special indication of early character in Genesis. E.g. the fourth commandment (Ex. 20.11, 31.17) is based on the sabbath rest of God in Gen. 2.1-3.; Deut. 4.32 unmistakably refers back to Gen. 12.7. Such phrases as "to their seed after them" (Deut. 1.5.4; 37.10.15), "that he may be to them an Elohist" (Ps. 105.33), are characteristically Elohistic.—III. The above considerations have a direct bearing on the immemorial traditional belief in the Mosaic authorship of Genesis. The book taken by itself, still more in its connexion with the Pentateuch as a whole, can only have originated in a creative age such as that of the Exodus; and no man can be thought of so suitable as Moses—versed in the culture of Egypt, deeply interested in the traditions of his people, and leader and lawgiver of his nation—to have planned and skilfully laid the foundations of the work. The facts that can be more plausibly used to an empty end are that different hands co-operated in the literary execution, and that the book was only gradually brought into its present shape, do not detract from its essentially Mosaic character. The few passages which are thought to indicate a later date are very indecisive, and at most point to a revision not later than the days of the judges or early kings. Such are: (a) "The Canaanite was then in the land" (Gen. 12.6.13.7). No Israelite in the days of the later kingdom needed to be informed that the Canaanites had not been expelled when Abraham entered the country. The passage naturally means that the Canaanites (recent immigrants) were already in the land. (b) "Before there reigned any king over the children of Israel" (36.31). This may be a gloss, but kings were in view for Israel even in the Mosaic age (Gen. 17.6.10, 35.11; Deut. 17.14-20). The list of kings in Edom, moreover (Gen. 36), which Hanhur (Edom), apparently a person still living, points to a date much earlier than the time of Saul. (c) Mention of "Hebron" and "Dan" (13.18.14.14). This is thought to imply an anachronism (cf. Jos. 14.15.15.13; Judg. 18.29). But "Hebron" (the Canaanitish "Kirjath-arba") was probably a genuine patriarchal name, and "Dan" may have been "Dan-jaan" (2Sam. 24.6); probably, however, the latter, in the latest form of the substitution for the earlier name "Laish." (d) "Land of the Hebrews" (Gen. 40.15). The phrase is not necessarily posterior to the conquest. Abraham is already in 14.13 "Abram the Hebrew," and his descendants had in Joseph's time been a couple of centuries in the land. Alleged repetitions, contradictions, and duplications of incidents are equally unsatisfactory as proofs of non-historicity and later authorship. The story of the Flood is remarked on above. Hagar's "two flights" (16.21)—the latter really an expulsion—are on the face of them quite distinct incidents: one before Ishmael was born, the other when he was a grown boy. Abraham's two denials of his wife (12.20) were the result of a settled policy—"at every place whither we shall come" (20.13), and Isaac weakly followed his father's example (26). There is a direct reference in 28.1 to 12.10, showing the narrator's knowledge of the real events. While the visit to Bethel (35.9-15) is abundantly led up to by divine command (31.13.35.13), with presupposition of the first visit (35.9). So of other instances. The conspicuous element in the narrative is its unity. Many internal marks attest the historical character of the narrative. The Hebrews' folk-tales, etc.—there is no such folklore of other peoples—their simplicity, fidelity to patriarchal conditions, depth and purposefulness, and place in the organism of revelation. But recent years have brought, in the results of archaeological investigation, startling new proofs of the antiquity and trustworthiness of the contents of the book. It is now known—e.g. from Babylonian discovery—that the early parts of Genesis do contain, as has always been believed, the oldest traditions of our race (Creation, Flood, etc.), though in a far purer form than heathen nations possessed them: that the real distribution of the land was that of Babylonia (11): that Babylon was older than Nineveh, and that the founders of Babylonian civilization were non-Semitic (10.8.10.11); that the historical relations in the time of Chedorlomer (Elamite dynasty, alliances with Arish, Amraphel = Hammurabi, etc.) are accurately portrayed (14); that such an incident as Sarah giving her maid to Abraham, and afterwards dismissing her (16.21), is in precise correspondence with the customs and laws of the time (Code of Hammurabi); that the pictures of Egyptian life in Joseph's history are minutely correct, even in the points in which they were most assailed, etc. Such corroborations increase in number every year with the further advance of knowledge. Science, too, brings its confirmations to the Biblical story, as in the accumulating evidences of a great deluge submerging the world of earliest man. On the other hand, the relations of Genesis to the sciences (astronomy, geology, etc.) are better understood, and people are more chary of seeking in these primitive pages anticipations of twentieth-century scientific discoveries, or
in the time

Comm.); Wright, Scientific Confirmations of
O.T. Hist. See also Pentateuch. [J.o.]

**Gennesar, Water of** (1Mac.11:67).

**Gennesaret** (rendered "Garden of kings," or
"of luxuriance"; see Chinnereth), a
region on N.W. shore of the sea, or lake,
which is called that of Galilee, and of Ti-
berias (Jn.21:1), as well as of Gennesaret, or
of Gennes (Josephus, 13 Ant. v. 7, 3 Wars
x. 7). The "land of Gennesaret" (Mt.14:
34; Mk.6:53) was a small plain, now called
deh Ghuweir (the little hollow), on the shores
of which Capernaum stood. Josephus
speaks of its fertility (3 Wars x. 8) and of its
fountain Capharnaum, probably the 'Ain el
Madoverah, or "round spring," which still
has in it the Coracinus fish which he mentions.
It makes him about 3½ miles by 2½ miles,
the actual measurements being 3 miles along
the coast, from near Magdala, and 2 miles ex-
treme breadth N.W. Its fruits are noticed in the
Talmud (Tal. Bab. Pesakhim 8b).
The sea of Gennesaret is a fresh-water lake, full
of fish, measuring 13 miles from where the
feet above the water. On the S.W. the cliffs
and slopes—equally steep—rise 1,400 feet.
On N.W. the spurs of Upper Galilee fall to-
wards the lake, and are about 700 feet above
the water. They consist of very rugged lime-
stone and basalt. The scenery, with cliffs
mirrored in the waters and a flat plateau
above the E. slopes, is bare and treeless—in
contrast with the luxuriance of the little plain
of Gennesaret. The lake is subject to sudden
squalls from the W. gorges, especially in
spring (Mt.14:24; Mk.6:48; Jn.6:18). See Mt.
4:18; Mk.7:31; Lu.5:1. The lake is now called
Bahr Tābariyah, "sea of Tiberias." [c.r.c.]

**Geneus**, father of Apollonius (2Mac.12:2).

**Gentiles**, the term applied in O.T. to
all nations outside the chosen people. The
same Heb. word γένος is also variously ren-
ered "nations" and "heathen" in E.V. For the various phases in the attitude of Israel
towards the Gentiles, see Heathen. In N.T.
the usual antithesis is between Jews and
Gentiles (ἐθνῆς), where the latter term still
covers all who are not of the Hebrew race.
Sometimes, however, the contrast is between
the Jews and Greeks (Ἐλλάνθιμοι), where the term
chosen (not Παρώνιοι) is significant of the extent
to which Gk. influence had permeated the E.
(e.g. R.o.8:9); the "Greeks" being taken as
typical of non-Jewish culture. Further, as
was natural, the Christian point of view in-
troduced a new use of the term; the name
"Gentile:" (ἐθνῆς) being sometimes found
contrast not merely with Jews but with Chris-
tians (e.g. 1Cor.5:1). In such passages it is the equiva-
lent of "heathen" in the sense in which a Christian, not a Jew, would use the
word.

[.c.v.d.]

**Genubath**, son of Hadad, an Edomite of
royal race, by an Egyptian princess, sister of
Tahpenes, the queen of the Pharaoh who
governed Egypt in the latter part of David's
reign (1K.11:19-20; cf. 16).

**Gera**, one of the "sons," i.e. descendants,
of Benjamin (Gen.46:21). According to 1Chr.
8:3-7 he was son of Bela; but the text here is
very confusing, and the three Geras may be
reduced to two. Gera, who is named (Judg.3:19)
as the ancestor of Ehud, was the father or an-
cestor of Shimei (2Sam.16:5). [r.b.g.]

**Gerah**. [Weights and Measures.]

**Geren** (Gen.10:19,20:1,2,26:6,17,18,20:26;
2Chr.14:13,14), a royal Philistine city near
Gaza, with a valley in which wells were dug
by Abraham and Isaac. Now the ruin Umm
Jerrār, 7 miles S. of Gaza, on E. bank of the
great boundary valley running from Beer-
sheba. Water is still obtained by digging
shallow pits in the valley bed. Some rubble
cisterns exist in ruins on the mound (Saur.
W. Pal. iii. p. 389). [c.r.c.]

**Gerasa**, a city in N. Gilead, first noticed
c. 85 B.C. (1 Wars iv. 8); now Jerash, a ruined
Roman city of 2nd cent. A.D., with remains of
temples, theatres, and a later church of 4th or
5th cent. A.D. [Gergesenes.] [c.r.c.]

**Gargesen**es (A.V., Mt.8:28), inhabi-
tants of a place E. of the sea of Galilee, ap-
parently in Decapolis (Mt.5:20). Origen
states that most MSS. in his time read
Gerasites, and some Gadarenes. The various readings may be best seen tabulated.

Vat. Ms. — Gadarenes Gerasenes
Sin. Ms. — Gerasenes Gerasenes

The Onomasticon speaks of a village on a hill, by the sea of Tiberias, which Eusebius and Jerome alike call Gergesa. It is probable, however, that the real name was Gerasa, represented by the ruin Qersa (pronounced by Arabs Gersa) opposite Tiberias, near the shore of the lake. This has no connection with the city Gerasa; but it might be described as in the region of Gadara, the capital of Perea, and one of the cities of Decapolis. A steep slope falls from the plateau to the lake at Qersa.

Gerasites. The (Jth. 5:16) = Gergeshites.

Gerizim’ (probably Arab. Jaraz, “bare,” meaning “barren places”); Garizim in 2 Mac. 5:23,6:2), the sacred mountain of the Samaritans, immediately S. of Shechem, with Ebol to its N. These two mountains were “over Jordan westwards, the way of sunset, in the land of the Canaanites who inhabit the 'Arabah opposite Gilgal, beside the oaks [A.V. plains] of Moreh” (Deut. 11:29). Jerome (Onomasticon, “Goalgol” and “Gebal”) denies that they were at Shechem, placing them near Gilgal; but Josephus admits the site at Shechem (i Ant. viii. 44), which is clearly intended in Judges (9:7). The blessings were said on Gerizim, and the curses on Ebol (Deut. 27:12); and the Samaritans claim that Joshua’s altar (Jos. 8:30-35) was on Gerizim, which they read for Ebol in Deut. 27:1. On the summit of Gerizim they show a flat rock, with a cup-hollow in it and a cistern beside it, as the site where Joshua erected the tabernacle. On the N.W. slope, at Leshi (Lv. 22), which they suppose to be Bethel, they celebrate the Passover. Gilgal they place at Jilei-jil, a ruin 2 miles E. of the mountain. The ‘Amud shrine, at the N. foot, is the site of Joshua’s stone (Jos. 24:26), and he is buried to the S. of the mountain. [Timnath-beres.] The sons of Aaron are buried on the S.E. [Gibeah of Phinehas], and Joseph on the N. The temple built before 330 B.C. (Josephus, 11 Ant. viii. 2, 6, 7; 13 Anti. i. 1) and destroyed by John Hyrcanus c. 129 B.C. (1 Wars ii. 6), was not standing in the time of our Lord (Jl. 4:20). The mountain is extremely rocky and barren, rising 2,850 ft. above the sea, and commanding extensive views E., W., and S. The ruins include those of an octagonal church built by the emperor Zeno c. 474 A.D., and of the surrounding fortress erected by Justinian c. 530 A.D., with a large reservoir. Its foundation stones are supposed to have been taken from Gilgal, according to the Samaritans, who believe that Abraham offered Isaac on the mountain top. [Morian.] For details see Survey W. Pal. ii. pp. 148-149, 188-190. [c.r.c.]

GERSONHON

Gerrhenaite, The (2 Mac. 13:24 only). From the nature of the case the Gerrhenaite must have been S. of Ptolemais. Grothius seems to have been the first to suggest the town Germon (the wall). [Sturt.] Ewald conjectures that the inhabitants of the ancient city of Gerar are meant.

Germonh, the first-born son of Moses and Zipporah. The name is explained (Ex. 2:22,18,3) as = “a stranger there,” Moses being a foreigner in Midian; “For he said, I have been a stranger [eir] in a foreign land.” As a Heb. word, its meaning is “expulsion.” The circumcision of Germon is probably related in Ex. 4:25. — 2. The form under which Gerphon, the eldest son of Levi, appears in i Chr. 6:16ff. 15:7. — 3. The representative of the priestly family of Phinehas, among those who accompanied Ezra from Babylon (Ezr. 8:2).

Germonh, the eldest of the three sons of Levi, born before the descent of Jacob’s family into Egypt (Gen. 46:11; Ex. 6:16). But the
families of Gershon were outstripped in fame by their younger brethren of Kohath, from whom sprang Moses and the priestly line of Aaron. At the census in the wilderness of Sinai (Num. 3:22), the number of the male members of the tribe of Gershon was 7,500 (Num. 3:22), midway between the Kohathites and the Merarites. The sons of Gershon had charge of the fabrics of the tabernacle — the coverings, curtains, hangings, and cords (Num. 3:25, 26, 4:25, 26). For the transport of these they had two covered wagons and four oxen (7:3, 7). In the encampment their station was behind the tabernacle, on the W. side (Num. 3:23). Thirteen of the Levitical cities fell to the lot of the Gershonites: two in Manasseh beyond Jordan, four in Issachar, four in Asher, and three in Naphtali. In the time of David (according to the Chronicler) the temple music was entrusted to the Ger-
shonite family of Asaph, the Kohathite family of Heman, and the Merarite family of Ethan or Jeduthun (1 Chr. 6:31-17, 25:1-7). At the cleansing of the temple, in the days of Hezekiah, Gershonites are named with other Levites (2 Chr. 29.12, 13), and at Josiah's national Puri-
fication (2 Chr. 35.15). Asaphites to the number of 128 (Ezr. 2:41; or 18:7, 41 returned from exile with Zerubbabel; and at the laying of the foundation of the temple Asaphites led the service of praise (Ezr. 3:10, 11).

Gershonites, The, the descendants of Gershon, son of Levi (Num. 3:21, etc.; Jos. 21:33; 1 Chr. 23:7; 2 Chr. 29.12). In the sing. it occurs in 2 Chr. 26.27 (of Laadan), 29.5 (of Jechiel).

Ger' son (יְגֵרָן, גֶּשֶׁר) = GERSHOM, 3.

Ger'zites, The, a tribe noticed with the Gershrites and the Amalekites (1 Sam. 27.8; see A.V. marg. and R.V.). The reading Ge- zrites (A.V.) appears improbable, as Gezer was N. of Beth
hath. [C.R.C.]

Gesem, Land of (גֶּשֶׁם) = GOSHEN.

Gesham' (properly Geshan, as R.V.), a son of Jahdai in the genealogy of Judah and family of Caleb (1 Chr. 2.47). For his father give Ne. (2:10, 11, 12, 6). The name of an Arab enemy of the Jews.

Geshur' (probably Arab. ḫesher, "hard and rough") Two regions are so named. — 1. Near Argob, Maccab, and Bashan (Deut. 3.14; Jos. 12.5, 13.23), a kingdom of Aram in David's time (2 Sam. 3.3, 13, 37, 38, 14.23-32, 15.8; 1 Chr. 2.23). This is probably the ḥadīr region. [Ituraea, — 2. The land of the Gershurites (1 Sam. 27.8) or Geshuri (Jos. 13.2), near Philistia and the region of the Amalekites, who dwelt S. of Beersheba, in the direction of Sūr. It was not far from the "south (negheb) of Judah" (1 Sam. 27.10), and near the Gerezites (Gezrites), or inhabitants of a "be- land region. [C.R.C.]

Geshur' and Geshurites. — 1. The inhabitants of Geshur (Deut. 3.14; Jos. 12.5, 13. 11). — 2. An ancient tribe which dwelt in the desert S. of Philistia (Jos. 13.2; 1 Sam. 27.8).

Ge'ther, the third in order of the sons of Aram (Gen. 10.23). No satisfactory trace of his exist. No town has been found.

Gethsemane (oil-press), a place mentioned by name in Mt. 26.36, Mk. 14.32 only. It was apparently on the mount of Oliv

which our Lord was wont to visit (Lk. 22.39; Jn. 8.1), and was a garden beyond the brook Kidron (or Cedron, Jn. 18.1). It may have been near Bethany. It was at the foot of Olivet in 4th cent. A.D. (Onomasta

lon), probably at the old Gk. site by the "Grotto of the Agony," immediately N. of the road from Bethany, and adjoining the church of the Virgin's tomb — built c. 1100 A.D. on the ruins of the former chapel, and containing the tomb of queen Melisinda, who died in 1167 A.D. The groto on its E. appears to have been a cistern: its rock roof was painted in fresco in the Middle Ages. The Franciscans in 1847 enclosed as the site a group of olives S. of the road. This is now a garden, with modern walls (Surv. W. Pal., Jerusalem vol., pp. 402-404. [JESUS CHRIST. ] [C.R.].

Ge'uel, the Gadite spy, son of Machi (Num. 13.15).

Ge'zer (cut off), an isolated hill (Gazer, 2 Sam. 5.25; 1 Chr. 14.16, 19, R.V. Gezer), a royal city of Canaanites, whose king Horam came to aid Japhia of Lachish against Joshua (Jos. 10. 33, 12.12). It marked the origin of the Pharaoh's camp, and was given to the Levites (Jos. 21.21; 1 Chr. 6.67), but the Canaanites still dwelt in it as tributaries (Judg. 1.29). In 1 Chr. 20.4 it stands for Gob (2 Sam. 21.18). It marked the Philistine border in Samuel's time (2 Sam. 5.25; 1 Chr. 7.28), and was not taken by David, but fought by the Pharaoh who gave it, as his daughter's dower, to Solomon, who rebuilt it (1 K. 9.15-17). As Gazar, it is said to have been fortified by Jonathan the Hasmonean c. 160 B.C. (1 Mac. 9.52); and Simon his brother made his son John Hyrcanus its ruler in 143 B.C., whereby he escaped the massacre of his father and brothers in 135 B.C. (1 Mac. 13.53, 14.7, 15.28, 35.16, 19, 21; 2 Mac. 10.32). It was known to Eusebius as 4 miles N. (actually N.W.) of Emmaus (Ἀμώας), and is now a strong site, on a hill 250 ft. above the plain, 20 miles W.N.W. of Jerusalem, still called Tell Jezer (Clermont-Ganneau). It was attacked by Saladin in 1171 and taken by the Pharaoh who gave it, as his daughter's dower, to Solomon, who rebuilt it (1 K. 9.15-17). The site of this strong fortress (see Surv. W. Pal. ii, pp. 417, 428-439) is partly occupied by the little village of Abu Shâshîeh. Wine-presses and Christian rock-cut tombs occur on the rocky hill, where M. Clermont-Ganneau found two inscriptions, cut on flat rocks, in Gk. and in square Hebrew characters. The Heb. in which case is Tâhum Gazer, "limit of Gezer," and the Gk. is Alkios — the name of a person buried near Lydda. The recent ex-
cavations at Gezer, by Mr. R. A. S. Macalister,
have disclosed remains of Canaanite origin, perhaps as old, in the lower strata, as 2000 B.C. (including seal cylinders, small idols, and pottery), with Egyptian scarabs — some belonging to the 21st dynasty. On the N.E. a row of huge monumental stones was unearthed, as at Tell es-Sáh [GATH], resembling those still standing on the surface in Moab (Surv. E. Pal. p. 187). Such a group (of three stones) is represented on a Phoenician stela from Líbybaenum, on W. coast of Sicily (Corpus Inscr. Syria, No. 135), as a worshipper before it. These sacred stones at Gezer stand on a pavement, under which was found buried a brick of pure gold worth £100. The Gezer ruins are of all ages, down to the Byzantine period and perhaps later. The town was rebuilt several times, and walled in the Gk. and in earlier ages. On the hill, where two cuneiform tablets, each dated in a year corresponding to 649 B.C., with Heb. names, proving trade relations with the Assyrians in the reign of Assur-bani-pal. He found also skeletons of babies, encased in pottery urns, which seem to have been baked afterwards, as the bones are charred. Such remains occur about Gezer, and it is suggested that the infants were so offered to Molech. Similar vases, with burnt human remains, were, however, found in 1871 by Col. Ross at Susa (Shushan). E. of the Tigris, and the charring was perhaps merely due to the baking of the vases after the remains had been burnt and incinerated. Many historian's latest discoveries (1908) include interesting tombs of women, with zodiacal signs and Egyptian scarabs.

[CR. C.]

Gezerites. [Gezerites.]

(Ghost, Holy.) [SPIRIT, HOLY.]

Giah, a place named only in 2Sam.22:23, to designate the position of the hill Ammah. The word means "bursting forth" [Ginos]. Probably a spring. [AMMATH.] [CR. C.]

Giants. [CR. C.]

Allusions to giant races of men occur very frequently (chiefly under three different names) in Holy Scripture. (1) ropháim. The first reference is under this name in Gen.6:4. The Nephilim were in the earth in those days — "after that the sons of God came in unto the daughters of men, and they bare children to them, the same were mighty men [Heb. gibbarim] which were of old, the men of renown." From this passage it has been inferred that the Nephilim represent beings similar to the Gk. and Rom. demigods, but see Sons of God. In spite of the many difficulties of this passage, it seems best to identify the Nephilim not (as some have supposed) with the "sons of God," but with their offspring. The Nephilim are again alluded to in Num.13:33. "And there we saw the Nephilim, the sons of Anak, which came of the Nephilim: and we were in our own sight as grasshoppers, and so we were in their sight." Here the spies are induced by their terror to exaggerate the stature of the Anakim whom they encountered, until they compared them actually with the Nephilim of earlier Biblical history. The "sons of god" have been variously explained as "angels," "gods," "giant men," "wise men," "potentates," "kings," "wars-hippers of false gods," "devils," "angels." (2) ananíym. The "sons of Anak" were a gigantic race of men dwelling in and around Hebron. Reference to them is found in Num.13:22, cf. 33; Deut.1:28,2:10 ff.; 9:2; Jos.11:21; 15:13 f.; Judg.1:20. A comparison of these passages suggests that Anak is not so much the name of a person as the name of the race; while Arba is apparently the name of the individual from whom their origin was commonly derived (Jos.14:15,15:13). The Anakim were akin to the Amorites and Perizites. They seem to have been a formidable race of lighters, although somewhat dull in intellect. It was this warlike appearance of the tribe that so terrified the Israelite spies (Num.13:33). In the wars that followed the death of Moses, they were driven out by Joshua, with the exception of a few who found refuge in the Philistine cities of Ashdod, Gath, and Gaza (Jos.11:21,22). Possibly the stature of Goliath may be due to the surviving stock of the sons of Anak among the Philistines. (3) rophá'îm. The earliest mention of this class of giants is in Gen.14:5, where it is stated that Chedorlomer and his confederates "smote Kephaim." Originally, as it would seem, the name of a district (the vale of Kephaim, near Jerusalem), the name of a people ("the great men of Kephaim"), or the inhabitants of the region. They are mentioned again in Gen.15:20, Deut.2:10,20; and the survivors of the stock are represented in G6, the gigantic king of Bashan (Deut.3:11; Jos.12:4,13,12, 17,15). Like the Anakim, to whom they were probably akin, they found refuge with the Philistines, and were incorporated with them (see 2Sam.21:18, K.V. marg.; 1Chr.20:4). Among other races of giants, the Gibbarim (Heb. mighty men) have been in this article identified with the Nephilim (Gen.14:5; see above). The Enum (Heb. haughty men), occupying the country held later by the Moabites, and the Zuazim (14:5), who occupied the town of Ham, between Arnon and the Jabbok, were probably simply divisions of the Kephaim. [EMMUS; ZUSIMS.] [T.A.M.]

Gibbar. Bene-Gibbar, to the number of 95, returned with Zerubbabel from Babylon (Ezr.2:29).[CR. C.]

Gideon [Gib], a town of Dan (Jos.19:44), given with its "suburbs" to the Kohathite Levites (21:23). It was near Philistia (1K.15:27,16:17,15,17), probably at the present village Qibbiyyeh, 6 miles E. of Lydda. [CR. C.]

Gibeon. Sheva, "the father of Machbenah," and "father of Gibeon," is mentioned with his names unmistakably those of places and not persons among the descendants of Judah (1Chr.2:49). Probably the word is a later spelling for Gibeath, 1. of Judah. [CR. C.]

Gibeath [hill].—1. A town in the mountains of Judah, now Jeb'a, a village 11 miles S.W. of Jerusalem, and 2 miles S.E. of Timnah (Filbam), with which it is noticed (Jos.15:57); probably Geba (2Sam.5:25).—2. Gibeon of Benjamin, near Ramah (Judg.19:12, 13,16), where the Benjamites were exterminated (20:4-13). It had a cave (ver. 33; Heb. Geba), and two roads led (ver. 31), one to Bethau (see K.V. and one to "Gibeath" by the plain) "(A.V. field). These notices clearly refer to Jeb'a [Geba], and to the Sahel Jeb'a, or "plain of Geba," a small plateau to S.E. of the knoll on which the village stands. "Geba was a priest's city" (Jos.21:17), which was why
GIDEON OF PHINEHAS

the Levite on this occasion sought lodging at it (cf. Ezel); and Gibeath of the Elohim, Saul’s home, was inhabited by a band of prophets (1Sam.10.5,10). It came to be known as Gibeath of Saul (10.26,11.4,13.19,28.1), as if at that place Saul was named (13.19,15), and was close to Ramah (22.6). The word, however, sometimes applies to the district round the town. Thus Saul abode “in the end of Gibeath, under a pomegranate in Migron” (the precipice, 14.2), his watchmen being in the city (ver. 16); and again, at Gibeath, under the ramah” (22.6); also in 1Jos.10.20, where Gibeath and Gebur occur together with Ramah and Michmash. The Philistines’ “post” was here smitten by Jonathan (1Sam.13.3), and is noticed in Gibeath earlier (10.5). See also 1Sam.15.34; 2Sam.21.6,23.25; 1Chr.11.31; 2Chr.13.2; Ho.5.8 (coupled with Ramah), 9.9,10.9. Josephus and a Greek of Saul close to Movroud to 3 Wars ii. 1. [BOZEL].

Gibeath of Phinehas’ (Jos.24.33; A.V. hill; cf. R.V. marg.), a place in mount Ephraim where Eleazar son of Aaron was buried. The Samaritan Chronicle (Neubauer, Journal Asiatique, Dec. 1869, p. 450) places this tomb at Kefta, a place often mentioned in Samaritan literature. (See Surv. W. Pal. ii. pp.219,288,303-305, “Special Papers,” p.227.) These tombs of Eleazar, Phinehas, Abishua, and Ithamar are still shown at ‘Avertah, a village E. of Gerizim, and 4 miles S. of Shechem, within the border of Ephraim. [C.R.C.]

A Philistine town (noted with Qepheus [cf. Neubauer, Surv. Pal.], with Gibeath, Qebron, and Beth-Lehem [18.25] as given to Benjamin. Joshua, in the plain between Makkedah and Ajalon (10.12), commands the sun to be dumbed or “dark”) as it rises behind Gibeath. Gibeath was a city of priests (21.17), to whom the deceitful Hivites were made subject (9.25). It has been identified with a spring in a cave of Jib, the recognized site, 6 miles N.W. of Jerusalem (2Sam.2.13.16). The occasion on which “Saul slew the Gibeonites” (2Sam.21.1-9) is not recorded, unless the reference is to Nob, a priestly city where the tabernacle was in Saul’s time (1Sam.21.1-9), and where the priests were slain by him (22.19).

From Nob the Gibeonites was roused to war by Gideon—perhaps not far off—where was a great bāmād, and where also the altar was kept in Solomon’s time (1K.3.4,5,9,2; 1Ch.16.39,21.29; 2Ch.1.3,13). Isaiah refers to Joshua in the valley “by Gibeon” (Heb. ‘emeq bēgībōn, 28.21), and Jeremiah to a prophet from Gibeon (51.24). It was harbered after the Captivity (Ne.3.7,7,25). It is mentioned by Shishak, the Pharaoh who attacked Judæa after Solomon’s death, in his list of conquests, as Kebe’ana (No. 23). The old town stood S. of the village, on a hill 300 ft. high. Eight springs flow from this hill. The cave spring E. has at the back a rock passage, which led up into the city. There is a small plain to S., and rock tombs (Surv. W. Pal. iii. pp.10,94-100). [C.R.C.]

Giblites, The. The “land of the Giblites” is mentioned in connexion with Lebanon among the portions of the Promised Land not conquered by Joshua (15.3). There is no doubt that the allusion is to the inhabitants of the city Gebal (cf. R.V.).

Giddalti, a temple-musician, one of the 14 sons of Heman, the king’s seer (1Chr.25.4).

Giddel. Children of Giddel were among (1) the Nethinim (Ezr.2.17; Ne.7.49), (2) the servants of Solomon (1K.4.20), and (3) the Nethinim who returned from captivity with Zerubbabel.

Gideon (the herew), also JERUBBAAL (Baal defends; Judg.6.22, merely popular etymology), also JERUBBESETH (2Sam.11.21; cf. Ishbaal and Ishboseth), son of Joash, the Abiezerite (Jo.17.2) of Manasseh, who dwelt at Ophrah. From the narrative of Josh.7.18ff. it is evident that 6.15 is an Orientalism, not to be taken literally. See regards Joash as in some sense a king (Early Hist. of Heb.).—The Midianite Oppression. Stanley (Sin. and Pal. p.136) writes: “Palestine is an island in a desert of waste; and from this very fact it is also an island of high point to point. The Bedouin tribes are the oarsmen of the wilderness; the plains which run into the mountains are the creeks into which they naturally penetrate.” Midian (Ismael.8.24), Amalek, and the children of the E. (bînê qedhem, from the Syrian desert) had swept up the plain of Esraelon, and down the maritime plain to Gaza. The Bedouin locusts for multitude like locusts they ate up the crops. After seven incursions, resistance seemed useless. Gideon’s brothers had been murdered at Tabor; the people fled to mountain fastnesses. Even Gideon, the mighty hero (6.12), beats out wheat in the winepress. (Thrashing floors were on the tops of hills.) A prophet had merely reminded the people of past deliverances, and Gideon in despair asks. “Where be all His wondrous works?”—The Preparation of Gideon. (a) A theophany beneath the terebinth, attested by the fire that consumes the offering, is Gideon’s commission. (b) A dream. In the first revelation of Gideon, the second He called on Gideon to acknowledge Him” (Keil). (c) Gideon destroys the altar of Baal, with its idolatrous Asherah. (Note 6.25, R.V. marg. Apparently there were two bullocks, and the one sacrificed probably belonged to Gideon [Bertheau]. Moore says, “text corrupt,” and translates according.”) Gideon’s life saved by the will of Joash. “In popular outbreaks, procrastination means security” (Farrar). W. R. Smith (Relig. of Sem. 163) translates 6.31, “The man who strives with Baal dies before the morning.” See his comment. (e) The Spirit of the Lord (cf. 3.10) comes on Gideon. He raises Manasseh, Asher, Zebulun, and Naphtali, but not Issachar, which was probably too down-trodden. (f) Note that it is when full of enthusiasm, inspired by God, that he tries the Spirit by asking two signs. The first was not conclusive, for wool attracts dew. For the spiritual significance, see St. Elsew. De Spir. Sanct. 1.24. (g) The Preparation of the Army at the well Harod. (See G. A. Smith,
HIST. GÉN. p. 398.) Gideon commands those afraid to depart; 22,000 do so. (The word "depart from Mount Gilgal" were probably proverbial in the tribe of Manasseh, but "depart" in Heb. is a hapax legomenon of uncertain meaning.) He takes 10,000 to the stream, and all but 300 are rejected for not lapping water. The text is here difficult; but if the stream was the front of their position, and the margins were covered with reeds and bushes, circumspection was necessary against surprise. 7.8 (K.V. marg.) explains the number of horns.

—Gideon’s Reconnaissance, 7.9-14. He overears the Midianite’s dream, and regards it as an omen (bath-pol.; cf. 1Sam.14.9,10). The tent is everything to a nomad, the barley-cake represents the husbandman. “We are probably to imagine a round, flat, hardbaked ash-cake tumbling through the camp till it strikes the tent, and turns it upside down” (Moore).—The Attack. While the watch is being changed, the three companies take up their position unnoticed. They shatter their pitchers, display their torches, and blow on their horns. Critics object that the torches hid in pitchers required two hands. The horns, however, may well have been slung at their backs until wanted. The host fled down Jezreel to Beth-shittah, unto the lip of Abel-meholah. Naftali, Naphtali, and Manasseth, joined the pursuit. 7.23 is not inconsistent with 6.35. The dismissed forces were not far distant. Those afraid to attack were ready to pursue and spoil. The Midianites divided at Jordan. Zebah and Zalmunna apparently crossed near Beth-shan. Gideon and Zebah fled down the Ghor, to be intercepted by Ephraim at Bethbarah. Ephraim’s expedition probably took place the other side of Jordan, but before the second victory. It is absurd to argue that the narrative is contradicted from Gideon’s diplomatic words, minimizing his action. It is also quite madmissible to argue that 8.4-21 refers to another event. The compiler is deliberately here using another authority. Suceorin and Piuel refused succour, and were put to the ban. Zebah and Zalmunna fled S.E., and reached Karkor. Gideon outflanked them, and surprised them once again by attacking them when in fancied security. On his return he “taught” Shechem and Peniel, and slew the kings Zebah and Zalmunna.—Subsequent Life. Kingship was offered to him and his family, and refused. Gideon was anxious that Jehovah alone should rule; but out of the spoils he created an epsilon, apparently expecting divine guidance by means of it. This act was sacrificial; but Shiloh was in Ephraim, and perhaps a decayed sanctuary. Gideon could argue that God had entered into direct communication with himself, and that Ophrah had been consecrated by a theophany. (See EYLON, Robertson, Early Rel. of Isr. 213; Oehler, Itd. of O. L. n. 134.) That Gideon had many wives and 70 sons is evidence of his wealth and power. He died at a good old age, and was buried in the tomb of Joash, his father.[MIDIANITES.][H.M.S.] GIDEON, the father of Aman (Num.11.1, etc.).

Gideon (cutting down, or cutting off; Judg. 20.15.) It may refer to some precipice, or merely mean “till cut off”—of the defeated Benjamites. [C.R.C.]

Gier-eagle, an uncet bird mentioned in Lev.11.18 and Deut.14.17. There is good reason to believe that the Heb. rāhām, translated gier-eagle in the A.V., is identical with rakhma, fem. rakim, the Arab. name for the black and white Egyptian scavenger-vulture (Neophron percnopterus). These useful, although disgusting, birds are very common in Africa, Syria, and India, and are never molested by the natives, who are well aware of their value. [VULTURE.][H.].

Gift. The giving and receiving of presents is a formal and significant proceeding among Orientals; and a proof of the important part which presents play in their social life may be found in the fact that there are 15 expressions in Heb. for the one idea. Many of these have specific meanings. E.g. milud applies to a present from an inferior to a superior, as from subjects to a king (Judg.3.15; 1K.10.25); hence it is used technically for the “meal-offering” (Ezk.46.20, etc.). ma’rach expresses conversely a present from a superior to an inferior—e.g. Esth.5.11. shubhah is a gift or bribe for the purpose of escaping punishment, presented either to a judge (Ex.23.8, etc.) or a conqueror (2K.16.8). Again, the term “gift” is frequently used for “tribute” or “fee”; and hence the expression “to bring presents” = to own submission (Ps.68.20; 76.11; 18.17). Friends brought presents to friends on any joyful occasion (Esth.9.16,22); those who asked information or advice to those who gave it (2K.8.8); the needy to the wealthy from whom assistance was expected (Gen.43.11; 2K.15.19, etc.). On the occasion of a marriage, the bridegroom not only paid the parents for his bride (A.V. dowry), but also gave the bride certain presents (Gen.34.12; cf. 24.22). The nature of the presents was as various as the occasions. Frequently gifts were (and still are) demanded as a right; and in sending presents to others, a quid pro quo was generally expected in return. In N.T. δοτημα and δωρα—“material,” and δωρα “spiritual gifts.” On Agapygast see CHURCH; and see CORBAN for Mt.
Gilion' (gushing).—1. The name of a river (Gen.2:13) watering Cush, and rising near the springs of the Euphrates. The Babylonians called Cappadocia Kussu (i.e. "sunset") or the West) and the river intended may be the Hablu or other river of Gilgam having N. W. and S.W. respectively from E. Cappadocia. The latter is the later Pyramus. —2. A spring at Jerusalem, to which Solomon was brought "down to be anointed" (1K.1:33; 38:15). Hezekiah stopped "the upper source [moa'] A.V. water course of Gilon, and brought it down W. and towards the foot of David's Wall in the W." (2Chr.22:30). In the Siloam text, the moa' is the source whence the aqueduct was excavated to the pool (brēkhā) at Siloam.

Manasseh built a wall "outside the city of David, westward of Gilion in the nahal." (2Chr.33:14). It is clear that Gilon was the cave-spring which was given its name by the second ruler at "Ai" Unam ed Deraj (the spring of steps) in the nahal, a term always meaning the KIDRON [see VALLEYS]. The mouth is now stopped, and—since 728 b.c.—the water has always flowed down the SiILOAH aqueduct from the back of the cave. Solomon at Gilon was thus in full view of Adoni'jah at the stone (or rock) of AINPLET (1K.1:9), which was by EX-ROGEL. [c.r.c.]

Gililai', one of the priests' sons at the consecration of the wall of Jerusalem (Ne.12:36).

Giliba, the mountain range E. of the plain of Esdraelon, rising to the highest at 1,650 ft. above the sea, or 1,400 above the plain W., and toward the foot of David's Wall in the W. It was named from the "bubbling source" at the village of Gilboa (now Jelbon), near S. end of the range, where there is a perennial spring-well. The mountain itself is very bare, but once had vines at JIZAREL on its N.W. slopes. It is noticed exclusively as the "stone" of Gilboa, the two synonyms being at JIZAREL (1Sam.29:1). See 1Sam.25:4; 31:8; 2Sam.1:6; 21:12; 1Chr.10:1. [c.r.c.]

Gilead, with the article in Heb., "the stony" region; not connected with Galed (Gen.31:47), the "heap of witness." The mountain plateau E. of Jordan, about 3,000 ft. above the sea, can be clearly seen from Osk'a (3,597 ft.). Gilead extends 60 miles N. and S. from the Yarmūk River to the plain N. of Heshbon, and about 20 from Jordan to the E. desert. The W. slopes are very steep, formed of sandstone below and limestone above. It is well watered by springs on the streams of the region, which divide into two provinces by the JABBOK, which runs first N.E. from RABBATH-AMMON, then W. to Jordan. The N. region is now JEBEL 'AJLUN; the S. is the Belqa' (empty). All Gilead is rocky, but the 'Ajlun as far S. as Şāf and Reimūn is covered by oak forests, with flowery glades, and brooks haunted by the roe. The Belqa' is bare, with some copses and to the S. a wood of firs (Pinus carica). The region was famed for its balm (Gen.37:25; Je.8:22, 46:11) and for pasture. It still supports flocks and herds. The capital of N. Gilead was RAMOTH (Reimūn; see 1K.4:13), and of S. Gilead MAHANAIM (Mukhinnah), S. of the river JABBOK (Gen.32:2, 22), Succoth (Tell Dar'a) being N. of this stream (Gen.33:17). W. Gilead and the Jordan Valley to the river belonged to Gad; E. Gilead to Manasseh and to the Ammonites (Jos.12:2, 5, 13:30, 31). The towns of Gilead included Tob (Tayyibeh), Mizpeh (Şāf), ZAPHON (el Hammeh) in the N., and JESHER (Jebeshah) in the S. Jazer (1Chr.26:31) being on the S. border [TAZER]; in the valley Beth-haran (Rāmekh) [BETH-ARAM] and BETH-NIMRAH (Ninmīr) in S., and SUCCOTH just N. of the Jabbok River. The N. course of the latter separated Gad from the Ammonites on the E. —Historical. The original ZAMZUMMIM (Deut.5:20) preceded the Amorites, and the Amorites who conquered Gilead shortly before the Hebrew conquest. In the 9th cent. B.C. Hazael of Syria smote this region (2K.10:33) and in 734 B.C. Tiglath-pileser III. took captive the tribes of Israel (2K.15:29). Idolatrous worship then prevailed (Hos.12:1). Towards the end of the 7th century, Arab invasion had Extended to Bashan but the Assyrian king Assur-bani-pal recovered Gilead a few years later, though the population remained Arab in subsequent times (1Mac.5:25). Gilead is also a patronymic (Num.26:29:30; Judg.11:12), "the father of Gilead" (1Chr.7:14) meaning the ancestor of Gileadites. [c.r.c.]

Gilead, Mount (Judg.7:3), seems to stand for GILBOA, but R.V. understands "go round about" (marg.) instead of "depart from." [GIDEON].

Gileadites, The, a branch of the tribe of Manasseh, inhabiting Gilead (Num.26:29; 2K.15:25). There appears to have been an old-standing feud between them and the Ephraimites, who taunted them with being deserters (Judg.12:4). Jair (Judg.10:3) is described as "the Gileadite:" as also Jephthah (11:1) and Barzillai of Rogelim (2Sam.17:27).

Gilegal (circle).—1. A place E. of Jericho, where the twelve stones from Jordan were collected, probably at the caravanserai (1K.4:11; Jos.4:15, 5:10, 6:10, 7:7). In Jos.10:15 the LX. omits the return of Israel to Gilegal, which seems to be a repetition of 10:43, and which intercepts the narrative (see 14:6). It lay N. of the valley of ACIOR (15:7), which was the border between Judah and Benjamin. Jezreel is now reached by the valley of Gilegal and of a tank, beside a fine tamarisk, at JILITTEH, 3 miles E. of the old Jericho (Tell es-Sultan), and on the N. side of Wady Qelt. [ACIOR.] Gilegal remained a sacred centre till the building of the Jerusalem temple. The quarries [p'šilim] which were by [i.e. belonged to] Gilegal (Judg.19:26) are described as wise "images" in marg. and so in 21 other passages. Samuel visited Gilegal as a sacred centre (1Sam.7:16), and here the kingdom was "newly" (11, 14, 15) after Saul's first victory. Here also the rejection of Saul occurred (13:4, 15:12-23). Henceforth it is noticed only when David passed over Jordan (2Sam.19:15, 40), and by the early prophets as the centre of worship and sacrifice which had become idolatrous (Hos.4:15, 9, 15:12; Am.4:1, 5). Micah, referring to Balaam, says "that ye may know from Shittim to Gilegal" (6.5).—2. A place in the mountains, whence Elijah "went down" to reach BETHEL (1K.2:1); now the village
GILOH, 7 miles N. of Beith, with a valley between. It stands on a high hill. It appears to have been called in Ne. 12.29 ("home of Gilgal"), noticed with Gerah, and is probably GAGALA, on the way from N. to Jerusalem (1Mac.9.2) — 3. "Gilgal of the nations" (goyim) was a royal city, noticed with Dor (Jos.12.23). It is now the village Jifiiljih, in the Sharon plain, 4 miles N. of Antipatris. For the Samaritan Gilgal, which does not agree with O.T. notices, see GERIZIM. [c.r.c.]

Giloh', a city in the Hebron mountains, given to Judah (Jos.15.51); now probably the ruin Jala, 3 miles N. of Halil. It was the home of Ahithophel (2Sam.15.23; 23.34). [c.r.c.]

Gilione, Thé, native of Giloh; applied to Ahithophel only (2Sam.15.23; 23.34). [c.r.c.]

Gimzo', a town which, with its villages, was taken by the Philistines in the reign of Ahaz (2Chr.28.18). The name (Jimzu) is still attached to a large village 3 miles S.E. of Lydda, S. of the road from Lydda to Jerusalem. [Gin, a trap for birds or beasts: it consisted of a net (Is.8.14), and a stick to act as a spring (Am.3.5).]

Ginath', father of Tibbon (1K.16.21,22).

Ginnetho', N. of 12.4 or Gin'nethon (10.6,12.16), a priest who sealed the covenant with Nechoiah.

Girdle (hāghōr, 'ēşār), worn both by men and women. The common girdle worn by men was the abstract, (K.1.1), the leather girdle, like that worn by the Bedouin of the present day. A finer girdle was made of linen (Is.13.1; Ezk.16.10), embroidered with silk, and sometimes with gold and silver thread (Dan.10.5; Rev.1.13,15.6). The manufacture of these formed part of the employment of women (Pr.31.24). They probably resembled the Arab, ḫāsām, or waist-shawl, and were worn by men about the loins (Is.5.27,11.5). The girdle of women was generally broader, and was worn above the hips, except when they were actively engaged (Pr.31.17). The military girdle was worn about the waist; the sword of David was kept in it (1Sam.30.8; Ps.45.3). Hence girding up the loins denotes preparation for battle or for active exertion. In times of mourning, girdles of sackcloth were worn as marks of humiliation and sorrow (Is.3.2; 21.12). Girdles were used as pockets, as among the Arabs still, and as purses, one end of the girdle being folded back for the purpose (Mt.10.9; Mk.6.8). The 'abkhēl, or girdle worn by the priests about the close-fitting gown (Ex.28.39,39.29), is described by Josephus as made of linen so fine of texture as to look like the slough of a snake, and embroidered with flowers of scarlet, purple, blue, and fine linen. It was about four fingers broad, and was wrapped several times round the priest's body, the ends hanging down to the feet. The "curious girdle" (Ex.28.8) was of the same materials and colours as the ephod—that is, of "gold, blue, and purple, and scarlet, and fine twined linen." Josephus describes it as worn to the breastplate. After passing once round it was tied in front upon the seam, the ends hanging down.

Girgasites, The (Gen.15.21; Deut.7.1; Jos.3.10,23.11; 1Chr.1.14; Ne.9.8). Girgasite, The (Gen.10.16), one of the nations in possession of Canaan before the entrance of the children of Israel.

Gispa', an overseer of the Nethinim, in the "Ophiel," after the return from captivity (Ne.11.21).

Gittah-hepher. [Gath-hepher.]

Gittal'm, a place apparently in the lot of Benjamin (Ne.11.33), to which the Benjamites fled from Beeroth (2Sam.4.3). The site is unknown. [c.r.c.]

Gittites, the 600 men who followed David from Gath, under Ittai the Gittite (2Sam.15.18,19), and who probably acted as a body-guard. Obed-edom "the Gittite" may have been so named from the town of Gittaim in Benjamin (2Sam.4.3; Ne.11.33), or from Gath-rimmon. [Gittah. [Psalms, Titles of.]

Giz'zonite, Thé. The sons of Hashem the Gizzonite are named amongst the warriors of David's guard (1Chr.11.34). [Jashes.]

Glass. The Heb. word (z̄hukkîḥōh) occurs only in Job 28.17, where A.V. renders it "crystal." This seems to be the only allusion to glass in the O.T. (See Glass.)

It was not manufactured in the Hebrew land, either as a part of the invention, which, from paintings representing the process of glass-blowing discovered at Beni-Hasan, and in tombs at other places, we know to be at least as old as the time of Osirisaten I., c. 2200 B.C. Fragments, too, of wine vases as old as the Exodus have been discovered in Egypt. The art was known to the ancient Babylonians. Glass was even far more extensively used in ancient than in modern times. The Egyptians knew the arts of cutting, grinding, and engraving it, and could infay it with gold or enamel, and "permeate opaque glass with designs of various colours." They could also colour it so brilliantly as to imitate precious stones, so as often to defy detection. In N.T. glass is alluded to as an emblem of brightness (Rev.4.6,15.2,21,18).

[Handicrafts, 5.]

Gleaning. (See Corner.) The gleaning of fruit trees, as well as of cornfields, was reserved for the poor. (Deut.16.13; 23.15.)

Glede (or, Glead), one of the English names of the kite (Milvus citatus), employed in Deut.14.13, among the unclean birds of prey, as the equivalent of the Heb. râ'd. The translators of A.V. apparently distinguish between kite and glede; and Tristram has suggested that by the latter they mean the black kite, which he states to be called glede in the N. of England and Ireland. The present writer cannot, although both species used to be known locally as pettock, find any confirmation of the latter statement; and even if true, it would by no means prove that buzzard is the correct translation of râ'd. [k.1.]

Glory, or Shechinah. The word Shechinh (derived from the verb shekhîn, "to rest," or "dwell"; from which also comes the word for "tabernacle") is not found in the Bible. It was used by the later Jews to express the visible splendour of the Divine Presence, especially when "resting," or "dwelling," between the cherubim on the mercy-seat, in the tabernacle or in Solomon's temple. It was supposed to be wanting in the second temple, being one of the five particulars in which the Jews counted this to be deficient, though they confidently expected its return in the days of the
Gnostic. He practised magical arts, and was called the "Great Power of God," (2) The word γωνός, which in N.T. generally implies a "deep knowledge of spiritual things," is used in rCor.8.3 in a bad sense by St. Paul, who contrasts it with γνῶσις. "Knowledge is pitiful, but love edifieth." (3) In Col. passim a heresy is attacked which combined asceticism, scrupulousness regarding seasons, etc., with angel-worship and a wrong conception of the person of Christ. (4) In the Pastoral Epistles we come still nearer to the Gnostic idea. Here we see a "different spirit," a "false Messiah," consisting of fables, endless genealogies (1Tim. 1.1), foolish questionings, strifes and "fightings about the law" (Tit.3.9). It forbade to marry, and commanded to abstain from meats (1Tim. 4.3), and is described as "profane babblings" and "oppositions of knowledge [A.V. science] falsely so-called" (1Tim.6.20). (5) 1Jn.4.1-4 combats a form of Doceticism which denied that Jesus Christ had come in the flesh. (6) 1J. 4.7,10,19 and 2Pe.2.10,21 contain a polemic against certain Antinomians, which might refer to those Gnostics who showed their contempt for matter by wallowing in sin with the body, and claiming to keep the mind pure. (7) The Apocalypse contains references to certain Nicolaitanæs who knew the "deep things of Satan"—a phrase which has a Gnostic ring (Rev.2.6,15,20,24). A theory which flourished for some time made all these passages refer to heresies of the 2nd ct., and found in them signs of the late date of the N.T. writings. This theory is based on the generality of the developed Gnostic heresies of the 2nd ct. presuppose the N.T. All that may safely be said is, that while Gnosticism cannot be definitely found in N.T., there are signs of the tendencies out of which it grew. 

Mansel, Gnostic Heresies; Hort, Judaistic Christianity; Lightfoot on the Colossian Heresy; also art. in Hastings, D. B. (5 vols. 1904). [S.S.M.]

Goat. (1) A.V. so renders Heb. maldad habbaqdr, meaning something to "teach an ox" (Judg.3.31 only). The LXX. understands a ploughshare to have been the weapon. It is perhaps connected with the Akkadian lam-a-du, "the mule's ploughshare," but not certain. (2) [Hirz. dharah], (5) a harrow, "sharp instrument," probably of iron. [Shamgar.] The LXX. understands "sickle" in 1Sam.13.21, and "goat" in Ec.12.11. It possibly means a "sharp" instrument (Arab. dharab). The ordinary ox-goat in Palestine is a long stick with a pointed iron shoe. [C.R.]

Goat. Of the Heb. words translated goat and she-goat in A.V. the most common is ἄρτ, which denotes either sex. All the other words, with two exceptions, denote the he-goat. These are yêlêl, pl. yêlîm, "wild goats" (1Sam.24.2; Job 39.1; Ps.104.18), and ἀγγός, rendered "wild goat" in Deut.14.5. There are several breeds of domesticated goat (Capra hircus), the present day in Palestine and Syria, but whether they are identical with those reared by the ancient Hebrews is impossible to say. Among these are the long-eared Syrian goat and the Angora goat, with fine long hair. yêlê denotes, in all probability, the beden (Capra ibex nigra), a species of the ibex common to the mountains of the Sinai.
GOATH

peninsula, Arabia, and N. Africa. It differs markedly from the European ibex by the narrow front surface of the horns of the bucks,

thereby approaching the pasang, or wild goat (Capra hircus aegagrus) of mount Ararat, the Taurus range, Persia, etc. 'appid, which occurs only in Deut.14.5, is likewise translated "wild goat"; not improbably it is a synonym of yabh, as the ancient Jews are scarcely likely to have been acquainted with the pasang. For the use of the word sa'ir, pl. sa'irim, which often means he-goats, see SATyr. [k.r.t.]

Goath, a place near Jerusalem, named with the hill Gareb (Je.31.39 only). The Peshitta Syriac reads Gilgah (see R.V.).

Gob (pit; 2Sam.21.18,19), an unknown Philistine town. In 1Chr.20.4, Gezer stands instead. The LXX. (Vat. MS.) reads Gath in the first-quoted verse, and Rom in the second, but Gezer in the third, which is perhaps the true reading. [C.R.C.]

Goblet (Heb. 'aggāh), a circular vessel for liquor (Gen.7.2). Translated "basons" (Ex.24.6) and "cups" (Is.22.24).

God. I. The Teaching of O.T. The Jewish and Christian conceptions of God rise out of the common basis of Semitic religion by a process of gradual elevation and purification. In the oldest Pentateuchal documents, dating from the earlier or middle period of the monarchy, we still have strongly marked the tendency to associate the presence of God with certain prominent natural objects, such as trees (Gen.13.18, R.V., 18.1; R.V., 35.4; Jos.24.26, etc.), springs (Gen.16.14, 21.30-33; Ex.17.1ff.; Num.20.1ff.), stones (esp. Gen.28.11, 18, 22; cf. Is.57.6), hill-tops or "high places" (Is.9.13, 10.5; 1K.3.2, 3; cf. Deut.12.2). Probably many of the sites thus regarded as sacred were ancient Canaanite sanctuaries which Israel took over. The natural phenomenon which they themselves most habitually associated with Godhead was the storm, with its accompaniments of thunder, lightning, and earthquake (Ps.18.7-15, etc.). It is not easy to define the exact nature of this association, because the Hebrew had not yet begun to reflect upon it; the storm brought God to his mind as though He were locally present. That his ideas should be strongly anthropomorphic was also quite inevitable (Gen.3.8, 8-11, 15, etc.); he had no higher analogy than himself to apply to the Power outside himself. The characteristic Heb. name for God is Jēhova (yhwē), the original signification of which is still much debated (see Driver, Gen. pp. 407 ff.). As to its history, the early documents (for nomenclature, see PENTATEUCH) differ: J throws it back to the beginning of the human race (Gen.4.26); E regards it as the subject of a special revelation to Moses (Ex.3.13,14; cf. 6.2, 3); the name also appears among the Midianites or Kenites (Ex.18.8-12, cf. with Judg.1:16, 11). In any case it was under this Name that Moses carried on his great work, binding the people to Jehovah as their God, and bringing home to them that they were in a special sense His people. This reciprocal relation became the fundamental fact of Israel's subsequent history. It is connected with a great act of deliverance, and is conceived of under the form of a "covenant" (Ex.34.4-8), in which, however, the divine choice of Israel preponderates: it was Jehovah who chose Israel, and not Israel Jehovah; the covenant is a διαθήκη, not a συνθήκη. This divine act is the starting-point of the history of Israel as a nation; what remained was to work out the implications contained in it. The first requisite was to bring about a complete loyalty of Israel to its God. This end was only attained after a long and obstinate struggle, extending over the whole period of Israel's independence. When Israel entered Canaan, it found the inhabitants in possession of a higher and more sedentary civilization than they knew. The people very largely gave way to the idolatrous and immoral Baal-worship of the Canaanite tribes and their Phoenician neighbours. Against this the prophets of Jehovah contended strenuously, and at last with success. The exiles who returned under the edict of Cyrus (538 B.C.) found no enthusiasm for the exhortations of its religious leaders, and idolatry was at last effectively suppressed. In the course of this history, as the horizon of Israel widened, the conception of God widened with it. It became at once loftier and more comprehensive (Ps.89.1, 93.1-2, 95.3-5, 97.1-2, 9.135.5-6; Is.37.16, 40.1ff.), and also more exclusive (Ex.34.4-6; Jud.4:24,6.14,15, 32.16-22; Is.42.8, etc.). The great prophet of the Exile whose writings are broadest up with Isaiah's pours scorn upon the idols of the heathen (Is.44.9-20, 57.3-13; cf. Ps.115.4-8, 15.15-18, etc.), which by degrees come to be treated, as having no real existence. Thus monotheism, or the worship of a single God, becomes monotheistic, or the more explicit repudiation of all gods but this one (Deut.6.4; Zech.14.9). As the conception of this one God becomes loftier it also becomes purer. The old materialisms and anthropomorphisms are stripped away. A distinction is drawn
between the essential being of God and His manifestations by the help of such conceptions as the "angel of Jehovah" (Gen. 16:7-11, 22; 19:16; 24:2, 11, 13, 27, etc.) or "the Servant of Jehovah" (Ex. 33:14; Deut. 4:37; Is. 63:9), the "glory of Jehovah" (Ex. 40:34, 35; 1 K. 8:11, etc.), and - still more spiritual - "the name of Jehovah," a very pregnant expression in O.T. (Ps. 20:1, 44, 8, etc.). The idea of holiness, which at first is physical, becomes more and more spiritual, and is the work of the writing prophets and Deut., and constitutes the most marked superiority of the religion of Israel over all other ancient religions. Here again there is a natural growth; with the improved conceptions of morals generally, the essentially moral character of God is glorified; and the discipline was complete. Israel would be restored to God's favour and the age of paradise would return (Is. 11:1-9).

One was fee, and yet it is not wholly eradicated from Judaism - is the belief in the special privilege of Israel, considered primarily and mainly as privilege, and not as a condition. In this call He is still upheld in an early date, the prophets corrected this delusion: "You only have I known of all the families of the earth; therefore I will visit upon you all your iniquities" (Am. 3:2).

The prophets preached a coming judgment, a great "day of the Lord;" and it is true that this judgment was meant in the first instance for the enemies and oppressors of Israel, to rebuke the balance of fortune that had weighed down so hardly against them. But it had also another side: it was to be at the same time a purifying judgment for Israel itself, to purge away its dross and take away all its tin (Is. 1:25). Then, beyond the judgment, when the double process of breaking and making was complete, Israel would be restored to God's favour and the age of paradise would return (Is. 11:1-9).

This was the hope which buoyed up the nation in its troubles and gave a tinge of idealism to its outlook. At its head was to be the old Davidic monarchy, continued or revived (Mt. 1.1-12; 2.1-6; Lk. 1.32, 33). It was defined by such conceptions as "the King," "the Servant of Jehovah," etc., and the Lord in O.T. was conceived as a king - both divine and human - a king whom Israel was to receive (Is. 9:1-7; cf. Ps. 2.2; 89:28ff.; cf. Mk. 1.1, 25, 35-37 and parallels), and with attributes higher than those of David (Is. 9:1-7). The expectation of this coming King was a living expectation and had a definite form (esp. Ps. Sol. 17:3, 5-7; written about 60-40 B.C.). Round this faith as a nucleus there gathered a number of other beliefs, which all tended to the same effect. It was characteristic of the teachers of Israel to pass with great ease from the collective idea to the personal, and from the personal back again to the collective. It should be remembered that the philosophical notion of personality did not yet exist, and there was no word for it; also that the primitive unit was the family tribe or nation rather than the individual. Accordingly we find the idea of divine sonship at one time applied to the nation, at another to the individual. It should be noted that the Davidic king (2 Sam. 7:14), who, as we should say, represents the nation; and there is a great tendency for the two ideas to coalesce (esp. Ps. 89:27 ff.). In like manner, the remarkable conception of the Servant of Jehovah in Is. 42:1 stands indeed for Israel as a people, but for the people personified as if it were in an individual, as if the suffering of the Son of God was the suffering of Israel, so Israel labouring and suffering on behalf of the other nations, towards whom it discharged the functions of a prophet; and the prophets were in a special sense "men of God" or "servants of Jehovah." - II. The Teaching of the Gospels. There had thus grown up a group of ideal conceptions, which, though distinct in their origin, were allied in their general purpose. These conceptions were, as it were, waiting to be brought and fused together in a single figure, which was to be itself also the embodiment of an ideal. So, when our Lord became incarnate upon earth and began to preach the Gospel mission, He, first of all, disposed and selected these conceptions, and took them to Himself. They expressed so many different functions or aspects of His mission. He was at once David's Son and David's Lord. He was the ideal King (though not as the world counts kingship), and also the suffering Servant. He summed up the whole history of Israel and its prophets, in a form where the language originally applied to Israel as a people could be applied also to Him; and the N.T. writers regard Him as repeating features in that history (Mt. 2:15, 12:17-21, etc.). The combination of all these ideal elements in a living Person was not natural but supernatural; it meant the crossing of the lines of old ages, and that the previous history of Israel as the people of God's choice for the accomplishment of His purposes was at once crowned and fulfilled in Him. How did the Lord Jesus Christ conceive of God and of Himself? Broadly speaking, we may say that His teaching presupposes that of O.T., esp. Deut., Ps., and Prophets, with the vindicativeness left out. On one point, the spirituality of God, the verse Jn. 4.24 is more explicit than anything in the O.T.; and a similar concise and summary expression, "God is love" (1 Jn. 4:8, 16), probably reflects the teaching of our Lord Himself (cf. Jn. 3:16, 14-23). But there is one aspect which belongs distinctly to the gospels. The O.T. had spoken of God as Father in the sense of Creator. Occasionally the term is used to express the closeness of the relation between God and Israel (Ex. 4:22; Deut. 32:6; J. 3:19, 31,9,20) or between God and the pious Israelite (Ps. 103:13; Is. 63:16). In the Gospels this conception of the Fatherhood of God becomes central and fundamental. All the teaching as to man and the Son of Man is deducible from it. In particular, it supplies the key to the nature and mission of Christ Himself. The key is the complete reciprocity of relation between the Son and the Father (Mt. 11:27 and parallels). Those critical who were used to the hervelling of the gospels draw the line at moral coincidence of will and purpose. Undoubtedly there is this coincidence in the fullest degree; but there is no limitation to this in the gospels. The Fourth Gospel lays a special stress on the "oneness" of the Son with the Father (10:30, 17:11,20), and indeed the doctrine itself that he traces up this "oneness" to essential identity of nature. This is not only the consistent teaching of the Epistles, but it is suggested by the peculiar designation which Christ chose
for Himself, the “Son of Man.” The more direct original of this phrase is to be sought in Is. 7.13,14, where the context and stand for genealogical Israel (see, however, Gressman, op. cit. infra). In any case, in the Similitudes of Enoch the name had already come to be applied to the Messiah, and particularly to the Messiah as Judge. Our Lord not only took it to Himself in this sense, but it is also sufficiently clear that He associated it with other significant examples of the phrase in O.T., notably Ps. 8.4. Our Lord’s use runs up into mystery, but He clearly distinguishes between Himself and all other sons of men, and connects the title with the transcendent element in His own self-consciousness. [Jesus Christ; Incarnation; John, Gospel of.—II. The Teaching of the Epistles. If our Lord thus associates Himself in a unique manner with the Father, we find the same association in the Epistles, from the first extant Christian writing onwards (1 Th. 1:1). It is characteristic that it is found especially in the opening salutations, and thus primarily in the phrase of others (1 Pe. 1:1-3; 2 Jn. 3; Ju. 1; cf. Rev. 1:4-6), which shows that as far back as we can go it was already a fixed point understood and assumed amongst Christians. Besides the salutations, there are explicit passages (culminating in Col. 1:15-19) which show that St. Paul already had a doctrine substantially equivalent to that of the Johannine Logos. This teaching arises out of reflection upon the Person of Christ in the varied forms of its manifestation. No lower conception seemed to do justice to what He was and evidently felt Himself to be. The appearance of Christ upon earth could thus only be described as an incarnation of the Divine (Jn. 1:14). But if so, if there was at one and the same moment God manifest and God invisible, that meant that there was at least a double principle (βιον ἀρχήν) in the Godhead. In the recognition of this lay the germ of the Doctrine of the Trinity. The rapid growth of that doctrine was the first step was the recognition of Christ as divine; the second step was the recognition of the work of the Holy Spirit. There had been a steady consistency in the Biblical language as to the direct influence of God upon the human soul; it was referred to the Spirit of the Holy Spirit, [Spirit, Holy]. In the apostolic age, from the Ascension and Day of Pentecost onwards, this influence was exhibited in heightened forms; the faculties with which man is endowed seemed to work with unusual activity and unusual effect. It was natural to set this down, and the apostles and first Christians naturally did set it down, to a special movement of the Spirit of God. In this was seen another manifestation of the Divine upon earth; and so there arose the conception of a third element in the Godhead. Thus the doctrine of the Trinity became complete; not, of course, at first in its formulated expression, but as a comprehensive religious experience. Time and reflection alone were needed to give this experience a name and express it in terms of the intellect; and already in N.T. we may see the process quickly coming to a head. In some of the opening salutations to which reference has been made above (1 Pe. 1:1-3; Rev. 1:4-6) all three terms, Father, Son, and Spirit, are introduced, virtually or expressly. But Dr. Moberly has shown (Aloneness and Personality, p. 192) that the double invocation which is characteristic of the Pauline epistles is not really “a maimed Trinitarian formula,” but that the full Trinity is implied—in the prayer that grace and peace may come down from God to man, such inlining from above being the special work of the Spirit. The incompleteness of the formula as such is due to the fact that the apostle is not yet attempting to formulate doctrine, but is still at the stage of experience, which is the raw material of doctrine. Was the belief in the Trinity, then, a creation of the apostles or of the Church of the apostolic age? Or does it go back farther still to our Lord Himself? The latter conclusion seems more probable. Even such passages as Mt. 28.19, 2 Cor. 13.14, are not exactly formulated doctrine, but they are a doctrine on the road to formulation. The second of the two references may be within and is certainly not much beyond, twenty-five years typical of the Christian Church in the belief appears in it in a very fixed form, equally familiar to the writer and to his readers. Is it too much to infer that it has its roots in language used by Christ? And so, when St. John in the last discourses (Jn. 14-16) gives explicit teaching on the subject of the Paraclete and the Paraclete’s relation to the Father and the Son, it seems fair to say that this teaching is confirmed as being, substantially at least, what it seems likely that Christ must have spoken. Beyond this point we need not go. We have seen the conception of God throughout the O.T. period rising gradually to a height of sublimity and purity. We have seen it perfected by our Lord Jesus Christ by being made to centre in the idea of Fatherhood. We have seen it expanded so as to include the Godhead of the Son, and along with that also the Godhead of the Holy Spirit. It was left for the Church to define what that implicit in this history—not to go beyond the history and introduce superfluous imaginings of its own, but to express, or at least to abumbrate, conceptually the inner meaning of that which it had already experienced in those momentous years in which its career began. Theological construction, in the same work, and Theol. of O.T. (posthumous, and not quite so satisfactory); Montefiore, Hibbert Lectures for 1902; and on a smaller scale, Ottey, Religion of Israel (1905). A new phase is marked by such books as Gressman, Ursprung d. isra.-jud. Theodolgie (1905) and Baentsch, Monotheismus (1906). For the doctrine of the Trinity there is very valuable material in Moberly, Aloneness and Personality (1901), esp. iv, v, vii; see also Ilbingworth, Doctrine of the Trinity (1907). [Spirit, Holy; Philosophy; etc.] [W.S.] God, Son of. [Jesus Christ; God; Incarnation.]
Gog and Magog.

Gog, the name of God as Redeemer (Job 19:25; Ps.19:14; Is.58:20, etc.). Elsewhere a technical term for one whose duty it is to champion the family rights of his point of view, specially instructive (2:20, 3:8ff.; 4:11f.; 14). The duty of redeeming the estate of his deceased relative, which had been sold, only devolves upon Boaz in the event of the nearer of kin refusing. The events recorded, at any rate, follow the law of succession (Num.27:5ff.; cf. 1 Chr.32:7ff.), and the right thus granted to the go′el to redeem from bondage (Lev.25:48ff.). It was also the duty of the go′el to marry the childless widow, to perpetuate the name of the dead, the first son being regarded as his (Ru.4:10ff.; 14ff.). This custom is clearly presupposed in Gen.38, and was a standing duty of brothers living. (Modern Jew′ian, a bare plat′eau, E. of the plateau of Galilee. Schumacher (Across the Jordan, 57) suggests the site to be Sahem el Jauml, a small village with Christian remains, 5 miles S.W. of Ashteroth. [c.r.c.]

Gold, the most valuable of metals, is used as an emblem of purity (Job 23:10) and nobility (Ps.45:14). Its use in early times (Gen.2:11), for it has been found in neolithic tombs and in those of pre-dynastic kings of Egypt. It was at first chiefly used for ornaments, etc. (24:22). Coined money was not known to the ancients till a comparatively late period; and on the Egyptian tombs gold is represented as being weighed in rings for commercial purposes. (Cf. 43:21.) [Money: Weights, Coins.] Gold was very abundant in ancient times (1 Chr.22:14; 2 Chr.1:15, 9; Na.2:9; Dan.3:1); but this did not depreciate its value, because of the great quantities used by the wealthy for furniture, etc. (1 K.10:22, 10:23; Esth.1:6; Gen.30:10; 10:9). The chief countries mentioned as producing gold are Arabia, Sheba, and Ophir (1 K.9:28, 10:2; Job 28:16), and others were Uzaph (Je.10:9; Dan.10:5) and Parvaim (2 Chr.3:6). Metallurgical processes are mentioned in Ps.83:16; Pr.17:3, 27:21; and in Is.46:6 the trade of merchants is named. In Lamentations (5:17) gold is in connexion with the overlaying of idols with gold-leaf. [Handicrafts.]

Golgotha. [Calvary.]

Goliath, a famous giant of Gath, who "morning and evening for forty days" defied the armies of Israel (1 Sam.17). He was possibly descended from the old Rephaim, of whom a scattered remnant took refuge with the Philistines after their dispersion by the Ammonites (Deut.2:20; 21; 2 Sam.21,22). His height was "six cubits and a span," i.e. 7 ft. 1 in. or 8 ft. 5 in., according to whether we reckon the cubit at 13½ or 16 inches (E.V. "span" here representing zir′oth, not šir; and so being properly "hand-breadth" = 5'33 in.; see Weights and Measures). But the LXX. and Josephus read "four cubits and a span," which must therefore be a conscious correction to the scale of the Egyptian cubit (= 20½ in.), and seems to indicate the 13½ in. cubit as the one intended in the Heb. measurement. The scene of his combat with David was in Ephes-dammim, between Shochoh and Azekah (Elah, Valley of), although a confused tradition (Bordeaux Pilgrim, 333 A.D.) has given the name of Ain Fudud (spring of Goliath) to the spring of Harod (Judg.7:1). In 2 Sam.21.19 we read that Goliath was killed by Elhanan, but the rendering "brother of Goliath" (1 Chr.20:5) is better.

Gomer,—1. An Aryan nation descended from the eldest son of Japheth (Gen.10:2,3), whose offshoots were Ashkenaz, Riphath, and Togarmah. It appears as an ally of Gog in Ezek.38.6. The name is a derivative from the root gom, as in c.675 B.C., defeated the Gimrin N. of Assyria (usually supposed to be the Cimmerians from the Caucasus), who then attacked Gyges king of Lydia (sometimes supposed to be Gog). He defeated them c.665 B.C., but was finally killed by them; and they then ravaged all W. Asia. They are also compared with the Cumi or "dalesmen") of Europe. (Tongues, Confusion of.—2. The daughter of Diblaim, "wife" of Hosea and mother of Jezreel, Lo-ruhamah, and Lo-ammi (Ho.1:1). [Hosea.] [c.r.c.]

Gomorrah. [Heb. 'amorah; cultivation.] It is mentioned in 14 chapters of O.T., and the story of its destruction (Gen.19) is known to the early prophets (Is.1.9, 10, 13, 19; Je.23, 14; 49, 18, 50, 40; Am.4, 11; Zeph.2, 9). In 2 Esd.2.28 and in N.T. it is spelt Gomorpha. (Mt.10:15; Mk.6:11; Ro.9:29; 2 Pe.2, 6; Ju.7). [Cities of the Plain.] [c.r.c.]

Gopher-wood. [Gen.6:14 only.] The Heb. word does not occur in the cognate dialects. The A.V. has made no attempt at translation. Two principal conjectures have been proposed. (1) That which interprets the Heb. word as "gaphar, to pitch, or daub with pitch. goph-rith, which signifies bitumen, is not much unlike it" (Harris); hence any trees of the resinous kind, such as pine, fir, etc. (2) Mr. Fuller has shown its identity with the Greek word kyphos, or cypress, kopher and gopher differing very little in sound. [H.c.H.]

Gorgias, a general of Antiochus Epiphanes, appointed by his regent Lysias to command, together with Ptoleme and Nicanor (1 Mac.3, 38), in the expedition against Judea, but defeated by the Jews. He was killed by Nicanor, in 1 Mac.4. Gorgias, but in 2 Mac.8, 12, 23, Nicanor, is the more prominent on the Syrian side. Gorgias apparently remained in Judea. In
Gortyna, a town of Crete, and anciently its most important city, next to Crossus (1Mac.15.23); nearly half-way between the E. and W. extremities of the island. It seems to have been the capital of the Romans.

Goshen.1. Called Fetha by LXX.; Kasdres, Kerast by Gk. writers; Gessen by Vulg.; and Gesse by Latin documents), a part of Egypt allotted to the Israelites for their sojourn when they settled in the country (Gen.46.34). The name has been found in hieroglyphical inscriptions, where it appears as kis or kesen, which, preceded by the Egyptian article, has preserved the Akkadian, kapru. We know from several ancient geographers that Phaecus was the metropolis of the Egyptian nome or province of Arabia, situated between "Egypt and the Red Sea"—i.e. in what is now called the Wady Tumilat. This is confirmed by the LXX., where Goshen once appears as Fetha Apasian and by the Captive version, which it gives as "the land of Goshen of Arabia," meaning the province called Arabia. A Latin document of 4th cent. (A.D.) shows that the tradition was then current; for it speaks of "terra Arabia, terra Gesse, que terra Egyptian pars est." The exact site of Phaecus is known by the indications of Ptolemy, and from excavations made on the spot. It is the present village of Saft el Hennich, in the Wady Tumilat, about six miles from Zagazig, on the Freshwater Canal running from the Nile to the Red Sea. The land of Goshen would thus be the country around Saft el Hennich, from Belbeis to Abu Kebir, S. and E. of the present Zagazig, the old Habesik. It must not be considered as a limited district or province. It is the name of a region, which, originally starting from Belbeis in the S., extended in the Wady Tumilat on the E., towards what is now the Suez Canal, including the city of Pirmon, and ending at the head of the Arabian Gulf. Goshen, which was given to Israel as a land in Egypt, does not seem to have belonged to the administrative division of the country. It was watered by a canal coming from Heliopolis. Mention of its occupation by strangers is found in an Egyptian text. An inscription nearly contemporary with the Exodus, speaking of the region around Belbeis, says that it was not cultivated, but "left as pasture for cattle, because of the strangers. It was abandoned since the time of the ancestors." In the Bible, "land of Goshen" is synonymous with "land of Ramesses" (Gen.47.11). This name must be of later date, introduced after Ramesses II. made great constructions in the Wady Tumilat, such as the store-cities of Ramesses and Pithom. Probably the name, Goshen, applied to the whole region occupied by the Israelites. When they multiplied and spread over a greater area of land, the name extended with them to the outlying parts. "Belbeis" was the name of a city which the LXX. connects with the Israelitish Goshen. Belbeis, Goshen and the Shrine of Saft el Hennich, p. 143; Lot, Hyksos and Israelite Cites, p. 34 —2. Goshen, the land of (Fetha, Gessen), a region conquered by Joshua, apparently near Gibeon (Jos.10.41, 11.16). It occurs only there, and has not been identified.—3. A town in the mountains of Judah (Jos.15.51 only); unknown. [E.N.]

Gospels. The first point which attracts our notice in reading the Gospels is that the first three Gospels are distinct from the fourth. The first three confine themselves almost exclusively to the events which took place in Galilee, until Christ's last journey to Jerusalem. If we had these Gospels alone we could not definitely say that our Lord went to Jerusalem during His ministry until He went there to die. In the Fourth Gospel the occasions on which our Lord visited Jerusalem are marked with precision. The discourses and miracles are connected with these visits. The difference in character is no less than the difference in scene. The first three Gospels usually give a narrative without comment, though all, and especially Matt., are O.T. prophetic, and are interpreted. The fourth evangelist speaks with clear authority, and adds comments of his own. Further, they do not claim to be eye-witnesses of our Lord's ministry, and Lu. implicitly disclaims any such authority. But Jn. makes this claim in direct terms: the writer "saw" and "heard witness." The character of our Lord's discourses also varies greatly. His sayings and parables in the first three Gospels nearly always refer to His dealings with His men, and the nature of the Kingdom of God; His sayings in Jn. refer largely to His relation with the Father, His own Person, and the action of the Holy Spirit after His departure. Because they give a common outline or synopsis of our Lord's work the first three Gospels are usually called the Synoptic Gospels. Their relation to each other will be considered in the sections immediately following; most of their distinctive characteristics are treated under the several heads. The relation of Jn. to the other Gospels will be more fully discussed at the end of this article. (1) How did the Gospel story arise? Christianity, more than any other religion, is centred in a Person. Jesus Christ is more important to Christianity than the stories of Judaism, Buddhism to Buddhists, or Mohammed to Islam. Not only what He taught, but what He was and did and suffered, was believed by the first Christians to be vitally important. If we turn to Acts or to St. Paul's epistles we find that the preaching of Christianity did not begin with reviving the moral teaching of Jesus, such as is contained in the Sermon on the Mount. It began with proclaiming the need of belief in a risen, crucified Lord (Ac.2.36, 16.31; 1Cor.15.3, 4). This brought with it the necessity of saying Who He was, and why He was put to death. Ac. shows that the first teaching, which was given to Jews, was intended to prove that Jesus fulfilled all the best hopes of the Jews concerning the Messiah. His Death and Resurrection were alleged to throw light on O.T. passages imperfectly understood. His Resurrection was alleged to prove the truth of His claim to be the Son of God and Messiah. Hence the parousia, or 'complete judgment was alleged as a means of stimulating repentance. Baptism and reception

—101 B.c., while holding Jannua (for which Iduma, 2Mac.12.32, is perhaps an error), he defeated Joseph and Azarias, who had attacked him contrary to the orders of Judas (1Mac.5.56ff.). [C.D.]
of the Holy Spirit were declared necessary means for appropriating His blessings. The whole was "commended to every man's conscience" (cf. 2Cor.4.2) by instances of His sublime moral teaching. It was also shown that "He went about doing good, and healing all that were oppressed of the devil" (Ac.10.38). In Mk.1.7 and Rev.14.6 the word "Gospel" seems to signify a written account of the "good news" brought by Jesus Christ. Exactly when such accounts were to be written we cannot tell. A need for something written would begin almost as soon as missionary work began. The absolute necessity for it would be acutely felt at the time when the first generation of eye-witnesses was passing away. As a matter of fact, it seems to have been just at this time that all three Synoptic Gospels were written. The same universally felt need was answered by the same kind of literary enterprise. It is not clear that St. Paul, whose conversion probably took place in 35 A.D., used a written Gospel. His knowledge was based on "revelation" (Gal.1.12) and "received from the Lord" (1Cor.11.23). It is almost certain that this means that it was de- nounced precisely because, if the Gospels were to be inspired, probably an evangelist or prophet. It was from "the Spirit of Jesus" (Ac.16.7. R.V.), not necessarily independent of human means. The means was probably oral. St. Paul himself uses the word "Gospel" as meaning the substance of the message which he preached (1Cor.15.3-5.2). The Gospels were written down. His friend St. Luke shows how the transition began (L.1.1.1, 2). Those who had been "eye-witnesses and ministers of the word" delivered unto others the things most surely believed. Many of these drew up narratives of such things, and St. Luke followed their example. The written Gospels therefore arose from an effort to put down what the apostles and their companions taught, and many such attempts had been made before St. Luke wrote, i.e. probably before 70 A.D. (2) Why do the Synoptic Gospels differ? It is obvious that not only do all three Gospels contain the same events, but that they differ widely from each other. If we reckon the whole number of incidents in these Gospels as 88, the distribution of incidents shared by at least two Gospels is as follows: in all three Gospels, 42; in Mk. and Mt. 12; in Mk. and Lu. 5; in Mt. and Lu. 12. There are also similar groups of incidents. Thus in all three we find together the cure of the paralytic, the call of Levi, and the question of fasting (Mt.9.7-17; Mk.2.1-22; Lu.5.17-39); so also the plucking of the ears of corn and the cure of the withered hand—events separated by at least a week (Mt.12.1-21; Mk.2.23-3.6; Lu.6.1-11). So too the death of John the Baptist is announced both in Mk.6.14ff. and in Mt.14.7ff. to explain the fear felt by Herod Antipas that he had risen from the dead. In fact, when a parallel passage is found in all three Gospels, it is never immediately followed in both Mt. and Lu. by a wholly separate incident which is not in Mk. But the differences between the three Synoptic Gospels are not purely minor. They are marked as the resemblances. Thus the account of the birth and infancy of Christ in Mt. differs widely from that in Lu. The incidents of the temptation of our Lord are recorded in a different order in Mt. and Lu., and the temptation is recorded without these incidents in Mk. All three Gospels give a slightly different account of the institution of the Lord's supper, and the words spoken by the centurion at the death of Jesus vary in Lu. from the words in Mt. and Mk. Also the language differs, and differs in a very singular manner. All three Gospels are written in Gk., which is far from being classical, and plainly shows the influence of the Aramaic language of Palestine. Yet they differ in style, and not only from each other, for Mt. varies in different sections, and so does Lu. Mk. is in the roughest Gk. and represents the language of an ordinary Jew of 1st cent. A.D. who had intercourse with the outside world. Lu. could write the best and the worst of the three, and in Lu. he uses strongly Aramaic idioms, some of which appear to indicate that he drew upon written documents for information. The case of Mt. is similar. It was long ago noticed that the quotations from O.T. which Mt. has in common with Mk. or Lu. are from the Gk. version, whereas those which are peculiar to himself are nearer to the Heb. There is another important fact. When Mt. and Lu. narrate the same things as Mk., they both use their own favourite expressions less often than in those passages which are peculiar to themselves. If we put aside the discourses of Christ which are peculiar to one of the Gospels, which simply narrate our Lord's doings and the account of the Passion, there remain 168 verses which Mt. and Lu. have in common. In these verses there is, on an average, less than one characteristic phrase of Mt. in each verse, whereas in 190 verses peculiar to Mt. there are 3 characteristic phrases to every 4 verses. In Lu. the 168 verses contain about 3 characteristic phrases in every 4 verses, whereas in the 164 verses peculiar to Lu. there are about 4 characteristic phrases to every 3 verses. The same phenomenon occurs when we examine the discourses and narrative which are not peculiar to Mt. and Lu., but belong also to Mk. Here, too, they show a stronger use of their favourite expressions than in portions that are peculiar to themselves. These facts make it practically certain that Mt. and Lu. did not simply take up the usual oral teaching given to converts. The oral teaching, exactly as Lu. tells us, had been already to a great extent written down. And Mt. and Lu. differ from Mk., both because they wished to supplement Mk. and because they copied certain documents which Mk. did not possess. (3) How were the Synoptic Gospels composed? We have shown reasons for believing that the divergences of Mt. and Lu. from Mk. are partly caused by the use of certain written records. We must soon discuss what these records were. In the meantime we have to account for the resemblances of Mt. and Lu. to Mk. On the whole, these can be best accounted for by the theory that they both used Mk., and used it as written in Gk. and not in Aramaic. Except about 30 verses, they did not use a Gk. version found, and in the same order, in Mt. or in Lu. or in both. SS. Matthew and Luke apparently
correct the style and grammar of St. Mark—
e.g. both, and especially St. Luke, replace St. Mark's diminutives by those of Mk. And he
smooth his harsh phraseology, as in Mk. 13.14,
employs another source than Mk. After follow-
mg Mk. rather closely till the beginning of this
section, he leaves Mk., and when the section 
enends, returns to a verse close to the place in Mk where he left it. The similarity of 
Mt. and Lu. to Mk. even extends to rare 
Gk. phrases; and quotations from the O.T. 
are sometimes found in two or three Gospels 
with the same variations from the original 
(e.g. Mt. 3.3; Mk. 1.3; Lu. 3.4). Again, in Mt. 
26.47, Mk. 14.43, Lu. 22.47, all three explain, 
apparently without any necessity, that Judas 
was one of the Twelve. It is only by a minute 
examination of the text that the question can 
be determined, but no theory at present ac-
counts for the origin of Mt. and Lu. so satis-
factorily as the theory that both used Mk. 
Mk. is not based upon any written document, 
since all discourses are due to tradition preserved by Papias (quoted in Euseb. Hist. Ecl. ii. 39) that Mk., "having 
become the interpreter of Peter, wrote down accurately everything that he remembered." Our second Gospel supports this tradition 
satisfactorily. The other written sources used by 
the Synoptists, compared with Mk., are MK. 
Papias also alludes. He says, "Matthew then 
composed the Logia (or Oracles) in the Hebrew 
tongue, and every one interpreted them as he 
was able." There is no evidence that the book 
was actually called "Logia." It seems to have 
been a collection of numerous precepts of the 
Lord embodied in a narrative suitable for the 
catechetical instruction of converts. If we 
subtract from Mt. and Lu. the material which 
they have in common with Mk., we find that the 
remainder does largely consist of discourses 
and precepts of the Lord. Much of this 
material is reproduced in both Mt. and Lu. 
Lu. is the more accurate collector, for in Mk. 
they appear in five large blocks of discourses (5-7; 
10; 13; 18; 25), each followed by a similar 
formula. See also 11-12 and 23. If we re-
move the Marcan portions and some special 
narratives of Mt., we have in Mt. simply a com-
pendium of Christ's teaching. St. Luke shows 
is an interesting contrast. He presents the 
discourse-material from an historical point of 
view. It is framed in a narrative bearing a 
stamp of genuineness which is sometimes ob-
vious. Thus the story of the woman who 
appointed our Lord's feet is the setting of the 
parable of the Two Debtors (Lu. 7.36f.); and 
Lu. shows better than Mt. the occasion on 
which our Lord taught the Lord's Prayer (Lu. 
11.1; Mt. 6.9). St. Matthew originally wrote a 
collection of discourses in Aramaic, and this 
was soon translated into Gk., possibly by St. 
Matthew himself. A similar but not identical 
collection was used by St. Luke. The language 
of the discourses is more original in Mt.; the 
setting is more historical in Lu. It is almost 
certain that St. Luke had not read Mt. The 
middle section of Lu. (9.51-18.14) is full of the 
most precious material relating to our Lord's 
teaching. We believe that St. Luke considered it 
of the highest possible authority, preferring 
it even to Mk. It was probably collected by 
some one who had been with our Lord during 
His ministry and work. Though we are not able 
to say that the discourses were all spoken at 
that time. Several sayings are either re-
petitions or different reports of sayings which 
St. Luke has elsewhere copied from Mk.; they 
are therefore commonly known as "doublets." 
Similar doubles occur in Mt., passages of 
Logian material reversing verses taken from 
Mk. The Synoptic Gospels are therefore com-
poved of (i) Mk.; (ii) St. Matthew's Aramaic 
collection of Logia translated into Gk.; (iii) a 
similar collection used by St. Luke; (iv) another 
collection inserted by St. Luke in the middle 
of his Gospel in one block; (v) special sources used 
by SS. Matthew and Luke which will be briefly 
mentioned in the articles on their Gospels. 
The above theory is fearlessly critical in method 
and strongly conservative in conclusion. It 
shows that the principal sources of our Gospels 
were all written well within the lifetime of the 
apostles, and that these primitive sources all 
contain the primitive words and phrases of the 
Person and authority of Jesus Christ—St. 
John and the Synoptists. It is not at all clear 
that St. John was acquainted with the Synoptic 
Gospels. We should, however, note that 
certain passages suggest that he was: 
Jn. 5. 
Mk. (5.211f.); 6.7,10,19f. (Mk.6.37,46,49f.); 
12.3,5,7 (Mk. 12.9-12); 18.11f. (Mk.18.13); 
18.18,17 (Mk. 14.54,69); 18.22 (Mk.14.65). 
The words of our Lord in Jn.15.18-16.2 have 
been compared with those in Mt.10.17-22. 
There are several points of contact between 
Jn. and Lu. which deserve attention: e.g. in 
their narratives of the Resurrection both con-
nect the first appearances of our Lord with 
Jerusalem, and say that there were two angels 
at the sepulchre. The high-priest Annas 
is only mentioned by SS. Luke and John (Lu.3.2; 
Ac.4.6; Jn.18.3,24). Lu. and Jn. alone show 
that Pilate intended the scourging of Jesus to 
be a concession to the Jews which might cause 
them to receive him as a prophet. Lu. was more 
preparatory to the Crucifixion (Lu.23.22; 
Jn.19.1). On the other hand, Jn. agrees with Mt. 
and Mk. and not Lu. in recording the binding 
of Jesus, the crown of thorns, the purple robe, 
and the custom of releasing a malefactor at 
the feast. Both SS. Luke and John display an 
interest in the Samaritans and tell us more about 
Mary and Martha. They first mention by 
name the "Romans," "Israelites," and 
"Solomon's porch." The doctrine of Christ's 
Person in Lu. is similar to that in Jn. In 
both He is the "Saviour" (Lu.2.14; Ac.5. 
31; Jn.4.12; Jn.4.14). He brings "salva-
tion" (Lu.1.69,71; Ac.4.12; Jn.4.22). He 
comes into conflict with Satan as with one Who 
has been permitted to have power over the 
world (Lu.4.6; Jn.14.30). He is able to pass 
through the midst of His foes unhurt (Lu. 
4.20f.; Jn.10.30). He speaks of "My friends" 
(Lu.12.4; Jn.15.14). Both SS. Luke and 
John speak of the "love" of God (Lu.11. 
42; Jn.15.14). In both the Holy Spirit is 
far more prominent than in Mt. or Mk. On 
the other hand, scarcely a single word charac-
teristic of Lu. can be found in Jn. It remains 
therefore an open question whether Jn. had 
read Lu. Jn. does not seem to have written
to supply deficiencies in the Gospels previously written. His use of them is not yet sufficiently proved for us to say that he wrote to correct or supplement. His own testimony (20.31) shows us why he wrote. His Gospel is for people who believe, but whom he wishes to show how they ought to believe. Judging from the semi-Christian forms of disbelief current in the 2nd cent., he desired to correct two tendencies. One was falsely spiritualistic, depreciating the truth that the Word was made flesh, and despising the Church and sacraments, like the false teachers rebuked by St. Ignatius. The other, more Judaistic, believed crudelv in the Church and sacraments, in Christ’s miracles and His second advent, and the resurrection of the body, but overlooked the inner meaning of the sacraments and miracles, the truth of Christ’s presence with us through His Spirit, and the need of living a risen life here and now.

**Gotholias**

(Gotholias (1 Esd.8.33) = Athaliah, 3.

Gothoniel, father of Chabris (Jth.6.15).

**Gourd.** (1) ἡ γάρδουν, only in Jon.4.6-10.

Though opinions differ, the probability is that the ἡ γάρδουν which afforded shade to the prophet Jonab before Nineveh, is the **Ricinus communis**, or castor-oil plant, which, formerly a native of Asia, is now naturalized in America, Africa, and the S. of Europe. Its leaves are large and palmate, with serrated lobes, and would form an excellent shelter. The seeds contain the oil known as “castor-oil” which has for ages been in high repute as a medicine.

(2) παξαώθ and πεξαίμ. In 2K.4.39, a fruit used as food, disagreeable to the taste, and supposed to be poisonous. In 1K.6.18,7,24, as an architectural ornament (A.V. **knops**). There can be no doubt that the “wild gourds” (παξαώθ) of 2K.4.39, which one of “the sons of the prophets” gathered ignorantly, suppos-

ing them to be good for food, were a species of the gourd tribe (**Cucurbitaceae**), which contains some plants that is a very bitter and dangerous character. The leaves and tendrils of this family bear some resemblance to those of the vine. Hence the expression “wild vine”; and as several kinds of **Cucurbitaceae**, such as melons, pumpkins, etc., are favourite foods amongst Orientals, the mistake was natural.

The etymology of the word from **pāqāʼ** “to split, or burst open,” favours the identification with the **Echium elaterium**, or “squirtling cucumber,” so called from the elasticity with which the fruit opens and scatters its seeds when touched. Celsius, Rosenmüller, Winer, and Gesenius favour this explanation. The old versions, however, understand the colocynth, the fruit of which is about the size of an orange. A drastic medicine in general use is a preparation from this plant. Since the dry gourds of the colocynth, when crushed, burst with a crackling noise, there is good reason for accepting this explanation. [Few Bible questions have been more hotly disputed, since the days of Jerome and Augustine, than that of Jonah’s gourd. Pious fathers came to blows and accusations of heresy over the question, gourd **versus** ivy. The author of **Scripture Illustrated** says it should be no trivial lesson to theological disputants.

**Governor** is the A.V. rendering of many words: **'allúph**, “head of a thousand” (or clan), R.V. **chieftain** (Zech.9.7,12,5,6)

| **gov′er-nor** | **hūqeq m′hūqeq, “prescriber of laws” (Judg.5.9,14); mōšēl, “holding dominion” (Gen.45.26, etc.); nāghîdh, “leader,” “foremost” (often of kings of Israel, “prince” (1 Chr.29.22; 2 Chr.28.7); māsî, “of high rank” (often “prince”) (2 Chr.1.2); pāqīdîh, “commissioner,” “inspector” (1 K.20.1); sāghān, “prefect” (Dan.3.2); sār, “chief,” “head” (1 K.22.26; 2 K.23.8); sālîh, “man of |

---

**Colocynth.**
authority" (Gen.42.6); ἱγανὸν, "leader" (Mt.2:6; Ac.7:10); also of the following, which require special mention: (1) πῆθα, an Assyrian word, used esp. of Persian governors after the Exile (also 1K.10.15, etc.). Tattenai, the governor appointed by the king (Ezr.5.6, R.V.), was possibly satrap of all Syria; but the word is more commonly used of subordinate governors of smaller districts, such as Judea. This office was held by Zerubbabel (Hag.1.1, etc.) and Nehemiah (Ne.5.14). TRYSHATIA being their Persian title (Ezr.2.20; Ne.8.6). The governor appointed by the king was responsible to the satrap for the tribute assessed on his province, which was moreover bound to maintain him and his staff, finding "the bread of the governor," apparently at the rate of 40 shekels per diem (Ne.5.14-18). (2) Εὐγερωσία means the ruler of a nation (or tribe), ranking below the title of king. It was held by Simon (1Mac.14.17), and when his family lost their independence, by Hyrcanus (Jos.14.4nt. viii. 5). Archelaus was appointed etarcharch by Augustus, with the promise of the rank of king if he showed himself worthy (2 B. J. vi. 3). The title was also given to the head of the Jews at Alexandria and (in the 3rd cent. A.D.) in the Roman province of Asia Minor (cf. the horca of the Jewish community at Damascus may be meant, but more probably the Arabian ruler of the district. Etarcharch was a common title among the Arabians, who were organized on a tribal basis. (3) Εὐγερωσία is used specially of the Roman procurators of Judaea: Pilate (Mt.27.2, etc.), Felix (Ac.23:26), Festus (28:30). The procurator had supreme control over his province, including the power of life and death, but the "legatus" of Syria had a certain superintendence over him. Quirinius (La.2.2) was legatus of Syria 6-9 A.D.; at the time of Christ's birth he probably held some military office there. (Kamsay, Was Christ born at Bethlehem? ch. xi.) (4) Ἀπαρχή meant (Jn.2.8, 9) "governor [ruler] of the feast," means either a guest chosen to preside (cf. Ecles.32.1), or else a sort of head waiter. [MEALS.] (5) Ὅθεργων (Gal.4.2) is a "steward" managing a minor's property. (6) Ὁ ωθητωρ (Jas.3.4) is "the steersman." [B.S.]

GOZAN, the tract to which the Israelites were carried away by Phil (Tiglath-pileser III.) and Shalmaneser IV., or possibly Sargon (1Ch.5.26; Z.K.17.6 and 18.11). This is the Goeanaites of Ptolemy, situated between the Chaboras (Habor, now Xhabur, the great Mesopotamian affluent of the Euphrates) and the Eucoros. In an Assyrian geographical list it is mentioned with Niṣabūna (Nisibis). It became an Assyrian province, ruled by governors from Nineveh, and revolted against that power in 750 B.C., but was subdued. [I.G.P.]

GRA BA (1Esd.5.29) = HAGABA.

GRAPE. [VINE.]

GRASS. (1) This is the ordinary rendering of the Heb. ḫaqir (r.K.18.5; Jos.40.15; Ps.104.11; Is.55.6). As the herbage rapidly fades under the parching heat of the sun of Palestine, it has afforded to the sacred writers an image of the fleeting nature of human fortunes (Job.8.12; Ps.37.2), and of the brevity of human life (Ps.40.7, 90.5). (2) In A.V. of Je.50.11, "as the heifer at grass" should be "as the heifer treading out corn" (cf. Ho.10.11). (3) In Num.22.4, where mention is made of the ox licking up the grass of the field, the Heb is yerex, which is elsewhere rendered green, (4) In Deut.10.20, the Heb. word meaning "green" (Ps.104.17, 22) is also rendered "grass" (Ps.104.14), but also fodder for cattle (Dent.11.15; Je.14.6). It is the grass of the field (Gen.2.5; Ex.9.32) and of the mountain (Is.12.15; Pr.27.25). In N.T. the word grass is always the representative of the Gk. χιόνος. [HAY.]

GRASSHOPPER. [LOCUST.]

GREAT SEA (Num.34.7; 15.47), the Mediterranean. [SEA; HORN.]

GREEVES (michä). [ARMS, Defensive, (3.)]

GREECE, GREEKS, Grecians. In Zech.9.13, A.V., renders the Heb. Yavan by "Greece." Yavan, or Ionia, is named as an Aryan race in Gen.10.2 (see 1Chr.1.5, 7; Is.66.19; Ezr.2.63). But about the time when Zechariah wrote the Greeks were coming into conflict with Persia for the first time. They afterwards dominated Palestine from 333 to 63 B.C., and many traces of their presence are found in excavations, including pottery, coins, and Gk. inscriptions. The Grecians' interest was manifested after about 336 B.C., much earlier, who took Hebrew children as slaves, and e. 600 B.C. sold slaves and bronze vessels at Tyre. They were known to Sargon of Assyria c. 710 B.C., and Arcadian Greeks from the Peloponnese had then settled in Cyprus. See also Dan.8.21.10.20.11.2. Greek converts and Jews in Jewish society were noticed, e.g. 12.20, coming up to Jerusalem (see Ac.17.4), and educated Jews then spoke Gk. (21.37). [Hellenes; Gentiles.] The Jews of Antioch and the West are sometimes noticed as "Grecians" (Ac.11.20, 21). Greece itself is first mentioned in Ac.20.2 (cf. however 1Mac.12.5-23), which appears somewhat apocryphal. "Greeks," such as the Damaic and other tribes of Asia Minor, invaded Palestine in the 15th cent. B.C., even to the borders of Egypt. The presence of pagan Greeks in Palestine, in the 2nd cent. B.C., is attested by inscribed tombs, and texts in honour of gods. Greek inscriptions are found in Philippi. The stone of the temple railing, found at Jerusalem by M. Clermont-Ganneau, verifies the statement of Josephus (5 Wars v. 2), and shows that a Gk.-speaking population visited Jerusalem in the time of our Lord. Their presence is also proved in DECAPOLIS by texts of the time of Herod the Great in Bashan, while the earliest Palmyra bilinguals, in Syr. and Gk., go back to the same age, when Gk. was the general literary language of the Roman empire. [G.R.C.]

GREEK. [HELLENISTIC GREEK.]

GREYHOUND (Pr.30.31; Heb. zarz muhanan -i.e. "one girt [K.V. marg. or. well knit] about the loins"). The greyhound is still the best suggestion of the many that have been made, as to what animal "comely in going" is here intended. The Arabs sometimes gird their greyhounds to prevent their eating too much and becoming inactive.

GROVE, Groves. (1) Thus A.V. renders throughly for the "jews," and well knit about the loins." The greyhound is represented by R.V. AM. ASHRAH, ASHERIEL. (2) In A.V. of Gen.21.33 for "ḥešel; R.V. rightly Lamarish-tree. So in A.V. marg. of Is.22.2. [Tamarisk.] [J.R.]
Habakkuk

Haahashtari', a man, or a family, immediately descended from Ashur, "father of Tekoa" by his second wife Naarah (1Chr.4.6).

Habaiah'. Bene-Habaiah were sons of the priests, of doubtful descent, who returned from Babylon with Zerubbabel (Ezr.2.61; Ne.7.63).

Habakkuk (ḥāḇaqeqqāq, doubtless from ḥāḇaqq, "to embrace," and so probably a term of affection, 'āḇqākōyāq, etc.). We know nothing concerning this prophet, but a variety of legends exist of little or no value, as that he was the son of the Shunammite woman (2K.4). The title of the story of Bel and the Dragon in the LXX. (Cod. Chis., but not Theodotion) runs "from the prophecy of Habakkuk, the son of Joshua, of the tribe of Levi." In the story it is told how Habakkuk, wearin miraculous cloths, conveyed food to Daniel in the lions' den. The animating thought of Habakkuk's message is the doom to be brought on Judah by the Chaldeans, in God's wrath for their sins, and next the reckless arrogance of the invader, who sees not that he is merely the rod of vengeance in God's hands. The prophet it is given to see, beyond the awful havoc, the time when the destroyer, his task accomplished, falls beneath amightier foe.—Date. The only point of external evidence is the position the book occupies among the Minor Prophets, intermediate between Nahum and Zephaniah. The former prophesied probably soon after 660 B.C. (Schrader), and the latter in the earlier part of the reign of Josiah, before the Great Reformation—say, c. 630 B.C. With this agrees the internal evidence, which is definite enough, resting on two statements in 1.5—"the doom is to come in the lifetime of many of those who hear the threat, and it will be heard in the ears of their children"—and this would be absolutely impossible after the battle of Carchemish (c. 605 B.C.), when the Egyptian army was shattered by the Chaldeans under Nebuchadnezzar; for it could not be doubted that the victorious young Titan would in due course march southward, and that Babylon would again become "the lady of the East." But more, when Nabopolassar, Nebuchadnezzar's father, assumed a quasi-regal authority at Babylon in 625 B.C., it must have been clear to shrewd observers that Babylon was becoming the dominant power in Western Asia, and the incredulity would thus be increasingly unlikely after 625 B.C. For the other limit, it was less than 40 years from Manasseh's death to the first Chaldean invasion; so that many of those living in the last years of Manasseh's reign may well have heard the prophecy. The condition of things, too, described in 1.2-4 suits that period. Though the bloody persecution had ceased, a time of deadness and corruption remained. To go further back would make the conditions unsuitable and the time too long. For the former reason we may cast out the short evil reign of Amon. The early years of Josiah's reign would be a possible time, when the boy was powerless in the

Guard. (1) In Heb. tabbah signified a "cook" (1Sam.9.23,24); but see Executioner. It is applied to the body-guard of the kings of Egypt (Gen.37.35) and Babylon (2K.25.8; Je.39.9,40.1; Dan.2.14). (2) rūṣîm properly means "runners," and is the ordinary term employed for those officers of kings whose office was to run before the chariot (2Sam.15.1; 1K.1.5), and to form a military guard (1Sam.22.17; 2K.10.25,11.6; 2Chr.12.10). [Foot.-] (3) The terms mishmērth and mishmār express properly the act of watching, but are occasionally transferred to the persons who kept watch (Ne.4.22, etc.; Job 7.12).

Gudgodah'. [Hor-hagidgad.]

Guni.—1. A son of Naphtali (Gen.46.24; 1Chr.7.13), and founder of the family of the Gunities (Num.26.48).—2. A Gadite whose descendants dwelt in Gilead (1Chr.5.15).

Gun, The going up to (2K.9.27). If Ahaziah red N. from Jezreel ("the garden house" being Beit Jann, and Ibleam being Yebla) the site may be at the ruin Qârâ, where the main road towards Beit Jann ascends the hill 4 miles W. of Yebla. The LX. reads "ascent of Gaî" (i.e. "of the ravine"). [c.r.c.]

Gur-ba'āl, a place or district in which dwelt Arabians (2Chr.26.7). It appears from the context to have been in the country lying between Palestine and the Arabian peninsula; but this, although probable, cannot be proved. The Arab geographers mention a place called Bāal, on the Syrian road, N. of Medina.

Sacred Symbolic Tree of the Assyrians. From Lord Aberdeen's Black stone. (Ferguson, Nineveh and Persepolis, p. 288.) See art. "Grove, Groves."
hands of his advisers, but impossible in the time following the Great Reformation. Thus, our knowledge is limited to the reign of Mano- 
seh's reign and the opening years of Josiah's. 
Not a few critics have suggested the reign of 
Jehoiakim, since then Judah knew much 
about the Chaldeans; but this would make 1.5 
meaningless. Incredulity would be out of 
the question, and such an antedating of 
the prophet's portrait be perhaps (in view of 2.20) so much profane audacity.——Contents. In 1.2-4 
the prophet bewails the state of social corruption, 
and appeals to God for help. In answer (ver.5-17) 
the invasion of the Chaldeans is foretold to an 
incredible nation. The Chaldeans fail to 
realize that they are but the rod of God's anger, 
but the prophet knows that it is for correction 
that God has appointed them. As the prophet 
wants to hear God's answer (2.1-4), he is told 
that the vision will surely come, and that he 
must wait by faith. In due time the Chal- 
deans shall be judged (5-12) for their greed, 
their cruelty (12-14), their drunkenness (15-17), 
and (18, 19) their idolatry. Then comes the so- 
lemn judgment, 'The burden of the Prophet' (20). 
In 3.1-12 the Chaldeans are divided (3), in 
which the two thoughts of the invasion 
and the subsequent deliverance are united, till 
at the end the prophet breaks forth in a jubil- 
ant strain at the thought of God's love for His 
people.—Integrity. What has been said above 
presupposes the integrity of the book as it now 
stands, but a recent theory may make 
in the LXX.

Hachal'ah, father of Nehemiah (Ne.1.1, 
10.1).

Hachlah', Hill of (Heb. gbb'khah ha-
kakhilah, "dusky hill"), in "the S. part of the J.
simon," near Ziph (1Sam.23.19,26.1,4), where 
Saul camped, seeking David. Probably the 
ridge el Kûlî, 6 miles E. of Tell Zîr. [c.r.c.]

Hachmoni', Son of, and The Hach-
monite (1Chr.27.32,11.11), both rendering—
the former the correct one of the same 
Heb. word. Hachmoni was no doubt 
the founder of a family to which these men be- 
longed; the actual father of Jashobeal was 
Zabdiel (1Chr.27.2), and he is also said to 
have belonged to the Korhites (1Chr.12.6), 
possibly the Levites descended from Korah.

Haddad' (Heb. habd'had, Bab. adda, "father", 
or "chief"; from Akkadian add, Turkish ad), 
the name of the sun in Syria, mentioned as 
early as 15th cent B.C. in the Amarna letters 
of Rib-adda (child of Haddad), king of Gebal. 
It was also a personal name for a "chief."—1. 
For Hadar (in 1Chr.1.30,46): the son of 
Ishmael (Gen.25.15)—2. The king of Edom (36. 
13), and the Assyrian "Ahab" (Esth.2.7) 
(1.50), also Hador in Gen.36.39—4. An 
Edomite prince (1K.11.14-22) who fled to 
Egypt, but returned home with a royal bride. 
The LXX. (ver. 25) understands that this 
Haddad (Gk. Αἴβης) ruled "over Edom," but 
the Heb. refers to Rezon in Damascus. [c.r.c.]

Hadarimmon (Zech.12.11). Jerome 
supposed this to be a town, W. of the "plain 
of Legio," now Kummâneh, 4 miles S.E. of 
Lejîn. More probably the "mourning of 
Haddarimmon in the valley of Megiddon" 
was that for the god who bore both these 
names. [HADAD.]

Hadar, An Ishmaelite chief not 
mentioned (Gen.25.15) with Dumah. In 
1Chr.1.30. HADAD—2. A king of Edom (Gen. 
36.39). In 1 Chr.1.50. HADAD. [c.r.c.]

Hadarzer, son of Rehab, the king of 
Aram-zobah, who, while on his way to "estab- 
lish his dominion" at the Euphrates, was de-
feated by David with great loss (2Sam.8.3; 
1 Chr.18.8). After the first repulse of 
the Ammonites and their Syrian allies by Joab, 
Hadarzer sent his army to assist the people 
of Maachah, Rehab, and Ishbosh (1 Chr.19.16; 
2Sam.10.15,16, cf. 8). Led by Shophach, or 
Shobach, the captain of the host, those from 
"beyond the river" (i.e. probably from Padan- 
aran, which was E. of the Euphrates, Aram- 
zobel being W. of it) crossed the Euphrates, 
joined the Syrians, and encamped at Helem. 
David himself came from Jerusalem to take 
the command. The rout of the Arameans 
was complete (2Sam.10.16-18; 1 Chr.16.16-18). 
[HADAWER.]

Hadashah, one of the towns of Judah, in 
the low country (Jos.15.37 only). It was near 
Migdat-gad; the site is doubtful. [c.r.c.]

Hadassah (Esth.2.7). [ESTHER.]

Hadattah', according to A.V., one of
HADES

the towns of Judah in the extreme S. (Jos.15.23); but the Heb. accents connect the word with Joab preceding it, and if so Hazor hadattab, i.e. New Hazor, in distinction from the place of the same name in ver. 23.

Hades. [HELL.]

Hadid', a place named, with Lod (Lydda) and Ono, only in the later books of the history (Ezr.2.33; Ne.7.57-11.34). Eusebius (Onomas. i.31.8) called Adithon E. of Diospolis (Lydda). In the lists of Thothmes III.(No.76) it appears as Hadida as early as 16th c. B.C. Now Hadithhek, a village 3 miles E. of Lydda. [ADIDA; ADITHAIM. [C.R.C.]

Hadial' (2Chr.28.12), father of Amasa, 2.

Hadoram.-I. Fifth son of Joktan (Gen.10.27; rChr.1.21). His settlements, unlike those of Joktan's other sons, have not been identified.-2. = Joram (2Sam.8.10), son of Tou, or Toi, king of Hamath: his father's ambassador to congratulate David on his victory over Hadarezer king of Zobah (rChr.18.10).-3. (2Chr.10.18.) [ADONIRAM.]

Hadra'h', a country mentioned (Zech.9.9), where the leaders of Hamath dwelt. For a suggested identification, see ASSYRIA. [C.R.C.]

Hagab'. Bene-H. were Nethinim who came back from Babylon with Zerubbabel (Ezr.2.46).

Hagaba' (Ne.7.48), Hagabah' (Ezr.2.45). Bene-H. were Nethinim who returned from captivity with Zerubbabel (Ne.7.48).

Hagar (Gen.16), an Egyptian woman, handmaid (or slave) of Sarah, whom the latter, being childless, gave as a concubine to Abraham after he had dwelt ten years in Canaan. We read that "when she saw that she had conceived, her mistress was despised in her eyes," and Sarah reproached Abraham for the results of her own act. Hagar fled towards her native land, the desert, which she had traversed by the Egyptian road. By the fountain in the way to Shur, the angel of the Lord found her, charged her to return and submit herself to her mistress, and foretold the character of her unborn child and his descendants. [THEOPHANIES.] On her return, she gave birth to her son Ishmael, and, in the desert, called him Joktan. Later, at the feast at the weaning of Isaac, "Sarah saw the son of Hagar the Egyptian, which she had borne unto Abraham, mocking" (21:9); and in exact sequence with the first flight of Hagar, we now read of her expulsion. The verisimilitude, Oriental exactness, and simple beauty of this story are internal evidences of its truth. Hagar is mentioned elsewhere only when she takes a wife for Ishmael (21:21); and in the genealogy (25:12). St. Paul refers to her as the type of the old covenant, likening her to Mount Sinai, the mount of the law (Gal.4.22 ff.). In Mohammedan tradition Hagar is represented as the lawful wife of Abraham, and Ishmael as having the rights of the firstborn.

Hagarenes, Hagarites, Hagerite (rChr.27.31 only, R.V. Hagrite), a people dwelling in E. Palestine, whose land was in the days of Saul occupied by the Reubenites (rChr.5.10). When the house of Saul fell, Gad, and half-Manasseh (rChr.5.18). They are mentioned, as adversaries of Israel, together with Edom, the Ishmaelites, Moab, etc. (Ps.83.6). They were evidently a nomad people, as Haggai'. Nothing is known of the author of the tenth book in the series of the Minor Prophets, apart from a tradition which says he was born in Babylon, of the tribe of Levi, and at the end of his life was buried near the temple. According to Jewish story he was a member of the Great Synagogue. In the LXX. Haggai is mentioned in the headings of Ps.137,145-148, and in the Pesh. of Ps.125,126,145-148; cf. Epiphanius: "(Αγαγιος) εμφανιστας εκει αλλοθριων." His prophecy is cited in Heb.12.26 (cf. Hag.2.6), and referred to in four divisions: (a) 1:1-1:15. are between the Sept. to Dec. in the second year of Darius—i.e. 520 B.C.; and were delivered to the Jews who had returned from Babylon in 535, with the object of exhorting them to rebuild the temple of Jehovah. This work, after being commenced (?) under Cyrus (535 B.C.), had been suspended till Cambyses and Pseudo-Smerdis. It is possible indeed that Haggai was himself one of those who returned with Zerubbabel and Joshua.—Occasion of the Prophecy. The oracles of Haggai were called forth by the deplorable condition of the returned exiles and the neglected state of the house of Jehovah. The glorious promises of Is.40—55 seemed far from being fulfilled, while the hostility of the Samaritans, failure of crops, and the passage of the Persian armies through their land to Egypt, combined to render the lot of the returned exiles as depressing as possible when Haggai commenced to prophesy.—Analysis. The book falls into four divisions: (a) 1:1-15. are between the 1st day of the 6th month (Aug. to Sept.). A rebuke to the nation and to Zerubbabel and Joshua, its political and religious leaders, because they seek only their own comfort and luxury, while the house of Jehovah lies desolate. This utterance had the effect of stirring the dormant energies of the workers. A message of encouragement to stimulate the flagging enthusiasm of the workers, who are discouraged by the slow progress of the temple, especially those who remembered the house "in its former glory." (b) (2:1-20) are between the 21st day of the 6th month (Sept. to Oct.). A promise to Zerubbabel, assuring him that, in the midst of the approaching international cataclysm, he and his house shall be exalted. (c) (2:20-23). On the same day as (c). A personal promise to Zerubbabel, assuring him that, in the midst of the approaching international cataclysm, he and his house shall be exalted. For I have chosen thee, saith Jehovah of hosts." In this passage "the Messianic aspirations which attached formerly to the Davidic king are transferred by Haggai to Zerubbabel, who
HAIR

becomes, in virtue of the position thus assigned to him, a type of Christ" (Driver).—Style. Haggai belongs to the decadent period of Heb. prophecy, and his style is so abrupt and simplified as to lead to the conclusion that only outline notes of his oracles have come down to us. He lacks the imagination and poetical fervour of the pre-Exilic prophets, but nevertheless rises to fine writing occasionally. He is very prone to repetition, and the continual reiteration of his credentia, " saith Jehovah," indicates his realization that his words do not in themselves carry that conviction which followed upon the utterances of his greater predecessors. G. A. Smith, Bk. of the Twelve Prophets; Driver, Intro. Lit. of O. T. (Century Bible).

Haggai. "Minhār son of Haggai" (Rev. 2.19; Luke 3.20) is one of the mighty men of David's guard, in 1 Chr. 11.38. The parallel passage (2 Sam. 23.36) has "Bani the Gadrīth," the Heb. spelling of which is almost identical with "Son of Ha-garīte." Many of the variations in Scripture arise from the similarity of the letters d and r. [R.C.S.

Haggites, The. [HAGG.]

Haggith, one of David's wives and mother of Adonijah (2 Sam. 3.4; 1 K. 15.11, 2.13; 1 Chr. 3.2). Ha'gāla (1 Esd. 5.34) = Hattil.

Haglographa, otherwise called kthabim ("writings"). The third of the great divisions into which the Hebrew canonical books were divided; the other two being the Law and the Prophets. The Haglographa included Ps., Fr., Job, Can., Ruth, Lam., Ecc., Esth., Dan., Eze., Ne., and 1 and 2 Chr.; while Jos., Judg., 1 and 2 Sam., and 1 and 2 Kings were included amongst "the Prophets." [SCRIPTURE, HOLY; CANON OF O.T.]

Haî (Gen. 12.5, 13.3). Haîl (Heb. bārandh, Ex. 9.18), mentioned with thunder (ver. 17). This must have been very unusual and alarming in Egypt; but in Palestine hail accompanies the thunderstorms of autumn, and falls at times in winter (Jos. 10.11; Job 38.22; Ps. 18.12, 13.17; 148.8; Is. 28.21, 17, 30.30; Hag. 2.17). The "hail" mentioned in hail was probably lightning, and such storms were sufficiently rare to be remarkable. See also Rev. 8.7, 11, 19, 26, 21. [C.E.C.]

Hair. The Hebrews were fully alive to the importance of the hair as an element of personal beauty, whether as the "curled locks, black as a raven," of youth (Can. 5.11), or the "crown of glory," that encircled the head of old age (Pr. 16.31). Among them, as among all ancient peoples, the hair partook in a special way of the personality of the owner. The customs of ancient nations as to wearing the hair varied considerably. The Egyptians allowed the women to wear it long, but kept the heads of men closely shaved from early childhood. The Greeks admired long hair, whether in men or women. The Assyrians also wore it long. The Jews of later days, on the other hand, while they encouraged the growth of hair, observed the distinction between the sexes by allowing the women to wear it long (Lev. 19.27; 2 Cor. 11.6f.), while the men restrained theirs by frequent clipping to a moderate length. Clipping the hair in a certain manner and offering the locks was in early times connected with religious worship; and hence the Hebrews were forbidden to "round the corners of their heads" (Lev. 19.27), meaning the locks which covered the ears. The prohibition against cutting off the hair on the death of a relative (Deut. 14.1) was grounded on a similar reason. In addition to these regulations, the Hebrews dreaded baldness; it was regarded as a personal defect, and hence formed one of the disqualifications for the priesthood (Lev. 21.20, LXX.). In times of affliction the hair was altogether cut off (Is. 15.24, 15.27; Jer. 7.29). Tearing the hair (Ezra 9.3) and letting it go dishevelled were similar tokens of grief. Wigs were commonly used by "HAGGERI

The Egyptians, but not by the Hebrews. The usual and favourite colour of the hair was black (Can. 5.11), as is indicated in the comparisons to a "flock of goats" and the tents of Kedar" (Can. 4.1, 1.5). A fashionable tone was occasionally obtained by sprinkling gold-dust on the hair. It does not appear that dyes were ordinarily used. With regard to the mode of dressing the hair, we have no very precise information; the terms used are of a general character, as of Zebedee (2 K. 9.30) and Judith (10.3). The terms used in N.T. (Tim. 2.9; 1 Tim. 2.3) are also of a general character; Schleusner understands them of curling rather than plaiting. The arrangement of Samson's hair into seven locks, or more properly braids (Judg. 16.13, 19), involves the practice of plaiting, which was also familiar to the Egyptians and Greeks. The locks were probably kept in their place by a fillet, as in Egypt. The Hebrews, like other nations of antiquity, anointed the hair profusely with ointments, which were generally compounded of various aromatic ingredients (Ruth 3.3; 2 Sam. 14.2; Ps. 23.5, 45.7, 92, 60.; Esth. 6.17; Is. 3.24); more especially on occasion of festivities or hospitality (Mt. 6.17, 26.7; Luke 7.36). It appears to have been the custom of the Jews in our Saviour's time, as it had been from time immemorial, to swear by the hair (Mt. 5.36), much as the Egyptian women
still swear by the side-lock, and the men by their beards (Lam. 3.35). 

**Hakkatan**, father of Johanan (Ezr.5.2).

**Hakkoz**, a priest appointed by David chief of the seventh course in the service of the sanctuary (1 Chr.24.10) = Koz with the def. article.

**Hakupha**. Bene-Hakupha were among the Nethinim who returned from Babylon with Zerubbabel (Ezr.2.51; Ne.7.53).

**Halah** (2 K.17.6; 18.11; 1 Chr.5.26), one of the places to which the kings of Assyria deported Samaritan captives, is probably the Ḥalāḥ of the geographical lists, named between Ḥalolith and Kaphtor. Now Ḥalāb, a town of the kingdom of the Hittites, is supposed to lay it near Haran. [r.g.p.]

**Halah', Mount**, a mountain twice named as the southern limit of Joshua's conquests (Jos.11.17; 12.7). The word means "bare" (R.V. marg.); it was apparently a spur of the mountain Serir. [c.r.c.]

**Hall**, a town of Idumea on the border of the district (Jos.15.58), mentioned with Beth-zur. Now Ḥallāb, a village N. of Hebron immediately E. of Beth Sûr. [c.r.c.]

**Hall', a boundary town of Asher between Beth-kesheth and Beten (Jos.19.25). Possibly 'Alṭi'a, a ruin 13 miles N.E. of Accho. [c.r.c.]

**Halicarnas'sus** in Caria, a city renowned as the birthplace of Herodotus and of the later historian Dionysius, and as embellished by the mausoleum erected by Artemisia, but of no Biblical interest except as the residence of a Jewish population in the period between the O. and N.T. histories (1 Mac.15.23). The modern name of the place is Bodrum.

**Hallicarnassus**, the "hal'licarnassus," a country named after the ancient name of Caria, the birthplace of Herodotus, and of the later historian Dionysius, who was the mausoleum erected by Artemisia, but included no Biblical interest except as the residence of a Jewish population in the period between the O. and N.T. histories (1 Mac.15.23). The modern name of the place is Bodrum. [Judgment Hall; House.]

**Hallejujah.** [Aleluia.]

**Hallohash', one** of the "chiefs of the people" who sealed the covenant (Ne.10.24). Identical with **Hallohash (3.12)," father" of Shallum, 13, and probably a family name (= "Lochesh").

**Ham.**—1. One of the three sons of Noah, always placed second when they are mentioned together (cf. Japheth). The name means dark, and is the Egyptian name for Egypt, being derived from the blackness of the soil of the Delta. Another derivation is from Khem, the name of the river Nile from its source to the point where it is represented on the most primitive sculptures hitherto found in Egypt, and whose shamelessness is in accord with the story in Gen.9.20 ff., where, however, Ham's conduct is rather that of a child. The generations of the sons of Noah in Gen.10 really represent the geographical knowledge of the Israelites, as the names are rarely those of individuals, but sometimes of communities and sometimes of towns. [Races.]

To Ham are assigned chiefly the nations S. of Palestine. First, Cush, the tribes occupying a zone from Babylonia to Abyssinia. Next, Mizraim, a name from its dual form indicating Upper and Lower Egypt. Put was an ally of Egypt in the time of the Assyrian and Babylonian wars, but cannot be identified with certainty. [Phut.] Canaan is the race which Israel had to exterminate. The names of the descendant tribes are very difficult to identify, but it is clear they are the dwellers along the coasts of N. Africa and Phoenicia. The race characters of the Hamites are probably best defined by the Egyptian representations of themselves and of the Phoenicians, brown, but fairer in the N., with beards; but see *Races*. Their languages present many problems, but the race produced the founders of the earliest states, great builders, hunters, merchants, and so forth. (Gen.10.6-19). In strange contrast to the pride of the earliest Hamites, their descendants were reckoned in the 18th Christian cent. as fit only for slavery, and indeed destined to it because of the curse on Canaan (Gen.9.27). The hope of threefold blessing from Egypt, Israel, and Assyria (Is.19.1-5) has not been realized. (Gen.10.21-22).

—2. A place (Gen.14.5; Heb. Ḥım) where Chedorlaomer defeated the Zuzims, and mentioned with Ashteroth, a region in or near Bashan. Probably, according to Col. Conder, the "land of Am," noticed with Horab in the Amarna letters (Brit. Mus. 37, 46; Berlin 91, 143), = "the land of the Hamites" (Ps.106.32, 34). He is the Ham of Ps.78.51, in a poetical description of Egypt. Ryle, Early Chapters of Gen.; Sayce, Races of the O.T. [c.r.d.b.]

**Haman.** For the earlier part of the story of Ahasuerus's favourite minister, as given in the book of Esther, see Mordecai. After carrying out in bitterness the programme which he had been commissioned by Ahasuerus to execute, Haman, angered further by the vehemence of Haman's despairing application to the queen for mercy, orders him to immediate execution on the gibbet, which, as a courtier opportunely suggests, stands ready for the purpose, as prepared for Mordecai. He is accordingly executed. "Haman's name is probably another form of Haman or Hamvan, an Elamite deity. The epithet '"Agagite' (Esth. 3.1) means either (a) descended from Agag, king of Amalek, thus representing Mordecai and Haman as hereditary foes, the one as tracing his descent from Kish, and so connected with king Saul, the other as a descendant of Samuel the dispossessed and vanquished foe; or (b) a spiritual rather than a natural descent, an allegorical nickname, implying a hostile attitude to the chosen nation like that of the Amalekite king of earlier days; or (c) belonging to a place or family otherwise unknown. The LXX. have "Agagitis" (Dagon) or "the Macedonian" (the Bacchean) (b. A.D. 116), the former meaning bully, braggar, a Homeric word revived in Alexandrine Greek, or cunax, the latter either (i) pointing to the time when the Gk. power, rendered dominant in the E. by Alexander of Macedon (died 323 B.C.), had become, through Antiochus Epiphanes (died 164 B.C.) who inherited Alexander's conquests in
Hamath, the type of hostility to the nation of the Jews, or (ii) indicating Haman as a traitor to the Persian power.

Hamath' appears to have been the principal city of Upper Syria from the time of the Exodus to that of the prophet Amos. It lies on the Orontes, about 30 m. N. of Lake Homs, and commands the whole of the Orontes Valley, from the low hills which form the watershed between the Orontes and the Litany—cf. "the entrance of Hamath" (Num.34:8; Jos.15:5, etc.)—to the defile of Damascus below Antioch.

The Hamathites were a Hamitic race, and appear last among the descendants of Canaan in Gen.10.18, 1Chr.1.16. Indeed, they were probably closely akin to the Hittites, with whom they were generally in alliance. In the time of David Hamath was governed by king Toi (2Sam.8.10), and a little later accepted the overlordship of Solomon (1K.4.21-24), who built "store-cities" there (2Chr.8.4). In the inscriptions of Shalmaneser II. (859 B.C.), Hamath appears in alliance with Damascus, the Hittites, Israelites [Anan], etc. About 766 B.C. Jeroboam recovered Hamath" from the Assyrians (2K.14.28). Later on, "Eni-iti" (Eniel) became tributary to Tiglath-pileser III. (739 B.C.), and Sargon (720 B.C.) seems to have ravaged the place, and to have tortured Han-bitidi (Yau-bitidi), its king. From this time it was seemingly an Assyrian province, and lost much of its importance. At the division of Ephraim the seven tribes changed its name to Ephaphadah; but the natives still called it Hamath, even in Jerome's time; and it is from this that its present name, Hamah, has come. Several inscriptions in relief, in the hieroglyphic character known as Hittite, have been found on the site. [R.g.p.]

Hamath-zobah' (2Chr.8.5) has been conjectured to be the same as Hamath; but the addition of Zobah would seem rather to point to another Hamath, which was thus distinguished from "Great Hamath." One of the Gk. forms of the name is Baisoba, suggesting Beth-zobah, and consequently a different locality. Assyriologists have identified this ancient city Zobah with the city Subit of an Assyrian geographical list (where it is immediately followed by Hamath or Hamathu). This is probably the city "Subiti in the neighborhood of which Assur-bani-apli defeated the Arabians. [T.g.p.]

Hamath', one of the cities of Naphtali (Jos.19.35). The name means "hot spring." The Jerusalem Talmud (Erubin v.5) places it near Tiberias (Rakkath)—that is, at the Jannah, or "hot bath," to the S. This is the Eminus of Josephus (18. Ant. ii. 3.4; Wars i.3). The springs (14 to 132 Fahr.) are 3100 in number, at a spot rather more than a mile S. of Tiberias. In the list of Levitical cities of Naphtali (Jos.21.32) the name of this place seems to be given as Hamath-dor, and in 1Chr.6.76 it is further altered to Hammon. It is probably the Hamath of the list of Thothmes III. (No. 16). [C.r.c.]

Hammedatha, the Agagite, father of Hamath (Judg.8.9-24).

Hamme lech, rendered in A.V. as a proper name (16.36.26.38.6; more properly = "the king," as R.V. [Malchiah,8]).

Hammer, four Heb. words for this exist: halmoth (only Judg.5.26); maqabbeth (only Judg.4.21), maqabbah (1K.8.7), from the same root; so called because by means of it a hole was made by driving in a nail; particle, (Hanan, Hana)
Handelasp.—A. (1) Used to strengthen promises (of oaths) and engagements generally (Is.5.6 R.V.; cf. Ezr.10.19; 1Mac.6.68-62.11, 50,62,66,13.45,50; 2Mac.4.34; and 2K.10.15). (2) SURETYSHIP was ordinarily entered into by a handclasp, the words uttered with this formality being binding (Pr.6.1-5,11.15,17.18,22.26; Job17.3). (3) "Let thine handrelease" is used in Deut.15.3 in connexion with debt, see Driver ad loc.; and in 15.2 נֶפֶשׁ is a probable conjecture for נַעֲשָׁה (="every creditor shall let his hand drop"). This may possibly also be a reference to the custom, cf. Ges. 238b, no.921. In a hand might be given (I. clasped) in sign of allegiance. Seemingly it was coupled with an oath, and constituted or formed part of a covenant (Ezk.17.18; 1Chr.29.24). Perhaps this is distinct from the handclasp of (1), (2), and (3). [OATHS.—B. The custom of the handclasp paralleled that of all the nations, etc., of the East. Some suggested explanations in other fields see Pollok, M. 7/91, p.205; Pfister, Reichsverfassung, passim; Wasser, Handelsrecht, etc. 15.2 Rechtswissenschaft, xii. 15.2, §§ 30, xviii. p.140. [H.T.M.W.]

Handicrafts. In early Israel the development of handicraft trade was conditioned, during the different stages of the nation's history, by the requirements of nomads, agriculturists, and town-dwellers. With regard to the first two classes, only two stages need be considered: those of the smith and the potter. Nomads required the smith for fashioning spear-heads, the potter for making vessels to prepare food in; though for the latter purpose wood was mostly used, but this did not at first necessitate a special trade, as every one would be capable of making a wooden vessel with a flipt. Agriculturists required the potter for the same purpose as the nomad, and the smith for making agricultural implements. For every other want both nomad and agriculturist depended upon himself. The making of raiment, whether of flax, wool, or skin, was a house-exercise, only extended to men's care; while tents or huts ("booths") each man made for himself. Handicrafts (in the stricter sense of the term) only came into being with the rise of town-life, and, as the books of Jos., Judg., and 1Sam. show, it was a long time before the Israelites finally conquered the Canaanite towns. Handicrafts among the Israelites, therefore, arose on a (comparatively speaking) late date, when the wants of town-dwellers necessitated, and therefore brought into being, trades which could not have existed under the conditions of life of nomad and agriculturist. The Heb. root הָרַעַשׁ (to cut into) contains the idea which underlies the characteristic action of the smith, the carpenter, and the mason: each in his way "cuts into" metal, wood, or stone. The fact that this root means also "to plough," i.e. to cut into the soil, illustrates the point. And therefore the Heb. words for these three handicrafts are a combination of this root and the special material worked upon—viz.
the smith is called ħārāš barzel, "the cutter of iron" (Is. 44.12), the carpenter ħārāš 'eq, "the cutter of wood" (2Sam.5.11), the mason ħārāš 'ökhen, "the cutter of stone" (2Sam.5.11; Is. 44.13). The smith, as being the earliest of the three, is also called simply ħārāš (1Sam.13.19; Je.10:9) another, later, word for smith is mašeq, and for mason gōḏeq. The A.V. and R.V. sometimes translate ħārāš by "carpenter," but without justification; in three cases out of the seven the R.V. has corrected the earlier rendering. (1) Smiths. The custom in vogue at the present day among the Bedouin Arabs illustrates what was undoubtedly practised in very early times: the smiths form a kind of caste, and go from place to place and settlement to settlement, and make instruments and carry out repairs. According to the Israelite tradition, bronze- and iron-work was done in primeval times (see Gen.4.22), though it of iron in Am.1.3; see also 1Sam.13.19-23, which, though describing abnormal conditions, well illustrates what the smith was required to do, during the period at which more settled town-life was commencing among the Israelites. (2) Of silversmiths and goldsmiths there is frequent mention in O.T.; they are called kōrphim, "testers" or "refiners." It is not probable that they were much in request before the reign of Solomon, as both silver and gold must have been, comparatively speaking, rare. There were, from that time onwards, required, above all for the temple, vessels of gold and silver, overlaying of doors and walls with gold, instruments and ornaments of various kinds, and the covering of idols as well as for making molten images (cf. Judg.17.4; Is.2.20,40.10,46.6, etc.). Solomon's external relations, especially with the Phoenicians, were the immediate cause of the introduction of

larger quantities of the more precious metals into the country. It was, no doubt, owing to instruction from Tyrian workmen that the Israelites gained the considerable knowledge of the silver and goldsmith's art to which O.T. bears witness. Three words are used for refining these metals: ārāph (Judg.17.4; Is.40.19), "to test"; āhār (Mal.3.3), "to purify"; bāḥān (Job 23.10), "to examine." The purifying was done by melting the metal and removing the dross (ṣiqhim, used mostly in the plural) which came to the top (Is.1.22,25). When the metal was in a fluid state it was poured into moulds, or was used for covering images of wood. The hammering-out (rāwā) of metal and soldering (debitu) were also understood (see esp. Is.41.7); and according to Ps.45.14(13) threads made of gold were worked into cloth. This more intricate work is further illustrated by the making of settings wherein precious stones were fixed (Ex.28.9-11). In the same passage (ver. 11) we read of the engraver; as a "cutter of stone," his work has to be differentiated from that of the mason by means of the explanatory words, "like the engravings
HANDICRAFTS

of the signet." Some excellent examples of the engraver’s work with archaic (Heb. characters cut into more or less valuable stones have been discovered, and the art of engraving gems is now known to be as old as the time of Moses (they were cut with a drill); e.g. a gem has been found engraved with the name of Kurigalzu I. (c. 1480 B.C.). The more specific names for engraver are \textit{m Barbāthah} (Zech.3.9) and \textit{hōḥekh} (Job 19.24). According to Ne.38.32 there seems to have been a guild of goldsmiths; and although only mentioned later, it is highly probable that such a guild existed much earlier. The goldsmiths must very early have become differentiated from the smiths, though it seems certain that the first workers in gold and silver and the bellows (\textit{mappušâh}); see, for these, Ex. 32.4; Ezk.22.18; Pr.17.3; Is.41.7; 1e.6.29. In N.T. the only smith mentioned is the silver-smith (Ac.19.23; cf. Rev.9.20). (3) Carpenters and Masons. It is questionable, judging from the custom of the East to-day, whether these were separate callings, for it is frequently found that the mason—which includes building—is also a carpenter. As referring to woodwork, we have the mention of \textit{carvings (miq-lāḏh)} of fir, cedar, and olive-wood (1K.6.18, 32,34,7.31); another word, \textit{pittuhim}, is used of the carved figures of the cherubim (1K.6.29). But the carved work for the temple, carried out as it must have been by specially skilful artificers, was not the normal work of the car-

must have been familiar with the rougher work. In Ne.11.35 (cf. 1Chr.4.14) mention is made of the valley of the smiths; the incidental way in which this is referred to as though well known seems to imply that it was an ancient centre of such work. The raw material was probably obtained by the Israelites, in part, from the Egyptians, who possessed copper-mines in the Sinaiic peninsula (cf. Job 28.2); but the Phoenicians must, from all accounts, have done most to supply this. See, among other passages, Ezk.27.1ff., and the various references to Solomon’s dealings with them. Cyprus, the Lebanese mountains, and Spain, the localities from which the Phoenician traders got their material. The implements used in metal working mentioned in the Bible are: the graving-tool (\textit{heret}), the iron furnace for smelting (\textit{kîr}), the refining-pot for silver (\textit{mårēph}), the anvil (\textit{pa’ām}), the hammer (\textit{pətīsh}), the drill (\textit{hoqheh}), and the bellows (\textit{mappušâh}).

TOOLS.
of mud, clay, pieces of unhewn rock, worked stone, right up to finely chiselled slabs—have been graphically shown by recent excavations on the site of ancient Gezer by the Palestine Exploration Fund. In the houses of the wealthy the inside of the walls were plastered; the plasterers (thyim) are mentioned in Ezk.13.11. (4) Pottery was one of the most important handicrafts mentioned in the Bible. In the earlier literature the potter is not often referred to, probably because the ancient custom of using skin and wooden vessels continued even beyond nomadic days (cf. Gen.21.14; Ex.7.10; Lev.15.12; Judg.4.19; 1Sam.16.20). One of the earliest references to the potter's vessel (kel vāgēn) is in 2Sam.17.28, though obviously pottery was in use long before the time of David. From Is.41.25 we learn that the potter first of all trod down the clay; this softened it and prepared it for the potter's wheels ('obhmaym; Je.18.3), which were originally of stone, as the name implies, later of wood. They consisted of a lower and an upper disc (the former being the larger), which revolved in opposite directions on the same vertical axis; the lower was driven by the foot of the potter, while the clay was placed upon the upper wheel and formed by the hand (Ecclus.38.29-31). The vessels were then baked in an oven. In later times the clay was glazed by means of oxide of lead (Pr.26.23, "silver dross"). In the time of Jeremiah the valley of the son of Hinnom, "which is by the entry of the gate of the potsherds," was evidently a special place for pottery works (Je.19.1.2). An immense number of specimens of the potter's art have been recently found on the sites of Gezer, Lachish, and Taanach; one of the most interesting is a bowl 8 in. high and 10 in. across, belonging to the pre-Semitic period, which was constructed without the potter's wheel. Of the different potter's vessels mentioned in the Bible earthen vessels generally are called kel lē heres; vessels of large size, kadh (Gen.24.14), a pitcher for storing water; pā'āı́r (Judg.6.19), a pot for cooking purposes; or kūr (1K.8.41), a larger pot; gēbbîa' (Je.35.5), a large bowl. Smaller vessels are, bāpūq (Je.19.10), a flask; ḫapēhāth (1Sam.26.11), a jar or cruse; pâkh (1Sam.10.1), a bottle; and kās (Ps.23.5), a drinking-cup. (5) Of glass-work only the scantiest notices are to be found in O.T. Babylonians, Phoenicians, and Egyptians were all acquainted with the art before 2000 B.C., so that the Israelites must have known of it, though they evidently did not understand its manufacture until later in their history. Glass (y'hâkkîth, R.V. crystal) mentioned with gold, hence clearly regarded as very precious, occurs in Job 28.17; this is the only reference to it, for the "hand-mirror" spoken of by the prophet (Is.3.23) was of polished metal. The words in Pr.23.31, "Look
not thou upon the wine when it is red, when it
giveth its colour in the cup," have been supposed
to imply that the cup was of glass; there is no
sufficient ground for the supposition, but even
were it so, it would not necessarily mean that
the cup had been manufactured in Palestine.
(6) One of the most important handicrafts
among the Israelites was that of the weaver.
This, which concerned itself almost exclusively
with the manufacture of clothing apparel, was
originally practised by the women alone,
though later by men too. As at the present
day in Palestine, so, no doubt, in very early
times, a handloom of the horizontal type was
used. The frame in which the warp (i.e. a num-
ber of parallel threads) was fixed was of wood,
and the woof (i.e. a number of threads running
at right angles to the warp) was worked with
the hand; but it is clear from the large num-
ber of references to weaving, etc., in O.T., and
the many kinds of words used, that much more
elaborate methods must have come into vogue
in comparatively early times. It must suffice
here merely to mention the chief of these.
Women spun (dashed) wool, flax, goats' and
camels' hair, and sheep's wool; the spindle
(pelekh) is mentioned, e.g. 2Sam.3.29 (Heb.),
Pr.31.19; that which was spun (i.e. the yarn)
is called maṭwē (Ex.35.25); the word for
"to weave" is ʻāragh (Judg.6.13); the loom
is called eregh (16.14); maṣṣēk̄āh and maš-
akhāh (Is.25.7 [Heb.]; Judg.16.13) are both
used for the web; sēk̄ī (Lev.13.48) is the
warp; dalāl (Is.38.12) the loom; the weaver's
beam (menōr ᵒr̄ghīm) is mentioned in 1Sam.
17.7, 2Sam.21.19; and the rather difficult
expressions bōttim ᵗbḥaddīm (lit. "houses for
the rods") and bōttim labb̄rīthīm (lit. "houses
for the beams "), both of which are explained
by being called "rings" (ṭābha'āthi), are also
evidently connected with weaving (Ex.25.27,
26.29), judging by the context. The woof
Handkerchief, Napkin

(‘ereb) is several times referred to in Lev.13. 47-50, together with some others of the technical names and numerically in Gen.14.14. 18.13.14. Although it is thus clear that the Israelites were very familiar with the art of weaving, they did not supply all their own requirements in this respect, but, especially for articles of more luxurious fabric, relied also upon imports from Babylon, Damascus, and Egypt (see 2K.5.6). (c.) Armor. The armor must also have been a familiar handicraft among the early Israelites, the art being required in the preparation of sandals (Gen.14.23), water- and wine-skins (Gen.21.14), coverings (Ex.26.14), girdles (Deut.1.14; 2K.1.8), and leather being mentioned (2K.1.8; Mt.3.4; and prob. Lev.14.12-13, where it has skin). In N.T. three references are made to Simon the tanner, who dwelt in Joppa, and with whom St. Peter stayed for “many days.” His house was by the seaside, nearness to water being a necessity to him for carrying on his tanning operations (Ac.9.43, 10.6.32). The O.T. “tanner” (’imra), means literally one who dresses skins (R.S.V., and have been stripped off (c.f. Sopa). (8) Although dyeing, like tanning, is never mentioned as a handicraft in O.T., it must nevertheless have been well known and practised, and there are references to it. The word used is ’aliham, which has the root signification of “red” (Ex.25.5, etc., of rams’ skins dyed red). In Ex.23.19 and 25.15 the different word occurs (tabhah), which means literally “to dip.” The various colours in connection with cloth, etc., mentioned in O.T. also prove the common knowledge of the art (Ex.39.1ff.; 2Chr.2.7; Esth.1.6, etc., etc.). For N.T. see Acts 16.14. (9) The art of Embroidery (or both by hand and loom (see 'Hearing above), was extensively practised by all nations of antiquity, including, evidently, the Israelites (Ex.35.15,38.23), though it was not of a very elaborate character, consisting of interwoven pieces of variegated cloth (see Judg.5.30; Ex.16.18,26.16, etc.). (10) The trade of a needlewoman is mentioned in connection with women’s garments. The Heb. word means literally “to wash” (kibbas). Garments were washed by being trodden down in water together with alkali or other whitening substance (Ex.19.10.14; Jr.2.22: Mal.3.2). (11) It was only in later days that tent-making became a handicraft, as each man could make the simple nomad’s tent for himself. In N.T. reference is made to St. Paul and Aquila—and probably to Priscilla also—as being tent-makers by trade (Ac.18.1-3). [W.O.E.]

Handkerchief, Napkin, Appon.

The two former of these terms, as used in A.V. = σωκόδραπος, the latter = σωκίνηδρος. Both are of Lat. origin: σωκόδραπος = sudarium, from σωκοῖς, “to sweat”; σωκίνηδρος = semicinctum, i.e. “a half girdle.” The sudarium is noticed in N.T. as a wrapper to fold up money (Lu.19.20); as a cloth bound about the head of a corpse (Jn.11.14,20.27), being probably brought from the crown of the head under the chin; and lastly as an article of dress that could be easily removed (Ac.19.12), probably a handkerchief worn on the head like the kaffiyeh of the Bedouin. According to the scholiast quoted by Schleusner, the distinction is that the sudarium was worn on the head, and the semicinctum was used as a handkerchief.

Hannah, one of the sons of Elkanah, and mother of Samuel (1Sam.1.2). The criticism that refuses to accept her hymn of praise as genuine, just as it denies the genuineness of the “Magnificat,” is purely subjective. Poetry is the natural expression of the emotion of a gift- man or woman, strongly stirred by some profoundly realized blessing. If Deborah could sing, why not Hannah? The argument that the poetry is unsuited to the occasion cuts both ways. It is inconceivable that some late writer should have put a song of national devotion, as Hannah’s, in the mouth of the prophet’s mother. What was appropriate to such an occasion is probably just the lesson we have to learn. The ideas of the hymn are highly original. With reminiscence of the poetry of Moses, Hannah regards the unhoped-for birth of a consecrated son as a demonstration of that divine power which is destined to uplift the humble, reconstruct society, and destroy the proud and ungodly. The same idea is to be found in the “Magnificat” (Lk.1.46-56) with a larger horizon, a profounder tone, and an allusion to the promise to Abraham and to Israel realized in the Messiah now born into the world. The reference in 1Sam.2.2 to “Jehovah’s king” and “Jehovah’s anointed” might possibly be regarded as “a later addition, after the model of Ps.29.11” (Klostermann), or as a “liturgical addition,” such as a number of psalms probably exhibit at their close. The abrupt ending without it is possible, inoffensive and natural. Yet Keil’s translation of it as an instance of prophetic insight is by no means impossible (see ver. 38). [F.E.S.]

Hannathon (Is.19.14), on N. border of Zebulun; now Kefer ‘Anan, 10 miles N.F. of Nazareth. [Gaillee.] [C.R.C.]
HANNIEL, son of Ephod, and prince of Manasseh at the division of Canaan (Num.34:23).

Hanoch.—1. Third son of Midian (Gen. 25:1).—2. Eldest son of Reuben (Gen.46:9; Ex.6:14; 1 Chr.5:3), and founder of the family of the Hanothies (Num.26:5).

Hanun.—1. Son of Nahash (2Sam.10:1, 2; 1 Chr.19:1,2), king of Ammon, who dishonoured the ambassadors of David (2Sam.10:14), and involved the Ammonites in a disastrous war (2Sam.12:31; 1 Chr.19:6), the termination of which may have been celebrated in the marriage of his daughter Naamah (see LXX. 1 K.12:24) with Solomon. If this assumption is correct, it would approximately fix the date of this war.—2. A man who, with the people of Zanoah, repaired the ravelin-gate in the wall of Jerusalem (Ne.3:13).—3. The sixth son of Zalaph, who also assisted in the repair of the wall, in the year on the east side (Ne.3:30).

Haphrah (two wells; Jos.19:19), a town of Issachar. The Onomasticon places it at Affarea, 6 miles N. of Legio; now el Farraiyeh, a ruin 6 miles N.W. of Lejijan. [c.r.c.]

Hara' (1 Chr.5:26 only). Possibly for Haran, noticed with Habor as a place to which the posterity of Abraham belonged. [c.r.c.]

Haradah, a desert station of the Israelites (Num.33:24-25); its position is uncertain.

Haran.—1. Third son of Terah, and youngest brother of Abram (Gen.11:26). Three children are ascribed to him—Lot (27: 31), and two daughters, viz. Milcah, who married his half-brother Nahor, and Segullah, who married his younger brother Pharez. He was born in Ur of the Chaldees, and died there while his father was still living (28). The ancient Jewish tradition is that he was burnt in the furnace of Nimrod for his wavering conduct during the fiery trial of Abraham.—2. A son of Caleb, by his concubine Epher (1 Chr.2:16).—3. A Gershonite Levite, of the family of Shimri, in the time of David (2 Chr.23:9).

Haran, the place whither Abraham migrated from Ur of the Chaldees (kashdim), where the descendants of his brother Nahor established themselves (cf. Gen.24:10 with 27:43). It is said to be in Mesopotamia (Gen.24:10), or more definitely, in Paddan-aram (25:20), the cultic setting of the day. It is the name well applying to the country which lies below mount Masius between the Khabur and the Euphrates. About midway in this district is a village still called Harrân, upon the Belik (ancient Bilichus), a small affluent of the Euphrates.

The name is probably the Babylonian harana (road), being on a trade route to W. The land of the kashdim (A.V. Chaldeans) was near the Khabur River (see Ezek.1:1). [c.r.c.]

Hararite, The, a description occurring thrice in the list (2Sam.23:11,33; cf. 1 Chr.11:27, 34:35) of David's guard; of Agee, Shammah, and Shabar.

Harbonah (Ezst.1:10) or Harbonah (7, 9), the chamberlain of Ahasuerus, who suggested the hanging of Haman on his own gallows.

Hare (Heb. 'arnebeth) occurs only in Lev. 11:6 and Deut.14:7, amongst the animals disallowed as food by the Mosaic law; and there is no doubt that 'arnebeth, the equivalent of the Arabic aynab, is rightly translated. Several species of hares are found in Syria and the adjacent countries, such as Lepus syriacus of Syria and Palestine. L. judeae of Palestine, L. sinaiticus of mount Sinai and N. Arabia, L. arabicus of Arabia Felix, and L. aegypticus of Egypt and Arabia. The idea that hares chew the cud is erroneous. [GONYE.] [R.L.]

Harel. [AREL.]

Hareph, a son of Caleb, and "father of Beth-gader" in the genealogies of Judah (1 Chr.2:51 only).

Har'eath, a "wood" (ya'ar) near Adullam (1 Sam.22:3), where David hid. The LXX. reads "city of David." It is in the territory of Kharis, among the wooded spurs E. of the valley of Elah, 7 m. N.W. of Hebron. [c.r.c.]

Harhaiah', father of Uzziel (6 Ne.3:8).

Harhas', an ancestor of Shallum, the husband of the prophetess Huldah (2 K.22:14).

Harhur', the sons of Harhur were Nethinim who returned from Babylon with Zerubbabel (Ezr.2:51; Ne.7:53).

Harim.—1. A priest in charge of the third division in the house of God (1 Chr.24:8).—2. Bene-Harim, probably descendants of the above, numbering 1,017, came up from Babylon with Zerubbabel (Ezr.2:39; Ne.7:42). Probably Ezr.10:22 and Ne.10:24 name them. The name occurs again in a list of the names of priests " who went up with Zerubbabel," and of their descendants in the next generation (Ne.12:13). In the former list (12:3) the name is changed to Rehum.—4. Another family of Bene-Harim, 320 in number, came from captivity at the same time (Ezr.2:51; Ne.7:79). They, like 2, had married foreign wives (Ezr.10:31), and had sealed the covenant (Ne.10:27).

Hariph' (Ne.7:24,10:19), a place in Judaea, perhaps the ruin Kharif, 3 miles S. of Adullam. [c.r.c.]

Harlot. (1) Israelites were forbidden to make their daughters prostitutes (Lev.19:29) (Family. D.15), the daughter of a priest being burnt (21:9); nor might the wages of a prostitute be brought into God's house for any vow (Deut.23:28[19]). The son of a prostitute was not entitled to inherit (Judg.11:1f). Prostitutes wore a distinctive dress (Gen.38:14; Prov.7:20). Promiscuity was condemned by Paul (Rom.13:14). (2) Religious prostitution was common in some heathen cults (Ba.6.11, etc.). It was strictly forbidden among the Israelites (Deut.23:17[18]), but appears to have been practised (Ho.4:14; cf. Am.2:7, etc.). [H.M.W.]

The sin implied in the term πορνη is denounced by St. Paul (1 Cor.6:13ff.) as the violation of natural and spiritual law. This sin was notoriously prevalent in Corinth. Lu.15:30 is the only passage in N.T. which may imply prostitution for gain. Harlots who repented on hearing the warnings of the Baptist are by our Lord contrasted with the unrepentant Pharisees (Mt.21:32). Rahab, the harlot, by her faith in the God of Israel (Jos.2:1; Heb.11:31), which showed itself in action (Jas.2:25), was saved when Jericho was destroyed (Josh.6:17).

Πορνη is used symbolically for a city (Rev.17, 1,5,15,16,19,2), with ref. to a similar usage in O.T.—e.g. Is.23:15ff.; Na.3:1. [H.T.]

Harnepher, one of the sons of Zophah, of the tribe of Judah (1 Chr.4:16, 23). [c.r.c.]

Har'od, Well of (R.V. "spring of"; the spring of trembling). By this well Gideon and
his army encamped against the Midianites (Judg.7.1), and here the trial of the people by the mode of drinking apparently took place. It was in the vale of Edom (see 6.33), and thus E. of that city and S. of the Midianite camp (7.1). The present 'Ain Jâlid (Goliath's spring), which forms a large pool under the S. cliffs, appears a suitable site. [C.R.C.]

Ha rodite, The, the designation of two of the harpists of David's guard, Sham mma and Elita (2Sam.23-25), doubtless derived from a place named Harod.

Haroeh, son of "Shobal, father of Kirjathjearim" in the genealogies of Judah (1Chr.2.52).

Harorite, The, the title given to Sham morri, one of David's guard (1Chr.11.27).

Harsheb of the Gentiles (goyim), where Sisera, lord (sâr) of king Jabin's chariots, dwelt (Judg.4.2,13,16), and whence he advanced (E.) to Tamar (ver. 6). Probably el Harâthiyeh, a village N. of the Kishôn, 8 miles S.E. of Haifa, commanding the gorge, and on the edge of the oak woods to its E. The word probably means "wooded" in Hebrew, and a chariot station, it was no doubt in the plain. [C.R.C.]

Harp (Heb. kinnôr, of uncertain origin). The kinnôr was the national instrument of the Hebrews, and well known through Asia. Its invention is assigned to the antediluvian period (Gen.4.21). The author of Shilie Haaggôborim describes it as resembling the median harp, and St. Jerome declared that it had resembled in shape the Gk. letter delta. Josephus says that the kinnôr had ten strings, and was played on with the plectrum; others assign to it 24, or 47 (Shilie Haggôborim); while in 1Sam.16.23,18-19 David is said to have played on the kinnôr with his hand. Probably there was a smaller and a larger kinnôr, and these may have been played in different ways (10.5). The word for "harp" (qitharôs or qathrôs, LXX. cithara, a cithara or lyre) in Dan.3 is a different one, and is said to be Gk. in origin; but its etymology is doubtful (D'Urvillaine). This lyre is represented on an ancient Hittite relief of Mer'ash in Syria, and at Beni Hasan in Egypt one of the Edomites (c. 2200 B.C.) has a ten-stringed lyre. It occurs with 5 strings on Jewish coins. At Thebes the harp proper is represented with 13 strings, and it also appears on an Assyrian bas-relief of 7th cent. B.C., which represents a procession of Edomite priests. In this case it has the form assigned by St. Jerome (see above) to the kinnôr.

Harrow. The Heb. word (2Sam.12.31; 1Chr.20.3) means some "spiked" iron instrument, and in Is.41.15 the mîrâq hârîq is the "spiked threshing sledge." [Agriculture.] The verb "harrow" (A.V. Is.28.24; Job 39.26; Ho.10.11), or "break dods," means to smooth or flatten. It may refer to the dragging of a thorn-bush after the plough, or to rolling with a stone roller, in each case drawn by cattle, as is still done in Palestine. The word cart-wheeldo (Is.28.27, 'ophân 'atelîd), or "wheel" (1Pr.20.26), refers rather to a "roller." Iron harrows are not used in the East. [C.R.C.]

Harsha. Sons of Harsha were Nezathim who came back from Babylon with Zerubbabel (Ezr.2.52; Ne.7.54).
HASHMONAH

derived from Hermopolis Magna, can hardly be maintained.

[2Chr.34.22] Hashmonah', a station of the Israelites, next before Moseroth (Num.33.29).

Hashub (R.V. correctly Hashshub).—1. A son of Phahath-moab, who assisted in the repair of the wall of Jerusalem (Ne.3.11).—2. Another assistant in the repair (3.23).—3. One of the heads of the people who sealed the covenant with Nehemiah (10.23). Possibly the same as 1 or 2. —4. A Merarite Levite, father of Shemaiah, 5 (11.15).

Hashubah, the first of a group of five men, apparently the latter half of the family of Zerubbabel (1Chr.3.20).

Hashum.—1. Bene-Hashum (Ezr.2.19; Neh.7.22) from Babylon were in Zerubbabel. [Aov.1.] Seven of them had married foreign wives, from whom they had to separate (Ezr.10.33; called Ason in rEs.d.9.33). Their chief was among those who sealed the covenant (Ne.10.18).—2. One of the priests or Levites who stood on Ezra's left hand, while he read the book (Deut.31.11).—4. (Haspah.)

Haspah. [Haspah.]

Hasmonaeans. [Maccabees, The.]

Hasrah (2Chr.34.22) = Harhas.

Hassenaah. The Bene-has-senaah rebuilt the Fish Gate in the repair of the wall of Jerusalem (Ne.3.3). [Senahah.]

Hashub (2K.23.18) = Hashub, 4.

Haspah. Bene-Haspah (Ne.7.46, Haspah) were Nethinim who returned from Babylon with Zerubbabel (Ezr.2.43).

Hat. [Head-dress.]

Hatach, a eunuch of Ahasuerus, and personal attendant of Esther (Ester 4.8ff.).

Hathath, son of Othniel (1Chr.4.13).

Hattush or Hatipha were Nethinim who returned from Babylon with Zerubbabel (Ezr.2.54; Ne.7.56).

Hatita. Bene-Hatita were “porters” (i.e. the gate-keepers), who returned from the Captivity with Zerubbabel (Ezr.2.42; Ne.7.45).

Hatti. Bene-Hatti were among the “children of Simeon,” who returned with Zerubbabel (Ezr.2.57; Ne.7.59).

Hattush.—1. A descendant of the kings of Judah, in a confused genealogy (1Chr.3.22). A person of the same name accompanied Ezra (Ezr.8.2), or Zerubbabel (Ne.12.2), from Babylon to Jerusalem. Probably it is the name of a family.—2. Son of Hashabiah: he assisted in the repair of the wall of Jerusalem (3.10).

Hauran, a province of Palestine twice mentioned by Ezekiel (47.16,18), identical with the Gk. province of Auranitis, and the modern Hauran. Josephus frequently mentions Auranitis in connexion with Trachonitis, Batania, and Gaulanitis, and the whole area thus constituted the ancient kingdom of Bashan.

Havilah.—1. A son of Cush (Gen.10.7) and—2. A son of Joktan (10.29). [Araba.] It is thought that the district of Khauidam, in the Yemen, preserves a trace of this ancient people. It lies between the city of San'a and the Hadramaut. It took its name, according to the Arabs, from Khulain, a descendant of Qahlan [Joktan], or, as some say, of Qahlân, brother of Himyar. It is a fertile territory, embracing a large part of mahrifin Arabi; mountainous, with plenty of water, and supporting a considerable population (see Gen.25.18; 1Sam.15.7).—3. Another Harvillah appears to have been on the Persian Gulf (perhaps of Chaldes, one of the present district Havillah, the Xelaxotu of Strabo (xvi.). The word may mean “sandy,”—4. Havillah in Gen.2.11 was apparently W. of the Caspian Sea (Pison being the Araxes River) near the gold-bearing region of Colchis in the Caucasus. [Eden:]

Havoth-jair, certain villages of the same land and Bashan, taken by Jair, and named after him (Num.32.11; Deut.3.14). In Jos.13.30 and rChr.2.23 the Havoth-jair are reckoned among 60 “cities.” In 1Chr.2.22 they are specified as 23, but in Judg.10.4, as 30 in number. Those in Argob (Deut.3.14) are called “Bashan-havoth-jair” (see Gen.33.13). Apparently some were in Gilead and some in Bashan.

Havoth-jair, a place (7.56).—8. Another Havillah appears to have been on the Persian Gulf (perhaps of Chaldes, one of the present district Havillah, the Xelaxotu of Strabo (xvi.). The word may mean “sandy,”

Havoth-jair, a place (7.56).—8. Another Havillah appears to have been on the Persian Gulf (perhaps of Chaldes, one of the present district Havillah, the Xelaxotu of Strabo (xvi.). The word may mean “sandy,”
succeeded by his son Benhadad III (13.24), having reigned 46 years. [T.G.P.]

HAZAIH (Ne.11.5), an ancestor of Maaseiah, of the family of the Shilonites.

Hazar- addar, etc. [Hazer, 1-7.]

Hazarpomateth, the third, in order, of the sons of Joktan (Gen.10.26). [Arabial] The Arab. Hadramaut (dead region) exactly represents the Heb. word. It is the province E. of the Yemen. [C.R.C.]

Haza zon - tamar = Hazezon-tamar, [Engedi.]

Hazel. [Almond-tree.]

Hazeleponi, the sister of the sons of Etam in the genealogies of Juda (1 Chr.4.3).

Hazer (Heb. ha'zer, Arab. hazer, enclosure) in the plnr. Hazerim (Deut.2.23). The Arabs still call the great stone circles of Moab by this name.—1. Hazer- addar, on S. border of the land of Israel (Num.34.4), answers to Hevron and Adar (Jos.15.3). The name probably survives at Jebel Hadirich, in the Tih plateau N.W. of Petra.—2. Hazarenan (Num.34.9,10; Ezek.47.17,48.1), the N. boundary of the land of Israel, on the high road W. from Zedad (Yuddyad). It was the N.W. border of Damascus, and on S. border of Hamath, on the Shopham (or "lip") of the Anti-Lebanon, about 6 miles E. of Rihban. The name, however, has not survived.—3. Hazar-Gaddah (Jos.15.27), a city in S. Judah, of the site of which is unknown.—4. Hazar-Hatticon (the middle village), in the Hauran (Ezek.47.16), is also unknown.—5. Hazar-Sual (Jos.15.28,19.3), near to Beer-sheba, is perhaps S'awa, a ruin on a hill 8 miles E. of Bir es Seba'. It was inhabited after the Captivity (1 Chr.4; 28; Ne.11.27).—6. Hazar-Susim (Jos.19.5), or Hazar-Susim (1 Chr.4.31; the village of horses), may have been at Sisim, 10 miles S. of Gaza.—7. Hazarmaveth (Hadramaut). [Arabia.]

Hazar, a royal city of the Canaanites (Jos.11.10,13,12.19), probably Hazor of Naphthali (19.36), near Ramah. The most suitable site is on the left bank of the S. branches of Kacham, 3 miles S. and 2 miles S.W. of Hanannah. Its king had a force of chariots, so that it was probably near the plains (Judg.4.2,17). It is perhaps noticed later (1 K.9.15; 2 K.15.29). Josephus thought it was in Upper Galilee, which is improbable. [Mekom.] It is noticed in 14th cent. B.C. by the Egyptian traveller (the Mohar), in connexion with towns of Lower Galilee; and a century earlier two of the Amarna letters may come from this Hazor (Brit. Mus. 47, 48).—9. Hazor (Jos.15.23), near Kedesh, in S. of Judah, is unknown.—10. (Jos.15.25 = Kerioth-hevron. [Kerioth, 2.—11. In Je.49.28,30,33, a kingdom near Kerioth.—12. Hazor of Benjamin (Ne.11.33), now the ruin Hazoor, 4 miles N.W. of Jerusalem.—13. Hazor-Haddattah (Jos.15.25), in S. of Judah, is unknown. [En-Hazor.] [C.R.C.]

Hazeroth (Num.11.35,12.16,33.17; Deut. 1.1), the third camp of Israel after leaving Sinai. Now 'Ain Hazerah (which correctly represents the Arabic) is about 3 miles S.S.W. of Tell el Asfar [Shafter], and 60 miles from Tell el Asfar [Shafter], these distances giving an average daily journey of 10 miles. [C.R.C.]

HAZEOZON-TAMAR, Hazeon-tamar, (Gen.14.7; 2 Chr.20.2). [En-Geddi.]

Haziel, a Levite of the younger branch of the Gershonites, in David's reign (1 Chr.23.9).

Hazer, son of Nahor by Milcah (Gen.22.22).

Head-dress. "Cintle is noticed as being worn by nobles (Job 29.14), ladies (Is.3.23), and kings (Is.62.3), while the "prer was an article of holiday dress (Is.61.3; A.V. beauty; Ezek. 24.17,23), and was worn at weddings (Is.61.10). The former describes a kind of turban or shawl, and its form probably resembled that of the high priest's me'nehpeh, as described by Josephus (3 Ant. vii. 3). "P'erre primarily means an ornament, and is so rendered in A.V. (Is.61.10; see also ver. 3, "beauty"), and is specifically applied to the head-dress from its ornamental character. It is uncertain what the term properly describes, but it may have applied to the jewels and other ornaments with which the turban is frequently decorated. The ordinary Bedouin head-dress is the keffiyeh, a square handkerchief, generally of red and yellow cotton, or cotton and silk, folded so that three of the corners hang down over the back and round the head, leaving the face exposed, but drawn round the head by a cord. It is worn over a felt cap, which is also worn alone, and represented on Syrian monuments. The keffiyeh appears as a Syrian head-dress in Egyptian pictures of Canaanites in 13th cent. B.C. The introduction of the Gk. hat by Jason, as a symbol of the gymnasium, was regarded as a national disonour (2 Mac.4.12). The Assyrian head-dress is described in Ezek.23.15 as "exceeding in dyed attire." The word rendered "hats" (R.V. mantles) in Dan.3.21 properly applies to a cloak.

Heathen. The Heb. "ak corresponds to our "stove." It was of stone or clay; placed in the centre of a room, slightly sunk into the floor (Je.36.22,23). [W.O.E.O.]

Heathen. Heb. "ar'ar (1 Ch.4.6) and "ar'ar. Celsius identifies the "ar'ar (1 Ch.17.6) with the "ar'ar of Arab. writers, which is some species of juniper; but there is no true juniper in these "parts of the wilds of the world. The "ar'ar tree or grove of trees is intended, the Tamarisk is the proper interpretation. Tamarisk is fond of "salt lands," and the name "ar'ar (naked) might well be applied to it. "Heath," in our acceptation, is particularly open to objections. [T.H.C.]

Heathen. The Heb. goy, from a root meaning "to collect," has properly the significance of "a mass of people," and so "a nation." But as used by the Israelites, who regarded themselves as separated from all others by their distinctive religion, the word easily acquired a religious meaning, and A.V. rightly translates it "heathen." The "nations," as worshippers of their several tribal gods, stand in sharp contrast to the Israelites, as servants of Jehovah. Yet the fundamental teaching of O.T. shows a considerable breadth of view, in that the heathen are regarded as the objects of God's care and the recipients of "mercies" (Ps.105.19,21). The settlement in Palestine was accompanied by wars of extermination of the heathen; and these wars are represented as being the
execution of the will of Jehovah (Deut. 30:16); for, however far removed from the spirit of Christianity, they are regarded by O.T. as a stern vindication of the law of holiness and as the punishment of wickedness. The prophets aimed at separating the people from the heathen around them, that the spiritual worship of Jehovah might not be degraded. But after the return from exile the spirit thus fostered deepened into a false pride and a narrow exclusiveness. So grew up Pharisaic Judaism, which was quite opposed to the spirit of the prophetic teaching. The struggles of nationalism under the Hasmonaean, with temporary success followed swiftly by failure, in part fostered the spirit of pride and exclusiveness, and made it very difficult for the Jews to accept the catholic teaching of Christianity, which overlaps all national distinctions. In it the spirit of exclusiveness absolutely disappears, and even the policy of isolation, adopted by the prophets to preserve the purity of the theocratic nation, is exchanged for one of missionary intercourse, in order that the knowledge of the universal religion might spread through the world (Mt. 28:19).

[j.c.v.D.]

Heaven. There are three Heb. words thus rendered in O.T. (1) רָאָת (farmament), a solid expansion through its lattices (Gen. 7:11; 2K.7:12,19) or doors (Ps. 78:23) the dew and snow and hail are poured upon the earth (Job 38:22,37). This firm vault, which Job describes as being "strong as a molten mirror" (37:18, R.V.), is transparent, like pellicud sapphire, and splendid as crystal (Dan. 12:3; Ex. 24:10; Ezk. 1:26; Rev. 4:6), over which rests the throne of God (Is. 66:1; Ezk. 1:26), and which is opened for the descent of angels, or for prophetic visions (Gen. 28:17; Ezk. 1:1; Ac. 7:56, 10:11). In it, like gems, the stars are fixed to give light to the earth and regulate the seasons (Gen. 1:14-19); and the whole sky is upheld by the mountains as its pillars (2Sam. 22:3; Job 26:11). (2) יָהָוָא, the Hebrew word used in the expression "the heaven and the earth," or "the upper and lower regions" (Gen. 1:1). (3) שִׁבְחָג ל, lit. dust; so, thin cloud that looks like powder (Deut. 33:26; Job 35:5). A fourth word, מָרָום, properly = exalted, which is used of heaven as a sign of exalted position, "on high" (Ps. 18:16; Job 25:30; Is. 24:18). The Jews seem also to have thought of a series of heavens (1K. 8:27; Eph. 4:10), consisting of three (cf. 2Cor. 12:2) or of seven. But of far greater importance than the physical, is the theological conception of heaven, as revealed especially in the Lord's Prayer: "Our Father which art in heaven," heaven is God's dwelling place. In heaven the Omnigentd God is especially present in two ways: (a) as there especially manifested to His angels who behold His face (Mt. 18:10); (b) as there perfectly obeyed by the angels who do His will. This perfect angelic knowledge and obedience, which is our example and ideal ("Hallowed be the Name, Thy kingdom come, Thy will be done, in earth as it is in heaven"), makes heaven the home of pure bliss, to which no ill can come, because there the all-wise and loving God of Israel is realized as also almighty. The kingdom of heaven is the kingdom of God in power. Heaven is far removed from the earthliness of earth, where God's will is disbelieved and there is sin and misery. Yet the kingdom of heaven has been founded on earth also, and as it grows heaven is brought nearer to earth. So St. John, as the crown of his vision, sees earth redeemed, and heaven descending to earth in the New Jerusalem (Rev. 21). The same thought is expressed otherwise in the form that the saints, made perfect, will be taken up into heaven. The description of the "holy city, new Jerusalem" in Rev. 21 and 22 suggests the following thoughts about heaven: (1) a "city," i.e. civic and social life, enriched by the "glory and honour of the nations," i.e. the activities of art; (4) God is the Light to all and the centre of all. Art. "Heaven," by S. D. P. Salmond, in Hastings, D.B. (3 vols. 1897-99). See also: "Scripture, Christian Doctrine of Immortality" and for the Jewish conceptions of heaven, see books on O.T. theology, e.g. those of A. B. Davidson, Dehler, and Schultz. [s.c.g.]

Heave-offering. [Sacrifice, 3, v. c.]

Firstlings. Hebrew. To the Semitic group of races (which contains the Babylonian, Assyrians, Moabites, Ammonites, Arabs, and Phoenicians) the Hebrews belonged, and their relation to them is marked by an affinity of language. The Semitic Elements in the Hebrew language, as shown by the Stone shows that the Hebrew language was closely akin to that of Moab. Also a community of traditions is found, which marks a common stock. The Creation Tablets of Assur-bani-pal show a conception clearly derived from the same source that underlies the early narratives of Genesis. But this community of origin emphasizes the distinctive characteristics of the Hebrew race. The Hebrews stand apart from all other Semitic races as the servants of Jehovah, Who is holy and requires holiness from His people. With this supreme note of the Hebrew religion we may contrast the cruelty of the Moabites, as represented on the Moabite Stone, and also the entire absence of all moral tone or teaching from the crude narratives of the Amarna tablets. The Hebrew race, alone of the primitive Semitic peoples, stands for a lofty morality, however far performance may have lagged behind principle. The origin of the name "Hebrew" is probably to be found in the root דָּבָה, which as a verb (דָּבָה) means to "pass over" or "emigrate." Their migrations had a religious significance (Gen. 12:1; Ex. 3:8); and so kindred nations thought of them preeminently as "the emigrants." It is notice-
able accordingly that the term “Hebrews” is generally used by way of contrast with other nations: but when there is no thought of other races, these people, who prided themselves on their ancestral covenant, prefer to describe themselves as “sons of Israel.” Hence “Hebrew” are contrasted with “Hellenists,” the former term being used of those who preserved the traditions of Palestinian Judaism, as against the admission of Greek influence. For the “Abiri, see Palestine.

[HELLENISt.

J.C.V.D.]

HEBREWS. The feminine form is thus rendered once in A.V. (Jo.3:4). Elsewhere it is given as “Hebrew woman.” [J.C.V.D.]

Hebrews, Epistle to. (1) Date. From internal evidence, while the Jewish ceremonial was still observed. For this is necessary (a) to his argument (7:14; cf. 9:9); (b) to the situation of his readers: since their trial consisted in reconciling their Christianity with their views of the person of the elder covenant. It was also written after the first generation of believers had died—i.e. 60-70 A.D. (2) Author. Various ascribed to Barnabas (Tertull. De Pud. 20), Clement of Rome, and St. Luke (both mentioned by Origen in Euseb. vi. 25). St. Paul, Apostolic Church’s Author. Origen’s remark, “Who the author is, God only knows” (Euseb. vi. 25). Its anonymous character certifies its genuineness; for it does not impersonate an apostle, as a longer might have done, and it shows that the apostolic church possessed another singularly able mind besides St. Paul. Theology. Throughout it is an apologetic one, to show the fulness of the Christian revelation, by demonstrating the perfect priestly character of Christ and His sacrificial work—in order to satisfy Jewish-Christian misgivings. (4) Contents. Three main divisions: A. Contrast between the agents of the two covenants (1-7). A magnificent opening sentence declares that revelations made formerly through created ministers, and characterized by fragmentariness of substance and diversity of form, are now completed by a new revelation, the Mediator of which transcends prophets, angels, and Levitical system in dignity, inasmuch as He stands in the midst of angels. A. Divinity. (1:1) He is the eternally predestined Mediator of mankind, instrumental in creation. (1:2) He manifests the divine attributes, and personally embodies the divine essence. (1:3) Contrast with the angels. His transcendent position is shown from His name as Son; (1:5) from the adoration which the angels were ordered to pay Him; (1:6) and from the eternity of His throne (1:8). Moral. (1:6) The solemn necessity of accepting this revelation, and the perils of rejection; illustrated in those who rejected an inferior revelation (2:1-4). (b) His humanity (2:5 to end). a. Now Christ in the Incarnation reveals man’s destiny. The prophecy of mankind’s ultimate complete dominion (6-8) is in Christ already fulfilled (9). His humiliation in humanity, so far from being incompatible with His majesty, is essential to His redemptive work (10). b. Sanctified (11) must closely resemble one another in all possible respects. Thus the Son, notwithstanding the immensity of the difference between their sonship and His, condescends to incarnation (14), death (14,15), and temptation (17,18); with the result that He became qualified through sympathy acquired by experience for His high-priestly work. Moreover, his conscious experience of death was (in virtue of His sinless perfection) absolutely unique in its character and effects (14,15). The difficulties to faith, presented by the humiliation of Christ, are (on profounder reflection) converted into proofs of His claims. Already then (in 2:17) the writer has introduced his central theme—the high-priesthood of Christ. He leaves for a time to show Christ’s superiority to Moses (3:1-6), and to urge again the seriousness of neglect (3:7-4:13). Then the idea of priesthood is resumed (4:14-5:10) and defined (5:1). The two essential qualifications are (a) human sympathy (5:2,3), and (b) divine vocation (ver. 4). Both these our Lord fulfilled (ver. 5-8). Thus, Son though He was, He learned obedience, and became (not in His filial, but in His mediatorial capacity) perfected in His humanity (ver. 9,10). With these high-priestly qualifications, He was divinely proclaimed high-priest after the order of Melchisedek (5:10; Ps.110). But here again comes a digression, caused by the reader’s unregenerate state. (6) Practical application. Against the idea of the priesthood of Melchisedek, which is affirmed to characterize the priesthood of Christ (7). Ps.110 was recognized as Messianic; cf. Mt.22:44; Lu.20:42. Thus the writer begins with an idea originating in the psalm. What did the Psalmist mean by this phrase entered into the Melchisedekian? The writer gives a mystic exposition based on the psalm. Both the affirmations and omissions in Genesis are held suggestive of great ideas. Positively, Melchisedek suggests a priest whose personal characteristic is righteousness, and whose work is peace. Negatively, the omission of any reference to antecedents and transmitted authority, to birth or death, suggests the idea—not, of course, historically true of Melchisedek, but true of the scriptural account of him—of simple permanence: “abideth a priest continually.” The superiority of this priesthood over the Levitical is suggested by the contrast with Abraham. This is confirmed by the Psalmist’s ascription to the Messiah of a Melchisedekian rather than an Aaronic character (7:11). And whereas the Levitical succession replaced its temporary officials as death removed them, the Melchisedekian conception of permanence is realized in the priesthood of Christ. (b) Contrasts between the two covenants (8-10:18). The difficulty suggested by the removal of the ancient covenant is here discussed (8). A new covenant was anticipated under the old (10:31)—a fact impossible had the old possessed completeness. The superiority of the new covenant to the old is thus demonstrated in two aspects: (a) In the sanctuary (Heb.9). The old covenant had a sanctuary of this world—i.e. locally and essentially earthly and transitory (9.1)—manifestly inadequate for inward perfection (9.9). Whereas the new has for its sphere the heavenly sanctuary, the heavenly part of Christ’s heavenly priesthood works. (b) In the sacrifice (10.1-18). Already the author has...
glided into this supreme thought. He now concludes that the sacrifices of the old covenant are related to the sacrifice of Christ, as shadow to reality. The reiteration of the former demonstrates imperfection. His is once for all, and possesses perpetual validity (vv. 11, 12). Thus the prophetic anticipations of Je.31 are realized in the priesthood and sacrifice of Christ. C. With an exposition of the conditions required for appropriating Christ's high-priestly work, the epistle concludes (Heb. 10.19 to end). (a) Faith: emphasized in 10.22ff., and analyzed in the magnificent ch. 11; (b) Hope (12); (c) Charity (13). See Homilies of St. John Chrysostom on the Hebrews; Comm. of Delitzsch; esp. Riehm, Lehrbegriff des Hebräerbriefes (1887), very valuable; Comm. by A. B. Bruce (1890) and by Bp. Westcott; Prof. Nairne in Becching, Lect. on Atonement; Ottley, Incarnation, pp. 121-129; B. Weiss, Bibl. Theol. N. T.; Hort, Judaistic Christianity, pp. 156-159; Kendall, Theol. of Heb. Christians (1886). [Sacrifice, B; High-Priest; Atonement, Day of.] 

Hebron 1. The third son of Kohath, who was the second son of Levi: the younger brother of Amram, father of Moses and Aaron (Ex.6.18; Num.3.19; 1Chr.6.2,18,23.12). The immediate children of Hebron are not mentioned by name (cf. Ex.6.21,22), but he was the founder of a family of Hebronites (Num.3.27,28,50; 1Chr.23.30,31), or Benjaminites (1Chr.8.6). It is in the genealogical lists of the tribe of Judah (1Chr.2.42,43). Mesheal is said to have been the "father of Hebron." These names may be those of the places or of persons who founded them. 

Hebron (alliance). 1. A city close to which was the oak of Mamre, apparently to its W. (Gen.13.18,23,2,35.27). It was the cave of Machpelah (23.19). It was originally called Kirjath-arba. It is noticed in 28 chapters of the O.T. It is said to have been 7 years older than Zoan (Num.15.22), or as old as about 2200 b.c. It had a "vale" (Gen.13.14) and gardens near it (18.19). It was taken by Joshua and destroyed (Josh.10.36), being a royal Canaanite city (12.10); afterwards a city of refuge and of priests (20.7,21.11,13; 1Chr.6.55,57). It was again attacked by the tribe of Judah (Judg.1.20,20). David reigned for 7½ years in Hebron (2 Sam.2.11; 1K.2.11; 1Chr.3.24,29-27). It had a "pool" (2Sam.4.12), where Ishbosheth's murderers were hanged. It was fortified by Rehoboam (2Chr.11.10), and smitten by Judas Maccabaeus (1Mac.5.65). It is now the town called el khath終 et Rayman, "Friend of the Merciful One" (Abraham), lying in an open mountain valley, 18 miles S. of Jerusalem. It is a stone town, with a high hill to E., and open ground with lower hills to W. Its population is about 18,000, who are Moslems, except 1,000 Jews. It has 25 springs and 10 large wells, besides tanks, of which the largest—built by the Sultan Kalawun in 13th cent. A.D.—may be on the site of the ancient "pool." There are fine vineyards to N., and an olive grove to W. The gardens also grow pomegranates, figs, quinces, and apricots. The oak of Mamre (a Sinaian, or Quercus psoracera, which may be several centuries old) is shown 2 miles N.W. of Hebron. The most famous site, however, is that of the cave of Machpelah, now shown in the Haram enclosure. The town runs S.E. for ¾ mile along the valley, and the Haram is on the E. side. The enclosure measures 197 ft. by 112 ft., and its walls, to a height of 25 ft. above the inner court, are of masonry identical with that of Herod's temple ramparts at Jerusalem, some stones being 25 ft. long. The southern part is occupied by a 12th-cent. church, now a mosque, with two minaretis at the corners of the Haram. A shaft from the church floor leads to a chamber about 12 ft. square, 15 ft. below the platform; and in its side-facing N.W.—a low tomb door is visible. A staircase, now closed, is said to lead into the inner cave, which, though apparently visited by Jews in 12th cent. (Rabbi Benjamin of Tudela) and in 13th (Rabbi Samuel), has not been described in recent times. Gk. texts of 6th cent. invocations of Abraham, are built into the church walls. This is the reputed site of the
Hedge. Three of the Heb. words thus rendered in A.V. denote simply that which surrounds or encloses, whether it be a stone wall (gādher, Pr. 34:17; Ezr. 10:10), or a fence of other materials: gādher and gādhera are used of the hedge of a vineyard (Num. 22:24; Ps. 89: 46; 1 Chr. 4:23), and the latter is employed to describe the rude walls of stone, or fences of thorn, which served as a shelter for sheep (Num. 32:16). The stone walls around the sheepfolds of most of the sons of Maac (Heb. 1.2) — of the kingdom of God, the ministry of which would be taken from the Jews and committed to another people (Mt. 21:38; Mk. 12:7; Lk. 20:14). (b) Believers, who, as brethren of Christ (Ro. 8:29; Heb. 2:11), are His co-heirs (Ro. 8:17) and God’s heirs. In Christ the body, in whom Abraham found his highest fulfillment (Rom. 4:13; cf. Gen. 12:3, 22:17, 18), are the true seed, and inherit the promises (Gal. 3:29; cf. Gal. 5:5). They are heirs of the kingdom (Jas. 2:5; Mt. 25:34), of the promise (Eph. 3:6; Heb. 6:17), of eternal life (Tit. 3:7; Mt. 19:29; 25:46), of salvation (Heb. 1:14), and of the grace of life (i.e. eternal life) (1 Tm. 3:7). See also Rev. 21:3. (c) The patriaets, who by faith became heirs of the promise: Noah (Heb. 11:7), Abraham, Isaac, Jacob (11:6). [Testament.] [H.H.]

Helah, one of the two wives of Ashur, "mother" of Tekoa (ver. 4:5).

Helam (2 Sam. 10:16, 17), an unknown place, = Medeba (1 Chr. 19:7). [C.R.C.]

Helbah, a town of Asher (Judg. 1:31). The site is unknown. [C.R.C.]

Helbon, a place famous for wine, near Damascus (Ezk. 27:18). Now Helbon (identified by Porter), a village with fine vineyards, 13 miles N. of Damascus. [C.R.C.]

Helchiah (1 Esd. 8:1), Helchias (2 Esd. 1:1), = Hilkiah, 2.

Heldai. —1. The Netophathite: the captain for the twelfth month for the temple service (1 Chr. 27:15). — 2. An Israelite returned from the Captivity, for whom, with others, Zechariah was commanded to make symbolic crowns (Zech. 6:10).

Heleb (2 Sam. 23:29), Heleed (1 Chr. 11:30), son of Baanah the Netophathite, and one of David’s guard.

Helek (Num. 26:30), a descendant of Manasseh, through Gilead, from whom sprang the Helemites.

Hellem. —1. A descendant of Asher; if "brother" (1 Chr. 7:35) refers to Shamer (ver. 34, cf. 35), he may be the same as Hotham. — 2. (Zech. 6:14) Apparently the same as Heldai, 2.

Helphah, a border town of Naphtali (Jos. 19:33). Perhaps Beit Le (Vandeveldt), 12 miles S.E. of Tyre, on the W. border of the tribe, towards the N. [C.R.C.]

Helzer. —1. One of the Thirty of David’s guard ("the Faltite," 2 Sam. 23:26; "the Pelonite," 1 Chr. 11:27), an Ephrainite, captain of the seventh monthly course. — 2. A man of Judah, son of Azariah (1 Chr. 2:39).

Heliah (2 Sam. 10:15), a captain of the Virg of Mary (Lk. 2:3). (Genealogy of Jesus Christ.) — 2. The third of three names inserted between Achion and Abaris in the genealogy of Ezra, in 2 Esd. 1:2 (cf. Ezr. 7:2,3).

Hellas (2 Esd. 7:39) = Eliah.

Heliopolis. [Beth-shemess, 4.]

Helkal, a priest of the family of Meriaoth, in the days of Jokam (Ne. 12:15).

Helkath (Jos. 19:25, 21:31), a Levitical city of Asher. The site is doubtful. [C.R.C.]

Helkoth-hazzurrin ("field of swords," apparently close to the pool of Gibeon, where the combat took place between the two parties of Joab’s and Abner’s men (2 Sam. 21:16). C. F. T. Drake in 1872 suggested a connexion with the Hebrew word, "askar" (soldier’s valley); just N. of Gibeon. [C.R.C.]

Helkiat (1 Esd. 1:8) = Hilkiah, 2.

Hell. This word has been used in two widely different senses. (1) The abode of the departed generally; employed in this sense repeatedly in A.V. for the Gk. sheol (e.g. Ps. 139:8) and the Gk. Hades (e.g. Ac. 2:26, etc.). In R.V. hell is retained in this sense in one passage only (Is. 14:9-15); elsewhere Hades in N.T. and sheol in O.T. are simply transliterated. sheol is sometimes translated in A.V. by "the pit" or "the grave." It is, of course, with the meaning (1) that the Apostles’ Creed says our Lord "was descended into hell." (For sheol and the condition of the dead there, see Future Life.) (2) The place of final punishment for the dammed. In modern English the word has come to be used entirely in this sense, and for this reason is employed in the R.V. of N.T. only where the word Gehenna is found in the original Gk. This word is (with the one exception of Jas. 3:6) confined to the Synoptic Gospels, where it is used 11 times. In all cases it is put into our Lord’s mouth by the evangelists. There is no doubt that our Lord used the word Gehenna as a name familiar to the Jews who heard Him, and as conveying familiar ideas.
Hellenist

Hellenist. Hellenic culture in the East dates from the conquests of Alexander. In Palestine itself the progress of Hellenism was obstructed by religious barriers, but the fact that Jews of Palestine did not renounce the word. They regarded it as a place in the underworld where the wicked were punished by torturing fire. The expression "the Gehenna of fire" is found twice in St. Matthew (5.22, 18.9), and the mention of fire in connexion with Gehenna is seen in Mk.9.3,48; Jn.16.2, etc., to convey the impression in which the punishment of fire is spoken of by our Lord and the apostles, without the mention of Gehenna (e.g. Mt.13.42,50,18.8, 25.41; Lk.3.9,17; Rev.19.20). We do not know whether the fire is to be understood literally or figuratively. The symbolic way in which fire is often spoken of, and the expression "where their worm dieth not, and the fire is not quenched," (in which the worm and the fire can hardly both be literal), allows us to have an open mind on this solemn question. But in any case some fierce and most terrible agony is meant. Another question which cannot be answered with absolute certainty is whether "the Gehenna into which the wicked will be cast into Gehenna," meant to the Jews a final and irrevocable eternal punishment. It is almost certain that in the minds of the Palestinian Jews of our Lord's day it did. The Palestinian Jews of a later date, and the Alexandrian Jews at an earlier time, regarded Gehenna as a temporary place of punishment for some engaged in perpetual for others. But there is no trace of such an opinion in the Palestinian of the first half-century A.D., while the other belief is often found. It is quite certain that no argument in favour of Universalism can be derived from the word as used by our Lord. Whenever our Lord speaks of the time at which the wicked will be cast into Gehenna, it is with reference to his second coming and the end of the world. Art. "Hell," by S. D. F. Salmond, in Hastings, D.B. (5 vols. 1904). On the use of "Gehenna" in Jewish literature outside the canonical books, Charles, Eschatology, pp. 215, 217. Noah. F._sheet. in N.T. Times, div. ii. vol. ii. § 26, p. 13, and § 29, p. 183. [S.C.G.]

Hellenistic Greek. The term "Hellenistic" is properly applied to all such, and only such, Greek literature as was written by persons who were not Hellenes by birth, but "Hellenists": to Hellenize being to affect or imitate Hellenic speech or manners, Gk. words, transliterated into Heb. characters, is found in the Mishna; the Gk. and Roman systems of coinage were largely adopted; and literature received a new impress, Hellen's temple being constructed largely on Gk. models. There are various indications of a wide knowledge of the Gk. language in Palestine. The tablets erected in the temple on the barrier, beyond which no Gentile might pass, were written in Gk.; Herod surrounded himself with a band of Gk. scholars, and many persons, who had a Gk. education lived permanently at Jerusalem, had their own synagogue (Ac.6.9), and were an important section of the Jewish church (Ac.8.1). The migratory habitation of the Jews contributed still farther to the fusion of Gk. and Heb. thought. Colonies of Jews became numerous in the Greek cities of the Roman empire, and vast numbers of these Jews of the Dispersion were accustomed to assemble at Jerusalem for the feasts (Ac. 2.5). These periodic incursions necessarily left their mark even on the conservative atmosphere of Jerusalem itself. The Hellenizing spirit of Palestine reached its climax at the beginning of the Christian era. [GREECE.] We may now ask more definitely who are meant by the Hellenists (Ελληνισταὶ) of N.T. (A.V. Grecians; R.V. Grecian Jews). They are people of Jewish extraction; and consequently the term does not include the proselytes, or men of Jewish race who had come to the Jews in a spirit of enmity. Their distinctive characteristic is that they have accepted Hellenic culture, though not the Hellenic religion. Their most conspicuous mark would be the use of the Gk. (Hellenistic) language instead of Aramaic, the vernacular of Palestine. No doubt the Gk. language was also understood by many who refused to allow Hellenism to influence their consciences. But such, though capable of speaking Gk., would commonly use Aramaic. Hence, broadly, the Hellenists are the Gk.-speaking Jews. They appear as the earliest opponents of St. Paul at Jerusalem (Ac.9.29). They did not easily fuse with the Aramaic-speaking Jews (E.V. Hebrews), as is illustrated by the jealousy which appears at the time that arose between Jerusalem over the treatment of their widows (Ac.8.1). An important outcome of Hellenism is the Greco-Jewish literature. It is difficult to over-estimate the influence exerted by the LXX., which gave to the Heb. Scriptures a medium that allowed Hellenic thought to be brought to bear upon the O.T. revelation. Thus, the way was prepared for the appearance of the N.T. in a language whose genius was most admirably suited to convey the spiritual teaching of Christianity. Another remarkable product of the Gk. genius upon the Jewish mind is found in the writings of Philo, which have never had any real bearing upon the development of Christian doctrine, in spite of attempts made to derive the idea of the Logos from his speculations. Schürer, Hist. of the Jewish People. [J.C.V.D.]

Gk. terms were freely borrowed, both in civil and military nomenclature; a plentiful use of
and a Hellenistic foreigner (in N.T. a Jew) who did this. Practically the term is limited to Gk. spoken or written by Orientals. But in practice there has been further limitation, frequent, though not consistently maintained, to Jewish Gk. Hence the term "Hellenistic Greek" may (with almost equal reason) be used (a) as equivalent to Judaeo-Hellenic, or (b) in a wider sense which will include the Gk. spoken by natives of Egypt, Syria generally, and the Levant and beyond them, if we have the authority of eminent scholars. While admitting the wider sense, we may say (with Dr. Swete, *Intro. to the O.T. in Greek*, p. 204) that "the Jewish Gk. spoken in Palestine was 'Hellenistic' in the strictest sense," and that the term "is applied with special appropriateness to the Alexandrian Bible. The writers of N.T. were all, there can be little doubt, bilingual; as was probably the major part of the population of Palestine and of all Syria. Syrian Gk., and consequently the basis of the Gk. of N.T., was but a slightly provincialized variety of that ordinary Gk. which was known as "the common language," (e.g. Xenophon, *Aristotle*, etc.), a language which, inheriting the vocabulary of Xenophon and of Aristotle, but abandoning the characteristic forms and subtleties of "pure Attic," was, in 2nd cent. B.C., used by the historian Polybius, and thenceforward by all writers excepting such as affected archaisms or "Attic" style. This universal dialect naturally included Macedonian elements, and (after the Roman conquest of the Gk. speaking world) a few Latinisms. As spoken in Palestine, side by side with Aramaic, it naturally reflected—and sometimes re-created—certain features of the alternative speech. As written by Jews conversant with the O.T. (through Arama. Targum, or Gk. LXX.), it necessarily reproduced (or was modified by) Hebraic modes both of thought and of expression. But here a very strong distinction should be drawn. While most of the thought is Hebraic, the expression of it is predominantly Hellenic. In other words, the language of the O.T. (through Arama. Targum, or Gk. LXX.), it necessarily reproduced (or was modified by) Hebraic modes both of thought and of expression. But here a very strong distinction should be drawn. While most of the thought is Hebraic, the expression of it is predominantly Hellenic.
HEN

Hen. According to A.V. of Zech.6.14, Hen is a son of Zephaniah. But, following the LXX., many take the words to mean "for the kindliness of the son of Zephaniah" (cf. ver. 10).

Hen, noticed in the Bible in Mt.23.37 and Luke 13.34, is doubtfully:—

Hena, a city of a seemingly monarchical state, subjected by the Assyrians during or before the time of Sennacherib (2K.19.13; Is. 37.13). Anath, which is mentioned by Assur-nasir-apli (880 B.C.) as situated on an island in the Euphrates, has been suggested as the place intended. In 2K.16.9.10 it is designated with 'Anah, on the right bank of the stream. Henedad, head of a Levite family which took a leading part in rebuilding the temple (Ezr.3.9).

Hennoh. [Camphire.]

Henoch. —1. (1Chr.1.3)=Enoch. 2.—

(1Chr.1.33)=Hanoch. 3.—

Hepher, a Shepherd of Gilead, head of the family of the Hepherites, and father of Zelophehad (Num.26.32,33;37.1;Jos.17.2,3).

2. Son of Ashur, the "father" of Tekoa (1Chr.4.6). 3. The Meg Jerathite, one of the heroes of David's guard (1Chr.11.36 only).

Hepher. —1. (Jos.15.17.) A royal Canaanid city. It was the site of the Phoenician city of Tyre. 1K.4.10 noticed with Sochoh (Shocoiro) and Aruboth, apparently in the Hebron mountains. The word means a "well"—Arab. Hattireh—but the site is unknown. [C.R.C.]

Hephzie-bah.—1. (My delight in her.) A name which is borne by the restored Jerusalem (Is.25.8). It is perhaps also a compliment to—2. The queen of Meshech, Hezekiah, and mother of Manasseh (2K.21.1).

Herald. Dan.3.4 only (Aram. kârôz, "crier"); but kîpê̇, kîpê̇sâw ("preacher"); "preach," iTim.2.7. etc.) are lit. "herald," or "proclaim as a herald." [H.S.]

Heracles was the name generally given by the Greeks to the supposed hero possessing many attributes of their own god, to the Tyrian tutelary deity, whose national title was Melkarth (i.e. king of the city). The prevalence among the Hebrews of the worship of Hercules, under the generic title of Baal, was largely due to Ahab's Phoenician wife, Jezebel (1K.16.31 ft.). In 717 B.C. Jason, brother of Onias III, sent an offering intended for the sacrifice of Hercules (2Mac.4.19-28). [C.D.]

Herd, Herdsman. Cattle were used by the Hebrews for milk, and the ox for ploughing, etc. [Agriculture], but, except as sacrifices, the flesh was not generally eaten. Hence Moses exclaims, "Shall the flocks and herds be slain for them?" (Num.11.22); and in Palestine herds are still the wealth of a village, only occasionally providing a victim for a feast or a vow. [Butter; Cart; Cheese.] Bashan and Gilead were great cattle-breeding regions (Ezk.39.13; Num.32.1.). The pure Egyptians hated the foreign "shepherds" who ruled them (Gen.46.34, see 46.32.), but the foreign Pharaoh himself, the son of Pharaoh himself, had cattle (47.6), as well as his subjects (ver.16) and the Hebrews (Ex.12.38). Cattle only find grass in spring in Palestine, and are fed with fodder at other times (Job 6.5.); see Chaff. They werestabbed when not in the field (Ex.9.19.). The younger men whose fathers were rich in cattle were the herds (1Sam.11.5). Solomon had special officers over cattle (1Chr.27.29). The wages of herdsman and their duties (cf. Gen.31.38-41) are laid down in the laws of Hammurabi, king of Babylon, as early as 2100 B.C. The Egyptian and Assyrian records contain many allusions to the great wealth of Palestine in herds and flocks, from 1500 to 700 B.C. Amos was a herdsman in a pastoral region at Tekoa (Am.1.7,14). [C.R.C.]

Heres, Mount (Judg.1.35), near Ajalon: unknown. [C.R.C.]

Heresh, a Levite attached to the tabernacle (1Chr.9.15).

Hermon, the name of a Christian in Rome greeted by St. Paul at the close of his epistle to the Romans (16.14). Nothing further is known of him. Origen and others have identified him with the author of The Shepherd. But this is a mere guess. The name Hermon was exceedingly common, and the character of The Shepherd is so different from that of a Christian in Rome that the identification is very improbable. [A.C.D.]

Her'mes, a man saluted by St. Paul in Ro. 16.14. According to tradition he was one of the seventy disciples, and afterwards bishop of Salona in Dalmatia.

Hermo genes, mentioned by St. Paul with Phygellus in 2Tim.1.18, as among the "all in Asia," who had turned away from him. The meaning of the phrase was, doubtless, clear to Timothy, but is less evident to us. It may mean the general trend of opinion in Asia Minor, or the Asiatics then in Rome to whom St. Paul had looked vainly for assistance. [A.C.D.]

Her'mon (= separate), the greatest outlier of the Lebanon, (which is properly the whole of Palestine on N. It rises 9,200 ft. above the sea, and the summit is snow-covered, except in autumn. The modern name is Jebel esh Sheikh, "Mountain of the (Druze) chieft."

Called also Sirion and Shenir (Deut.3.8,9), or Sion (4.48). See Jos.11.17,12.1,15,13.11. 1 Chr.7.23. 4.3, etc.) a city of Phoenicia, the mount of which is near Senir—a name which (in 14th cent. A.D.) applied to the range to its N. "The Hermons" are contrasted (Ps.42.6) with Mizar. It is coupled with Tabor as a sacred mountain (89.12), and the dew of Hermon is said to fall on Zion (133.3). It is again distinguished from Syrian Hermon (Deut.4.5) which is supposed to descend from Sion in the north, and which confirms the Hasin, the mountain of which is supposed to have been the place of sacrifice, and to have been a holy mountain in the eyes of the Hebrews, was in early times a holy place to the Jews. The cedars of Lebanon were sacred to the god Baal, and the temple of Baal was built there. The summit is formed by three low peaks, and the highest appears to have been a place of sacrifice, and was circled by a low wail of Roman masonry. A cave is hewn hard by. In the Onomasticon a temple on the summit is noticed as still frequented in 4th cent. A.D. There are several other small Greco-Roman temples on the lower slopes. The summit is bare, but fine vineyards occur lower down; and, on W., where the sandstone crops up, under 6,000 ft. above, there are fir-trees and pines. [C.R.C.]

Hermonites (Ps.42.6[7])=the Hermains. [HERMON.]

Herod. Various accounts are given of the ancestry of the Herods. It seems certain that they were of Idumean descent. Aliens by race, they were Jews in faith. The general
policy of the whole Herodian family centred in the endeavour to gain the favour of the Romans. They were agreeable and competent, and understood the art of bribery. —1. Herod the Great was second son of Antipater (who was appointed procurator of Judaea by Julius Caesar, 47 B.C.), and of Cypros, an Arabian of noble descent. At the time of his father's elevation, though only 15 years old, he received the government of Galilee, and shortly afterwards that of Coesosyria. When Antony came to Syria (41 B.C.), he appointed Herod and his elder brother Phasael tetrarchs of Judaea. Herod was forced to abandon Judaea the next year by an invasion of the Parthians, who supported the claims of Antigonus, the representative of the Hasmonaean dynasty, and fled to Rome (40 B.C.). At Rome he was well received by Antony and Octavian, and appointed, by the senate, king of Judaea, to the exclusion of the Hasmonaean line. With the help of the Romans, he took Jerusalem in 37 B.C., and completely established his authority throughout his dominions. After the death of Antony, he espoused Octavia, at Rhodes, and his noble bearing won for him the favour of the conqueror, who confirmed him in the possession of the kingdom, 31 B.C., and in the next year increased it by the addition of several important cities, and afterwards gave him the province of Trachonitis and the district of Panas. The remainder of the reign of Herod was undisturbed by external troubles, but his domestic life was embittered by an almost uninterrupted series of injuries and cruel acts of vengeance. Terrible acts of bloodshed were perpetrated by Herod both in his own family and among his subjects. He is said to have ordered the nobles whom he had summoned in his last moments to be executed immediately after his decease, so that that event might be attended by universal mourning. It must have been at the time of his fatal illness that he ordered the slaughter of the infants at Bethlehem (Mt.2:16-18); and from the comparative insignificance of the murder of a few young children, in an unimportant village, it is not surprising that Josephus does not mention it. In dealing with the religious feelings of the Jews, Herod showed no regard for public opinion. But while he thus alienated the affections of the Jews, he adorned Jerusalem with many splendid monuments; above all, the temple, which he rebuilt with scrupulous care. This restoration was begun 20 B.C., and completed in a year and a half. But fresh additions were constantly made in succeeding years, so that the temple was "forty and six years in building" (Jn.2:20), from the commencement of Herod's work to the completion of the latest addition then made.—2. Herod Antipas was son of Herod the Great by Malthace, a Samaritan. His father had originally destined him as his successor in the kingdom, but by the last change of his will appointed him "tetrarch of Galilee and Peraea" (Mt.14:1; Lu.3:19,9,7; Ac.13:1; cf. Lu.3:1). He first married a daughter of Aretas, "king of Arabia Petraea"; but after some time made overtures of marriage to Herodias, wife of his half-brother Herod Philip, which she received favourably. Aretas, indignant at the insult offered to his daughter, found a pretext for invading the territory of Herod, and defeated him with great loss. This empty victory was used as a pretext for the execution of Josephus (18 Jan. v. 2), who was arrested by the tetrarch of Galillee to send Him for examination (Lu.23:6ff.) to Herod Antipas, who came up to Jerusalem to celebrate the Passover. The city of Tiberias, which Antipas founded, and named in honour of the emperor, was the most conspicuous monument of his long reign.—3. Herod Philip L. (PhilPp. Mk.6:17) was son of Herod the Great and Mariamne, and must be carefully distinguished from the tetrarch Philip. He married Herodias, sister of Agrippa L., by whom he had a daughter Salome. Herodias, however, left him, and made an infamous marriage with his half-brother Herod Antipas (Mt,
HERODIANS

(14:3; Mk.6:17; L.3:19). He was excluded from all share in his father's possessions in consequence of his mother's marriage (Mk. 3:22). He was a nephew of Herod the Great and Cleopatra. He received as his own government Batanea, Trachonitis, Auranitis, Gaulanitis, and some parts about Jamnia, with the title of tetrarch (L.3:1). He built a new city on the site of Paneas, near the sources of the Jordan, which he called Caesarea (Mt. 16:3; Mk. 8:27), and raised Bethsaida to the rank of a city, under the title of Julius, and died there 34 A.D. He married Salome, daughter of Herod Philip II.

—5. Herod Agrippa I was son of Aristobulus and Berenice, and grandson of Herod the Great. Brought up at Rome with Claudius and Drusus, after a life of various vicissitudes, he was thrown into prison by Tiberius, where he remained till the accession of Caligula (Caligula, 37 A.D.), who gave him the governments formerly held by the tetrarchs Philip and Lysanias, and bestowed on him the title of King (Ac.12:1), and, on the banishment of Antipas, received his dominions also. Afterwards Agrippa I was again thrown into prison (47 A.D.) the government of Judea and Samaria. Unlike his predecessors, Agrippa was a strict observer of the law, and successfully sought the favour of the Jews. It was probably with this in view that he put to death St. James, the son of Zebedee, and imprisoned St. Peter (50 A.D.). He had his ambitious projects interrupted by his death. In the fourth year of his reign over the whole of Judea (44 A.D.) he attended some games in honour of the emperor at Caesarea. There (12:21) his flatterers saluted him as a god; and he was suddenly seized with terrible pains, and (being carried from the theatre to the palace) died after five days' agony.

—6. Herod Agrippa II was son of Herod Agrippa I. and of Cypros, a grandniece of Herod the Great. When his father died (44 A.D.), he was at Rome. Not long afterwards, however, the emperor gave him (c. 50 A.D.) the tetrarchy of Chalcis, which had belonged to his uncle Herod the Great. He held this dignity till his death, and the tetrarchies formerly held by Philip and Lysanias, with the title of King. His relations with his sister Bernice (25:13) caused suspicion of grave evil. In the last Roman war Agrippa took part with the Romans, and after the fall of Jerusalem retired with Bernice to Rome, where he died in the third year of Trajan (100 A.D.). The appearance of St. Paul before Agrippa (60 A.D.) offers several characteristic traits—e.g. the "pomp" with which the king came into the audience chamber (25:23); and the cold irony with which he met the impassioned words of the apostle (25:27, 28).

HERODIANS. The Herodians were a political party. They were rather men of various parties, who from various motives—longing for national independence, hatred of a heathen rule in Jerusalem, sympathy with Herod's compromise between Judaism and Hellenism—hoped for a restoration of Herod the Great's kingdom, of which they perhaps Antipas. The bond uniting the Herodians was a political aspiration. That aspiration Christ opposed, not merely by His warning against the "caucus of Herod" (Mt.8:15), or His condemnation of Antipas as "that fox" (L.13:32), but by the whole tenour of His teaching. And so the Herodians joined the Pharisees, in the publicize plotting His destruction (Mt.22:16ff.; Mk.3:6), and in Jerusalem, by the question of the tribute money (Mt.12:13ff.), trying to force Him either to discredit Himself with the people, or else embroil Himself with the Roman authorities, and so secure His own condemnation.

Herodias, daughter of Aristobulus, one of the sons of Mariamne and Herod the Great, and so sister of Agrippa I. She first married her uncle, Herod Philip I.; then she left him and married his half-brother and her stepuncle, Herod Antipas, whose wife then living with him was the daughter of Aeneas, or Aretas, king of Arabia. For the injury done to his daughter, Aretas made war upon Herod and routed him with the loss of his whole army. The head of St. John Baptist was granted to Herodias' request (Mt.14:8-11; Mk.6:24-28). According to Josephus, the murder was committed in the fortress Macheerus, which looks down from the E. upon the Jordan, and there Antipas went with Antipas into exile at Luggudum.

HEROION, a "kinsman" of St. Paul dwelling at Rome; perhaps of Aristobulus' household (Lightfoot). Late tradition makes him bishop of either Tarsus or Patra (Ro. 16:19).

HERON. The Heb. 'anáphd (= nose or beak) appears in an Assyri. list of birds as anáp, and as an unclean bird, or rather perhaps a group of birds, in Lev.11:19 and Deut.14:18, but whether it really denotes the members of the heron tribe (Ardeidae) is uncertain. Many members of the group, such as the greyl heron (Ardea cinerea); purple heron (A. purpurea); egret (A. garzetta); buff-backed heron (A. bulblulus); and the squacco heron (A. ralloides) inhabit Palestine. [R.L.]

HESED. The son of Hesed was ruler for Solomon in the district of "the Arubboth, Socoh, and all the land of Hipher" (1 K.4:10), i.e. in the tribe of Judah. [K.J.]

Heshbon, the capital of Sihon, king of the Amorites, who expelled the Moabites (Num.21:25-28; Je.48:45). It was rebuilt by the Reubenites (Num.32:37), and is noticed in 7 passages of the Pentateuch in connexion with king Sihon. It was given to the Levites (Jos.21:39; 1 Chr.6:81), and was held for 300 years by Israel (Judg.11:26). It was in the midst, or "plateau" of Moab, and near the S. border of Gad (Jos.13:17, 26). It had cornfields near it (Is.16:8,9), and "pools" beside the gate of Bath-Rabbim (Can.7, 4). It is now the ruined city Heshbon, on the plateau of Moab due E. of Jericho. The remains are those of the later Roman town. The site, however, is standing on high ground with plains round it. The road from W. ascends a steep slope, and passes through a rock cutting called el Buweb (the little gate), which may be that of Bath-rabbim. On the W. slope a fine brook, with its wadis, fields, full of small fish, flows S. and W. from Ain Heshbon. To the north the town shspools the Song of Songs perhaps refers. A few oleanders and grassy plots flank the stream; the plain above is fit for corn lands. There is a remarkable group of rude stone

Heshmon, a place named, with others, as existing in the extreme S. of Judah (Jos. 15:27). Nothing further is known of it.

Heth, the forefather of the Hittites. In the ethnological tables of Gen. 10 and 1 Chr. 1. Hebrew is a son of Canaan.

Hethlon, on the N. border of Palestine (Ezk. 47:15, 48:1). "The way of Hethlon as one goeth to Hamath" is apparently the "entrance to Hamath" (Num. 34:8) or gorge of the Eleutherus River. [C.R.C.-]

Hewer. [Handicrafts.]

Hexateuch. The (six-fold-book), the name given in the critical schools to the first five books of O.T. (Pentateuch) and the book of Joshua, which together are supposed to have formed originally one large work. The documents alleged to run through the first five books (J, E, P), are believed to run through the book of Joshua also. This theory is not so easily defended as it may seem at first sight. It is pointed out, as by Cornill, that the sources are quite differently worked up in the book of Joshua from what they are elsewhere. Others question the existence of the documents. Wellhausen and Steuerneif. c.e., contend that J is not present in the book at all. Wellhausen thinks that the P of Joshua is not the P of the older books. The older P, he supposes, "exists altogether at the death of Moses." In Joshua "the priestly code," he says, "is simply the filling up of the Jehovistic-Deuteronomic narrative." The Deuteronomic hand also is not that of the author of Deuteronomy as it would seem, then, that the book of Joshua must, after all, be treated as a distinct work. In favour of this is the fact that the Samarians, who accepted the Pentateuch, have always regarded Joshua as distinct, and possess an independent book of Joshua. [Samaritans, i. 30-3.]

Hezron (Hezron). Hezron, the father of Ramon, and, as his name means, "he will be exalted." [I Chron. 2:17].

Hezekiah.—I. The famous king who came to the throne of Judah at a most critical period of Israelite history. His father Ahaz, in order to ward off a hostile combination of the kings of Syria and Israel (see Is. 7), had invoked the aid of the Assyrian, and made his kingdom tributary to that power, which was soon to sweep away the kingdom of the Ten Tribes and to reduce Judah to the very verge of ruin. Moreover, as always, national weakness went hand in hand with religious decline. Ahaz introduced many foreign innovations into the temple service (2 K. 16:10-18), and he is the father of whom it is reported that "he made his son to pass through the fire according to the abomination of the heathen" (16:3). To this evil heritage Hezekiah succeeded at the age of 25, according to the chronology of the book of Kings (18:2)—he may have been even younger (cf. 16:2). Not, unlike his father, he allowed himself to be guided by the wise counsel of the prophet Isaiah. "He trusted in the Lord the God of Israel" and "the Lord was with him" (18:5, 2). The accounts of his reformation of the religion and worship are given in 18:3-6 and more fully in 2 Chr. 29:1-6. The reforms mentioned in Kings were the remission of the high places, the destruction of the pillars and the Asherim, and the breaking in pieces of the brazen serpent to which the people had burned incense. In the narrative of Chronicles great prominence is given to the co-operation of the Levites in those reforms (29:34), and it is to be remembered that this high-priest Uriah had been too compliant a tool in the heathen innovations of Ahaz. Special mention is also made of a great Passover, to which the king invited not only the people of Judah, but all Israel from Beer-sheba to Dan (30:5). Though the invitation was scoffed at by some, yet it was accepted to a degree which shows that the sense of national unity was not entirely lost, and that Jerusalem was taking its place as a rallying-point for the national religion when national independence was passing away. The great Passover was followed by an outburst of iconoclastic zeal on the part of the crowd gathered at the feast, venting itself in a wholesale removal of idolatrous objects throughout the whole country (31:1). Some of the "high places" were removed by Hezekiah, seeing that they are found existing at the beginning of Josiah's reign. But there seems no good reason for rejecting one part of the narrative and accepting another; and we must remember the awful lapse into idolatry that followed in the reign of Hezekiah, as it is evident from the statement of Manasseh. In the cases of other pious kings whom he commends, the historian is careful to mention that, in their reigns, the high places were not taken away (1 K. 15:11-14, 22, 43; 2 K. 15:3, 4); and he must have had good reason for giving such distinction to Hezekiah, who shares with David and Josiah the place of highest regard in the national tradition (2 K. 18:5, 23, 25; 2 Chron. 29:4). The Biblical record of the political events of Hezekiah's reign is strikingly confirmed and illustrated by the Assyrian inscriptions, although there remains some uncertainty as to the precise order of some of the events. The kingdom of the Ten Tribes, humbled by the Assyrians and worm-eaten by corruption, hastened towards decay; and in the sixth year of Hezekiah's reign Samaria, after a siege of three years, was taken by Sargon and the kingdom swept away. It is probably in this time of weakness or collapse of authority in the north that Pekah and Pashur, with the invitation to the Ten Tribes to join in celebrating the Passover. And, since the Assyrians do not appear in Palestine for several years (from 720 to 711 B.C.), this may also have been the time of prosperity referred to in 2 Chr. 32:27ff., when the king gathered all kinds of store and treasure. He also made some of his warlike undertakings in the Philistine country (2 K. 18:5). Here, too, in the opinion of many, comes the embassy of Merodach-baladan (20:12); for it was about a year after the fall of Samaria that that king seized the throne of Babylon, and it was his interest to secure, if possible, any alliances that would assist him in his struggle with Assyria. By this time there was a growing uneasiness among the Western nations at the encroachment of Assyria, and their eyes were turned to Egypt as the great power most fitted to head a confederacy for resistance. Hezekiah must have been to some extent involved in the movement, for, in an
inscription of Sargon, the king of Judah, is mentioned among the persons plotting sedition and bringing gifts to Pharaoh, king of Egypt. He continued, however, to pay tribute during the reign of Sargon; but, on the accession of Sennacherib, he threw off the yoke (18.7), and formed an alliance with Egypt and Ethiopia. Sennacherib, having first conquered Babylon and pacified his eastern dominions, was not long in turning his attention to the disaffected states in the W. He came with a large army; and it may have been then, if not before, that Hezekiah set about those preparations for defense and precautions against a siege which are related in 20.20 and 2Chr.32.3-8, 30. Sidon and the Phoenician cities were sacked by the victorious Assyrians; Ashdod, Ammon, Moab, and Edom sent tribute; and Ashkelon and Ekron, refusing, were captured. An Egyptian force, which had marched out from the Delta, was met and defeated at Eltekeh at this time; but, though he emptied his treasury and despoiled the temple to furnish the tribute imposed, Sennacherib sent an immense army which surrounded the city and demanded its surrender (18.17f.). Hezekiah, in his distress, was encouraged by the prophet Isaiah to resist, and after a siege of 3 years (19.1-8) Sennacherib was besieging Libnah when his officers returned from Jerusalem; and, hearing that Tirhakah was in motion with a large force to meet him, he determined to make another effort to reduce Jerusalem, so as not to leave a powerful enemy in his rear. The threatening letter which he sent was speeded before the Lord by Hezekiah in prayer, and again the prophet Isaiah assured him in God's name that the city would remain inviolate. And then, by some mysterious and awful visitation, there was such a mortality in the camp of the Assyrians that the survivors had to retreat without sacking the city (20.1-6), and were destroyed by the plague. The sacred historian says the angel of the Lord smote them. Some suppose it was an outbreak of plague; and Herodotus and Josephus have a tradition that the army had advanced as far as the pestiferous region of Pelusium to meet the Egyptian force when the disaster occurred. That it was a great disaster is plain from the silence of the Assyrians on the sequel of the campaign, for, after all his boasting, Sennacherib never claims to have taken the city. With this signal deliverance, which was treasured in memory as ranking with the wonders of the Exodus, Hezekiah disappeared from the sacred page. Up to the time of Josephus, however, his name is found; and, as fifteen years were added to his life, and Manasseh was twelve years at his accession (21.1), we might place the sickness in the fourteenth year of Hezekiah's reign, for the time is vaguely indicated in the expression "in those days" (20.1). A casual mention of Hezekiah's name in Pr.25.11 is particularly interesting. If learned men in his time occupied themselves in copying out proverbs, we may infer that other existing national writings were not overlooked. [ISAIAH—2. An ancestor of the prophet Zephaniah (Zeph.1.1; A.V. Hizkiah).—3. A descendant of the royal family of Judah (1Chr.3.23).—4. For Ater of Hezekiah, see ATER.] [J.R.]

Hezil, mentioned in 1K.15.18 as father of Tabrimmon, and grandfather of Benhadad, king of Syria. The fact that the name only occurs here has led to the generally accepted supposition that it is a corruption of Rezon, or even of Hazael. The former is preferable. It would make the generations of the kings of Judah and Syria roughly contemporaneous, and has the additional merit of being readily deducible from the Heb. consonants. Some suppose that " Rezon " itself should be read with a prothetic š and metathesis (cf. 'Τρόπω, 1K.11.23, LXX.). [B.F.S.]

Hezir.—1. A priest in the time of David, leader of the 17th monthly course in the service (1Chr.24.15).—2. A leading layman who sealed the solemn covenant (Ne.10.20).

Hezra—or Hezrael—or Hezreal—or Hezro (1Chr.11.37), the CARMELITE; one of the heroes of David's guard.

Hezron, Hezronites.—1. A son of Reuben (Gen.46.9; Ex.6.14; Num.26.6).—2. Son of Pharez and ancestor of David (Gen.46.12; Num.26.21; Ru.4.18, 19; 1 Chr.2.5f.).—3. (Jos.15.3.) [HAZER, 1.]

Hiddai—"of the brooks of Gaash" (2Sam.23.30), one of the heroes of David's guard. Kennicott (Dissert. p. 194) prefers the form Hurai (1Chr.11.32).

Hiddekel, the third of the four rivers of Eden, "which goeth in front of Assyria" (Gen.2.14, R.V.), called by Daniel "the great river" (Dan.10.4), and is rightly rendered in the LXX. by Tigris. The Heb. form is derived from the non-Semitic (Sumerian) Ídigna, from which also comes the Assyro-Babylonian Idiglat (or Diglat) and the Arab. Dijlah, by the common change from n to l, and the addition of the fem. ending. The classical form Tigris shows t for d, and r for l. It rises S. of lake Gôlûk, and flows through the same country, which is a little S. of Sert. After passing the ruins of Nineveh, Calah, Seleucia, and Ctesiphon, it unites with the Euphrates at Kurna. The stream thus formed (the Shatt al-'Arab), although not many exist, and the Tigris flowed directly into the Persian Gulf. [T.R.P.]

Hiel, a native of Bethel, who rebuilt Jericho in the reign of Ahab (1K.16.34); and in whom was fulfilled the curse pronounced by Joshua (Jos.6.26).

Hiera polis. Mentioned only once in Scripture (Col.4.13), with Colossi and Laodicea. Such association is natural; for the three towns were all in the basin of the Maeander, and within a few miles of one another. Its modern name is Pamphylia Kalestii.

Hier eel.—1. (1Esdr.9.21) = JEHEIL, 11.

Hier emoth.—1. (1Esdr.9.27) = JEREMOTH, 4.—2. (1Esdr.9.30) = KAMOTH.

Hier ileus,—1. (1Esdr.9.27) = JEHEIL, 10.

Hier' macon.—1. (1Macc.2.29) = ANNIANIA.

Hieronymus, a Syrian general in the time of Antiochus V. Eupator (2Mac.12.2).
HIGGAION

Higgaion. [Psalms, Titles of.]

High place, the rendering in A.V. of the Hebrew word which in the original of the three R.V.'s gives a modified rendering, transliteration "ramah" (in 4 passages) "lofty place," šipĥiḥ (in 9 passages) "bare height," and căr̂iḥ (once) "hold." The remaining two words, translated in both versions "high place," are mārôn (in 6 passages) and bāmd (in above 200 passages) This last word, though used in a few passages, chiefly poetically, in the general sense of elevated place, as, e.g., "high places of the earth," has acquired a special meaning in connexion with the worship of Israel. It was an ancient and widespread custom to worship on sacred mountains or elevated spots; and the character of the "high place" would depend upon the deity worshipped and the nature of the worship. It is mentioned without reprobation that Abraham built an altar on a mountain to the E. of Bethel (Gen.12.8); by divine command Gideon built an altar and offered sacrifice on the top of a stronghold or rock (Judg.6.25). The towns of Palestine were very often built on eminences or hill-slopes, and the bāmd or high place above the town was the place for worship or social concourse (see 1Sam.9.11-14). At Gibeon, in the beginning of Solomon's reign, was the great "high place" at which the king offered sacrifices (1Kings3.4). Some modern writers give it to be understood that, till the erection of the temple, the worship of Jehovah on the high places was not improper (3.2). At their entrance into Canaan the Israelites no doubt appropriated for this purpose the places hallowed in the patriarchal tradition. Moreover, they found on every side high places, at which the Canaanites rendered worship to the local deities or baalim; and as this worship was chiefly associated with the agricultural life upon which they had entered, it insensibly gained influence over them even when they persuaded themselves they were doing homage to their own God. [BAAL.] At each of these high places, there seems to have been an altar for sacrifice, with the usual accompaniments of Asherim (E.V. groves) and Pillars; and the worship, as described by the prophet Hosea, was riotous and corrupt in the extreme. Hence the prophets never cease to protest against it, and in the books of Kings, up to the time of Hezekiah, it is carefully noted, even in the reigns of the best kings, that the worship of the high places was not put down. The book of Deuteronomy, which contemplates the occupation of Canaan and worship at a central sanctuary (Deut.12.5), warns the people against the danger and evil consequences of conformity to the worship of the Canaanites (4.25,12.2,3). It does not, in referring to this worship, employ the word bāmd, but another word, māqôn, which simply means "place," and it is significant that, at the present day, there are innumerable sacred places throughout Palestine and Syria, usually on elevated spots, to which are given the same name in its Arabic form māqīm. These bear the name of some wady or saint who may be buried in the place, and who is supposed to have the power of conferring special benefits. Though the local deities have thus given place to these saints, the "places" are held in great veneration, and Muslims and Christians alike, just as Canaanites and Israelites of old, make visits and pay vows at them. From its association with worship, the bāmd came to be so named, though it was not on a high place, and might even be in a valley, as those in the valley of Hinom (Jer.7.31). Ezekiel speaks of "high places decked with divers colours" (Ezek.16.16, R.V.), made of "garments," which may have been hangings or carpets, such as are used for the adornment of Muslim tombs or sacred places at the present day. Hezekiah in his reform is said to have removed the high places (2K.18.4), but they reappeared under his successors Manasseh and Amon (21.3,21). Josiah's reformation was more thorough; and there is no express mention of high places under the kings who followed him. Yet the prevalence of such places and the veneration paid to them by the modern fellahin of Palestine show how deeply rooted they are in the soil; and, though we hear nothing of this form of worship among the Jews after the days of Josiah (13.10), we are aware that the superstition lingered on even after that time among the "people of the land." Hoynacker, Le lieu du culte dans la legislation rituelle des Hebreux (1894); Baudissin, Studien II.; Vincent, Canaan d'apres l'exploration recente; Mem. West Pal. Surv., vol. Special Papers, 1899, and Sl's; Dangeau, La musique des Hebreux. High-priest (hak"koen hagadidhōl; Lev. 21.10; Num.35.25,28), the head of the priestly body. After the Exodus, until the appointment of Aaron and his sons to the priesthood, the priestly authority culminated in Moses himself, who acted as mediator between God and the people (Deut.9.5,27; cf. Ex.20.19; Gal.3.19,20), and officiated as priest at the great covenant sacrifice, sprinkling the sacrificial blood upon the altar and upon the people (Ex.24.6,8). This priestly authority, he, at the direct command of God, delegated to Aaron and his sons (28.1), to whom it was God's gift ("I have given you this gift," Num.18.6,7; cf. Isa.61.4,6; 42.13; Ps.72.19,20,25), and consecrated the covenant, so, when he had consecrated and invested Aaron, it became Aaron's duty, and that of his successors in their hereditary tenure of the office, to maintain the covenant, by performing year by year the ceremonial of the Day of Atonement (Lev.16). The office of high-priest is chiefly exercised for that cleansing and atoning for the sanctuary year by year on which depended the religious services of the whole year (Lev.16.32-33). The Jews had no right or tenure in God's house but what was renewable from year to year; and therefore, at the return of every day of expiration, their term expired, and if they expected to enjoy this privilege for the year now coming they must renew their services and devotions by which they held this privilege of appearing before God. The virtue of the sacrifices offered on the last day of expiration was spent; and priest, people, tabernacle, and altar must be reconciled before they could have any claim or pretence to the honour
of appearing, or being used, before the Divine Majesty in the ensuing year; and therefore the apostle truly observes that 'these sacrifices could not consecrate him that did the service,' i.e. the high-priest himself, 'as pertaining to conscience' (Heb.9.9); that is, they could not consecrate him 'for ever,' or for a perpetuity, as the apostle explains himself. The high-priest knew in his own conscience that his re-consecration was but for the term of one year, and that the whole system of their worship and polity must at the end of that term be reconciled again' (John Johnson, Works, i. p. 189; Anglo-Catholic Library).

The contrast between the Old and New Covenant drawn out in the Ep. to the Hebrews turns just upon this point: that whereas the Jewish sanctuary had to be thus re-consecrated year by year, on the Day of Atonement, with the blood of the sin-offerings of atonement, the Christian Church has been consecrated once and for ever by the Blood of Christ. As therefore the high-priest was typical in his chief work, so was he typical in the anointing, which he alone of the priests received (Ex.29.7; Lev.8.12; Ps.133.2), and by which he became 'the priest Messiah' (Rev.5.6; cf. Ps.110.4); the oil employed was the 'holy anointing' oil (Ex.30.22-33), manufactured by certain priests called 'apothecaries' or 'perfumers' (Ne.3.8), which indicated the bestowal of the Holy Spirit for the purpose of qualifying the person anointed for the office upon which he was about to enter (1Sam.10.1-31), and it was poured, to show that for the discharge of the duties of his office he needed, and would receive, the Spirit of God in richest fulness, upon his head as the noblest part of the body and true centre of the spiritual life.

(Cf. Kurtz, Sacrificial Worship, p. 330; T. & T. Clark. This anointing took place after the bathing (Lev.8.6,10; cf. Is.52.11) and investiture, in which Aaron was clothed with a peculiar dress (Lev.8.7-9), which passed to his successor after his death (Num.20.28). Of this dress four articles—the breeches, the coat or tunic, the girdle, and the turban (= the mitre) were the same as those of the ordinary priest and Levite; but to the high-priest, according to Josephus, only worn on the Day of Atonement, were: (a) The robe of the ephod (Ex.28.31-35,39.22-26), woven of one piece without seam or join, and all of blue; it was not so long as the coat, which was visible below it, and round its hem were pomegranates of blue, purple, and scarlet alternated with bells to give a sound when he went in and came out of the Holy Place "that he might not die" (Ex.28.35), or to keep the people who could not see him mindful of what he was doing on their behalf (Eclo.45.9). (b) The Ephod consisted of two parts, of which one covered the chest, and the other, fastened upon the shoulders by "the curious girdle" of similar materials, and clasped together on the shoulder with two large onyx stones, each having engraved on it six of the names of the tribes of Israel (Ex.28.6-14). "As a shroud dress, the ephod was, par excellence, the official dress of the high-priest. The border of over-dye lay upon the shoulder, and the insignia of the office were also worn upon it (Is.22.22). The duty of the high-priest was to enter into the presence of God and make atonement for the people as their mediator. To show that, as mediator, he brought the nation to God, the names of the twelve tribes were engraved upon precious stones on the shoulders of the ephod. The precious stones, with their richness and brilliancy, formed the most suitable earthly substratum to represent the glory into which Israel was to be transformed as the possession of Jehovah (Is.62.3; Rev.21.11-21); whilst the colours and materials of the ephod, answering to the colours and texture of the language of salvation, indicated the service performed in the sanctuary by the person clothed with the ephod, and the gold with which the coloured fabric was worked, the glory of that service" (Keil on Ex.28.12). (c) To the shoulder-pieces of the ephod was fastened by gold chains a pouch made of similar materials, which contained the Urim and Thummim, and was called "the breastplate of judgment" (Ex.28.15-30). It was really a square of a span's length each way, doubled together so that two corners were suspended from each shoulder, and had arranged on it, in four rows of three, twelve gems engraved with the names of the twelve tribes of Israel, so that they were near to the high-priest's heart, indicating the relation of love and personal interest which should exist between the priest and the people. (d) To the turban or mitre worn by all priests the high-priest had attached a plate of gold, called "the holy crown" (Ex.28.36,39.30), engraved with the words "Holiness to the Lord..." That Aaron may bear the iniquity of the holy things, which the children of Israel
shall hallow in all their holy gifts; and it shall be always upon his forehead, that they may be accepted before the Lord" (Ex. 28.38). Perhaps because of this mystical and official concern with the atonement for the people, the high-priest had a peculiar place in the law of the manslayer and his taking sanctuary in one of the cities of refuge: the refugee might not leave his sanctuary during the lifetime of the existing high-priest (Num. 35.25). It was forbidden to the high-priest to follow a funeral or rend his clothes for the dead (Lev. 10.6). —The other respects in which the high-priest exercised superior functions to the other priests were simply the consequence of his position and opportunities, and varied with personal ability and character. The usual age for entering on the functions of priesthood was twenty years (2 Chr. 31.17), though before reaching that age the office might be exercised by one who had attained to puberty, as in the case of Aristobulus, who at the age of 17 won such admiration in his ministry as to provoke the treacherous jealousy of Herod (Josephus, 15. Ant. iii. 3). The history of the high-priests embraces a period of about 1,370 years and a succession of about 80 high-priests, beginning with Aaron, and ending with Phannias (20 Ant. x. 1; cf. also 8 Ant. i. 3 and 10 Ant. viii. 5). They are divided into four groups by the organization introduced by David, the captivity in Babylon, and the persecution of Antiochus Epiphanes, as may be seen from the following table:—

### HIGH-PRIEST.

| Alexander the Great | Jaddua (do.). |
| Onias I. (Ptolemy Soter, Antigonus) | Onias I. |
| Ptolemy Soter | Simon the Just. |
| Ptolemy Philadelphus | Eleazar. |
| End of direct Aryan line. | |
| Ptolemy Philadelphus | Manasseh. |
| Ptolemy Euergetes | Simon II. |
| Ptolemy Philopator | Onias II. |
| Antiochus Epiphanes and Antiochus | Onias II. |
| Demetrius | (Joshua, or Jason). |
| Alexander Balas | Onias, or Menelaus. |
| Simon (Hasmonaean) | Jacobus, or Alcimus. |
| John Hyrcanus (do.) | Onias II. |
| King Aristobulus (do.). | Aristobulus (do.). |
| King Alex. Jannaeus (do.). | Alex. Jannaeus (do.). |
| Queen Alexandra (do.). | Hyrcanus II. (do.). |
| King Aristobulus II. | Aristobulus II. (do.). |
| Pompey the Great | Antigonus (do.). |
| Parchus the Parthian | Antigonus (do.). |
| Herod, K. of Judaea | Ananus, (last of Hasmonaean), murdered by Herod. |
| Herod the Great | Ananus restored. |
| Archelaus, K. of Judaea | Jesus, son of Faneus. |
| Cyrenius, governor of Syria, second time. | Jesus, son of Panthias. |
| Valerius Gratius, procurator of Judaea | Jesus, son of Faneus. |
| Vitellius, governor of Syria | Jesus, son of Panthias. |
| Herod Agrippa | Jesus, son of Faneus. |
| Herod, king of Chalcis | Jesus, son of Faneus. |
| (do. Whiston ant 4 Wars 2) | (do. Whiston ant 4 Wars 2). |
| Appointed by the people | (do. Whiston ant 4 Wars 2). |
| Do. (I. Bishua) | Phannias, son of Samuel. |
| Chosen by lot | Phannias, son of Samuel. |

Of the first group the Biblical records are fairly full and only two points need to be noted: (i) the transfer, at some unexplained date, of the succession from the line of Eleazar to that of Ithamar, perhaps through Eleazar's representative-being too young to succeed to the vacant office, to which therefore Ithamar's representative, Eli, was appointed for the elders; (ii) Josephus implies that Abiezer (Abishua), the father of Burki, was the last high-priest of Phinehas' line before Zadok (8 Ant. i. 3, but cf. 5 Ant. xi. 5). This gives eight high-priests for the period, as against the seven of the Bible. Of the second group there is more to be said. (i) There is no explanation of the apparently joint
priesthood of Zadok and Abiathar in the reign of David. Saul may have made Zadok priest after Abiathar's secession to David, and then David let both hold office together for their own lifetime, Abiathar retaining his position, with Uriam and Thummim, of which nothing is heard after Solomon deposed him (1K.2.27), when the succession passed to the sons of Zadok. It was Azariah, the descendant of Zadok, who officiated at the dedication of Solomon's temple (1K.4.2; 1Chr.6.10). (ii) There are great difficulties in harmonizing the genealogical list in 1Chr.6.8-15 with the notices of the high-priests in the sacred history, and with the list given by Josephus. The pedigree, in its first six generations from Zadok inclusive, exactly suits the history, but there is a great gap in the middle, only two names occurring between the reigns of Jeshaphat and Josiah, while the historical books give us during this interval Jehoiada (2K.11.14; 2 Chr.22.11), Zechariah (2 Chr.24.20), Azariah (2 Chr.26.17), Uriah (2 K.16.15), Azariah (2 Chr.31.10). (iii) The civil power preponderates all through the period. The monarch arranges for the central sanctuary (1 Chr.29.1-4; 2 Chr.34.5, 9), dedicating the temple service under the high-priest (8.12-15), spoils the temple to pay tribute (1 K.15.18), promises to offer incense (2 Chr.26.16), defiles the temple with idolatries (33.4, 5), cleanses it and reforms worship (34.3). To this period also belong the rise of the Ten Tribes and their abandonment of the temple worship (1K.12.26-28), and the successful revolt of the ecclesiastical head of the nation against the usurping foreigner and idolater, Athaliah (2K.11.1-16). The priests of this series ended with Seraiah, who was taken prisoner by Nebuzar-adan, and slain at Riblah by Nebuchadnezzar, together with Zephaniah the second priest (or 7 Sagan; 2 K.25.18). Seraiah's son Jehozadak was at the same time carried captive (1 Chr.6.15), and died in Babylon. With his son Jehoshua we are introduced to the third group. In the third group we have, after Jehoshua's zealous co-operation with Zerubbabel in rebuilding the temple, only fragments concerning Zerubbabel and his son Jeshua, being distinguished for repelling Alexander the Great from the temple. He was succeeded by his son Onias I., and he again by Simon the Just, the last of the men of the great synagogue, whose ministry is described with such enthusiasm in Ecclus.50.5-11. He was succeeded by his brother Eleazar, in whose time the LXX. version of O.T. is rendered. This came a period of apostasy, out of which the people were roused by the persecutions of Antiochus Epiphanes, and a new and glorious succession of high-priests arose in the Hasmonaean family, who united the dignity of civil rulers and (for a time) of independent sovereigns to that of the high-priesthood. The first was Menelaus of Iscarii, the course of Joiarib (1 Chr.24.7, 9.10; Ne.11.10), and their line lasted from 153 B.C. to the murder of Aristobulus by Herod in 35 B.C. From Herod's reign to the destruction of the temple, a period of 107 years, there were no less than 2 high-priests of some of whom we read in N.T.—e.g. Annas, Calaphas (Jn.18.13), of Ananias (Ac.23.2). The high-priest from whom Saul received letters to go to Damascus (Ac.9.1, 14) was Theophilus, son of Ananus, and the last high-priest was Phannias, appointed by lot by the Zealots from the course of priests called by Josephus Euaiachim (? = Jachiem). [C.R.B.N.]

Hilen'.

Hilkiah'.—1. The father of Eliakim, who was "over the household" in Hezekiah's time (2K.18.37; Is.22.20, 36.22).—2. The high-priest in the reign of Josiah, who found the law-book in the temple at the time of the great reformation in that king's reign (2K.22.10, 23). The "high-priest of the King" (cf. 2 Chr.34.7) is generally supposed to have been Deuteronomy; but there is nothing in the narrative to indicate that it was that book alone (cf. Lev.26 with Deut.28). The reformation that followed its discovery certainly carried out the principle of centralization of the worship which is particularly emphasized in that code. The narrative makes it clear that Hilkiah, and the others concerned, sincerely believed it was the ancient law-book of the nation, and there is no reason to suppose that he had any hand in its composition. Even among those who believe that Deuteronomy was composed about this time, it is admitted that it doubtless existed long before, and would have been the aims and views of the priests of Jerusalem.—3. Levi's of the family of Merari (1 Chr.6.4, 26.11).—5. One of those who stood on Ezra's right hand when he read the law to the people (Ne.8.4).—6. Father of the prophet Jeremiah (Je.1.1-7). The father of Gemariah, who was one of Zedekiah's envoys to Babylon (Je.29.3).—8. Hill (Heb. gib'ra, a "rounded," hill-top). The "hill of God" (t Sam.10.5, 10), or "hill," was Gibeah (Jeb'a), Saul's home. The A.V., however, sometimes renders the word hâr (mountain, or mountain region) by "hill" (Ex.24.4; Deut.1.7; Jos.9.1, 10.9, 11.16); and the "hill" where Azariah was found (1 K.1.9; 2 K.4.25) was perhaps mount Carmel. In t Sam.9.11 the Heb. ma'atê' (ascent) is also rendered "hill." In N.T. "hill" is the Gk. ãrgos; but in Lu.9.37 the Gk. ãros (mountain), sodoreon, refers to a high "mountain" (ver. 28) apparently HERMION. [CAESAREA PHILIPPI.] [C.R.C.]

Hillel, a native of Phariath in Mt. Ephraim, father of Abbe (Judg.12.3-15).

Hin. [Weights and Measures.]

Hind (Heb. ayâyâl), properly the female of the red deer (Cervus elaphus), but also used for female deer generally. Hinds are frequently noticed in the poetical parts of Scripture as emblematic of activity (Gen.49.21; 2 Sam.22.34; Ps.18.33; Hab.3.19), gentleness (Prov.5.19), modesty (Can.2.7, 3.5), earnest longing (Ps.42.1) and maternal affection (Je.14.5). Their shyness and remoniscence from the haunts of men are alluded to (Job 39.1), and also their timidity, causing them to cast their young at the sound of thunder (Ps.29.9). For the various kinds of deer inhabiting Palestine and the neighbouring country, see HART; Roe. [R.L.]

Hinge. The doors of Heb. buildings (Pr.26.14) moved on hinges, fitting into sockets in flat lintel and threshold stones. [Gate.] The temple doors (1 K.7.50) had hinges of gold—or, more probably, covered with gold. [C.R.C.]

Hinnom, the valley of. [Valley.]

Hirah', an Adullamite, the friend (LXX. and Vulg. shepherd) of Judah (Gen.38.1, 12).
Hiram', or Huram'.—1. The king of Tyre who sent workmen and materials to Jerusalem (2Sam.5:11; 1Chr.14:1) to build a palace for David (2Sam.5:11), and again (5:10,7:13; 2Chr.2:3ff.) to build the temple for Solomon, with whom he had a treaty of peace and commerce (1K.5:11,12). The contempt with which he received Solomon's present of Cabul (9:12) does not appear to have caused any breach between them. He adviced Solomon's ships, which departed from Joppa, to share the profitable trade of the Mediterranean (10:22); and Jewish sailors, guided by Tyrians, brought the gold of Ophir (9:26-28) to Solomon's two harbours on the Red Sea. Dius, the Phoenician historian, and Menander of Ephesus state that Hiram reigned prosperously for 74 years; among his benefactions was Abel, his son and successor Baleazar. Josephus conjectures that Hiram supplied timber for the temple, and gave his daughter in marriage to Solomon.—2. The name of a man of mixed race (1K.7:13,40), the principal architect and engineer sent by king Hiram to Solomon. Hirca no.: A place of the Philistines (Gen.15:20,21), who had moved to the temple treasury at the time of the visit of Heliodorus (c. 187 B.C.; 2Mac.3:11). The name appears to be simply a local appellative.

Hired servant. [Servant.] Hittites, or sons of Heth, a leading people in Canaan according to Gen.10:15. It is to be noted that the proportion of the population of the country were they inhabited, or the language, or the customs of this people, when compared with that of the Canaanites, showed that they were the most prominent of the races that occupied Canaan. The culture of the Hittite was not its most characteristic feature. The Hittites were in all respects and manners the most distinctive of the Canaanite races. The Hittite gave no sign of being inferior in the arts of commerce, of the warlike spirit, or of the power of maintaining a separate existence. The Hittite was probably that of Jerusalem. The learned military caste throughout the country was Hittite, thus justifying the position to which Heth is assigned in Genesis among the sons of Canaan. In the rear of the mercenaries, followed the regular Hittite army, and after the fall of the 19th Egyptian dynasty the Hittite kings of Cappadocia seized the Egyptian province of Syria and made Kadesh on the Orontes, near the lake of Homs, their southern capital. The revival of Egyptian power, however, under the 19th dynasty checked their further advance, and after a military defeat in the 20th dynasty, the Hittites were driven out of Egypt. The Hittite king Khata-sil II., fixed the boundary between the Egyptian and Hittite empires pretty nearly where the northern limit of the Hebrews afterwards ran. Here was the land of the Hittites in which the refuge from the Philistines' was established in the 18th century B.C. Hebron. The Hittites lived near the Tigris and Euphrates, and they were the most powerful of the eastern nations. They were the Hittites in the oldest period of the Hittite empire, and extended their power over the whole of Asia Minor, as far west as the neighbourhood of Smyrna and E. to Armenia, in the mountainous district of the Taurus, and in northern Syria, more especially at Carchemish (now Jerablus) on the Euphrates, which remained a Hittite stronghold until its capture by Sargon of Assur at 726 B.C. The monuments are characterized by a peculiar style of art, borrowed originally from Babylon, but modified in Asia Minor, and they are frequently accompanied by inscriptions in a peculiar hieroglyphic script. The hieroglyphics were employed only for monumental purposes; in place of a running hand cuneiform characters were used. Hundreds of clay tablets inscribed with cuneiform signs and written partly in the Hittite, partly in the Assyrian, language have been discovered at Boghaz Keui, the Hittite capital N. of the Haly, in the reign of Tudhaliyas IV., third son of Suppiluliumas II., the ruler of the age of the 19th Egyptian dynasty extended from the Aegean to Palestine. On both the Egyptian and their own monuments the Hittites are represented as a thick-set people, with protrusive noses, prominent chins, round faces, and yellow skins. The men were shod with the snow-shoe, or buskin of the mountaineer, with turned-up end. They were armed with bow, dirk, and spear, but not sword. The priests and upper classes were over in their tunics a long robe, reaching to the ankles, but opening at the side. Their religion was a nature-worship, the supreme object of which was the earth-goddess, who was adressed as the Great Mother. Before their contact with Babylonian culture, the objects of their worship had been fetishes—bull-heads, the sacred dirk, trees or stones, and the like; but they afterwards adopted the Babylonian fashion of a god-god of the flesh. Tablets sacred, animals being merely symbols. A sort of trinity, consisting of the earth-goddess and her son who was also her husband, was created, and the chief cities become deities by the side of whom stood the sun-god. By eating and drinking at a table before the image of the deity the worshipper was believed to participate in the divine nature. The "avshum," to which the homicide fled for protection, was a Hittite institution. The Hittite empire broke into fragments, each of which became a separate tribe. Hence in 1K.10:29 and 2K.7.6 reference is made to the sons of Heth (Gen.23). In the age of the Tel el-Amarna tablets a band of Hittites from Cilicia made themselves masters of this district, and at a much earlier period an Egyptian inscription states that the founder of the 19th dynasty had overthrown the "houses of the Hittites" in southern Palestine. The painted pottery found in the pre-Israelite strata at Lachish and Gezer was of Hittite importation, and has been traced to the
HIVITES

neighbourhood of Boghaz Keui. The Hittite wives of Esau (Gen.25.3,36.2) would be taken from this southern branch of the advance guard of the Hittites; and to the latter also "Uriah the Hittite" (2 Sam.23.39), the husband of Bathsheba, would have belonged, as well as Ahimelech (1 Sam.26.6), another member of David's body-guard. [A.H.S.]

Hizkiah,' the son of Hezakiah, is always in the time of "the Hivite." He was a son of Canaan (Gen.10.17; 1 Chr.1.15). The LXX. identifies the people with the Avites, rendering both names E'ToV. The name has been connected with the Arab. ha'awa = a tent or dwelling, and has been said to imply that those who bore it were villagers (cf. Havoth-Jair). But it is probable that in the words of the Avites (Gen.36.2), in 2 Sam.24.7, 10, in numbering the people in the neighbourhood of Tyre, visits the cities of the Hivites; and a northern settlement of Hivites is also mentioned in Jos.11.3 (Heb., not LXX.).

Hizkiah,' an ancestor of Zephaniah (11.1).

Hizkijah' (Hesekiah, R.V., Ne.10.17).

[AT. 2.]

Hobab', son of Raguel (Num.10.29) who was the father-in-law (hādēmāth) of Moses. Hobab himself is so called in E.V. (Judg.4.11), but the word apparently only means "a connexion by marriage" (cf. hādēmāth = "son-in-law" and "bridegroom"). The notice in Num.10.29-32, though brief, is of interest. Jethro appears as the wise and practised administrator, Hobab as the experienced Bedawi sheikh, to whom Moses looked as the human guide throughout all the years while the "pillar of cloud" was the divine presence.

Hobah', the place to which Abraham pursued the kings who had pillaged Sodom (Gen.14.15). It was situated "to the north of Damascus." The Jews of Damascus affirm that the village of J ordeal, not far from Burzeh, is the Hobah of their literature.

Hod, son of Zophah, an Asherite (1 Chr.7.37).

Hodaiah', son of Elioenai, of the royal line of Judah (1 Chr.3.24).

Hodaviah.—1. One of the heads of the half-tribe of Manasseh on the E. of Jordan (1 Chr.5.24).—2. A man of Benjamin, son of Hasenuah (1 Chr.8.7).—3. A Levite, who seems to have given his name to an important family in the tribe (Ezr.2.40); called Hodevah (Ne.7.43), and see BANUAS. Possibly the same as Judah, 2 (Ezr.3.9).

Hodesh, a wife of Shaharaim in the genealogies of Benjamin (1 Chr.8.6). Possibly another form of Hodesh, of ver. 8.

Hodevah'. [Hodaviah, 3.]

Hodiah', a wife of Ezra, a man of Judah (1 Chr.4.19). Jehudiyah (= "the Jewess"), in ver. 18, seems to have been another wife; but see R.V. [R.B.G.]

HOMICIDE

Hodijah.—1. A Levite in the time of Nehemiah (Ne.8.7, and probably also 9.5,10.10).—2. Another Levite (10.13).—3. A layman; one of the "heads" of the people (10.18). All three sealed the covenant.

Hoholah', the third of the five daughters of Zelophehad (Num.26.33,37,31.16; Jos.7.13).

Hohom (Jos.10.3) king of the Hohom, one of the five kings who made war against Gideon, were defeated by Joshua, and captured in the cave of Makkedah and hanged.

Holm-tree occurs only in Sus.58. The passage contains a characteristic play on the Greek names of the two trees mentioned by the elders in their names. The πύρας of Theophrastus and Dioscorides is apparently the Pirus coccifera. The Lat. ilex was applied both to the holm-oak (Q. ilex) and to the Kermes-oak (Q. coccifera). [CYPRESS.]

Holofernes (better Olofernes), according to the book of Judith, a general of Nebuchadnezzar slain by Judith during the siege of Bethulia (Jth.2.19).

Holon.—(1) (1 Chr.6.58, Hilien.) A town in the mountains of Judah allotted with its suburbs to the priests, near Gilon (Jos.15.51, 21.15). Possibly Beit 'Elém, a ruin 10 miles N.W. of Hebron and about 7 miles S.W. of Jiraha.—2. A city of Moab (Je.48.21 only). Its site is unknown.

Holy. The term is applied to persons, places, things, and times. The root idea is "separation, withdrawal," involving dedication to God. Thus God separated Israel from the nations (Lev.20.24-26; cf. Je.2.3). Physical purity is holiness of the body, separation from defilement; hence the law of purification, and the distinction between clean and unclean meats (Lev.11.44,12.25). [SAINTS; SANCITIFICATION.]

Holy of Holies; Holy Place. [TEMPLE.]

Holy Spirit. [SPIRIT, HOLY.]

Homam (1 Chr.3.39), an Edomite=HEMAM. [HOMER.]

[WEIGHTS AND MEASURES.]

Homicide. Four historical instances may be distinguished. (1) Originally a homicide was cast out from the peace of his God and tribe and became an outlaw whom any man might slay with impunity (Gen.4.12ff.). (2) After the Deluge it was laid down that every homicide should meet with death at the hands of man (Gen.9.5f.), because the blood was the life. (Parallels in Frazer, Golden Bough, 2nd ed., i.353.) The blood-feud arose, and it became pre-eminently the duty of the deceased's gō'el haddām (lit. "redeemer [E.V. reveenger, avenger] of the blood"; probably the nearest kinsman) to kill his slayer. (3) The Mosaic legislation first distinguished the threefold and other forms of homicide, and regulated the blood-feud, whether the homicide were Israelite, stranger, or sojourner. It provided for six cities of refuge. If the slayer of a free man could reach one of these before the gō'el could overtake him, he was to be admitted, after stating his case to the elders at the gate (Jos.20). He was then protected from the gō'el and brought to the place whence he came for trial before the congregation (elders). The cases in the law fall into two classes, which may conveniently be termed murder and manslaughter. Murder consisted of violent killing

23
plus a mental element (either intent or heedlessness), evidenced by (a) premeditation or tormented hatred or enmity, or (b) the use of a stone or a weapon of iron or wood. The penalty was death at the hands of the goel; and the homicide was to be taken even from God's altar (Ex.21:14). Two witnesses were necessary for a conviction. Manslaughter consisted of violent killing without this mental element, either in a sudden heat or accidentally—e.g. by the head slipping from an axe, or by throwing a stone without seeing the person injured. The penalty was sojourn in the city of refuge till the death of the high-priest, as Moses had sojourned in Midian till after Pharaoh's death (cf. 2Sam.14:14). During this time the goel meeting the manslayer outside its limits might kill him. Ransom (wergeld) was forbidden either for murder or in lieu of sojournin g in the city of refuge in cases of manslaughter, because blood pollutes the land for God's residence. If a dead man were found in the fields and the slayer were unknown, the elders of the nearest city were to sacrifice a heifer, with a prayer for atonement from blood-guiltiness (Deut.21:1-9). The slaying of a pregnant women in a combat between men was punished by death, and perhaps by stoning (Ex.21:23). A thief breaking in at night might be slain without blood-guiltiness, but not after daybreak (Ex.22:26[14]). An unrighteous Witness attempting to compass the death of the accused by false evidence was to be killed (Deut.19:16-21). Death by goring was punished by putting away the owner of the ox, which knew the ox had gored before and had not enclosed it, by the death of the owner; but here ransom was allowed. If the deceased was a slave, the ransom was 30 shekels (Ex.21:28-32). Immediate death of a slave under the master's rod entailed (unspecified) punishment. If he lingered a day, the master went free (Ex.21:20f.). If one fell from a roof without a battlement, there was blood-guiltiness (result unspecified, perhaps blood-feud; Deut.22:8). (4) Num.35:33, Deut.19:12, 21:8f., present us with the beginnings of the sense of the corporate responsibility of the community for killing, and the change of the godless had developed into the feeling that the king must punish murder or else incur blood-guiltiness (2Sam.3:26ff., 4:11, 14-9:1K.2:37-33). [CRIMES, etc.: FAMILY; LAW IN O.T.; JUDGE; GOEL.]

Honey. The Heb. abbas is applied first to the product of the Birk, to which we exclusively give the name of honey. All travellers agree in describing Palestine as a land "flowing with milk and honey" (Ex.3:8); bees being abundant even in the remote parts of the wilderness, where they deposit their honey in the crevices of rocks or in hollow trees. In some parts of N. Arabia the hills are so well stocked with bees, that no sooner are hives placed than they are occupied. On the other hand, the term dabbash also indicates a preserve made of the juice of the grape, which is still called dibs, and forms an article of commerce in the E. It was this, and not ordinary honey, which Jacob sent to Joseph (Gen.43:11), and which the Tyrians purchased from Palestine (Ezk.27:17). A third kind has been described as "vegetable" honey, viz. the exudations of certain trees and shrubs, e.g. the Tamarix mannifera, found in the peninsula of Sinai, or the stunted oaks of Luristan and Mesopotamia. The honey which Jonathan ate in the wood (1Sam.14:25), and the "wild honey" which supported St. John the Baptist (Mt.3:4), have been regarded as of this kind, although it was probably the honey of wild bees. A fourth kind is described by Josephus as being manufactured from the juice of dates.

Hook, Hooks. Various kinds of hooks are noticed in the Bible, the most important being: (1) Fishing-hooks (Am.4:2; Job 41:2; Is.19:8; Hab.1:15). [REED.] (2) Properly a ring (A.V. thorn), placed through the mouth of a large fish, and attached by a cord to a stake for keeping it alive in the water (Job 4:21; Ps.148:9). (3) An hook (either rendered "hook" in A.V. A ring, such as in our country is placed through the nose of a bull, and similarly used in the East for leading about lions (R.V. Ezek.19:4; A.V. with chains), camels, and other animals. A similar method was adopted for leader prisoners (2Chr.33:11). Manasseh who was hanged with rings (2Chr.33:20; K.V. marg.: A.V. among the thorns). An illustration of this practice is found in a bas-relief discovered at Khorsabad (Layard, ii. 376). (4) The hooks of the pillars of the tabernacle (Ex.26:32,37; 27:10, 38:13 ff.). (5) A vinedresser's pruning-hook (Is.2.2, 18, 5; Mic.4:3; Jl.3:10). (6) A flesh-hook for getting the joints of meat out of the boiling-pot (Ex.27:3; 1Sam.2:13,14). (7) Probably "hooks" used for the purpose of hanging up animals to flay them (Ezk.40:4). This was certainly the case in later days in Herod's temple.

Hophni and Phinehas. Though sons of Eli, "priests and judges of Israel," they were hanged at Shiloh (1Sam.1:3). They are described as "sons of Belial [i.e. wicked, unprincipled men]: they knew not the Lord." Their rapacity in claiming more than their rightful share of the sacrifices, when, and as, they pleased, filled the people with indignation, and "men abhorred the offering of the Lord" (2.12-17). The record of their licentiousness in ver. 22 is not found in the LXX., and is considered as a later addition by some, and omitted by Driver, Klostermann, and others. Their evil lives, however, filled the people with disgust and indignation, and provoked the curse denounced against their father's house, first, under an unknown prophet (27:30), and then by Samuel (3.11-14). They were both cut off in one day in the flower of their age in the battle against the Philistines in which the ark was lost (4:10-11). [R.Y.C.] Their retreat is described by the Hebrew Radda-Sarna (Num.20:14,22), and where Aaron died. It was on the "border of Edom (ver. 23-29), or otherwise at the "cleft" of Edom (33:37). See
Deut. It and father from "And this shall be for you a border north, from the Great Sea: mark for yourselves Hor the mountain; from Hor the mountain mark to the entering in of Hamath, and the extent of the border shall be to Zedad." It is doubtful if this means more than that Hor was at the S.E. corner of the land of Israel, which was close to Kadesh-barnea (34. 4; Jos. 15.3). The site of Hor is placed by Josephus at Petra, where it is still shown (4 Ant. iv. 7, v. 11) and Petra was Kades-barnea (the holy place in the desert of wanderings), according to his belief and that of the Rabbis. The mountain is now called Jebel an Neby Hârâd (or Mountain of the proper Aaron), and his tomb is shown on the higher or N.E. peak. Hor is a bare mountain of red sandstone, with two peaks, very conspicuous from the Arabah to its W., and rising on the "edge" of Edom, 4,580 ft. above the Mediterranean level, 4,000 above the Arabah, and 3,000 above plateau to its W. It is just immediately W. of Wady Masa, the traditional Meribah-kadesh, where are the ruins of Petra, and of Gaia (el Ji). [EDOM.] The situation fits well with the O.T. notices, and with the distance of 17 days' journey from its vicinity to Horeb (Deut. 1.2). [C.R.C.]

Horem, king of Gezer, an ally of Lachish defeated by Joshua (12.15). [Josh. 19.47].

Horeb [Ex. 3.1; 17.6.33; Deut. 1.2.6.19; 4.10.15.52.9.8.18.16.29.1; 1 K. 8.9.18.1; 2 Chr. 5.10; Ps. 106.19; Mal. 4.4; Ecclus. 48.7] = Sinai; see Exodus, The.

Horem, one of the fortified places of Naph-tali (Jos. 19.38), named between Migdal-El (Mujib or Mousa), a modern village, and probably Hára'h, a ruin 3 miles N. of 'Ainilàtha. [C.R.C.]

Hor-agagidgâd, the name of a desert station where the Israelites encamped (Num. 13.32), probably the same as Gudgodah (Deut. 30.7). On the W. side of the Arabah Robinson found a Wady Gudgodgh, but this does not parallel the Biblical name. [GEOM.]

Hor.-1. A Horite, son of Lotan, the son of Seir (Gen. 36.22; 1 Chr. 1.39).—2. In Gen. 36.30 the name should be rendered "the Horite," as in vv. 21, 29.—3. A man of Simeon; father of Shaphat (Num. 13.35).

Horites and Horims, the aboriginal inhabitants of mount Seir (Gen. 14.6), "cave-dwellers." [EDOM.]

Hornmah (destruction), a place between Kadesh-barnea and the S. border of Palestine, where Canaanites and Amalekites from the "hill" country defeated Israel (Num. 14. 45), as did the king of Arad, 38 years later (21.1). It was at some distance from mount Seir (Deut. 1.44), and a royal city, noticed with Arad (Jos. 12.14). Given to Judah (15.30), and afterwards to Simeon (19.4). Its original name was Zephath (Judg.1.17), and it was rebuilt before the time of David (1 Sam.30.30), when the Simeonites migrated thence (1 Chr. 4.42). The journey of Zophah, leading from Petra to Arad, as appears to have been the scene of the vain attempts of the Hebrews to enter Palestine by the direct route to Hebron. [C.R.C.]

Horn. Literal use.—Of rams (Gen. 22.13; Dan. 8.3), goats (Dan. 8.5), a wind-instrument (Jos. 6.5), an oil-flask (1 Sam. 16.1), the four horns of the altar (Ex. 27.25), an isolated peak (Is. 5.1, A.V. marg.), an ink-bottle (Ezk. 9.2), and teeth (27.15). Figurative use.—Of majesty (Deut. 33.17), strength (Ezk. 34.21), pride (Ps. 75.5), and of a ruler (132.17). Symbolic use.—Horns of iron were made by Zedekiah as a symbol of the strength whereby Israel would "push" the Syrians (1 K. 2.15). Special use.—As light-rays (Ex. 34.20, R.V. marg.) from the face of Moses; from the side of God (Hab. 3.4). In N.T., except in "horns of salvation" (Lus. 1.69), the Gk. equivalent only occurs in apocalyptic vision (Rev. 5.6, etc.). [W.O.E.O.]

Hornet. That the Heb. word čührá de-

notes the horned or having horns as a merit, the name Zoreh (Jos. 15.13) indicating that these insects infested some parts of Palestine. Hornets are referred to as the means which Jehovah employed for the extirpation of the Canaanites (Ex. 23.28; Deut. 7.20; Jos. 24.12; Wis. 12.5). Although some commentators regard the word as used in its literal sense, it probably expresses in an allegorical manner the consternation induced in the enemies of the Israelites, as described in Deut. 2.25, Jos. 2.11.

Horonaim (two cases, or holowâs; Is. 15.5; Je. 48.35.34), a place in Moab, on a road "going down, apparently not far from Heshbon." On the Moabite Stone, King Mesha records: "(Chaim) said me to go out to fight at Horonaim, and I went down." The valley called El Ghuweir (the hollow), running W. to the Dead Sea, S. of Nebi, may be intended, for an ancient road leads up to it the plateau. [C.R.C.]

Horonite, The, the designation of Sanballat (Ne. 2.19, 13.28). The Syriac written "Book of Joshua" (xlv.) calls him a Levite, and a Harûmi or Aaronite. [C.R.C.]

Horse. Throughout the Bible the horse is referred to only in connection with warlike operations; the sole instance of the employment of this animal for other purposes occurring in Is. 28.17. The force of "horsemen" (A.V. horsemens) were used in threshing, not, however, being put in harness, but simply driven about over the threshed grain. The description of the horse in Job 39.19-25 applies solely to war-horses. The Heb. names by which the horse is described are usually šâs and pârâsh; the former denoting horses used for driving in war-chariots, the latter probably indicating mares (Arab. faras). In E.V. pârâsh is incorrectly rendered horsemens. The correct sense is essential in the following passages—1 K. 4.26, "forty thousand chariol-horses and twelve thousand mares"; Ezk. 27.14, "driving-horses and mares"; 1.2.4, "as mares, so shall they run"; and Is. 21.7, "a train of mares in couples." In addition to these terms there is rekhes, denoting a swift beast [Dromedary], such as those used for the royal post (Esth. 8.10,14) and similar purposes (1 K. 4.28; A.V. dromedary, also in Esth.), or for a rapid journey (Mi. 1.8); and for a mare (Esth. 8.10); and si'isîthi in Can. 1.9, where it is required in the A.V. as a collective
HORSE

Ps. 32.9

decorated, the bits being gilt (Ezk. 3.6), and the bridles adorned with tassels; while on the neck was a collar terminating in a bell (zech. 14.20). Saddles were not used until a late period. The horses were muzzled, and hoofs as hard "as flint" (Is. 5.28) were therefore regarded as ardent. Chariot-horses were covered with embroidered trappings (Ezk. 27.20); and both horses and chariots were used in idolatrous processions, as in that of the sun (2K. 23.11). The first representation of a cavalry soldier is an Assyrian bas-relief of 734 B.C. Horses were also ridden in the chase about 650 B.C. The earliest notices of riders in O.T. are in Gen. 49.17 and Ex. 15.1, 21—the former not referring to a war, while in the latter case the reading depends on the points, and a "chariot" may be intended. After the 8th cent. B.C. (2K. 9.18, 19) references to cavalry are numerous, especially among Assyrians (Ezk. 23.6, 12) and Seythians (38.15).

Horseleech (Heb. ʿālāq) occurs once, in Pr. 30.15, and, as the equivalent of the Arab. ʿālaq, the name of the Egyptian horseleech, is doubtless correctly rendered. The expression "two daughters" is of course figurative, and refers to the bloodsucking habits of these creatures. Both the Heb. and Arab. names signify "to adhere." Horseleeches belong to the genus Haemopis; while the typical genus Hirudo includes the medicinal leech. [R.L.]

Hosah (Heb. Hosah, a Merarite Levite; one of those chosen by David as "porters" to the ark after its arrival in Jerusalem (1Ch. 16.38, 26.10).

Hosah (Heb. Hosha, a city of Asher; apparently near Tyre. Possibly the village Ezziyeh, or the horse-leech, a horse-bedded bay of Tyre, is the site. It is well watered, with traces of old ruins. Hosah may, however, possibly be the town Huzu, noticed in one of the letters from Tyre in the Amarna collection (Berlin 99); but this lay apparently between Tyre and Sidon, which is contended for the Huzu, at al Ghaziyeh, a well-watered site. Hosah was taken by Sennacherib in 702 B.C., and is noticed again c. 645 B.C. [C.R.C.]

Hosanna. This word is used only in the accounts of our Lord's triumphal entry into Jerusalem (Mt. 21.9, 15; Mk. 11.9, 10; Lk. 19.9, 12). In each passage the multitudes are represented as quoting the words of Ps. 118.26: "Blessed is he that cometh in the name of the Lord." It has therefore been assumed that the word Hosanna is a corruption of the Heb. kōshēa' nā (save pray; Gk. σωτέρ ψάχνει, which occurs in the previous verse of the same psalm. As this psalm was sung at the Feast of Tabernacles (for which it is gathered to have been composed), and also at the Passover, its words would naturally be familiar to the people. [L.A.M.]

Hosea (Hōsēa, salvation; Οσία prophesied (1.1) in the reign of Uzziah, Jotham, Ahaz, and Hezekiah, kings of Judah, and of Jeroboam II, king of Israel. This statement makes Hosea's prophetic career begin in the reign of Jeroboam II, and there is nothing in p. 1-3 which may not have been delivered then. The period was characterized by great national prosperity (2K. 14.25); but with this came, as we see in the denunciations of Amos (who prophesied a little earlier), the evils which often accompany it—arrogant luxury and forgetfulness of God. In 4-14 a totally different scene is brought before us. The death of Jeroboam was the beginning of a period of anarchy—his son Zechariah reigned only six months, and Shallum, who succeeded, but one month. These later chapters show us a court which relapses into paganism; a people who have lost all sense of God (and even encourage) idolatry, and immorality is rampant everywhere. But with all this, there is no trace of strong-handed, steady rule, which might have restrained some
of the evils from coming to a head. Anarchy and vice go hand in hand. Now, since the constant topic of 4-14 is the approaching fall of the northern kingdom, while there is no reference to this as an accomplished fact, we may assume that all the prophecy was uttered before the 6th year of Hezekiah, when Samaria was taken by the Assyrians.—Hosea's marriage with Gomer. Except that he was the son of Beeri, we know nothing of Hosea personally save his marriage with Gomer. Whether this story is literal or allegorical is much disputed, though the former was held by most early writers. Yet a needless amount of difficulty has been created by the view that "wife of whomredom" (1:2) meant a woman unchaste at the time of marriage. The Heb. by no means requires this, and its acceptance destroys the parallelism which the prophet's teaching seems to embody with the relation of God to Israel. We may suppose that Hosea, when a young man, and possibly unaware of his prophetic gift, had taken Gomer to wife. Although she is then chaste, there are elements in her character which, brought out by evil influences, land her in the grave of infidelity. Despite all this, her love for Gomer is unchained. Perhaps he begins to feel that his love for his erring wife faintly reproduces that of God for idolatrous Israel. But this was a love wherein was no weakness—stern discipline must purge out the evils of the past. This is strikingly brought out when the names of Gomer's three children: Jezroel, Lo-ruhamah, and Lo-anamni. How Gomer became a slave does not appear, but Hosea is bidden to buy her back at the price of a slave; not, indeed, to the position of an honoured wife, but with a stern rule restraining her from her old sins, till her character is formed anew. Thus the sad story of the marriage becomes an object-lesson showing forth the love of God Himself. The unwavering love of God underlies the whole book—in 1-3 under the thought of husband and wife, in 4-14 under the thought of parent and child. In 5:8-9 Israel's guilt is described; in 9:11.11 the occupational, in 11:1-14 the spiritual. Save for incidental references to Judah, Hosea's prophecies are addressed to the northern kingdom. He was probably a native of that kingdom, as may be inferred from the vividness of the picture he draws of its social and political state, its anarchy and corruption, the settings for foreign alliances, and the prevalence of the Baal worship, combined with the pretence of the worship of God. Hosea's style is a very marked one. The words are broken up into short, abrupt sentences, which Bp. Lowth compared to the scattered leaves of the Sibyl. The animating spirit is one of extreme tenderness for his erring countrymen, with whom he pleads. As Ewald puts it, "his discourse often breaks off, as it were, into sobs." Very different is this from the fierce invectives of Amos. Much has been written on the question of Hosea's knowledge of the Ten Commandments. It is more difficult to say how many of the law-cycle there seem plain allusions; though whether it is to the Pentateuch as we now have it, or to some theoretical earlier form, is a matter on which varying views prevail. Yet it is hard to suppose that the following references do not suggest a form of text very much the same as that which we have now: The Fall (6:7, R.V., not A.V.), the destruction of the cities of the plain (11:8), the story of Jacob (11:3), the Exodus (2:15, and often), the wandering in the wilderness (9:10, 13.5), Baal-peor (9:10; cf. Num.20.5). For later references, see the story of Achan (Ho.2:15), the sin at Gibeah (9:9,10.9; cf. Judg.19), the demand for a king (Ho.13:10, 11:cf. 15:8).—N. T. Quotations. Ho.2:23,1,10 in Rom.9:25,26; 10:11,16; 11:9,11; 10:8 in Lu.23:30; 11:1 in Mt.2:15; 13:14 in 1 Cor.15.55 (there is much diversity of reading in the Gk. here): 14:2(3) in Heb.13:15; cf. also 6:2 and 1Cor.15.4. Ewald, Prophets of O.T.; Pusey, Minor Prophets; G. A. Smith, Book of the Twelve Prophets; J. Sharpe, Notes and Dissertations on Hosea; Cheyne in the Camb. Bible for Schools and Colleges. [R.S.]

Hosen (pattish). [Dress.]

Hoshalalah.—1. A man who assisted in the dedication of the wall of Jerusalem after its rebuilding (Ne.12:32).—2. The father of a certain Jezealsh, or Azariah (Je.42:1,43:2).

Hosham—The name of one of the sons of king Jeconiah, or Jehoiachin (1Chr.3:18).

Hoshea' (deliverance), son of Elah, and last king of Israel. Here, as in some other cases, we are unable to clear up an apparent chronological inconsistency between the Biblical narrative and Assyrian records. Hosea's story is one of the most interesting in the book of the author's times. He was set in his place by Ahaz, but in 15:30 in the 20th year of his predecessor Jotham, would appear from Assyrian inscriptions (whose dates are verified by the mention of a total eclipse, known to have occurred in 753 B.C.) to belong to the year 734 B.C. He was placed on the throne as successor to Pekah by the Assyrian conqueror, Tiglath-pileser III, who says, "Pekah I slew. . . Hosea I appointed over them." This is in no way inconsistent with the statement (2K.15.30) that it was through Hoshea's agency that Pekah was slain. We gather from the contemporary prophet Hosea (5:13,7:11) that Ephraim included at the time of the anti-Assyrian party, the latter looking to Egypt for help. Hoshea, like his predecessors Jehu and Menahem, seems to have paid tribute to Assyria till Tiglath-pileser's death (727 B.C.), but thereupon, hoping perhaps that the successor, Shalmaneser IV, would prove less formidable, he ceased, and sought support from Egypt, which, however, failed to do more than promise aid. In 724 B.C. Shalmaneser advanced against Samaria, while Hoshea sought vainly to avert disaster by belated presents. It is not clear whether he was taken prisoner before (as the Biblical account seems to say) or after the capture of Samaria (722 B.C.) by Sargon, the general who followed Shalmaneser on the throne of Assyria. The doom of the northern kingdom is set forth by the prophet Hosea (11:14, cf. Is.18). Many Israelites were deposed eastwards, and foreigners settled in their stead. We know nothing of Hoshea's fate subsequent to his capture by the Assyrians. [A.A.]

Hoshea a.—1. The son of Nun, i.e. Joshua (Deut.32.44; Num.13.8, R.V.).—2. Son of Azaziah (1 Chr.27.20); like his great namesake, a man of Ephraim, ruler of his tribe in the
HOSPITALITY

time of David.—3. One of the heads of the people, who sealed the covenant (Ne.10.23).

Hospitality. Hospitality was regarded by most nations of the ancient world and as one of the characteristic features of the homes of the Hebrews in their first century. Among the Arabs we find the best illustrations of the old Bible narratives, and they exhibit traits that might be seen in their ancestor Abraham. The laws respecting the Stranger (Lev.19.33,34) and the Poor (25.14.; Deut.15.7), and concerning redemption (Lev.25.25ff.) in all these points reflect this spirit of hospitality. In N.T. hospitality is likewise enjoined. The good Samaritan stands for all ages as an example of Christian hospitality, embodying the command to love one's neighbour as himself. The neglect of Christ is symbolized by inhospitality to our neighbours (Mt.25.41). The apostles urged the church to “follow after hospitality” (Ro.12.13; cf. 1Tim.5.10) to remember Abraham’s example (Heb.11.8; 13; cf. 1Tim.3.2). The practice of the early Christians was in accord with these precepts. Their homes were houses of hospitality, and their hospitality was a characteristic of their belief. “Hospitality,” says Mr. Lane, “is a virtue for which the natives of the East in general are highly and deservedly admired. There are very few persons in Egypt who would think of sitting down to a meal, if there was a stranger in the house, without inviting him to partake of it, unless the latter were a mendicant, in which case he would be invited to eat with the servants. . . . The account of Abraham’s entertaining the three angels, related in the Bible, presents a perfect picture of the manner in which a modern Bedawee sheik receives travellers arriving at his encampment. He immediately orders his wife or women to make bread, slaughter a sheep or some other animal, and dress it in haste, and bringing milk and any other provisions that he may have ready at hand, with the bread which he has dressed, serves them to his guests. These are the representatives of high rank, who stands by them while they eat, as Abraham did. . . . Most Bedawees will suffer almost any injury to themselves or their families rather than allow their guests to be ill-treated while under their protection.” (Cf. Job 31.17,31,32.) The Oriental respect for the covenant of bread and salt, or salt alone, certainly sprang from the high regard in which hospitality was held.

Hosts, Lord of. The title, the original and full form of which is Jehovah, God of Hosts (geberad), pre-eminently employed by the prophets to express the matchless majesty of God. It occurs first in Sam.1.3, but its origin is uncertain. A common view is that it was first applied to God as the Leader to victory of the armies or “hosts” of Israel (cf. Ex.12.41., 15.3,4; Num.1.3.; Jos.5.14, etc.) but in actual use it has a much wider reference, suggesting that God has at His service an unseen host of angels, and indeed the invisible armies in the fulness of His purpose. It was thus most appropriate expression in the mouth of the prophets, denoting the assured conviction of the final triumph of God over all evil. It is usually rendered appropriately by LXX., κατοικίον πατρικότατον, “the Lord Omnypotent.” The word ἔνταξιν has been carried over into two N.T. passages (Ro.9.29.; Jas.5.1), and has become the peculiarity of the Temple and the Sanctus of the Te Deum. It is remarkable that the expression does not occur in any part of the Pentateuch, from which A. C. Robinson argues (Churchman, Sept. 1900, Expos. Times, Jan. 1908) that these books were written before the title came into use. But it is also remarkable that Eschatological use of the prophet never employs it. Driver, “Amos” (in lamb, Bible, adn. note on ch. 3.13.

Hotham’, a man of Asher; son of Heber, of the family of Beriah (1Chr.7.22); perhaps, though not certainly, = Helin in ver. 35.

Hothan (R.V. correctly, Hotham), a man of Aroer, father of two of David’s mighty men (1 Chr.11.44).

Hothir, a son of Hemam (1Chr.25.4,28), and therefore a Kohathite Levite.

Hour. The ancient Hebrews were probably unacquainted with the division of the natural day into 24 parts. The general distinction was into two periods of twelve hours, and the day (Ps.55.17) were sufficient for them at first, as for the early Greeks; afterwards the Hebrews parcelled out the period between sunrise and sunset into a series of divisions distinguished by the sun’s course. The early Hebrews appear to have divided the day into four parts (Neh.9.3), and the night into three watches (Judg.7.19). It is known that the Greeks adopted the division of the day into 12 hours from the Babylonians, and it is generally supposed that the Hebrews learnt it from the Babylonians during the Captivity. Certainly it was known to the Egyptians at a very early period. The Hebrews divided the interval between sunrise and sunset into 12 equal portions, so that the hour varied in length perpetually with the time of year. These intervals are usually called temporal hours, to distinguish them from the equinoctial hour, which is the 24th part of a solar day, or of the day reckoned from one sunrise to the next. These are the hours meant in the N.T., Josephus, and the Rabbis (Mt.20.6; Jn.11.9, etc.). What horological contrivances the Jews possessed in the time of our Lord is uncertain; but we may safely suppose that they had gnomons, dials, and clepsydrae, all of which had long been known to the Persians and other nations with whom they had come in contact. For the purposes of prayer the old division of the day into four portions was continued in the temple service, as we see from Ac.2.15,3.1,10,6.0.

House. The Canaanite and Heb. houses (Herem) found by recent excavation in Palestine much resemble those still built, being of stone in hill districts and of sun-dried bricks in the plains. The masonry is of no great size and only very rudely squared, being set in mortar. The roofs are now formed of brushwood laid on rude rafters, and covered with clay or cement, which is frequently rolled with a stone roller. Such roofs are easily removed (Mk.2.2; Lk.5.15). The house has usually a single storey, and the roof is either flat or (when of stone) has a central dome, such as is represented on Assyrian bas-reliefs. Booths made of poles, covered with leaves on their
PLATE XVI

MODEL OF AN EGYPTIAN HOUSE.
(Brit. Mus.)

HOUSE-TOPS (Lu.12.3). W.D.A.

WOODEN MODEL OF AN EGYPTIAN HOUSE (INTERIOR). (Brit. Mus.)
branches, are often placed on the roof as sleeping-places in summer, as at the Feast of Tabernacles in O.T. times. A small yard, and a stable for cattle, are sometimes added to such houses (1Sam.28.24). The flat roofs were surrounded, as they still are, by a battlement (Deut.22.8). The windows are small and high up, often closed by a wooden lattice. [WINDOW: LATTICE.] The better class of houses (Jer.22.13,14) [PALACE] appear to have been built round a central court, as is still the custom for the houses of the rich in Syrian cities, and included a harem, or private apartment, occupied by the women (2K.9.30). A verandah, with a gallery above in some cases, often opens from the rooms into the court. The "guest-chamber" (Lu.22.11) is the livin or principal room, with a divin or raised part at one end, but appears also to have been sometimes [PARLOUR] as an "upper chamber" (Lu.22.12; Ac.13.9,17,20,28), and even third storey (2K.20.9). Ahaziah (2K.1.12) fell through the wooden lattice of an upper chamber, and windows so closed (to secure privacy) often project beyond the wall of the house. A small upper chamber (dliyyd) was easily added in a village house (2K.4.10). In the court there was sometimes a well, or an underground cistern (1Sam.17.18), in which chimneys are unknown [WINDOW], and charcoal in braziers is used instead; but wood fires in an outer hall seem also to have been used (Lu.22.55) in palaces (Jn.18.15,18). Store cupboards made of clay, for holding grain, are often found on the inner walls. The furniture consists at most of a low table, and the family sits on mats, and spreads beds on the ground at night in any convenient room, if the house has more than one. The roof was used for taking the air, and for private communication (1Sam.9.25,26; 2Sam.11.2, see 16.22; Pr.21.9). Summer and winter rooms were found in large houses (Je.36.22) as wells were erected on the roof of upper chambers (2K.23.12; Je.19.13,15,22.29; Zeph.1.5), and prayer was so offered under the open sky (Ac.10.9). The Heb. word is used of a tent, a tabernacle, and a temple, as well as of a dwelling-house. Thus the Philistines assembled probably in a temple of Dagon (Judg.16.25-30), and crowded on roofs, which, while supported by two pillars, watching the approach of Samson. [C.R.C.]

Hukkok, a place on the boundary of Naphtali (Jos.19.34) named next to Aznothtabor. Now Yagug, a village on a low hill nearly 5 miles N.W. of Magdala. [C.R.C.]

Hukok (1Chr.8.75) = Helkath.

Hul, second son of Aram, and grandson of Shem (Gen.10.23).

Huidah, a prophetess, whose husband Shallum was keeper of the wardrobe. King Josiah sought her opinion with regard to the copy of the law found by Hilkiah (2K.22.14).

Hunting. This was an ideal both in Jewish ethics and in Christian life. To Greeks "self-sufficiency" and "magnanimity seemed the highest personal ideal. To early Romans, and to Socrates and Epicureans later, personal dignity and happiness were the supreme good, but to the Hebrews the great One living God was a God of power, majesty, and righteousness (Ps.8.5). They lived in the presence of One to Whom they owed all: humility of soul was thus the outcome of exaltation. With psalmists and prophet, humility, a "low opinion of their own importance and merit," was constantly emphasized, and men like Saul and Pharaoh condemned. In N.T. Christ's teaching and life proclaimed the same truth. His words (Matt.9.35,10.15; Matt.11.20) were illustrated by, e.g., His setting the child in the midst of His disciples (Matt.18.1-5) and by His washing their feet (Jn.13). At Caesarea Philippi the acknowledgment of His Messiahship was followed by the lesson of His suffering and humiliation and death. The Incarnation itself was the consecration of self-abasement and humility. Thus rasteuos, <...>, in pre-Christian literature almost invariably words of reproach, became in Christian ethics expressive of the highest ethical virtue; so St. Paul sums up: "This mind... which was also in Christ Jesus, Who... humbled Himself... and became obedient unto death, even the death of the cross." Henceforward humility was the highest exaltation. [C.C.R.]

Humta, a city of Judah in the mountain-district, next to Hebron (Jos.15.54).
and much skill was exercised in catching them.

The following were the most approved methods:

1. The trap, which consisted of two parts, a net, stretched across a river, and a stick to fix it, but so placed that if it did not get way at the slightest touch (Am.3:5, gin; Ps.69:22, trap).

2. The snare (Job.18:9; A.V. robber), consisting of a cord (Job.18:10; cf. Ps.18:5, 116, 140:5), so set as to catch the bird by the leg. (3) The net. (4) The decoy, to which reference is made in Je.5:26, 27.

Hupham, a son of Benjamin, founder of the family of the Huphamites (Num.26:39).

Huphaph, the head of the 13th course of priests in the time of David (1 Chr.24:13).

Hupplin, head of a Benjaminite family. According to the L.X.X. (Gen.46:21), a son of Benjamin.

Hur. — I. A man mentioned with Aaron, as staying up the hands of Moses during the battle with Amalek at Rephidim (Ex.17:10, 12). He was, with Aaron, left in charge of the people by Moses during his ascent of Sinai (24:14). Josephus (Ant. ii. 4, vi. 1) says that he was the husband of Miriam, and identical with — 2. The grandson of the primary grandfather of the tabernacle "son of Uri, son of Hur, of the tribe of Judah" (Ex.31:2, 35:30, 38:22). In the lists of the descendants of Judah in 1 Chr. the pedigree is more fully preserved. Hur there appears as of the family of Pharez, being son of Caleb, son of Hezron, by a second wife, Ephrathah (1 Chr. 2:19, 20; cf. 1 Sam. 25:4, 5). The firstborn of that marriage (2:50, see R.V.; 4:4) and father of three sons (besides Uri; 2:26) who founded the towns of Kirjath-jearim, Bethlehem, and Beth-gader (2:51). Hur's connexion with Bethlehem would seem to have been closer than with the others.

The fourth of the five kings of Midian, who were slain by Rahab after the "matter of Peor" (Num.31:8). Later, in Jos.13:21, they are called princes (R.V. chiefs) of Midian and dukes (R.V. princes) of Sihon. — 4. Father of Rephaiah, 4 (Ne.3:9). — 5. The "son of Hur" —— Ben-Hur —— was an officer for Solomon in court Ephraim (1 K.4:8).

Huram. — 1. A Benjamite; son of Bela, the first-born of the patriarch (1 Chr.8:5). — 2. The form of the name of Hiram, king of Tyre, in 1 Chr.14:1, 2 Chr.2:3, 11, 12, 8, 18, 9, 10, 21. — 3. The same name occurs in 2 Chr.2:13, 4, 11, 16, in that of Hiram the artificer.

Hurt, [father of Anam, 7 (1 Chr.5:14).

Husband. [Marriage; Family.]

Hushah, a name in the genealogies of Judah (1 Chr.4:1) — "Tzer, father of Hushah." It may be the name of a place.

Hushai, an Archite. [Archite.] He is called the "friend" of David (2 Sam.15:7); cf. 1 Chr. 27:31; the word is rendered "companions," David sent him to confuse the counsels of Absalom (2 Sam.15.12ff., 16, 16ff., 17, 5ff.). He was probably the father of Baana (1 K.4:16).

Husham, one of the early kings of Edom (Gen.36:31, 35; 1 Chr.1:15, 16). [Teman.] Hushathite. The designation of a hero of David's, generally named Sibbachai (2 Sam.21:18; 1 Chr.20:4). Sibbecai (1 Chr.11:2, 27, 11), and by an case corruption (Driver in loco), Meunain (2 Sam.23:27).

Josephus calls him a Hittite.

Hushim. — 1. In Gen.46:23 "the children of Dan" are said to have been Hushim. The name is plural, as if of a tribe rather than an individual. (A. M. R.) In Num.26:42 the name is changed to Shapharai (1 Chr.7:12) stated to be "the sons of Ahgar." — 3. One of the two wives of Shaharaim (8:8).

Husks. The word (képátor) rendered in A.V. "husks" (Lu.15:16, see R.V. marg.) describes the fruit of the carob-tree or Ceratonia silqua of botanists. This tree, very common in Syria and Egypt, produces pods varying in length from 6 to 10 in., and about a finger's breadth, or rather more, in width. The tree (kharrîbâh or kharrîb) is solitary. The beans are sold in the bazaars chiefly to feed animals (Tristram, Nat. Hist. Bible, p. 361). In the Mishna (Shebith vii. 7) they are said to have been steeped in wine, as they now are in water, for a cooling drink. [C. C. G.]

Huz (R.V. correctly, Uz), the eldest son of Nahor and Milcah (Gen.22:21).

Huzzab, according to the general opinion of the Jews, was the queen of Nineveh when Nahum delivered his prophecy (Na.2:7). The L.X.X. has him as "the mother of Nebugor-marg, "that which was established," and R.V. renders as "the one that is decreed". Kautsch regards the text as probably corrupt — it may be a noun with the article, referring to the Assyrian queen. Further light is needed. [R. G. P.]

Hyana. Authorities are at variance as to whether the true hyaena (Hyaena) means a "hyæna" as the L.X.X. has it, or a "speckled bird," as in A.V. The etymological meaning of the word is equally adapted to either, the hyæna being streaked. The only other instance in which it occurs is as a proper name, Zeboim (1 Sam.13:18). The valley of hyænas, "Aquila; Ne.11:34. Tristram, who rightly identifies the Arab, dība (hyæna) with rība, strongly favours the translation "hyæna," more especially as the striped hyæna (Hyaena striata) is common in Syria and Palestine, and must have been well known to the Jews. [R. L.]

Hydaspe, a river mentioned in 1 Th. 1:6, with the Syriac Es-inaph. Its course is uncertain, but it may possibly be the Chosapes of Susiana, in which case the form is probably due to confusion with the Hydaspes in N.W. India. The Syriac has ULAI. [R. G. P.]

Hymieneus, mentioned twice in St. Paul's Epp. to Timothy: first with Alexander (1 Tim. 1:20); and secondly with Phileletus (2 Tim. 2, 17, 18). He is charged by St. Paul with saying that "the resurrection is past already," and has been considered as one of the earliest of the Gnostics. The sentence passed upon him of being "delivered to Satan" scarcely can be mere ecclesiastical excommunication. As the apostles healed all manner of bodily infirmities, so they seem to have possessed and exercised a like power of inflicting them (Ac.5:5, 10, 19, 13:11). Even apart from actual intervention by the Apostles, bodily visitations are spoken of in the case of those who approached the Lord's Supper unworthily (1 Cor. 11:30), and Satan was held to be the instrument or executioner of all these visitations. Hence the "delivering to Satan" is, in some respects, differentiated from ecclesiastical
HYMNS

Excommunication. [Gnosticism; Excommunication.]

Hymns. "Psalms and hymns and spiritual songs" are twice joined together by St. Paul (Eph.5.19; Col.3.16), as if he were enumerating the distinct elements of Christian worship. And no doubt there is in a general way a broad distinction between them. The essential feature of a psalm is that it is sung to instrumental music at times of private or public worship; that of a hymn that it ascribes praise to God; while a song (or ode) is of a more general character, and implies nothing of composition by the singing, and it is therefore qualified by the epithet "spiritual," in order to restrict its application. [Poetry, Hebrew.]

The word "hymn," however, is used with freedom in both O.T. and N.T. with reference to all kinds of metrical or rhythmical songs. Thus in the LXX title of the psalms, both Ps. and Sir. in and "hymn" frequently occur, either with or without combination with "psalm" (cf. Ps. 65.1,72.20; Josephus, 7 Ant. xii. 3). So too, there is the famous "Hymn of the Fathers" (Ecclus.44.1ff.), and Judith's "New Hymn," in which she celebrates the death of Holofernes (Jlth.16.1ff.). The hymn which we ascribe to Lord H. and His Apostles sang on the eighth night of their betrayal (Mt.26.30; Mk.14.26) was probably the latter part of the Hallel (Ps.115-118), the Paschal song. In Ac.16.25 the hymn of the imprisoned apostles were probably Christian effusions more like what we usually denote by the term (cf. Ac.4.24ff.); and we gather from 1Cor.14.16-17.1 and 15 that the practice of hymnody was encouraged and often resorted to in the early Church. St. Luke in his gospel has preserved for us four of the earliest Christian hymns, which the Church has always held to have been first uttered on the important occasions to which they are ascribed by him in his gospel. They are: the Psalms, the Christ and the Gospels; Lightfoot's note on Col.3.16; and Trench, Synonyms of N.T., pt. ii. § xxviii. The rise and development of Christian hymns in post-Biblical times lie outside our scope. [C.I.P.]

Hyssop (Heb. tzqbh; Arab. adhdbb), a word borrowed by the Greeks (with many others) as forswvta (Jn.19.29; Heb.9.19). The adhdbb, or miriamin ("Mary's plant"), is the marjoram (Origanum syriacum), a labiate with furry leaves, whence the name meaning "hairy." It grows between the stones of ruined walls, and is sold in bunches for sprinkling purposes. It is the "spice" of the T.T. requirements (2K.4.33), and used for sprinkling blood (Ex.12.22) and for purifica-
tions (Lev.14.4,51; Num.19.6; Ps.51.7). The caper (proposed by Royle), called "asal", is rare in Palestine, and not so used. In the Mishna the Gk., coloured, Rom., and desert hyssops are distinguished (Nega'im xiv. 6); but only one was sacred (Psarak xi. 3), and called "simply hyssop"; this was the marjoram (Shebibth iii. 9), not "mint," sometimes supposed to be the hyssop of the Gk. Dioscorides (Satureia graeca). Hyssop is distinguished from origany, and from a third similar species ("egereico ii. 2"). Greek hyssop was taken as medicine (Sat.ath. xiv. 3), and the marjoram was also apparently eaten, or the "pennyroyal." Mint is common in Palestine. [C.R.C.]

I

Tbhar', one of the sons of David born in Jerusalem (2Sam.5.15; 1Chr.3.6,14.5).

Ibleam', a city of manaseh, with villages or towns dependent on it (Judg.1.27), situated in the territory of Issachar (Jos.17.11). The ascent of GUR was "at Ibleam" (2K.2.27).

Now Yebba, 6 miles N. of Beisan. Ibleam is probably not the same place as Ibleam (1Chr.6.70). [C.R.C.]

Ibneiah', son of Jehoram, a Benjamite chief (1Chr.9.8).

Ibnjah', a Benjamite (1Chr.9.8).

Ibrl', a Merarite Levite of the family of Jaziah (1Chr.24.27) in the time of David.

Ibzan' (sphen's) of Bethlehem in Zebulun judged Israel for 7 years (Judg.12.8-10). He found wives for his 30 sons and husbands for his 30 daughters from other tribes. He was buried at Bethlehern. [H.M.S.]

Ichabod' (no glory), the son of Phinehas; so named by his dying mother, because the news of the death of the ark of God and the capture of Bethlehern arrived as she gave him birth (1Sam.4.19-22).

Icenium, the modern Konia, is situated in the W. part of an extensive plain, on the central table-land of Asia Minor, and not far to the N. of the chain of Taurus. This plain was anciently called Lycaonia. Xenophon reckons Iconium one of the limit of Caria and Pisidia. Leucippe and Priscia; but all other writers speak of it as being in Lycaonia, of which it was practically the capital. It was on the great line of communication between Ephesus and the W. coast of the peninsula on one side, and Tarsus, Antioch, and the Euphrates on the other. It was thus very suitable for missionary work (Ac.14.1,21,16.2). St. Paul's first visit was on his first circuit, in company with Barnabas; and on this occasion he approached it from Antioch in Pisidia, which lay to the W. From its position it could not fail to be an important centre of Christian influence in the early ages of the Church. In the declining period of the Roman empire, Iconium was made a colony. It is still a town of considerable size.

Idalah', one of the cities of Zebulun, named between Shimron and Bethlehern (Jos.19.15).

In the Jerusalem Talmud (Megillah i. 1) it is placed at Hirl, probably the ruin Husawrah, near Beit Lathum of God's hill. S. PINS.

Ibdash', one of the three "sons" of Abi-

Etam, in the genealogy of Judah (1Chr.4.3).
Iddo represents in the Eng. versions several Heb. and Gk. names.—1. (N'g, 'Aṣdō, Addo.)

Father of Ahinadab (1 K.4.14).—2. (B'g, 'Aṣdō, Addo.) Descendant of Gershom (1 Chr.6.21); called Adahah (ver. 41).—3. (B'g, 'Aṣdō, Addo.) Son of Zechariah, ruler of the tribe of Manasseh.

Hosea "Ah (5) variably rendered 'Aṣdō, Addo.') A seer whose writings are cited as an authority for the reigns of Solomon, Rehoboam, and Abijah. They are called "the visions of Iddo the seer concerning Jeroboam, the son of Nebat" (2 Chr.9.29), the history of Iddo the seer after the manner of [or, in reckoning the genealogies] (12.15), "the commentary of the prophet Iddo" (13.22). They are not quoted in 1 Kings. The books are lost. Jewish tradition identified them with the disobedient prophet.—5. (B'g, 'Aṣdō, Addo.) Grandfather of the prophet Zechariah (Zech.1.1-7), returned from Babylon (Zech.6.12) and king of Judah (1 Chr.6.21-24).—6. (N'g, Eddo; called Lodeus, 1 Esd.8.45,46, R.V.)

The chief of those who assembled at Casiphia at the time Ezra sent a deputation of chief men from Ahava to him to bring him ministers for the house of God (Ezr.8.17).

Iddo: Image. There are about twenty different words rendered in our version "idol" or "image," but these are not specific names of so many different idols. 1. One set of expressions, all of similar sense, simply express the fact that the idol is an "image" or "likeness." Thus: (1) čidm, the word occurring in Gen.1.26, and rendered "image" in all its occurrences, except in Ps.39.6, "vain shew" (R.V. marg. "as a shadow"). (2) smel, rendered "image" (Ezk.8.3), "figure" (Dent.4.16), and "idol" (2 Chr.33.37), (3) tmvm, usually rendered "likeness" (Ex.20.4, etc.) or "similitude" (Num.12.8, etc.), and in R.V. "image," except in Ex.21.17, "cipher" (N.I.); (4) atd, graven images (marg. "set in similitude"), probably meaning form, once only in this sense {Is.45.16), when it is rendered "idols": 1). Another set of expressions denotes the material, particular form, or mode of fabrication: (1) pesi', from a root meaning "to how," rendered a "graven image" by R.V. in all occurrences, and also by A.V., except in Jer.19.16, "carved image" (Judg.18.18, 2 Chr.33.37). (2) psli', a variant form of the preceding, only in the plur., and also rendered by R.V. "graven images," except in Judg.3.19,26, "quarries" (marg. "graven images"). [GILGAL.] 2. The A.V. agrees except in 2 Chr.32.32, 33.14. [carved images] with the root "to pour out," is the standing word for a drink-offering, and so rendered in the great majority of instances. But it is also used of a molten image, and so rendered by both A.V. and R.V. in Is.41.20, 48.5, Je.10.14, 51.17. From the same root we have (1) mivvkhâ, the usual word for a molten image, e.g. the molten calf (Ex.32.18, 19). (2) 'a'Abbim (only in plur.), probably derived from a root meaning "to shape," as in Job 10.8, "Thine hands have framed me" (R.V.); almost always translated "idols" in E.V.; and in 2 Sam.5.21, "images." In Je.50.2 A.V. has "idols," while R.V. has "images." A shorter form, 'a'Abbim, is in one passage (Is.48.5) rendered "idol," and another form, 'evâb (Je.22.28), is "idol" in A.V., but a vessel "of clay," apparently from a root "to roll," is generally regarded as meaning "blocks," and is translated by both R.V. and A.V. "idols," everywhere, except in Je.50.2, when A.V. has "images," (7) mîykhâb, from a root "to set up," always in R.V. "pillar," with "obelisk" in marg. The A.V. also has "pillar" in many places, but in others "image," with "standing image" or "statue" in many. [PILLARS.] (8) maskith is variously rendered. When joined with "stone" it is in R.V. "figured stone," and in A.V. image of stone." In 1 Pr.25.11, A.V. has "pictures" and R.A.V. marg. filigree work, in Ezk.8.12, both A.V. and R.V. have "imagery." Some suppose it represented the winged sun-disk. [Picture] (5) hamma'nâmim, always in R.V. "sun images"; in A.V. "images" and marg."sun-images." In one place (2 Chr.34.7) A.V. has "idols." [TERRAPHIM.] 111. A number of other words express the feeling or notion of the taboos against which the Deuteronomic legislation protests. (1) dâvim, meaning "trouble," "sorrow," is applied to idolatry in general (e.g. Is.41.29, and in one passage 66.3) is rendered "idol." (2) 'ê'îl, probably having the primary sense of weakness, has usually the meaning of worthlessness, as e.g. in "physicians of no value" (Job 13.13), and then applied to the dynasties or idols as things of nought, and usually rendered "idol" in E.V. (3) 'ô'ô, "terror," "dread," once (Je.50.18) rendered "idols." (4) miphîleçth, a horrid thing, from a root "to shudder," used only of the idol made byAsia's mother Maachah (1 K.15.13; 2 Chr.15.16), "an idol in a grove." A.V., "an abominable image for an Asherah." R.V. "shqjñq, an abominable thing, only once, in the plur. (2 Chr.15.8), "abominable idols." A.V., "abominations," in R.V. A shorter form, 'shgdy, is used of animals ceremonially unclean.—It is possible that some of the passages of the Deuteronomistic Code have been imitations or modifications of more distinctive names of the respective idols. We know, e.g., how bô'sheth, "shame," was substituted for ba'tal (cf. 2 Sam.2.8 with 1 Chr.8.33); Hosea also uses Beth-aven for Bethel (Hos 4.13, 5.8, 10.5); and Israel was admonished to "make no mention of the name of other gods" (Ex.23.13) and to "destroy their name" (Dent.12.3). Some of the words seem purposely framed or chosen to suggest contempt. Thus 'arabbim and its cognates would call up the verb "to hurt, pain, grieve"; gillîdim is akin to a word meaning "dung"; tè'ô has also the meaning of "pangs"; and 'êlim may have been left to suggest the location (lying in the first two letters) of 'êlim, "gods," a word which indeed in one place (Is.57.5) is rendered "idols" in A.V., but in R.V. "oaks." There seems to be an intended play upon words in Ps.96.5: All the gods ('êlim) of the peoples are idols ['êlim]. The sacred writers do not furnish sufficient details of the form of the various idols. Since the Decalogue forbids the making for worship of any likeness of anything in the heaven above or on the earth beneath or in the water under the earth, we may infer that images or symbols of these various classes were known. The forms, human or otherwise, which were given to the idols would
no doubt, by the accentuation of some feature, suggest the attribute which was supposed to distinguish the idol; the bull, e.g., suggests strength, and images, supposed to be of As-tarte, which have been found in recent excavations, seem to emphasize this idea of fertility. Dagon of the Philistines had a face and hands (1Sam.5.4), and some suppose it had the tail of a fish. From Ps.115.5-8 we may conclude that idols were more or less of human form; and the same inference may be drawn from Isaiah's sarcastic description of the making of an image (Is.44.12-19). We also gather from 40.19,20,41.7 that the core of the idol might be of wood, while it was coated with metal and adorned with ornaments. But when idolatry was universally practised, as among the Canaanites, many of the idols would be rude enough, and recent excavations at Taanach and Gezer, e.g., have brought to light forms which were evidently or even from want of artistic skill, fully justify the contemptuous expressions used of idols by the Biblical writers.

Idolatry, a word signifying in its literal sense, an opprobrious term, has been used six times in the Bible (only once in O.T., 1Sam.15.23, A.V.) as a general term for all kinds of worship other than that of the true God. It is the offence against which the first two of the Ten Commandments were directed (Ex.20.2-6). The Gk. term is not, however, found before the time of the first Ptolemies. The cognate term, the idols of the Gentiles is used by him (Gal.5.20; 1Cor.10.14; Col.3.5). Without using the term in either case, the great apostle of the Gentiles states two different, complementary rather than contradictory, views of idolatry, in his addresses to the two capitals of western heathenism—Athens and Rome. At Athens (Ac.17.22-31) he gives a careful philosophical sketch of natural religion, and of mankind grooping upward through superstition to the true, though unknown, God. To Rome (Ro.1.20-32) he writes the analysis of man's declension from primitive revelation to the penal state in which, with abominable accompaniments, he is by his offenses forbearing to his fellows, and of various lower creatures. There is, however, in St. Paul no mention of that particular idolatry with which the early Church was most brought into conflict, that worship of the emperor which led St. John to describe Pergamum, where it was pre-eminently practised, as "Satan's throne" (Rev.2.13).

Yet that idolatry, through the deification of the state in the person of its chief ruler, throws light on the political power of idolatry in the period covered by the Bible record. It shows us the state preserving its political integrity by requiring a unity of worship from all its members. Hence the complaint made at Thessalonica—"these all act contrary to the decrees of Caesar, saying that there is another king, one Jesus" (Ac.17.7), where the situation is exactly parallel with that at the courts of Nebuchadnezzar and Darius (Dan.3.12,18,6.5,13). Each state had its own deity—e.g., Chemosh of Moab, Molech of the children of Ammon. This correspondence with this general conception that Israel should have its own God (Mi.4.5) although He was deemed to be the Most High God (Deut.32.8), and has for a title, connected with the entry into the Promised Land, "the Lord of all the earth" (Jos.3.11,13). So intimate was the connexion between the state and its deity judged to be, that the consequence of its affections was to involve the conquest of its gods (Is.45.1), whose subjugation was symbolized by the use of their implements of worship for the religious banquets of the conquerors (Dan.1.2.5.3; cf. Ezr.1.7-11). The same idea was illustrated by the conqueror changing names compounded with that of the deity of the conquered race for names compounded with that of his own deity. Thus Daniel becomes Belteshazzar (Dan.4.8), Hanunah Shadrach, Mishael Meshach, and Azariah Abednego (Dan.1.7). In this connexion there is significance in the omission from the name of the renegade Ahaz, in the Hebrew prexj Jeho imperfectly found on the monuments (Sayce, Fresh Light, etc., p. 112). The king of Assyria boasts that the gods of no country or city have been able to deliver their people out of his hand, and that therefore it is imprudent of J udah to trust to its covenant God (2K.18.30,33-35.19.9-19). It is possible that this effectiveness of the national tutelary gods sprang from the prowess and subsequent prestige of such representative heroes as Ninrom (Gen.10.8-10), who appears to have been worshipped in later days as a deity, under a variant from his own name—Merodach (Je.50.2). Two events connected by tradition with Ninrom's city of Babel, his subjugation of his fellows, and of various lower creatures.

For the worship of another god, whose name was supposed to be imperial, bear on the Biblical history and conception of idolatry: (1) He is thought to have been the builder of the tower of Babel, and the different names for the same God, consequent upon the confusion of tongues, may have led to polytheism; while (2) Abraham, threatened with punishment by Ninrom for re-fusing to worship his gods, restates the primeval doctrine of the unity of God. To Abraham we owe that strange name of plural form and singular meaning—Elohim—which suggests that he saw that "whatever were the names of the Elohim worshipped by the numerous clans of his race, he would find in them the name of the true God. Thus, Elohim—comprehending by one name everything that ever was or ever could be called divine—became the name by which the monotheistic age was rightly inaugurated" (Stanley, Jewish Church, lect.1.). The idolatry of the ancestors of the Jewish race is recognized in their own sacred writings (Jos.23:2): it is recognized, too, that it was so engrained in their nature, and they were so prone to it, that for ten centuries it was not purged out of them, and then only a remnant remained pure. Abraham, called out from his tribesmen and their false worship, extracts from his servant Eliezer a promise that he will not take Isaac back to that seductive atmosphere (Gen.24.6). Yet Isaac's son, Jacob, has to cleanse his household from the possession of strange gods (Gen.35.2). In spite of the covenant made at mount Sinai, the Israelites promptly set up a golden calf (Ex.32.2,4,35), and were offered another, otherwise, definite promise of grace, "if you will only follow me completely idolatrous. Not only had they, as Amos (5.26) taunts them, "Sakkuth your king and
Kewan your godstar, your images," but they made no resistance to the allurements of Moab (Num.25:2). This was the worse, as not only had they received the Ten Commandments, but they had been shown (through the directions given for furnishing the tabernacle) how the likeness of cherubim could be made on ark and veil without their becoming objects of worship (Ex.25:16,26:31). It was clear, too, that objects and usages familiar in the Egyptian religion were meant to be adapted for the pure Israelitish worship without necessarily involving any risk. During the wars of settlement under Joshua, the temptation to idolatry was kept at bay, only to recur with overwhelming force in the succeeding generations, when the grandson of Moses himself consented to act as the priest of an idol set up at Dan by Micah (Judg.18:30); and each successive lapse was punished by an oppression from which deliverance was effected by the various judges. Yet the sons of Eli brought Israel into the deepest degradation of all by treating the ark of God as if it were itself a mere idol, and causing it to be so considered by the Philistines (1Sam.4:3,5), who, however, found the divine presence a too great risk to be captured. They were only too thankful to be rid of its presence (1Sam.5:11). The Philistines, however, still maintained their supremacy over Israel, and (with a view to the recovery of their independence) the Israelites, at Samuel's instigation, renounced their idolatries (1Sam.7:1-10), but the sanctuary maintained at least publicly, until the time of Solomon, who allowed each of his own wives to have a sanctuary for her national deity on the mount of Olives (1K.11:7,8). This apostasy was punished by the division of the kingdom, and Jeroboam, the ruler of the northern portion, in order to maintain its religious as well as political independence, prohibited his subjects from going to worship at Jerusalem, providing them instead with golden calves at Bethel and Dan (1K.12:26-28). Henceforward he was known as the sinner "who made Israel to sin" (1K.14:16,15:30,16:29), for the ten tribes never recovered their religious independence; the kingdom in spite of the extermination of Baal prophets and Baal worshippers by Elijah and Jehu (1K.18:40; 2K.10:18-28); and their conquest by the Assyrians only led to a deeper pollution of the land by the introduction of fresh idolatries (2K.17:22,23,32,33; Ezr.4:2,3). In the small southern kingdom there were three reformations, carried out respectively by Asa (1K.15:12), Hezekiah (2K.18:4), and Josiah (2K.23:14): yet its punishment was inevitable (2K.23:26,27; cf. 1Ch.28; Ezk.8:3,10,11,16), and in the time of Nebuchadnezzar the whole of the nation, with some inconsiderable exceptions, was removed to Babylon (2Chr.36:11-23), whence a remnant returned (at the edict of Cyrus) only to fall again into idolatry, from which they were cut away by the drastic measures of Ezra (Ezr.9.1,10.14). The spread of Gk. influences—through the conquests of Alexander—led first to the toleration and then to the practice of idolatry by the Jews (1Mac.4:1-55,54); but the attempt of Antiochus Epiphanes to enforce this form of worship led to the vigorous resistance of the Hasmoneans; and by that time the Jewish nation was utterly purified from all taste for idolatry. The idea current in some quarters, that Israel itself believed that Jehovah could be worshipped in idolatrous emblems and with idolatrous accompaniments, and that hence the children of God cannot be maintained as such textbooks as the Books of Judges and Samuel, all represent such conduct as a decline—e.g. (Judg.8:27) Gideon's ephod "became a snare," and it is with a note of horror that the author of Judges records (18:31), "and they set them up Micah's graven image, which he made, all the time that the house of God was in Shiloh." The books of Judges, Samuel, and Kings are reckoned by the Jews themselves among "the prophets," and it is therefore only natural that their point of view should be similar to that which we get in the prophetic denunciations. Phases of idolatry found among the chosen people are the worship on "high places" and in "groves," where the altar had as its adjuncts the sacred pillar maccóbhá and wooden post 'ashéra. There is also evidence of such worship of the reproductive forces of nature as led to the consecrated harlotry of both sexes (Deut.23:18; Ho.4:13; 1K.15:12), though "formation" is often used in a moral sense, hindering the Nation from being unfaithfulness to the covenant God of Israel (Ezk.16:15-13; Ho.2:7,8; Ps.106:39); and shortly before the Captivity we find the chariot and horses of the Sun-god stabled in the temple at Jerusalem (2K.23:11). So far as externals were concerned, there was a worship in general of the covenant worship and idolatry as to sacrifice, which was regarded as the provision of food for the deity (Lev.3:11; Is.65:11; cf. the gross imposition described in the story of Bel and the Dragon), and took the form of animal sacrifice (1K.18:23), drink offerings (Je.7:18; Is.57,6), and presentation of tithes and first-fruits (Ho.2:8-10). One ceremonial rite, kissing, is adapted from the general Eastern custom of proffering homage and service (1Sam.10:1). It is found in the worship of the calves (Ho.13:2), and of Baal (1K.19:18), and in sun-worship (1K.18:31), "my hand hath kissed my unclean lips," i.e. the kiss (Job 31:27). A more subtle form of idolatry than the worship of images took possession of the Jewish race, after the grosser forms of it had lost their attraction—viz. that love of money which is a root of all kinds of evil, the covetousness which is idolatry (1Tim.6:10; Eph.5:5; Col.3:5). This covetousness is connected with "over-reaching," and that, again, with the viler temptations of such a seaport town as Thessalonica (1Th.4:6), so that idolatry is ranked as a work of the flesh (Gal.5:20), and excluded from salvation (1Cor.6:9). Because of the lascivious associations of idolatry, Christians were warned against sharing in idol feasts (1Cor.8:10); for though in itself an idol is nothing, a "no-god," (1Cor.10:20), yet it stands for all practices which tend to dethronc God in favour of His creatures. Hence the "canon of the New Testament closes with a shudder: Little children keep themselves from the idolaters. (1K.5:21). Attention may be drawn to a remarkable sermon by Dean Church, which deals with "the idols of refined and civilized men" (Cathedral Sermons, pp. 154-157). [C.R.D.B.]
IDUEL

Iduel (1EdS.8.43) = Ariel, 1.

Idumea (Mk.3.8), Idumea, for Edom in Is.34.5,6; Ezk.35.15,36.5; 1Mac.4.15,29,61, 5.12. In 2Mac.12.12, Idumea = 2Mac.10.15,16. R.V. reads Edom in N.T. and Apoc., but Edom elsewhere. In 2Mac.12.32 the reading should probably be Jannia; cf. 1Mac.5.5,59 and Josephus, t2 Ant. vii. 6.

Igai—1. One of the spies, son of Joseph, of the tribe of Issachar (Num.13.7).—2. A hero of the children of David, son of Nathan of Zobah (2Sam.23.36), called Joel "brother of Nathan (1Chr.11.38)."

Igdaliah, "the man of God," the father of Hanan (1Ch.3.5,4 only).

Igeal (R.V. Igai), son of Shennaiah; in the royal line of Judah (1Chr.3.22).

Ilm (ruins: Num.33.45), or Ile-abarim (ruins of the places beyond: 21:13,33.44.—1. A place "in the desert facing Moab towards sun-rise," and "in the border of Moab." The probable site is 'ilmah, a place 2 miles N. of Tophel, and 4 miles S. of the border stream Zered, which was the next stage in the Hebrew march to Moab.—2. A town belonging to Judah near Beer-sheba (Jos.15.29), of which the site is unknown. [C.R.C.]

Ijon (of springs), a town in Upper Galilee attacked by Benhadad I. of Damascus (1K.15.20; 2Chr.16.4), and by Tiglath-pileser in 734-732 B.C. (2K.15.29). The name may survive at the Mer 'Ayin (meadow of springs), W. of Hornam, as the place is noticed with Dan and Ashtaroth. [C.R.C.]

Ikkeshe, father of Isa, 3 (2Se.23.26; 1Chr.11.28,29.7).

Ila, an Ahohite, a hero of David's guard (1 Chr.11.29).

Illyricum, an extensive district lying along the E. coast of the Adriatic from the boundary of Italy on the N. to Epirus on the S., and contiguous to Moesia and Macedonia on the E. (Ro.15.19).

Image. [IODL]

Imla, Imlah, father or progenitor of Micahah the prophet (1K.22.8,9; 2 Chr.18.7,8).

Immanuel. All exposition of Is.7.14 must ultimately rest on two points: the Mother, the Child. (1) The Child is to receive the name of Immanuel = God-with-us. "The name is evidently part of the sign, and has to be explained in connexion with it. Why call a child God-with-us who is not going to act greatly or to be highly honoured, who is only going to suffer, for whom to come to years of intelligence shall only be to come to a sense of his country's disaster and his people's poverty?" (Prof. G. A. Smith, i. 116). Accordingly Prof. Smith's conclusion is that "it seems quite impossible to dissociate so solemn an announcement by Jehovah to the house of David of the birth of a child, so highly named, from that expectation of rapid and manifest regaining of national prosperity current in this royal family since the days of its founder." Immanuel, then, is to be identified with the Messiah. In His activities the people will have a wonderful experience of the presence of God (cf. Orelli, Der Prophet Jesaja, p. 35, and Orr, Virgin Birth, p. 135). It is the child of the earthy woman who is conceived, the traditional idea of the Messiah which would be intelligible to the hearers. (Cf. Gressmann, Der Ursprung der Israelitisch-jüdischen Eschatologie, pp. 276, 277 [1905]; cf. Mi.5.2.) Moreover, it is evident that "a recently born human child cannot help his people; only a divine child could stand in that role." (Cf. Genesis, Zum religiöse geschichtlicher Verständnis des Neuen Testaments, p. 24 [1903].) It certainly seems that the prophet anticipated a realization of this prediction within the lifetime of his contemporaries. The primary prophetic reference to the immediate delivery does not obscure or exclude the thought of a remote possibility, in a deeper sense and on a vaster scale. (2) The Mother is described as the Virgin. "There are signs that the view that Isaiah was using current mythological terms, and intended his ἀνεμφατον to carry with it the sense of supernatural birth, is rightly regaining ground." (Allen on St. Matt. p. 10.) "As a matter of fact, there is no conclusive evidence to show that this word was ever used in the O.T. except with reference to a virgin" (Matthew's Sweet Birth and Infancy, p. 60, where cf. his criticisms on Gesenius; Orr, Virgin Birth, p. 133). "If men had realized the old Oriental circle of ideas they would never have doubted that in the mind of the writer of Is.7.14 an actual son of a virgin was intended." (Jeremias, Babylonisches in Neuen T. p. 47); and, in any case, the Gk. translators rendered the word by "virgin" in this passage, instead of "young woman." To say, as Arno Neumann does, that they did so wrongly, merely expresses the idea of reference, and cannot alter the fact." Moreover, as he acknowledges, "Matthew (1.23) accepted this rendering, as others also did" (Neumann, Jesus, p. 50). The rendering by the Gk. translators is significant of the interpretation current in their time. A valuable note on ἄνεμφατον was found in R. R. Ottley's Book of Isaiah acc. to the LXX, vol. ii.

Immer—1. The founder of a family of priests (1Chr.9.12; Ezr.2.37,10.20; Ne.7.20, 11.13) whose was the sixteenth course of the service (1Chr.24.14). [Amariah, 4.]—2. Apparently the name of a place in Babylonia (Ezr.2.59; Ne.7.17).

Immutability. [Future Life.]

Imna, son of Helam, an Asherite (1Chr.7.35; cf. 49).

Imnah—1. [Imnna].—2. Father of Kore, 2 (2Chr.31.14).

Imnah, a descendant of Asher, of the family of Zophah (1Chr.7.36).

Imrei—1. A man of Judah, of the family of Pharez (1Chr.9.1).—2. Father of Zaccur, 4 (Ne.3.2).

Incarnation. (1) Apostolic Doctrine. The final outcome of Christian reflection in the Apostolic age may be instanced in four groups. (1) Pauline (see esp. Ph.2.5f.), which affirms the personal pre-existence of Christ: His original existence in the form of God; and His deliberate assumption of the form of man, with all that such an assumption included. Cf. sCor.8.9, where He Who once had the riches of the heavenly life is asserted to have chosen instead, out of love to man, the poverty of the earthly form in which He seems to have been permanently indwelling in Christ of the full plenitude of the substance (not the mere
resemblance) of the Godhead is asserted. (Cf. Holtzmann.) (ii) Johanneum (Jn. 1:14). In the beginning was the Word, and the Word was with God, and the Word was God. (3) The Word became flesh; that is, says St. Cyril, became man. The evangelist does not say, "came to the flesh," which might suggest a relation of the Word to Jesus similar to that with the prophets or the saints, but actually was made flesh—that is, human. (St. Cyril Alex., in S.J. r.14, Migne, ci. 157-160.) (iii) St. Peter's testimony, as we might anticipate from his character, is simple, unreserved. He implies Christ's pre-existence in 1Pe.1:11; seems to call Him the living Word in 1Jn.1:23; describes His mediatorial work in 3:18, (iv) Viewed in the Acts, (iv) the nature of the Person who has been constituted or declared heir of all things, was the Agent in Creation, who was the Splendor of divine Glory and express Image of the divine Substance, and who also appeared in human history. The Person who pre-existed in heaven, who was sacrificed on earth, who was exalted to high-priestly entrance into heaven, is one and the same. These are successive stages in one personal experience. (2) His Relation to the Trinity. All belief in the Incarnation requires as its logical basis the distinctive Christian conception of God—that is, the affirmation of inner distinctions within the divine Personality. Hence the Incarnation has emphasized the Fatherhood of God, and filled that term with new and profounder contents than it ever possessed before, or can otherwise possess. For fatherhood now appears as an essential characteristic of God which is distributed within the persons of the Trinity, relative to the Creation. Even if the Creation had never been, the Son is He in whom the divine Fatherhood is eternally realized. (Cf. Eph.3:15, R.V. marg., and Dean Robinson's Commentary.) The distinction between a Trinity of manifestation and an essential Trinity is not apostolic nor compatible with Christianity. The N.T. conception is that God reveals what He is; that Fatherhood and Sonship denote permanent distinctions within God Himself. (See also Hastingworth, Trinity, 147.) (3) The Idea of Incarnation. It means self-investiture by a divine Person in the constituent elements of the nature of man. The Son of God, eternally pre-existent, assumed human nature before that human nature came to possess any personality of its own. Thus He united, in indissoluble unity, with His divine Self, human body, mind, heart, and will. In Mary's Child so close is the similarity between God and man created in God's Image—a divine Person actually took the place occupied in every other human birth by a created person. In other words, the personality of Jesus is divine and not human. Thus, whereas at every other human birth an increase is made to the sum-total of existing persons, this was not the case at the birth of Jesus Christ. By His human birth the number of persons existing in the universe was not increased. "Homoousias personarum. (St. Augustine, Ep. 140, ii. 655.) (4) The Purpose of the Incarnation is twofold: enlightenment and strength (illumino, adjutorium; St. Aug., Ep. 137 to Tertullian), increase of knowledge and increase of power: corresponding to man's deepest defects, which are ignorance and weakness. (i) Viewed in the aspect of enlightenment, it is the self-revelation of God in the most adequate way, i.e. in person. (Cf. Ottley, Incarnation, p. 253.) God's self-revelation is (a) through Nature, which, being impersonal, cannot adequately reveal the personal (Ros. 1:20); (b) through mankind, which reveals Him imperfectly because of its moral imperfections; (c) through Incarnation, which alone is adequate, because here alone moral perfection is displayed. (Cf. Heb. 1:3. (ii) Viewed as strength. "Jesus introduces into the heart of humanity a new regenerative force" (Ottley, p. 21). The Incarnation is the necessary basis of reconciliation. The ideally perfect Man presents the perfect homage to divine Righteousness. But the ultimate purpose is to invigorate weak mankind by the infusion of the spiritual principle of His own glorified humanity. (5) The Preparation in History. The necessity for preparation ought not to be surprising. A few objections against delay are worthless, men being incompetent to judge, although able to discern a providential process afterwards in history. (Cf. Ac. 14:17. (i) In the world at large. The comparative study of religions shows endeavours to effect the union of God and man in two directions: either by bringing down God to man, or by elevating imperfect man to divinity. Neither achieved success. The former degraded God, the latter retained man's imperfections. Yet both intended well. Incarnation alone consummated this union. The intellectual preparation is seen at the beginning of the church's history, in expression which provided a competent instrument for the magnitude of the idea. (Cf. Lux Mundi; Godet, Bibl. Stud., O.T., p. 18; Harris, Self-revelation, p. 68.) (ii) In the nation. The selection of Israel was not to the exclusion of the world, but for its sake. (Cf. Gwatkin, Knowledge of God, i. 133: Robinson, Ency- Ency. of the Old Testament, p. 25.) Incarnation but Israel were the conditions such as would provide for the Son of God a natural religious human development. (iii) In the home. The selection of the nation is consummated in the selection of the Virgin Mother. (6) The Relation to Modern Thought. Incarnation presents a difficulty to those who regard the theory of development as involving continuous progress and excluding the notion of breaks or crises or the introduction of new elements from without. The doctrine must remain difficult, it is isolated from God's connexion with the universe. The relation of God to Nature is not identical with His relation to mankind, nor His relation to mankind with that to Christ. (i) God's relation to nature is Immanence. Despotic absolutism must be dismissed. God pervades the creation, which exists in Him. This truth of Immanence must be balanced by that of His personal transcendence. (ii) God's rela-
INCENSE

tion to mankind is moral and natural, a relation of Will to will, of benevolence, of resemblance, of adoption. It begins with creation in His Image, a constitutional resemblance capable of conversion into a moral resemblance increasingly closer and very intense. Not the result of the difference between Creator and creature is absolute. (ii) God's relation to the Incarnate Christ is prepared for by the fact of man's creation in the divine Image, the supreme achievement consisting in the actual replacement of a created personality by an uncreated. This is a relation of equality. Hence Incarnation, although unique, is not an unprepared event, but the crown of a process. Moreover, self-communication is the essential characteristic of Deity. To nature He imparts existence, to mankind adoption, to Christ equality. The last, which is really the first, is the eternal self-communication of God within His own Personality. The tendency to substitude Immanence for Incarnation is an unfortunate confusion of two terms by no means equivalent. [TEMPATION (2) (iii.)] [W.J.S.S.]

Incense. The term has two applications: (1) The substance which, when burned, exhales an aromatic perfume; and (2) the odor arising from such composition as essential to the ritual of the worship. The use of aromatic perfumes has always been more common in the East than in the West. [PERFUMES.] Perhaps the use of incense in sacrifices can be thus explained. Men believe that what is so gratifying to themselves is pleasing to the deity. Men believe that the reverent attitude and the incense as a survival in popular superstition of a more primitive and unrefined conception of the use of fumigation—viz. to expel demons (cf. Tob. 6:1-7, 8:1-3).—An Adjunct of Worship in O.T. Though incense occupies a prominent place in the ritual legislation of the Pentateuch, there is no other certain reference to its use in Israelite worship till the time of Jeremiah (7th cent. B.C. ; cf. 6:20, cf. 41:5). In E.V. incense is used to translate two Heb. words. (1) Pbahôhâ, most frequently rendered frankincense, a species of gum which appears in the ritual legislation as a concomitant of the meal-offering and to the "Black Incense," Lev. 24:8. Pure frankincense was also placed (in two golden vessels) on the table of shewbread, and when the loaves were removed on the following sabbath, this was burned as a "memorial" ('ashârd) on the great altar (Lev. 24:7-9). (2) qôôreth. This word, however, strictly means the sweet smoke (of sacrifice), e.g. 1 S. 1:13. It is used of the sweet smoke of frankincense and other compounds which made up the qôôreth hassamim, the "incense of aromatics" prescribed in Ex. 30:34. This compound included among its constituents frankincense, and was offered independently in the form of the incense offering (qôôreth tamidîh, Ex. 30:8) daily, morning and evening. It was burned on the golden altar in the holy place, according to Ex. 30:7ff., by the high-priest himself. The earlier usage presumably was to burn the incense in censers, each priest possessing one (cf. Lev. 10:18, 19). But in the ritual the golden altar took the place of censers, which were merely used for transferring the coals from the altar itself to the golden altar. The complicated formula for compounding the incense is given in Ex. 30:34-38. [LATER USAGE AND SIGNIFICANCE. In the Herodian temple the ceremonial of the incense-offering was more elaborately developed. The incense itself is a more elaborate compound, consisting (according to Josephus) of thirteen ingredients. The proper preparation and compounding of these was a mysterious art. The secret was carefully guarded in the last period of the temple by the family of Abitinas, who were assigned a special room in the precincts of the sanctuary for this purpose. The duty of burning the incense no longer devolved on the high-priest, but was assigned daily by lot to a priest who had not performed the function before (cf. Lk. 1:8-10). The most solemn moment was when the officiating priest (alone within the holy place) sacrificed himself to the altar fire. At the rising of the smoke the people withdrew from the inner court, and prostrated themselves, spreading out their hands in silent prayer. This was followed apparently by the recitation of the Shema (Deut. 6:4f., etc.), and the ten commandments, together with certain benedictions, the whole being concluded with the priestly blessing, pronounced by the officiating priest and his deputy and extended from the steps from the front of the temple. Incense is regarded in Scripture as a symbol of prayer (a natural idea suggested by the rising of the sweet smoke heavenwards). Cj. Ps. 141:2; Rev. 8:3f. 5:8. Maimonides, Mishna Torâ (Temidin u-Musaphim). Older monographs in Ungnad, Theban O.T. [G.H.B.]

Incest. [CRIMES; MARRIAGE.]

India. The name of India does not occur in the Bible before the book of Esther, where it is noticed as the limit of the territories of Ahasuerus in the E., as Ethiopia was in the W. (1:1-8). The India of the book of Esther is not the peninsula of Hindustan, but the country surrounding the Indus, the Punjab and perhaps Scinde. In 1 Mac. 8:8 India is reckoned among the countries which Eumenes, king of Pergamus, received out of the possessions of Antiochus the Great. In the 4th cent. B.C. the Assyrians probably traded with India: Herodotus refers to the "Black Incense," 3.88; the "Asiatic elephant," 4.137; the "Rhinozeros, and Apes brought as tribute. [TARSHISH.] The early notice of Cinnamon and other Indian products in O.T. may thus be explained. [RACES.] [C.R.C.]

Inheritance. [FAMILY.]

Inn. The Heb. word (mdâôn) thus rendered lit. signifies "a lodging-place for the night." Inns, in our sense of the term, were, and still are, unknown in the East, where hospitality is religiously practised. Even the khans, or caravanserais, the nearest parallel to European inns, were established but gradually. It is doubtful whether there is any allusion to them in O.T. The place-of-a-caravan was selected originally on account of its proximity to water or pasture, by which the travellers pitched their tents and passed the night. Such was undoubtedly the "inn" at which occurred the incident in the life of Moses, narrated in Ex. 4:24 (cf. Gen. 42:27). On the more frequented roads of Palms (J. & K.), caravanserais were in course of time erected,
often at the expense of the wealthy. The following description of one on the road from Baghdad to Babylon is typical: "It is a large and substantial square building, in the distance resembling a fortress, being surrounded with a lofty wall, and flanked by round towers to defend the inmates in case of attack. Passing through a few gateways, the guest enters a large court, the sides of which are divided into numerous arched compartments, open in front, for the accommodation of separate parties and for the reception of goods. In the centre is a spacious raised platform, used for sleeping upon at night, or for the devotions of the faithful during the day. Between the outer wall and the compartments are wide vaulted arcades, extending round the entire building, where the beasts of burden are placed. Upon the roof of the arcades is an excellent terrace, and over the gateway an elevated tower containing two rooms—one of which is open at the sides, permitting the occupants to enjoy every breath of air that passes across the heated plain. The terrace is tolerably clean; but the court and stabling below are ankle-deep in chopped straw and filth" (Loftus, Chaldea, p. 13). The πανοξιον (Lu.10.34) probably differed from the κατάβασμα (2.7) in having a "host" or "innkeeper" (10.35), who supplied some of the necessary provisions, and attended to the wants of travellers.

Insolvency. [Loan.]

Inspiration. [Scripture, Holy; Spirit, Holy.]

Interest. [Loan.]

Iphedielah', a Benjamite chief, one of the Bene-Hashshah (1Chr.8.25; cf. 28).

Ir (1Chr.7.12). [Eri, i.]

Ira'.—1. "The Jahrite," named in the list of David's chief officers (2Sam.20.26); possibly the same as—2. A hero of David's guard; an Ithrite (2Sam.23.38; 1Chr.11.40).—3. Another of David's guards, a Teoite, son of Ikkesh (2Sam.23.20; 1Chr.11.28-27.9).

Iram', grandson of Cain, and father of Mehujael (Gen.4.18).

Iram, a leader of the Edomites (Gen.36.43; 1Chr.1.51).

Ir-ha-heres (A.V. the City of Destruction), a city in Egypt (Is.19.18). There are various explanations. (1) "The city of the sun," a translation of On. (2) "The city Hereis," the Egyptian sacred name of Heliopolis (Khu-Ra), "the abode of the sun." (3) "A city of destruction," i.e. that one of the five cities mentioned should be destroyed. (4) "A city preserved," i.e. that one should be preserved.

Iri'ah', son of Shelemiah, a captain of the ward, who arrested Jeremiah at the gate of Benjamin, on the charge of being about to desert to the Chaldeans (Jer.37.13,14).

Ir-nahash' (1Chr.4.12), a town (mentioned in the genealogy as if a personal name) apparently of Judah. Perhaps Der Nakhkhas, 2 miles N.E. of Retth-Jibrin, the modern Der (convent) having taken the place of the Heb. 'ir (city). It is a small village. [C.R.C.]

Iron, one of the cities of Naphtali (Jos.19.38); now Yárūn, a village 7 miles S.W. of Ke'desh. [C.R.C.]

Iron (Heb. barzel; Aram. also parzel), mentioned with Brass as the earliest of known metals (Gen.4.22). As it is rarely found in its native state, but generally as an oxide or carbonate, the knowledge of the art of forging iron, which is attributed to Tubal-cain, indicates that the difficulties attending the smelting of this metal had been overcome. The natives of India and Africa employ an extremely simple and very ancient method, which though rude is effective, and suggests the possibility of similar knowledge in an early stage of civilization. The natural wealth of the soil of Canaan is indicated by describing it as "a land whose stones are iron" (Deut.6.9), which, however, is not strictly true of Palestine proper. The book of Job contains passages which indicate that iron was well known. Of the manner of procuring it, we learn that "iron is taken from dust" (Job 28.3). The "furnace of iron" (Deut.4.20; Is.8.5) is a figure which vividly expresses hard bondage, as represented by the severe labour of smelting. Sheet-iron was used for cooking utensils (Ezk.4.3; cf. Lev.7.9). That it was plentiful in the time of David appears from 1Chr.22.3. The market of Tyre was supplied with bright or polished iron by the merchants of Dan and Javan (Ezk.27.19). The Chalyles of the Pontus were celebrated as workers in iron in very ancient times. The produce of their labour is supposed to be alluded to in Je.15.12, as being of superior quality. Iron was known to the Egyptians at a very early date, the first instance of its occurrence being in a tomb of the 6th dynasty (c.3400 B.C.), but it had not become common, either here or in Greece, in Mykenian times (c.1500 B.C.), so the allusions to it in the Pentateuch are no anachronisms. During the next five centuries it gradually became common. There are some mines in Egypt, others in the S. of the Lebanon, and the ores are of frequent occurrence. That ancient iron articles are so rarely found may be partly accounted for by the fact that iron is easily destroyed by moisture and exposure to the air. The Egyptians obtained their supply exclusively from Assyria. Proper in the form of bricks or pegs. Specimens of Assyrian iron-work overlaid with bronze were discovered by Mr. Layard, and are now in the British Museum. Iron weapons of various kinds were found at Nimrud, but fell to pieces on exposure to the air. Iron knives found at Tell Loh in Chaldea may be as old as 2500 B.C.; and iron is mentioned in the Amarna tablets (15th cent. B.C.). Malleable iron was in common use, but it is doubtful whether the ancients were acquainted with cast-iron. The rendering given by the LXX. of Job 40.18 seems to imply that some method nearly like casting was known, and is supported by a passage in Diodorus (v. 13). In Ecles.38.28 we have a picture of the interior of an ironsmith's (Is.14.12) workshop.

Irpeel', a city of Benjamin (Jos.18.27). Probably the village Ka-fil near Gibeon. [C.R.C.]

Ir'esh (Heb. Beshesh, 1.)

Ir'u', eldest son of Caleb, son of Jephunneh (1Chr.4.15).

Isaac was the son of the old age of Abra-
ham and Sarah, given in accordance with the repeated promises of God some years after Abraham had become the father of Ishmael by Hagar, Sarah's bond-maid. It was he whom Abraham believed himself called upon to offer up to Jehovah on mount Moriah, and Isaac's acquiescence in the sacrifice is but typical of the meekness which he appears to have displayed all through life. His wife Rebekah was brought to him from the kinsmen of his father by Eliezer, Abraham's steward. He became the father of twins, Jacob and Esau, by Rebekah, when at last, in accordance with his prayer, God granted her children. He assisted his half-brother to bury Abraham, and settled in the S., by the well Lahai-roi. Driven by famine to Gerar, he practised on Abimelech the king a stratagem similar to that of Abraham on account of his wife. The narrative is now concerned with the wells which he made, only to be dispossessed by the Philistines. He appealed to the security of his security, marred possibly by domestic trouble if we may judge from the incident of the strategy practised by his wife and younger son. He died at the age of 180, and was buried by his two sons. The name of Isaac seems certainly connected with "laughter," and several persons in his family have the same connexion with his birth. Little is told about him, not sufficient for us to form a distinct impression of his personality, and we are left with the idea of a quiet, restful, meditative, good-natured, not too energetic temperament, a picture enhanced by his strong desire for sons. If in fact he lived as the narratives connected with his birth. The only incident upon which the memory fixes is the one theologically important, viz. the intended sacrifice on mount Moriah. Whether viewed as literal history or as edifying story, this incident is of immense importance. On the one side it is typical of the sacrifice on Calvary, on the other it is evidence of a time when human sacrifice was giving way to the slaughter of animals. There can be little doubt that the idea of an innocent victim is the objectionable idea to the early Hebrew (cf. the story of Jephthah). The story of the sacrifice of Isaac points to the time when the religious consciousness was beginning to see that Jehovah could be satisfied with something less than the human firstborn as a proof of devotion, that a beast could be used to redeem the son. The story must have stood as an example warning to the Israelites against any tendency to lapse into this awful practice. Viewed from the more conservative position, the trial of Abraham's faith became a crucial factor of much of later Judaistic and even Christian theology, and the faith of father Abraham is one of the cardinal points in the Jewish system.

[II.F.S.]

Isaiah. In all "the godly fellowship of the prophets" no one holds a more conspicuous place, for nobleness of character, clearness and steadiness of prophetic vision, or historical significance, than Isaiah. He lived through a most critical period of Israelite history, having seen the two kingdoms at the height of their prosperity, the ruin of the one, and the miraculous deliverance from ruin of the other; and in the eventful times of his own kingdom he took, in his own person, a great part. Of his father Amoz we know nothing; the name is different in the original from that of the prophet Amos, and there is nothing to support the Jewish tradition that he was a near relative of king Amaziah. Yet, from the prominent position which he occupied, the intimate terms on which he seems to have stood with the royal family, and the emphasis he lays on the influence of the aristocratic party, it is not unnatural to conclude that he was of noble parentage or high social position. As "Judah and Jerusalem" are uppermost in his thoughts, it is believed that he was a native of, and resident in, the capital; and, from the fact that his wife is called by him "the prophetess"—the only wife of a prophet so designated in O.T.—wemay suppose that his wife had a part in his prophetic work. He had at least two sons, to whom he gave symbolic names; and it would appear that he regarded his own name also (=salvation of Jehovah) as symbolical (Is.8.18). These are all the particulars we know of his personal history. He disappears entirely from the sacred records after the disaster from Nineveh to 701 B.C. during a period regarding which we are fairly well acquainted. He lived in the reigns of four kings of Judah—Uzziah, Jotham, Ahaz, and Hezekiah; and the book which bears his name contains prophecies falling presumably within the four reigns, bearing on the religious, political, and social condition of his own country, as well as others relating to peoples and countries with which Judah came into contact. The prophetic word, during such a long ministry, must have been spoken at sundry times and in divers manners; and, though there are references to certain things that the prophet prophesied (see 8.16, 30.8.15) it is clear that there were good grounds for concluding that the book, in its present form, came from his hand. In all probability the single prophecies, or small collections of his prophecies, would be written from time to time after the addresses were delivered, and from these smaller collections the book, in its final form, was no doubt compiled by those who collected the prophetic writings. The book follows, in the main, the course of history. Yet we cannot take the order of the chapters as the precise order of the events to which they relate: the prophet's call, e.g., is not recorded till ch. 6. And, since we are fairly well informed as to the sequence of the events of the prophetic career, we may suppose that the purpose of gaining an intelligent view of the book, to take the history as our guide, and to mark the chief prophetic addresses which either plainly declare their reference, or by fair inference can be referred to definite events and episodes. The year of the prophet's call, the year that king Uzziah died, marked an

24
era in Israelite history. Uzziah of Judah and Jeroboam II. of Israel were almost contemporaneous, and under them the kingdoms had enjoyed about half a century of prosperity. The borders of the northern kingdom were greatly extended (2 K. 14. 23) ; and in the southern kingdom, the army had been strengthened and organized (2 Chr. 26. 11-15), trade and commerce extended (26. 2), and under improved husbandry the land brought forth plentifully (ver. 10). But prosperity had bred luxury, and with luxury set in decay. It may be that Isaiah, living in the midst of this, and brooding over the danger, was thus prepared for the vision by which he was consecrated to his life's work (Is. 6). The temple and its service are to his inner gaze etheralized, and a house of another building rises before him. The mercy-seat becomes God's throne, the cherubim are transformed into majestic seraphim, veiling their faces with their wings, and adoring Him Whose train fills the temple. Two things were revealed to Isaiah, the boundless holiness and glory of God and the imperfection and sinfulness of himself and his people ; and the call addressed to him and willingly accepted was to speak in the name of such a God to such a people. This hard task, for which the word was not to be listened to; yet his work, being God's, would not be in vain; though the many should harden their hearts and perish, yet a remnant should return. These became cardinal points in Isaiah's teaching, which he was soon called upon publicly to enforce. Jotham, who had shared in the reign of Ahaz during the small days of Uzziah's reign, had not been long seated on the throne when an ominous sign appeared on the horizon. The great Assyrian empire, which a century before had made its power felt as far W. as Palestine, began a new course of conquest with the accession of Pul, or Tiglath-pileser III. (745 B.C.) ; and the small states in the W., too weak singly to bear the brunt of the invasion, saw it to be their policy to combine for resistance. Already in the reign of Jotham we have intimation (2 K. 15. 37) of a league of this kind between the kings of Syria and Israel, into which, apparently, they endeavoured to draw the petty kingdoms of Judah and Benjamin. This, and the conspire to dethrone the king of Judah and to set in his place one who would be in sympathy with their policy (Is. 7. 1, 2). The prophet, reading God's purpose aright, saw in the Assyrian advance the preparation of the rod for the chastisement of his people's sin. At this time, accordingly, we may place those discourses (in Is. 2. 4) in which Isaiah appears in the usual prophetic attitude of reproof of sin and denouncer of judgment. Very soon thereafter he has also to act the part of national political adviser. For in the reign of Ahaz the league of Syria and Israel took shape in the Syro-Ephraimitic war, in which Judah was invaded, and its territory curtailed (2 K. 16. 6; 2 Chr. 28. 5). The small northern states that lay on the westward march of the Assyrians had been swept away or made tributary; and to a merely worldly policy the temptation was strong of not to combine with Israel and Damascus for resistance, then to make terms with the advancing Assyrian so as to be out of the attack of the confederates. Ahaz was not the man to look to a Higher Power, and his heart "was moved and the heart of his people, as the trees of the forest are moved with the wind" (Is. 7. 2). At this juncture Isaiah comes forward with a better policy. He has with him his son Shear-jashub (a remnant shall return); and the burden of his vision is that, though there will be affliction for a time, God will be the defence of His own. "Take heed and be quiet... If ye will not believe, surely ye shall not be established" (Is. 7. 4, 9). It was on this occasion that he delivered the first of those mysterious and lofty prophecies of Immanuel (God with us, 7. 11); and apparently not long after that he gave to another son the name Maher-shalal-hash-baz (Haste-booty, speed-prey), in which, through the gloom of deep national distress, shines the promise of final deliverance and lasting peace (9. 6, 7). To this period may also belong 17.11, announcing the downfall of Damascus and Ephraim, and ch. 1 describing the devastation produced by the invaders, unless, perhaps, this refers to the later invasion of the Assyrians. The prophet's advice and warning were vain. Ahaz made terms with the Assyrians (2 K. 16. 7), and, though the immediate effect was the "small" of the word was not to be listened to; yet his work, being God's, would not be in vain; though the many should harden their hearts and perish, yet a remnant should return. These became cardinal points in Isaiah's teaching, which he was soon called upon publicly to enforce. Jotham, who had shared in the reign of Ahaz during the small days of Uzziah's reign, had not been long seated on the throne when an ominous sign appeared on the horizon. The great Assyrian empire, which a century before had made its power felt as far W. as Palestine, began a new course of conquest with the accession of Pul, or Tiglath-pileser III. (745 B.C.) ; and the small states in the W., too weak singly to bear the brunt of the invasion, saw it to be their policy to combine for resistance. Already in the reign of Jotham we have intimation (2 K. 15. 37) of a league of this kind between the kings of Syria and Israel, into which, apparently, they endeavoured to draw the petty kingdoms of Judah and Benjamin. This, and the conspire to dethrone the king of Judah and to set in his place one who would be in sympathy with their policy (Is. 7. 1, 2). The prophet, reading God's purpose aright, saw in the Assyrian advance the preparation of the rod for the chastisement of his people's sin. At this time, accordingly, we may place those discourses (in Is. 2. 4) in which Isaiah appears in the usual prophetic attitude of reproof of sin and denouncer of judgment. Very soon thereafter he has also to act the part of national political adviser. For in the reign of Ahaz the league of Syria and Israel took shape in the Syro-Ephraimitic war, in which Judah was invaded, and its territory curtailed (2 K. 16. 6; 2 Chr. 28. 5). The small northern states that lay on the westward march of the Assyrians had been swept away or made tributary; and to a merely worldly policy the temptation was strong of not to combine with Israel and Damascus for resistance, then to make terms with the advancing Assyrian so as to be out of the attack of the confederates. Ahaz was not
prophecy against Shebna, the leader of the Egyptian policy; 28, the prophet's insistence, in the face of opposition, on a policy of "rest"; and 30-35, directed against the Egyptian ideal, and its advo-
cates to describe the commotion in Jerusalem as the invading host surrounded the city; and 37.22-35 is the proud defiance, by the prophet, of the Assyrian who had impiously defied the God of Israel. It will be observed that, whereas ch. 1-12 are concerned with "Judah and Jerusalem," its last chapters from 13-23 relate more particularly to the various nations whose fortunes were of chief concern to Israel. These prophecies are no doubt the written deposit of discourses pronounced from time to time, as these nations came more directly in contact with Judah, to whose fort-
tunes there is throughout a more or less pronounced reference. Some of these prophecies, either explicitly or by obvious reference, date themselves; others are more vague in this respect, and in some of the chapters the prophet reaches a world-wide outlook. 36-39 are historical, and correspond closely with 2 K. 18.13-29. They describe the capture of Sennacherib, and gather up details of the life of Hezekiah, who, as well as the prophet, disappears from the record after that event, and they were evidently placed there to round off the series of preceding prophecies. The re-
mainder of the book, 40-66, are now almost universally believed by biblical scholars to be spread through the prophet's message, and belong to various parts of Isaiah. The reasons for this conclusion are various and weighty. The prophecies are not, as in the earlier portion, ascribed to him; the situation is not Jerusalem, but the land of exile, from which deliverance is promised in the near future; the victorious progress of Cyrus is described as going on (41.1-7), and he is indicated as the instrument with a view less of Babylon will be overthrown and God's people de-
livered (45.1-7). Though prophecies foresee and foreshadow events of the future, there is no in-
stance of a prophet transferring himself ent-
tirely and continuously to a distant future time, and taking no note of the present; time and place the events of which are the work of Isaiah, we should have to regard them as written and laid away against a time distant and unknown. Read as an outburst of prophecy in the Exile, they are intelligible as a message of comfort to the exiles, to give them courage for the coming in of the new age. At the same time we are to bear in mind that, to Isaiah, Assyria was simply the rod of God's anger (10.5), which would be broken and cast away when God's time came, and that he had good cause to forebode evil to his own unfaithful people when the conquering power of Babylon should take the place of the old oppressor (see 39.6-8). Words spoken by him with this in view would be treasured in the minds of his "disciples" (8.16), and would come home with force to their successors when the disaster of the Exile took place. To such words we may see reference in the repeated mention in these chapters (41.22, 42.9, 45.18, 48.5) of "the former", or "old" prophecies, for that period, to pass when the prophet of consolation would inaugurate "new things" which were about to appear in the great Deliverance. Again, just as Isaiah saw the majestic and mysterious

figure of Immanuel looming through the dimness of the Assyrian trouble, so the pro-

phets of the Exile discerned, beyond the downfall of Babylon, the augur figure of the "Servant of Jehovah," whose suffering and death was to bring in everlasting righteous-
ness and peace. There has been endless speculation as to the precise meaning and primary reference of this expression. It is evident that in some places (e.g., 41.5, 42.16) the whole of the Exile is called the "servant," though distinction between the sufferings and the better part of the nation may be discernible. But this explanation will not suf-

fice for other passages, notably 43.1-4, 49.1-6, 50.1-9, 52.13-53.12. Those who hold

a collective sense suppose that the servant here is not even Israel at its best, but Israel in

ideal, as it should be. Those who look for

an individual reference explain the servant as some pious sufferer of former times, as.

e.g., Job or Jeremiah, or some obscure and patient sufferer in the Exile. All are agreed

that in the Lord Jesus Christ the descrip-
tion of the servant finds a fulfillment in a

manner that could be predicated of an individual or of any class; and there is nothing

in the analogy of prophecy or in the words, as

fairly interpreted, to forbid the conclusion that the prophet had a glimpse into the mystery hid

from ages and manifested in Him. The suffer-
ings of the Exile, the widening view of the mis-
sion of the nation of Israel, the great future

of Israel to realize that mission, would be

divine education, by which the prophetic

mind was forced to the conviction that God's

purpose could only be achieved by one endued

with more than human attributes, and by the

suffering of an innocent one for the guilty. The

view that these prophecies are of Exilian date

implies, what on independent grounds is most

probable, that the book of Isaiah, as we now

have it, was compiled after the Exile. And, if

this were so, it is quite conceivable how a post-

Exilian prophecy might be inserted even in the

earlier part of the book: e.g. the prophecy on

the Babylon (13.17-29) is after the events. The

prophecies on the nations, is expressed in language that would not apply to the Babylon of Isaiah's time, but describes it as the mistress of the

nations, the oppressor of Israel, doomed to im-
mediate and utter destruction. So, again, there

are chapters in the second part of the book

(58-59, 63-66) which seem to imply a Palestini-

an background, and the existence of the tem-
ple, and may belong to the period after the return, although some would refer them to pre-

Exilian times. Such a view of the mode of com-
position of the book, however, does not affect

the value of the prophecies, nor detract from

the claim of Isaiah to be called the Evangelical

Prophet. Driver, "Isaiah: his Life and Times"

(in Men of the Bible series); Skinner, "Isaiah"

(in Cambridge Bible); A. B. Davidson,

"Isaiah" (in Temple Bible); Whitehouse,

"Isaiah" (in Century Bible). For a recent

defence of the Isaiahic authorship of the second

part, see Thirle, Old Testament Prophecies

(1907).

Isaah", daughter of Haran, the brother of Abram, and sister of Milcah and of Lot (Gen.

11.29). In Jewish tradition she is identified

ISAIAH 371
with Sarai, but Dillmann points out that this is contradicted by 20.12, and also that Sarah was only 10 years younger than Abraham (17.17), and biblical writers have followed the chronology of his younger brother. Prof. Sayce (Higher Crit. and the Monuments, p. 160) suggests that Isaac is a misreading of Mikeah, as the same cuneiform character may be read indifferently mi' and is. If so, we have in her name direct evidence of the use of cuneiform books on the part of a Biblical writer.

Iscariot. [Judas Iscariot; Sychar.]
Is d ael (1Esd.5.33) = Giddel, 2.
Ishshah', a man of Judah, described as the "father of Eshtemoa" (1Chr.4.17).
Ishbak', a son of Abraham and Keturah (Gen.25.2; 1Chr.1.32). The name suggests the valley called Sabak, in the Dhrum, a fertile and extensive tract in the Nejd, or highland of Arabia.

Ish bi-benob, one of the sons of Philiistine giants; he attacked David in battle, but was slain by Abishai (2Sam.21.16,17). [Non.] Ishbosheth, the youngest of Saul's sons, son of Michal; Absalom's half-brother, as in accordance with the custom explained under Baal. He alone survived his father, who was slain at the battle of Gilboa, and rightly succeeded to the throne; but it was only over part of the nation, as David had already established himself as king in Hebron and was gradually winning over the other tribes. Ishboseth reigned in Mahanaim for two years, his chief adviser being Abner; but he managed to offend the latter, who forthwith made overtures to David. These resulted in Abner's own murder, and Ishbosheth, being left with no capable minister, fell a victim to two assassins, Baanah and Rechab. Their motive for the murder is not stated, nor is the text quite sound in the description of the slaughter. [It is better to follow the LXX., which states that they entered the house while the porteress was sleeping over her task of cleansing the wheat.]

They cut off his head and brought it to David, showed the burial place, and put Abner's body and simply done with a view to ingratiating themselves with the more powerful monarch. They were evidently unprepared for the retribution meted out to them by David, who ordered their immediate execution and had the head of Ishbosheth honourably buried in the grave of Abner in Hebron (2Sam.4.12). [R.F.S.]

Ishi'.—1. Son of Apnin (1Chr.2.31), of the house of Hezron; a descendant of Judah, and father of Sheshan. —2. Another descendant of Judah, with a son Zopheth (1Chr.4.20).

—3. Ancestor of a warrior-family of Simeonites (4.42).—4. One of the heads of the half-tribe of Manasseh; of Jordan (5.24).—5. Ishi' (my husband), found only in Hos.2.16: "Thou shalt call Me Ishi; and shalt call Me no more Baal." The two words mean the same thing [BAAL]; but the latter term had become so much associated with the degrading worship of the ba'alim that the prophet, by the use of the other term, suggested a higher and purer conception of the relation of Israel to their national God.

—6. Ishiah (R.V. Ishiiah), the fifth and youngest son of Ichabod; one of the heads of Issachar in the time of David (1Chr.7.3).
ISMAELITE

[ISMAEL, 1; ISMAELITE]

ISMAIAH, son of Obadiah; ruler of Zebulun in the time of David (1Chr.27.19).

ISHMEELITE (1Chr.2.17), ISHMEELITES (Gen.36.12,18,19,28). Several sons of ISHMAEL, I. (R.V. gives the form ISHMAELITE) throughout the Bible. As A.V. does in Judg.8.24; Ps.83.6). Ishmera', a Benjamite chief, of the family of Elpaal (1Chr.8.18; cf. 28).

ISHOD (1 Chr.7.13; R.V. Ishhod = man of renown), a man of Manasseh, and son of Hamnoom, supposed to be the Cretan, Ishpan', a Benjamite chief, of the family of Shashak (1Chr.8.22).

ISHTOB, named with Zobah, Rehob, and Maacah (2Sam.10.6,8). It is probable that the real signification is "the men of Tob." Ishuah', second son of Asher (Gen.46.17).

ISHUI, Ishui', Ishm'ielite, son of Saul, by his wife Ahinoam (1Sam.14.49; cf. 50).

ISIE (Heb. 'i'), a very widely distributed word in many languages for "sea shore." In Job 32.30, A.V. "islands of the innocent" is, however, a mistake (see R.V. and marg.) for "the not innocent." In Is.42.14 it refers to dry parts or banks of a river: other passages refer to the sea shore, not to islands (Gen.10.5; Is.20.6): but some, perhaps, to an island proper (23.2). In some cases the rendering is doubtful (Is.11.11; Je.25.22), and regions on the mainland of Asia Minor may be intended. See CAPHTOR, which, as "an island," has been wrongly supposed to belong to the Cretans.

ISMAICHAH', a Levite overseer of offerings during Hezekiah's reformation (2Chr.31.13).

ISMAEL'.—1. Jth.2.23 = ISMAEL, son of Abraham. 2. 1Es.9.22. [ISMAEL, 5].

ISMAIAH', a Gibeonite; a leader of the warriors who joined David at Ziklag (1Chr.12.3). Ishmaiah, a Levite, genealogist, of the family of Beriah (1Chr.26.18).

ISRAEL. I. The name given to Jacob when he wrestled with the angel (Gen.32.28,29), and connected by the sacred writer with the verb used in the narrative "as a prince hast thou power" (R.V. "thou hast striven"). The verb occurs again only in Hos.12.4.—II. Applied collectively "children of" to the tribes descended from Jacob (Gen.46.8; Ex.1.1, etc.).—III. The northern tribes, as distinguished from Judah, even before the schism (1Sam.11.8; 2 Sam.20.1; 1Chr.12.16), and thereafter the kingdom of the Ten Tribes. The name is found on the Moabite Stone and in an Assyrian inscription, but in O.T. the name Hebrew is mostly used either by foreigners or by Israelites in addressing foreigners (Gen.39.14; Ex.1.16).—IV. After the return from the Exile again used of the whole people (Ezr.8.16; Ne.11.3). [J.R.]

ISRAEL, KINGDOM OF. (1) The prophet Amos gives (Am.7.14) his death sentence on the latter days of Solomon to announce the division of the kingdom, left one tribe (Judah) to the house of David, and assigned ten to Jeroboam (1K.11.31,35). These were probably Joseph (= Ephraim and Manasseh), Issachar, Zebulun, Asher, Naphtali, Benjamin, Dan, Simeon, Gad, and Reuben: Levi being intentionally omitted. It was not till the death of Solomon that his successor, Jeroboam, was able to count on the allegiance of the greater part of Benjamin, and probably the whole of Simeon and Dan, were included in the kingdom of Judah. Of the conquests of David, Moab appears to have been attached to the kingdom of Israel (2K.3.4); so much of Syria as remained subject to Solomon (see 1K.11.24) would probably be claimed by his successor in the N. kingdom; and Ammon, though connected with Rehoboam as his mother's native land (2Chr.12.3), and afterwards tributary to Judah (27.5), was, at one time allied (20.1), we know not how closely or how early, with Moab. The sea-coast between Jaffa and Joppa remained in the possession of Israel. (2) The population of the kingdom is not expressly stated; and any inference from the numbers of fighting men rests, it must not be forgotten, upon the numbers in the Heb. text, which are often corrupt. [NUMBER.] Jeroboam brought into the field an army of 800,000 men (1K.15.16,33). If the Long Count were correct, the whole population would perhaps amount to at least three millions and a half. (3) SHECHEM was rebuilt as the first capital of the new kingdom (1K.12.25; cf. Judg.9.43). Subsequently the "beautiful" (Can.6.4) Tirzah became the royal residence, if not the capital, of Jeroboam and his successors (15.33,16.8,17,23). Samaria was built in a commanding position by Omri (16.24), and remained the capital of the kingdom until captured after a three years' siege by Shalmaneser, king of Assyria (2K.15.9,10). Jezreel was probably only a royal residence of some of the Israelitish kings. (4) Chronology. The names of the Hebrew monarchs, of which a few may be given, have been used as the basis for the Biblical chronology, and have been accepted by modern writers. [CHRISTIAN.] The following chronology, due to Ussher, and adapted by Whitaker, is probably the best compromise. The Hebrew reckoning, in this as in other respects, has been imperfectly understood by modern writers, and inaccuracy has also been introduced by the Jewish habit of counting parts of years as entire years. The whole history has, in fact, been pushed back, and the foundation of the king-

(5) The detailed history of the kingdom of Israel will be found under the names of its 19 kings. A summary view may be taken in four periods: (a) 930–883 B.C. Jeroboam had not sufficient force of character in himself to make a lasting impression on his people, and failed to found a dynasty. The army soon learned its power to dictate to the isolated monarch and disunited people. Baasha, in the midst of the army at Gibbethon, slew the son and successor of Jeroboam: Zimri, a captain of chariots, slew the son and successor of Baasha; Omri, the captain of the host, was chosen to punish Zimri; and after a civil war of four years he prevailed over Tibni, the choice of half the people. (b) 883–812 B.C. For some 40 years Israel was governed by the house of Omri. The princes of his house cultivated an alliance with Judah, which was cemented by the marriage of Jehoram and Athaliah. But the adoption of Baal-worship led to a reaction in the nation, to the moral triumph of the prophets in the persons of Elijah and Elisha, and eventually to the extinction of the house of Ahab. (c) 812–715 B.C. Unparalleled trials, but deeper humiliation, awaited the kingdom under the dynasty of Jehu. Hazael, king of Damascus, reduced Jehoahaz to vassalage, and triumphed for a time over both the disunited Heb. kingdoms. Almost the first sign of their restored strength was a war between them; and Jehoash, grandson of Jehu, entered Jerusalem as the conqueror of Amaziah. Jehoash also turned the tide of war against the Syrians; and Jeroboam II., the most powerful of all the kings of Israel, captured Damascus, and recovered the whole ancient frontier from Hamath to the Dead Sea.
